A number of former M R P. deputies lost their seats (former constituencies in parentheses), including M. Lecanuet, State Secretary to the *Présidence du Conseil* (Seine-Maritime), Mme. Germaine Poinso-Chapuis, a former Minister of Public Health (Bouches-du-Rhône), the Abbé Gau (Aude), M. Alfred Coste-Floret (Haute-Garonne), M. Juglas (Lot-et-Garonne), M. Letourneau (Sarthe), M. Robert Prigent (Nord), and M. Defos du Rau (Landes).

Poujadists. The Poujadists (U.D.C.A.), as stated above, obtained 52 seats on their first appearance at the polls and received over 2,600,000 votes—12.8 per cent of the total. Poujadist deputies were returned in all parts of the country, although, paradoxically, the U.D.C.A. polled poorly and failed to return any candidates in the Lot *département*—the birthplace of the movement, containing M. Poujade's home town of Saint-Céré.

The 52 Poujadist deputies included 26 shopkeepers of various kinds—provision merchants, *pâtissiers, limonadiers, cafétiers*, etc.—as well as artisans, engineers, manufacturers, building contractors, a farmer, a chemist, an ex-commissioner of police, and two students. M. Pierre Poujade himself did not stand for election (see 14615 A). One of the leaders of the Poujadist movement, M. Jean-Marie Le Pen —*président d'honneur* of the law students in Paris, and an ex-parachute officer—was returned in the Seine department.

Gaullists. The Social Republicans (Gaullists) suffered the biggest defeat of the elections by losing 41 seats and over 3,000,000 votes, their proportion of the total vote falling by 16.2 per cent French political commentators drew the inference that the bulk of the right-wing votes cast in 1951 for the Gaullists (then the R.P.F.) had been transferred to the Poujadists.

Among prominent Gaullists re-elected were General Koenig, the former Minister of National Defence (Bas-Rhin), M Jacques Soustelle, Governor-General of Algeria (Rhône), M. Maurice Lemaire (Vosges,) M. Chaban-Delmas (Gironde), and General Corniglion-Molinier, the last-named being returned in the Alpes-Maritimes department on a joint Radical-R.G.R.-Social Republican list.

Many former Gaullist deputies lost their seats (former constituencies in parentheses), including General de Monsabert (Basses-Pyrénées), M. Henri Ulver, a former Secretary of State (Seine), M. Gaston Palewski, formerly Minister in charge of atomic energy developments, and one of the closest collaborators of General de Gaulle (Seine), M. Marc Jacquet (Seine-et-Marne), M. Schmittlein (Belfort), M. J.-P. Palewski (Seine-et-Oise), and M. Diomedè Catroux (Maine-et-Loire).

Other Parties. The *Rassemblement National* (National Rally), an extremist right-wing "authoritarian" group, returned three deputies. Its leader, M. Tixier-Vignancour (a former deputy), was elected in the Basses-Pyrénées department. Amongst those elected on an "Independent National - U D.C.A list" was M. Jean Dides, a former Police Commissioner in Paris in charge of anti-Communist intelligence, He had been suspended from duty in September 1954, was subsequently arrested, but later released, in connexion with the alleged possession of confidential information on proceedings in the National Defence Committee which had been divulged through a "leakage"

No fewer than 146 deputies of the former National Assembly lost their seats, whilst 61 former deputies did not seek re-election.

Pre-Election Developments.

A total of 28 parties and political groups had registered with the Ministry of the Interior by midnight on Dec. 5-6—the last date for depositing *déclarations d'intention* to contest the elections.

Apart from the major parties mentioned above, there were many small groups and "splinter," parties, e.g., the "League of Consumers for the Lowering of the Cost of Living and the Stabilization of the Franc," the "Group for the Reform of the State and the Defence of Electoral Liberties," etc. None of these groups returned any deputies except the right-wing *Rassemblement National*.

The last date for registering electoral alliances between the parties (*apparentements*) was Dec. 10, when the Ministry of the Interior announced that 995 lists containing the names of 5,381 candidates had been presented for the 544 seats to be filled in Metropolitan France. (At the 1951 election there were 722 lists with 3,962 candidates.) The following electoral alliances were concluded between the major parties:

(*a*) 47 by the Socialists, of which 20 were concluded with the Radicals; 18 with the Radicals, U.D S.R., and various left-wing groups; and 9 with the Radicals (or U.D.S.R.) and the Social Republicans (Gaullists).

(*b*) 52 by the M.R.P., of which 24 were concluded with the *Modérés*; 18 with the *Modérés* and Social Republicans; and 10 with the *Modérés* and the R.G.R.

(*c*) 37 by the Social Republicans, of which 38 were concluded with the *Modérés* and M.R.P., 10 with the *Modérés*, R.G.R., or M.R.P.; and 9 with the Radicals and Socialists.

(*d*) 54 by the *Modérés*, of which 24 were concluded with the M.R P.; 18 with the M.R.P. and Social Republicans, 7 with the M.R.P. and R.G.R.; and 5 with the Social Republicans.

(*e*) 67 by the Radicals (or R.G.R.), of which 38 were concluded with the Socialists; 9 with the Socialists and Social Republicans; 10 with the M.R.P. and/or *Modérés*; and 10 with the Social Republicans, M.R.P., and/or *Modérés*.

No *apparentements* were entered into by the Communists. The Poujadists entered into electoral alliances with various small groups in certain departments, but not with any of the major parties.

The most important political developments during the four weeks before the elections were the formation by M. Mendès-France of a "Republican Front," in the form of an electoral alliance between the left-wing Radicals, Socialists, U.D.S.R., and some Social Republicans; an open split in the Radical Party between the *Mendèsistes* and the R.G.R. (the Radical right-wing, led by M. Faure); and the Socialist Party's refusal to enter into electoral alliances with the Communists.

The "Republican Front." A joint statement was issued on Dec. 7 by M. Pierre Mendès-France (Radical), M. Guy Mollet (Socialist), M. Mitterrand (U.D.S.R.) and M. Chaban-Delmas (Social Republican) announcing that the four parties were agreed upon broad lines of policy, and would work together as a "Republican Front" to elect candidates pledged to common ideals. The statement strongly criticized M. Faure's Government for having—it was alleged—desired a "snap" election in order to preserve the present electoral law, which was denounced as producing unrepresentative results. After condemning the economic, fiscal, social, and North African policies pursued by the Faure Government, the signatories called

upon the electorate to return a majority of deputies who would immediately modify the existing electoral law and carry out economic and other reforms It was pointed out that the electoral alliance would not exclude the right of any of the four parties to enter into similar alliances with other parties

M. Mendès-France issued a separate statement stressing that the four parties, although holding different *nuances* of opinion, were united on general principles and inspired by similar ideals He declared that the "governmental majority "(i.e the supporters of M. Faure) had no definite programme, alleged that they were united by nothing more than the desire to keep or win seats, and said that he (M Mendes-France) and his supporters were trying, on the contrary, to constitute "a real majority of men who were in agreement upon a certain number of precise points." M. Mendès-France denied that the situation could be construed as a struggle between himself and M. Faure, or that he was engaged in a "duel" with the Prime Minister, but declared that there were only two alternatives—either the country would vote for a "dynamic and constructive majority" or it would vote for the *immobilistes*, who, he added, would be "as incapable of governing in the future as they have been in the past."

Split in Radical Party. The split between the "Mendesian" left-wing of the Radical Party and the right-wing (R.G R.) group headed by M Faure was accentuated on Dec. 9 when M. Mendès-France announced the expulsion of a further eight members of the Radical Party for refusing to resign from the R G R. Among those expelled were M. René Mayer, chairman of the High Authority of the European Coal and Steel Community, and a former Prime Minister; M. Martinaud-Déplat, a former Minister, and M. Bernard Lafay, Minister of Public Health, the last-named being expelled on the ground that he had remained in the Government after the party executive had asked him to resign Announcing these dismissals, M. Mendès-France declared that "a man who calls himself a Radical must be one who unequivocally endorses the Radical programme of action, accepted by us and the Socialist Party as the platform on which we are going before the electors. We do not want any ambiguity, or any candidates who face both ways in the name of the Radical Party."

On the same date (Dec 9) correspondence was released between M. Faure and M Mendès-France in which the Prime Minister strongly protested against the "authoritarian methods and process of intimidation" which, he said, were characteristic of the new direction of the Radical Party. M. Faure emphasized that he and his supporters (i e. the R G R) were ready to examine with the leaders of the Radical Party, and of other affiliated parties, any question concerning the selection or joint recognition of candidates, but were not prepared to accept the "authoritarian methods" of the present Radical Party leadership. On Dec. 6 M. Faure had sent a letter to the disciplinary committee of the Radical Party contesting the validity of his expulsion from the party, and insisting that he could not be called upon to give an account to the party for his actions taken in the capacity of Prime Minister.

There was also published on Dec. 9 the text of a letter from the secretary-general of the R G.R to the secretary-general of the Radical Party in which the former declared that the R G.R. would refuse to submit itself "to the judgment of a single trend." After denouncing the "crazy pretension" of trying to make Ministers of the Government responsible to a political party (a reference to the expulsion of M. Faure from the Radical Party), the letter added: "We (the R G.R.) remain Radicals, faithful to ideals that we are certain of serving We feel a certain shame at the totalitarian methods which now obtain in the oldest party of the Republic"

The split between the "Mendesian" Radicals and the R G.R. meant, in effect, that the latter group contested the elections separately from the Radical Party itself According to the electoral statistics issued by the Ministry of the Interior, the 71 seats in Metropolitan France won by the Radicals, R.G R. and U D S R. were divided as follows: 34 "Mendesian" Radicals, 4 U.D S.R. (supporting M. Mendès-France), 18 R G R. (supporting M. Faure), and 15 elected as "Radical and R.G.R." deputies.

The electoral returns also showed that the four parties associated in M. Mendès-France's "Republican Front" ("Mendesian" Radicals, Socialists, U.D.S.R and Social Republicans) obtained a combined total of 132 seats in Metropolitan France.

Socialist Policy. The national council of the Socialist Party adopted a resolution on Dec. 6 declaring that, although opposed to the system of *apparentements*, it was ready to enter into electoral alliances with any party except those of a "reactionary, clerical, or totalitarian character," on the basis of the following principles: (1) preservation of democratic liberties, (2) "the struggle for peace by negotiation, controlled general disarmament, Atlantic defence, and the construction of Europe"; (3) social progress; (4) economic expansion; (5) organization of agricultural markets; (6) peace in North Africa, (7) "the building of a true French Union"; and (8) the "restoration of *laïcité*" [i.e the refusal to continue State grants to Catholic schools under the *Loi Barangé* (see 11878 A), which will come up for renewal in the new Assembly and was an important domestic issue in the elections].

An invitation by the Communist Party to form a Communist-Socialist electoral alliance was rejected by the Socialist Party. The party's national council issued a statement on Dec. 9 saying that such an alliance had been made impossible by the Communist leaders, who had made their own party an "instrument of Soviet diplomacy" and who, "according to the interests of that diplomacy, proclaim at one moment unity with the Socialists and at another throw out coarse insults against those same Socialists." After recalling that the Communist leaders had on numerous occasions described the Socialists as "traitors" and "agents of capitalism," the national council asked how it could seriously consider an electoral alliance with "the men who yesterday were insulting us and who today are holding out their hands to us because it is in the interests of Russia."

Post-Election Developments.

As none of the parties or electoral alliances succeeded in obtaining an overall majority, it became apparent that some form of inter-party coalition offered the only possibility of forming a Government capable of commanding a majority of votes in the new National Assembly. Among immediate post-election developments were an appeal by M. Faure for the formation of a coalition on as broad a basis as possible, extending from the *modérés* on the right to the Socialists on the left; a demand by M. Mendès-France and M. Guy Mollet that the leadership of the new Government should be entrusted to the parties of the "Republican Front"; and an approach by the Communist Party to the Socialists and Radicals for a "Popular Front" between the three parties.

M. Faure's Appeal for National Union. The Prime Minister commented on the election results in a speech to the Foreign Press Association in Paris on Jan 4 After asking "our friends abroad not to let themselves be alarmed by the successes of the Communists and the U D C A (Poujadists)," M. Faure pointed out that the Assembly elected in 1951 had originally included 100 Communists and 120 Gaullists—i.e a larger number of opponents of the parliamentary regime than had been elected in 1956 He pointed out also that the system of *apparentements* had reduced the number of Communist seats in 1951, that this had produced a "false sense of security"; and that the Communists were now represented in proportion to their actual strength in the country "But what counts now," he added, "is what the non-Communist deputies are going to do"

Defending his decision to dissolve the previous National Assembly, M. Faure said that the dissolution had not "created" the anti-parliamentary movement but had "disclosed its existence" and had therefore had "diagnostic value." He adduced three reasons for the "anti-parliamentarianism" indicated by the successes of the Poujadist movement: (1) ministerial instability, (2) the multiplicity of political parties, and (3) the "polemical violence" in which the parties had indulged Nevertheless, the extent of the general discontent would not have become known had not the former Assembly been dissolved.

M. Faure went on to call for the union of all the "parliamentary" parties, from the Socialists on the left to the Independents on the right, to "reform French institutions and draw up a charter for Algeria" He felt that there was little difference between M Mendès-France's "Republican Front" and the outgoing Government on important issues such as economic and social policy and the situation in North Africa, and that it should therefore be possible "to draw up a bi-partisan policy which could settle the great problems on which the future of France depends." "The time has now arrived," he declared, "to form a real Republican Front, for our institutions will be submerged if we leave them as they are."

Radical and Socialist Demand for "Republican Front" Government. The following statement was issued on Jan. 5 by M Guy Mollet (secretary-general of the Socialist Party) after discussions with M. Mendès-France "Our meeting has shown complete identity of views on all urgent problems We shall oppose all attempts to create confusion [within the Republican Front]. . We have decided to pursue a joint course of action, both within the Republican Front and, eventually, with regard to governmental responsibility We are also united by the desire to implement the common programme which we have drawn up together. In particular, we are agreed that Parliament should be convened as soon as possible . . ." In reply to a press correspondent, M. Mollet said: "M Mendès-France and I are agreed that the Republican Front must be responsible for the direction of the future Government"

M. Mendès-France—who had also had discussions with M. Mitterrand and M Chaban-Delmas—expressed his full agreement with the statement issued by M. Mollet

In an interview published on Jan. 9 in the left-wing newspaper *Combat*, M Mollet expressed the view that a national coalition of all the Centre parties could only result in a return to *immobilisme*, and might create a popular reaction which might well result in the establishment of a "Popular Front" government. The Socialist Party, he added, was aware of the dangers of *liaison* with the Communists, but whilst it would not solicit Communist votes it would not refuse them on specific issues.

Communist Appeal for "Popular Front." The central committee of the French Communist Party sent identical letters on Jan. 6 to M. Guy Mollet and M. Herriot (president of the Radical Party) proposing the formation of a "Popular Front" Government by the Radicals, Socialists, and Communists. The text was as follows:

"By voting for the candidates of the Communist, Socialist, and Radical parties, the majority of the electors have shown that they wish the nation's affairs to be conducted by a Government of the Left. They will not understand it if these three parties do not do all in their power to make such a Government possible. Such a Government should have the following aims:

(1) To find a peaceful solution to the problems of Algeria through negotiation;

(2) to improve the living conditions of urban and rural workers;

(3) to apply the minimum programme of the national committee for lay action (*action laique*) [i e. to abolish the law granting State subsidies to Catholic schools];

(4) to oppose victoriously every factious movement (*entreprise factieuse*),

(5) to carry out a policy of international *détente* leading to general disarmament.

We propose, accordingly, that our parties should examine ways of bringing about an agreement corresponding to the wishes of the majority of the population"

Policy of "Moderate" Parties. The *Centre National des Indépendants, Paysans et A R S* issued the following post-election statement: "Various political parties are still publishing 'war communiqués' They are making tendentious statements designed to show that the Republican Front has achieved the victory This must be answered by the truth The Socialists have increased their votes by 0 6 per cent, the Radicals, including the R G R, have increased theirs by 1 6 per cent, the Social Republicans vote has gone down by 16 7 per cent, the Independents and *Paysans* have gained exactly as much as the Radicals and R.G R —1 6 per cent But all the national parties have lost seats, and the only victors at the poll are the Communists and Poujadists. Instead of making high-sounding declarations, the national parties should draw up as quickly as possible a bold and realistic plan for the reform of our institutions—notably for electoral reform . "

M.R.P. Policy. The executive committee of the M R P. issued a statement on Jan 5 offering the party's co-operation in a common programme designed to bring about "the restoration of the State, the solution of the Algerian question, progress in economic expansion, and the construction of Europe." It was pointed out that except on the extreme Right, "where the votes were for the most part transferred from the R P F (Gaullists) to the Poujadists," the votes received by the major parties had varied only by 1 or 2 per cent from those obtained in 1951, and that "no party or group of parties has obtained an absolute majority."

Social Republican Policy. The following statement was issued on Jan 9 by M. Chaban-Delmas with the approval of all the Social Republican deputies in the new National Assembly. "After ten years of *immobilisme*, defeats, and demoralization, France has come to the edge of the abyss. No time must be lost in reforming the State, pacifying Algeria, and consolidating the French Union This triple goal . . . can only be achieved by a national and healthy Government (*un gouvernement de salut national*) Such a Government must base its existence on a coherent and solid majority . . "

Poujadist Statements. M Poujade issued a post-election statement declaring that he was not surprised at his movement's success, and expressing the opinion that the U.D C.A. would double or even treble its representation if new elections were held in the next few months. He declined to issue a statement on his party's policy, but said that this would be defined at a congress of the U D C A to be held before the National Assembly was convened. He strongly denied that he was either Fascist or anti-semitic (allegations to both effects had been widely made before and during the election campaign), declaring in this connexion. "Fascism is the dictatorship of a minority by force or ruse. . . When I ask the Government to respect the will of the people, I am dubbed a Fascist People say I am anti-semitic because I attacked Mendès-France, but they do not call me anti-Catholic when I attack other Ministers in the same way" After claiming that the U D.C.A. had won hundreds of thousands of votes from the Communists as well as from the Gaullists, M Poujade insisted that his movement was solely an economic party, that it was "only interested in economic proposals," and that it wanted "to prevent the middle classes from being squeezed out of existence." He added that the U.D C A. deputies would not play the role of obstructionists or "saboteurs" in the National Assembly.

A further statement was issued on Jan 6 by M Poujade in which he again denied that he or his movement were Fascist, saying in this connexion. "Our movement is the exact opposite of Fascism. It is easy, but rather arbitrary, to stick a label on people without knowing their policy You will never find representatives of the middle classes among Fascists. The German Fascists were often former Socialists" After declaring that the U.D C A was ready to ally itself with any party which supported its twin programme of tax reform and the convening of a "States-General" (*Etats-Généraux*), M. Poujade said that the U.D.C.A. deputies would "demand the reopening of the *dossiers* of certain political scandals." He did not, however, state which *scandales* he had in mind.

[M. Pierre Poujade (34), the son of an architect and the youngest of a family of seven, worked as a youth in a variety of employments, including those of printer's apprentice, vineyard worker, and docker. He joined the French Air Force at the outbreak of war in 1939, and after the Bordeaux armistice played a prominent role in the sports organization—the *Compagnons de France*—founded in Vichy France and run on authoritarian lines by the Pétain regime. After the Germans invaded the former unoccupied zone he escaped through Spain (where he was imprisoned for six months) to North Africa, joined the Allied forces, and at the end of the war was in an R.A.F. training camp in England. He subsequently established himself as a bookseller and stationer in his home town of Saint-Céré.]

The Faure Cabinet will remain in office until the new National Assembly meets on January 19.—(Le Monde - Le Figaro - L'Express - Le Populaire - L'Humanité) **(Prev. rep. National Assembly, Dissolution, 14577 A; Poujadists, 14015 A; 1951 Election, 11541 A.)**

A. WESTERN GERMANY. — Creation and Membership of Atomic Energy Commission.

It was announced in Bonn on Dec. 21, 1955, that the German Federal Government had decided to set up an Atomic Energy Commission, and at the same time to create an inter-departmental Committee for Atomic Questions.

Herr Strauss (the Federal Minister for Atomic Questions) said in a press statement that in creating an Atomic Energy Commission the Federal Government was following the example of the United States, Britain, and France, and referred to the fact that such commissions had also been set up in two of the *Lander*—Bavaria and Baden-Wurttemberg. He pointed out, however, that the new Commission would have no executive powers, and that, in accordance with Article 65 of the Basic Law, sole responsibility for all atomic matters would rest with him as the competent Minister

The 25 members of the Commission include Professor Otto Hahn, president of the Max Planck Society in Gottingen, Professor Ulrich Haberland, of the Bayer chemical works at Leverkusen, Professor Werner Heisenberg, head of the Max Planck Institute, which is being transferred from Gottingen to Munich; Dr Hermann Reusch, an iron and steel industrialist, Herr Abs, a financial expert (who was in charge of the negotiations on Germany's pre-war debt leading to the London Agreement), Dr Alfred Petersen, one of the directors of the *Metallgesellschaft* in Frankfurt (one of the leading German metal and mineral trading concerns); and Herr Ludwig Rosenberg, member of the executive of the German Trade Union Federation.

Professor Otto Hahn, one of the world's leading atomic scientists, received the Nobel Chemistry Prize in 1944 whilst Professor Heisenberg received the Nobel Physics Prize in 1932

The inter-departmental committee will be under the chairmanship of Herr Strauss.—(Frankfurter Allgemeine Zeitung) **(Prev. rep. 14562 B.)**

B. UNITED KINGDOM. — Fifth Annual Payment of Interest and Principal on U.S. and Canadian Loans and on Lend-Lease Settlement.

The Chancellor of the Exchequer, Mr. Butler, stated in a parliamentary written answer on Dec. 13 that the fifth annual payments of interest and principal on the U.S. and Canadian lines of credit and the Lend-Lease settlement with the U.S.A. would be made in full when they became due on Dec. 31, the amounts being as follows:

	Interest	Principal	Total
U S. Loan .	U.S.$71,345,000	U S.$47,991,000	U.S.$119,336,000
U S.Lend-Lease Settlement†	U S.$11,410,000	U.S.$7,423,000	U S $18,833,000
Canadian Loan	Can $22,545,000	Can.$15,165,000	Can $37,710,000
Total U.S. dollars*† .	$105,300,000	$70,579,000	$175,879,000
Total sterling equivalent*	£37,600,000	£25,200,000	£62,800,000

* Approximate † Subject to possible slight correction. ‡ Taking U.S. and Canadian dollars as equivalent.

The Treasury stated on the same day that the following additional dollar payments would be made in December: (*a*) $4,000,000 in interest on certain U.S. loans received under the E.R.P.; (*b*) a quarterly payment of $7,500,000 (Can.) on the Canadian interest-free loan of 1942 (see 13101 A).
(Treasury Press Office) **(Prev. rep. 13957 A.)**

C. RUMANIA. — Soviet Union relinquishes Share in Rumanian Oil Industry.

An agreement was signed in Bucharest on Dec. 13, 1955, under which the Soviet Government undertook to transfer to Rumania its 50 per cent interest in *Sovrompetrol*, the joint Soviet-Rumanian company established in 1945 to prospect, produce, and refine Rumanian oil. The amount to be paid by Rumania for the Soviet share in the company was not disclosed, the joint announcement stating only that Rumania would buy back the Soviet-held shares "on favourable terms and by instalments over a number of years."—(Agerpres, Bucharest) **(Prev. rep. 13801 C.)**

D. POLAND - YUGOSLAVIA. — Civil Aviation Agreement for Belgrade-Warsaw Services.

An agreement on the mutual operation of direct passenger air services between Belgrade and Warsaw was signed in Belgrade on Dec. 11, in implementation of the civil aviation agreement concluded between the two countries on Nov. 14, 1955.—(Polish Embassy, London) **(Prev. rep. 14557 E.)**

E. PERU. — Increased Membership of Congress.

President Manuel Odria signed a Bill on Dec. 22, 1955, which provided for an increase in the membership of the Peruvian Senate from 44 to 52 and of the House of Representatives from 164 to 182.—(New York Times)

A. INDIA. — Report on Foreign Assets and Liabilities and Foreign Business Investments in India, 1948-1953.

A survey published by the Reserve Bank of India on Nov. 25, 1955, showed that foreign business investments in India rose by 1,750,000,000 - 1,800,000,000 rupees gross, or 1,320,000,000 rupees net of repatriation, during the period July 1948 - December 1953. Of the net increase, 85 per cent, or Rs.1,120,000,000, was in the "direct investment" category, comprising investment in branches of foreign firms and companies and in "controlled" joint stock companies. The bulk of the new investment—Rs.1,370,000,000—was from the U.K., Rs.560,000,000 being in manufacturing industries, Rs. 210,000,000 in plantations, Rs.200,000,000 in trading, and Rs.190,000,000 in public utilities.

Overall International Financial Position. During the 5½ years covered by the survey India's total foreign liabilities increased by Rs 2,610,000,000, whilst her total foreign assets fell by Rs 5,420,000,000 (mainly on short-term account) The main items accounting for this change were the transfer to Pakistan under partition arrangements of Rs 2,000,000,000, foreign official loans of Rs 1,380,000,000, and private foreign investments of Rs. 1,350,000,000 India's overall international financial position at the end of 1953 showed a net excess of assets over liabilities of Rs 5,000,000,000, of which Rs. 3,460,000,000 was on short-term and Rs 1,540,000,000 on long-term

Foreign Long-term Assets. At the end of 1953 India's foreign long-term assets (i e. those maturing beyond a year) amounted to Rs 11,750,000,000 of which Rs. 11,120,000,000 were held by the central Government and Rs 630,000,000 privately The main components were (i) foreign Government securities, Rs. 3,730,000,000, (ii) debts due from Pakistan and Burma, Rs 3,480,000,000; (iii) subscription to and quota in the I.M F. and International Bank, Rs 2,290,000,000; (iv) deposits (largely the outstanding value of the annuity purchased by the Indian Government for payment of pensions to retired British nationals), Rs. 1,860,000,000.

Foreign Long-term Liabilities. These amounted to Rs.10,360,000,000 at the end of 1953, of which the Government owed Rs. 5,830,000,000 and the private sector Rs 4,530,000,000. The principal Government liabilities were (i) the securities of the central Government, States and local authorities owned abroad, Rs. 2,540,000,000; (ii) the capitalized value of the Government's pension liability to retired British nationals, Rs 1,810,000,000, and (iii) official loans abroad, Rs 1,380,000,000. A major portion of the foreign-owned securities (Rs 2,130,000,000) was non-interest-bearing and had been issued in favour of the I M.F or International Bank Of the total official loans outstanding, Rs 900,000,000 represented the food loan granted by the U S A in 1951, and Rs 220,000,000 the loans extended by the International Bank for financing various development projects

The survey said that there were 565 foreign-controlled companies in India; in 123 companies all the ordinary shares were owned abroad, whilst in another 190 non-residents held more than 40 per cent. On the other hand, 91 companies were controlled from abroad without any ownership of capital whatsoever, whilst in another 110 companies foreign ownership was less than 20 per cent, these 201 companies had foreign-controlled managing agents, largely from the U.K.

(The Statesman, Calcutta - The Hindu, Madras) **(11306 A.)**

B. JAPAN. — Population Census.

Preliminary figures of a population census taken on Oct. 1, 1955, released in Tokio on Dec. 6, showed that the population of Japan was 89,269,278, of whom 45,413,514 were women and 48,855,764 were men. The figure was 6,069,641 more than that of the 1950 census, an increase of 7.3 per cent. The census showed that Japan ranked fifth in the world in regard to population, following China, India, the Soviet Union, and the United States. The population density was 241 persons to the square kilometre.

The population of the largest cities was: Tokio, 6,966,499 (an increase of 1,581,428, or 28 per cent, since 1950); Osaka, 2,547,321; Nagoya, 1,336,779; Kyoto, 1,204,017; Yokohama, 1,143,287.—(Japanese Embassy, London) **(Prev. rep. 13879 A.)**

C. NEPAL. — New Ambassador to Britain, France and the United States.

It was announced in Khatmandu on Jan. 1 that Sri Ram Prasad Manandhar (41) had been appointed Nepalese Ambassador to the United Kingdom, and concurrently to France and the United States. The new Ambassador, formerly a professor of English at Khatmandu College, had been Counsellor at the Nepalese Embassy in London from 1949 to 1952, when he became secretary to the Nepalese Foreign Ministry.

(Times - Manchester Guardian) **(Prev. rep. 13587 A.)**

D. SOUTH AFRICA. — Diamond Sales in 1955.

Sales of diamonds in 1955 effected through the Central Selling Organization on behalf of South African and other producers reached the record figure of £74,288,695, of which £50,253,946 was from the sale of gems and £24,084,749 from the sale of industrial diamonds.—(Times - Financial Times)

(Prev. rep. 14009 F.)

E. UNITED KINGDOM. — December Gold and Dollar Deficit. - Gold and Dollar Reserves at End of 1955.

The sterling area had a gold and dollar deficit in December, 1955, of $163,000,000 after taking account of the receipt of $5,000,000 in U.S. defence aid and the payment of (*a*) $188,000,000 as service of the U.S. and Canadian loans, the U.S. Lend-Lease settlement, and the Marshall Aid loans, (*b*) $7,000,000 to the E.P.U. in respect of transactions in November, and (*c*) $2,000,000 to creditors of the Union in bilateral settlements. As a result of the December deficit, the sterling area's gold and dollar reserves fell to $2,120,000,000 on Dec. 31. This was the lowest figure since February 1953, and compared with $2,762,000,000 on Dec. 31, 1954.

The monthly gold and dollar movements in 1955 are shown in the following table:

	Gold Payments to (−) or Receipts from (+)					
	E P.U *	Other Countries†	Total	U.S Aid	Change in Reserves	Reserves at end of Month
			($ million)			
January	− 10	− 2	− 12	+ 13	+ 1	2,763
February	+ 6	−103	− 97	+ 15	− 82	2,681
March	+ 3	− 38	− 35	+ 21	− 14	2,667
April	+ 13	− 11	+ 2	+ 17	+ 19	2,686
May	+ 31	− 49	− 18	+ 18	—	2,686
June	+ 12	− 28	− 16	+ 10	− 6	2,680
July	− 10	−142	−152	+ 16	−136	2,544
August	− 36	− 55	− 91	+ 4	− 87	2,457
September	− 59	− 55	−114	+ 2	−112	2,345
October	− 80	+ 29	− 51	+ 3	− 48	2,297
November	− 32	+ 16	− 16	+ 2	− 14	2,283
December	− 7	−161‡	−168	+ 5	−163	2,120
Year 1955	−169	−599	−768	+126§	−642	—

* Gold payments to or receipts from the E P U in each month as a result of operations in the preceding month. † Including $2,000,000 in each of the 12 months to creditors of the E P U. under bilateral settlements ‡ Including $188,000,000 in special payments (see above and 14624 B) § Only $114,000,000 actually received, the balance of $12,000,000 going to repay a commercial dollar loan against which Britain had bought U S tobacco.

As shown in the table, there was an improvement in the reserves position in the last quarter of the year, if the debt payments, U S. aid, and E P U. payments were excluded On this basis the residual gold and dollar balance (i e with the rest of the world outside the E P U. area) showed surpluses of $31,000,000, $18,000,000, and $29,000,000 in October, November and December respectively, the final quarter being the only one of the year to show surpluses calculated on this basis

Provisional figures for the E.P.U. December settlement showed that the U.K. had a deficit of $30,800,000 (£11,000,000), which would be settled in January three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.—(Treasury Press Office - Financial Times)

(Prev. rep. 14599 A; 13973 B.)

F. BRAZIL. — Asylum for Chinese and Korean ex-Prisoners of War in Indian Custody.

It was announced in New Delhi on Dec. 1 that the Brazilian Government had offered to admit all the remaining Chinese and North Korean ex-prisoners of war (62 in number) who were being given temporary asylum in India. The men concerned were the last of a group of 88 P.O.W.s who had refused repatriation to their homelands and who had been placed in the temporary custody of the Government of India. The Brazilian Ambassador in New Delhi (Senhor Ildefonso Falcao) paid a visit on Nov. 30 to the camp in which the men were lodged, and informed them that Brazil was willing to admit them as immigrants and to give them the necessary vocational training for rehabilitation. The ex-P.O.W.s expressed their gratitude to the Brazilian Government, and also to the Indian Government for having given them temporary asylum since the end of the Korean War.—(The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 13874 A.)**

Note. A request to the U N General Assembly to be relieved of the burden of maintaining the ex-prisoners of war had been made by the Government of India before the opening of the Assembly's tenth session—see page 14463, last paragraph of second column.

G. RUMANIA. — Further Price Reductions.

A decree issued in Bucharest on Dec. 3, 1955, provided for price reductions varying from 5 to 25 per cent for a number of consumer goods, including ready-made men's and women's wear, furniture, sewing machines, bicycles, watches, cameras, china and earthenware, household utensils, toys, hats, books, medicines, soap, and kerosene.—(Agerpres, Bucharest)

(Prev. rep. 14296 B.)

A. MIDDLE EAST. — U.S. Oil Prospecting Concessions in Yemen and Libya. - Revised Royalties Agreement between Syria and Iraq Petroleum Company. - Opening of Iraq's first Government-owned Refinery.

Recent developments in connexion with the exploitation of oil deposits in the Middle East are summarized below under cross-headings:

Yemen.

The Yemen Development Corporation of Washington, a privately-owned U.S. concern, announced on Nov. 22, 1955, that it had signed a 30-year agreement for exclusive oil and mineral exploration and development rights in the Yemen. The agreement covered about two-thirds of the Yemen, an area of some 40,000 square miles, but excluded the narrow coastal strip. All net profits will be divided equally between the Corporation and the Yemeni Government, but if commercial quantities of petroleum or minerals are not found within six years the agreement can be voided. This oil concession was the first to be granted in the history of the Yemen.

Libya.

Four U.S. oil companies announced on Dec. 6 that they had been granted oil exploration concessions by the Government of Libya, affecting a total of 35,000,000 acres. Three concessions —to subsidiaries of the Amerada Petroleum Corporation, the Ohio Oil Company, and the Continental Oil Company— concerned districts along the coast and inland from the Mediterranean, whilst the Standard Oil Company of New Jersey announced that it had obtained a concession covering about 5,135,000 acres in the Fezzan, and was awaiting further concessions.

Syria.

It was announced on Nov. 28 that a new agreement had been reached between the Iraq Petroleum Company and the Syrian Government on the royalties which the company should pay on its pipelines across Syria from Iraq to the Mediterranean port of Banias.

Calculated on an expected throughput of 26,000,000 tons in 1956, and designed to give Syria 50 per cent of the profits on the pipeline and terminal operations, the new payments will amount to about £6,500,000 (rising as the flow of oil increased), compared with about £2,000,000 a year under the old agreement. In addition, the company agreed to pay £8,500,000 sterling in settlement of all outstanding claims—largely for royalties on shipments during the past few years, when payments had been suspended during negotiations. It was disclosed on Dec. 11 that Syria had asked the American-owned trans-Arabian pipeline company, Tapline, to start negotiations for the revision of its oil agreement with Syria

On Jan. 9, 1956, the Syrian Government decided to invite international tenders for the construction of an oil refinery with a capacity of 750,000 tons, thereby giving other countries and private concerns a chance to outbid a recent offer made by the Soviet Union. On the same date the Syrian Cabinet approved a proposal (already approved by Lebanon and Iraq) to divert the Iraq Petroleum Company's Kirkuk-Haifa pipeline, closed since 1948 as a result of the economic blockade of Israel by the Arab countries, to the Lebanese port of Sidon.

Iraq.

Iraq's first Government-owned oil refinery, at Daura on the River Tigris, three miles south of Baghdad, was formally opened by King Feisal on Nov. 28, 1955. Built at a cost of over £11,000,000, the refinery has an estimated capacity of over 24,000 barrels of crude oil a day.—(Times - Financial Times - Economist - New York Times - Le Monde, Paris)

(Prev. rep. 14163 B; 12662 A.)

B. HUNGARY. — Changes in Cabinet and Communist Party Secretariat.

It was announced in Budapest on Nov. 18, 1955, that the central committee of the Hungarian Workers' (Communist) Party, at a meeting held on Nov. 9-12, had recommended (*a*) that Dr. Ferenc Erdei, the Minister of Agriculture, be appointed a Deputy-Premier, and (*b*) that M. Janos Matolcsi, hitherto one of the secretaries of the central committee, should succeed Dr. Erdei as Minister of Agriculture.

The central committee also appointed two new Secretaries (M. Istvan Kovacs, a member of its politburo, and M. Gyula Egri, First Deputy Minister of the Interior), bringing the total number of Secretaries to six: M. Rakosi (the First Secretary), M. Lajos Acs, M Bela Szalai, M. Bela Veg, M. Kovacs and M. Egri. M. Kovacs and M. Szalai had taken a prominent part in the governmental and party changes which led to the appointment of M. Imre Nagy as Prime Minister, both being considered as belonging to the right-wing of the Hungarian Workers' Party,

The ministerial changes were approved by the National Assembly on Nov. 15. On the same date it was announced that M. Imre Nagy, the former Prime Minister, had been deprived of his seat in the National Assembly.—(Neue Zürcher Zeitung - Hungarian Review, Budapest)

(Prev. rep. 14405 D.)

C. CANADA. — Mr. Lester Pearson's Visit to Soviet Union and Asian Countries.

The Canadian Secretary of State for External Affairs, Mr. Lester Pearson, left Ottawa on Sept. 30 for a six-week tour of foreign countries, and after brief visits to London and Paris arrived in Moscow on Oct. 5. During a week's stay in the Soviet Union (Oct. 5-12) Mr. Pearson had discussions with M. Molotov (Soviet Foreign Minister), M. Kabanov (Minister of Foreign Trade), M Kafanov (acting Minister of Culture), and MM. Kaganovich and Malenkov (Deputy Premiers); visited Leningrad; and subsequently had discussions in the Crimea with Marshal Bulganin and M. Khrushchov, who were on holiday there at the time.

A communiqué on the talks between Mr Pearson and the Soviet Ministers, issued in Moscow on Oct. 12, said that the exchange of views had led to "a clearer understanding of the points of view of the two sides" which would help to improve relations between Canada and the U.S.S.R. The possibility of concluding a Soviet-Canadian trade agreement on "most-favoured-nation" terms had been considered, and "a considerable degree of agreement" had been reached in principle on an early continuation in Ottawa of the talks started in Moscow, which, it was hoped, would "yield positive results to the advantage of both sides."

It had been agreed that distrust and misunderstanding could to a certain degree be eliminated by an increasing number of both official and non-official visits, and that every effort should be made to remove obstacles to freer exchange of information and opinions and to expand as far as possible co-operation between the two countries in the spheres of culture, science and engineering Accordingly, it had been arranged to consider measures of co-operation in industry, transport services, and agriculture, and also in the exchange of scientific information on scientific research work in the Arctic It had also been agreed that reciprocal visits of parliamentary delegations would promote better understanding between Canada and the Soviet Union, and strengthen the ties between them.

Finally, the communiqué said that "the different approach of their Governments to political and economic problems should not be an obstacle to co-operation in many practical questions on a basis of mutual interest and the desire to promote the cause of peace and good neighbourly relations." Such co-operation should be based "on the principle of non-interference of each country in the internal affairs of the other, and should be inspired by a desire on both sides to work jointly for the establishment of world peace"

Mr. Pearson flew from Moscow to Singapore for the annual meeting of the Consultative Committee for Co-operative Economic Development in South-East Asia (the Colombo Plan) which was held on Oct. 17-21, and subsequently visited Malaya before going to India. On Nov. 1 he formally inaugurated the Canada Dam in Bihar State (see 14509 E), and on Nov. 3-5 had discussions in New Delhi with Mr. Nehru.

At a press conference on Nov. 5 Mr. Pearson announced that Canada would contribute $100,000 for the relief of flood victims in India and Pakistan, and gave details of three new Canadian projects for India under the Colombo Plan, the cost of which would be met partly out of the unappropriated balances of last year's funds and partly from new appropriations Canada, he said, would give India diesel generating sets worth $3,000,000 for supplying power to rural areas, would carry out an aerial magnetometer survey of mineral resources, particularly petroleum, in Rajasthan, and would supply two Canadian aircraft to be used for controlling crop pests.

Addressing the Indian Council of World Affairs on the same day, Mr. Pearson said that the Commonwealth had been strengthened "immeasurably" by the inclusion of three Asian members, India, Pakistan, and Ceylon, which permitted it to act as a bridge between Asia and the West at a time when there were "all too few bridges of this kind" It was a matter of great satisfaction to Canadians that they had been able, under the Colombo Plan, "to give some assistance to India, which has chosen to work out her economic destiny by democratic means."

On Nov. 6 Mr. Pearson left Delhi for West Pakistan, where he visited Karachi, Lahore, and Peshawar, as well as the Warsak development project (see page 12953, first column), the biggest single undertaking financed by Canada under the Colombo Plan. While in Karachi he had talks with Chaudri Mohammad Ali and Mr. Hamidul Haq Choudhury (the Pakistani Prime Minister and Foreign Minister) and other Government leaders, and on Nov. 9 signed a revised agreement providing for increased Canadian participation in the Warsak project. Under this agreement Canada agreed to provide the services of a general contractor to build the dam, power house, and related works, as well as to provide equipment, building materials, and design and supervisory services.

Mr. Pearson left Karachi on Nov. 10 for Cairo, where he had talks with the Egyptian Prime Minister (Colonel Nasser) and the Foreign Minister (Dr. Mahmoud Fawzi), as well as with General Burns (a Canadian), the head of the U.N. Truce Supervisory Organization in Palestine. He indicated while in Cairo that he was not going to Israel as the Israeli Foreign Minister (then Mr. Sharett) was out of the country at the time. Mr. Pearson arrived back in Ottawa on Nov. 15 after a brief visit to London.—(Montreal Star - The Statesman, Calcutta - The Hindu, Madras - Pakistan High Commissioner's Office, London)

A. UNITED KINGDOM. — Civil Aviation. - B.E.A. Report for 1954-55. - First Net Profit. - Resignation of Mr. Peter Masefield as Chief Executive.

The report and accounts of the British European Airways Corporation for the year ended March 31, 1955, were published on Aug. 24. They showed that the Corporation's gross revenue amounted to £17,141,314 (compared with £14,773,170 in 1953-54) and total expenditure to £17,078,275 (£16,546,967), resulting in a net profit of £63,039. This net profit, which was the first achieved by the Corporation in the eight years of its existence, and which compared with a loss of £1,773,797 in 1953-54, was obtained after (*a*) setting aside £1,515,725 for amortization of aircraft and depreciation of assets, (*b*) charging £653,697 for interest and other charges on the Corporation's total capital of £18,400,000, and (*c*) paying £387,294 in fuel tax.

The report stressed that these "encouraging results" had been obtained "during a year in which both operating costs and fares were reduced to the lowest point in the Corporation's history," and reflected a "substantial rise in revenue" and "comparatively small increase in expenditure." After expressing special satisfaction at "the achievement of a profitable state over the short-haul pattern of the B.E.A.'s route network," which presented "a continuous challenge to management and staff alike," it went on: "The margins are still small and there can be no relaxation of effort. But the Board of the B.E.A. believes that the Corporation has now reached a sound and stable situation in which concentration can be made on a still further improvement in service to the travelling public while maintaining and enhancing the profitable state."

Other points from the report are summarized below:

Traffic Revenue. This amounted to £16,594,461 (£14,256,091) in 1953-54), made up as follows passengers £14,203,085 (£12,006,905), mail £1,249,727 (£1,130,337), freight £1,047,232 (£1,038,112); charters £94,417 (£80,737). Of the total revenue from scheduled services, £12,941,461 (78 4 per cent) was contributed by the international and £3,558,575 (21 6 per cent) by the domestic services.

The average revenue rate for all services had decreased from 63 8d. per load ton-mile in 1953-54 to 62 6d. in 1954-55 On the BEA's international routes it had dropped by 3 1 per cent, mainly owing to the extension on these routes of night services at lower fares; night services, however, had made "a useful contribution to improvements in aircraft utilization and towards an increase of capacity in the summer peak" On domestic services the average revenue rate per ton-mile had increased by 1.9 per cent.

Operating Expenditure. This amounted to £16,589,000, compared with £15,975,721 in 1953-54. The report stressed that "a most important factor in the improved financial result" had been the "significant reduction in specific operating costs," the total "cost of production" per capacity ton-mile having been reduced by 12.2 per cent to 41 7d.

Traffic. During 1954-55 traffic on the Corporation's international services increased by 19 5 per cent to 47,826,475 load ton-miles, and traffic on the domestic services by 16.5 per cent to 15,820,427 load ton-miles.

The number of passengers carried increased from 1,656,779 in 1953-54 to 1,874,316 in 1954-55, revenue passenger-miles from 480,065,449 to 577,077,730, and the passenger load factor from 66 3 to 68 4 per cent. For the first time in any year BEA carried over 1 000,000 passengers on its international services alone—the second highest international total of any airline in the world The largest number of passengers (235,430) were carried on the London-Paris route, followed by London-Jersey (126,189), London-Glasgow (92,347), London-Belfast (77,887), and Berlin-Hanover (72,799). The report stated that in 1954-55 the seasonal problem in passenger traffic had been "somewhat less acute" owing to an "encouraging increase" in winter traffic, which had grown by about 22 per cent, compared with only 19 per cent in the six summer months.

Cargo carried increased from 14,559 tons in 1953-54 to 14,884 tons in 1954-55, and freight ton-miles from 5,556,773 to 5,728,479. Although 72 per cent of BEA freight traffic in 1954-55 had been carried on passenger services (compared with 57 per cent in 1953-54) the Corporation continued to operate with *Pionair-Leopard* aircraft a network of all-cargo services to cater for regular heavy loads and consignments which were unsuitable for carriage in passenger aircraft. The report pointed out that the increase of only 3 per cent in freight traffic, though "disappointing," corresponded to "the general increase in freight traffic in Europe," but stated that further measures to expand the total freight market had been put in hand, including wider market research, special commodity rates, and simplified procedures.

Mail carried increased from 6,582 tons in 1953-54 to 6,964 tons, and mail ton-miles from 2,601,317 to 2,918,889, an increase of 12 2 per cent, compared with only 2.4 per cent in the previous year. Negotiations were proceeding for the carriage of additional mail which should help to maintain the growth in 1955-56.

Load Factor and Costs. The revenue load factor increased from 64 1 per cent in 1953-54 to 64.7 per cent in 1954-55. The load factor required to cover expenditure fell from 71.8 per cent to 64.5 per cent; the Corporation's operations consequently resulted in a profit, instead of in a loss as in 1953-54.

Fares Policy. The report stressed that much of the traffic increase in 1954-55 resulted from the introduction of tourist fares in 1953, which had "gone some way towards expanding the scope of air transport from a semi-luxury business to a major industry." Many fares on domestic routes had been increased during the year by 5-10 per cent, but the general level of domestic fares remained about 25 per cent below the level on international routes.

Route Mileage. During 1954-55 route mileage increased from 18,231 miles to 21,190 miles

Aircraft Fleet. During the year this was reduced from 112 to 99, of six types. The principal services were maintained with Vickers *Viscounts* and de Havilland *Elizabethans*, but extensive use (mainly on domestic routes) was also made of Douglas *Pionairs*.

The *Viking* fleet, which had been the mainstay of BEA services for seven years, was withdrawn from service during the year BEA *Vikings* had flown 54,500,000 miles, carried nearly 3,000,000 passengers, and earned £35,000,000.

Airports. From Oct. 31, 1954, when Northolt Airport was closed to civil flying (see 13760 C), all BEA operations in London were concentrated at London Airport. The report recalled that since the operation of the first scheduled BEA service from Northolt on Sept. 1, 1946, that airport had handled about 2,000,000 BEA passengers to and from the Continent and 1,000,000 to and from the Channel Islands It added that the BEA now served 25 airports in the U.K. and 42 overseas

Helicopter Experimental Unit. The first scheduled passenger service with a British helicopter (the *Bristol* 171) was started on June 15 between London Airport and Eastleigh airport (Southampton). During the summer months the service (twice daily) carried 700 passengers and achieved a 96 per cent regularity In November, 1954, the first of three *Westland-Sikorskys*, seating eight passengers, was added to the fleet, this being the largest helicopter type yet operated by British European Airways,

The BEA helicopter service between the South Bank (London) and London Airport (see 13880 A) was inaugurated on July 25 with eight services daily, the single fare being fixed at 35s

Staff. At March 31, 1955 staff numbered 9,117, against 8,992 at March 31, 1954 Productivity (measured in capacity ton-miles produced per employee) increased during the year by 16 3 per cent.

Future Plans The report stated that although in 1956, as in 1955, the Corporation would be short of aircraft, the position should begin to improve by the end of 1956, when first deliveries were expected of the *Viscount-Major* V 802, which had been designed to BEA requirements and of which 22 had been ordered Plans were also well advanced for a larger, faster, and more economic successor to the *Viscount*, and for a replacement of the DC-3 *Pionair* on the shorter low-density routes [i.e. those in Scotland] In this connexion it was stressed that the Corporation regarded the development of domestic routes as of "the highest importance, both socially and economically," and had planned further improvements

The Bristol Aeroplane Company and BEA announced jointly on Sept. 4, 1955, that Mr. Peter G. Masefield, who had been chief executive of BEA since 1949, would leave the Corporation in November to become (as from Jan. 1, 1956) managing director of a new subsidiary of the Bristol Aeroplane Co., which would be known as Bristol Aircraft Ltd. and would take over the operations of the parent company's aircraft division. On Nov. 1 it was announced that Lord Douglas of Kirtleside, chairman of BEA, would temporarily combine that office with the post of chief executive.

Mr. Boyd-Carpenter (Minister of Transport and Civil Aviation) announced on Nov. 28 that an agreement had been signed between BEA and the Soviet airline (*Aeroflot*) under which each would sell through tickets to any points on the routes operated by the other. BEA planned to extend their Scandinavian services to Helsinki, and it would then be possible for passengers to make connexions between BEA and *Aeroflot* services at Helsinki, Vienna, and possibly Berlin. The exchange of rights to operate through services between London and Moscow had also been discussed between Government representatives, but the Soviet authorities were not yet able to contemplate the operation of such services. (BEA Report and Accounts - Times - Daily Telegraph - Financial Times)

(Prev. rep. B.E.A. Report for 1953-54, 13880 C; Mr. Peter Masefield, 10305 B.)

B. YUGOSLAVIA - SOVIET UNION. — Co-operation in Nuclear Research and Peaceful Uses of Atomic Energy.

It was officially announced in Belgrade on Jan. 3 that, following negotiations by a Yugoslav delegation in Moscow, a draft agreement had been approved providing for co-operation between the U.S.S.R. and Yugoslavia in nuclear research and the peaceful uses of atomic energy. The agreement covered the exchange of experts, Soviet aid for the building of an experimental reactor in Yugoslavia, and deliveries of nuclear materials by the U.S.S.R. to Yugoslavia. It implemented the decision on mutual co-operation in the field of atomic energy which was taken by President Tito, Marshal Bulganin, and M. Khrushchov during the Soviet leaders' visit to Yugoslavia in 1955.—(Tanjug Agency, Belgrade)

(Prev. rep. 14412 A; 14265 A.)

A. SHIPPING. — World Tonnage and Construction Figures. - New Tanker Orders. - Israeli Transatlantic Shipping Line. - New Transatlantic Liner to be built for Holland-America Line.

Statistical tables published by Lloyd's Register of Shipping on Dec. 31 gave the total of world shipping at June 30, 1955, as 100,569,000 gross tons, compared with 97,422,000 gross tons at June 30, 1954—this being the first time that the world's merchant fleets had together exceeded 100,000,000 gross tons. The sizes of the principal national fleets (excluding ships under 100 tons, sailing vessels, and barges) at June 30, 1955, are shown in the following table.

	1955	1954
United States*	26,423,000	27,344,000
United Kingdom	19,537,000	19,014,000
Norway	7,249,000	6,805,000
Liberia	3,997,000	2,381,000
Panama	3,923,000	4,091,000
France	3,922,000	3,841,000
Italy	3,911,000	3,798,000
Japan	3,735,000	3,578,000
Netherlands	3,696,000	3,443,000
Sweden	2,807,000	2,701,000
Germany (Western)	2,653,000	2,226,000
U.S.S.R.	2,506,000	2,371,000
Denmark	1,652,000	1,614,000
Canada	1,521,000	1,610,000
Spain	1,383,000	1,309,000
Greece	1,245,000	1,176,000
Argentina	1,043,000	1,057,000
Brazil	893,000	899,000
Finland	731,000	665,000
Honduras	432,000	439,000
Costa Rica	341,000	201,000

* Including reserve fleet, estimated at 14,000,000 tons at June 30, 1955, and June 30, 1954.

It was pointed out that the Liberian fleet was now the fourth largest in the world, and that the Liberian flag had become "the foremost of the flags of convenience" (i.e. flags under which shipowners in certain other countries register their ships for economic, taxation, or other reasons).

Of the total world tonnage, the largest group again consisted of ships of 6,000 - 8,000 tons, but a large proportion of these (including the U.S Reserve Fleet) were not in commission By far the greatest amount of tonnage built since 1950, however, was of 10,000-15,000 tons, 85 per cent of ships of this size, and also of ships between 15,000 and 20,000 tons, were oil tankers Of the principal maritime powers, Western Germany had the largest proportion of modern tonnage, with 57 per cent of her ships under five years old, followed by Norway (37 per cent) and the United Kingdom (about 21 per cent).

The world tanker fleet at June 30, 1955, totalled about 26,455,000 gross tons, or about 26 per cent of all ships, compared with 25 per cent at June 30, 1954. The largest tanker fleets were owned by the United Kingdom (5,261,000 tons) the U.S.A. (4,321,000 tons), Liberia (2,356,000 tons), and Panama (2,134,000 tons).

Of world tonnage of all types, 34.5 per cent were motorships and 56.2 per cent oil-burning steamers, making a total of 90.7 per cent using oil fuel.

Lloyd's Register returns of merchant shipbuilding for the third quarter of 1955 gave the gross tonnage under construction throughout the world (excluding the U.S.S.R., Poland, and China, as well as all vessels under 100 tons, barges, etc.) as 6,285,699 tons, of which 34.16 per cent was building in the United Kingdom and 65,84 per cent elsewhere.

Ships building in Great Britain and Northern Ireland numbered 346 of 2,147,054 tons (steamers 1,231,360 tons, motorships 615,697 tons), including 2 steamers of over 30,000 tons, 2 of 25,000 - 30,000 tons, 23 of 20,000-25,000 tons, and 10 steamers and 3 motorships of 15,000-20,000 tons. Of the total, 248 ships (1,390,771 tons) were building for Great Britain and N. Ireland, 27 (50,662 tons) for other British Commonwealth countries, 22 (294,585 tons) for Norway, 10 (145,920 tons) for Liberia, 8 (85,170 tons) for Panama, 2 (42,500 tons) for the U.S.A., 4 (30,900 tons) for Greece, 2 (24,000 tons) for Sweden, 3 (20,100 tons) for the Irish Republic, 2 (13,000 tons) for Honduras, 4 (4,725 tons) for the U.S.S.R. 1 (4,000 tons) for France, 2 (1,744 tons) for Brazil, 5 small vessels for Burma, and 3 (14,980 tons) for unspecified countries. Principal shipbuilding centres were the Clyde (101 ships of 634,277 tons), the Tyne (34 ships of 390,044 tons), Sunderland (33 ships of 253,040 tons), the Tees (21 ships of 250,544 tons), Belfast (21 ships of 240,140 tons), Liverpool (17 ships of 142,143 tons), and Barrow (4 ships of 86,412 tons).

Ships building abroad numbered 1,033 of 4,138,642 tons (steamers 1,632,892 tons, motorships 2,505,750 tons), divided as follows: Germany 256 (713,838 tons), the Netherlands 146 (579,002 tons), Japan 66 (573,871 tons), France 65 (465,339 tons), Italy 104 (452,162 tons), Sweden 71 (376,395 tons), Norway 61 (240,559 tons), Spain 63 (158,009 tons), Denmark 29 (110,273 tons), Belgium 26 (106,326 tons), British Commonwealth countries 46 (100,870 tons), Finland 43 (83,302 tons), Yugoslavia 17 (81,260 tons), U.S.A 12 (69,100 tons), Portugal 7 (14,799 tons), Turkey 10 (9,360 tons), Indonesia 9 (3,477 tons), Irish Republic 1 (2,000 tons), Iceland 1 (200 tons) The total included 2 steamers of over 30,000 tons in France, 3 steamers of 25,000-30,000 tons in Japan and one motorship of this size in the Netherlands, and 10 steamers of 20,000-25,000 tons in Japan, 7 in France, 5 in the Netherlands, 2 each in the U S A and Germany, 2 steamers and 1 motorship of this size in Italy, 1 steamer and 1 motorship in Sweden, and 1 motorship in Norway

Tankers of over 1,000 gross tons building throughout the world numbered 225 of 2,782,998 tons, including 79 (993,969 tons) in the U.K., 17 (330,481 tons) in Japan, 15 (309,295 tons) in France, 21 (285,797 tons) in the Netherlands, 16 (200,844 tons) in Sweden, 20 (164,549 tons) in Italy, 16 (147,394 tons) in Norway, and 20 (164,549 tons) in Germany.

Further tanker orders placed by British oil companies during recent months included · (1) seven tankers (four of 32,000 deadweight tons and three of 15,000 tons) ordered from British shipbuilders by the Eagle Oil and Shipping Co on Oct 14 at a cost of £12,000,000, (2) nine tankers (three of 32,000 tons and six of 15,000 tons) ordered by the Shell Petroleum Co on Oct 13, all from German yards except for one 32,000-tonner to be built in the U K.; (3) 23 tankers of 32,000-42,000 tons ordered by the British Petroleum Co on Oct 24 at a total cost of £52,000,000. Fourteen of these latter vessels will be built in the U K and 6 in Italy, the British Petroleum Co explaining that the "compelling reason" which had led it to order tankers abroad for the first time in its history was the absence of enough suitable berths in British yards to enable sufficiently early delivery to be given

Ships launched during the quarter included the Cunarder *Carinthia*, the third of four 22,000-ton ships for the line's Canadian service (John Brown and Co., Clydebank), and the *Spyros Niarchos* (47,750 deadweight tons), the largest tanker in the world and the largest merchant ship built in Britain since the war (Vickers-Armstrong, Barrow-on-Furness).

The maiden voyage took place in October of the Zim Navigation Co.'s passenger and cargo liner *Israel* (10,000 tons), one of 12 ships delivered to Israel from German shipyards under the Israeli-German reparations agreement (see 12621 A). She will be employed on the Haifa-New York route together with a sister ship, the *Zion*, still under construction.

It was stated in the Press that the Zim Navigation Co., which had been founded under the British mandate in 1945 by the Jewish Agency, the Jewish Trade Union Confederation, and the Jewish Maritime League, now owned 22 ships totalling 55,000 tons, and had carried over 30,000 passengers and 745,000 tons of cargo in 1954.

The Holland-America Line announced on Oct. 27 that it had placed an order with Rotterdam shipbuilders for a new passenger liner for its New York service. The new ship, to be named *Rotterdam* and to be delivered by 1959-60, would be of about the same size as the *Nieuw Amsterdam* (36,667 gross tons, 21½ knots) but would be slightly faster. Only half of her estimated cost of 100,000,000 guilders (about £9,500,000) would be borne by the Holland-America Line, and the remainder would be advanced by the Netherlands Recovery Bank.

B. ITALY - WESTERN GERMANY. — Agreement on Employment of Italian Workers in Western Germany.

The Italian Foreign Minister, Signor Martino, and the German Federal Minister of Labour, Herr Storch, signed an agreement in Rome on Dec. 20 providing for the large-scale employment of Italian workers in Western Germany.

The agreement, which covered only those persons recruited at the request of the German Federal Government, laid down that Italian workers in Western Germany would receive the same pay, family allowances, and other social security benefits as were enjoyed by German workers. It established a special mixed German-Italian commission, with headquarters in Milan, to examine and regulate all matters concerning the working conditions of Italian workers recruited for work in Germany, including their employment contracts. This commission would allocate jobs to Italians looking for employment in Germany according to the labour shortages prevailing in various branches of German industry, and the workers would be chosen from the following spheres, in order of numerical importance · agriculture, building, and mechanical industries.

It was stated that Italians would not work for the time being in German coal mines, but might be accepted for such work later if they knew the German language sufficiently well to understand orders and safety regulations. The first Italian workers would not be recruited until March—i.e., after the end of the winter season with its usual "swing" towards greater unemployment. The total number of Italian workers that might be recruited under the agreement was unofficially estimated at 80,000 to 100,000; they will be guaranteed employment for a maximum period of nine months.

It was stated in Bonn that the recruitment of foreign workers was expected to counteract the anticipated labour shortage resulting from the diversion of labour to rearmament.
(Frankfurter Allgemeine Zeitung - Corriere della Sera, Milan)

A. UNITED STATES. — President Eisenhower's State of the Union Message.

The President's annual State of the Union message was read to a joint session of the 84th Congress on Jan. 5 by a clerk of the House, President Eisenhower being unable to deliver the message personally as he was at Key West, Florida, convalescing from his recent heart attack. The principal proposals and recommendations were as follows:

(1) Congressional approval of U.S. membership of the proposed Organization for Trade Co-operation.

(2) The approval by Congress of limited authority to make long-term commitments for assistance to overseas development projects.

(3) A substantial increase in funds for the U.S. Information Agency.

(4) Revision of the McCarran-Walter Immigration Act to make it more liberal and more flexible.

(5) "Strengthened" Federal civil defence assistance to States and cities.

(6) Extension of the Defence Production Act.

(7) Continuation of present levels of taxation.

(8) A further attack on the problem of agricultural surpluses.

(9) A new programme of Federal assistance to depressed areas.

(10) A five-year programme of Federal assistance for school-building.

(11) Extension of old age and survivors' insurance programmes and other social security measures.

(12) A "substantial" increase in Federal aid for medical research.

(13) Amendment of the Taft-Hartley [Labour-Management Relations] Act and an extension of coverage of the minimum wage law.

(14) Authorization for the construction of 35,000 public housing units in each of the next two years.

(15) Salary increases for Civil Servants at the executive level.

(16) The creation of a commission to examine allegations that Negroes in some States were being prevented from voting.

(17) The granting of Statehood to Hawaii, "progress" towards Statehood for Alaska, and the extension of voting rights to the District of Columbia [the Federal capital].

A summary of the President's message is given below.

Introduction. ". . . In the past three years . there has been broad progress in fostering the energies of our people, in providing greater opportunity for the satisfaction of their needs, and in fulfilling their demands for the strength and security of the Republic. Our country is at peace. Our security posture commands respect A spiritual vigour marks our national life. Our economy, approaching the 400,000,000,000 dollar mark, is at an unparalleled level of prosperity. The national income is more widely and fairly distributed than ever before. The number of Americans at work has reached an all-time high. As a people, we are achieving ever higher standards of living —earning more, producing more, consuming more, building more, and investing more than ever before. Virtually all sectors of our society are sharing in these good times Our farm families, if we act wisely, imaginatively, and promptly to strengthen our present farm programmes, can also look forward to sharing equitably in the prosperity they have helped to create

War in Korea ended 2½ years ago. The collective security system has been powerfully strengthened. Our defences have been reinforced at sharply reduced costs. Programmes to expand world trade and to harness the atom for the betterment of mankind have been carried forward. Our economy has been freed from governmental wage and price controls. Inflation has been halted, the cost of living stabilized. Government spending has been cut by more than $10,000,000,000. Nearly 300,000 positions have been eliminated from the Federal payroll Taxes have been substantially reduced. A balanced Budget is in prospect. Social security has been extended to 10,000,000 more Americans and unemployment insurance to 4,000,000 more. Unprecedented advances in civil rights have been made. The long-standing and deep-seated problems of agriculture have been forthrightly attacked . .

Many measures of great national importance recommended last year to Congress still demand immediate attention . Many new items of business require our attention But our responsibilities require that we approach this year's business with a sober humility. A heedless pride in our present strength and position would blind us to the facts of the past, to the pitfalls of the future. We must walk ever in the knowledge that we are enriched by a heritage earned in the labour and sacrifice of our forbears; that, for our children's children, we are trustees of a great republic and a time-tested political system; that we prosper as a co-operating member of the family of nations. . . ."

Foreign Policy. " In the past year our search for a more stable and just peace has taken varied forms. Among the most important were the two conferences at Geneva, in July and in the fall of last year. We explored the possibilities of agreement on critical issues that jeopardize the peace. The July meeting of Heads of Governments held out promise to the world of moderation in the bitterness, of word and action, which tends to generate conflict and war. All were in agreement that a nuclear war would be an intolerable disaster which must not be permitted to occur. But in October, when the Foreign Ministers met again, the results demonstrated conclusively that the Soviet leaders are not yet willing to create the indispensable conditions for a secure and lasting peace.

Nevertheless, it is clear that the conflict between international Communism and freedom has taken on a new complexion. We know the Communist leaders have often practised the tactics of retreat and zigzag We know that Soviet and Chinese Communism still poses a serious threat to the Free World. And in the Middle East recent Soviet moves are hardly compatible with the reduction of international tension Yet Communist tactics against the free nations have shifted in emphasis from reliance on violence and the threat of violence to reliance on division, enticement, and duplicity. We must be well prepared to meet the current tactics which pose a dangerous though less obvious threat. At the same time our policy must be dynamic as well as flexible, designed primarily to forward the achievement of our own objectives rather than to meet each shift and change on the Communist front We must act in the firm assurance that the fruits of freedom are more attractive and desirable to mankind in the pursuit of happiness than the record of Communism.

In the face of Communist military power we must, of course, continue to maintain an effective system of collective security. This involves two things—a system which gives clear warning that armed aggression will be met by joint action of the free nations, and deterrent military power to make that warning effective. Moreover, the awesome power of the atom must be made to serve as a guardian of the free community and of the peace. In the last year, the Free World has seen major gains for the system of collective security; the accession to NATO and Western European Union of the Federal German Republic; the developing co-operation under the South-East Asia Collective Defence Treaty, and the formation in the Middle East of the Baghdad Pact between Turkey, Iraq, Persia, Pakistan, and the United Kingdom. In our own hemisphere, the inter-American system has continued to show its vitality in maintaining peace. . We now have security pacts with more than 40 other nations. . .

We have been steadfast in our support of the U N. In the release of our 15 fliers from Communist China, an essential prelude was the world opinion mobilized by the General Assembly which condemned their imprisonment and demanded their liberation. The successful Atomic Energy Conference held in Geneva under U N. auspices, and our Atoms for Peace programme, have been practical steps toward the world-wide use of this new energy source Our sponsorship of such use has benefited our relations with other countries. Active negotiations are now in progress to create an international agency to foster peaceful uses of atomic energy.

During the past year the crucial problem of disarmament has moved to the forefront of practical political endeavour At Geneva I declared the readiness of the U.S A. to exchange blueprints of the military establishments of our nation and the U S.S R., to be confirmed by reciprocal aerial reconnaissance . In the U.N Sub-committee on Disarmament last fall, this proposal was explored and the U.S A also declared itself willing to include reciprocal ground inspection of key points. By the overwhelming vote of 56 to 7, the U N on Dec. 16 endorsed these proposals and gave them a top priority Thereby the issue is placed squarely before the bar of world opinion. We shall persevere in seeking a general reduction of armaments under effective inspection and control, which are essential safeguards to ensure reciprocity and protect the security of all.

In the coming year much remains to be done. While maintaining our military deterrent, we must intensify our efforts to achieve a just peace In Asia we shall continue to give help to nations struggling to maintain their freedom against the threat of Communist coercion or subversion In Europe we shall endeavour to increase not only the military strength of the North Atlantic Alliance but also its political cohesion and unity of purpose. We shall give such assistance as is feasible to the recently renewed effort of Western European nations to achieve a greater measure of integration, such as in the field of peaceful uses of atomic energy In the Near East we shall spare no effort in seeking to promote a fair solution of the tragic dispute between the Arab States and Israel, all of whom we want as our friends. The U.S.A. is ready to do its part to assure enduring peace in that area We hope that both sides will make the contributions necessary to achieve that purpose In Latin America we shall continue to co-operate vigorously in trade and other measures designed to assist economic progress in the area.

Strong economic ties are an essential element in our free world partnership . I most earnestly request that Congress approve our membership in the Organization for Trade Co-operation (O.T C.), which would assist the carrying-out of the General Agreement on Tariffs and Trade to which we have been a party since 1948 Our membership in the O T.C. will provide the most effective and expeditious means for removing discriminations and restrictions against American exports and in making our trade agreements truly reciprocal. U S. membership in the Organization will evidence our continuing desire to co-operate in promoting an expanded trade among the free nations. . . . Being strictly an administrative entity, the O.T C. cannot, of course, alter the control by Congress of U.S. tariff, import, and customs policies.

We need to encourage investment overseas by avoiding unfair tax duplications, and to foster foreign trade by further simplification and improvement of our customs legislation.

We must sustain and fortify our mutual security programme. Because the conditions of poverty and unrest in less developed areas make their people a special target of international Communism, there is a need to help them achieve the economic growth and stability necessary to preserve their independence against Communist threats and enticements.

In order that our friends may better achieve the greater strength that is our common goal they need assurance of continuity in economic assistance for development projects and programmes . . . which require a period of years for planning and completion. Accordingly, I ask Congress to grant limited authority to make longer-term commitments for assistance to such projects, to be fulfilled from appropriations to be made in future fiscal years . . .

In much of the world the ferment of change is working strongly, but grave injustices are still uncorrected. We must not, by any sanction of ours, help to perpetuate these wrongs. I have particularly in mind the oppressive division of the German people, the bondage of millions elsewhere, and the exclusion of Japan from U N. membership. We shall keep these injustices in the forefront of human consciousness and seek to maintain the pressure of world opinion to right these vast wrongs in the interest both of justice and secure peace

Injustice thrives on ignorance Because an understanding of the truth about America is one of our most powerful forces I am recommending a substantial increase in budgetary support of the U.S. Information Agency.

The sum of our international effort should be this · the waging of peace with as much resourcefulness, with as great a sense of dedication and urgency, as we have ever mustered in defence of our country in time of war. In this effort our weapon is not force. Our weapons are the principles and ideas embodied in our historic traditions applied with the same vigour that in the past made America a living promise of freedom for all mankind. To accomplish these vital tasks all of us should be concerned with the strength, effectiveness, and morale of our State Department and Foreign Service."

Defence. " Because peace is the keystone of our national policy, our defence programme emphasizes an effective flexible type of power calculated to deter or repulse any aggression and to preserve the peace. Short of war, we have never had military strength better adapted to our needs with improved readiness for emergency use. The maintenance of this strong military capability for the indefinite future will continue to call for a large share of our national Budget. Our military programmes must meet the needs of today. To build less would expose the nation to aggression. To build excessively under the influence of fear could defeat our purposes and impair or destroy the very freedom and economic system our military defences are designed to protect.

We have improved the effectiveness and combat readiness of our forces by developing and making operational new weapons and by integrating the latest scientific developments, including new atomic weapons, into our military plans We continue to push the production of the most modern military aircraft. The development of long-range missiles has been on an accelerated basis for some time. We are moving as rapidly as practicable towards nuclear-powered aircraft and ships. Combat capability, especially in terms of fire-power, has been substantially increased. We have made the adjustments in personnel permitted by the cessation of the Korean war, the build-up of our Allies, and the introduction of new weapons. The Services are all planning realistically on a long-term basis

To strengthen our continental defences the U.S A. and Canada, in the closest co-operation, have substantially augmented early warning networks. Great progress is being made in extending surveillance of the Arctic, the Atlantic, and the Pacific approaches to North America.

. . . Much has been done to attract and hold capable military personnel, but more needs to be done This year I renew my request of last year for legislation to provide proper medical care for military dependents and a more equitable survivors' benefit programme. The Administration will prepare additional recommendations designed to achieve the same objectives, including career incentives for medical and dental officers and nurses, and increases in the proportion of regular officers.

Closely related to the mission of the Defence Department is the task of the Federal Civil Defence Administration. A particular point of relationship arises from the fact that the key to civil defence is the expanded continental defence programme, including the Distant Early Warning System. Our Federal Civil Defence authorities have made progress in their programme, and now comprehensive studies are being conducted jointly by the Federal Civil Defence Administration, the States, and critical target cities, to determine the best procedures that can be adopted in case of an atomic attack. We must strengthen Federal assistance to the States and cities in devising the most effective common defence.

We have a broad and diversified mobilization base. But mobilization base requirements change with changing technology and strategy.

We must maintain flexibility to meet new requirements. I am requesting, therefore, that the Congress once again extend the Defence Production Act.

Of great importance to our nation's security is a continuing alertness to internal subversive activity within or without our Government. This Administration will not relax its efforts to deal forthrightly and vigorously in protection of this Government and its citizens against subversion, at the same time protecting the constitutional rights of all citizens."

The Budget. " . . . We have made long strides these past three years in bringing our Federal finances under control. The deficit for the fiscal year 1953 [i.e. July 1952 - June 1953] was almost $9,500,000,000. Larger deficits seemed certain. . . . , But Government waste and extravagance were searched out. Non-essential activities were dropped. Government expenses were carefully scrutinized. Total spending was cut by $14,000,000,000 below the amount planned by the previous Administration for the fiscal year 1954. This made possible . the largest tax cut in any year in our history. Almost $7,500,000,000 were released, and every taxpayer in the country benefited Almost two-thirds of the savings went directly to individuals This tax cut also helped to build up the economy, to make jobs in industry, and to increase the production of the many things desired to improve the scale of living for the great majority of Americans.

The strong expansion of the economy, coupled with a constant care for efficiency in Government operations, and an alert guard against waste and duplication, has brought us to a prospective balance between income and expenditure This is being done while we continue to strengthen our military security.

I expect the Budget to be in balance during the fiscal year ending June 30, 1956 I shall propose a balanced Budget for the next fiscal year ending June 30, 1957. But the balance we are seeking cannot be accomplished without the continuing everyday effort of the Executive and Legislative Branches to keep expenditures under control. It will also be necessary to continue all of the present excise taxes without any reduction, and the corporation income taxes at their present rates for another year beyond next April 1.

It is unquestionably true that our present tax level is very burdensome, and, in the interest of long-term and continuous economic growth, should be reduced when we prudently can. It is essential, in the sound management of the Government's finances, that we be mindful of our enormous national debt and of the obligation we have toward future Americans to reduce that debt whenever we can appropriately do so. Under conditions of high peace-time prosperity, such as now exist, we can never justify going further into debt to give ourselves a tax cut at the expense of our children. So, in the present state of our financial affairs, I earnestly believe that a tax cut can be deemed justifiable only when it will not unbalance the Budget—a Budget which makes provision for some reduction, even though modest, in our national debt. In this way we can best maintain fiscal integrity . . ."

Agriculture. " Our farm people are not sharing as they should in the general prosperity. They alone of all major groups have seen their incomes decline rather than rise They are caught between two millstones—rising production costs and declining prices. Such harm to a part of the national economy so vitally important to everyone is of great concern to us all No other resource is so indispensable as the land that feeds and clothes us. No group is more fundamental to our national life than our farmers

In successful prosecution of the war, the nation called for the utmost effort of its farmers. Their response was superb, their contribution unsurpassed Farmers are not now to be blamed for the mountainous, price-depressing surpluses produced in response to wartime policies and laws that were too long continued. War markets are not the markets of peace-time. Failure to recognize that basic fact by a timely adjustment of wartime legislation brought its inevitable result in peace-time—surpluses, lower prices, and lower incomes for our farmers. . . .

We are here concerned not only with our essential continuing supplies of food and fibre, but also with a way of life . . Consideration of these matters must be above and beyond politics. Our national farm policy . . . must not become a field for political warfare Too much is at stake. .

Our objective must be to help bring production into balance with existing and new markets, at prices that yield farmers a return for their work in line with what other Americans get. To reach this goal, deep-seated problems must be subjected to a stepped-up attack. There is no single easy solution Rather, there must be a many-sided assault on the stubborn problems of surpluses, prices, costs, and markets; and a steady, persistent, imaginative advance in the relationship between farmers and their Government.

In a few days, by special message, I shall lay before the Congress my detailed recommendations for new steps that should be taken promptly to speed the transition in agriculture and thus assist our farmers to achieve their fair share of the national income. . . ."

Water Conservation. " . . . I strongly recommend that action be taken at this session on such wholly Federal projects as the Colorado River Storage Project and the Frying Pan - Arkansas Project; on the John Day partnership project, and other projects which provide for co-operative action between the Federal Government and non-Federal interests; and on legislation which makes provision for Federal participation in small projects under the primary sponsorship of agencies of State and local government . . ."

Disaster Assistance. " . . . Through the past three years, the Administration has repeatedly moved into action wherever disaster struck. The extent of State participation in relief activities, however, has been far from uniform, and in many cases has been either inadequate or non-existent. Disaster assistance legislation requires overhauling, and an experimental programme of flood-damage indemnities should be undertaken. The Administration will make detailed recommendations on these subjects."

Depressed Areas. " We must help deal with the pockets of chronic unemployment that here and there mar the nation's general industrial prosperity. Economic changes in recent years have been often so rapid and far-reaching that areas committed to a single local resource or industrial activity have found themselves temporarily deprived of their markets and their livelihood. Such conditions mean severe hardship for thousands of people as the slow process of adaptation to new circumstances goes on. This process can be speeded up. . . . Recommendations will be submitted, designed to supplement with Federal technical and loan assistance local efforts to get on with the vital job. Improving such communities must, of course, remain the

primary responsibility of the people living there and of their States. But a soundly conceived Federal partnership programme can be of real assistnace to them in their efforts."

Highway Construction. "Legislation to provide a modern, inter-State highway system is even more urgent this year than last. . . . During the [past] year the number of motor vehicles has increased from 58,000,000 to 61,000,000; over 38,000 persons lost their lives in highway accidents, while the fearful toll of injuries and property damage has gone on unabated.

In my message of Feb. 22, 1955, I urged that measures be taken to complete the vital 40,000-mile inter-State system over a period of ten years at an estimated Federal cost of approximately $25,000,000,000. No programme was adopted. If we are ever to solve our mounting traffic problem, the whole inter-State system must be authorized as one project, to be completed approximately within the specified time. . . . The pressing nature of this problem must not lead us to solutions outside the bounds of sound fiscal management. . . . There must be an adequate plan of financing. To continue the drastically needed improvement in other national highway systems, I recommend the continuation of the Federal Aid Highway Programme.

Small Businesses. ". . . In this past year the steady improvement in the economic health of small business has reinforced the vitality of our competitive economy. We shall continue to help small business concerns to obtain access to adequate financing and to competent counsel on management, production, and marketing problems. Through measures already taken, opportunities for small business participation in Government procurement programmes, including military procurement, are greatly improved. The effectiveness of these measures will become increasingly apparent. We shall continue to make certain that small business has a fair opportunity to compete and has an economic environment in which it may prosper. . . ."

Postal Service. "As part of our programme of promoting efficiency in Government and getting the fiscal situation in hand, the Post Office Department in the past three years has been overhauled. Nearly 1,000 new post offices have been provided Financial practices have been modernized and transportation and operating methods are being constantly improved. A new wage and incentive plan for the 500,000 postal employees has been established. Never before has the postal system handled so much mail so quickly and so economically.

The Post Office Department faces two serious problems. First, much of its physical plant—post offices and other buildings—is obsolete and inadequate. Many new buildings and the modernization of present ones are essential if we are to have improved mail service. The second problem is the Department's fiscal plight. It now faces an annual deficit of $500,000,000. Recommendations on postal facilities and on additional postal revenues will be submitted to Congress.

Education. ". . . I urge that Congress move promptly to enact an effective programme of Federal assistance to help erase the existing deficit of school classrooms. Such a programme, which should be limited to a five-year period, must operate to increase rather than decrease local and State support of schools and to give the greatest help to the States and localities with the least financial resources. Federal aid should in no way jeopardize the freedom of local school systems. . . ."

Social Security. "Under the 1954 amendments to the old-age and survivors' insurance programme, protection was extended to some 10,000,000 additional workers, and benefits were increased. The system now helps to protect nine out of ten workers and their families against loss of income in old age or on the death of the bread-winner The system is sound. It must be kept so. In developing improvements we must give the most careful consideration to population and social trends and to fiscal requirements. With these considerations in mind the Administration will present its recommendations for further expansion of coverage and other steps which can be taken wisely at this time.

Other needs . . . include increased child welfare services, extension of the programme of aid to dependent children, an intensified attack on juvenile delinquency, and special attention to the problems of mentally retarded children. The training of more skilled workers for these fields and the quest for new knowledge through research in social welfare are essential Similarly the problems of our aged people need our attention."

Health and Medical Research. ". . . A well-supported, well-balanced programme of research, including basic research, can open new frontiers of knowledge, prevent and relieve suffering, and prolong life. Accordingly, I shall recommend a substantial increase in Federal funds for the support of such a programme. As an integral part of this effort, I shall recommend a new plan to aid construction of non-Federal medical research and teaching facilities and to help provide more adequate support for the training of medical research manpower.

We must aid in cushioning the heavy and rising costs of illness and hospitalization to individuals and families. Provision should be made, by Federal reinsurance or otherwise, to foster extension of voluntary health insurance coverage to many more persons, especially older persons and those in rural areas. Plans should be evolved to improve protection against the costs of prolonged or severe illness. . . ."

Wages and Working Conditions. ". . . The need still exists for improvement of the Labour-Management Relations Act. The recommendations I submitted to Congress last year take into account not only the interests of labour and management but also the public welfare. The needed amendments should be enacted without further delay.

We must also carry forward the job of improving the wage-hour law. Last year I requested Congress to broaden the coverage of the minimum wage. I repeat that recommendation and I pledge the full resources of the Executive Branch to assist Congress in finding ways to attain this goal. . . .

The Administration will shortly propose legislation to assure adequate disclosure of the financial affairs of each employee pension and welfare plan, and to afford substantial protection to their beneficiaries in accordance with the objectives outlined in my message of Jan. 11, 1954.

Legislation to apply the principle of equal pay for equal work without discrimination because of sex is a matter of simple justice. I earnestly urge the Congress to move swiftly to implement these needed labour measures."

Housing. "We must carry forward the housing programme. . . . Home ownership is now advanced to the point where almost three of every five families in our cities, towns, and suburbs own the houses they live in. For the housing programme most of the legislative authority already exists However, a firm programme of public housing is essential until the private building industry has found ways to provide more adequate housing for low-income families. The Administration will propose authority to contract for 35,000 additional public housing units in each of the next two fiscal years for communities which will participate in an integrated attack on slums and blight. . . .

Federal Government Employees. "The legislation I have recommended for workers in private industry should be accompanied by a parallel effort for the welfare of Government employees. . . . Additional personal management legislation is needed. As I stated last year, an executive pay increase is essential to efficient governmental management. Such an increase, together with needed adjustments in the pay for the top career positions, is also necessary to the equitable completion of the Federal pay programme initiated last year. Other legislation will be proposed, including legislation for prepaid group health insurance for employees and their dependants, and to effect major improvements in the Civil Service retirement system."

Ex-Servicemen's Pensions. ". . . The Commission on Veterans' Pensions is conducting a study of the entire field of veterans' benefits and will soon submit proposed improvements."

Civil Rights. ". . . In Executive Branch operations throughout the nation, elimination of discrimination and segregation is all but completed. Progress is also being made among contractors engaged in furnishing Government services and requirements Every citizen now has the opportunity to fit himself for, and to hold, a position of responsibility in the service of his country. In the District of Columbia, through the voluntary co-operation of the people, discrimination and segregation are disappearing from hotels, theatres, restaurants, and other facilities.

It is disturbing that in some localities allegations persist that Negro citizens are being deprived of their right to vote and are likewise being subjected to unwarranted economic pressures. I recommend that the substance of these charges be thoroughly examined by a bi-partisan commission created by Congress . . ."

Statehood for Hawaii and Alaska. ". . . I urgently request this Congress to grant statehood for Hawaii. Also . . I trust that progress toward statehood for Alaska can be made in this session. . . ."

Immigration. "In keeping with our responsibility of world leadership and in our own self-interest, I again point out to the Congress the urgent need for revision of the immigration and nationality laws Our nation has always welcomed immigrants to our shores. The wisdom of such a policy is clearly shown by the fact that America has been built by immigrants and the descendants of immigrants. That policy must be continued realistically with present-day conditions in mind.

I recommend that the number of persons admitted to this country annually be based not on the 1920 census but on the latest—1950—census. Provision should be made to allow for greater flexibility in the use of quotas so that, if one country does not use its share, the vacancies may be made available for the use of qualified individuals from other countries.

The law should be amended to permit the Secretary of State and the Attorney General to waive the requirements of finger-printing on a reciprocal basis for persons coming to this country for temporary visits. This and other changes in the law are long overdue and should be taken care of promptly. . . .

I am happy to report substantial progress in the flow of immigrants under the Refugee Relief Act of 1953. However, I again request this Congress to approve without further delay the urgently needed amendments which I submitted in the last session. Because of the high prosperity in Germany and Austria, the number of immigrants from those countries will be reduced. This will make available thousands of unfilled openings which I recommend be distributed to Greece and Italy and to escapees from behind the Iron Curtain."

Extension of Suffrage to District of Columbia. "I renew my request that the principle of self-government be extended and the right of suffrage granted to the citizens of the District of Columbia. . . ."

President Eisenhower left Key West (Florida) and returned to Washington on Jan. 8. Before leaving Florida he said that he was ready to resume the "full duties of the presidency" but that he had not yet come to a decision about whether or not he would stand for a second presidential term.

A. GOLD COAST. — Sir Frederick Bourne's Report on Devolution of Powers to Regions. - Ashanti Opposition to Government Legislation.

A report on the devolution of powers from the Gold Coast Government to the regions, drawn up by Sir Frederick Bourne (who had been visiting the colony since September 1955 as constitutional adviser), was issued on Dec. 23. It recommended "a very substantial transfer of power from the centre to the regions."

The report suggested that a regional assembly should be established in any region where a majority of the district councils desired it. Regional assemblies should be limited for the time being to the Eastern, Western, Ashanti, and Northern territories, the Accra region being left as it was If Togoland joined the Gold Coast before the new Constitution was finally approved, it should be added as a region. The assemblies should have no power to raise money by taxation or other means, and the proceeds of local taxation should be entirely used in the local, urban, and district councils.

The devolution of power to the regions (the report observed) required very careful consideration, but could be of great value to the Government in relieving Ministers of a great deal of local business, thus enabling them to devote more time to issues of national policy. Items which it was recommended should be transferred under the heading of "local government" were agriculture, animal health, education, forestry, communications, medical and health services, rural water development, town and country planning, and housing.

The object of the regional assemblies would be to afford an effective link between the regions and the central Government, thereby removing the danger of excessive centralization and providing for the expression of local opinion on important matters. The supreme legislative power, however, should remain at the centre.

As regards the position of the chiefs, it was suggested that no measure affecting their transitional functions or privileges should be introduced in the Legislative Assembly without first consulting them. Any views received as a result should be circulated to all members of the Assembly, and should be voted upon without regard to party affiliations.

Finally, Sir Frederick Bourne observed that it would be unfair to criticize the Opposition's federal proposals in detail, as they had declined to discuss them with him. He added, however, that "fragmentation" of existing States was on general grounds mistaken.

The Asanteman Council (the supreme council of chiefs in Ashanti) and the Opposition parties had refused to meet Sir Frederick Bourne during his visit, in protest against a Government Bill, passed by the Legislative Assembly on Nov. 16, which gave lesser chiefs in Ashanti the right to appeal from the Asanteman Council to the Governor in constitutional disputes. The Opposition alleged that the object of the Bill was to reduce the Asantehene (the paramount chief of the Ashanti) to the status of a mere divisional chief, and thereby to break up the Ashanti nation, and accused the Government of prejudicing the very issue which Sir Frederick Bourne was investigating.

The Prime Minister, Dr. Nkrumah, announced on Jan. 1, 1956, that he had invited all parties and organizations in the Gold Coast to a conference to study the report. He said that Sir Frederick Bourne had intimated that he would be willing to preside over such a conference.—(Times - New Commonwealth)

B. PHILIPPINES. — Partial Senate Elections.

Elections were held in the Philippines on Nov. 9, 1955, for nine seats in the Senate—eight for full six-year terms and one to complete an unexpired two-year senatorial term. Voting was on a nation-wide basis for the full-term seats, the eight candidates with the highest number of votes being declared elected. The elections resulted in a victory for President Magsaysay's Nationalist Party, which won seven of the full-term seats as well as the seat for the unexpired two years. The remaining seat was won by a Liberal, Señor Carlo M. Recto (a critic of President Magsaysay's foreign policy), who was seeking re-election. The poll was headed by Señora Pacita M. Warns, Administrator of Social Welfare and the only woman in the Philippine Cabinet.

As a result of the elections, party representation in the Philippine Senate was: Nationalists, 22; Liberals, 1; Democrats, 1; Citizens' Party, 1.—(New York Times) **(13305 A.)**

C. UNITED KINGDOM. — Fiduciary Issue Changes.

The following changes were made in the fiduciary issue during 1955:

Jan. 20, £1,725,000,000; April 6, £1,750,000,000; May 4, £1,775,000,000; June 8, £1,825,000,000; July 20, £1,875,000,000; Aug. 17, £1,825,000,000; Sept 7, £1,800,000,000; Nov. 30, £1,850,000,000; Dec. 14, £1,900,000,000.

The December level was the highest ever recorded, and compared with £1,775,000,000 at the end of 1954.—(Economist)

D. RELIGIOUS LIFE. — Church of England. - Death of Dr. Cyril Garbett. - Dr. Ramsey appointed Archbishop of York. - Dr. Campbell becomes Bishop of London.

The Most Rev. Dr. Cyril Garbett, Archbishop of York and Primate of England, died on Dec. 31, 1955, at the age of 80.

Cyril Foster Garbett was born on Feb. 6, 1875, at Tongham, near Aldershot, where his father was vicar. Educated at Portsmouth Grammar School and Keble College, Oxford, he became President of the Oxford Union, graduated with a second-class degree in Modern History, and was ordained in 1900 to a curacy at St. Mary's, Portsea, where Cosmo Gordon Lang (later Archbishop of Canterbury) was vicar at the time. During his 19 years at Portsea (a large industrial parish), of which he became vicar in 1910, Dr. Garbett played an active part in combating such social evils as overcrowding, sweated labour, and the slums, and became an authority on housing and slum clearance.

From 1919-32 he was Bishop of Southwark, where he was equally active in combating the moral evils consequent on bad housing, malnutrition, and unemployment. While at Southwark Dr. Garbett began his "pilgrimages" to outlying rural areas of the diocese, often covering ten miles a day on foot and meeting many of his rural parishioners He was also instrumental in raising, both locally and centrally, nearly £250,000 for the Twenty-five Churches Fund, aimed at providing new churches for the rapidly expanding population. In 1932 Dr. Garbett was translated to the See of Winchester, and in 1942 became Archbishop of York when Dr. Temple was translated to Canterbury.

Dr. Garbett, who had already visited India and Ceylon in 1938 as chairman of the Missionary Council of the Church Assembly, paid visits to the Soviet Union in 1943 and to the United States in 1944 to convey the Church of England's greetings to the Russian Orthodox Church and the Protestant Episcopal Church of America. During his stay in the U.S.S.R. he was the guest of the Patriarch Sergius, head of the Russian Orthodox Church, whilst his visit to the U S A. was marked by a notable sermon preached in the Cathedral of St. John the Divine (New York City) on the essentials of a just and durable peace. In 1945-46 he visited Ethiopia, Greece, and the British forces in the Middle East, the Mediterranean, and Western Europe, whilst in 1947 he visited Czechoslovakia and Yugoslavia. In 1951-52 he made an extensive tour of the Pacific Islands, Australia, New Zealand, and the British colonies in South-East Asia.

In addition to his speeches in the Convocation of York, the Church Assembly, and elsewhere on such matters as the Church's position on the question of marriage and divorce, Christianity and Communism, and doctrinal questions, Dr. Garbett was nationally known for the forthrightness of his views on important international questions such as relations between East and West, the situation in the Middle East, and atomic warfare, as well as on housing and other social matters. He was a frequent speaker in the House of Lords, served on committees dealing with town and country planning and with rural housing, and presided over the Archbishop's Commission on Canon Law, which was set up in 1943 and reported in 1946. He was the author of several important books (all written when he was over 70)—*The Claims of the Church of England* (1947). *Church and State in England* (1950), *In an Age of Revolution* (1952), and *World Problems of Today* (1954)

Dr Garbett, who was unmarried, became a Privy Councillor in 1942, and was made a Knight Grand Cross of the Royal Victorian Order by H.M. the Queen on the occasion of his 80th birthday (see 14039 B). His name was included in the recent New Year Honours as the recipient of a barony (see 14623 A), his death occurring on the day before the Honours List was published He had previously announced his intention of resigning the archiepiscopal See owing to failing health.

The funeral service for Dr. Garbett was held in York Minster on Jan. 4, an address being delivered by the Archbishop of Canterbury.

It was announced on Jan. 4 from 10, Downing Street, that the Queen had approved the appointment of Dr. Michael Ramsey, Bishop of Durham, as Archbishop of York in succession to the late Dr. Garbett, and of Dr. Henry Montgomery Campbell as Bishop of London in succession to Dr. Wand.

Dr. Michael Ramsey (51), a distinguished scholar, was educated at Repton and Magdalene College, Cambridge (where he was President of the Union), and was ordained in 1929. After a curacy in Liverpool he became in succession sub-warden of Lincoln Theological College (1930), Vicar of St. Benedict, Cambridge (1929), Professor of Divinity in the University of Durham and Canon of Durham Cathedral (1940), Regius Professor of Divinity in the University of Cambridge and Fellow of Magdalene College (1950), and Bishop of Durham (1952), in which capacity he was one of the two bishops (the other being the Bishop of Bath and Wells) who had the traditional privilege of supporting the Queen at the Coronation.

Dr. Montgomery Campbell (68), a Londoner by birth, has worked nearly all his life in the capital. He won the Military Cross in the First World War as a chaplain to the Forces, later served as a parish priest in Poplar, Hackney, the West End, and the City, and became Rector of St. George's, Hanover Square, in 1933. He was subsequently Suffragan Bishop of Kensington and Suffragan Bishop of Willesden before becoming Bishop of Guildford in 1938. Dr. Campbell was educated at Malvern, Brasenose College, Oxford, and Wells Theological College, and was ordained in 1911.

Dr. J. W. C. Wand (70), Bishop of London since 1945, had resigned on Dec. 31, 1955, on the grounds of age and health. (Church Times) **(Prev. rep. 14536 D; Dr. Garbett, 14039 B.)**

JANUARY 14—21, 1956

A. UNITED NATIONS. — General Assembly. - Admission of 16 New Member-Nations.

The most important achievement of the 10th session of the U.N. General Assembly (see 14461 A) was the admission of 16 new member-countries to the United Nations, thereby virtually resolving a deadlock which had persisted for nearly ten years. The new member-States were: Albania, Austria, Bulgaria, Cambodia, Ceylon, Finland, Hungary, the Irish Republic, Italy, Jordan, Laos, Libya, Nepal, Portugal, Rumania, and Spain. Two other countries, Japan and the Mongolian People's Republic (Outer Mongolia), were also originally proposed for U.N. membership, but after difficulties in the Security Council it was agreed to defer consideration of their applications.

The initiative in securing the admission of the new member-countries was taken by Canada, whose delegate (Mr. Paul Martin) circulated a proposal in mid-November recommending the admission of 18 countries—the 16 eventually agreed upon, together with Japan and Outer Mongolia The Canadian proposal excluded the " partitioned " countries—i.e. Germany, Korea, and Vietnam.

In statements issued on Nov. 13-14, the Soviet delegate (M. Kuznetsov) announced the U.S S.R.'s full support for the Canadian " package " proposal, whilst the British delegate (Sir Pierson Dixon) said that the U.K. would support Canada's efforts to resolve the deadlock over the admission of new members, " even if the qualifications of some of them are open to doubt " Sir Pierson added in this connexion that Mongolia's qualifications were especially doubtful, that Britain would not, however, oppose Mongolia's admission if there was general support for the other 17 countries, and that she would not exercise the veto in the Security Council when the various candidatures came up for discussion.

The U.S. delegate (Mr. Cabot Lodge) announced on Nov 14 that the U.S.A. would abstain from voting on the applications from Albania, Bulgaria, Hungary, and Rumania, both in the Security Council and in the General Assembly. He added that it was " obvious that Mongolia cannot make the grade."

A spokesman of the Chinese Nationalist delegation said that his Government would oppose the admission of Mongolia even if it meant the exercise of a veto in the Security Council. [Nationalist China, as one of the five permanent members of the Security Council, has the right to exercise the veto equally with the other permanent members—the U S.A , the U.S.S.R., Great Britain, and France]

A resolution was presented on Dec. 1 to the *ad hoc* Political Committee of the General Assembly by Canada and 27 other countries which (1) noted " the general sentiment which has been expressed on numerous occasions in favour of the widest possible membership of the U.N." ; and (2) asked the General Assembly to request the Security Council " to consider the pending applications for membership of all those countries about which no problem of unification arises, and to report to the General Assembly during the present session." The co-signatories of the resolution included four British Commonwealth countries in addition to Canada (Australia, New Zealand, India, and Pakistan), the Scandinavian countries, and a number of Asian and Latin American nations.

During the debate on Dec. 1 **Dr. Victor Belaunde** (Peru), chairman of the Good Offices Committee set up at earlier sessions to study the question of admitting new U.N. members, presented his report to the *ad hoc* Committee. He said that although it appeared impossible at one time to achieve a *rapprochement* between the great Powers on this question, such a *rapprochement* had in fact taken place " in spite of tremendous obstacles." Whilst the permanent members of the Security Council continued to adhere to their previously stated positions, they had nevertheless given the impression that " such adherence was not necessarily immutable in view of the current evolution of the international situation." Describing his meetings with representatives of the great Powers, he said that on Sept. 28— " a memorable day for the U.N."—he had had a discussion with M. Molotov, who, though non-committal, had not turned down the possibility of admitting Japan and Spain to the United Nations. Dr. Belaunde welcomed the Canadian resolution because it supported the position " consistently maintained " by the Good Offices Committee, and urged the admission of all the 18 countries mentioned in the resolution.

Sir Pierson Dixon (U.K.) reiterated that the British Government was ready to acquiesce in the admission of all 18 applicants, although it was " not wedded to the view that the solution must be to admit all 18." " Our only aim," he added, " is to break the deadlock, and we shall accept any solution within the terms of the Canadian resolution which does this."

M. Kuznetsov (U.S.S.R.) alleged that the U.S.A. " continued to oppose the admission of countries of the People's Democracy only because the peoples of those countries have embarked upon a course of free political and economic development which is not to the liking of the ruling circles in some States." He maintained that Bulgaria, Hungary, Rumania, and Albania were fully entitled to U.N. membership because they were peace-loving States and thereby conformed to the requirements of the Charter; that their exclusion on the grounds of their political and social structure would be tantamount to interference in their internal affairs, and that the Mongolian People's Republic was also qualified because it maintained diplomatic relations with a number of countries and had been officially recognized by China in 1946.

Mr. Cabot Lodge reiterated that the U.S.A. would not use the veto but would abstain from voting on the applications from Bulgaria, Hungary, Rumania, Albania, and Mongolia, both in the General Assembly and in the Security Council. He maintained that none of these countries could be regarded as fully independent.

Dr. Tsiang (Nationalist China) declared that the four East European countries were not eligible for U.N. membership because they were " exploited for the benefit of the U.S.S R ", whilst Outer Mongolia was not eligible because she had invaded China, taken part in the Korean War against the U N , and thereby shown that she was not a peace-loving State.

The 28-nation resolution was adopted by the *ad hoc* Committee on Dec 7, the voting being 52 in favour and two against (Cuba and Nationalist China), with five abstentions (the U.S.A., France, Belgium, Greece, and Israel) and South Africa absent. The plenary session of the Assembly accepted the resolution on the following day by an identical vote (with the same abstentions and absentee), after which the resolution went to the Security Council.

After an initial deadlock in the Security Council, resulting from a Chinese Nationalist veto against Mongolia and a retaliatory Soviet veto against all the 13 non-Communist countries applying for membership, agreement was eventually reached on the admission of 16 of the 18 applicants (i.e., excluding Japan and Mongolia), a recommendation to this effect being forwarded to the General Assembly.

Three resolutions were before the Security Council when it met on Dec. 10 .

(1) A resolution, sponsored jointly by New Zealand and Brazil, proposing that the Security Council should vote separately upon each of the 18 applications in the chronological order in which they had been presented to the U.N., and then present its recommendations to the General Assembly as a " package " resolution.

(2) A Soviet resolution proposing that the Security Council and the General Assembly should meet in simultaneous but separate session to consider each of the 18 applications in the same order as proposed in the New Zealand - Brazilian resolution The Security Council should make its recommendations to the General Assembly singly in the case of each applicant, and the Assembly should take its decision on that particular applicant before passing to the next on the list.

(3) A Chinese Nationalist resolution for the admission of 11 of the 18 countries (excluding Finland and Nepal as well as Albania, Bulgaria, Hungary, Rumania, and Mongolia), and adding South Korea and South Vietnam to the list—making a total of 13.

Sir Pierson Dixon reiterated that the U.K. would support the entry of all 18 candidates, though it had doubts about the qualifications of Mongolia and Albania. As regards the former, little was known of its degree of sovereignty and independence; nevertheless, the Government of India had recognized the Mongolian People's Republic, and because the U.K. had confidence in India's political judgment it would make it easier for her to support the Mongolian application. With regard to Albania, he doubted whether that country could be regarded as " peace-loving " in view of the incident in 1946 in which two British warships were sunk in the Corfu Channel with the loss of 51 lives. Moreover, although the International Court had ruled in favour of the U.K. and had awarded compensation against Albania, that country had never paid the indemnity. But despite this, the U.K. would support Albania's application " as an act of faith in that country's future good conduct."

Sir Leslie Munro (New Zealand), president of the Security Council during December, and **M. Sobolev** (U.S S.R) urged the admission of all 18 countries mentioned in the resolution, while **Mr. Cabot Lodge** again reiterated that the U S.A. would abstain from voting on the Bulgarian, Hungarian, Rumanian, Albanian, and Mongolian applications, but would not use the veto. **M. Sobolev** expressed fears lest the procedure laid down in the New Zealand - Brazilian resolution might lead to a situation in which, although the Security Council had approved all 18 candidatures, the necessary two-thirds majority might not be forthcoming in the General Assembly in respect of one or other individual applicants. For this reason he urged the Council to adopt the " one-by-one " procedure recommended in the Soviet resolution rather than the " package " procedure advocated in the New Zealand - Brazilian resolution.

When the Security Council met again on Dec. 13, it decided by eight votes to one (Nationalist China), with Belgium and the U.S.A. abstaining, that priority should be given the New Zealand - Brazilian resolution—that is, that separate votes should be taken on the admission of each applicant, and then on the group of applicants as a whole, before the General Assembly dealt with the question. A Chinese Nationalist amendment to add South Korea and South Vietnam to the list was rejected by nine votes to one, with New Zealand abstaining.

The Council then voted on Albania's application (the first of the 18 countries mentioned in the N.Z. - Brazilian resolution), which was approved by seven votes to nil, with four abstentions (the U.S.A., France, Belgium, Nationalist China). The second country on the list, Mongolia, was, however, vetoed by the Chinese Nationalist.

representative, Dr. Tsiang, the voting being eight in favour of the Mongolian application, one against (Nationalist China), and two abstentions (the U S A. and Belgium). The Soviet representative, M. Sobolev, thereupon vetoed the applications of all the 13 non-Communist countries—Jordan, the Irish Republic, Portugal, Italy, Austria, Finland, Ceylon, Nepal, Libya, Cambodia, Japan, Spain, and Laos. (In each case—except that of Spain, on which Belgium abstained—the voting was ten in favour and the U.S S.R. against.) The applications of Bulgaria, Hungary, and Rumania were each approved by nine votes to nil, with two abstentions (the U.S.A. and Nationalist China)

At the urgent request of M. Sobolev, the Security Council was re-convened on Dec. 14. After declaring that the efforts to admit all 18 applicants had been "wrecked by the obstruction of one man" (i.e. Dr. Tsiang), **M. Sobolev** announced (*a*) that the Soviet Union was prepared to withdraw its veto against all the non-Communist countries with the single exception of Japan; and (*b*) that it was also prepared to drop its sponsorship of Mongolia for the present session He explained that the U.S S.R. desired the admission of both Japan and Mongolia to the U.N. at the earliest opportunity, and expressed the hope that efforts would be made to bring about the admission of these two countries before the 11th session of the General Assembly. The Soviet representative then introduced a resolution for the admission of 16 countries—i.e., all except Japan and Mongolia.

Sir Leslie Munro announced that he would recess the Council for a short time, in view of the importance of the Soviet proposal, to give members an opportunity of considering their position in the light of this new development. When the meeting was resumed, **Mr. Cabot Lodge** moved an amendment adding Japan to the list of countries in the Soviet resolution. **M. Sobolev,** however, said that he would have to use his veto against Japan "for reasons well known," and this was accordingly done when a vote was taken on the U.S. amendment. (The voting was ten in favour of the amendment and the U.S.S R. against)

The Council then voted upon the individual applications, with the following result: the applications of Jordan, the Irish Republic, Portugal, Italy, Austria, Finland, Ceylon, Nepal, Libya, Cambodia, and Laos were approved unanimously; Albania was admitted by eight votes to nil, with the U.S.A., France, and Nationalist China abstaining; Bulgaria, Hungary, and Rumania were admitted by nine votes to nil, with the U.S.A. and Nationalist China abstaining; and Spain was admitted by ten votes to nil, with Belgium abstaining. The Soviet resolution for the admission of all 16 countries was then adopted by eight votes to nil (the U.S.A., Belgium, and Nationalist China abstaining) and forwarded to the General Assembly

When the General Assembly met later on the same day (Dec. 14), the Cuban delegate (Dr. Nuñez-Portuondo) proposed that each country should be voted upon separately in a roll-call vote. In making this request, Dr. Nuñez-Portuondo referred to the advisory opinion of the International Court of Justice (given in 1948) that applications for U.N. membership should be considered only in the light of the relevant provisions of the Charter, and that the granting of one country's application should not be made contingent upon also granting others. The Cuban proposal was agreed to, as well as a proposal by the President of the Assembly (Señor José Maza) that, after the individual roll-call votes, the 16 applicants should be voted upon collectively.

After admitting all 16 applicants to the United Nations on separate roll-call votes, the General Assembly adopted a resolution (sponsored by 41 countries) for the collective admission of all 16 countries. The 41-nation resolution was adopted without a vote, though Cuba expressed the wish that her abstention should be recorded.

The voting in the General Assembly on the 16 applications was as follows (the list is in chronological order of application for U.N. membership):

	For	Against	Abstained
Albania	48	3	5
Jordan	55	—	1
Irish Republic	56	—	—
Portugal	56	—	—
Hungary	49	2	5
Italy	56	—	—
Austria	56	—	—
Rumania	49	2	5
Bulgaria	50	2	5
Finland	57	—	—
Ceylon	57	—	—
Nepal	57	—	—
Libya	56	—	1
Cambodia	57	—	—
Laos	57	—	—
Spain	55	—	2

Ethiopia was absent on the first eight votes, and Haiti, Paraguay, and South Africa were absent on all votes. The following negative votes and abstentions were recorded:

(i) Israel abstained on the admission of Jordan and Libya.

(ii) Belgium and Mexico abstained on the admission of Spain.

(iii) Cuba, Greece, and Nationalist China voted against the admission of Albania, whilst the U.S.A., France, the Netherlands, the Dominican Republic, and the Philippines abstained.

(iv) Cuba and Nationalist China voted against the admission of Bulgaria, Hungary, and Rumania, whilst the U.S.A., Greece, the Netherlands, the Dominican Republic, and the Philippines abstained from voting

The admission of the 16 new member-countries—which increased the membership of the United Nations from 60 to 76—was warmly welcomed by the President of the Assembly (Señor Maza) and by many delegates. Special tributes were paid to Mr. Paul Martin (Canada)—who was described by Sir Leslie Munro as "the chief architect of this successful and historic event"—and to Dr. Victor Belaunde (Peru), chairman of the Assembly's Good Offices Committee, for the outstanding parts they had played in helping to resolve a dispute of long standing.

In welcoming the new members, Señor Maza said that the General Assembly had "given life to a deep desire which has existed for several years—to overcome the obstacles that have impeded the development of the U N. towards an international organization representing all the peoples of the world and enjoying true universality." He added: "It is true that the objective has not been reached. There are still notable absences among us. But today's advance marks an historic stage in an evolution which cannot but heighten the prestige of the United Nations and give it new vigour"

Numerous expressions of regret were voiced at the absence of Japan from the list of successful applicants, coupled with hopes—expressed by both the U.S and Soviet delegates—that the situation would soon be remedied

Delegates of 13 of the new member-countries took their seats in the Assembly on Dec. 15, the exceptions being Albania, Laos, and Nepal

A British resolution was presented to the Security Council on Dec. 21 by Sir Pierson Dixon asking the Council to take note of the fact that Japan was "fully qualified for membership of the U.N.", and expressing the hope that she might soon be admitted to the Organization. M. Sobolev moved a Soviet amendment adding the name of Mongolia to that of Japan and linking the two countries as equally well qualified for U.N. membership. After the amendment had been rejected (one vote in favour and ten abstentions) Sir Pierson Dixon said that he would not press his resolution to a vote at the present stage, in the hope that the Soviet Government might find it possible to adopt a more positive attitude towards it in the near future.

The U.S. State Department issued a statement on Dec. 15 describing the exclusion of Japan from the U.N. as "a glaring injustice," and declaring that it was "clear that the Soviet Union, in vetoing Japan, had sought only to preserve for itself a bargaining pawn." After protesting against the "cynical attitude" of the Soviet Government, and declaring that the U.S.A. would continue to press for the admission of Japan to the U.N., the statement added that the U.S. Government was "greatly pleased" at the admission of new member-countries "despite continued Soviet obstruction over the past nine years, including the casting of 45 vetoes on the admission of new members."—(United Nations Review, New York - U.N. Information Centre, London - New York Times - New York Herald Tribune - Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris)

(Prev. rep. U.N. General Assembly, 14461 A.)

Footnote. With the admission of the above-mentioned 16 countries, the only countries still outside the United Nations are Japan, Switzerland, the German Federal Republic (Western Germany), the German Democratic Republic (Eastern Germany), the two Korean governments, the two Vietnamese governments, Outer Mongolia, the Holy See, and Europe's four "miniature" States—Andorra, Liechtenstein, Monaco, and San Marino. Several of these countries, nevertheless, are associated with the U.N. through specialized agencies such as Unesco, the World Health Organization, etc., whilst the headquarters of a number of U.N. organizations are on Swiss territory. The Chinese People's Republic claims the seat at present occupied by Nationalist China.

The 51 founding nations of the U.N. in 1945 were Argentina, Australia, Belgium, Bolivia, Brazil, Byelorussia, Canada, Chile, China, Colombia, Costa Rica, Cuba, Czechoslovakia, Denmark, Dominican Republic, Ecuador, Egypt, El Salvador, Ethiopia, France, Greece, Guatemala, Haiti, Honduras, India, Iraq, Lebanon, Liberia, Luxemburg, Mexico, Netherlands, New Zealand, Nicaragua, Norway, Panama, Paraguay, Persia, Peru, Philippines, Poland, Saudi Arabia, South Africa, Soviet Union, Syria, Turkey, Ukraine, United Kingdom, United States, Uruguay, Venezuela, and Yugoslavia.

Subsequent admissions were as follows—Sweden, Iceland, and Afghanistan in November, 1946; Siam in December 1946; Pakistan and Yemen in December 1947; Burma in April 1948; Israel in May 1949; Indonesia in September 1950; and Albania, Austria, Bulgaria, Cambodia, Ceylon, Finland, Hungary, the Irish Republic, Italy, Jordan, Laos, Libya, Nepal, Portugal, Rumania, and Spain in December 1955.—(Ed. K.C.A. - New York Times)

A. UNITED KINGDOM. — The Prime Minister's Bradford Speech - Review of Economic Problems.

An important speech on the Government's domestic policy, notably in the field of economic affairs, was made by the Prime Minister at Bradford on Jan. 18 in an address to some 4,000 Conservatives. In the course of his speech (the text of which is given below, with cross-headings inserted) Sir Anthony Eden expressed the Government's determination to combat inflationary trends, to launch a drive against monopolistic practices throughout industry, to seek further reductions in Government expenditure, to encourage price stabilization and reductions by all means in its power, and to give priority to the development of nuclear energy and technological education. In that part of his speech dealing with Commonwealth and foreign affairs, he repudiated the allegations made against Britain by the Soviet leaders during their recent tour of Asian countries.

Sir Anthony Eden began his speech by repudiating insinuations in certain London newspapers that the Government and the Conservative Party were disunited and that far-reaching governmental changes were contemplated, including Sir Anthony's retirement from the Premiership. He said in this connexion: "I do not have to advise this great Yorkshire audience not to believe everything they read in certain London newspapers. I know that one or two of these cantankerous newspapers claimed that they were reflecting public feeling. They were doing nothing of the sort. What they were doing was to try to make you think and feel what they wanted you to. I am sure you will always be on your guard against such methods. That way lies the denial of democracy. Yorkshire will never let Britain forget that the first duty of a citizen of a free country is to think for his or her self.

"I would not even mention these matters tonight except for one reason. I must be concerned for our party when baseless reports of disunity are spread abroad. I want everyone, therefore, to understand this. Our party is united, and the Government is more than ever determined to do what it believes to be right for our country, whatever anyone says. This country is not on its way down, and this Government is not on its way out. As to the Government, we were elected not for six or eight months but for five years. It is on our record at the end of those years that we are prepared to be judged, and I intend—if God wills—to be there on that day. In the Cabinet we have a good team and a loyal one, and they are in the right places in the field. Under my instructions plans are being prepared which will be unfolded as our term of office continues. Some of these I shall refer to. As to our country, the future is at your command. There is no limit to what it can hold. It is the purpose of my speech to suggest how we should seize our opportunities and discharge our duty.

The Balance-of-Payments Position. "Our gold and dollar reserves are not big enough to allow us to maintain our present standards without a substantial increase in our earnings abroad. If our prices are too high in the world we shall not win those earnings and our standards will fall. This is the reality which faces every man and woman in the country, whether they work at the bench, in a shop, in an office, in the Government, on a farm, or at sea. It is stern and deadly serious.

"There is no slick or swift solution to our difficulties. If employers, workmen, management, and Government look only to their immediate advantages and ignore the more distant results of their actions, then we shall all get into a very bad jam. The way to hold what we have now is not to be greedy for more. Further improvements cannot come just by writing figures into the balance-sheet or the wage-packet. They can come only out of increased production and new resources. We are not advocates of rationing and restriction. Least of all do we want to go back to a period of unemployment. All of us who lived through that would never tolerate such a thing again. We still favour expansion, but it must be balanced and restrained. We don't want a blown-up economy, we want a steadily developing economy.

Problems of an Expanding Economy. "First let us look at what we have won. The great majority of our people are today enjoying prosperity such as they have never known. Never has so much been available to so many in our country before. Unemployment is at its lowest ever. A few years ago many people were troubled that we were not building enough factories or installing enough new plant to keep up with our competitors. But recently industrial investment has gone up by leaps and bounds. During the past 12 months about twice as much factory building has been approved as in 1951. And with the new factories go new machines and modern equipment to make us more efficient.

"But here we come to the plagues of prosperity. Our victories are threatened. We have overstretched ourselves. It is this surge of confidence and expansion, healthy enough in itself, which has produced the unfamiliar problems with which we are now grappling. The danger is not of depression and stagnation, but of launching out on new efforts in too many directions at once. All this wouldn't matter so much if it were not for the balance-of-payments problem—our constant Jeremiah. A country small in acres, which grows only half its food and has only one raw material in fair supply, simply cannot afford to ignore the gloomy Prophet Jeremiah. His forebodings are written in our import figures. They are too high: everyone agrees about that. But a large proportion of our import bill is the cost of foreign coal and steel for our expanding industry.

"Production of deep-mined coal fell last year by 3,250,000 tons. The number of miners also declined. That is serious, but it is not surprising when there is so wide a call for labour. On the contrary, it is remarkable that so many miners stay loyally at the coal-face at this time. On the other hand, I cannot help regretting that the plea of those miners' leaders who recommended that we should have some more foreign labour to help us get more coal (see 14641 E) did not win the day. For that is what is happening in countries abroad, to their great economic advantage.

"As to steel, the country's effort last year was magnificent. Steel production surpassed all records, and for this year the target is higher still. By this means we may be able to reduce our steel imports a little during the coming year. I must congratulate you here in this world centre of the woollen textile trade on the splendid results of last year both in production and exports.

The Combating of Inflation. "But for most people today the real problem arising out of our prosperity is the problem of inflation, or, as you and I feel it, rising prices. This is not only the domestic question of the cost of living. It is also the country's problem: how to keep our prices competitive in order to continue to sell our goods abroad. The cost of living at home, and the cost of our exports abroad, these are the real problems. What have we done about them? What more can we do?

"I well understand how severely rising prices have hit those who are dependent on fixed incomes and pensions. Theirs is perhaps the hardest case of all. We have already taken steps to help many of them. Less than a year ago war pensions, retirement pensions, and National Insurance benefits were substantially increased. Next month the increased National Assistance scales take effect. And now we are preparing detailed proposals, which will be put before Parliament shortly, to assist retired members of the public services, including teachers and the armed forces. Nor will we forget those who have no organizations to press their claims. But the best way in which we can help them, and indeed each other, is by fighting the battle against inflation. That is what we are doing.

"First, we introduced as long ago as February of last year, restrictions on credit and on spending out of borrowed money. Since then we have been tightening this 'credit squeeze.' I know that it hurts, but let us get this clear in our minds: you cannot fight inflation without pain. It is such an insidious disease. Some people even think they like it until they have too much of it. It is always tempting to those who treat it to avoid giving pain, and then the poison spreads.

"Second, we have limited expenditure by the Central Government. I shall have more to say about this.

"Third, we have taken steps to encourage economy in local Government expenditure.

"Fourth, we have moderated expenditure in certain nationalized industries.

"Fifth, we have discouraged personal expenditure by increasing the profits tax and by the purchase tax in the recent Budget.

"All these measures are playing their part to restrain demand at home and to free goods for export. We knew that some of these measures would be disagreeable and unpopular. But it was our duty to take the action we did, when we did, and it is having its effect. Nobody can pass final judgment on it yet. These measures we will continue.

Action against Restrictive Practices. "And now, what more can we do? Nobody wants more nationalization. Even the Socialists are hunting the hedgerows for alternatives. We are convinced that British industry should be based on free enterprise. But just because this is our faith, we recognize the danger that restrictive practices in any industry may harm our economy. Therefore, as we announced last July, we are making a new approach to this problem and intend to present a Bill to deal with it during the present session of Parliament. The provisions of this complicated measure have been settled, and it is now being drafted. We must get rid of the Maginot Line mentality in industry.

"But it is not only on the management side that restrictive practices exist. We cannot afford restrictive practices anywhere which stand in the way of a more competitive and progressive economy. In a time of full employment no-one is justified in behaving as if there was unemployment. . . The creation of a sense of partnership in industry has long been my aim. Many firms, both great and small, are working in their own ways towards it. When every man feels part of the concern in which he is employed, he will be working for something greater than himself. Then men and managements will discover that old suspicions, old attitudes and practices which hold back production, are out of date. The power of mutual trust and human understanding is every bit as great in the psychological field as is nuclear energy in the scientific field.

"One of the most disturbing features of the past year has been the number of working-days lost because of disputes. The total was 3,750,000, nearly twice as large as the average for the past 20 years, and it has cost the nation dear. Much of this was due to differences between unions. The previous Minister of Labour (Sir Walter Monckton) and I had a number of helpful discussions with leading employers and trade unionists about industrial relations and our country's problems. I intend to invite them for further talks with me and my colleagues after I return from my visit to President Eisenhower.

Reductions in Government Expenditure. "Next, as to Government expenditure. Government spending, other than defence, can be divided under three heads. First, there are the costs of administration. Mr. Butler rendered devoted service to this country as Chancellor of the Exchequer. He was always at work to cut down the running costs of the Government machine, with remarkable success. From the beginning of 1952 to the end of last year the civil staff of Government Departments has been reduced by nearly 46,000 out of a total of 300,000. This does not include the Post Office and the Service

Departments, whose civil staffs have also been reduced. That is a notable result The present Chancellor of the Exchequer is determined to continue with this process The Estimates of the various Government Departments for the coming financial year have largely been prepared. But I have asked Mr Macmillan to carry out a review of them all, with the purpose of making an additional saving We will do all we can We intend to go on cutting. For instance, our target for the reduction in the staff of Government Departments is a further 10,000 to 15,000.

"The second broad division of Government expenditure is the distribution of social benefits covering wide ranges of the population, including the young and the old.

"The third division is the one in which the Government takes the lead in creating large public expenditure. I give you an example If you consider the total building of every kind going on in the country today, you will find that the Government, local and central, is responsible for more than half of it Now here again are activities that we do not want to cut, but some cherished schemes have got to be delayed They are all good in themselves, but we cannot do them all at once. That is the message I must impress upon you tonight. There must be priorities and selection in all these good efforts which we wish to see expressed in terms of bricks, mortar, and steel.

Defence Expenditure. "There are some sectors in which we cannot take risks. I have made it clear that we will not reduce expenditure on defence so as to endanger our national survival or our authority in world affairs. Even so, we have made drastic economies in defence expenditure. But the variety of new weapons is constantly increasing and the standard which must be maintained if our forces are to be fairly equipped is constantly rising—almost as fast as the rockets themselves. All this is expensive. It is not only a question of manufacturing costs, it is the complexity of modern weapons, each one of which is more expensive than the one it replaces

"And then there are the personal problems of pay and conditions for the Services. Our decisions on these matters will be announced next month. We have given much thought to them. I have always believed that in this business half-measures will achieve nothing. Let no-one think that increased pay for the Services is an extravagance It is no such thing There is no doubt at all that if we were able to recruit the Regular air, land and sea forces that we need, the profit to the nation in manpower and money would be immense Then indeed we could look forward to the abolition of National Service. That is our objective

Nuclear Research and Technological Education. "There are other fields in which we must expand if we are not to jeopardize the future. We are engaged on an extensive programme to harness nuclear energy. We dare not stint this. It is the key to the future. We have now to provide for an age of transition until the full meaning of the new world unfolds before us . We are making plans to meet this, and high on the list are our schemes for technical education. This scientific recognition may be world-wide, but the prizes will not go to the countries with the largest populations. Those with the best systems of education will win. Science and technical skill give a dozen men the power to do as much as thousands did 50 years ago.

"Our scientists are doing brilliant work But if we are to make full use of what we are learning we shall need many more scientists, engineers and technicians. I am determined that this shortage shall be made good You will see what a harvest of talent waits to be gathered when I tell you that only one boy in four leaving school goes to any kind of technical college This is often because he cannot get to such a college or because there isn't room for him. But the consequence is clear enough For this and other reasons, thousands of our boys and girls don't get the chance of technical education at all The Universities are helping us by enlarging their scientific and engineering schools. But even so, the Universities can take only a fraction of those leaving school who need further education Therefore, when it comes to numbers, an increasing share must be taken by the technical colleges with full-time or part-time courses for the boy of 15 through to advanced studies for the man who spends six months in the factory and six months in the college.

"The aim we set before the country is to build a high road that runs from school to the highest positions in industry and commerce; to make it possible for every boy and girl to join that road at the point which suits them best, and to travel on it as far as their talents will take them

"We have already decided on an extensive programme for technical education, which will be put into effect over the next five years. The Minister of Education will describe the details in a White Paper to be published next month.

Price Stability and the "Battle against Inflation." "I have told you some of our proposals, and you will want to know what part each of you can play in the struggle We all want full employment and we all want steady prices. But we have not yet succeeded in combining the two; we had better admit that. We all want an increase in our standard of living. We can get it if everyone makes a vigorous effort to put production up, and if we are prepared to think of the community as a whole. Some industries, some sectors of the economy, are bound to increase production more quickly than others. The engineer can do this; it is not so easy for the bus driver. If those engaged in industries where production is being vigorously increased will take the wider view, they will allow part of the benefits of their higher production to be passed on to the community, which includes themselves, in the form of lower prices. That is the way.

"A number of firms have set a helpful example They have taken a decision to hold their prices stable, some for six months, some for a year. I welcome this action and I ask others to join them, for this is a practical example of how to fight rising prices. The best way in which the benefits of higher production can reach the whole community is by lower prices. This means that increased profits should be passed on in the form of lower prices, rather than of increased dividends

"There is another way in which every one of us can take part savings. To save is the most effective weapon against rising prices The more we save, the more we maintain the value of savings already made Every additional penny saved helps the battle against inflation and maintains the value of the £ For our part, the Government are actively considering what further steps we can take to make savings attractive . .

"Make no mistake about it. The battle against inflation is on If the weapons we are using now do not suffice, we shall not hesitate to use others. What is tantalizing in all this is that if once our balance of payments could be put right and our reserves built up to a reasonable figure, there is hardly any limit to our future. There are the countries of the Commonwealth eager to use our help, our technical skills and experience In this modern age of the *Comet* and the *Britannia* we are much closer to our Commonwealth partners and in a better position to help each other. Our economic policy is not designed for domestic consumption only, it has a wider aim. We want to develop our internal strength and our competitive power to respond to these opportunities overseas. We must be economically sound at home, so that we can continue to play our special part in world affairs

The World Situation. "I have always hoped that it would be possible for the Communist Powers and the free countries to work out some method of tolerating each other's systems without quarrelling for the domination of the world. The search for this way of life between the nations has never been easy. But I do not propose to abandon it, because I know so well that the alternative must eventually be world conflict and annihilation. In these last months the character of the contest between the Communist Powers and the Western democracies has changed, not for the better It has been for some time generally accepted that the danger of world war and military conflict has receded I do not want to be misunderstood. The risk is always there and a universal explosion could easily be touched off by hostilities in some critical region such as the Middle East There is plenty of dry tinder about. Governments should beware lest, in trying to undermine long-established friendship between others, they embroil themselves in graver perils.

"If there is less fear of world conflict today, this is due to the deterrent of nuclear weapons Remove the deterrent, or take risks in pretending that it is not there, and the world outlook would be terrifying indeed. The justification of both the atomic and hydrogen bombs is that they are deterrents, so awful that no country will risk their use against itself. It is, therefore, true that the danger of world war should decrease unless an aggressive-minded nation gets it into its head that the bomb will not be used against it, whatever it does. It becomes increasingly unlikely that any country possessing the hydrogen bomb would deliberately use it against a rival power that owns it also We intend to own it also

"As events are unfolding in the world today, two conditions are necessary if there is to be an enduring peace:

"(1) That all countries should remember what a world conflict would involve

"(2) That this awful knowledge should build up a growing sense of responsibility that peace must be kept everywhere.

"It is increasing carelessness about this which is our greatest danger today. But in the final resort there will be no security until an arms agreement is reached which covers all weapons, and not only nuclear weapons. That is our aim. To abolish nuclear weapons alone would hand power to the Big Battalions.

The British Commonwealth. "Some foreign travellers have been making speeches lately [a reference to the statements of Marshal Bulganin and M. Krushchov during their Asian tour—see 14613 A, 14603 A]. On these I will make only this comment. It is a fantastic travesty of this country's policy to pretend that our purpose is to put our feet on other people's necks. The opposite is the truth All over the world today, the trend towards self-government continues in the countries of the British Commonwealth and Empire The address of the Power which dragoons and dominates its satellites is 'The Kremlin, Moscow.'

"I would say that at the present time in this disturbed world the strongest influence for peace is without doubt the British Commonwealth of Nations. Why is it so strong? Why is it so powerful? Why do others respect us? Because it is an association of free peoples. There is no obligation on any member of the Commonwealth to be compelled to vote this way or that, nor is it being ordered to do this or that by anybody else. That is the whole difference between the free conception and the Communist conception of the world.

"This country has largely expended its resources in two world wars In one of them the Commonwealth fought for a year against tyranny almost alone. So we require no lectures from anyone.

"Our purpose is, whether through the Colombo Plan or any other arrangements we may make in any part of the world, to provide means to help countries to improve their own conditions and bring to their people something of that higher standard of life which our own enjoy. We have no desire to impose our will on any nation. We believe in free countries working together, whether in the Common-

wealth, in NATO, or in any other group to which we may belong There is no-one in this country who has more reason to know what is the true value of the Commonwealth in the scales for world peace Let us hold it, let us understand it, and realize it is an association of free nations which others will join as their own development towards self-government expands. That is something of which you can be immensely proud and of which you young people, when you grow up, will look back on with undying pride.

Conclusion. "My message to you tonight is that on the foreign front, in a situation more anxious than a while ago, we will persevere in our work for peace. At home, this Government is determined to do what is necessary, whatever it may cost in popularity or electoral fortune We cannot drift to safety. But we can command it, if every citizen will help us in our country's cause As a Government we have set our hands to a task We never doubted its difficulty, but we shall carry it through until we have discharged it to the nation and the world at large."

An official statement had been issued on Jan. 7 from 10, Downing Street, emphatically denying rumours published in certain papers that Sir Anthony Eden intended to resign within a few months' time, and that he was to be succeeded in the Premiership by Mr. R. A. Butler. The statement described such reports as "false and without any foundation whatever." Mr. Butler issued a statement on the same day saying that he knew nothing about any such rumours, and expressing his determination "to support the Prime Minister in all his difficulties."—(Times - Daily Telegraph)

(Prev. rep. Sir Anthony Eden, 14519 A; 14493 A.)

A. SAUDI ARABIA. — King Saud's Visits to India and Persia. - Statement on Position of Indian Moslems. - Saudi Arabian Adherence to "Five Principles."

At the invitation of the Indian Government, King Saud of Saudi Arabia paid a state visit to India from Nov. 27 - Dec. 13, in the course of which he visited Delhi, Simla, Agra, Aligarh, Benares, Nagpur, Hyderabad, Bangalore, and Bombay. The King had previously declined an invitation from the Kashmir State Government to include Kashmir in his tour.

Speaking in Bombay on Dec. 10, King Saud recalled the fears for the fate of Indian Moslems aroused by the communal disorders following the withdrawal of British rule He added "I desire now, at the conclusion of my visit to India, to say to my Moslem brethren all over the world that the fate of Indian Moslems is in safe hands . Mr Nehru, I was consistently assured by Moslems in all walks of life, is bravely and determinedly executing a wise policy of neighbourliness to all Indians, irrespective of creed In my capacity as guardian of the Moslem Holy Places, I desire to express my gratitude and that of my Moslem brethren to Mr Nehru, and all those through whom he executes this policy of equality and equity . . ."

A joint statement, issued in New Delhi on Dec. 12, said that there had been a "friendly and informal" exchange of views between King Saud and Mr. Nehru on matters of mutual interest, including recent developments in the international situation; that both countries fully subscribed to the "five principles of peaceful co-existence" (*Panch Sila*); and that they were resolved to strengthen their friendship by further co-operation in the cultural, political, and economic spheres.

During his return journey King Saud stopped for two hours in Karachi for discussions with Major-General Mirza and Chaudhri Mohammad Ali, respectively Governor-General and Prime Minister of Pakistan.

Prior to his Indian visit, King Saud had visited Persia from Aug. 9-17, 1955, as the guest of the Shah. A communiqué stated that discussions between the two rulers had revealed "a complete identity of views, notably regarding the imperious necessity of strengthening the unity of the Islamic countries." It was announced that they had decided to raise their respective diplomatic missions in Persia and Saudi Arabia to the status of embassies.—(Indian and Pakistani High Commissioners' Offices, London - The Hindu, Madras - The Statesman, Calcutta)

B. LIBYA. — Appointment of Soviet Ambassador.

M. Generalov arrived in Tripoli on Jan. 6 to become the first Soviet Ambassador to Libya, following the recent establishment of diplomatic relations between the two countries. He had been Ambassador in Canberra at the time of the Petrov case (see 13540 A), which led to the breaking-off of diplomatic relations between Australia and the Soviet Union.

(Daily Telegraph) **(Prev. rep. 14469 C.)**

C. COSTA RICA - NICARAGUA.—Friendship Pact.

A treaty of friendship between Costa Rica and Nicaragua was signed on Jan. 10, thereby ending the tension between the two countries arising out of the incidents a year earlier in which Costa Rica had been invaded by an insurgent force from Nicaraguan territory.—(New York Herald Tribune)

(Prev. rep. 14142 A; 14048 A.)

D. JAPAN. — Atomic Co-operation Agreement with the U.S.A. - Creation of Atomic Energy Research Institute and Atomic Energy Commission.

An agreement for co-operation in the peaceful uses of atomic energy between the U.S.A. and Japan was signed in Washington on Nov. 14, 1955. Two Bills were subsequently introduced in the Japanese Diet: one providing for the setting-up of an Atomic Energy Commission and an Atomic Energy Bureau within the Prime Minister's Office, and another regulating basic atomic energy questions. Both Bills were passed in December 1955 by an overwhelming majority in the Diet, which also approved the U.S.-Japanese agreement.

It was laid down that the Atomic Energy Commission would be a policy-making body headed by a Minister of State and consisting of four members, and that it would decide on basic policies concerning the uses of atomic energy, and other important related matters. The Atomic Energy Bureau within the Prime Minister's Office would perform the duties of a secretariat, and both the Commission and the Bureau would start to function as from Jan. 1, 1956.

The four members of the Atomic Energy Commission were approved by the Diet on Dec. 23 They were Dr Hideki Yukawa, a Nobel prizewinner for Physics, Dr. Yoshio Fujioka, Professor of Physics at Tokio University; Dr Hiromi Arisawa, Professor of Economics at Tokio University, and Mr. Ichiro Ishikawa, chairman of the Federation of Economic Organizations. Mr Shoriki, Minister of State in Mr. Hatoyama's reconstructed Cabinet, was appointed chairman of the Commission.

An Atomic Energy Research Institute had been established in October 1955, whilst a Preliminary Council for Atomic Energy Utilization had been set up within the Cabinet in May 1954. The latter body (which will be superseded by the new Atomic Energy Commission) decided in November last to carry out a development plan providing for the building of five small reactors of various types. Japan will receive enriched uranium from the U.S.A. under the U.S.-Japanese co-operation agreement. (Japanese Embassy Press Bulletin, London)

E. UNITED KINGDOM. — Railways. - N.U.R. Acceptance of Manpower Saving and Recruitment Proposals. - Rejection of Proposal for Recruitment of Italian Labour.

The National Union of Railwaymen announced on Jan. 6 that it had agreed to a number of proposals put forward by the British Transport Commission for meeting labour shortages and stimulating recruitment.

The proposals comprised (1) the transfer of men from fully-staffed areas to areas where labour was short, the men transferred to be paid lodging allowances (with additional payments of 25s. weekly where lodgings cost more than the normal allowances), plus special allowances of 20s. weekly as compensation for "domestic disturbance" and time spent in travelling home at week-ends; (2) free passes after three months' service, instead of after one year, and earlier availability of "privilege" tickets; (3) the raising of the upper age-limit for recruitment of engine cleaners from 25 to 30. The N.U.R. rejected the Commission's proposal that footplate men should remain at their jobs beyond the present retiring age of 65, on the ground that, by reducing the prospects of promotion, this would hinder recruiting instead of encouraging it.

Previously, however, the executive committee of the N.U.R. had rejected (on Dec. 14, 1955) proposals made by the British Transport Commission in November that the union should agree to the recruitment of about 2,000 Italians for unskilled work on British Railways. An N.U.R. spokesman explained that the union considered that the proposals were "makeshift" and that men should be recruited in Britain who would make their careers in the railway service, whereas the proposed Italian recruits might well drift into better-paid jobs when their contracts had expired.

It was stated in the Press that about 720 Italians had been recruited for work on British Railways in 1951-52, but that over 300 had since left, many having returned to Italy.

F. INDIA - INDONESIA. — Cultural Agreement.

A cultural agreement between India and Indonesia was signed in New Delhi on Dec. 29 by Dr. Azad, the Indian Minister of Education, and Dr. Palar, the Indonesian Ambassador.

The agreement aims at encouraging and facilitating "co-operation in all fields of science, literature, and art." Specifically, it provides for the exchange of university teachers and members of scientific and cultural institutions; the institution of scholarship schemes for students of one country studying in the other; and the training of nationals of one country in scientific, technical, and industrial institutions maintained by the Government of the other

The agreement will remain in force for ten years.

A. VATICAN. — The Pope's Christmas Broadcast. - Appeal for Renunciation of Nuclear Experiments. - The Pope's Vision of Christ.

Pope Pius XII, in his annual Christmas message broadcast from the Vatican on Dec. 24, 1955, called for the renunciation of experiments with nuclear weapons, and appealed to the world's statesmen to outlaw such weapons and to bring about all-round controlled disarmament. In the course of his address the Pope analysed, and discussed the implications of, the various proposals put forward by the Powers for an international agreement on the renunciation of nuclear weapons, the banning of experiments with such weapons, and the reduction and control of conventional armaments. The Pope also discussed, among other matters, the attitude of Christians towards Communism and " the relations between Europe and those non-Europeans who aspire to full political independence." Extracts from his broadcast are given below.

" . . . We reject Communism as a social system by virtue of Christ's doctrine, and we have a particular obligation to proclaim the fundamental principles of the natural law. For the same reason, we also reject the opinion that the Christian ought today to see Communism as a phenomenon or a stage in the passage of history, one of the necessary ' moments,' as it were, of its evolution, and consequently to accept it as if directed by divine providence But, at the same time, we warn Christians of the industrial age against being satisfied with an anti-Communism founded on the slogan and the defence of a liberty which is devoid of content. Rather do we urge them to build up a society in which man's security rests on that moral order of which we have often set forth the need and the consequences, and which has regard for true human nature. . ."

The Pope continued " We propose to direct our attention to a recent proposal which aims at putting a check on experiments in nuclear weapons by means of an international agreement. There has also been talk of taking further steps towards conventions through which the use of those weapons would be renounced and all States subjected to an effective arms control. Thus there would be a question of three steps . the renunciation of experimentation with atomic weapons , the renunciation of their use , and the general control of armaments. The supreme importance of these proposals is tragically illustrated if one stops to consider what science thinks it can predict about such actions, which we think it useful to sum up here.

" As regards experiments with atomic explosions, the opinion of those who fear the effects produced if they are multiplied would seem to be finding greater acceptance. Too many explosions would in time cause an increased density of radioactive products in the atmosphere, whose diffusion depends on elements not under man's control. Thus would be generated conditions very dangerous for many living beings.

" Concerning the use : in a nuclear explosion an enormous amount of energy, equivalent to several billions of kilowatts, is developed in an exceedingly short time. This energy is composed of electromagnetic radiations of very great density, distributed within a vast range of wave-lengths. This energy is transferred into the atmosphere, and within thousandths of a second increases the temperature of the surrounding air-masses by hundreds of degrees. The spectacle offered to the terrified gaze as the result of such use is of entire cities wiped out, a pall of death over the pulverized ruins, countless limbs burned and scattered, the groaning of death agonies. And the radioactive cloud hinders the survivors from giving any help. There will be no song of victory, only the inconsolable weeping of humanity, which, in desolation, will gaze upon the catastrophe brought about by its own folly

" Concerning the control : inspection by properly equipped aeroplanes has been suggested [a reference to President Eisenhower's proposal for mutual aerial inspection]. Others might perhaps think of the possibility of a world-wide network of observation posts, each one staffed by different countries and protected by solemn international pacts. Such centres would have to be equipped with delicate and precise meteorological and seismic instruments. They would render possible the control of many—unfortunately not all—of the activities of atomic experimentation.

" We do not hesitate to declare . . that the sum total of these three precautions, as an object of international agreement, is an obligation on the conscience of nations and their leaders. We say ' the sum total of these precautions ' because the reason why they are morally binding is that equal security must be established for all. If, however, only the first point, concerning experimentation, were put into effect, the result would be that that condition would not be verified, the more so since sufficient reason would be given to doubt a sincere desire to put into effect the other two conventions.

" We speak so frankly because the danger of insufficient proposals concerning peace depends in a large part on the mutual suspicions that often trouble the dealings of the Powers concerned, each accusing the other even of a lack of sincerity in a matter basic to the fate of the whole human race.

" For the rest, efforts towards peace must consist not only in measures aimed at restricting the possibility of waging war, but even more in preventing, eliminating, or lessening with time the quarrels between nations which might lead to war. To this kind of preventive pacification statesmen must devote themselves with great vigilence, imbued with a spirit of impartial justice and also of generosity, within the limits, of course, of healthy realism.

" In last year's Christmas message we indicated the points of dispute in the relations between Europeans and those non-Europeans who aspire to full political independence. Can those disputes be allowed to run their course, so to speak—a procedure which might easily increase their gravity, sow hatred in men's souls, and create the so-called traditional enmities ? And might not a third party come to profit from such enmities, a third party which neither of the others really wants, and cannot want ? At any rate, let not those peoples be denied a fair and progressive political freedom. . They will give credit for their advancement to that Europe without whose influence they might be drawn by a blind nationalism to plunge into chaos or slavery.

" Western peoples, especially those of Europe, should not remain passive in the face of such problems in futile regret over the past or in mutual recrimination over colonialism. Rather, they should set themselves constructively to work, to extend, where it has not yet been done, those true values of Europe and the West which have produced so many good fruits in other continents The more Europeans strive for this, the more help will they be to the just freedom of young nations, which in turn will be saved from the pitfalls of false nationalism This in truth is their real enemy, which would put them one day against each other, to the advantage of third parties. . . "

The *Osservatore Romano*, the official Vatican newspaper, published an article on Dec. 10, 1955, confirming that Pope Pius had had a vision of Christ on Dec. 2, 1954, during his serious illness. The first account of the Pope's vision had been published in the Milan magazine *Oggi* in November, and was substantiated by the Vatican Press Office and the Vatican Sunday newspaper *Osservatore della Domenica* before its official confirmation by the *Osservatore Romano*.

The magazine *Oggi* said that it had learned of the Pope's spiritual experience through the " affectionate indiscretion " of one of his intimates It gave the following version of the Pope's vision " At the height of the Pope's suffering he often repeated the prayer *Anima Christi* (Soul of Christ). In the night during which the crisis reached its climax, the patient, then alone in the room, repeated the prayer again. When he arrived at the invocation *In hora mortis meae voca me* (hearken unto me in the hour of my death) he saw beside his bedside the figure of Jesus. At that moment the Holy Father thought that the Master had come for him, and continued praying *Jube me venire ad te* (command me to come unto Thee) But Jesus had not come to call him away but to comfort him and, we believe, to assure him that his hour was not yet come . . It was no dream At that moment the Holy Father was wide awake and lucid." The magazine added that the vision proved to be the turning-point in the Pope's illness and his eventual recovery.

The Vatican Press Office issued a brief statement on Nov 21 saying that it had been " authorized to confirm what the illustrated weekly *Oggi* announced regarding a vision which the Holy Father had during the course of his illness in December, 1954." The *Osservatore della Domenica* (issue of Nov. 27) also confirmed in essentials the account given by *Oggi*. Finally the *Osservatore Romano*, " to remove uncertainties and inexact suppositions," published on Dec. 10 " the precise exposition of the truth as we have received it from one of the few devoted collaborators who, in that December, daily approached the Pontiff."

The *Osservatore Romano* said that the above-mentioned informant had written down the Pope's spiritual experience after he had first heard it from him, and had placed it in a sealed envelope with instructions that it should only be opened after the Pope's death After the publication of the *Oggi* article, however, the person concerned felt it his duty to bring his account to the attention of Pope Pius, who had confirmed its veracity. The events of Dec. 2, 1954, were described by the informant [i.e. the account he had placed in the sealed envelope] as follows :

" Having entered the chamber of the Holy Father at about 9 a.m. on Dec. 2, the visitor had scarcely made his morning greeting when, as the only response, he heard the Holy Father exclaim : ' This morning I saw the Lord.' The Pontiff then added that on the preceding day [i.e. Dec. 1] he had heard a voice most clearly and distinctly announce : ' A vision will come.' That morning of the vision, while he was repeating the invocation of *Anima Christi—In hora mortis meae voca me*—the Lord had come and paused by him. In that moment His Holiness had immediately thought of the well-known passage of the Gospel of St. John, *Magister adest et vocat te* (the Master is present and calls thee), and had added the following verse of the same *Anima Christi* prayer : *Et jube me venire ad te. . . .*"

The *Osservatore Romano* added that the Pope had been displeased at the indiscretion whereby his spiritual experience had been made known to the world nearly a year after its occurrence, and that he had neither desired nor approved of its publication, even though the account had leaked out through obviously well-intentioned persons.

During the latter months of 1954 the Pope had been seriously ill as a result of gastric trouble caused by a hernia of the oesophagus. His condition was for a time critical, the crisis being reached in the early days of December, but he subsequently made a remarkable recovery.—(The Universe - The Tablet - Corriere della Sera, Milan - Giornale d'Italia, Rome - Times - Le Monde, Paris - New York Times) (Prev. rep. Pope Pius, 14076 B ; Christmas Broadcast (1954), 13390 A.)

A. MIDDLE EAST. — Israeli Raid on Syrian Positions. - Syrian Appeal to U.N. - Condemnation of Israel in Security Council. - Israeli Proposals for Peace Settlement with Arab States. - Mr. Ben-Gurion on Israel's Policy. - Extension of National Service in Israel. - Egyptian Hint of " Third Party " Mediation in Egyptian-Israeli Dispute.

During the night of Dec. 11-12, 1955, Israeli forces raided Syrian positions north-east of Lake Tiberias (the Sea of Galilee), 49 Syrian soldiers and civilians and six Israelis being killed. The raid, the most serious to have occurred on the Israeli-Syrian frontier since the conclusion of hostilities in 1948, was intended as a retaliation for an incident on Dec. 10, when an Israeli police launch on Lake Tiberias had been damaged by Syrian artillery fire.

One Israeli force landed south of a Syrian post near the mouth of the upper Jordan, while another crossed the river; the two then made a joint attack on the post, which was completely destroyed, and seriously damaged a nearby farm. At the same time a third force advanced northward from Ein Gev (on Israeli territory east of the lake) to attack Syrian positions near the village of Koursi. After heavy fighting the attacking forces succeeded in destroying all Syrian installations in the neighbourhood, and withdrew with 30 prisoners and large quantities of captured war material.

An Israeli Government statement issued on Dec 12 said that the aim of the attack had been to silence Syrian batteries which had shelled Israeli fishing boats and their police escort on Dec 10. The statement claimed that Lake Tiberias and its shores were entirely within Israeli territory, although the Syrian frontier north-east of the lake came within 10 metres of its shore, and that Israeli sovereignty over the lake had been recognized by the armistice agreement of 1949 and confirmed by the Israeli-Syrian mixed armistice commission in 1954 Israel had nevertheless offered to negotiate on the possibility of allowing Syrians certain fishing rights on the lake, or to issue fishing permits to individual Syrians on personal application, but both offers had been rejected by Syria. Israeli fishing boats and police vessels, the statement alleged, had been repeatedly shelled by Syrian batteries, and during the first 10 months of 1955 there had been at least 25 such attacks, causing loss of life and property.

Intense indignation was aroused by the raid in Syria and other Arab countries; the funeral in Damascus on Dec. 13 of three officers killed in the fighting was made the occasion for a mass protest demonstration, and on the following day the Syrian Foreign Ministry warned the British, French, and U.S. Ambassadors that any new arms shipments to Israel would encourage her to " widen her aggression." The Egyptian Prime Minister, Colonel Nasser, issued a statement on Dec. 15, copies of which were sent to the U.N. Secretary-General and the Governments of the countries represented in the Security Council, declaring that in the event of further Israeli aggression against Egypt or Syria, Egypt would " throw the whole of her armed strength into action against Israel."

The Syrian Government called on Dec. 13 for an urgent meeting of the Security Council to consider " a flagrant violation and an act of open aggression and provocation by Israel," and to take " the measures necessary to meet this serious situation." At a meeting of the Security Council on Dec. 16, the Syrian representative (Mr. Shukairy) demanded Israel's expulsion from the U.N. and the application of economic sanctions against her.

Mr. Shukairy stated that five officers, 32 soldiers, and 12 civilians, including three women, had been killed in the attack, eight other soldiers wounded and 30 taken prisoner, and a large number of houses belonging to Syrian villagers destroyed. These facts had been confirmed by the U.N Truce Supervision Organization, and were not denied by the Israeli authorities Israel, he asserted, had consistently violated the principles of the U N Charter and had not heeded the Security Council's previous warnings. After pointing out that the Charter provided for the expulsion of members who violated its principles, he demanded " effective action " by the Council, observing that economic sanctions were all the more imperative since Israel was receiving financial assistance from " international sources."

Mr. Eban (Israel), in reply, referred to numerous Syrian attacks on Israeli fishing vessels on Lake Tiberias, and said that the object of the raid had been to " ensure the security of Israeli citizens engaged in their lawful occupations." The fundamental issue, he added, was " whether the peaceful exercise of legitimate rights must be suspended whenever there is an Arab threat of force, and whether the Arab Governments have a right to practise belligerency and hostility against Israel and themselves enjoy complete immunity against any response " In the ensuing discussion Israel's action was condemned by the British, U.S., French, Soviet, Belgian, New Zealand, and Turkish representatives.

In a report submitted to the Security Council on Dec. 21, Major-General Burns (Chief of Staff of the Truce Supervision Organization) dealt with the causes of the incident and put forward proposals for the improvement of Israeli-Syrian relations.

General Burns said that the relations between the two countries had been embittered by failure to agree on an exchange of prisoners, and by the earlier Israeli raid on Oct. 22-23 (see 14525 A) The Israeli-Syrian mixed armistice commission had not met since March 1955, although both countries had continued to file complaints, and on Dec. 9 there were 568 Syrian and 401 Israeli complaints outstanding Like the Qibya and Gaza incidents (see 13199 A, 14157 A), the raid had been explained by Israel as a large-scale retaliatory action, whilst allowing that there had been culpable incidents on both sides and enough tension to produce a " practical paralysis " of the truce agreement, there was a risk, however that such retaliatory actions might produce a violent reaction by the forces of the country attacked, and develop into full-scale hostilities. After observing that there was " a striking disparity between the scale of the retaliation and the provocation which was cited by the Israeli Government," the report stated that " the Syrian military, after being informed by the chairman of the mixed armistice commission of the Israeli plans for the present fishing season, which began about Nov 15, have not interfered with Israeli fishing boats."

Dealing with the question of avoiding further incidents, General Burns pointed out that although it was " probably not realistic " to find a solution by suggesting arrangements which might be effected within the scope of the Israeli-Syrian armistice argeement, informal " gentlemen's agreements " might be reached whereby Israeli police boats would keep at a reasonable distance from the shore, Syrians would be allowed to water their cattle in the lake, and the Syrian authorities would allow Syrian citizens to apply to the Israeli authorities for permits to engage in fishing on the lake

The **Israeli Government,** in a reply issued on the same day, maintained that the Syrian Army positions made no distinction between unarmed fishing boats and the police launches which accompanied them, and cited documents—alleged to have been captured in the raid —which purported to prove that the Syrian posts had been ordered to fire on Israeli vessels approaching within 250 metres of the shore. The authenticity of these documents was officially denied by the Syrian military authorities

General Burns, in a supplementary report on Dec. 30, stated that interrogation of a captured Syrian officer had established that Syria had violated the armistice agreement by firing on an Israeli police boat on Dec. 10, in accordance with an order to fire on armed Israeli craft coming within 250 metres of the shore which had been issued by the Syrian Chief of Staff in March 1954, and which was " presumably still valid now "

Mr. Shukairy formally submitted to the Security Council on Dec. 22 a Syrian resolution condemning Israel's " outrageous attack," calling for the expulsion of Israel from the United Nations, and demanding economic sanctions against her. Two other resolutions were presented to the Council on the same day—one by the Soviet Union and the other jointly by the U.S.A., Great Britain, and France.

The Soviet resolution, like that presented by Syria, called upon the Council to denounce Israel for its " outrageous " attack, to declare that the attack was a violation of both the Israeli-Syrian armistice agreement and the U N. Charter; to warn Israel that any recurrence of such action would " bring about a situation requiring the Security Council to consider the question of applying Article 39 of the U.N. Charter ", and to direct Israel to pay compensation for the loss of life and damage to property caused by the incidents on Dec. 12 Unlike Syria, the U.S S R did not suggest the expulsion of Israel from the U.N. or the application of economic sanctions against her. [Article 39 of the Charter empowers the Security Council to decide what measures shall be taken in the face of any threat to world peace, or of active aggression]

The resolution presented jointly by the United States, Britain, and France · (*a*) condemned Israel's attack as a " flagrant violation " of the armistice agreement and of Israel's obligations under the U.N. Charter; (*b*) expressed " grave concern " at Israel's " failure " to comply with those obligations, and called upon her to do so in future; (*c*) warned her that, in default of this, the Security Council would " have to consider what further measures are required to maintain or restore peace."

When the resolutions were discussed on Jan 12, **Sir Pierson Dixon** (U.K) said that there could be no possibility of reducing tension with a view to a settlement " so long as Israel seeks to impose her policy on her Arab neighbours by the use of military force," and pointed out that this was the fourth such complaint which had been brought against Israel within two years. Whatever provocation Israel had received did not justify the scale and violence of the attack, and if another attack were launched the Council might consider that injunctions, even of the most formal kind, were insufficient to meet the circumstances. The Western Powers, he added, had considered the idea of providing for compensation, but had decided against it as there was no precedent.

In the resumed debate on Jan 13, Sir Pierson Dixon said that the U.K. Government would pursue its " unswerving aim " of bringing about a lasting settlement between Israel and her neighbours. It was clear from General Burns's report, he continued, that Israel had a " legitimate grievance " regarding Syrian activities in the Lake Tiberias area, which was " wholly under Israeli jurisdiction," and that there had obviously been " illegal interference " by Syrian forces against Israel's activities there. Nevertheless, the " scale and violence " of the Israeli attack and the " shocking " loss of life were " totally unjustified," and the Israeli action was " all the more heinous " because it came as the culmination of a series of retaliatory actions for which Israel already stood condemned by the Security Council and world opinion. Israel should understand that the whole

principle of retaliation was morally wrong and "unworthy of her," and, moreover, that it did not pay.

Mr. Cabot Lodge (U.S.A.) declared that the Council could not fail to condemn Israel's action, and expressed his Government's grave concern at the incident. He said it was essential to prevent a recurrence of such actions, and that no government was justified in taking the law into its own hands. The U.S.A. had given careful thought to the question of compensation, but had been unable, in view of the difficulties involved, to propose an adequate solution, the U.S. Government, however, did not disagree with the principle of compensation, and felt that the Security Council could establish the necessary machinery by a separate resolution. After declaring that it was essential for both sides in the Arab-Israeli dispute to observe their obligations, co-operate with General Burns, and make full use of the U.N. machinery, Mr. Lodge added that the United States had made "serious representations" to Israel and remained "ready to help both sides to attain a just and lasting settlement—but the parties themselves must also help."

M. Hervé Alphand (France) similarly stressed the gravity of the Lake Tiberias incident, which had been a "breach of the peace" and had "come very close" to obliging the Security Council to intervene under Article 39 of the Charter.

M. Arkady Sobolev (U.S.S.R.) declared that the "wholly unjustifiable" Israeli attack must be severely condemned, and that the Council should call upon Israel to compensate Syria by payment of damages. He charged that Israel, as in previous similar cases, was attempting to justify its attack by the alleged right to retaliate, and denied that she possessed any such right.

Mr. Ronald Walker (Australia) said that Israel's action involved "an element of contempt" for the Mixed Armistice Commission and the United Nations, and that the Council "must be prepared to consider further action if its authority is subjected to further challenges of this kind." Though there had undoubtedly been provocation by Syria, this did not excuse Israel's action. Nevertheless it had to be recognized that the explanation of such incidents went far beyond the friction over Lake Tiberias; neither Syria nor Israel had shown "scrupulous regard" for the armistice agreement or any strong determination to reduce tension, and neither side had a "monopoly" of armistice violations.

All the other members of the Security Council similarly condemned the Israeli attack, and stressed the necessity for a peace settlement between Israel and her Arab neighbours.

The Security Council ended its debate on the Lake Tiberias incident on Jan. 18, when it unanimously approved the U.S.-British-French resolution. M. Sobolev (U.S.S.R.) explained that he had voted for the Western resolution because, although the Soviet Government considered it inadequate, it contained a strict censure on Israel.

Other recent developments affecting the relations between Israel and the Arab States are described below under cross-headings:

Egyptian Hint of "Third Party" Mediation in Dispute with Israel. - Israeli Initiative for Peace Conference.

The Israeli Foreign Ministry had announced on December 29, 1955, that Israel intended to propose the convening of a conference with Egypt under Article 12 of the Israeli-Egyptian armistice agreement, with a view to contributing to the restoration of peace between the two countries, "after an effective cease-fire has been achieved and the armistice agreement faithfully implemented by Egypt." Article 12 of the armistice agreement provides that either party may require the U.N. Secretary-General to call a conference of the signatories, participation in which would be obligatory, to review, revise, or suspend any of the articles of the agreement.

The Egyptian Deputy Foreign Minister (M. Ahmed Khairat), in a press statement in New York on Nov. 25, intimated that Egypt would be prepared to negotiate with Israel on outstanding issues through a third party. Though stating that the time was not yet ripe for direct talks between Egypt and Israel, he told U.N. correspondents that Egypt desired an honourable peace on the basis of a solution of the main issues, and that she was ready to seek it "from whatever quarter it comes."

General Burns—who had previously had discussions with Colonel Nasser and Mr. Ben-Gurion—announced on Dec. 28 that both Egypt and Israel had accepted the proposals of Dr. Hammarskjold (the U.N. Secretary-General) for easing the tension between the two countries, subject to certain conditions. On the Israeli side, the conditions were that Egypt should accept a complete cease-fire and should withdraw her forces beyond the El Queseima - Abu Aouegila line, whilst the Egyptian conditions were that all boundaries within the El Auja demilitarized zone should be re-marked, and not only the western boundary as proposed by Dr. Hammarskjold. General Burns's report censured both Egypt and Israel for continuing to maintain forces in areas not permitted under the demilitarization agreement.

Minor incidents continued to occur on the Egyptian-Israeli border during November and December, mainly in the Gaza and El Auja areas. The Israeli Foreign Ministry announced on Nov. 23 that a strong protest would be made to the Security Council in connexion with incidents on the previous day in which Israeli troops and civilians had been attacked by Egyptian units on four occasions.

Sir Anthony Eden's Statement on Guildhall Speech.

Sir Anthony Eden denied in the House of Commons on Nov. 24 that he had suggested in his Guildhall speech (see 14519 A) that Israel should make substantial territorial concessions, and reiterated that the British Government's offer of mediation still stood.

In reply to Labour questions, **Sir Anthony Eden** said: "I took the opportunity in my speech of advising both sides that if they want peace they must make some compromise between the positions they have taken up. I did not attempt to lay down where and how that compromise should be found, nor do I propose to do so now. I am, however, convinced that a settlement would be so valuable to both sides that they would find that any concessions they made would be more than worth while. I have given the assurance that if our services are required in the negotiations, both the Government and I personally are very ready to offer them in the cause of peace. Although I do not want to bind our American friends to every word of what I said at Guildhall, it is a fact that the United States and ourselves are in close agreement in this difficult business."

Mr. Herbert Morrison (Lab.) said that the Prime Minister's speech had caused "great alarm and apprehension" in Israel, and suggested that it implied that there should be "substantial concessions" by that country. **Sir Anthony Eden,** in reply, denied that he had used the phrase "substantial concessions of territory," and reaffirmed that H.M. Government would abide by the terms of the tripartite declaration. In reply to **Mr. Robens** (Lab.), who maintained that the Prime Minister "threw into the arena remarks about concessions of territory which applied to one side only," **Sir Anthony Eden** declared that his speech had clearly asked for concessions from both sides, he mentioned as possible subjects for concessions the Arab refugee problem and the Arab blockade and non-recognition of Israel.

Mr. Sharett's Visit to Washington. - Israeli Proposals for Peace Settlement with Arab States.

While visiting the U.S.A., the Israeli Foreign Minister (Mr. Sharett) had discussions on Nov. 21 and Dec. 6 with Mr. Dulles, in which he repeated Israel's request for U.S. arms supplies and at the same time informed him that Israel was prepared to make five major concessions as a contribution towards a peace settlement. Details of his proposals were published in Washington on Dec. 19, as follows:

(1) Israel would agree to mutual adjustments of the 1949 armistice line for purposes of security and improved communications, but would not consider negotiating on the basis of the 1947 partition line.

(2) Israel would consider granting the Arab States transit rights for the free flow of commerce from north to south between Lebanon and Egypt and across the Negev between Egypt and Jordan, provided the Arab States granted similar transit rights desired by Israel. Such rights would apply to both land and air travel.

(3) Jordan would be offered free port facilities in Haifa and the necessary transit rights to reach the port by land.

(4) Israel would be willing to raise funds to compensate the Arab refugees, and accepted the U.S. offer of a loan to help in the work of resettlement and rehabilitation, she insisted, however, that the refugees should be settled in the Arab States and not returned to Israel.

(5) Israel agreed to accept the Jordan River development plan drawn up by Mr. Johnston (the U.S. envoy), whereby Israel and the Arab States would share the waters of the Jordan and Yarmuk rivers. She considered this a concession because more than half the water supplies would go to the Arab States.

It was made clear that Israel would not retreat from her previous position on the following points: (1) She would not agree to any unilateral concessions, and would expect that minor adjustments in the armistice line would leave Israel's total territory virtually the same; (2) she would not relinquish the port of Elath, on the Gulf of Akaba; (3) in granting transit rights to Jordan and Egypt across the Negev, she would not permit the creation of any extra-territorial corridor; (4) she would continue to oppose the internationalization of Jerusalem.

A State Department spokesman confirmed on Nov. 18 that a request by Israel for arms supplies from the United States was "under consideration by the departments concerned." The spokesman declined to confirm or deny a *New York Times* report that Israel had asked for 40-50 jet aircraft, anti-submarine vessels, tanks, and anti-aircraft guns.

Mr. Ben-Gurion on Israel's Policy. - Extension of National Service Period.

In the course of a foreign affairs debate in the *Knesset* on Jan. 2, the Prime Minister of Israel (Mr. David Ben-Gurion) announced that the period of national service in Israel would be extended from 2½ to 3½ years.

Mr. Ben-Gurion said that in view of the imminent danger of attack by Egypt, and perhaps by other Arab countries, there was "one certain method of preventing war in the Middle East—the speedy supply of defensive arms to Israel of the same kind as supplied to the Egyptian air, sea and land forces." This, he said, followed

logically from " the pernicious flow of Soviet arms to Egypt," which was being augmented by the " uninterrupted flow " of surplus British military equipment to Egypt. Ridiculing the idea that Egypt might use the Soviet arms for war against the West, or the British arms for war against the East, Mr. Ben-Gurion declared that Egypt's arms supplies were intended " exclusively for war against Israel."

Announcing the extension of the period of national service, Mr Ben-Gurion said " We shall be grievously at fault if we do not prepare to defend ourselves in good time to the limit of our moral, economic, and military capacity. But at the same time we shall be guilty of a serious error if we assume that war against us is unavoidable and predestined." Throughout his speech Mr Ben-Gurion emphasized several times that war was not inevitable, that there was no occasion for panic or fear, and that a war would never be begun by Israel He declared, however, that Israel was determined to defend her territory and citizens against any assault After recalling how in 1940 the British people " fought alone, almost without an army and without arms, against a cruel and powerful enemy, undeterred by relentless bombardment and the destruction of their homes," Mr. Ben-Gurion said . " The people of Israel, in their own land, will not fail to fight for their lives as the British people did."

Defending the Lake Tiberias raid, Mr Ben-Gurion stated that as long as attacks on Israel's territory continued, retaliation would also continue After defending the Israeli Army command against the complaint that it had developed a tendency to act without the Government's authority, Mr Ben-Gurion referred as follows to the present frontier situation : " I do not know of any State in the world where the lives of its citizens, especially in border settlements, are exposed to such constant danger by saboteurs and murderers from across the frontier I must declare before the whole world . that we hold the frontiers of our country no less dear than the rulers and peoples of the Soviet Union, Britain, or any other country hold theirs "

If Israel's borders were attacked (Mr. Ben-Gurion continued), Israel would first appeal to the U N observers to rectify the situation If the observers did not succeed in doing so, " either because of lack of power or lack of will," Israel would consider it her duty " to use the most effective means for the defence of the lives of our citizens and the security of our frontiers." He recalled that General Burns had admitted " with regret and consternation " that Egypt had not given an undertaking to observe an absolute cease-fire or to enforce proposals for a frontier demilitarized zone

Commenting on the political situation in the Middle East, Mr Ben-Gurion declared : " Apart from the two stable and strong countries in the Middle East—Israel and Turkey—all Near Eastern countries are immersed in a whirlpool of disturbances, revolts, political chaos, assassinations, depositions of monarchs, and constant contests for power between adventurers and dictators In this confused, crazy, electrified atmosphere any spark in any quarter may ignite a conflagration of unforeseeable extent and results "

Mr. Ben-Gurion reiterated that Israel, while desiring peace and a settlement with the Arab States, was not prepared to make unilateral concessions or to cede any part of the Negev. After declaring that Israel's aim had always been peace, he asserted that the Arab countries had frequently violated the armistice agreements, in which connexion he mentioned (*a*) that all Israel's neighbours had proclaimed an economic boycott against her, (*b*) that Egypt had closed the Red Sea and the Suez Canal to Israeli shipping, (*c*) that Egypt's representatives at the U.N had on several occasions declared that Egypt was in a state of war with Israel, and for this reason had refused to comply with Security Council resolutions condemning the closing of the Suez Canal to Israeli vessels; (*d*) that Jordan, despite the truce agreement, had prevented access to the Holy Places and the Hebrew University on Mount Scopus; and (*e*) that Syria had tried to seize Israeli territory in 1951 and had killed 40 Israeli soldiers.

The following figures were given by Mr. Ben-Gurion of the number of Israelis killed and wounded in recent years by marauders from the Arab States . 137 in 1951 (111 killed and wounded by Jordanians); 147 in 1952 (114 by Jordanians); 162 in 1953 (124 by Jordanians); 180 in 1954 (117 by Jordanians and 50 by Egyptians), 258 in 1955 (192 by Egyptians and 37 by Jordanians).

In conclusion, Mr Ben-Gurion said that the plans for building up the " home front " would include, apart from the additional year of national service, the building of air-raid shelters, the raising of at least £50,000,000 (I). during the next few weeks as a defence fund, and voluntary efforts to integrate new settlers into the community He ended . " If, by the efforts of the State and people, we are able to raise the moral, economic, and military strength of Israel, we have it in our power also to ensure peace. With all our might and all our soul we must strive for these two things : strength and peace "

Mr. Sharett, speaking later in the debate, said that conversations with U.S. representatives on the possibility of a settlement had begun in Paris and Geneva in October, and had continued in Washington. Mr. Dulles' proposal of " mutual concessions " (see 14392 A) implied that the Arab States were expected to give up some of their demands, and Israel to part with some things that " we now possess "; Israel, however, was not prepared under any circumstances to make unilateral territorial concessions or to resettle Arab refugees. The British Government, he added, had disqualified themselves for the role of mediator by " adopting at the start an attitude of their own on what should be the actual content of a settlement," and by laying down the principle of compromise between the 1947 U.N. resolution, which had been " overtaken by history," and the existing situation Mr. Sharett stressed that the Israeli peace plan published in Washington was not a precondition for negotiations, as Israel was ready to enter into direct negotiations without stipulating conditions of any kind in advance

Colonel Nasser on the Guildhall Speech.

Colonel Nasser (the Egyptian Prime Minister), in a press statement on Nov. 28, 1955, said that Sir Anthony Eden's reference to the U.N. resolutions of 1947 [in his Guildhall speech] " indicates that the rights of the Palestine Arabs have not been abandoned—as had been imagined—by some of the great Powers, and that the time has come for a revival of those resolutions which have been ignored for eight years." Colonel Nasser added that Sir Anthony Eden had not put forward any definite proposals calling for Egyptian support, but had simply taken up the U.N. resolutions again—a fact which Egypt considered " as an acknowledgment of the rights of the Palestinian Arab people, whose country had been usurped when it was under the British mandate."—(Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - U.N. Information Centre, London) **(Prev. rep. Middle East, 14525 A.)**

A. IRISH REPUBLIC. — Roman Catholic Hierarchy's Warning against Membership of Armed Organizations.

The Irish Hierarchy issued a statement on Jan. 18, in the name of the Archbishops and Bishops of the Roman Catholic Church in Ireland, declaring that it was " a mortal sin for a Catholic to become or remain a member of an organization or society which arrogates to itself the right to bear arms and to use them against its own or another State; that it is also sinful for a Catholic to co-operate with, express approval of, or otherwise assist any such organization or society; and that, if the co-operation or assistance be notable, the sin committed is mortal."

After pointing out that the Hierarchy felt it its duty " to warn all Catholics against erroneous ideas and claims which are being advanced in regard to the raising of military forces and the waging of war," the statement continued : " Catholic moral teaching lays down precise conditions in order that war be at all lawful War is the cause of very grave evils, physical, moral and social It is not lawful unless it be declared and waged by the supreme authority of the State No private citizen or group or organization of citizens has the right to bear arms or to use them against another State, its soldiers or citizens Just as no private citizen has the right to inflict capital punishment, so he has not the right to wage war.

" Sacred Scripture gives the right to bear the sword and to use it against evil-doers to the supreme authority, and to it alone If individuals could arrogate to themselves the right to use military force, there would be disorder and chaos, leading inevitably to tyranny and oppression The second condition for a lawful war is that there be a just cause It must be certain that all peaceful means have been tried and found unavailing, that the matter at issue far outweighs the havoc that war brings; and that it is reasonably certain that war will not make things worse. No private individual has authority to judge these issues or to involve the people, from whom he has received no mandate, in the serious losses inevitable in hostilities. But of all wars, a civil war between the people of one nation causes greatest injury, and is most to be avoided "

After giving the above-mentioned warning against membership of, or support for, armed organizations, the statement added : " We warn young men to be on their guard against any such organization or society, and not to be induced by false notions of patriotism to become members of it We appeal also to the general body of our people to avoid violence, cherish peace, and, as a Christian nation, give an example to the world of order, forbearance, concord and goodwill."

The statement was ordered to be read in all Roman Catholic Churches in Ireland on January 29.—(Irish Times, Dublin)

B. FRANCE - UNITED STATES. — Final French Payment on Purchase of U.S. Surplus Ships.

The final payment by France for the surplus U.S. vessels bought under the Franco-American agreement of 1946 was made on Dec. 2, when a cheque for $26,698,637 was handed over to the Federal Maritime Board. Total French payments for the ships amounted to $74,635,005, the 98 vessels purchased by France consisting of 76 Liberty ships, 18 tankers, and four coastal cargo carriers. In all, the U.S. Government sold 1,956 surplus vessels (including 943 for American flag operations) for $1,776,303,702, and the liquidation of the French debt left some $65,000,000 of mortgages outstanding in respect of other buyers.—(New York Times - Le Monde, Paris) **(Prev. rep. 1946 Agreement, 8047 A.)**

C. SUDAN. — Admission to Arab League.

The Sudan was admitted to the Arab League on Jan. 19 as its ninth member.—(Manchester Guardian) **(14624 B.)**

A. JORDAN. — General Templer's Visit to Amman. - Discussions on Jordanian Accession to Baghdad Pact. - Anti-Pact Riots. - Attacks on U.S., French and Turkish Consulates and British and U.N. Property. - Murder of British Officer of Arab Legion. - Cabinet Crises. - Dissolution of Chamber of Deputies declared Unconstitutional. - New Premier's Pledge against Jordan's Accession to Pacts. - Egypt, Syria and Saudi Arabia offer Financial Assistance in Replacement of British Aid. - U.K. Financial Aid for Jordan in 1956-57.

The Chief of the British Imperial General Staff (General Sir Gerald Templer), accompanied by Mr. Michael Ross, head of the Levant Department of the Foreign Office, visited Amman from Dec. 6-14 for discussions on "questions connected with Jordan's defence and matters connected with the Arab Legion." During his stay in the Jordanian capital General Templer had a number of meetings with the Prime Minister (Said el-Mulki) and the Defence Minister, and was received in audience by King Hussein. Although no official statement was issued on these discussions, it was authoritatively stated in London that General Templer had presented proposals involving the revision and strengthening of the U.K.-Jordanian mutual assistance treaty of 1948; the strengthening of Middle Eastern defence by Jordan's accession to the Baghdad Pact (of which the present members are Britain, Turkey, Pakistan, Persia, and Iraq); and the reinforcement of the Jordanian Army, the Arab Legion, and the Jordanian Air Force with British equipment.

Four Ministers in the Jordanian Government, all of whom were from Western Jordan (i.e. the Arab areas of Palestine under Jordanian sovereignty), resigned on Dec. 13 after a three-hour Cabinet meeting which was attended by General Templer. On the following day Said el-Mulki submitted his Cabinet's resignation to King Hussein, who asked Hazza el-Majali (the outgoing Minister of the Interior, and a former Vice-Premier) to form a new administration. Hazza el-Majali accepted this commission and formed a 10-member Government on Dec. 15 in which he took over the portfolios of Foreign Affairs and Economics in addition to the Premiership. Five of the Ministers entered the Cabinet for the first time, whilst the others had held office in the previous administration.

Serious rioting, resulting in a number of casualties and some loss of life, broke out in different parts of Jordan on Dec. 16, and continued for two days thereafter, in protest against Jordan's proposed accession to the Baghdad Pact. The principal centres affected were Amman, the Old City of Jerusalem (which is under Jordanian control), Nablus, Jericho, Hebron, and Bethlehem.

Some 10,000 demonstrators in Amman, including many students and young persons, clashed with the police and Arab Legionaries, an officer of the Arab Legion being killed by the mob and several soldiers and a number of demonstrators being injured. At Nablus, demonstrations were held demanding the resignation of Hazza el-Majali and threatening to set up a separate Palestinian Arab state if Jordan acceded to the Baghdad Pact. Disturbances also took place at Jericho, where rioters broke into an agricultural training project for refugees and caused much damage; at Hebron, where the U.N. Refugee Office was attacked; and at Bethlehem, where a curfew was imposed.

The worst disorders occurred in the Old City of Jerusalem, where the mob—including a large hooligan element—broke into and looted the Turkish Consulate, tore down and burned the Turkish flag, set fire to the ground floor premises, and wounded the Turkish Consul-General, who succeeded in escaping to the Israeli-controlled part of Jerusalem (the New City). The French and U.S. Consulates were stoned, the French Vice-Consul wounded when stones were thrown at his car, and the U.N. flag torn off the car belonging to General Burns, the head of the U.N. Truce Supervisory Organization in Palestine. Soldiers of the Arab Legion had to open fire over the heads of the mob on several occasions before order was restored.

During the three days' disturbances it was estimated that three persons were killed and 20 injured in the Old City of Jerusalem; one killed and 13 wounded in Amman; one killed and 20 wounded in Jericho; and two killed and eight wounded in Bethlehem.

Hazza el-Majali issued a statement on Dec. 18 giving the reasons for the resignation of Said el-Mulki's Government and stating, *inter alia*, that Britain had proposed that Jordan should join the Baghdad Pact. After referring to earlier exchanges for a revision of the U.K.-Jordanian treaty of 1948, he said:

"At the wish of the Jordanian Government, General Templer headed a British delegation which submitted a Note outlining the principles which Britain considers as a suitable basis for new relations with Jordan. Other military and economic offers were made, aimed at strengthening the Arab Legion on the understanding that Jordan's political and military obligations towards the Arab States would not be affected. They included the supply of arms and aircraft in return for Jordan's accession to the Baghdad Pact.

"After careful study, the previous Council of Ministers decided to accept the principle of joining the pact, provided Jordan's claims were realized. A committee of three ex-Ministers and myself prepared a Note, written by Azmi Nashashbi [the former Minister of Posts and Telegraphs], outlining Jordan's minimum claims. The former Council of Ministers approved this Note, but four Ministers suggested showing it to a certain Arab State [presumably Egypt] before submitting it to Britain. The other Ministers thought it premature to send details of the Note, as the British and Jordanian points of view still differed. The four Ministers maintained their view and discussion was postponed. Next morning the four Ministers resigned without consulting their colleagues, and the Mulki Cabinet had to make room for a new one as a result. General Templer then left, and the Jordanian Note was not officially handed to the British Government. Talks will be resumed later."

Hazza el-Majali announced on Dec. 19 that his Government had resigned in order to allow the nation "to give its verdict on the issues before it" [i.e., in effect, whether or not Jordan should join the Baghdad Pact.] King Hussein, who had broadcast an appeal for the maintenance of order, accordingly dissolved the Jordanian Chamber of Deputies on Dec. 19, and on the following day appointed Ibrahim Hashem (the President of the Senate, and a former Prime Minister under King Abdullah) as head of a "caretaker" Government to hold office pending general elections to be held within the next four months. A royal decree was subsequently issued for the election of a new Chamber of Deputies on April 15, 1956.

A nine-member "caretaker" Government headed by Ibrahim Hashem was sworn in on Dec. 21, with three former Prime Ministers among its members. The portfolio of Foreign Affairs was taken by Samir el-Rifai, who was concurrently appointed Deputy Premier. A statement was issued in Amman emphasizing that the new Government was of a temporary character, that it would not concern itself with political matters, and that it had no authority to commit the country to any new treaties or pacts.

It was announced on Jan. 1, 1956, however, that the Constitutional Court had been asked by the new Government to give a ruling as to the legality or otherwise of King Hussein's action in dissolving the Chamber of Deputies. The court ruled on Jan. 4 that the dissolution was unconstitutional—a decision which implied that the Chamber of Deputies would have to remain in existence until its normal term had expired.

After only 18 days in office, Ibrahim Hashem's "caretaker" Cabinet resigned on Jan. 7 after a general strike had been called in Amman by a "National All-Classes Conference" whose meetings had earlier been banned by the Government. Some thousands of demonstrators, including large numbers of students and schoolchildren, marched to the Government buildings shouting slogans denouncing the Baghdad Pact, calling for an alliance with Egypt, Syria and Saudi Arabia, and demanding the immediate dissolution of the Chamber of Deputies. Troops were called out to restore order after demonstrators had set fire to the U.S. technical aid centre, burned a U.S. Embassy car, smashed the windows of the British Bank of the Middle East and the British Council offices, and attacked an office of the U.N. refugee agency.

On the same day further serious disorders broke out in the Old City of Jerusalem and in other centres.

The U.S. Consulate-General in Jerusalem was again attacked by a mob—led by a number of Communists, and ostensibly demonstrating against the Baghdad Pact—which tore down the American flag, hurled stones through the windows, and did considerable damage before it was dispersed by Arab Legionaries and U.S. Marines, some of whom were rushed from the Israeli sector of the city to protect the Consulate-General. The demonstrators, several of whom were killed and injured, were dispersed by tear-gas. No U.S. citizens were injured, the wives and children of several Western consular officials having previously taken refuge in the Israeli sector of the city.

A British officer of the Arab Legion, Lieut.-Colonel Patrick Lloyd, was killed at El Zerka (the Legion's headquarters) while dispersing rioters. Although the news of his murder was at first suppressed by the Jordanian censorship, it was subsequently disclosed by the Special Correspondent of the *Daily Telegraph* in Amman that Colonel Lloyd had been trapped by Arab mobs who pulled him from his car, stoned him, and then shot him. A feature of the demonstrations in different parts of Jordan was the demand made by many of the rioters for the dismissal of British officers of the Arab Legion and their replacement by Jordanians. [The Arab Legion has about 60 British officers, and has been commanded for many years by Lieut.-General J. B. Glubb (Glubb Pasha). Most of the British officers are employed on technical or staff duties.]

Elsewhere in Jordan rioting also occurred at Jericho, where troops used tear-gas and opened fire, wounding some of the demonstrators; at Ramallah, where demonstrators were also dispersed by tear-gas; and at Bethlehem and Hebron, where the disturbances were on a smaller scale. On Jan. 12 a mob burned down and looted two buildings belonging to a U.S. Baptist mission hospital at Ajloun (northern Jordan), there were no casualties among the hospital staff or patients, four Americans being rescued by Arab Legion troops and escorted to Amman.

The U.S. Secretary of State (Mr. Dulles) summoned the Jordanian Chargé d'Affaires in Washington to the State Department on Jan. 8 and demanded an explanation of the attacks made on the U.S. Consulate-General in Jerusalem and on U.S. property in Amman. It was stated that the Chargé d'Affaires had expressed his Government's "deep regret" at the incidents and had given assurances against their repetition. The British Chargé d'Affaires in Amman also protested to the Jordanian Foreign Minister against the attacks made on British property.

A Foreign Office spokesman in London said on Jan. 9 that information had been received which led the Foreign Office to believe that "a certain amount of money has been spent in Jordan in fomenting riots—and not only from Communist sources." It was also stressed at the Foreign Office that the British Government had never put pressure on Jordan to join the Baghdad Pact, though it had always maintained that it would be to Jordan's advantage to join the pact. "We were asked," the spokesman said, "for certain information about arrangements we might make if Jordan joined the pact, and General Templer went to Amman to explain what these arrangements would be. The initiative for these discussions was taken by the Jordan Government."

Following the resignation of Ibrahim Hashem, Samir el-Rifai (Deputy Premier and Foreign Minister in the "caretaker" Cabinet) agreed on Jan. 8 to form a new administration at the request of King Hussein. The new Government—Jordan's fourth in four weeks—was sworn in by the King on the following day, five of the portfolios being given to senators and five to deputies. Samir el-Rifai took over the Ministry of the Interior in addition to the Premiership, Ibrahim Hashem became Deputy Premier, and Dr. Hussein Fahkri el-Khalidi (Minister of Health and Welfare in the "caretaker" Cabinet) became Foreign Minister. All the Ministers had previously held ministerial office.

Samir el-Rifai made a broadcast on taking office in which he declared that his Government would not adhere to "any new pacts." He said:

"I have assumed responsibility after a period of unrest and in circumstances in which the Jordanian nation vitally needs security and a resumption of normal life. . . . My Government will give full details of its internal and external policies in the ministerial statement which I shall shortly delivery to Parliament, but meanwhile I wish to declare that adherence to any new pacts is not the policy of my Government, and that we shall continue our endeavours to strengthen co-operation and consolidate our friendly and brotherly relations with Arab countries The Palestine case remains our first preoccupation, and we shall continue our efforts unceasingly until we attain the complete rights of the Arabs."

In a letter to Samir el-Rifai approving the new Cabinet, King Hussein wrote:

"We sincerely hope the policy of your Government will be (1) preservation of friendly and brotherly relations with all Arab countries within the framework of the welfare of our country and its first problem, which is the Palestine case; (2) preservation of the good relations existing between our country and friendly and allied countries; (3) the implementation of law and the restoration of order; (4) the organization of proper Government administration; (5) the endeavour to improve economic and social affairs; (6) redoubling of efforts to improve military affairs in general, and concentration on the strengthening of the Air Force"

A nation-wide curfew had been imposed at the outbreak of the latest disturbances on Jan. 7, but was lifted on Jan. 14. In a broadcast on the following day King Hussein said that Jordan had passed through a "severe crisis" which had now, however, ended. After thanking the Government for restoring order and the Arab Legion for showing restraint, he looked forward to "our greatest day . . . when our usurped rights in Palestine are restored." It was announced in Amman on Jan. 16 that the Jordanian Government would set up a commission of inquiry to establish responsibility for the attacks on foreign establishments during the disturbances; that persons who were found guilty would be punished; and that collective fines might be imposed where the instigators of the attacks could not be brought to justice.

Violent opposition to the possibility of Jordan's accession to the Baghdad Pact had been expressed by the press and radio in Egypt, Syria and Saudi Arabia. Broadcasts from Cairo had openly called upon the Jordanian people to overthrow their Government, and the anti-pact demonstrations in Jordan were warmly welcomed in all three Arab countries. The Diplomatic Correspondent of *The Times*, commenting on the Jordan riots, said that feelings in that country had "evidently been exacerbated by broadcasts from Cairo, the widespread use of Saudi Arabian funds to stimulate agitation, and the influence of local Communists."

Arab Countries' Offer of Economic Aid to Jordan.

The following statement was issued in Damascus on Jan. 11 announcing that Syria, Egypt, and Saudi Arabia had offered Jordan economic aid in place of that made available to the Jordanian Government by Britain:

"The Syrian Prime Minister, Said Ghazzi, today submitted to the Jordanian Chargé d'Affaires, in the presence of the Egyptian Ambassador and the Saudi Minister, a memorandum expressing the desire of the three Arab States to negotiate with the Jordanian Government on the manner in which those States can offer the Jordanian Government help and financial aid.

"The three States suggest a conference of the four heads of the Arab States to discuss the problem. The purpose of this is to render Jordan strong enough to withstand possible Israeli aggression The three States are prepared to give Jordan aid in substitution for British aid for the Arab Legion and the National Guard. If King Hussein agrees to the conference, he will advise the three Arab States of the date and place—either in Damascus, Cairo, or Riyadh The memorandum was presented by agreement between the three Governments."

British Financial Aid to Jordan.

The British Foreign Office had announced on Dec. 20 that H.M. Government intended (subject to Parliamentary approval) to give financial aid to Jordan during the fiscal year 1956-57 totalling £12,550,000—an increase of £950,000 over the amount (£11,600,000) provided during 1955-56. The sum was divided as follows: £9,200,000 as a subsidy for the Arab Legion (an increase of £280,000 over 1955-56); £2,250,000 as an interest-free loan for promoting economic development (an increase of £500,000); and £1,100,000 to help balance the Jordanian Budget (unchanged).

It was stated that the £2,250,000 interest-free development loan would include £500,000 for the construction of a deep-water port at Akaba; £700,000 for road construction, including a first-class road from Amman to Maan; and £1,050,000 for the provision of village co-operatives, etc., and for building or maintaining civil airports at Amman and Jerusalem. The £1,100,000 for the Jordanian Budget would include £350,000 for the expenses of the National Guard—a gendarmerie responsible for local frontier duties.

It was pointed out in London that the above-mentioned arrangements had no connexion with General Templer's visit to Amman, but related solely to the annual financial assistance supplied by the U.K. to Jordan since 1946.—(Times - Daily Telegraph - Manchester Guardian - New York Herald Tribune)

(Prev. rep. Baghdad Pact, 14565 A; Jordanian Cabinet, 14253 B; Armed Forces, 14530 C; U.K. Financial Aid to Jordan, 14210 B.)

A. UNITED KINGDOM. — Increase in Minimum Wage of Agricultural Workers.

The Agricultural Wages Board on Dec. 7, 1955, reached provisional agreement on an increase of 8s. weekly in the minimum wage of adult farm workers, bringing it to £6. 15s. a week, with proportionate increases for women and juvenile workers and in overtime and holiday pay. The cost of the increases (applicable to about 600,000 agricultural workers) was estimated at about £15,000,000 in a full year.

The agricultural unions had asked for a minimum of £7 a week (an increase of 13s.) for adult males. They claimed that the earnings of adult farm workers, including overtime, averaged only £7. 10s. 5d. for a 52-hour week, or about £3 less than average industrial earnings, and argued that the drift of labour away from agriculture (about 25,000 farm workers had left for other employment in the year ended Sept 30) could only be stopped by substantially higher pay. The employers' counter-offer of a £6. 15s. minimum was, however, supported by the independent members of the board, and was eventually accepted by the union representatives.

The new rates were confirmed by the Board on Jan. 11, whereupon the union representatives gave notice that they would submit a further claim on February 1.—(Times)

(Prev. rep. Agricultural Wages, 13985 A.)

B. SPAIN. — The March Foundation.

The creation of a fund of 348,000,000 pesetas (approx. $10,000,000) for educational and cultural purposes was approved by the Spanish Government on Jan. 11, under the name of the March Foundation. The money was donated by Señor Juan March, the richest man in Spain and reputedly one of the wealthiest in Eruope, and was the largest philanthropic benefaction ever made in that country.—(A.B.C., Madrid)

C. CHINA. — Opening of Trans-Mongolian Rail Link with Soviet Union.

The new trans-Mongolian railway linking China and the U.S.S.R. was officially opened on Jan. 4. It will permit through services between Peking and Moscow *via* Ulan Bator, the capital of the Mongolian People's Republic, and is the first railway to be built on Mongolian territory.—(Le Monde, Paris)

(Prev. rep. 14403 A; 13855 A.)

A. UNITED KINGDOM. — Record Steel Production in 1955. - United Steel Development Programme. - Denationalization of Consett Iron Company.

Figures published by the British Iron and Steel Federation on Jan. 11 showed that U.K. steel production in 1955 reached the record figure of 19,791,000 tons, compared with 18,250,000 tons in 1954 and exceeding the 1955 target of 19,500,000 tons. Production of pig iron, at 12,470,000 tons, was also a record, comparing with 11,883,000 tons in 1954.

Detailed monthly figures for the second half of 1955 are given below, with 1954 figures for comparison:

	1955		1954	
	Weekly Average tons	Annual Rate tons	Weekly Average tons	Annual Rate tons
	Steel Ingots and Castings			
July	307,700	16,002,000	263,100	13,682,000
August	345,100	17,946,000	325,600	16,932,000
September	397,800	20,683,000	372,300	19,358,000
October	399,500	20,773,000	374,500	19,472,000
November	408,600	21,246,000	377,000	19,606,000
December	381,900	19,860,000	354,700	18,442,000
	Pig Iron.			
July	230,800	12,000,000	211,200	10,984,000
August	236,200	12,282,000	227,400	11,823,000
September	246,200	12,804,000	222,900	11,591,000
October	249,200	12,957,000	230,700	11,998,000
November	252,600	13,135,000	235,300	12,236,000
December	250,100	13,004,000	233,600	12,149,000

Developments in recent months in connexion with the iron and steel industry are summarized below:

Price Increases. In consequence of higher costs of imported ore, the Iron and Steel Board on Dec. 19, 1955, raised prices of basic and hematite pig iron by 11s. 6d. and 17s. 6d. per ton respectively, and prices of low-phosphorus and Scottish foundry iron by 16s. and 7s. 6d. per ton respectively.

United Steel Group Developments. It was announced on Nov. 7 that three of the four principal steel-making companies in the United Steel Companies group planned a joint total expenditure on development projects during the next three years of nearly £14,500,000. The amounts to be spent by the three companies, with their ingot outputs in 1954-55 shown in parentheses, were as follows: Appleby-Frodingham Steel Co. (1,029,810 tons), nearly £6,000,000; Steel, Peach and Tozer (961,656 tons), over £3,000,000; Samuel Fox and Co. (295,463 tons), over £6,000,000. Individual schemes included (*a*) the new medium strip mill planned by Steel, Peach and Tozer (see 14406 A); (*b*) reconstruction of the plate mill and replacement of older coke-ovens at the Appleby-Frodingham works; and (*c*) the installation at Samuel Fox and Co 's Stockbridge works of a second electric ore furnace and of a new rod and bar mill. The total ingot output of the group was stated to have risen from 1,886,000 tons in 1947-48 to nearly 2,560,000 tons in 1955, or about 12-14 per cent of the entire U.K. output. During the same period the group had spent about £44,000,000 on development, largely out of its own resources.

The Industry's Efficiency. It was stated in the October issue of the *British Iron and Steel Federation Monthly Bulletin* that by economies in the use of raw materials, fuel, equipment, and labour, the steel industry had increased its output by five-eighths since the war, with a rise of only one-eighth in the number of workers employed. The improvement in fuel efficiency over the whole post-war period had been about one-eighth, representing (at the 1954 rate of operation) an annual saving of about 3,500,000 tons of coal, whilst a "striking economy" in the use of equipment had been achieved by the extension of "continuous working" (already customary in the blast furnace section) to the melting shops. Local arrangements had also been made with the unions to permit an extended week in the rolling mills; thus, whereas much of British industrial equipment was in use for only one shift daily, the steel industry's plant worked 17-21 shifts weekly. Labour economy had been achieved partly by the provision of reasonable incentives, but mainly by means of large-scale capital investment, which had made possible the elimination of obsolete plant and a gradual increase in the average size of furnaces. Additional sinter plants, bigger blast furnaces and steel furnaces, more mechanical handling equipment, and the adoption of continuous rolling processes had all enabled each man to handle a larger tonnage than before, and labour productivity had increased by about 40 per cent since the war.

Public Offer of Steel Shares. On Dec. 13 the Iron and Steel Realization Agency offered for sale 10,000,000 £1 Ordinary shares in the Consett Iron Co. at 25s. 6d. each, the Agency retaining for the time being the remainder of the issued capital—£4,000,000 5 per cent Redeemable Debenture stock. The offer was heavily over-subscribed, and it was announced on Dec. 18 that about 166,000 applications had been received for about 65,000,000 shares, including 5,800 applications for 14,600,000 shares from former shareholders and present employees, who had been promised preferential treatment.

Of the preferential applications, those for up to 300 shares were accepted in full, but larger ones only as to about two-thirds, with a maximum of 10,000 shares. Applications from the general public for 700 shares and over were granted as to about one-sixth with a maximum of 2,500 shares, but smaller applications were dealt with by ballot, 100 shares each being allotted to 20,000 successful applicants.

Import Duties. Following consultations with the Iron and Steel Board about the supply position, the Board of Trade announced on Jan. 2 that import duties on a wide range of iron and steel products and on certain cold-rolled steel sheets had been suspended for a further six months—i.e. until March 18 and Sept. 18, 1956, respectively.

Sir Ernest Lever (chairman of Richard Thomas and Baldwins Ltd.) succeeded Mr. A. G. Stewart (chairman of Stewarts and Lloyds Ltd.) as president of the British Iron and Steel Federation from Jan. 1, 1956.—(Times - Daily Telegraph - Manchester Guardian - Financial Times - Board of Trade Journal)

B. FRANCE. — Diplomatic Appointments. - New Ambassadors in Moscow and Bonn.

It was announced in Paris on Dec. 16, 1955, that M. Maurice Dejean had been appointed Ambassador to the Soviet Union in succession to M. Louis Joxe, and that M. Joxe would succeed M. François-Poncet (retired) as Ambassador to the German Federal Republic.

The French Government had previously announced its intention of appointing M. Roland de Margerie to the Moscow Embassy (see 14466 C), whilst it was understood that M. Joxe would succeed M de Margerie as Director-General of Political and Economic Affairs at the Quai d'Orsay. Ultimately, however, M. Joxe was appointed to the Bonn Embassy and M. Dejean to the Moscow Embassy, as stated above.

M Dejean (56) was one of the leading members of the French Committee of National Liberation set up in London during the war, and was accredited to other Allied Governments-in-exile which had their headquarters in Britain at the time After serving as Director-General of Political Affairs in 1944-45 he successively held the posts of Ambassador in Prague, Ambassador in Tokio (1952), and Commissioner-General in Indo-China (1953).

M. Joxe (54), like M Dejean, was a prominent member of the Free French movement during the war, having been secretary-general of the Committee of National Liberation in 1943-44. He was subsequently Director-General of Cultural Relations at the Quai d'Orsay (1944-45), State administrator of the *Agence France-Presse* (1947), and French representative at the U.N. before his appointment in 1952 to the Moscow Embassy.

Other French diplomatic appointments during the latter months of 1955 included the following: M. Louis Roche, Ambassador in Canberra since 1952, as Ambassador to the Lebanon; M. Renaud Sivan, formerly Ambassador in Jakarta, as Ambassador to Australia *vice* M. Roche; Baron Edmond de Beauverger as Ambassador to the Netherlands; M. Francis Lacoste as Ambassador to Canada, *vice* M. Hubert Guérin; M. Jean Serrès as Ambassador to Pakistan; and M. Jean Baelen (a former Ambassador in Warsaw and Athens) as Ambassador to Yugoslavia *vice* M. Coulet.—(Le Monde, Paris) **(14466 C.)**

C. UNITED KINGDOM. — Conference of Diplomats in Middle Eastern Countries. - Reinforcement of British Middle East Forces.

The Foreign Secretary, Mr. Selwyn Lloyd, presided at the Foreign Office on Jan. 4-5 over a conference attended by the British Ambassadors in Egypt, Israel, Iraq, Syria, the Lebanon, Jordan, and Saudi Arabia, and also by the Political Resident in the Persian Gulf. It was subsequently announced that the talks had enabled the Foreign Secretary to receive a first-hand account of the situation in the Middle East before accompanying the Prime Minister to Washington for his talks with President Eisenhower.

The War Office issued the following statement on Jan. 10: "In view of the disturbed position in the Middle East, H.M. Government have thought it desirable as a precautionary measure to increase the number of troops at the disposal of the C.-in-C. for the protection of British subjects in the area, should the need arise. Additional troops, including airborne units, are therefore being flown to Cyprus."

Although no official announcement to that effect was issued, it was understood that the decision to reinforce British military forces in the Middle East had been taken as a result of the recent disturbances in Jordan (see 14646 A), where British property had been attacked and where a number of British nationals were resident, and also of the possibility of Arab-Israel clashes at a time when Jordan was disturbed internally. It was also understood that the reinforcements would not be needed for internal security duties in Cyprus, which were being carried out by the seven British battalions already stationed there.

It was disclosed that the troops to be flown out would consist of the 1st and 3rd Bns. Parachute Regiment, and H.Q. 16th Independent Parachute Brigade Group, constituting a strategic reserve at the disposal of General Sir Charles Keightley, C.-in-C., Middle East Land Forces.—(Times - Daily Telegraph)

JANUARY 21—28, 1956

A. AUSTRALIA. — General Elections. - Increased Liberal-Country Majority in House of Representatives. - Deadlock in Senate. - Government Reorganization.

General elections for a new House of Representatives and for one-half (30 members) of the Senate took place on Dec. 10, 1955. They resulted in an increased majority in the House of Representatives for the Liberal-Country Party coalition led by Mr. Menzies. In the Senate, however, the Government parties and the Opposition were left with 30 seats each as a result of the loss of one seat by the Government. The state of the parties in the new Parliament is shown below, compared with party strengths before the elections: -

	New House	Former House	New Senate	Former Senate
Liberal Party	57	47	30	31
Country Party	18	17		
Labour Party	47	50	28	28
Labour (Anti-Communist)	-	7	2	1
Total* . .	122†	121	60	60

* Excluding two members of the House of Representatives, one for the Australian Capital Territory (Canberra) and one for the Northern Territory, who have a vote only on matters affecting their own constituencies.

† Under a reorganization of constituencies carried out in 1955 (on the basis of the latest population census) the total number of seats in the House of Representatives was increased from 121 to 122, New South Wales losing a seat and Western Australia and South Australia each gaining one. As a result, representation of the States in the new House will be as follows · New South Wales, 46 ; Victoria, 33 ; Queensland, 18 , South Australia, 11 , Western Australia, 9 , Tasmania, 5 ; Australian Capital Territory, 1 ; Northern Territory, 1.

The Government parties (ten of whose candidates were returned unopposed) won eight seats from Labour—Hume, Phillip, and St. George in New South Wales ; Marybyrnong and Wannon in Victoria ; Sturt in South Australia ; and Perth and Swan in Western Australia. They also won the Victorian constituencies of Ballarat and Fawkner from the Anti-Communist Labour Party, as well as the new Victorian seat of Bruce. Labour won the other five Victorian seats previously held by the anti-Communist Labour group—Darebin, Gellibrand, Scullin, Wills, and Yarra. Labour lost two formerly safe seats in New South Wales because of boundary changes, but won the new constituency of Hughes. As a result of their gains the Government parties had a majority of representatives in each State except South Australia, with 25 in New South Wales (Labour 21), 23 in Victoria (10), 13 in Queensland (5), 6 in Western Australia (3), and 3 in Tasmania (2). In South Australia Labour won 6 seats to the Government parties' 5.

All the members of the Government who sought re-election were again returned. The former Minister for the Army and Navy, Mr. Francis, had previously been appointed Australian Consul-General in New York and had not contested the elections, whilst the Government Whip, Mr. H. B. Gullett, had announced on Oct. 25 that he would not seek re-election. Mr. Menzies had a majority of over 15,000 in the Kooyong constituency of Victoria ; Sir Arthur Fadden had a majority of more than 6,000 in McPherson (Queensland), Mr. R. G. Casey won La Trobe (Victoria) by a margin of nearly 9,000 ; Sir Philip McBride (Wakefield, South Australia) also had a majority of some 9,000 ; and Mr. J. McEwen won Murray (Victoria) by a margin of some 12,000 votes.

Among the Labour candidates, Dr. Evatt, Leader of the Opposition, retained his Barton (N.S.W.) seat by only 226 votes over his Liberal opponent after the second preferences of the Independent candidate had been divided. Mr. Calwell, deputy-leader of the Labour Party, retained Melbourne with a majority of over 12,000, whilst Mr. E. J. Ward, a former Labour Cabinet Minister, held East Sidney with a majority of nearly 13,000. The defeated Labour candidates included Mr. A. S. Drakeford (Marybyrnong), a former Cabinet Minister. Mr. R. Joshua, leader of the Anti-Communist Labour Party, lost his seat at Ballarat (Victoria) to the Government parties' candidate.

Of the 30 seats contested in the Senate (five from each State), 18 were held at the dissolution by Liberal-Country Party members and 12 by Labour ; in each State three of the retiring members were Government supporters and two were Labour. The only change in representation was that the Government lost one seat to the Anti-Communist Labour group in Victoria, where Mr. Frank McManus (secretary of the Anti-Communist Labour Party in Victoria) was returned.

In the new Senate, which does not take office until July, the Government will thus have to depend on the votes of the two Anti-Communist Labour members (the other being Senator Cole of Tasmania) for a majority. Under Senate procedure a tie vote is regarded as a negative vote.

The Labour Party's electoral programme proposed widespread increases in social security benefits and tax rebates for lower income groups, to be financed by a reduction in defence expenditure and by the introduction of an excess profits tax on all companies with a taxable income of £A25,000 or more. The Government parties—who argued that the increases in benefits proposed by Labour were impossible in present conditions—campaigned largely on their record in office, and promised a continuation of existing policies.

Dr. Evatt, outlining the Labour Party's policy on Nov 9, said that they welcomed the opportunity for the people to record their censure of the Government, which had " squandered the country's overseas reserves and had begged and borrowed all round the world," with the result that Australia now had " the dubious distinction of being the largest debtor of the International Bank." The Government could have stayed in office another 18 months, but had sought an election " before the results of its handiwork become obvious to all the people."

The Labour Party would increase social service and repatriation benefits by a total of £A71,000,000, which would include a £A7,000,000 rise in subsidies on butter, wheat, and homes for the aged ; an increase of 11s. a week on age and invalid pensions ; an increase in child endowments by amounts ranging from 2s. 6d. to 7s. 6d. a week ; and a doubling of maternity benefits and a trebling of funeral benefits In addition, Labour would abolish income-tax on taxable income not exceeding £A250 a year and purchase tax on household equipment and furniture, and ask the Arbitration Court to restore the quarterly basic wage adjustments These various concessions would be met by reducing defence expenditure by £A40,000,000, raising £A50,000,000 by a tax on " exorbitant company profits " where taxable income was £A25,000,000 or more, and using some of an estimated Budget surplus of £A50,000,000.

Dr. Evatt again called for the return of Australian troops from Malaya " to their true strategic base, Australia," and said that in addition to saving £A40,000,000 on defence a Labour Government would modernize Australia's defence system, which was " antiquated in the light of atomic warfare " With regard to trade policy, Dr. Evatt said that Labour would examine the whole machinery of import quotas, eliminating luxury goods in favour of essentials ; create a Ministry of Exports , and try to ensure that Britain was included in a new International Wheat Agreement. They would also seek reductions in overseas freight rates—" recently increased without justification "—and establish a special Shipping Commission to compete with the inter-State shipping combine.

Mr. Menzies, addressing a meeting in his constituency on Nov. 15, said that as the Government was still carrying out the policy announced only in May, 1954, he did not intend to make a " catalogue of new promises." He declared that the long list of promises made by Dr. Evatt would cost more than £A150,000,000 a year and would land Australia in an international and internal financial crisis. The Government, he stressed, had " never sought to win votes by offering bribes "

Mr. Menzies explained that there were two principal reasons for having another election only 18 months after the last. Firstly, under the Constitution there had to be an election for the retiring half of the Senate during the present financial year, and to have an election for the House of Representatives on the same day was economical and made for stable government. Secondly, as Dr Evatt's deputy leader, Mr Calwell, had said, " the tensions and strain now existing in Canberra had made Parliament practically unworkable."

Reviewing the Government's policy, Mr. Menzies said that it was consistently following the broad lines laid down when it was first returned in 1949 : encouragement to private enterprise and production ; high and stable employment , national development ; sound finance ; adequate defence; and international friendship. These tasks were not completed, but he asked people to judge how the Government would deal with future problems by remembering how it had dealt with the problems in the past. He announced that the Government had accepted in principle a proposal to establish export payments guarantees (see 14470 A), and said that they had asked the U K. Government for expert assistance in formulating details of the plan.

On questions of defence and foreign policy Mr. Menzies emphasized Australia's adherence to the principles of the U.N. Charter, and said that his Government would continue its efforts to promote goodwill and trade and to give assistance to Australia's Asian neighbours. They would co-operate with Britain in defence, would honour the ANZUS treaty, and would remain an active member of the Manila Treaty Organization ; Mr. Menzies pointed out in this connexion that Australia was already spending about £A200,000,000 a year to play her part in these arrangements. After rejecting Dr. Evatt's suggestion that Australian troops should be withdrawn from Malaya, Mr. Menzies referred to the " considerable success " which had attended his Government's efforts to improve mutual understanding and friendship with the peoples of South-East Asia. " We want the new nations of Asia to preserve their freedom and independence," he declared. " We welcome the progress of Malaya and Singapore towards self-government. Australia's forces, like other British Commonwealth forces in Malaya, are one of the guarantees to Malayans that they will decide their own future in peace, instead of having it decided for them by aggressive Communism."

Referring finally to the proceedings and findings of the Royal Commission on Soviet Espionage in Australia, Mr. Menzies said that the investigations themselves and the subsequent parliamentary

debate had "conspicuously disclosed Dr. Evatt's state of mind." The Leader of the Opposition had found "nothing but incompetence, conspiracy, or fraud in the Prime Minister, judges, eminent lawyers, and intelligence organization of his own country" Dr. Evatt, whose whole preconceived case was that the masses of Russian documents brought over by Petrov were forgeries, had appealed to M Molotov "It is a novelty," said Mr. Menzies, "when an Australian aspiring to become Prime Minister rejects the evidence of witnesses called in Australia and the findings of three Australian judges on the mere say-so of a nation whose agents have been found guilty of systematic spying."

The policy of the Australian Labour Party (Anti-Communist) was outlined on Nov. 10 by the party's leader, Mr. Joshua.

It included the retention of Australian troops in Malaya; the admission of a number of peaceful countries to the U.N., but not of Communist China, a strengthening of Australian laws dealing with treason and allied crimes in peace-time, the control of bank lending in order to ensure balanced development, provision of finance for importing raw materials, selling manufactured goods, and developing Australia's exports, and a review of the Ottawa Agreement to ensure real preference for Australian exports to Britain

Following the Government's electoral victory, Mr. Menzies made a number of changes in his Government, details of which were announced at midnight on Jan. 10. In making his announcement Mr. Menzies stated that he had decided to adopt something like the British system of having a Cabinet including certain Ministers, and other Ministers not in the Cabinet who would be responsible solely for the administration of departments. A reduction of the Cabinet to 12 Ministers would enable it to concentrate on discussion and reach policy decisions more quickly, though Ministers not in the Cabinet would be invited to attend its meetings and take part in its discussions whenever matters affecting their departments were under Cabinet consideration. He would also invite to Cabinet discussions any Ministers not in the Cabinet who had special knowledge or experience of a particular matter under consideration.

The new Government, which had 22 members compared with 20 in the previous Government, was as follows:

The Cabinet.

*Mr. R. G. Menzies	Prime Minister.
*Sir Arthur Fadden ..	Treasurer.
*Sir Eric Harrison ..	Vice-President of Executive Council, Minister for Defence Production.
*Mr. Harold Holt ..	Labour, National Service, and Immigration.
Mr. John McEwen ..	Trade.†
*Mr. R. G. Casey ..	External Affairs.
*Sir Philip McBride ..	Defence.
Senator N. O'Sullivan	Government Leader in the Senate and Minister for the Navy.
*Senator J. A. Spicer ..	Attorney-General.
*Senator W. H. Spooner	National Development.
*Mr. A. G. Townley .	Air and Civil Aviation.
*Mr. P. M. C. Hasluck	Territories.

Ministers not in the Cabinet.

*Senator W. J. Cooper	Repatriation.
*Mr. H. Beale	Supply.
Mr. W. McMahon . ..	Primary Industry.†
*Senator S. D. Paltridge	Shipping and Transport.
‡Dr. D. A. Cameron ..	Health.
‡Mr. J. O. Cramer ..	Army.
‡Mr. C. W. Davidson ..	Postmaster-General.
‡Mr. F. M. Osborne ..	Customs and Excise.†
‡Mr. A. Fairhall ..	Interior and Works.
‡Mr. H. S. Roberton ..	Social Services.

* Held same portfolio in previous Government. † Now Department. ‡ New member of Government.

Three new Departments were created in the governmental reorganization—Trade, Customs and Excise, and Primary Industry. The Trade Department took over the trade functions of the Department of Commerce and Agriculture and of the Department of Trade and Customs, both of which were abolished. The remaining functions of the two Departments were transferred to the other two new Departments. In addition, the Army and Navy Departments, formerly under one Minister, were divided into separate Departments.

Mr. Menzies stated when announcing the changes that as the Government had been increased by two Ministers, he would introduce an amendment to the Ministers of State Act when Parliament met to provide for their appointment. Mr. Cramer and Mr. Roberton would not be sworn in until that legislation had been passed, though they would take charge of their departments immediately.

Mr. John McEwen, the new Minister for Trade, was formerly Minister of Commerce and Agriculture. Senator O'Sullivan, formerly Minister of Trade and Customs, took over the Navy portfolio from Mr. Francis, who had been appointed Australian Consul-General in New York. Mr. McMahon, appointed to the new portfolio of Primary Industry, was formerly Minister of Social Services. Of the new ministerial appointments, Dr. Cameron (Health) succeeded Sir Earle Page, retiring; Mr. Cramer succeeded Mr. Francis as Minister for the Army, a post which the latter had held concurrently with the Navy portfolio; Mr. Fairhall (Interior and Works) succeeded Mr. Kent Hughes; and Mr. Davidson (Postmaster-General) succeeded Mr. Anthony, who had resigned but, like Sir Earle Page, will continue to sit in Parliament.

Dr. Cameron (55), a medical practitioner from Queensland, served in the Second World War in the Medical Corps **Mr. Davidson** (58), a Queensland sugar-grower, served in New Guinea with the Australian Imperial Forces, and was formerly Country Party Whip. In the 1946 general election he won the Capricornia seat from Mr Forde, the deputy leader of the Labour Party, who had held it for 24 years **Mr. Cramer** (59) is a Sydney real estate agent. **Mr. Osborne** (46) is a Sydney solicitor who served with the Royal Navy during the war **Mr. Fairhall** (46) is a New South Wales businessman with wide experience in the radio and wireless industry **Mr. Roberton,** son of the late Sir Hugh Roberton (the Scottish composer and conductor), is a N S W wheat grower and grazier, and is widely known as a writer on political, economic and general subjects.

Mr. Menzies and Sir Eric Harrison were re-elected Leader and Deputy Leader of the Liberal Party respectively on Jan. 6, whilst Sir Arthur Fadden and Mr. McEwen were re-elected Leader and Deputy Leader of the Country Party. (Sydney Morning Herald - Australian News and Information Bureau) **(14523 A; Cabinet, 14454 C; Elections, 13652 A.)**

A. IRISH REPUBLIC - NORTHERN IRELAND. — Plan for Merger of Irish Trade Union Organizations.

Two special delegate conferences of the Irish T.U.C. and the Congress of Irish Unions, meeting separately in Dublin on Jan. 5, voted in favour of proposals to set up a joint provisional organization representing all trade unions in the Irish Republic and Northern Ireland. The provisional organization was given the task of drafting "a constitution for a single national trade union centre for the whole of Ireland which shall be representative of, responsible to, and democratically controlled by, Irish trade unionists and no other persons or organizations." The decision represented the first step towards ending the 11-year split in the Irish trade union movement.

A joint statement said that the delegates to both conferences had voted for the above-mentioned proposals "by an overwhelming majority." It was agreed that the Irish T.U.C and the C I U should each nominate eight representatives and a secretary to the executive committee of the provisional organization (officially known as the Provisional United Organization of the Irish Trade Union Movement), and that a draft constitution for a united Irish T U. movement should be worked out within three years—a period which might, however, be extended to six years if necessary. In drawing up such a constitution, the provisional organization would make "special proposals as might be appropriate" in respect of certain matters, including "special provisions for Northern Ireland and for associating the membership of British unions in Ireland with the national centre" On the establishment of a national centre, the provisional organization would be dissolved and its funds and liabilities transferred to the national centre.

The first step in healing the 11-year breach in the Irish T U. movement was taken in September 1953, when a Joint Unity Committee representing the Irish T.U.C. and the C I.U was appointed under the chairmanship of Professor Busteed. This committee held 35 meetings during the next 2½ years, resulting in a decision—taken in the autumn of 1955—for the establishment of a united provisional organization. In December 1955 the Joint Unity Committee published its recommendations, which were endorsed on Jan 5 by the two delegate conferences.

The split in the Irish trade union movement originated in 1945, when the Congress of Irish Unions broke away from the Irish T.U.C. on the question of British-based trade unions (i.e. unions with their headquarters in Britain). The C.I.U. has at present about 21 affiliated unions, all in the Irish Republic, with a total membership of about 175,000; by far the largest of its affiliated unions is the Irish Transport and General Workers Union, representing all transport workers in the Republic and having about 150,000 members.

The Irish T.U.C., operating both in the Republic and Northern Ireland, has 65 affiliated unions and a total membership of some 220,000 (about 125,000 in the Irish Republic), of whom about 45,000 are members of British-based unions. The largest of the British-based unions in membership of the Irish T.U.C. are the Transport and General Workers Union (which in Ireland bears the prefix "Amalgamated," and which has a separate Irish council and Irish officer) and the Amalgamated Engineering Union (which has about 22,000 members on both sides of the border). (Irish Times, Dublin - Belfast Telegraph) **(Prev. rep. Irish Unions, 12637 B; 8755 C; 7620 A.)**

A. COLOMBO PLAN. — Singapore Meeting of Consultative Committee. - Extension of Plan to 1961. - Increased U.K. Assistance. - U.S. and Canadian Offer of Atomic Energy Research Facilities. - Simla Meeting of Asian Colombo Plan Powers. - Reports of Consultative Committee and Technical Co-operation Council.

The seventh meeting of the Colombo Plan Consultative Committee was held in Singapore on Oct. 17-22, 1955, and was attended by representatives of the 17 member-countries (Australia, Burma, Cambodia, Canada, Ceylon, India, Indonesia, Japan, Laos, Nepal, New Zealand, Pakistan, the Philippines, Siam, the United Kingdom, the United States, and South Vietnam), as well as by representatives of Malaya and Singapore. A communiqué said that the Consultative Committee had decided that the Colombo Plan should continue until June 30, 1961, and that its future should be considered by the Committee at its 1959 meeting. Recalling that it had originally been agreed that the Plan should run until June 30, 1957, the communiqué said that this date "no longer has any special significance," and that it had been generally agreed that the development programmes of South and South-East Asia would have to be continued "for many years to come."

During the course of the meeting Lord Reading (Minister of State, Foreign Office, and leader of the U.K. delegation) announced that the U.K. would grant a total of £7,000,000 in technical assistance to Colombo Plan countries during the seven years beginning in April, 1956.

Lord Reading recalled that the U.K. had committed itself at the outset of the plan to spending £2,800,000 on technical assistance in the six years ending June, 1957. Of that amount, about £1,900,000 would have been spent by April 1956, whilst obligations already accepted by Britain would certainly absorb more than the balance of £900,000. The U.K. Government was conscious that much expansion was desirable, more especially since it had not yet been able to give as much help of this kind as it could wish to non-Commonwealth members who had only been elected to membership in the years since the Plan first came into being. After announcing the new U.K. contribution, Lord Reading explained that as it would start from April 1956, and not June 1957 (the end of the original period), the £7,000,000 would include any balance of the original £2,800,000 which might not have been spent by the earlier date. He expressed the hope that the increased U.K. contribution would "be taken as an earnest of our close and continuing interest in the work of the Plan and of our steady faith in its future usefulness."

Mr. J. B. Hollister, director of the U.S. International Co-operation Administration, informed the meeting on Oct. 20 that the U.S.A. would establish in South or South-East Asia a centre for research into the peaceful uses of atomic energy, which would include a research reactor and a small power reactor. On the same day the Canadian delegate (Mr. Lester Pearson, Minister of External Affairs) announced that Canada and India were working out details of a plan for the establishment of a research reactor in India. Mr. Pearson also announced that Canada would provide Burma with a cobalt beam-therapy unit for the diagnosis and treatment of diseases, including cancer, and that she wished to receive as many Asian scientists for research and training in nuclear physics as her own facilities allowed.

Mr. Hollister said that the centre which the U.S.A. proposed to establish could supplement existing facilities for the basic training of engineers, chemists, and physicians, and could offer facilities for training and research in the fields of medicine, agriculture, and industry, applying the new techniques of atomic research. Asian scientists would be able to use isotopes and other tools of atomic research to study and cure diseases endemic to Asia, and to improve crops. He emphasized, however, that such an institution must "rest firmly on Asian interest and support," and said that it would have to be "staffed largely by scientists from the region, supervised by administrators from the region, and supported by the Governments of the region."

Mr. Hollister further announced that if in the next few years power reactors became available for export from the U.S.A., and the necessary safeguards could be provided, the U.S. contribution to the centre would also include a small power reactor. If the Colombo Plan countries accepted the U.S. offer, the U.S. Government would consider what further steps were necessary and where the centre should be sited--taking into consideration local facilities, ease of access and communication, and equal availability to all Colombo Plan countries.

In a subsequent press statement Mr. Hollister explained that the U.S. contribution would come out of the $100,000,000 fund for Asian economic development approved by Congress in the Foreign Aid Bill (see 14364 A), and that it might amount to between $10,000,000 and $15,000,000.

Mr. Pearson explained to the conference that the reactor to be set up in India would be similar to the so-called NRX reactor at Chalk River, Ontario, which was used for research and experiment. Its manufacture, installation, and operation would be costly and would require a large number of experts. Nevertheless, in meeting the external costs of the reactor, Canada would not reduce her other aid under the Colombo Plan, and India would be free to use her counterpart funds obtained from earlier Canadian aid. Mr. Pearson stated that the Canadian Parliament would be asked to make "a significant increase" in its contribution to the Colombo Plan above the 1955 level of $26,400,000.

Prior to the meeting of the Consultative Committee, a number of Asian "Colombo Plan" Powers had met in Simla from May 9-14 to consider certain aspects of the utilization of external aid, particularly American aid from the special U.S. fund for Asian economic development. The basic question discussed was how best to use additional external aid in the region, and whether it would be more advantageous to use it on a regional rather than on a bilateral basis as at present. The countries represented at the Simla meeting were Cambodia, India, Indonesia, Japan, Laos, Nepal, Pakistan, Siam, and South Vietnam. A U.K. representative was present on behalf of Malaya, Singapore, North Borneo, and Sarawak.

The Simla conference unanimously agreed that in the present stage of economic development of the Asian region, and in view of the amount of additional aid likely to be available, there would be no advantage in having a regional organization to decide on the allocation of aid, but that all foreign aid, including that from the U.S.A., should continue on a bilateral basis. It was felt that the expenditure of additional funds on projects which readily lent themselves to regional treatment would be welcome, but that it was not desirable to earmark any special funds for such projects.

The conference also considered the question of setting up a special regional fund to meet balance-of-payments difficulties and to promote intra-regional trade, but decided that such a course could only be adopted when there was a clear indication that the substantial sums required for this purpose would be forthcoming.

The fourth annual report of the Colombo Plan Consultative Committee, which was approved at the Singapore meeting, was published in London on Nov. 22 as a White Paper (Cmd. 9622). A summary of the first part of the report is given below.

Review of Economic Progress.

During 1954-55 (the fourth year of the Colombo Plan) most countries of the area maintained, and a few surpassed, the rate of progress recorded in the last Report. The rate of increase in income and output, however, was uneven as between the countries in the area, and in a few countries there was some setback in the financial situation, caused largely by a fall in their export prices. Economic progress in the area as a whole was favoured by a generally expanding world economy, although a few countries were adversely affected by the continued readjustment in the relatively high post-war prices of rice in the wake of a growing world food supply. In addition to rice, hemp, copra and other coconut products were among other export products whose prices fell, whilst raw cotton prices suffered a minor setback. Tin prices were somewhat lower; tea prices were substantially higher; whilst rubber prices maintained "notably higher" levels. All countries in the area benefited from a drop in import prices.

Expansion of agricultural resources had continued to be a major goal of development efforts, and more than two-fifths of total outlays had been on agriculture (including irrigation and multi-purpose projects). Considerable progress had been made in carrying out large and small irrigation works, although, in view of the length of time generally required for their completion, their full impact on production would not be felt for some years. Whilst most of the large irrigation projects were being carried out in India and Pakistan, most other countries had also been expanding their irrigated area, and projects were being carried out in Siam, Ceylon, Nepal, Malaya, and Indonesia.

Rural community development projects were playing an increasingly important role in many countries, especially in India. Pakistan had initiated a programme similar to that in India, Indonesia had established 250 rural community centres; Nepal had started an agricultural extension and village development programme in 1952; the Rural and Industrial Development Authority in Malaya was fostering local self-help projects; whilst similar work was being carried out in Burma and Ceylon. The development of agriculture was also being helped by the provision of agricultural credit on reasonable terms, the organization of co-operative societies, the greater use of fertilizers, and the dissemination of better varieties of seeds.

As regards transport and communications, the bulk of the expenditure on highways in India had been devoted to the maintenance of existing roads, but in Pakistan, the Philippines, Siam, and Nepal there had been some additions to road mileage. Much progress had been made in rehabilitating the railway systems in many countries of the area, the restoration of the war-damaged railway system in Siam now being almost completed. In Burma, however, the pre-war capacity had not yet been restored, even though more than a quarter of Burma's foreign exchange outlay for capital purposes had been allotted to transport, including railways. Expansion of port facilities had also been accorded priority in the countries' development programmes.

Expenditure on health, education, housing, and other social services had continued to rise in the area, notwithstanding financial stringency in a few countries because of the paramount need to raise low standards of living.

With regard to private investment, the report said that while the plans of the Colombo Plan countries necessarily focussed primarily on public investment and development, the important role of private

investment and enterprise should not be under-estimated. It mentioned in this connexion the initiative taken by the Government of India in establishing the Industrial Credit and Investment Corporation (see 13974 A) and the National Industrial Development Corporation (see 13856 B). In Ceylon, an institution similar to the I C.I.C had recently been approved by Parliament, whilst in Pakistan the establishment of an industrial bank was contemplated In Pakistan, also, the Industrial Development Corporation (see 11112 D) had been playing an important role in developing industry, as well as in fostering private enterprise, by setting up industrial units and selling their stocks to the public as soon as they became going concerns. Countries in the "Colombo Plan" area had also taken further steps to encourage the investment of foreign capital

Turning to agricultural and industrial production, the report said that whilst output in the area had generally increased, this rise had not for the most part been directly attributable to the development expenditure thus far undertaken. Many development projects, particularly major undertakings involving large expenditure, remained uncompleted and could therefore be expected to affect production only after a considerable lapse of time Of agricultural products, the production of food grains in 1954-55 was 3 per cent lower than the record output of 1953-54, owing to adverse weather conditions. This was mainly due to the reduction in the output of rice, particularly in India, Siam, Pakistan, Laos, and Vietnam, total rice production being 6 per cent lower than in the previous year. Among the cash crops, however, output of tea, sugar, cotton, jute, oilseeds, and rubber had increased. There was a further improvement in the production of minerals, particularly of tin and iron-ore

In the industrial sector, the area as a whole had achieved remarkable progress, and in many industries targets were exceeded—notably in Pakistan, India, and the Philippines Cement production in the area had risen by 17 per cent. The output of cotton fabrics and yarn in 1954 represented increases of 5 per cent and 8 per cent respectively over the previous year, though in Pakistan the increase in output of fabrics amounted to 38 per cent as a result of the rapid expansion of capacity in the textile industry. The trend in India was towards increased production through higher productivity by replacement of obsolete machinery. Jute manufactures increased by 6 per cent in 1954 over the previous year, whilst steel production was 12 per cent higher.

As regards the countries' financial position, the report said that, despite an acceleration of development, the financing of investment and other outlays had—with some conspicuous exceptions—been somewhat less difficult than anticipated. In a number of countries the internal and external financial position had eased during the year as a result of the improvement in terms of trade and an expanding world demand for raw materials Ceylon, Indonesia, Malaya, and North Borneo had all experienced substantially better terms of trade, but the principal rice-exporting countries—Burma and Siam, and to some extent Vietnam and Cambodia—had suffered a substantial deterioration in their terms of trade.

Most countries in the area had been able to avoid substantial resort to deficit financing In India, such deficit financing had so far been on a more modest scale than was originally anticipated because expenditure continued to lag somewhat behind the targets, and a large amount could be borrowed from the public In Pakistan, the balance-of-payments situation remained difficult and the "austere" import policy adopted towards the end of 1952 had been continued. Ceylon had experienced a marked recovery in her financial situation, and her Government had been able to reduce its debts and replenish its cash balances, whilst increased exports and higher rubber prices in Malaya and Borneo had also improved the internal and external financial position of those territories. In the Philippines, the financial situation had deteriorated somewhat, though the deficit of 117,000,000 pesos incurred by the Government in 1954 had resulted almost entirely from expenditure on economic development. South Vietnam, Laos and Cambodia had continued to tackle the financial aftermath of civil war, and all three countries were able to manage only with very large contributions of outside assistance.

In Burma, the combination of rising development outlays, continued high expenditure on internal security, and falling rice prices had put a heavy strain on the country's financial resources; it became necessary early in 1955, therefore, to cut private imports drastically and to reduce the development expenditure contemplated in the 1954-55 budget. Indonesia, despite rather modest expenditure on development, had had to struggle with a chronic budget deficit which so far had proved intractable. Successive deficits had been financed by the Bank of Indonesia and had inflated the money supply, which had risen by 42 per cent in the 11 months ended May 1955. In Siam, the budget deficit occasioned by a high level of expenditure and diminishing receipts from rice had also created serious financial strains, though there was evidence of a notable improvement in the first half of 1955 as compared with the acute position in 1953-54.

The Task Ahead.

The report stressed that if the progress achieved so far, not only in food production but in economic development generally, was compared with the fundamental problem of raising the living standards of a rapidly increasing population, it was clear that much more remained to be done. Current levels of food consumption per head, though substantially higher than in the early post-war years, were lower than before the war and below the accepted nutritional standards. At the same time the population of the "Colombo Plan" area as a whole was estimated to be increasing by about 10,000,000 a year. This rapid growth of population, deriving from an increasing birth-rate and from the less often recognized phenomenon of a falling death-rate, was a fact of major importance for the future development of the area and the improvement of its living standards The increasing population, and the resultant increase in the labour force available had a special bearing on the magnitude of the employment problem, under-employment—especially in rural areas—was common in practically every country of the region, and in some countries unemployment had become a serious issue. To the extent that the substantial investment necessarily devoted to large-scale projects for the improvement of basic economic services had been required for the importation of services and equipment, additional local employment had not been created to a proportionate degree Moreover, these projects could not, of their nature, generate increasing employment until after a considerable interval Development plans had, therefore, both a current and a long-term problem to meet if opportunities for employment in activities beneficial to the economy generally were to be created at a rate sufficient not merely to keep up with the annual increase in the labour force, but to overtake it.

"It is evident," the report said, "that even in countries where the largest increases in output have been recorded, the next phase of development may require still greater efforts Quite apart from the influence of favourable weather conditions on agricultural output, it is becoming clear that in many cases increased output has so far owed more to the greater and more efficient utilization of existing capacity than to any appreciable increase in capacity. Further increases in production are therefore likely to require a proportionately greater effort. Moreover, the fact that much of the investment carried out so far has been concentrated on large-scale projects for the improvement of basic economic services, means that visible improvements in living standards cannot be expected immediately, since it is only after a considerable interval that such projects show their full results"

The report went on to refer to the internal and external financial difficulties being experienced by a number of countries in the area, because of the time-lag between the investment and the return on large-scale development projects, and because of their heavy dependence on the export trade After saying that the operation of these factors "may lead to a vicious circle, with development checked for lack of financial resources, while resources remain low for lack of development," the report continued: "In these circumstances greater development in the private sector can become very important. While the provision of certain public utilities has often been the responsibility of the public sector, the actual production of goods and services is the main concern of private enterprise. A vigorous and expanding private sector is therefore an essential complement to the activities in the public sector, and Governments will no doubt give increasing recognition to this fact by assisting the private sector to play its part in the planned programme of economic development. One form of assistance which may be needed more and more by the private sector in countries with a very large public sector of development may be finance. It is possible that, with the emphasis on finding resources for the development of the public sector, sufficient financial resources may not be left in the economy for the private sector to draw upon."

Contributions to Economic Development.

The following information on the assistance given to economic development in the area by other participating countries is compiled partly from the second part of the report and partly from press sources.

Australia. Of Australia's contribution of £A31,250,000 for economic development, a total of £A28,600,000 had been spent or committed by the end of the financial year 1954-55, the allocation between the principal recipient countries being as follows. Pakistan, £A12,600,000 (including £A3,200,000 for earth-moving equipment for the Canal Links project on the Indus in the Punjab, and £A12,000 for a radio beacon for the port of Chalna, East Pakistan); India, £A9,600,000 (of which £A3,200,000 was for 1954-55 and included £A2,400,000 for 2,000 railway wagons and £A600,000 for equipment for All-India Radio); Ceylon, £A2,300,000 (including £A1,500,000 for an irrigation project, half the money being supplied in the form of flour to provide counterpart funds for local costs); Indonesia, £A1,700,000; Cambodia, £A504,000 (£A384,000 for railway development and £A120,000 for road-making equipment and a service station), Vietnam, £A300,000; Burma, £A300,000.

The first of nine diesel-electric locomotives, being built for Pakistan at a total cost of £A900,000, was presented to the Pakistan High Commissioner in Australia (Mr. Habibur Rahman) by the Australian Minister for External Affairs (Mr. Casey) on March 25 The first consignment of agricultural tractors supplied by Australia to Burma under the Colombo Plan was formally handed over in Rangoon on Aug. 23 by the Australian Minister to Burma, Mr. C T. Moodie. A specially equipped hospital ship to serve the 30,000 people living in the Andaman and Nicobar Islands was formally handed over by Mr. Casey to the Indian High Commissioner in Australia (General Cariappa) at a ceremony at Sydney on Nov. 29.

Canada. The Canadian Government's contribution for 1955-56 would amount to $26,400,000, bringing the total since 1951 to $133,400,000. The principal recipient countries were India ($55,000,000), Pakistan ($45,000,000, plus a special grant of $5,000,000 of wheat, the counterpart funds from which were used for the Warsak hydro-electric and irrigation project), and Ceylon ($8,000,000).

Assistance to India in 1954-55 included funds to complete the projects initiated in 1953 for the supply by Canada of 120 steam locomotives at an estimated cost of slightly over $21,000,000), as well as trucks and wireless equipment (at an estimated cost of $120,000) for use by the Indian Government in locust control.

Aid to Ceylon in 1955-56 would include $550,000 for diesel locomotives; $400,000 of further help in constructing and equipping a school of practical technology, $660,000 of further assistance to the Ceylon fisheries; and $200,000 towards an aerial survey

Aid granted to Pakistan in 1954-55 included a further $9,500,000 towards the Warsak hydro-electric and irrigation project; an additional $1,250,000 for the Daud Kel Cement Plant in the Thal area (bringing the total of Canadian aid for this project to $6,750,000); and a further $50,000 for the soil survey being undertaken in conjunction with the aerial resources survey Canada also confirmed her earlier decision in principle to make available about $4,000,000 for the purchase of equipment and the provision of engineering services for the power transmission line between Dacca and Chittagong, and also approved the provision of a thermal power station at Khulna (East Pakistan) at a cost of about $2,000,000.

Among the Colombo Plan gifts delivered by Canada during the year were five diesel-electric locomotives handed over to Ceylon on Jan. 19, and the first of the 120 steam locomotives promised to India, formally transferred on Sept 15. Agreements were signed by Canada in January 1955 for the setting-up of biological control centres at Bangalore (India) and Rawalpindi (Pakistan), whilst another Canadian-Pakistani agreement, signed on June 29, provided for the supply by Canada of a steam power plant, boilers, and generators at Hardinge Bridge (East Pakistan) as part of the Ganges-Kobadak project [For further Canadian assistance to India see Mr. Lester Pearson's announcement on Nov 5—14630 C.]

India. About 85,000,000 rupees (£6,375,000) of aid had been made available to Nepal under the Colombo Plan, mainly on highway and hydro-electric projects

New Zealand. During the four years ended June 30, 1955, New Zealand had made available £N.Z.1,000,000 a year for capital aid under the Colombo Plan. A further £N.Z 1,000,000 would be made available in 1955-56, together with £N Z 500,000 uncommitted from previous years Of the total aid, India had received £N.Z 1,300,000 (£N.Z 1,000,000 for the All-India Medical Institute and £N.Z.300,000 to assist the development of the dairy industry), Pakistan, £N Z 1,100,000 (including £.N Z.850,000 for the purchase of imported equipment for a cement factory at Hyderabad, Sind); and Ceylon, £N Z 645,000 (mainly for the establishment of a dry farming research station)

In 1954-55 two grants totalling £N.Z.229,140 were made to Indonesia to meet the capital cost of establishing a trading centre at Malang; £N.Z.100,500 was given to Burma to help meet the cost of establishing a fertilizer factory in Rangoon; and a grant of £N.Z 33,000 was made to Cambodia to meet the cost of constructing a railway apprentices' school at Pnom-Penh.

The new workshop of the Government Training College at Maharagama (Ceylon), the equipment of which had been supplied by New Zealand, was formally opened by the Prime Minister of Ceylon, Sir John Kotelawala, on June 6, 1955, whilst the cement factory at Hyderabad (Pakistan), named the Zeal-Pak cement factory, was officially opened by the Pakistani Prime Minister (Chaudhri Mohammad Ali) on Jan. 15, 1956.

United Kingdom. The report pointed out that "very large capital sums" went out each year from the U.K. to aid the economic development of South and South-East Asia. These mostly took the form of private investment and drawings by India, Pakistan, and Ceylon on their sterling balances, which the U.K. Government had from the outset regarded as their main contribution to the Colombo Plan. Owing to the nature of these commitments, however, it was not possible to state their total precisely.

Outside these fields, the U.K. Government had made available since 1951 to countries in the area approximately £80,000,000 by way of grants, loans, credits, and technical assistance, including some £50,000,000 for rehabilitation and development in Malaya, Sarawak and North Borneo; £10,000,000 to Pakistan in 1953 to assist schemes designed to expand food production (see 13106 A); and £1,000,000 by the Commonwealth Development Finance Company for the Sui Gas undertaking in Pakistan (see 13442 A)

United States. In the five years 1950-55 U.S. economic assistance made available to Colombo Plan countries under appropriations by the U.S. Congress totalled about $841,000,000. This included $273,000,000 to India (of which $45,000,000 was on a long-term local currency repayable loan basis); $230,000,000 to Cambodia, Laos, and Vietnam; $117,000,000 to Pakistan (of which $20,000,000 was on a long-term local currency repayable loan basis); $100,000,000 to the Philippines; $65,000,000 to Siam; $21,000,000 to Burma; and $4,000,000 to Nepal In addition, Pakistan had received about $21,000,000 to finance the procurement and transport of wheat in 1953. A further $324,000,000 had been appropriated for aid to the Colombo Plan countries in 1955-56 Additional sums had been made available by the U.S A. from the proceeds of sales of U S. surplus agricultural products, and through development credits by the U.S. Export-Import Bank.

In India, more than 90 per cent of U.S. aid in the years 1950-55 had been devoted to expanding food supplies, but in 1955-56 the programme had placed greater emphasis on transport and industry. In Indonesia the U.S. technical co-operation programme had emphasized the improvement and expansion of facilities for technical and vocational education, and improvements in public health, public administration, and industrial training; it also helped to increase production in agriculture, fisheries and industry through the use of demonstration equipment, improved seeds, pilot plants, etc., whilst U.S. assistance was also being given in a special malaria-control programme.

In Pakistan, U.S. assistance had principally been used to increase agricultural production through improved methods and the expansion of the cultivable area In Siam, the primary objective had been to help meet the need for trained manpower by expanding and improving technical and vocational education.

In the Philippines the programme had included irrigation and water supply projects, and the development of agriculture and sanitation; in Vietnam, it had been concerned principally with land reform measures to improve the social and economic status of farmers; in Laos, it had been devoted largely to improving transport facilities, whilst in Nepal it had covered village development, health and sanitation, transport and communications, education, irrigation, increased food production, and industry and mining.

Four large steam locomotives and tenders, the first consignment of a total of 100 broad-gauge locomotives being supplied by the U.S A. to India under the Indo-American technical co-operation programme, were unloaded at Bombay on Dec. 22, 1955.

The annual report of the Colombo Plan Technical Co-operation Scheme, published on Oct. 15, showed that up to June 30, 1955, 2,676 training places and 392 experts had been provided under the scheme. Of the trainees, 440 had gone abroad for training in food and agriculture, the next most important groups being administration (428), engineering (331), education (305), medicine and health (293), industry and trade (219), transport and communications (195), and fuel and power (146). Experts had been provided for medicine and health (117), transport and communications (54), engineering (51), food, agriculture, and forestry (47), education (42), industry and trade (27).

Australia had provided facilities for 916 trainees (principally Indonesia 173, India 148, Pakistan 147, Ceylon 101, Malaya 75, Burma 68, Singapore 64, the Philippines 49, Siam 29, North Borneo 27, Sarawak 24), and had provided 115 experts (Malaya 35, Ceylon 28, Pakistan 28).

Canada had provided facilities for 311 trainees (principally Pakistan 138, India 109, Ceylon 33, Indonesia 21), and had provided 59 experts (mainly Ceylon 26, Pakistan 11, Mayala 8, India 6).

Ceylon had provided facilities for 11 trainees from Nepal (4), Indonesia (3), Malaya (2), Burma (1), and Singapore (1).

India had provided facilities for 340 trainees (principally Nepal 188, Ceylon 76, Pakistan 26, Philippines 20), as well as 14 experts (Ceylon 10, Indonesia 4).

Japan had granted facilities for 11 trainees (Philippines 6, Ceylon 3, India 2) and had sent 3 experts to Ceylon.

New Zealand had provided facilities for 226 trainees (chiefly India 52, Ceylon 51, Malaya 46, Pakistan 42, Burma 12, Indonesia 10), and had sent 44 experts (Pakistan 14, Ceylon 10, India 7, North Borneo 6, Indonesia 4).

Pakistan had provided facilities for trainees from Ceylon (4) and Malaya (4).

The **United Kingdom** had granted facilities for 853 trainees (principally India 245, Ceylon 244, Pakistan 218, Indonesia 72, the Philippines 32, Burma 24) and had sent 157 experts (chiefly Ceylon 65, India 64, Pakistan 23).

The report said that expenditure under the scheme up to June 30, 1955, had been approximately £3,500,000, plus firm forward commitments of another £2,000,000, making a total of about £5,500,000.—(Cmd. 9622 - Commonwealth Relations Office, London - Times - Daily Telegraph - Manchester Guardian - Australian News and Information Bureau - Montreal Star - N.Z. Directorate of Information Services, Wellington - Indian and Pakistani High Commissioners' Offices, London - The Statesman, Calcutta - Ceylon Government Information Department, Colombo)

(Prev. rep. Colombo Plan, 14016 A; 13956 A.)

A. HUNGARY. — Espionage Trials of Correspondents of U.S. News Agencies and U.S. Legation Employees.

Budapest radio announced on Jan. 14 that M. Endre Marton, correspondent of the Associated Press in Budapest, and his wife Ilona, who worked for the United Press, had been sentenced to six and three years' imprisonment respectively after trial by a military court on charges of "espionage for a foreign State and instigation to rebellion against the State power."

It was also announced that during the same trial three Hungarian employees of the U.S. Legation in Budapest had been sentenced on similar charges—Bela Kaposi to life imprisonment, Ferencz Arpad to 15 years, and Cornel Balzs to eight years—and that an undefined number of their accomplices had also received severe prison sentences.

M. and Mme Marton lived in Britain during the war, but in 1947 gave up their British citizenship and returned to Hungary. On July 9, 1955, it was announced that they and the above-mentioned employees of the U.S. Legation had been arrested on charges of espionage for the United States.

The official announcement stated that there would be no appeal against the sentences.—(Times - New York Times)

A. SOVIET UNION. — Meeting of Supreme Soviet. - Speeches by Marshal Bulganin and M. Khrushchov. - Report on Visit to Asian Countries. - M. Khrushchov's Criticisms of Western Powers.

A three-day session of the Supreme Soviet (the two Houses of the Soviet Parliament meeting in joint session) was held in Moscow on Dec. 26-29, 1955, at which Marshal Bulganin and M. Khrushchov reported on their visit to India, Burma, and Afghanistan.

Whereas Marshal Bulganin's speech was almost wholly devoted to the Asian tour, the speech of M. Khrushchov—which was of considerably greater length—contained many references to the international situation, in the course of which he attacked Western policy in general and U.S. policy in particular. Both Marshal Bulganin and M. Khrushchov, however, reiterated that the Soviet Union desired friendly relations with all countries in the spirit of the "five principles" which governed its relations with India, Burma, and Afghanistan. Extracts from their speeches are given below.

Marshal Bulganin.

The Soviet Prime Minister said that the year 1955 would "go down in history as one of a definite shift in the strained international situation which has developed over the past period." After declaring that "no little credit" for this development was due to the U S S.R., he said that the friendship and co-operation between the Soviet Union and India, Burma, and Afghanistan was "an important contribution to peace" and "showed the correctness of the fundamental Leninist principle of the Soviet Union's foreign policy—the principle of peaceful co-existence of nations with different social and political systems."

After describing in much detail the visits paid by himself and M. Khrushchov to India, Burma, and Afghanistan, and expressing the thanks of the Soviet Government and people for the "friendship and love" with which they had been received in those countries, Marshal Bulganin said that the Asian peoples "cannot but feel alarmed at the establishment of such aggressive military groupings as SEATO and the Baghdad Pact." He added in this connexion

"The United States, Britain, and France have been the engineers of SEATO. As for the Baghdad military grouping, we know only too well that it was Britain who played the first fiddle in whipping it up. The Baghdad Pact is a new form of colonialism [and] is aggressive in essence, as is shown by the nature of the commitments of the parties to it. This became particularly obvious after the inclusion of Persia in this grouping.

"The Soviet Government has on a number of occasions drawn the attention of the Persian Government to the fact that Persia's accession to military groupings which the Western Powers have long tried to make her join is incompatible with the maintenance of good-neighbourly relations between Persia and the Soviet Union. In doing so we have stressed that we wish to maintain good relations with Persia, just as we do with other neighbouring countries. It is regrettable that those responsible for Persia's policy have adopted a different course by joining the Baghdad Pact and thus taking on themselves a grave responsibility for the situation resulting from it We wave aside as groundless the attempts of the Persian Government to pretend that Persia's accession to the pact has the objective of strengthening peace in the Middle East. . "

After stressing the close friendship between India and the U S S.R , Marshal Bulganin continued : "Our frank statements on Goa and the Kashmir question have aroused the dissatisfaction of the reactionary Press and of some foreign statesmen. It is well known that Portugal's small colony, Goa, is still preserved on India's territory. The Indian people rightly demand that an end be put to such an intolerable situation, and demand Goa's liberation. It is enough to look at the map of India and at these 'possessions' of the Portuguese usurpers to become convinced that the Indian Government justly and lawfully raises the question of reunifying this territory with India. The Soviet Government supports this just demand of India's and holds that the preservation of a Portuguese colony on Indian territory . . . is a disgrace to civilized nations.

"As for the Kashmir problem, it has been created by States which pursue military and political objectives in that area. On the pretext of supporting Pakistan in the Kashmir question, certain countries tried to entrench themselves in that part of India, in order to threaten the areas around Kashmir and to exert pressure on them. Attempts have been made to sever Kashmir artificially from India and to turn it into a foreign military base. The people of Kashmir have resolutely come out against this imperialist policy. The Kashmir question has already been settled by the people of Kashmir themselves. They consider themselves an integral part of the Republic of India. . . We became profoundly convinced of this during our talks in Srinagar with the Prime Minister of Kashmir, Mr. Ghulam Mohammed Bakshi, and his colleagues. The Soviet Government supports India's policy on the Kashmir question because it is entirely in the interests of the consolidation of peace in that part of Asia."

Marshal Bulganin went on to describe his and M. Khrushchov's visit to Burma, declaring *inter alia* that Soviet-Burmese relations, like Soviet-Indian relations, were based politically upon the "five principles" and economically upon "principles of equality and mutual benefit, which preclude the imposition by one side of political or other fettering conditions on the other side."

As regards the U.S S R.'s relations with Afghanistan—a country which he described as having "won its national independence in a fierce struggle against the British imperialists who tried to turn Afghanistan into their colony"—Marshal Bulganin declared · "Our relations with Afghanistan . could serve as an example of genuine good-neighbourly relations and friendly co-operation. . . . We want to see Afghanistan an economically strong and politically independent country, and we are glad that our policy meets with the complete understanding of the Royal Afghan Government and the Afghan people."

Marshal Bulganin reiterated the Soviet Union's support for Afghanistan in her dispute with Pakistan on the Pakhtoonistan (Pushtunistan) question, saying in this connexion "In our speeches in Kabul we set forth our views regarding the Pushtunistan question, which greatly worries the Afghan people. Pushtunistan is a region inhabited by independent Afghan tribes In 1893 the region was included in the British Empire, and in 1947, contrary to the interests of the tribes inhabiting it, Pushtunistan was incorporated in Pakistan We think the demands of Afghanistan to give the population of Pushtunistan an opportunity of freely expressing their will are justified and well grounded."

The Soviet Prime Minister concluded as follows . "Not everybody liked our visit to the Asian countries. Our speeches in India, Burma, and Afghanistan, and the documents of friendship signed in Delhi, Rangoon and Kabul, evoked the dissatisfaction and even the indignation of the Press and official representatives of certain countries. They do not like our friendship with India, Burma, and Afghanistan. But we like it very much and we will strengthen it, just as we will strengthen friendship and co-operation with other countries. Certain Western statesmen dislike our frank statements regarding colonialist policy. But we, like the Asian and African peoples, dislike even more the colonial policy itself We will continue to oppose it because we hold that colonial regimes are a disgrace to present-day mankind and are incompatible with the peaceful and democratic principles of the United Nations.

"During our trip, statements appeared in the Western countries alleging that our visit to India, Burma, and Afghanistan had the purpose of undermining relations between those countries and the Western States. Such assertions are absolutely groundless The strengthening of friendly relations between the Soviet Union, India, Burma, and Afghanistan can in no way prejudice relations between those nations and other peoples. On the contrary, it will promote the development of international co-operation. . . ."

M. Khrushchov.

M. Khrushchov, like Marshal Bulganin, thanked the Governments and people of India, Burma, and Afghanistan for the cordiality and warmth of their welcome. He continued · "In some countries, however, our journey was received in a very unfriendly and even hostile way by certain people, and was the occasion for virulent outbursts against us We have been condemned, lectured, and subjected to other forms of pressure because we, in their eyes, have allegedly taken an incorrect stand against the colonialists, because we have condemned the enslavement and plundering of the people of colonial and dependent countries.

"What have we said about colonial regimes that is new? Why did our statements cause such a frenzy ? After all, we cited universally known and irrefutable facts. It is a fact, for instance, that the British colonialists—not the people, but the colonialists—held sway in India for two centuries, and that for a long time they oppressed the peoples of Burma and Afghanistan. . . . But the British colonialists are not Britain, and cannot be identified with the British people Our statements contained nothing that could in any way offend Britain or the British people. We profoundly respect the talented and industrious British people, and want to be friends with them We said nothing insulting about the British Government either. But we condemned, and do condemn, the colonial system, and we think that the sooner it is ended the better. . . .

"It is surprising when certain short-sighted politicians accuse us of unfriendliness towards Britain or the U.S.A. and allege that we want those countries to quarrel with India, Burma, and other countries. They themselves commit unfriendly acts against these countries. How can India regard, for instance, the statement made by Mr Dulles and the Portuguese Foreign Minister, Dr. Cunha, concerning Goa? Mr Dulles permitted himself openly to declare that Goa must belong to Portugal because the Portuguese invaders conquered it 400 years ago. In this connexion the Indian Press quite rightly reminded Mr. Dulles that 250 years ago the present-day United States of America was a colony of Britain, and that, if we adhere to his logic, then Mr. Dulles should still consider himself today a subject of Her Majesty the Queen of Great Britain "

In the course of a lengthy attack on the policies of the Western Powers, including denunciations of the "aggressive" character of NATO and of the remilitarization of Western Germany, M. Khrushchov accused "certain imperialist elements" of having "whipped up war hysteria since the end of the war" and of having sought "to frighten the peoples with a fictitious 'Soviet menace'" After declaring that it was "a well-known precept of Marxism-Leninism that revolutions are not exported," and that the U.S.S.R would always follow "the path of peaceful co-existence pointed out by Lenin, which implies non-interference in the internal affairs of other States," he continued :

"We set much value on our friendship with India. . . . Both we and our Indian friends would like to develop and strengthen these friendly relations without in any way harming India's and the Soviet Union's relations with other countries. Our friendship, as

we understand it, should not be confined to friendly contacts with one, two, or a few nations. We want to be friends with all nations We are happy, therefore, to see our friends developing friendly relations with third States, including those with whom our relations are, perhaps, somewhat strained and cool We hope to improve our relations with those nations through India, our friend

"We have always striven earnestly, and are continuing to strive, for friendship with all countries, including the capitalist countries. We should like to live in friendship with the United States, Britain, and France, the most powerful capitalist nations If we were to achieve this—and that depends, not on us, but on the Governments and peoples of the U.S A., Britain, and France—it would create the conditions for genuine peaceful co-existence and competition of the two systems Unfortunately we have not yet achieved this, but we are not giving up hope and we shall not spare our efforts in this direction. We fully understand and support the position of the Indian leaders who have declared that India maintains a neutral position between us and other States ."

In discussing the four-Power negotiations on disarmament, M. Khrushchov rejected President Eisenhower's plan for aerial inspection, and referred to the recent tests of the Soviet hydrogen bomb "Both at the Geneva conferences and in the U.N ," he said, "the Soviet Union put forward a number of concrete proposals on the reduction of armaments, the prohibition of atomic and hydrogen weapons, and the establishment of international control. Agreement on these questions was prevented by the change in the attitude of the U S A , which suddenly disavowed its former proposals when we agreed to accept them as a basis Now the U S A is putting in the foreground the only proposal submitted by President Eisenhower at Geneva—on the exchange of military information and unhindered aerial photography

"We have already pointed out that the proposal on aerial photography does not settle the substance of the matter. In conditions in which no reduction of armaments is actually envisaged, flights over territories and aerial photography can only foment war-like passions and war hysteria This is no longer control, and is not even a semblance of control It is actually a means for finding out more about the forces of another country In essence it does not differ in any way from military reconnaissance It is quite another matter to make a realistic approach to the disarmament problem , to reach agreement on levels and armaments and on the prohibition of atomic and hydrogen weapons , to establish a rational system of international control at railway junctions, naval bases, aerodromes, etc., thus making it possible to prevent a sudden attack by one country on another Such measures are entirely practicable, and all peoples would welcome them

"Some enemies of disarmament proceed from the erroneous assumption that they allegedly possess some kind of superiority in strength, and hence that it is disadvantageous for them to disarm. We have warned these advocates of the notorious 'policy of strength' that they may grossly miscalculate in their gamble. We do not want to intimidate anyone , still less do we want to boast about our military-technical achievements But in order to cool the inflamed imaginations of the more zealous advocates of the arms drive, we have to recall the results of the recent tests of the latest Soviet hydrogen bomb The power of this weapon, as has already been announced, is equivalent to the power of many millions of tons of explosives, and it can be increased substantially. We continue to stand, as hitherto, for the prohibition of the manufacturing, testing, and use of all atomic and hydrogen weapons. But those who are opposed to this ought not to forget the results of the aforementioned tests.

"It must be mentioned in passing that some Western statesmen have recently been displaying, to say the least, a strange conception of the Geneva spirit. They want the Soviet Union to disarm its army unilaterally, and they also want us to disarm morally, spiritually and ideologically. . I shall be betraying no secret if I say that such an unrealistic policy is being most zealously advocated in the United States, the role of theoretician of this policy having been assumed by Mr Dulles It is he who for a long period has been preaching the idea of a 'massive retaliatory blow' and similar absurdities. . . ."

M Khrushchov went on to refer to the Christmas message to the peoples of the Eastern European countries issued by President Eisenhower (see 14607 B), and to similar messages issued by Mr. Dulles and other U S. leaders. He declared that these messages did not correspond with the "Geneva spirit"; described them as "crude interference in the domestic affairs of free and sovereign States"; and alleged that "the American authors of these far from religious 'Christmas messages'" had "the closest possible ties with capitalists expelled from the people's democracies" and desired the restoration of the capitalist system in those countries. "I should prefer," said M Khrushchov, "not to speak about this subject, and especially about President Eisenhower, for whom I have a great respect. . . . But I am not putting forward these questions myself but merely replying to those who, violating the spirit of Geneva, openly interfere in the domestic affairs of our allies and friends."

Continuing, M Khrushchov asserted that it was "not the Soviet Union but its partners in the Geneva Conference who are betraying the spirit of Geneva." He said in this connexion: "Certain [foreign] journalists . . . lament that in our statements we say that the teaching of Marxism-Leninism will triumph. But is this a violation of the Geneva spirit? We have said, and will continue to say, that the peaceful competition of the two economic systems will lead to the victory of the socialist system. . . . We do not protest when the ideologists of the opposing system declare that capitalism will emerge victorious. We consider this argument to be natural, and we think that only history will decide it . . We say 'In this competition, this struggle, we shall never start an aggressive war; we shall constantly fight for disarmament, for strengthening peace, and for peaceful co-existence.'"

M. Khrushchov went on to criticize Persia, Turkey, and Pakistan for their participation in the Baghdad Pact, saying in his connexion: "Even before the ink with which our joint statements on the results of the Geneva Conference was signed had dried, our partners in the conference had begun to involve more countries in the aggressive Baghdad Pact They have dragged Persia into the pact and are forcing other countries to follow suit . . . We cannot remain silent about the fact that, in spite of all the efforts the Soviet Union has made to ensure friendly relations with Persia, the Government of that country has joined the Baghdad military pact, thus placing Persia's territory at the disposal of aggressive forces who are plotting attacks against the Soviet Union.

"This is true not only of Persia but of Turkey as well. When Kemal Ataturk and Ismet Inonu held the reins of power in Turkey, our relations with that country were very good, but those relations have subsequently become clouded We cannot say that this happened through Turkey's fault alone We, too, made some improper declarations which cast a cloud over those relations. But subsequently we took steps to retrieve the situation and to restore friendly relations with that country Unfortunately, these steps have not been reciprocated by Turkish statesmen American generals and admirals are travelling to Turkey, making bellicose speeches, and making a parade of their forces through visits of naval squadrons. . .

"Pakistan, which is also a party to the Baghdad Pact, has found herself in a similar position in relation to her neighbours It is a fact that Pakistan's relations with India, and also with Afghanistan and the Soviet Union, leave much to be desired One cannot, for instance, fail to notice that the American Admiral Radford visited Pakistan, and subsequently Persia, quite a short time ago It was evidently purposes entirely different from those of promoting economic and cultural contacts that he had in mind when he went to those countries .

"In connexion with the Baghdad Pact, a few words should be said about the situation in the countries of the Near and Middle East The sponsors of the Baghdad Pact are moving heaven and earth to inveigle the Arab nations into this aggressive bloc. But they are coming up against the mounting resistance of the peoples of those nations Soviet public opinion has been following sympathetically the valiant struggle of the people of Jordan against the attempts to force their country to join the Baghdad Pact

"We understand the yearnings of the Arab nations who are fighting for their complete liberation from foreign dependence. One cannot, at the same time, fail to recognize as deserving of condemnation the acts of the State of Israel, which, ever since it came into being, has been threatening its neighbours and pursuing a policy hostile to them It stands to reason that such a policy does not conform to the national interests of Israel, and that imperialist Powers stand behind those who are carrying out this policy. They are seeking to use Israel as their instrument against the Arab peoples, with an eye to the ruthless exploitation of the natural wealth of that area"

In conclusion, M Khrushchov asserted that "at a time when the Western Powers are carrying on the policy of an arms drive and knocking together aggressive blocs," the Soviet Union was "pursuing its peace-loving policy and strengthening friendship with all peoples who desire it" He recalled that in 1955 the U S S.R. had reduced its armed forces by 640,000 men, returned Porkkala to Finland and Port Arthur to China, concluded a State treaty with Austria, established diplomatic relations with the German Federal Republic, and re-established friendly relations with Yugoslavia.

After hearing the speeches of Marshal Bulganin and M. Khrushchov (both of which were made on Dec. 29), the Supreme Soviet unanimously passed a resolution expressing its "complete satisfaction" at the results of their Asian tour, and declaring that "a further great step has been taken in consolidating the U.S.S.R.'s friendship with India, Burma, and Afghanistan in the struggle for peace, the ending of the 'cold war,' and the further easing of international tension." The resolution added that the "community of views of the U.S.S.R., India, Burma, and Afghanistan is not to be explained by transient causes but is the result of the basic identity of interests of these States."—(Soviet Weekly)

A. RHODESIA AND NYASALAND FEDERATION.—Non-African Agriculture in Northern Rhodesia made a Federal Responsibility.

Under an Ordinance gazetted on Dec. 23, 1955, non-African agriculture in Northern Rhodesia became a Federal responsibility as from Jan. 1, 1956. Forestry and irrigation will, however, remain the responsibility of the Northern Rhodesian Department of Agriculture, although the production side of irrigation now comes under the Federal Ministry of Agriculture. The Ordinance had received its third reading in the Northern Rhodesian Legislative Council on December 16.

A. KASHMIR. — Statements by Pandit Pant on Kashmir's Accession to India. - Pakistani Protests to Indian Government. - Pakistani All-Party Conference on Kashmir. - Formation of "Plebiscite Front" in Indian Kashmir. - Arrests of Opposition Leaders.

The Indian Home Minister (Pandit Pant), in a speech at Srinagar on July 5, 1955, said that in finding a solution to the Kashmir controversy India must pay attention to the wishes of the people of Kashmir, which had already been expressed through a democratically-elected Constituent Assembly. Enlarging on this statement at a press conference on July 9, Pandit Pant suggested that the conditions for a settlement had been transformed by changes in the situation in both Kashmir and Pakistan.

"We made a certain statement at the time when Kashmir acceded to India—a fact which cannot be denied," Pandit Pant said. "But at the time when we made that statement, circumstances were different from what they are now. The time factor is important, many things have happened during the last seven or eight years. Firstly, Kashmir has been following a certain policy for her advancement, and many development schemes are in progress. Secondly, Pakistan has entered into a military alliance with America. Thirdly, the Constituent Assembly of Kashmir, which was elected by adult franchise, has taken a definite decision. Fourthly, the resolutions passed by the National Conference on the eve of the elections to the Constituent Assembly, and the inaugural address delivered by Sheikh Abdullah, made it abundantly clear that the Constituent Assembly had been constituted primarily for the purpose of determining and deciding this vital issue. While I am not oblivious of the initial declaration made by India, I cannot ignore this important series of facts. In these circumstances, I personally feel that the tide cannot now be turned." As regards the area occupied by Pakistan (*Azad Kashmir*), Pandit Pant said that the people there had so far not made their choice and had not been given the opportunity to do so. Pakistan, he added, had "failed to agree to any reasonable conditions" for a plebiscite for the last seven or eight years, and he did not see any possibility of her "agreeing to any reasonable conditions" at the present time.

Strong feeling was aroused in Pakistan by these statements. Major-General Mirza (then Minister of the Interior, and now Governor-General of Pakistan) described them on July 13 as "tantamount to a repudiation by India of her international commitments," whilst on July 14 a Pakistani Note of protest, asking for an authoritative clarification of Pandit Pant's views, was delivered to the Indian Government. According to unofficial reports, the Note also asked the Indian Government to disavow the statements publicly and to reaffirm unequivocally that India would honour all her commitments in Kashmir, including the agreement to hold a plebiscite. The Indian reply (no details of which were published) was handed to the Pakistani High Commissioner in Delhi on July 29.

Mr. Nehru, the Indian Prime Minister, said in the Indian Parliament on Aug. 22 that political leaders in Pakistan had "objected to an inference that could be drawn from the Home Minister's speech"—namely, that a plebiscite was no longer feasible or necessary. After saying that this inference "was not, according to us, wholly justified," Mr. Nehru recalled that India had made a unilateral declaration at the time of the accession of Kashmir that the people of the State would be consulted, no mention being made of a plebiscite. Two years later the U.N. Commission on Kashmir had adopted a resolution, which had been accepted first by India and later by Pakistan, recommending the holding of a plebiscite, provided that certain conditions were fulfilled. There had since been many discussions on the fulfilment of these conditions, but they had not led to any settlement; meanwhile, there had been developments which "will be taken into consideration."

The new Prime Minister of Pakistan, Chaudhri Mohammad Ali, announced on Sept. 2 that he proposed to call a conference of leaders of all parties, including leaders of *Azad Kashmir*, to work out a "national plan" for the solution of the Kashmir problem. The conference, held in Karachi on Nov. 26-28, was attended by about 100 delegates, including representatives of the Moslem League, the United Front, the Awami League, and minor parties, and also of all the religious communities in Pakistan.

Addressing the conference on Nov. 26, Chaudhri Mohammad Ali said: "The issue is in fact extremely simple. Both India and Pakistan are solemnly pledged that the [Kashmir] question shall be settled through a free and impartial plebiscite. All that remains to be done is to hold this plebiscite. It has not been held because India would not allow it to be held." When partition was agreed upon, he recalled, Lord Mountbatten had advised the rulers of the Indian States that in deciding the question of accession they must pay "due regard to the communal position of their population, the wishes of their peoples, and the geographical location of their States." In Kashmir, although the ruler was a Hindu, 77 per cent of the population were Moslems, and the State's territory was contiguous to Pakistan. Political, economic, strategic, and other considerations all made accession to Pakistan the natural course. The Indian Government, which had fully agreed with Lord Mountbatten's advice, had forcibly occupied the Hindu State of Junagadh when its Moslem ruler acceded to Pakistan, and in the case of Hyderabad had maintained that a State with a Hindu majority must accede to India even if its Moslem ruler did not wish to do so.

"When it came to Kashmir, however," Chaudhri Mohammad Ali continued, "the Indian claim that accession of Indian States must follow the partition pattern, irrespective of the wishes of their respective rulers, was conveniently ignored." The Maharaja's offer of accession to India, he asserted, had been made against the wishes of the population, at a time when "his writ had ceased to be supreme in the major part of the State," and when a standstill agreement which he had signed with Pakistan was still in force. India had nevertheless accepted the offer, and had flown troops into Kashmir. In its reply to the Maharaja, the Indian Government had "categorically said that as soon as law and order was restored in the State the question of the State's accession should be settled by a reference to the people," but this reference had never taken place.

Reviewing the subsequent history of the dispute, Chaudhri Mohammad Ali claimed that Pakistan had been compelled by the advance of the Indian forces "to move a limited number of troops into Kashmir." The agreement between Pakistan and India negotiated by the U.N. Commission on Kashmir had provided for the holding of a plebiscite after the Pakistani forces and the bulk of the Indian forces had been withdrawn, but "Indian intransigence" had prevented any progress to date in the withdrawal of troops The Prime Minister then summarized the unsuccessful attempts at mediation by Sir Owen Dixon and Dr Graham, and the subsequent negotiations between Mr. Nehru and Mr Mohammed Ali, in support of his contention that "the responsibility for preventing the plebiscite from being held is wholly that of India."

Turning to the question of the Kashmir Constituent Assembly, Chaudhri Mohammad Ali recalled India's assurance to the U.N. Security Council that "while the Assembly might express an opinion on the question of accession, it can take no decision on it." The Assembly, he maintained, was completely unrepresentative as all its members had been "nominated at India's behest" and had been returned unopposed at a time when Indian troops were in full control of the State. Even in this Assembly, however, things had not "proceeded according to plan." The Prime Minister of the State, Sheikh Abdullah, had become "disillusioned about India's designs," had been dismissed and imprisoned, and had been replaced by Bakshi Ghulam Mohammed "with the help of the Indian occupation forces" "In due course," he went on, "Bakshi Mohammed fulfilled his part of the bargain. The so-called Constituent Assembly was persuaded to agree to accede to India. This is the true nature of the alleged accession decision which this Assembly rubber-stamped at India's dictation."

Developments inside Indian-occupied Kashmir, the Prime Minister declared, did not "reinforce faith in Indian professions that India means to abide by her international commitments" Alleging that a "reign of terror" prevailed, he pointed out that Sheikh Abdullah had been imprisoned for over two years without trial, and that a number of prominent Kashmiri leaders who had demanded a plebiscite had recently been arrested (see below). Although there were some 90,000 Indian soldiers in the State, or one for every 12 adult males in the Indian-occupied territory, "a strong resistance movement" had nevertheless remained in existence and had been "gaining rapidly in strength."

"All the Kashmiris ask," Chaudhri Mohammad Ali concluded, "is that India should abide by her international commitments and let them decide the question of accession by means of a fair and impartial plebiscite. All that Pakistan wants is that the Kashmiris should freely exercise their choice in respect of accession. India, Pakistan, and the Security Council are committed to it. Let that commitment be fulfilled. It is unfortunate that this dispute should have become a serious potential threat to world peace. We have shown the utmost patience. Every effort to break the deadlock by impartial mediators has been defeated by Indian intransigence. We are prepared to explore and exhaust all other possibilities of a peaceful settlement. I must give warning, however, that as time passes and this dispute remains unresolved, frustration and bitterness will grow among Kashmiris and Pakistanis. It is of the utmost importance that the dispute should be resolved before this frustration and bitterness have so seized the minds of the people that they turn to desperate measures It behoves India and Pakistan, and all the countries interested in the promotion of peace and the welfare of this region, to see that a just settlement of this dispute is reached without further delay."

The conference (whose discussions were held in private) ended with the unanimous adoption of a resolution moved by Mr. Suhrawardy, Leader of the Opposition in the Constituent Assembly, and seconded by Mr. Daultana, Finance Minister in the West Pakistan Cabinet.

The resolution strongly condemned India's "intransigent attitude"; expressed "profound disappointment" at the Security Council's failure to enforce its decisions regarding a plebiscite, and deplored the Security Council's "acquiescence" in "the evasive tactics adopted by India to wriggle out of her international commitments." After declaring that "all efforts which are being made to secure for the people of the State the right to self-determination

should be intensified and integrated on a national basis," the resolution reaffirmed Pakistan's "irrevocable determination" to secure this right for the people of Kashmir "at all costs." It called upon the Government of Pakistan to take "all possible steps to give effect to the national will" and to "arouse the conscience of the world against the grave injustice that is being done to the people of Jammu and Kashmir in depriving them of their right to self-determination." The president of the conference was empowered to set up a committee to advise the Government on the steps to be taken, and it was agreed that similar conferences should be held from time to time to take stock of the situation. A second part of the resolution recommended that the Constituent Assembly should make provision that when the people of Kashmir had decided to accede to Pakistan, the relationship between Pakistan and Kashmir should be determined in accordance with the wishes of the Kashmiri people.

Other developments relating to Kashmir during the past 15 months are described below.

Political Developments in Indian-held Kashmir.

The Working Committee of the Kashmir National Conference (the ruling party) adopted on Nov. 1, 1954, a resolution declaring that "limited accession to India is our final and irrevocable decision," and rejecting the alternatives of accession to Pakistan or complete independence. The resolution denounced the campaign of the *Praja Parishad* in favour of complete merger with India, and accused the *Parishad* of wishing to restore the monarchy and to return the peasants' newly acquired lands to the dispossessed landlords. In reply, the General Council of the *Praja Parishad* adopted a resolution on Nov. 7, 1954, reaffirming its demand for "one flag, one Constitution, and one president for Kashmir and India," and declaring that complete accession to India was "essential to maintain Kashmir's integrity."

The Kashmir Legislative Assembly adopted on Nov. 6, 1954, with only one dissentient vote, a resolution declaring that the State's four representatives in the Indian House of the People, all of whom supported Sheikh Abdullah, had "lost the trust and confidence of this House by having worked against the interests of the State."

The period of detention of Sheikh Abdullah was extended for a further six months on May 5, 1955, and again on Oct. 31, 1955. Ten leading supporters of Sheikh Abdullah were released from detention on Aug. 2, 1955, by order of the High Court, which granted their *habeas corpus* applications; nine of them, however, were rearrested by the Government on the following day, the tenth having gone into hiding.

An Opposition group was formed in the Legislative Assembly for the first time on Oct. 18, 1954, by four members headed by Mr. G. M. Hamdani, a former deputy Minister in Sheikh Abdullah's Government, who had previously resigned from the National Conference. Mr. Mirza Afzal Beg, the former Revenue Minister, who had been arrested with Sheikh Abdullah in August 1953, was released in November 1954 and immediately joined the Opposition group (now numbering eight members), which took the name of the Socialist Democratic Front.

The Budget debates in March 1955 gave rise to heated exchanges between Mr. Beg and Bakshi Ghulam Mohammed, the Prime Minister. **Mr. Beg** demanded on March 6 an independent judicial inquiry into the events of August 1953, when, he alleged, more than 1,000 people had been killed by the police, and accused the Government of having "murdered democracy." He denied that he and Sheikh Abdullah had conspired with foreigners to make Kashmir an independent State, and asserted that there was "an obsession of foreign intrigue" in the minds of Government members.

Bakshi Ghulam Mohammed, who described Mr Beg as Sheikh Abdullah's "evil genius," subsequently stated on March 17 that if he had not been sworn to secrecy, he would have published the correspondence between Sheikh Abdullah and Mr. Nehru to prove that there had been a conspiracy in the State since 1949. Sheikh Abdullah was reported on March 22 to have asked Mr. Nehru to publish the correspondence between them.

A "Plebiscite Front," with Mr. Beg as president and Mr. Hamdani as secretary, was formed on Aug. 10, 1955, by seven members of the Legislative Assembly and a Kashmiri member of the Indian Parliament to campaign for the holding of a free and impartial plebiscite under U.N. auspices, the withdrawal of Indian and Pakistani forces from Kashmir, the restoration of civil liberties, and free elections. A number of other Opposition groups, including the Kashmir Political Conference, the Kashmir Democratic Union, and the Kashmir branch of the Praja Socialist Party, subsequently announced their support for this programme. The Kashmir Government, however, took immediate counter-action, all public meetings and processions being banned in Srinagar on Aug. 23 to prevent clashes between Government and Opposition supporters, and a number of Plebiscite Front spokesmen being arrested for activities prejudicial to the security of the State.

Among those arrested were Mr. A. G. Goni, a member of the Legislative Assembly; Mr. G. M. Beg (a brother of Mr. Mirza Afzal Beg) and Hakim Habibullah, both members of the Legislative Assembly; Mr G. M Karra, a prominent barrister and president of the Kashmir Political Conference; and Mr. Mirza Afzal Beg himself, who was arrested on Nov 19. Pandit Prem Nath Bazaz, president of the Kashmir Democratic Union and a founder-member with Sheikh Abdullah of the National Conference, was arrested on Sept. 8 in New Delhi (where he had lived since 1950) under the Indian Preventive Detention Act. He had been a leading advocate of a free plebiscite in Kashmir.

Political Developments in Azad Kashmir.

Serious unrest was reported to have developed in the Poonch area of *Azad Kashmir* (the Pakistani-controlled territory) in April 1955, and to have been followed by the imposition of martial law and numerous arrests. Although no official details were published in Pakistan, the *Civil and Military Gazette* (Lahore) wrote on July 3 that the situation in *Azad Kashmir* was "very grave indeed," and called for an immediate independent high-level inquiry.

Economic and Social Developments.

Recent economic and social developments in the Indian-controlled and Pakistani-controlled areas of Kashmir are summarized below:

Indian Kashmir. The final draft of the State Government's second Five-Year Plan, for which a sum of Rs. 350,000,000 (£26,500,000) had been sanctioned by the Planning Commission, was published in December 1955 The largest allocations were for irrigation (Rs. 46,000,000), electric power developments (Rs. 35,000,000), education and public health (Rs 30,000,000 each), community projects (Rs. 20,000,000), and agriculture and animal husbandry (Rs. 17,000,000). The setting-up of a State Development Committee under the chairmanship of Bakshi Ghulam Mohammed had been announced in January 1955.

A year earlier (Oct 14, 1954) Bakshi Ghulam Mohammed had announced that work would begin on the extension of the railway from Pathankot (East Punjab) to Lakhimpur, as a first step towards linking Jammu with the Indian railway system, and on the construction of a new tunnel through the Banihal range. He also stated that progress had been made in irrigation schemes which would help to make Kashmir self-sufficient in rice production, and that work had been begun on the construction of a flood control channel 45 miles long between Narwal and the Wular Lake. Under the Government's free education plan 500 new schools had been opened, free board was being provided for students from backward classes, and mobile schools had been established for nomadic tribes

The Banihal tunnel, to which Bakshi Ghulam Mohammed referred, is intended to provide a permanent road link between India and the Kashmir Valley. Unlike the existing tunnel through the Banihal range, which is closed by snow during the winter, the new tunnel will be located at a height where there is no heavy snowfall, when completed it will be the longest in Asia, over a mile in length. It is expected to be finished by the winter of 1956, at a cost of over Rs 30,000,000.

Azad Kashmir. The Pakistani Government announced in September 1954 that it had sanctioned Rs. 2,500,000 for development schemes in Azad Kashmir, and that the Azad Kashmir Development Board had approved schemes costing over Rs. 1,500,000 for agricultural and forest development. A subsequent statement claimed that 500 new primary schools and a number of high schools and colleges had been opened · that the number of students had risen to about 200,000, and that it was planned to convert 389 primary schools into technical schools with modern equipment, and to open about 100 primary schools and two adult education centres every year.

The Nekowal Incident.

It was stated in New Delhi on May 17, 1955, that the U.N. observers who had investigated the Nekowal incident (see 14303 A) had found that a small Indian party had been attacked by a large and well-armed Pakistani border police force; that the attack was premeditated; and that it had taken place on Indian territory.

No statement about the U.N. findings was made in Karachi, but the Pakistani Press maintained that, in accordance with the terms of an agreement reached in 1950 between senior military officers of both sides, Indian soldiers were restricted from entering the Nekowal area and should have given prior notice to the Pakistani authorities if they wanted to enter the area in order to cultivate land. Commenting on these reports, an official spokesman in New Delhi refuted what he called "attempts to belittle and question the findings of the U.N. observers' report and to justify wanton aggression resorted to by the Pakistan police."

As a result of the observers' report, India lodged a compensation claim for 1,200,000 rupees with Pakistan. Mr. Nehru stated on Dec. 3, 1955, however, that Pakistan had so far refused to accept liability, in spite of several approaches, and had declined to accept the facts as stated by the Indian Government.—(Indian and Pakistani High Commissioners' Offices, London - The Statesman, Calcutta - The Hindu, Madras - Times - Manchester Guardian)

(Prev. rep. Kashmir, 14303 A; 13636 A.)

A. UNITED KINGDOM. — Television. - B.B.C. and I.T.A. Developments. - 5,000,000 Television Licences.

Developments in recent months in connexion with the television services of the British Broadcasting Corporation and with commercial television are summarized below.

B.B.C. Services.

Proposed Schools Television Service. The Corporation announced on Nov. 23, 1955, that it proposed to inaugurate an experimental service of school television in the autumn of 1957. The service would consist initially of two or three transmissions weekly for secondary schools, and would probably at first deal mainly with current affairs and science Miss Enid Love, Assistant Head of School Broadcasting (Sound), and a former headmistress of a girls' grammar school, had been appointed head of the new service

Colour Television. A series of experimental transmissions in colour from the Alexandra Palace studios began on Oct. 10, 1955. The B B.C. explained that these transmissions (mainly of still patterns, demonstration colour films, and simple studio shots, designed to provide technical information) were being carried out by agreement with the Television Advisory Committee, which had been asked by the Postmaster-General to report on the whole field of colour television. They should not be regarded, however, as an indication of an early start with colour transmission.

B.B.C. Purchase of Film Studios. The purchase by the B.B.C. for £350,000 of Ealing Film Studios, where many notable films had been produced since the war, was announced on Oct. 19, 1955 The studios will be used by the Corporation as a permanent home for the film department of its television service.

Resignation of Director of Television. It was announced on Nov. 20, 1955, that Sir George Barnes, the Corporation's director of television, would resign with effect from Aug. 31, 1956, in order to take up the appointment of Principal of the University College of North Staffordshire.

Independent Television.

Religious Sunday Programmes. The Independent Television Authority and Associated Television Ltd. announced jointly on Jan 2, 1956, that, beginning on Jan. 8, regular religious programmes or services would be broadcast by the latter company on Sundays at 7 p.m., i.e. within the Sunday "closed period" (see 14472 A). In a separate statement the I.T A. explained that the programme companies operating at the week-ends were anxious to introduce a religious element, although no advertisements would be allowed in connexion with religious features, the companies were finding the money for their production The Central Religious Advisory Committee on Broadcasting had agreed, after careful consideration, that the I T.A. (and the B.B C. if it wished) should be free to put on religious programmes on Sunday evenings. The statement added that with the B.B C.'s concurrence the I T A would draw advice on broad issues from the Central Religious Advisory Committee, but had appointed a sub-committee of three (representing the Anglican, Nonconformist, and Roman Catholic churches) for consultation on day-to-day problems.

Morning Television Programmes. Saturday morning programmes for the London area (provided by Associated Television Ltd.) were discontinued from Dec. 24, 1955, and morning programmes on Mondays to Fridays for the same area (provided by Associated-Rediffusion Ltd.) from Jan 9, 1956.

It was stated in the Press that advertising in the morning had been "negligible" since independent television started, viewer research figures showed that the size of the audiences had never risen above 10 per cent of the potential, and was usually no more than about 4-6 per cent.

Editorial Resignations from Independent Television News Service. It was announced on Jan 13 that Mr. Aidan Crawley (see 14472 A) and Mr. Richard Goold-Adams, respectively editor-in-chief and deputy-editor of Independent Television News, had resigned; Mr. Crawley had, however, agreed to carry on for six months or until his successor was ready to take over. Mr Crawley explained on Jan. 14 that the "main reason" for his resignation was his "conviction that a board composed of representatives of contractors who differ so widely in their outlook towards television is incapable of maintaining a consistent policy towards the news," and that the only way to ensure proper handling of the news was for the Independent Television Authority itself to take over the news company. It was explained in the Press that the resignations of Mr Crawley and Mr. Goold-Adams followed disagreements with the board of Independent Television News about the importance of the television news service and the time and money to be spent on it; during the past few weeks, it was pointed out, the I T.N. bulletin had been cut and relegated to "lean" viewing times.

The Independent Television Authority announced on Jan 17 that it had opened discussions with the programme companies on "how best to organize, in the light of experience, the control and direction of the news company in order to consolidate the successful start that has been made." The statement added "There will be no change in the presentation of the news as an essential part of balanced programmes, or in broad editorial policy."

Ending of "Spot" Advertising. The I.T.A. announced on Jan. 24 that "spot" advertisements—delivered immediately before, after, or during breaks in television programmes by *compères* appearing in the programmes—would in future be disallowed, to avoid the possibility of viewers inferring that the programmes themselves had been supplied or suggested by advertisers It would, however, be prepared to review the matter when the system of advertising control established by the Television Act became better known, and meanwhile programme contractors would be allowed a month's grace to enable current commitments to be met.

Rival Television Audiences.

The B.B.C announced on Dec. 4, 1955, that its audience research department estimated that during the first eight weeks of rival television programmes an average of 56 per cent of people in the London area, who could tune in either to B.B C or I.T.A. programmes, had chosen those provided by the B B.C. The statement added that although it was true that "at certain times a majority of those viewing chose to watch the I.T A programme," more often "the B B C programme was the majority choice" The B.B C. figures were derived from a partial census of a section of the population in certain districts chosen at random.

The B.B C. claim, however was contested by the I T.A., which, in a statement issued on the same day, asserted that figures provided by two independent research agencies (using programme-recording meters attached to several hundred television receivers chosen at random in the London area) gave the I T A. share of possible audiences at "round about 55 per cent" An Associated Television spokesman stated that independent research companies had estimated that 77 per cent of the viewing audience on Sundays preferred the programmes produced by A T.V. to those of the B B C, and that the figure for Saturdays was 71 per cent.

The Post Office announced on Nov. 23, 1955, that the five millionth television licence had been issued in October. The number of "sound only" licences in force at Oct. 31 was given as 9,130,223, including 286,755 licences for sets fitted in cars.—(Times - Daily Telegraph - Manchester Guardian)

(Prev. rep. B.B.C., 14444 A; I.T.A., 14472 A.)

B. NEW ZEALAND. — U.K. Withdrawal from Participation in Wairakei Heavy Water Project.

It was announced in London and Wellington on Jan. 26 that the U.K. Atomic Energy Authority had decided to withdraw from participation in the Wairakei heavy water scheme because the cost of the heavy water plant would be much higher than had been originally estimated.

The statement said that the elimination of the heavy water plant meant that the project now became solely one for electric power development, and that the N.Z. Government would "proceed actively" with this work. The deletion of the heavy water plant would enable about 50 per cent more power to be developed, as the steam which would have been used for heavy water production would now be utilized to drive further turbines Any financial costs incurred on account of the heavy water proposals would be met by the U.K. Atomic Energy Authority, whilst Geothermal Development Ltd. (the joint U.K.-N.Z company formed for undertaking the construction of the factory and the subsequent production of heavy water) would be wound up in due course.

The proposal to develop a heavy water project at Wairakei had first been announced in March 1953. In December, 1953, the U.K. Government had announced its withdrawal from the scheme, but in July 1954 it had reversed its decision and decided to participate.—(Times - Directorate of Information Services, Wellington)**(Prev. rep. Wairakei Scheme, 14072 A.)**

C. NORTH KOREA. — Death Sentence imposed on former Foreign Minister.

The Soviet Tass Agency announced on Dec. 18 that a North Korean military court had passed sentence of death on Pak Hen Yen, a former Foreign Minister of the Korean Democratic Republic (North Korea), after he had been found guilty of "espionage, subversion, murder, and terrorism." Pak Hen Yen had been leader of the South Korean Communists until 1946, when he fled to North Korea.

The Tass Agency quoted reports from Pyongyang alleging that Pak Hen Yen had acted under the orders of General Hodges (the former U S. Commander in South Korea) and the U S Embassy in Seoul, and that he had "worked against the setting up of a patriotic government in South Korea until he was sent to North Korea under General Hodges' instructions" It was also alleged that he had been an American agent since 1921, and subsequently a Japanese agent since 1925; that he had betrayed leaders of the Korean Communist Party to the Japanese authorities; and that, while occupying a leading position in the Communist Party in South Korea, he was in reality "a traitor and *provocateur* endeavouring to disrupt the revolutionary movement from within."

It was stated that Pak Hen Yen had confessed to all the charges brought against him. (New York Herald Tribune)

D. ARAB LEAGUE. — Economic Organization.

It was announced in Cairo on Jan. 26 that the Economic Council of the Arab League had approved the establishment of an inter-Arab organization for economic development, with a capital of £20,000,000 to be financed jointly by member-States in proportion to their contribution to the League's general funds. The Council also approved the formation of a company to exploit minerals in the Dead Sea area, with a capital of £4,000,000 and headquarters in Amman. (Times)

A. YUGOSLAVIA - ETHIOPIA - EGYPT. — President Tito's State Visits to Ethiopia and Egypt. - Discussions with Emperor Haile Selassie and Colonel Nasser. - Criticisms of Baghdad Pact.

President Tito of Yugoslavia left Belgrade on Dec. 1, 1955, for an official visit to Ethiopia and Egypt, accompanied by M. Koca Popovich (State Secretary for Foreign Affairs) and other high-ranking officials. Travelling in the Presidential yacht *Galeb* through the Suez Canal and the Red Sea, President Tito landed at the Eritrean port of Assab on Dec. 10, arriving on Dec. 14 at Addis Ababa after a 600-mile motor journey.

During his stay in the Ethiopian capital President Tito attended a number of official functions, including a State banquet given by the Emperor Haile Selassie. Conversations also took place between the Emperor and the President, as well as between Yugoslav and Ethiopian Ministers.

On Dec. 19 the Emperor and President Tito left Addis Ababa for Asmara, the capital of Eritrea, calling *en route* at a number of towns and visiting historic monuments. The President's visit concluded on Dec. 24, when he left Massawa on board the *Galeb* after having presented the Emperor with a Yugoslav-built yacht. On the same date a joint official communiqué was issued in Addis Ababa on the results of the visit.

The communiqué said that during President Tito's stay in Ethiopia, by which he had returned the Emperor's State visit to Yugoslavia in 1954, the "friendly relations existing between the two countries through their common struggle for the preservation of their independence had found full expression." The conversations between President Tito, the Emperor, and their Ministers had been conducted "in an atmosphere of cordiality and full mutual understanding," and a "broad exchange of views" had taken place "on the international situation, including the situation in the Middle East, as well as on questions directly affecting the relations between the two countries."

"As regards the international situation," the communiqué went on, "there was identity of views in appraising the principal international problems and the most efficacious ways of consolidating general peace and the realization of general prosperity. It was jointly stated that this goal can be accomplished only on the basis of respecting the principles of independence, sovereignty, integrity, and equality of all countries.

"Significance is attached by both sides to free international trade and the broadest international co-operation in the economic field, especially economic and technical assistance for the development of the under-developed countries, without discrimination towards any country or area, primarily by using the appropriate U.N. bodies. . . . A special contribution would be made to such co-operation by an agreement between the great Powers on the limitation of armaments and the utilization of atomic power for peaceful purposes.

"The consistent devotion of the two countries to the principles of the U.N. was noted with satisfaction. Based, in accordance with these principles, on constructive co-operation with the greatest number of countries, regardless of ideological and other differences, the policy of Ethiopia and Yugoslavia offers a significant contribution to the consolidation of peace . . ."

The communiqué noted "with great satisfaction" that Yugoslav-Ethiopian relations were "growing ever closer," and said that it had been agreed "to bring about still greater mutual assistance and *rapprochement* through both existing and new forms of co-operation, especially in the economic and technical spheres." The need for promoting scientific and cultural co-operation was also stressed.

Marshal Tito landed at Suez on Dec. 28 and later the same day arrived in Cairo, where he was met by Colonel Nasser and other Egyptian leaders. This was the second meeting between the two statesmen, following a lengthy talk which they had had on board the *Galeb* in the Suez Canal on Feb. 5, 1955, during Marshal Tito's return from his visit to India and Burma.

It had been announced after the earlier meeting that increasing efforts would be made "to take advantage of the existing close relations between Yugoslavia and Egypt and the possibilities for the further development of these relations," and that President Tito had accepted an invitation from Colonel Nasser to visit Cairo, later in the year.

During his stay in the Egyptian capital President Tito and his collaborators had a number of discussions with Colonel Nasser and Dr. Fawzi (the Egyptian Foreign Minister) on the international situation, including Middle Eastern problems. The Yugoslav visitors also attended a State banquet at the Abdin Palace, visited the Pyramids and other antiquities near Cairo, and spent several days at Luxor and Aswan, in Upper Egypt. After returning to Cairo on Jan. 3 President Tito had further discussions with the Egyptian leaders, sailing on Jan. 6 from Alexandria.

A joint communiqué was issued in Cairo on Jan. 5 saying that President Tito and Colonel Nasser, "continuing the talks they had on Feb. 5, 1955, exchanged views on the international situation, including problems of Southern Europe and the Near East, as well as on the further development and consolidation of relations and co-operation between the two countries. These talks took place in an atmosphere of cordiality and mutual understanding. . . ." The statement continued:

"(1) President Tito and President Nasser noted with satisfaction the identity of their views on the fundamental questions of the present international situation. They consider that during the past years . . . the general danger of war has receded and the general situation has improved. However, the retention of methods from the past and from the time of the acute 'cold war' results in periodical tension in different areas, which necessarily impedes the general tendency towards a relaxation of tension. It is the view of the two heads of State that a solution of world problems should be approached in new constructive ways. Among these is, in the first place, the problem of accelerating the process of strengthening the independence of countries which have recently achieved sovereignty, as well as the process of giving sovereignty to those nations which are still dependent, and the process of economic development of under-developed countries.

"The two heads of State consider that . . . these problems should be solved in conformity with the U.N. Charter on the basis of full equality and non-interference in the internal affairs of other countries. Every effort in this direction would lead to the relaxation of tension and, at the same time would expand the basis for negotiation and agreement as the only methods of solving existing conflicts. The policy of non-alignment, to which both countries remain consistently devoted, becomes even more significant in this connexion.

"Both Presidents wish to reiterate that the policy which they have adopted . . . is not a passive but a positive, active, and constructive policy seeking to lead to world-wide collective security.

They also agree that a policy of military blocs and pacts inevitably results in a suicidal armaments race, causes misunderstanding among nations, and heightens tension in the world. They expressed their conviction that peace can be consolidated by co-operation in all fields on the basis of the independence and full equality of all nations. The decisions adopted at the Afro-Asian conference at Bandung in April, 1955, gave expression to these principles and are directed towards aims in which both Egypt and Yugoslavia believe, and for the achievement of which they are steadfastly working, in accordance with the letter and spirit of the U.N. Charter."

(2) After noting "with particular satisfaction" the "fruitful co-operation" of both countries in the U.N., the statement welcomed the recent decision of the U.N. General Assembly to admit 16 countries to membership (see 14637 A). It also welcomed the efforts of the U.N. to reach agreement on disarmament, and noted with satisfaction "the progress made within the U.N. towards the organized utilization of nuclear energy for peaceful purposes and for the well-being of all nations."

As regards Egyptian-Yugoslav relations, President Tito and Colonel Nasser declared that they had "noted with satisfaction that these relations have become ever closer and firmer during the past years, and that they are inspired by a spirit of sincere friendship. . . . The fundamental elements for the creation of close ties of friendship and mutual understanding arise principally from the fact that both peoples are firmly resolved to defend their hard-won freedom and independence, that they are confronted by similar problems regarding their internal development and progress, and that they hold identical views on the fundamental questions of foreign policy and economic co-operation.

"The two Presidents are firmly resolved to continue developing the relations between their countries in the political, economic, cultural, and other fields, based on mutual respect, joint interests, and permanent non-interference in each other's internal affairs. It has been established that there are broad possibilities for the development of mutual beneficial co-operation, and it was decided to make further efforts towards strengthening trade and economic co-operation. Agreement was also reached on the strengthening of cultural ties. The usefulness of further mutual exchanges of views in order to examine joint problems and to strengthen their relations was specially emphasized."

M. Popovich told a press conference on the same date that there was no question of Yugoslav mediation in the Israeli-Arab conflict, and "even less question" of intervention on the part of President Tito.

Before leaving Egypt, President Tito gave a press interview on Jan. 6 in which he strongly criticized the Baghdad Pact. Replying to a remark that this pact had been referred to as "the northern wall of defence in the Middle East," President Tito said that in his view the pact did not "represent a wall against anyone," nor did he think that it served the interests of the countries of that part of the world because it "disunites them."

President Tito arrived back in Belgrade on Jan. 12.

Addressing the crowds which welcomed him in Belgrade, President Tito referred to statements in foreign newspapers to the effect that in his remarks on Jan. 6 he had attacked the Baghdad Pact "for the first time," and that his statement was "a blow to Yugoslavia's allies" [i.e., Turkey, a member both of the Balkan Pact and the Baghdad Pact]. He declared in this connexion: "This is not the first time that I have criticized the Baghdad Pact. I have now been myself to the countries concerned, and I have seen that this pact is causing concern to these people and that I was right when I said that I considered it an element of disunity rather than of unification in the Middle East. The pact carries new elements of unrest and creates new hotbeds of possible conflicts. It could not be an efficient means of defence as far as military effectiveness is concerned, as these peoples were unable to create any large military forces before and cannot do so now. I consider that as the peoples, if left to

themselves, do not want any such arrangements or pacts, these should not be imposed on them by force. If one wants to help certain nations and gain their sympathies, this could be better achieved by giving them economic assistance and helping them to raise themselves out of their under-developed conditions . . . Until recently there existed two basic hotbeds—the Far East and Europe—but now there is this third dangerous hotbed which could bring a catastrophe upon mankind."

Speaking of the Egyptian arms purchases from Czechoslovakia, President Tito gave it as his view that Egypt was not arming for purposes of revenge. "The Egyptians," he said, "wish to preserve peace, and consider that they have the right to purchase arms where they can . . . because in this way they will strengthen their independence. We believe that Egypt is a mature nation, that her leaders are intelligent, and that no danger threatens from her re-arming."

After appealing for "unselfish aid" for the under-developed countries as the best means of winning their sympathies," rather than arming them in order to create blocs," President Tito said that both in Ethiopia and Egypt he had found a similar outlook to his own. These countries had different systems from Yugoslavia, but he had seen that such differences "do not in the least hinder co-operation between countries and peoples provided they have sincere feelings towards each other, have no intention of interfering in the internal affairs of others, and wish to co-operate on an equal footing and to help each other. These visits, as well as my visits to India and Burma last year, prove that there exist in the world conditions for taking a new path—the path of mutual understanding and the settlement of problems in a peaceful way, without the need to speak from 'positions of strength,' without the need for sabre-rattling, and without the need for an arms race. The peoples we visited want peace as much as the peoples of Yugoslavia. . . ."

In a statement on Jan. 10 on his arrival at Pula (Pola), President Tito had said that all the Arab peoples looked upon Yugoslavia "as an example of how they should develop quite freely, without discrimination from any side, to govern themselves."—(Tanjug Agency, Belgrade - Times - Manchester Guardian - Le Monde, Paris) **(Prev. rep. President Tito, Visits to India and Burma, 14040 A; Emperor Haile Selassie's Visit to Yugoslavia, 14026 D.)**

A. GUATEMALA.—Election of Constituent Assembly. - New Constitution. - President Castillo Armas confirmed in Office. - Abortive Coup d'Etat. - General Elections. - Ex-President Arbenz Guzman granted Asylum in Czechoslovakia.

Following the overthrow of the pro-Communist regime of President Arbenz Guzman in July 1954, and the assumption of power by an army *junta* headed by Colonel Castillo Armas (who was subsequently elected President), elections were held on Oct. 10, 1954, for a Constituent Assembly to draw up a new constitution. Political parties as such remained banned, and the election resulted in an overwhelming victory for the Government's National Anti-Communist Front, which won 63 out of the 66 seats.

At the same time a plebiscite was held on an "open ballot" system to decide whether or not Colonel Castillo Armas should remain as President, the electors being required to appear in person before the polling committees and answer publicly "yes" or "no" to the question: "Do you wish Colonel Castillo Armas to continue as President of the Republic for a period to be fixed by the National Assembly?" The plebiscite resulted in an overwhelming majority for Colonel Castillo Armas, who received 485,693 votes against only 400 cast against him. The Constituent Assembly subsequently proposed that he should be proclaimed constitutional President for a five-year term, and on Nov. 6, 1954, Colonel Castillo Armas was accordingly installed as President of Guatemala until March 15, 1960.

During 1955 a draft Constitution was drawn up by a 17-member committee of the Constituent Assembly. The Assembly debated the draft in the latter half of 1955, approving on Dec. 30 the final version of the new Constitution, which will come into force on March 1, 1956.

The principal new provisions of the Constitution, as compared with the previous (1945) constitution, included the following:

(1) The functioning of Communist or totalitarian parties was forbidden, and any Communist activity, whether individual or in a group, was made a criminal offence

(2) For the first time since 1871, when the Roman Catholic Church was disestablished in Guatemala, religious organizations were granted juridical status, the right to own or dispose of property, and the right to teach religion in public schools The existing ban against ministers of religion participating in politics was, however, continued.

Elections were held on Dec. 18, 1955, for a new unicameral Congress of 66 members, to take office on March 1, 1956. They resulted in an overwhelming victory for one of the pro-Administration groups, which campaigned under the name of the National Electoral Alliance and won all the 66 seats. Another pro-Government group contested the elections under the name of the "National Anti-Communist Front," comprising the traditional "liberal" or anti-clerical elements in Guatemalan politics; it failed, however, to secure any seats. Voting was extremely low, amounting to no more than 25 per cent in some areas.

The Opposition groups boycotted the elections on the ground that the electoral procedure had been unfairly weighted against them. In particular, they argued that the election had been held at too early a date, giving them no time to organize a campaign; that the constitutional provision requiring a party to produce the signatures of 5,000 members before it could be registered was designed to intimidate people and dissuade them from joining opposition groups; and that the provision making the ballot secret for literate voters but public for illiterate voters (who comprise a majority of the electorate) implied that pressure would be brought to bear upon the latter.

Other developments in Guatemala during the past 15 months are summarized below:

Abortive Coup d'Etat. An attempted *coup d'état* took place on Jan. 20, 1955, when civilian and military rebels unsuccessfully tried to occupy the military base of La Aurora, outside the capital. A Government communiqué said that the plot was Communist-inspired and had been led by Colonel Francisco Cosenza, formerly Chief of the Air Staff and Ambassador to Italy under President Arbenz Guzman. Over 400 persons were arrested and it was later announced that 11 had been brought to trial, of whom nine had been released and two, after being sentenced to death, had had their sentences commuted to 20 years' imprisonment. Colonel Francisco Cosenza himself fled to El Salvador, but, after having been asked to leave that country, sought permission to enter Costa Rica. Colonel Elfego Monzon, one of the original members of the military *junta* which took control in Guatemala when President Arbenz was overthrown, was alleged to have been implicated in the plot, he was arrested and flown out of the country, a Presidential spokesman stating that he had been "assigned to a South American diplomatic post"

Confiscation of Property of Former Government's Supporters. Following the expiry of the period of grace granted in September 1954 to officials of President Arbenz's Government for furnishing proof that their properties had been acquired honestly, a commission was appointed in April 1955 to confiscate those properties which had not been satisfactorily accounted for. This commission subsequently recommended the confiscation of the properties of 38 people who had not contested the proceedings.

New Foreign Minister. Señor Ricardo Quinonez was appointed Foreign Minister on Jan 7, 1956, in succession to Señor Domingo Goicolea. The latter had succeeded Señor Carlos Salazar on Jan. 10, 1955.

Ex-President Arbenz Guzman, who had fled from Guatemala to Mexico, subsequently went to Switzerland and from there to Czechoslovakia, where he stated on Nov. 25, 1955, that he intended to make his home in Prague for an indefinite period. Two other former Communist leaders in Guatemala, Señor Carlos Manuel Pellicer and Señor Ricardo Raul de Leon, had earlier left Argentina (where they had been given asylum) for Czechoslovakia. Colonel Jaime Rosenberg and Colonel Rogelio Cruz Wer, the former chiefs of the Guatemalan secret police, were released by the Mexican authorities on May 24, 1955, after the Guatemalan Government had lost an action for their extradition on charges of mass murder.—(Bank of London and South America, Fortnightly Review - New York Times - New York Herald Tribune - Le Monde, Paris - Times) **(Prev. rep. Guatemala, 13826 A.)**

B. UNITED KINGDOM. — War Damage Payments.

The War Damage Commission announced on Jan. 17 that it had paid out £27,250,000 during 1955, compared with £32,000,000 in 1954 and £38,000,000 in 1953.

The Commission made 21,000 "cost of works" payments for repairs during the year, and 6,700 payments on account or as instalments. The amount involved was £22,500,000, of which about £5,000,000 was for the repair and rebuilding of houses. The report said that as most of the war damage claims of owners of houses and small businesses had been met, and it was possible for public bodies to proceed with large rebuilding projects, the War Damage Commission were making payments for the repair or rebuilding of many substantial and well-known buildings.

So far the War Damage Commission has paid out £1,174,000,000 in 4,678,000 separate payments. The peak year for payments was 1947, since when the annual amounts paid have steadily declined.—(Times) **(Prev. rep. 13373 F.)**

C. JAPAN. — New Ambassador in Washington.

A Tokio announcement of Jan. 22 stated that the Japanese Cabinet had approved the appointment of Mr. Masayuki Tani, adviser to Mr. Shigemitsu (the Foreign Minister), as Ambassador to the United States in place of Mr. Sadao Iguchi, retiring. Mr. Tani, a former Ambassador to China, was Foreign Minister in General Tojo's Cabinet, and became principal adviser to Mr. Shigemitsu when the first Hatoyama Cabinet was formed. (New York Herald Tribune) **(Prev. rep. 13571 A.)**

A. UNITED KINGDOM. — Coal Production in 1955. - Loss of 2,000,000 Tons. - Figures for Fourth Quarter of 1955. - Mr. Bowman appointed Chairman of N.C.B.

Final revised figures published by the Ministry of Fuel and Power on Jan. 11, 1956, gave the total output of saleable coal in 1955 as 221,563,200 tons (210,192,800 tons deep-mined, 11,370,400 tons opencast), compared with 223,619,800 tons (213,561,300 tons deep-mined, 10,058,500 tons opencast) in 1954. The loss of over 2,000,000 tons, as compared with 1954 production, was thus more than accounted for by the fall in the output of deep-mined coal.

Only two divisions—the Northern and the East Midlands—increased their output, provisional tonnage figures for the divisions being as follows (1954 figures in parentheses). Scottish, 22,036,200 (22,577,200); Northern, 13,486,800 (13,478,900), Durham, 25,586,700 (25,914,000); North-Eastern, 43,805,800 (45,615,700), North-Western, 15,623,400 (15,646,100): East Midlands, 46,071,500 (45,570,400); West Midlands, 17,746,900 (18,038,700), South-Western, 24,223,600 (25,058,900); South-Eastern, 1,526,300 (1,661,400).

The following table shows the average weekly rates of coal production and consumption, and of manpower, output, and absenteeism in the fourth quarter of 1955:

	Saleable Mined Coal Produced Tons	Plus Opencast Tons	Total Production Tons	Inland Consumption Tons	Overseas Shipments & Bunkers Tons
October ..	4,354,975	267,575	4,622,550	4,055,750	314,500
November	4,433,325	235,375	4,668,700	4,382,250	318,000
December	4,098,380	180,040	4,278,420	4,667,200	309,000

	Wage-earners on colliery books Total	at coal-face	No. of shifts worked per wage-earner	Output per manshift at coal-face Tons	overall Tons	Percentage of absenteeism
October ..	699,200	287,300	4.96	3.333	1.251	12.91
November	699,150	287,325	5.03	3.345	1.260	12.27
December	699,860	287,320	4.70	3.110	1.236	12.12

Other recent developments in connexion with the coal industry are summarized below:

N.C.B. Quarterly Report. The Board's accounts for the third quarter of 1955, published on Dec. 13, showed that profits on collieries, opencast mines, and ancillary undertakings totalled £2,362,452, of which opencast mining accounted for about £1,900,000. After charging about £5,250,000 for interest and about £2,000,000 for losses on imported coal, there was an estimated deficit of £4,970,582, compared with one of £19,189,054 in the second quarter. The Board explained that the loss on imported coal would have been much higher but for the arrangement made in July under which a charge of 3s. 2d had been added to the price of all coal, both home-produced and imported, to offset losses on coal bought abroad. This levy had produced £6,537,966 in the quarter, and without it the loss on imported coal would have amounted to about £8,500,000.

Cut in Coal Imports. It was announced on Dec. 7 that Britain had agreed to forego temporarily 100,000 tons of coal imports contracted to be delivered by European Coal and Steel Community countries during the first quarter of 1956. It was stated in the Press that in the first nine months of 1955 British coal imports had been running at an annual rate of nearly 5,000,000 tons. Recently, however, the rate had been lower, and the agreement to forego deliveries temporarily had been made possible by the fact that British coal stocks were higher than had been anticipated.

Mining Accidents. Provisional figures published on Jan. 15, 1956, by the Ministry of Fuel and Power gave the numbers killed and injured in pit accidents in 1955 as 423 and 1,899 respectively, compared with 371 killed and 1,855 injured in 1954.

N.C.B. Staff Appointment. The N.C.B. announced on Nov. 7 the appointment of Mr. J. H. Mitchell, an assistant secretary in the Ministry of Labour and National Service, to the new post of Deputy Director-General (Manpower and Training) in the industrial relations department at national headquarters. The establishment of an industrial relations department had been recommended in the Fleck Committee's report (see 14115 A).

New Part-time Members of N.C.B. It was announced on Dec. 31, 1955, that the Minister of Fuel and Power had appointed the following as part-time members of the N.C.B.—Mr. S. P. Chambers, a deputy-chairman of Imperial Chemical Industries Ltd., Mr. J Crawford, general president, National Union of Boot and Shoe Operatives; Mr W. L. Heywood, general secretary, National Union of Dyers, Bleachers, and Textile Workers; and Sir Henry Wilson, deputy-chairman, Powell Duffryn Ltd. The appointments (which took effect immediately and will be for three years) were made to fill the places on the Board previously held by Lord Heyworth and Mr J. H. Hambro (who had resigned in February, 1955) and by Mr. Gavin Martin and Alderman William Bayliss (whose appointments had expired).

The Minister of Fuel and Power (Mr. Aubrey Jones) announced on Jan. 17 that he had appointed Mr. James Bowman, the vice-chairman of the National Coal Board, to succeed Sir Hubert Houldsworth as chairman of the Board when Sir Hubert's term of office expired on July 31, 1956. Mr. J. Latham [who had been a full-time member of the Board since February 1955, and was formerly its Director-General of Finance] would succeed Mr. Bowman as vice-chairman. Mr. Bowman (57), a former vice-president of the National Union of Mineworkers, is the son of a blacksmith and entered the mines as a pitboy at the age of 15.—(Times - Daily Telegraph - Manchester Guardian - Financial Times)

B. NORTHERN IRELAND. — Parliamentary Disqualifications for "Offices of Profit" Reasons. - Sir Norman Stronge resigns as Speaker of N.I. House of Commons. - Election of New Speaker.

In a statement to the Senate at Stormont on Jan. 17, the Prime Minister of Northern Ireland (Lord Brookeborough) announced that the Speaker of the N.I. House of Commons (Sir Norman Stronge), two other members of the House of Commons, and a member of the Senate, might be disqualified from parliamentary membership by reason of holding "offices of profit" under the Crown. He added that Sir Norman Stronge had already tendered his resignation as Speaker.

In addition to Sir Norman Stronge (Unionist M.P for Mid-Armagh, and Speaker of the N.I. House of Commons since 1945), the other members of the N.I. House of Commons affected were Sir William McCleery, Unionist M.P. for North Antrim and a former Minister of Commerce, and Dr Eileen Hickey, Independent M.P. for Queen's University. The Senator involved was Lieut-Colonel H S. C. Richardson (Unionist).

Lord Brookeborough explained that a recent investigation by the Ministry of Finance had shown that the above-mentioned members were technically disqualified for the following reasons (1) Senator Richardson, by reason of holding an "office of profit" in virtue of his membership of the Enniskillen Disablement Advisory Committee, established under the Disabled Persons (Employment) Act (Northern Ireland), 1945; Sir Norman Stronge, by reason of holding the office of chairman of the Central Advisory Council on Disabled Persons, established under the same Act; Sir William McCleery, by having held the office of assessor under the Reinstatement in Civil Employment Act, 1944, and Dr. Eileen Hickey, on the ground of her membership of the Belfast Advisory Committee of the National Assistance Board under the National Assistance Act (N.I.), 1948. Lord Brookeborough pointed out that "in no case has the person involved either sought or received any payment in respect of the public service so rendered."

The Leader of the Senate (Lieut.-Colonel A. R. G. Gordon) explained that both the N.I. Senate and House of Commons, under the Government of Ireland Act, 1920, had "the powers, privileges and immunities of the House of Commons at Westminster," which meant that each House could consider the position of any of its members who might appear to be subject to disqualification. He added:

"Since the Westminster law 'for the time being in force' applies here, the Parliament of Northern Ireland has no power to legislate on the subject of disqualification, and consequently cannot pass any indemnifying or validation Acts on this subject. Thus, both the substance of the law and the remedy to be applied in any particular case are matters within the purview of the Parliament of the United Kingdom In any consideration of the respective functions of the two Parliaments in parliamentary disqualification, due regard must be paid to this separation of powers"

Select Committees of both Houses were subsequently set up to consider the position of the members liable to disqualification, and to report thereon. All the committee members were Unionists, the Nationalists having declined invitations to serve on the committees.

Mr. William F. McCoy, Q.C., Unionist M.P. for South Tyrone, was elected Speaker of the Northern Ireland House of Commons on Jan. 25 in succession to Sir Norman Stronge. (Belfast Telegraph - Northern Whig, Belfast)

(Prev. rep. U. K. Parliament, 14381 A.)

C. IRAQ. — The Tigris Barrage.

A large barrage across the River Tigris at Samarra (the former capital of the Abbasid caliphs, and about 75 miles north of Baghdad) was completed in November last. One of the biggest engineering projects ever carried out in Iraq, it diverts the Tigris into an artificially-controlled channel and will thereby relieve Baghdad of the threat of frequent and disastrous floods, such as had occurred on many occasions in the past. In future the floodwaters, instead of sweeping down to Baghdad, will be diverted at the barrage into a depression—the Wadi Thartar—where they will be allowed to collect, losing volume by evaporation; it is eventually intended to utilize the diverted waters for irrigation purposes. The barrage was built by the Iraq Development Board, which engaged German constructors and British consulting engineers. Over 3,000 Iraqi workers were employed on the construction of the barrage. (Times)

A. UNITED STATES. — President Eisenhower's Reply to M. Khrushchov. - Defence of Christmas Messages to East European Countries. - U.S. Declaration on Soviet Economic Penetration of Asia and Middle East. - Controversy over Mr. Dulles' " Brink of War " Statement.

With the approval of President Eisenhower and the Secretary of State, Mr. Dulles, the following statement was issued on Dec. 30 by the President's Press Secretary in reply to M. Khrushchov's criticisms of the Christmas messages sent by the President and Mr. Dulles to the peoples of Eastern Europe (see 14654 A ; 14607 B):

" Mr. Khrushchov is reported to have said [in his speech to the Supreme Soviet on Dec. 29] that the Christmas messages of President Eisenhower and Secretary of State Dulles to the peoples of Europe in no way accord with the spirit of Geneva. It was made abundantly clear at Geneva to the Soviet rulers that the ' spirit of Geneva ' could not and did not involve any relaxing of the peaceful purpose of the United States to achieve liberty and justice for the oppressed peoples of the world.

" In his opening statement at Geneva, President Eisenhower said : ' There is the problem of respecting the right of peoples to choose the form of government under which they will live, and of restoring sovereign rights and self-government to those who have been deprived of them. The American people feel strongly that certain peoples of Eastern Europe, many with a long and proud record of national existence, have not yet been given the benefit of this pledge of our U.N. wartime declaration, reinforced by other wartime agreements '

" In his radio-television report to the American people immediately following the Geneva conference, President Eisenhower said . ' The Secretary of State and I specifically brought up, more than once, American convictions, American beliefs, and American concern about such questions as the satellites of Eastern Europe and the activities of international Communism. We made crystal clear what were American beliefs about such matters as these '

" The peaceful liberation of the captive peoples has been, is, and, until success is achieved, will continue to be a major goal of U S. foreign policy."

On Jan. 11 Mr. Dulles released the text of a statement issued by all the members of the U.S. delegation to the United Nations, but not hitherto made public, calling upon the American people to " wake up to the implications " of Soviet economic penetration in the Asian and Middle Eastern countries. Mr. Dulles explained that the statement was fully endorsed by the President and himself, and that it had been decided to make it public in order to draw attention to the long-term aspects of the President's State of the Union message (14633 A).

After saying that the U S. delegation at the U N. was " impelled by a unanimous feeling that economic and social questions are assuming increasing importance in the international scene," the statement continued : " The present period in history may one day be recognized as a major turning-point in the struggle between Communism and freedom. It appears to be clearly a shift in the cold war, in which economic and social problems have moved to the forefront.

" Members of the U.S. delegation during this General Assembly session have observed the effectiveness of Soviet tactics under these new conditions. This can be seen both in the way the Soviet-bloc delegates work in various U N meetings, and also in the voting that occurs in many committees. As we observed these manoeuvres, we were conscious that the Soviet Union elsewhere in the world was using economic and social collaboration as a means for jumping military as well as political barriers. Examples of this can be found in India, Egypt, and Burma.

" We believe that the United States must counter these Soviet efforts. We can succeed, not by outbidding Communism in sheer amounts of economic aid, but by making newly independent and newly articulate peoples feel that they can best satisfy their wants by becoming and remaining part of the community of free nations. We welcome more emphasis on economic and educational endeavours, for we have a proven experience in these fields.

" We are in a contest in the field of economic development of under-developed countries which is bitterly competitive. Defeat in this contest could be as disastrous as defeat in an armaments race We could lose this economic contest unless the country as a whole wakes up to all its implications."

An interview with the Secretary of State was published on the same day (Jan. 11) in the magazine *Life*, which quoted Mr. Dulles as saying that the United States had " walked to the brink of war " on three occasions during 1953 and 1954. Mr. Dulles was credited with having said that the U.S. Administration had averted war in Korea, Indo-China, and the Formosa Straits by the deterrent effect of its warnings that any Communist aggression in those areas would be met by superior forces, including the use of nuclear weapons.

According to the article published in *Life*, the first threat of war had arisen in June 1953, when it appeared that the Chinese Communists might break off the Panmunjom negotiations for the ending of hostilities in Korea. The situation became particularly acute on June 18, 1953, when President Syngman Rhee released all North Korean prisoners and gave the Chinese Communists the opportunity of breaking off truce negotiations and evading the issue of prisoner-of-war repatriation. The Communists had not walked out of the conference, however, because Mr. Dulles, in an earlier talk with Mr. Nehru (the Indian Prime Minister), had made it clear that if Communist China broke off the negotiations the U S A would not only renew the Korean war but would extend it by air bombardment of Manchuria and the use of atomic weapons

The second threat, according to the *Life* article, came in April 1954, when there were urgent French requests for U.S. intervention in Indo-China at the time of the Dien Bien Phu battle Mr. Dulles was quoted as saying that he and President Eisenhower had urged a link-up of the U S A., France, Britain, and friendly Asian States in an effort to check Communist guerrilla warfare in Indo-China , that two U S aircraft-carriers, the *Boxer* and *Philippine Sea*, had moved into the South China Sea, carrying tactical air groups and atomic weapons , and that a warning had been given that Chinese Communist intervention in Indo-China would be followed by U S. retaliatory action against assembly-points in South China. Although Britain and France had refused to agree to this plan, the U.S reaction had helped to bolster up the French position at the first Geneva conference on Indo-China and had saved Vietnam, Laos, and Cambodia from what seemed to be certain loss to the Communists. Moreover, the U.S. " policy of boldness " had made it clear to the Soviet Union and Communist China that the U S A was " prepared to act to prevent the fall of South-East Asia "

The third threat of war had arisen in the autumn of 1954, when an invasion of Formosa by the Chinese Communists appeared imminent. The magazine quoted Mr. Dulles as saying that it was a " pretty fair inference " that war had been averted by the deterrent effects of the Congressional resolution authorizing President Eisenhower to use U S. forces in the event of a Communist attack on Formosa.

The State Department spokesman (Mr. Lincoln White) stated on Jan. 13 that Mr. Dulles had read the *Life* article and " feels that the statements specifically attributed to him do not require correction from the standpoint of their substance."

Mr. Dulles made the following statement at a news conference on Jan. 17 :

" An article in *Life* magazine has attracted much comment Let me say this I did not write the article, I did not review or censor the article, and, in fact, I did not read the article until after it was released for publication. Having read it, I authorized our Press Officer to say that the statements specifically attributed to me did not require correction from the standpoint of their substance Most of the statements specifically attributed to me are quotations or close paraphrases of what I had already said elsewhere. . .

" I believe that the U S A should adopt every honourable course to avoid engagement in war Indeed, I have devoted my whole life to the pursuit of a just and durable peace. I believe, however, that there are basic moral values and vital interests for which we stand, and that the surest way to avoid war is to let it be known in advance that we are prepared to defend these principles, if need be by life itself

" This policy of seeking to prevent war by preventing miscalculation by a potential aggressor is not a personal or a partisan policy ; it is a national policy It is expressed in mutual security treaties which we now have with 42 nations and which the U S Senate has overwhelmingly approved. It is expressed in Public Law 4, whereby the Congress, by an almost unanimous bipartisan vote, authorized the President to use the armed forces of the U S A. if he deemed it necessary for the protection of Formosa and the Pescadores

" This policy of making clear our position in advance, of course, involves risks As Senator Vandenberg said about the North Atlantic Treaty, it is a calculated risk for peace. But as we have learned by hard experience, failure to make our position known in advance makes war more likely because then an aggressor may miscalculate The policy of deterrence is only one aspect of the task of maintaining a just and durable peace. It is necessary to be patient, to be conciliatory. . . . My views with respect to peace have been made known on many occasions, and there is no reason to think that they have altered because articles dealing with complex subjects of foreign policy inevitably tend to oversimplification and special emphasis."

In answer to a question, Mr Dulles said that there was " no substantive information [in the *Life* article] which has not been generally a matter of public knowledge and found in the Press "

The statement attributed to Mr. Dulles in *Life* magazine was strongly criticized by leading members of the Democratic Party, including Mr. Adlai Stevenson.

Mr Stevenson said that " Secretary of State Dulles has told us that three times during the last three years he led the American people to the brink of war, with the President's approval , and boasts that such dangerous risks are a diplomatic ' art '—to quote his words —of which he claims mastery . . Sabre-rattling, threats of atomic war, and disregard of our allies will not reduce tensions, make friends, or inspire confidence in the United States , also, they tend to confirm the propaganda that America is a greater danger to peace than Russia. Instead of torturing history, demeaning our friends, hurling threats, and brandishing weapons, the Administration would serve us and the cause of peace better if it exerted our military and moral force with positive determination to end the hydrogen race and to rid the world of this ghastly menace."

At his press conference on Jan. 19 (the first since Aug. 4, 1955) President Eisenhower defended Mr. Dulles as a man devoted to the defence of peace, and described him as " the best Secretary of State I have ever known." The President declined to be drawn into the " brink of war " controversay or to discuss the *Life* article.—(New York Times - New York Herald Tribune)

A. GERMANY. — Berlin. - East German Restrictions on Road Traffic from Western Germany. - Heavy Increase in Charges. - Temporary Detention of U.S. Congressmen in East Berlin. - Soviet and East German Statements on Status of Berlin. - Western Protests.

Note exchanges on the question of access to Berlin by the Western Powers took place in October 1955 between the Soviet Union on the one hand and the U.S.A., Britain, and France on the other, following the Soviet-East German agreement of Sept. 20 (see 14451 A) under which the U.S.S.R. transferred to the East German Government the control of traffic, other than military traffic, between Western Germany and Berlin. Britain, France, and the U.S.A., in identical Notes on Oct. 3, claimed that the Soviet Government had no right to hand over to the East German authorities obligations which it had assumed under four-Power agreements, and maintained that the laws, orders, and directives of the four-Power Allied Control Council could not be annulled without their consent. In its reply (Oct. 18) the Soviet Government affirmed, however, that the agreement of Sept. 20 had "taken into account the obligations which both sides bear under the existing international agreements dealing with Germany as a whole," and insisted that, apart from military traffic, the East German Government "exerts jurisdiction over the territory under its sovereignty."

This exchange of Notes followed certain measures taken several months earlier by the East German authorities placing restrictions on traffic along the *Autobahn* linking Berlin with Western Germany. Western protests to the Soviet authorities against these restrictions had persistently evoked the response that the matter was solely the concern of the East German Government, and not of the Soviet Union.

The dispute originated on March 30, 1955 (less than a week after the ratification of the Paris agreements by Western Germany), when the East German Government announced without any previous warning that the dues levied on West German motor vehicles using the *Autobahn* would be increased as from April 1 by amounts varying between 100 and 1,000 per cent, ostensibly on the ground that increased traffic and wear-and-tear had led to higher road-repair and maintenance costs.

The West German Bundestag unanimously adopted a resolution on March 31 denouncing this step, which, it said, might endanger supplies to West Berlin and constituted a violation of the 1951 agreement The resolution also requested the Federal Government to demand the cancellation of the increase in the *Autobahn* dues, both through the intermediary of the Western High Commissioners and in the current direct interzonal trade negotiations between Eastern and Western Germany, and meanwhile to provide financial support to cover the cost of the higher charges

The U S., British, and French High Commissioners in Germany presented Notes to the Soviet High Commissioner (M. Pushkin) on April 1 describing the increased dues as "disproportionate" and as a violation of the 1949 agreements which had ended the Soviet blockade of Berlin, and requesting the Soviet authorities to urge the East German Government to cancel the measure. No reply, however, was received from M. Pushkin. The official East German newspaper *Neues Deutschland* claimed that the fixing of road tolls in interzonal travel was "an internal affair of the German Democratic Republic" It was subsequently admitted in the East German Press that the decision to raise the charges had been influenced by the West German ratification of the London and Paris agreements.

On April 14 it was reported that the German Federal Government had broken off the interzonal trade discussions with Eastern Germany and had set aside a special subsidy to cover the cost of the higher toll charges; the West Berlin City Government voted a similar subsidy.

The Western High Commissioners sent further Notes to M. Pushkin on April 15 reiterating that the higher charges were exorbitant and politically inspired, and asking him to meet them to discuss the matter. In his reply (April 30) M. Pushkin agreed to a meeting, but emphasized that the matter fell within the competence of the East German Government and could only be settled in direct negotiations between the East and West German Governments He supported the East German Government's contention that the higher tolls were justified because large sums were being spent by the East German authorities on roads and bridges which were used by Western German and by West Berlin traffic.

Meanwhile, further impediments to the flow of traffic between Western Germany and West Berlin had been introduced by the East German authorities. They included such measures as the detailed inspection of lorry-loads, and their confiscation for any slight irregularity, the lengthy checking of papers and the detention of lorries and loads for any infringements; and the fining of drivers for alleged speeding along the *Autobahn*. Herr Otto Nuschke, the East German Deputy Premier, stated on April 24 that these measures would not have been initiated if official recognition had been granted by the Western Powers to the East German Government, and gave a warning that "greater inconveniences" would be imposed if recognition continued to be withheld.

The three Western High Commissioners (who, with the West German ratification of the Paris Agreements, had been accredited as Ambassadors to the Federal Republic on May 5) met M. Pushkin on May 20 to discuss the question of the increased tolls. M Pushkin, however, reiterated that the matter was entirely within the competence of the East German Government, and the meeting consequently broke down without any agreement being reached.

Nevertheless, as a result of representations by the West German Ministry of Communications to the East German Ministry of Transport, the East German Government announced on June 4 that the traffic dues would be reduced from June 10 by amounts ranging from 15 per cent for heavy lorries and trailers to 50 per cent for passenger cars, motor cycles, buses, and light lorries The announcement said that the relaxation had been made "in the interests of the German people" and had been prompted by "the desire to contribute in every field to *rapprochement* between the Democratic and Federal Republics"

The question of the status of Berlin again became the subject of controversy at the end of November, 1955, following the arrest of two U.S. Congressmen during a visit to East Berlin on Nov. 27, and their detention by East German "people's police" for several hours. The two members of Congress, Mr. Edward P. Boland (Dem.) and Mr. Harold C. Ostertag (Rep.), together with Mrs. Ostertag and a U.S. Army officer, were arrested by "people's police" on the grounds that the U.S. Army vehicle in which they were travelling was equipped with a radio telephone, in contravention of an East German law forbidding foreigners to own or operate a radio in a vehicle. (A U.S. spokesman in Berlin pointed out that it had been standard practice for years, and well known to the Soviet authorities, for U S. Army vehicles travelling in East Berlin to be equipped with radio telephones for use in emergency.)

When the U.S. Commandant in Berlin (General Dasher) protested to the Soviet Commandant (General Dibrova) on Nov. 29 about the action of the East German police, General Dibrova (as subsequently quoted by General Dasher) replied that Eastern Germany was "a sovereign State recognized by the Soviet Union," and that "East Berlin is its capital and is not an occupied sector of this city." General Dasher, after stating that he considered this incident as "by far the most serious" of those in recent years, declared that he expected the Soviet authorities to take "immediate measures" to prevent any repetition; that he had no intention of altering the practice of maintaining radio transmitters in U.S. vehicles entering East Berlin; and that he would not tolerate "any further molesting of U.S. personnel by members of the 'people's police.'"

The U.S. Ambassador (Dr. Conant) visited Berlin on Dec. 2 and reaffirmed in a press statement that Britain, France, and the U.S.A. intended to remain in West Berlin until the reunification of Germany and would "continue to hold the Russians responsible for the proper treatment of Allied persons from their sector." During his stay he visited East Berlin, travelling in a U.S. car equipped with a radio-telephone and displaying the American flag, without interference by the East German authorities.

The three Western Ambassadors in Bonn delivered Notes to M. Pushkin on Dec. 1 protesting against the action of the East German police and against General Dibrova's interpretation of the status of East Berlin. These protests were subsequently rejected by M. Pushkin.

The U.S. Note, after referring to the "unwarranted detention" of a U S. military vehicle and its occupants, repeated the protest made by General Dasher against "interference with the freedom of Allied circulation in Berlin and the grossly discourteous and threatening conduct displayed towards U.S citizens by persons acting under Soviet authority and control" All three Notes added, in identical terms. "... General Dibrova's assertions are wholly inconsistent with the quadripartite status of Berlin. The position of my Government as regards the status of Berlin, and its attitude to the so-called German Democratic Republic, are well known to you . ."

M. Pushkin reiterated in his reply (Dec. 14) that it was a violation of East German laws to drive a car with an unregistered radio transmitter in East Berlin, and that the matter fell "fully and completely" within the jurisdiction of the East German people's police. He again stated that, in accordance with the Soviet-East German treaty of Sept. 20, 1955, "the German Democratic Republic exercises full and complete jurisdiction on its territory, and regulates the corresponding questions which arise from its relations with the German Federal Republic, as well as from its relations with other States"

On Dec. 4 it was disclosed that the Soviet authorities in Eastern Germany had refused to register West German and West Berlin barges for interzonal trade on the ground that the issue of permits now fell within the competence of the East German Ministry of Transport. A British Foreign Office spokesman stated on Dec. 6, however, that British officials in Germany (who had been responsible for canal traffic since 1945 because the canals lead to what was formerly the British zone of occupation) had waived their right to

countersign permits for barges using the East German canals and rivers. This action, it was stated, had been taken in October after the Soviet officials had transferred to Eastern Germany their authority to approve such permits, but it had been agreed to beforehand by the U.S., French, and West German authorities, and the Chief Burgomaster of West Berlin (Dr. Suhr) had also been informed. The British authorities had emphasized at the time that they considered the new arrangements to be only a question of administrative convenience, and that they could in no way be regarded as affecting the obligations of the four occupying Powers to ensure the normal functioning of water transport in Germany.

The East German Government announced on Dec. 9 that the "people's police" had taken over from Soviet troops the control of the State borders of Eastern Germany and East Berlin, in accordance with the Soviet-East German treaty. (Der Tagesspiegel, Berlin - Frankfurter Allgemeine Zeitung - Times - New York Times - Le Monde, Paris) **(Prev. rep. Agreements on Germany, 14451 A; 14169 A; Berlin Blockade, 10539 C; 9971 A.)**

A. UNITED KINGDOM. — Ending of Restrictions on Short-Term Borrowings by Local Authorities in Money Market. - Higher Interest Rates on Local Authority Loans.

The Treasury announced on Jan. 6 that, after full discussion with representatives of the Association of Local Authorities of Great Britain, the Government had agreed, on an experimental basis, to allow local authorities to borrow outside the Public Loans Board without the prescription of any minimum period. It relied on those authorities, however, to keep their borrowings within prudent limits; although it was hoped to make the removal of the embargo permanent, it might nevertheless have to be reimposed if the volume of short-term borrowings became excessive.

It was explained in the Press that the rule forbidding local authorities to raise loans on mortgage for periods of less than seven years (with certain exceptions) had been introduced in 1943 to prevent the building-up of short-term debts which might prove embarrassing when the war ended. The restriction had not proved onerous while local authorities could borrow all the money they needed from the Public Loans Board, but now that the Treasury required them to raise money from the Board only in the last resort (as explained by the Chancellor of the Exchequer in his autumn Budget speech) it was reasonable that they should have full freedom to raise funds in the mortgage market.

From Jan. 13 interest rates on loans advanced to local authorities from the Local Loans Fund were increased as follows: under 5 years, from 4½ to 5½ per cent; 5-15 years, from 5 to 5⅝ per cent; over 15 years, from 5 to 5¼ per cent. The Treasury explained that the new rates had been fixed on the principle enunciated by the Chancellor in October—i.e. they had for the first time been based on "the credit of local authorities of good standing in the market for loans of comparable periods." (Financial Times) **(Prev. rep. Autumn Budget, 14500 A; Local Authority Loans, 14436 B; Municipal Loans, 6617 A; Local Authorities Loan Act, 7094 C.)**

B. FINLAND. — Reoccupation of Porkkala.

The former Soviet base at Porkkala, ten miles from Helsinki, was formally returned to Finland on Jan. 26, when Finnish troops entered the area and hoisted the Finnish flag after all Soviet forces had been withdrawn. A protocol for the formal transfer of Porkkala to Finland was signed in Helsinki on the same day by M. Kekkonen, the Prime Minister of Finland, and M. Pervukhin, a First Deputy Premier in the Soviet Cabinet. Most military installations had previously been destroyed by the Soviet authorities.—(Times - Soviet Weekly) **(14512 E.)**

C. PAKISTAN. — National Economic Council.

The Pakistani Prime Minister, Chaudhri Mohammad Ali, set up a National Economic Council on Jan. 5 to review the overall economic situation in Pakistan; to formulate financial, commercial, and economic policies for consideration by the Central and Provincial Governments; and to ensure that uniform standards were attained in the economic development of all parts of the country.

(Pakistan High Commissioner's Office, London)

D. JORDAN. — Parliament to remain in Session.

King Hussein issued a decree on Jan. 18 inviting the Jordanian Parliament, whose dissolution had been declared unconstitutional, to continue to remain in session. The King had dissolved the Chamber of Deputies after the riots against Jordan's proposed adherence to the Baghdad Pact.
(Daily Telegraph) **(Prev. rep. 14646 A.)**

E. WESTERN GERMANY. — Federal Cabinet. - Dr. Adenauer's Refusal to accept Resignations of former Refugee Party Ministers. - Death of Dr. Tillmans.

It was announced in Bonn on Jan. 12 that Dr. Adenauer had finally declined to accept the proffered resignation from the Federal Government of Herr Waldemar Kraft and Professor Theodor Oberländer, following their resignation from the Refugee Party in July last.

In his reply to the two Ministers, Dr. Adenauer pointed out (*a*) that, according to Article 64 of the Basic Law, Federal Ministers were to be appointed and dismissed by the Federal President on the proposal of the Federal Chancellor, (*b*) that the latter, subject to his parliamentary responsibility, was free in the choice of his collaborators in the Government; and (*c*) that this also applied if the Government was based on a coalition. In consequence, the members of the Government were not dependent on the confidence of the parties which had nominated them. It was therefore for the Federal Chancellor, in the event of differences between a Minister and his party, to decide on his own responsibility towards Parliament as a whole whether or not the Minister in question should remain in or leave the Government.

The Chancellor's decision was strongly criticized by the Social Democrats, the Free Democrats, and the Refugee Party. These parties maintained that his decision meant a disregard for the basic rules of parliamentary democracy by retaining Ministers who had severed their connexion with the party that had nominated them, and by determining the Government's composition at his own discretion.

Dr. Robert Tillmans, Minister without portfolio in the Federal Government, died on Nov. 12, 1955, aged 59. Dr. Tillmans, a councillor in the former Prussian Ministry of Cults and Education, was dismissed from that post by the Hitler regime. After the war he became secretary-general in the social welfare department of the Evangelical Church, and was one of the original founders of the Christian Democratic Party, of whom he became a vice-president after the death of Dr. Ehlers. (Frankfurter Allgemeine Zeitung - Die Welt, Hamburg)

F. TIBET. — Continuance of Monastic Rule.

During an official visit to Nepal with a mission from Lhasa, the Governor of the Tibetan frontier province of Kutyaye (Dola Chitung) told a Press Trust of India correspondent on Jan. 14 that Mao Tse-tung (the head of the Chinese People's Republic) had given Tibet the "statutory right" to continue monastic rule in her internal affairs, and had also assured the Dalai Lama that he would continue to enjoy a unique position in Tibetan life. In addition, the Dalai Lama had been assured that Tibet would continue to enjoy full provincial autonomy and unrestricted religious freedom.

Dhola Chitung stated that these assurances had been given to the Dalai Lama by Mao Tse-tung in the presence of Mr. Nehru, during the latter's visit to Peking in 1954. He also said that Chinese troops in Tibet had been ordered to refrain from interfering in Tibetan political affairs, and to regard the Dalai Lama not only as the supreme head in all matters of general administration, justice, and religion, but as Supreme Commander of the armed forces in Tibet. In reply to questions, Dhola Chitung explained that there were no Chinese troops as such in Tibet; that the armed forces there consisted entirely of Tibetan soldiers; but that they were organized as an integral part of the Chinese Army.—(The Hindu, Madras)
(Prev. rep. Tibet, 14128 A.)

G. UNITED KINGDOM. — New Peerages.

The following titles were taken by the recipients of peerages in the Government reorganization of Dec. 20, 1955, and in the New Year Honours:

The four former Ministers on whom viscounties were conferred on Dec. 20 took the following titles: Mr. Harry Crookshank, formerly Lord Privy Seal and Leader of the House of Commons—Viscount Crookshank; Mr. Osbert Peake, formerly Minister of Pensions and National Insurance—Viscount Ingleby; Lord De L'Isle and Dudley, V.C., formerly Secretary of State for Air—Viscount De L'Isle; Mr. J. P. L. Thomas, formerly First Lord of the Admiralty—Viscount Cilcennin. Mr. Henry Hopkinson (the former Minister of State for Colonial Affairs), on whom a barony was conferred, took the title of Lord Colyton.

The three recipients of baronies in the New Year Honours took the following titles: Colonel J. J. Astor, chairman of The Times Publishing Company—Lord Astor of Hever, Sir Raymond Evershed, Master of the Rolls—Lord Evershed; Sir Frederick Godber, chairman of the Shell Transport and Trading Co Ltd.—Lord Godber.

Viscount Woolton, who received an earldom on relinquishing the post of Chancellor of the Duchy of Lancaster, took the title of the Earl of Woolton.—(Times - Daily Telegraph)

JANUARY 28—FEBRUARY 4, 1956

A. SOVIET UNION - UNITED STATES. — Marshal Bulganin's Letter to President Eisenhower. - Proposal for U.S.-Soviet Treaty of Friendship and Co-operation. - President Eisenhower's Reply.

It was announced in Washington on Jan. 25 that M. Zarubin, the Soviet Ambassador, had delivered to President Eisenhower a personal letter from Marshal Bulganin, the Soviet Prime Minister. A White House statement said that "intermittently since the Geneva conference the President and Premier Bulganin have been exchanging correspondence," and that the letter handed over by the Soviet Ambassador was "friendly" and contained "certain ideas which the Premier asked the President to study further in the interests of promoting world peace."

After considering Marshal Bulganin's letter, President Eisenhower and Mr. Dulles drafted on Jan. 28 the President's reply, which was presented in Moscow by the U.S. Ambassador (Mr. Charles Bohlen) on Jan. 29. The text of both letters was released in Washington and is given below.

Marshal Bulganin to President Eisenhower.

"In the firm conviction that you share my concern over the present state of the relations between our countries, I should like to impart to you my ideas regarding possible means of improving those relations.

"You, I am sure, agree with me that the present international situation requires all States, particularly the great Powers which bear special responsibility for assuring world-wide peace and the security of nations, to take measures that may help further to lessen international tension, and to strengthen confidence and co-operation between States This would conform to the ardent desire of the peoples to live in peace and tranquillity and to devote their material resources and energy to creative, constructive work, cultural advancement, and prosperity.

"At the Geneva Conference of the Heads of Government of the four Powers, all of us declared our readiness to strive to lessen international tension and improve relations between States in accordance with the principles of peaceful co-existence and economic co-operation There is no doubt that in any future lessening of international tension the question of relations between the Soviet Union and the United States has special significance. This raises the problem of the necessity for taking steps to improve substantially the relations between the U S.S R. and the U.S.A. Such improvement of Soviet-American relations would be a genuine contribution towards ameliorating the entire international situation and maintaining and consolidating world peace

"The history of the relations between our countries convincingly shows that their friendly co-operation, based on a striving for mutual understanding, mutual respect for sovereignty, and joint struggle against the forces of aggression, conforms to the highest interests of the peoples of both countries It is certainly not by accident that, with the exception of the period of foreign intervention against the young Soviet Republic, the peoples of our States have never fought each other , that between them there have never been, and are not now, any irreconcilable differences, nor any frontiers or territories that might become an object of dispute or conflict. . . .

"That is why the Soviet people received with complete understanding the statement you made at Geneva in which you pointed out : 'The American people want to be friends with the Soviet people There are no natural differences between our peoples or our nations There are no territorial conflicts or commercial rivalries. Historically, our two countries have always been at peace' History itself has affirmed that the co-operation between the U S.S.R and the U S A was based not on chance or transient motives, but on vital and long-term interests This was vividly expressed in the fact that our countries were allies in two World Wars.

"You, as one of the outstanding military leaders of the anti-Hitler coalition, are particularly well aware that the co-operation between the Soviet Union and the United States in the Second World War played a most important part in the rout of the common enemy—the fascist aggressors Cemented with the blood of the best sons of the peoples of both countries, their military alliance, in which Britain, France, China, Poland, Yugoslavia, Czechoslovakia, Norway, Greece, and other freedom-loving countries also took part, withstood with honour all the trials of the war imposed upon our peoples by the forces of aggression in the West and East.

"It is highly regrettable that in the post-war period the relations of friendship and co-operation between the U S.S.R. and the U S.A. should have worsened. The impairment of relations between the Soviet Union and the United States, whatever the reasons may be, is contrary to the interests of both the Soviet and the American peoples, and adversely affects the entire international situation.

"I am sure that you, like myself, are convinced that the differences between the social structures of the U.S.A. and the U.S.S.R should not prevent our countries from maintaining the political, economic, and cultural relations in which our peoples are interested. . . . Soviet-American relations developed greatly in the years preceding the Second World War, particularly in the economic field. In the course of the war relations between our countries underwent a new development which enjoyed wide support from the peoples of our countries, and strengthened mutual sympathies between them. This hastened the end of the war and lessened the sacrifices of the peoples.

"It is, of course, impossible not to take account of the fact that during the period of the 'cold war' serious disagreements have arisen with regard to various international problems connected with disarmament, the assurance of security in Europe, and the German question, together with certain problems of the Far East, and the importance of these problems is recognized.

"At the Geneva Conference of Foreign Ministers of the four Powers, notwithstanding the narrowing of the gap between the positions of the parties on individual items of the agenda, substantial differences were revealed, and further time and efforts will be required to achieve the necessary agreement for the solution of the above-mentioned problems However, the continuation of the existing situation in Soviet-American relations cannot promote a settlement of outstanding international problems At the same time an improvement in Soviet-American relations . . . could create a new international atmosphere favouring a settlement of disputed questions through negotiations on a mutually acceptable basis . . .

"I believe that you, Mr President, will agree that under existing conditions international tension is fraught with the possibility of breaking the peace, with nations reaping all the dangerous consequences thereof. Moreover, it is well known to everyone that the newest implements of war, such as atomic and hydrogen weapons, jet and rocket techniques, and other weapons of mass destruction, place the peoples of all countries in an equally dangerous situation in the event of international peace being disturbed, and threaten to subject their territories, and, above all, densely populated areas of highly developed countries, to the devastating effects of atomic war. More than ever before, it is the duty of all States today to concern themselves with the maintenance and strengthening of peace and with the settlement of international disputes exclusively by peaceful means, in conformity with the aims and principles of the U.N. Organization.

"There can be no doubt that the peoples of the Soviet Union and the U.S A are equally interested in putting an end to the armaments race, which forces them to waste their strength and resources for unproductive purposes. The present arms drive not only places a heavy burden of military expenditure on the shoulders of the peoples . . . but also greatly increases the danger of another war An improvement in Soviet-American relations would facilitate the ending of the armaments race and would contribute to the fuller utilization of economic resources in the interests of peace. Resources that are now being directed towards unproductive military expenditure could then be used to improve the material well-being of the peoples; to reduce taxes, raise real wages, carry out housing construction and public works, and help under-developed countries, in the interests of peace and of strengthening international co-operation. . .

"It must be conceded that the recent period has witnessed developments, the positive significance of which has influenced the entire international situation. The past year was a year without war in any part of the world. In this recent period, several complex international problems which remained unresolved after the Second World War were settled. A meeting of the Heads of Government of the four Powers took place, in Geneva, for the first time since the war, and the results we achieved at that meeting were sincerely and enthusiastically welcomed by the peoples of the whole world, as being in line with their hopes and aspirations.

"Contacts between countries of the East and the West have improved visibly in this period—and, in particular, the relations between the Soviet Union and the U S A , although these relations are still far from what one could consider broad and adequate . . . These growing contacts have shown how great is the desire of the peoples of our countries to develop contacts and friendly co-operation. In all these important international developments, in which the Soviet Union has defended the interests of peace and friendship among the nations, the results attained were ensured very substantially by co-operation between our two countries.

"I am sincerely convinced that an improvement in Soviet-American relations is urgently needed. In my opinion, this aim would be helped by the conclusion of a treaty of friendship and co-operation between our two countries. Such a treaty could provide for the development and strengthening of friendly relations between the peoples of the U.S.S R. and the U S.A. in a spirit of sincere co-operation and mutual understanding, based on the principles of equality, mutual respect for sovereignty, and non-interference in one another's domestic affairs, and for the settlement of all their international disputes by peaceful means in conformity with the U.N. Charter It could also provide for the development and strengthening of economic, cultural and scientific co-operation between the U.S.S.R. and the U.S.A. on the basis of mutual advantage and equality

"My colleagues and I believe that the conclusion of such a treaty between the Soviet Union and the United States would be an important contribution to the development of Soviet-American relations and, at the same time, would be an act of great international significance.

"I firmly believe that you will receive favourably the proposal to conclude a treaty of friendship and co-operation between the U.S.S.R. and the U.S A. . . . and that you will find a positive response from the Soviet and American peoples, and also from the peoples of other countries. . . . I hope to receive at an early date your views on the matters I have raised."

Appended to Marshal Bulganin's letter was the text of a proposed 20-year treaty between the two countries, the provisions of which were as follows:

Draft Treaty of Friendship and Co-operation between the U.S.S.R. and the U.S.A.

"**Art. 1.** The contracting parties will develop and strengthen, in a spirit of sincere co-operation and mutual understanding, friendly relations between the peoples of the Soviet Union and the United States of America on the basis of equal rights, mutual respect for State sovereignty, and non-interference in internal affairs.

Art. 2. The contracting parties agree, in conformity with the U.N. Charter, to settle all their international disputes by peaceful means only.

Art. 3. The contracting parties will promote the development and strengthening of economic, cultural, and scientific co-operation between the two States on the basis of mutual benefit and equal rights. To implement this Article, appropriate agreements may be concluded between the contracting parties.

Art. 4. The treaty is subject to ratification; shall come into force on the exchange of instruments of ratification, and shall remain valid for 20 years from its entry into force At the end of this period each of the contracting parties may terminate it Such notice of termination shall come into force one year after it has been given."

President Eisenhower to Marshal Bulganin.

"I wish to thank you for your letter of Jan 23 . . . I have given it careful thought.

"Let me say at the outset that I do indeed believe that the present international situation requires all States, particularly the great Powers, to seek to lessen international tension and strengthen international confidence and co-operation As the power of destruction grows, it becomes imperative not merely to strive to control and limit that power, but also to do away with antagonisms which could tempt men to use that power.

"That view, I can assure you, is held by the people of the United States and by their political leaders, without any exception whatsoever I am confident that it is also shared by all the peoples of the world, and that those who have been entrusted with political authority have a high duty to respond to the universal longing of the peoples for peace

"As you are good enough to recall, I have more than once alluded to the immensely valuable asset we have in the historic friendship between our peoples I profoundly believe that upon that foundation better political relations could be established.

"I can assure you, Mr Chairman, that there is in the whole world no people more sincerely dedicated to building a structure of peace than the American people Our whole nation longs for a cessation of the strains and dangers now present in the international situation There is indeed no honourable thing that we would not do if we were convinced that it would promote a just peace in the world.

"It is from this viewpoint that I have examined your present suggestion that the cause of peace would now be served by the conclusion between our countries of a treaty of friendship and co-operation of 20 years' duration.

"I first observe that our countries are already bound to each other by a solemn treaty—the Charter of the United Nations. The treaty which you now propose would consist of three substantive Articles I observe also that each one of these is already covered by the explicit provisions in the U.N. treaty between us.

"The first Article of your draft would bind our two countries to develop friendly relations between our peoples on the basis of equal rights, mutual respect, and non-interference in internal affairs. As members of the United Nations, we are already bound through that Organization 'to develop friendly relations among nations based on respect for the principle of equal rights and self-determination of peoples.'

"The second Article of your proposed treaty would bind us to settle our international disputes by peaceful means alone. This is an undertaking to which our two countries are already bound by the provisions of Article 2 (3) of the U.N. Charter, which specifies that 'all members shall settle their international disputes by peaceful means.'

"The third Article would bind us to the strengthening of economic, cultural, and scientific co-operation Chapter IX of the U.N. Charter, dealing with 'international economic and social co-operation,' pledges us to work for 'solutions of international economic, social, health, and related problems,' and to 'international cultural and educational co-operation.'

"The U.N. Charter constitutes a solemn treaty not only between your country and our own—it is a treaty among many countries, all of whom are bound to us and to each other, and all of whom are concerned with world peace The American people sincerely desire to help make a reality of these Charter goals.

"But the present state of international tension was not prevented by the words of the Charter How can we hope that the present situation would be cured merely by repeating those words in a bilateral form? I wonder whether again going through a treaty-making procedure, and this time on a bilateral basis only, might indeed work against the cause of peace by creating the illusion that a stroke of a pen had achieved a result which in fact can be obtained only by a change of spirit

"Friendly collaboration between States depends not solely upon treaty promises but upon the spirit that animates the Governments of the States concerned, and upon actual performance. It was in the hope of promoting such a spirit and such performance that I went to Geneva last July, a course which had no peace-time precedent in American history. Despite the doubts of many that the mission would, in fact, serve any useful purpose, I felt that the existing situation was so serious that no chance for improvement, however slight, ought to be neglected. In Geneva you expressed similar views and aspirations.

"I had earnestly hoped that out of that meeting with you, and with the Heads of Government of France and the United Kingdom, would come a bettering of international relations, especially as between the four nations represented, and in relation to particular problems for which our four nations had a particular responsibility. Unhappily, the American people have had sadly to conclude that the events following our meeting have not given substance to their hope.

"Permit me to recall to your mind a short record of recent events

"At Geneva we directed our Foreign Ministers to propose effective means for the solution of three specific problems

"The first of these problems was that of European security and Germany. We explicitly agreed that the settlement of the German question and the reunification of Germany by means of free elections should be carried out in conformity with the national interests of the German people and the interests of European security However, despite constructive proposals by the three Western Powers for German reunification and European security, your Government felt that it could not at this time entertain any proposal dealing with the reunification of Germany by means of free elections.

"The second problem was that of disarmament. In our discussion of that problem I made my 'open skies' proposal in the hope that we might actually do something to convince the world that we had no aggressive purposes against each other But this proposal your Government rejected at the Foreign Ministers' meeting

"The third problem was the development of contacts between East and West The Western Ministers proposed many concrete measures to bring about closer relations and better understanding, none of which was accepted by your Government Despite that fact, there has, as you point out, recently been some improvement in contacts between the Soviet Union and the United States

"A further deterioration has taken place because to us it has seemed that your Government had, in various areas of the world, embarked upon a course which increases tensions by intensifying hatreds and animosities implicit in historic international disputes. I share your conviction that an improvement in Soviet-American relations is urgently needed But, frankly, our people find it difficult to reconcile what appears to us to be the purposes of your Government in these areas with your present words—words which so rightly emphasize the special responsibility of our Governments to lessen international tension and strengthen confidence and co-operation between States

"I deal with the history of this past year solely for the purpose of enabling us with better prospect of success to chart our future This nation holds out the hand of friendship to all who would grasp it in sincerity. I have often said, and I now repeat, that there is nothing I would not do to promote peace with justice for the world But we know that it is deeds and not words alone which count

"Consider, Mr. Chairman, what a vast change would be effected, not only in our relations but throughout the entire world, if there were prompt measures to reunify Germany in freedom within the framework of security, if there were carried out our wartime pledge to respect the right of peoples to choose the form of government under which they will live; if there were arranged such mutual openings of our countries to inspection that the possibilities of surprise attack would vanish, and if reductions of armament were made practical, with the release of productive power for the betterment of mankind Consider, also, the mountain of distrust and misunderstanding that would disappear if our peoples freely exchanged news, information, visits, and ideas

"These are all matters which you and I have discussed together at Geneva. They are results to which my nation remains dedicated, and towards which we are prepared at any moment to move in a spirit of conciliation May I hope, from your letter, that you, too, are dedicated to these great ends?

"I shall look forward to receiving a further expression of your views."

Sir Anthony Eden, to whom details of both letters had been cabled while he was travelling to New York on board the liner *Queen Mary*, said on his arrival on Jan. 30 that he thought the President's reply to Marshal Bulganin's letter was "admirable." (Soviet Weekly - New York Times - New York Herald Tribune)

(Prev. rep. Geneva "Summit" Conference, 14325 A; Foreign Ministers' Conference, 14537 A.)

A. LIBERIA. — Soviet Offer of Technical Aid.

A Soviet delegation which visited Monrovia to attend the third inauguration of President Tubman of Liberia had discussions with the President on Jan. 6. A spokesman of the Soviet Foreign Ministry stated on the following day that the U.S.S.R. was ready to give Liberia technical aid, if desired, thus confirming press reports from Monrovia that this matter, together with a proposal for an exchange of diplomatic representatives, had been discussed with President Tubman.

M. Volkhov, chairman of the Council of the Union and leader of the Soviet delegation to Monrovia, stated in Moscow on Feb. 1 that whilst no actual negotiations on trade or technical assistance had taken place with Liberia, the Soviet Union believed that the establishment of normal diplomatic relations would provide the opportunity to reach agreement on other forms of contact, including trade, technical co-operation, and cultural relations.

(Times - New York Times - Le Monde, Paris)

A. UNITED NATIONS. — Tenth Session of General Assembly. - Proceedings and Decisions.

The 10th session of the U.N. General Assembly, which had opened in New York on Sept. 20, 1955 (see 14461 A), ended on Dec. 20 after the Assembly had completed an agenda covering some 60 items. The principal subjects discussed and decisions taken during the 10th session—apart from the admission of 16 new member-countries (see 14637 A)—are summarized below under cross-headings.

Elections to Security Council.

Australia and Cuba were elected on Oct. 14 to succeed New Zealand and Brazil as non-permanent members of the Security Council for two-year terms as from Jan. 1, 1956. Both countries were elected on a first ballot with the required two-thirds majority, Cuba receiving 53 votes and Australia 42, with 34 votes cast for Poland, 33 for the Philippines, two each for Indonesia and Siam, and one each for South Africa and Yugoslavia.

An unprecedented situation arose, however, from the fact that no country obtained the necessary two-thirds majority to fill the non-permanent seat on the Security Council vacated by Turkey. After a two-months' deadlock during which 35 inconclusive ballots were held at a number of plenary sessions, Yugoslavia was eventually elected to the vacant seat on the 36th ballot, held on Dec. 20. (The Assembly's session was to have ended on Dec. 18, but was extended by the President of the Assembly, Señor José Maza, who had insisted that the deadlock must be resolved and that the Security Council should start the year 1956 with its full complement of 11 members.)

Before the final ballot, however, the two contenders for the vacant seat—Yugoslavia and the Philippines—had agreed to a compromise arrangement, suggested by Señor Maza, whereby the successful candidate would sit on the Security Council for only one year, whilst the unsuccessful candidate would sit for the second year.

Prior to the first ballot on Oct. 14, the candidatures of Poland and the Philippines had been put forward for the seat vacated by Turkey, Poland being supported by the U.S.S.R. and the Philippines by the United States. The Soviet delegation complained that U.S. support for the Philippines was a violation of the "gentlemen's agreement"—reached in 1946 at the Assembly's first session in London—whereby the six non-permanent seats on the Security Council were to be filled by two Latin American countries and one each from the British Commonwealth, Western Europe, Eastern Europe, and the Middle East. (The seat vacated by Turkey was that allocated under the "gentlemen's agreement" to Eastern Europe.) The U.S. delegation, however, maintained that the "gentlemen's agreement" was a commitment for the first Assembly session only, that it was no longer binding, and that, on the basis of equitable geographical representation, another country from the Far East should be represented on the Security Council.

After the election of Cuba and Australia, five inconclusive ballots—the first three of which were "restricted" and the fourth and fifth "unrestricted"—were held for the third vacancy, i.e., the seat vacated by Turkey. [Under the Assembly's rules of procedure, the first three ballots in such a case are restricted to the two countries next in order after the successful candidates on the first ballot—that is, in the case before the Assembly, they were restricted to Poland and the Philippines. The fourth and subsequent ballots are unrestricted—that is, the delegates may vote for any country they wish.]

Neither Poland nor the Philippines obtained a two-thirds majority on the three "restricted" ballots, the Polish vote varying from 35 to 38 and the Philippine vote from 20 to 23. On the fourth (unrestricted) ballot the Philippines received 30 votes, Yugoslavia 25, and Poland and Yemen one each, while on the fifth ballot the Philippines received 29 votes and Yugoslavia 28. In view of the deadlock, the Assembly agreed, at the suggestion of Sir Pierson Dixon (U.K.), to postpone further voting until Oct. 19.

Further inconclusive ballots were held on Oct. 19, Oct. 27, Nov. 8, and Dec. 6, by which date 29 ballots had been taken without either Yugoslavia or the Philippines receiving the necessary majority for election. After the balloting on Dec. 6, Señor Maza warned the Assembly of the "serious judicial repercussions" which would arise if the deadlock continued and if the Security Council did not have its complement of 11 members in the coming year. After calling upon the delegates to "co-operate actively" in solving this problem, he warned them that he was prepared to convene "a plenary session which will not adjourn until the vacant seat has been filled and the Security Council is in a position to perform its vital role."

Six more ballots were held on Dec. 16, in which ten of the newly-elected member countries took part. The *impasse* nevertheless continued, neither Yugoslavia nor the Philippines obtaining a two-thirds majority, and a few individual votes being cast for Sweden, Spain, Italy, Bulgaria, and Finland. Before the 35th ballot, Señor Maza suggested a compromise solution—to which, he said, both Yugoslavia and the Philippines had agreed—whereby the two countries would divide the two-year term between them, each sitting on the Security Council for one year. He then allowed himself to be blindfolded and drew lots to determine which of the two countries should sit for the first year, the name of Yugoslavia being drawn first. The Assembly refused, however, to accept this "lottery" procedure and went on to one more inconclusive ballot. Señor Maza thereupon released Yugoslavia and the Philippines from their undertaking, declared that "the Assembly will remain in session until a result is achieved," and extended the session until Dec. 20 for this purpose.

The deadlock was ended on the latter date, when Yugoslavia obtained the necessary majority on the 36th ballot. The voting was 43 for Yugoslavia, 11 for the Philippines, and one vote each for Finland and Sweden, 13 countries abstained and one vote was invalid. It was understood, however, that Yugoslavia would sit on the Security Council for only one year, in accordance with the undertaking previously given to the President of the Assembly.

The membership of the Security Council on Jan. 1, 1956, was therefore as follows: Australia (until Jan. 1, 1958), Belgium (until Jan. 1, 1957), China (permanent), Cuba (until Jan. 1, 1958), France (permanent), Persia (until Jan. 1, 1957), Peru (until Jan. 1, 1957), Soviet Union (permanent), United Kingdom (permanent), United States (permanent), and Yugoslavia (until Jan. 1, 1957, under the above-mentioned agreement).

International Atomic Energy Agency.

The Assembly unanimously approved on Dec. 3 an 18-Power resolution for the creation of an International Atomic Energy Agency, the early establishment of which had been unanimously recommended at the Assembly's ninth session after the "atoms-for-peace" debate (see page 13994).

The resolution had originally been introduced in the Political Committee on Oct. 6 by the U.S.A. and Britain, but was subsequently amended to take account of the views expressed by a number of other countries—notably by India, whose delegate (Mr. Krishna Menon) took a prominent part in the debate. The following co-sponsors of the resolution were added during the Political Committee's discussions: Argentina, Australia, Belgium, Brazil, Canada, Denmark, Iceland, Israel, Luxemburg, Mexico, the Netherlands, Norway, Peru, Sweden, South Africa, and Turkey.

After protracted debate, the resolution in its final form was endorsed by the Political Committee on Oct. 27 by 53 votes to nil, the six Arab countries abstaining because Israel was among the sponsors. It was divided into two parts, dealing with (1) "international conferences on the peaceful uses of atomic energy," and (2) "an International Atomic Energy Agency."

Peaceful Uses of Atomic Energy.

The first part of the resolution—

(1) Expressed satisfaction with the proceedings of the International Conference on the Peaceful Uses of Atomic Energy held in Geneva during 1955, and noted "the impressive results achieved by the conference in facilitating the free flow of scientific knowledge relating to the production and peaceful uses of atomic energy, and in laying a foundation for the fuller exchange of information on the development of atomic energy for the ends of human welfare."

(2) Recommended that a second such conference be held under U.N. auspices "in two to three years' time."

(3) Requested the U.N. Secretary-General and his Atomic Advisory Committee, "in consultation with the appropriate specialized agencies," to determine the place and date for the second conference, and to issue invitations.

International Atomic Energy Agency.

The second part of the resolution—

(1) Noted with satisfaction (*a*) that "substantial progress has been made towards a draft statute establishing an International Atomic Energy Agency," and (*b*) that this draft had been circulated to Governments for their consideration and comment.

(2) Welcomed "the announced intention of Governments sponsoring the Agency to invite all members of the U.N. and of the specialized agencies to participate in a conference on the final text of the statute of the International Atomic Energy Agency."

(3) Welcomed the extension of invitations to the Governments of Brazil, Czechoslovakia, India, and the U.S.S.R. "to participate with the present sponsoring Governments in negotiations on the draft statute of the International Atomic Energy Agency." [See below.]

(4) Recommended the Governments concerned to "take into account the views expressed on the Agency during the present session of the General Assembly, as well as the comments transmitted directly by Governments," and to "take all possible measures to establish the Agency without delay."

(5) Requested the U.N. Secretary-General, in consultation with his Atomic Advisory Committee, "to study the question of the relationship of the International Atomic Energy Agency to the United Nations, and to transmit the results of this study to the Governments concerned."

(6) Requested Governments "to report to the General Assembly as appropriate."

(7) Suggested that the International Atomic Energy Agency, when established, should "consider the desirability of arranging for an international periodical devoted to the peaceful uses of atomic energy."

The preliminary draft statute for an International Atomic Energy Agency had been worked out by an eight-nation sponsoring group comprising Australia, Belgium, Canada, France, Portugal (which had been invited to join the group,

although not at the time a member of the U.N.), South Africa, the U.K., and the U.S.A. It was agreed during the Political Committee's debate that Brazil, Czechoslovakia, India, and the U.S.S.R. should join the group, bringing its membership to twelve.

The enlarged sponsoring group therefore represents those countries where atomic energy development is most advanced (the U.S.A., U.K., Soviet Union, France, and Canada) and the principal producers of uranium (Australia, Brazil, South Africa, Czechoslovakia, India, Belgium, and Portugal, the last two countries in respect of their African territories). The draft statute itself was not debated in the Committee, since the U.S.A. had requested all interested Governments to submit their comments direct to Washington

Several Soviet amendments were rejected before the resolution was voted upon as a whole.

The most important were recommendations (*a*) that the Agency should be established "within the framework" of the U.N. (the approved text left the relations between the Agency and the U.N. to be settled after the Agency had been established), and (*b*) that all countries, and not only U.N. member-States, should be permitted to join the Agency (a proposal which would have enabled the Chinese People's Republic to be admitted to membership).

The first amendment was rejected by 40 votes to 11 (with 8 abstentions) and the second by 33 votes to 14 (with 12 abstentions) India, Indonesia, and most of the Arab countries voted for both amendments. The resolution as a whole, however, was supported by the U.S.S.R. both in the Political Committee and in the full Assembly.

U.N. Study of Effects of Atomic Radiation.

The General Assembly also unanimously adopted on Dec. 3 a resolution establishing a 15-member scientific committee to study the effects of atomic radiation on man's health and environment, and to collect and disseminate information on this matter. The creation of such a body had been urged by the U.S. delegation at the opening of the session, the proposal being eventually adopted as an eight-nation resolution sponsored jointly by the U.S.A., the U.K., Australia, Canada, Denmark, Iceland, Norway, and Sweden.

The resolution was unanimously adopted by the Political Committee on Nov. 7, its provisions being as follows:

(1) A 15-member scientific committee should be set up consisting of one scientist each (and an alternate) from Argentina, Australia, Belgium, Brazil, Canada, Czechoslovakia, Egypt, France, India, Japan, Mexico, Sweden, the Soviet Union, the U.K., and the U.S.A.

(2) This committee should (*a*) "receive and assemble in an appropriate and useful form" the following radiological information furnished by U.N. member-States or members of the specialized agencies: (i) "reports on observed levels of ionizing [i.e. atomic] radiation and radioactivity" in the atmosphere; and (ii) "reports on scientific observations and experiments relevant to the effects of ionizing radiation upon man and his environment already under way, or later undertaken by national scientific bodies or by authorities of national governments";

(*b*) "recommend uniform standards with respect to procedures for sample collection and instrumentation, and radiation-counting procedures to be used in analyses of samples";

(*c*) "compile and assemble in an integrated manner the various reports on observed radiological levels",

(*d*) review, collate and evaluate these reports;

(*e*) make yearly progress reports and "develop by July 1, 1958, or earlier if the assembled facts warrant, a summary of the reports received on radiation levels and radiation effects on man and his environment, together with the evaluations provided for above, and indications of research projects which might require further study",

(*f*) transmit "from time to time as it deems appropriate" the above-mentioned documents and evaluations to the U.N. Secretary-General, for publication and dissemination to U.N. member-States or members of the specialized agencies.

(3) The U.N. Secretary-General was asked to provide appropriate assistance to the scientific committee to enable it to carry on its work

(4) "All concerned" were asked to co-operate "in making available reports and studies relating to the short-term and long-term effects of radiation upon man and his environment."

(5) The U.N. specialized agencies were asked to co-operate with the scientific committee.

(6) The Japanese Government was invited to nominate a representative to the committee.

The original eight-nation proposal suggested that the scientific committee should consist of 11 members—Australia, Brazil, Canada, Czechoslovakia, France, India, Japan, Sweden, the Soviet Union, the U.K., and the U.S.A. (Although Japan was not a member of the U.N., she was invited to join the committee because the first atomic bombs were used against two of her cities, Hiroshima and Nagasaki.) The 20 Latin American countries, however, presented a joint amendment adding Argentina, Belgium, Egypt, and Mexico to the list, and this was agreed to by the Political Committee by 48 votes to nil, with 11 abstentions.

Before approving the eight-nation resolution (as amended by Latin America), the Political Committee rejected a number of amendments, including the following: (*a*) Soviet proposals calling, *inter alia*, for the inclusion of the Chinese People's Republic and Rumania in the scientific committee, and for the new body to be established as a scientific committee of the U.N.; (*b*) Indian and Soviet proposals to extend the field of collaboration in radiological research to all countries, and not only those in membership of the U.N. or the specialized agencies; (*c*) a Syrian-Indonesian resolution seeking to prohibit tests of nuclear weapons pending scientific studies of the results of radiation.

The Committee accepted, however, an Indian amendment calling upon "all concerned" to make information available to the scientific committee. (In its original wording the resolution had asked all members of the U.N. and the specialized agencies to provide such information.) There was some debate on the precise meaning of the phrase "all concerned," but the consensus of opinion was that it applied specifically to countries in membership of the U.N. or its specialized agencies

The Political Committee was addressed on Oct. 12 by Dr Homi Bhabha, the eminent Indian scientist who presided over the Geneva Conference on the Peaceful Uses of Atomic Energy **Dr. Bhabha** called for "concerted and massive research" into the genetical effects of radiation, adding in this connexion: "Although there is no cause for alarm, it would be wise wherever possible not to permit people to be subjected to more than one-tenth of the dose [i.e. of atomic radiation] considered safe at present until the matter has been fully studied and understood"

The eight-nation resolution was unanimously approved by the General Assembly on Dec. 3. **Mr. Krishna Menon** (India) moved two amendments—both of which were rejected—asking (*a*) that the scientific committee should be enabled to gather reports from all countries, and (*b*) that the U.N. Secretary-General should be authorized to disseminate radiological data without restriction. Mr. Menon declared that the subject was "not concerned with frontiers or political groups" but affected "the whole of humanity," whilst **M. Kuznetsov** (U.S.S.R.), supporting Mr. Menon, said that the exclusion of the Chinese People's Republic meant that the scientific committee would not receive information from "a very extensive, area of the world." **Mr. James Wadsworth** (U.S.A.) maintained, however, that Mr. Menon's proposals would have the effect of "reopening a political issue" that had already been decided in the Political Committee.

Resolution on Disarmament. - Endorsement of U.S. "Open Skies" Plan and Soviet Proposals.

By 56 votes to seven, with no abstentions, the Assembly approved on Dec. 16 a resolution on disarmament, sponsored by the U.S.A., the U.K., France, and Canada, incorporating President Eisenhower's plan for mutual aerial reconnaissance and exchange of blueprints and Marshal Bulganin's plan for control posts at strategic centres, both put forward at the "summit" conference of Heads of Governments in Geneva. Four of the new U.N. members took part in the vote, Spain and Ceylon supporting the four-Power resolution and Hungary and Rumania joining the U.S.S.R., Poland, Czechoslovakia, the Ukraine and Byelorussia in opposition.

The resolution was presented in the Political Committee by the four Powers, and in its final form incorporated certain amendments designed to meet the views of the U.S.S.R. and India as expressed during the debate Its provisions were as follows:

(1) The U.N. Sub-Committee on Disarmament [which consists of the four Powers sponsoring the resolution, plus the Soviet Union] was asked:

(*a*) to continue its efforts for a "comprehensive disarmament agreement";

(*b*) to give priority to "such confidence-building measures as President Eisenhower's plan for exchanging blueprints and mutual aerial inspections, and Marshal Bulganin's plan for control posts at strategic centres," and also to "all such measures of adequately safeguarded disarmament as are now feasible";

(*c*) to take account also of M. Faure's proposals "for exchanging and publishing information regarding military expenditures and budgets," of Sir Anthony Eden's proposals "for seeking practical experience in the problems of inspection and control," and of proposals of the Government of India "regarding the suspension of experimental explosions of nuclear weapons and an 'armaments truce'"

(2) It was recommended that "further scientific research should be conducted by each State, with appropriate consultations between Governments, for methods that would make possible thoroughly effective inspection and control of nuclear weapons and material, with the aim of facilitating the solution of the problem of comprehensive disarmament"

(3) "The States concerned" were called upon "to make an early start on arms reduction without waiting for a comprehensive disarmament plan."

The resolution was approved by the Political Committee on Dec. 12, by 53 votes to five (the Soviet group opposing), after a lengthy debate which opened on Nov. 30. **M. Kuznetsov** (U.S.S.R.), who opened the debate, claimed that the "summit" conference, the Bandung conference, and "important steps" taken by the U.S.S.R.—such as the return of Porkkala to Finland and of Port Arthur to China—had resulted in a relaxation of tension during the past year. He asserted, however, that "certain circles" in some countries were continuing to "follow the path of aggravating the international situation and intensifying the arms race," and that the growth of confidence was "seriously hindered by the formation of aggressive blocs" He drew particular attention to the Baghdad Pact, which, he alleged, constituted "a link in the NATO chain and a threat to peace in the area."

Mr. Nutting (U.K.), speaking on the same date, described M. Kuznetsov's statement as "a familiar demonstration of the Soviet technique which we hoped had been abandoned last summer, but which now seems to have been revived by itinerant Soviet leaders—the technique of diplomacy through accusation." After referring to the "sad and disillusioning story" of the Disarmament Sub-committee's meetings during the past summer, he added: "M. Kuznetsov has made much of the Soviet Government's announcement that it intends to give up Porkkala and Port Arthur He claimed that this decision was a significant contribution to the relaxation of international tension. But when we are asked to applaud what the Soviet Union has done to relax tension, one cannot but recall the recent Soviet transaction in the Middle East [i.e. the supply of arms to Egypt] We cannot but remember, too, the Soviet refusal at Geneva to contemplate any settlement of the German problem which . . . might have the effect of disrupting the Communist system of government in Eastern Germany. Besides, what is there in this Soviet abandonment of the Porkkala and Port Arthur bases? Can the Soviet Union say that these are the only military bases they are occupying on foreign soil? . . In Eastern Germany alone there are 22 Soviet divisions. Do they exist in mid-air? Surely they have bases for their maintenance? There are also Soviet divisions in Hungary, Poland and Rumania They, too, must have their bases. . ."

Mr. Cabot Lodge (U.S.A.), speaking on Dec. 5, urged the Soviet Union to accept President Eisenhower's "open skies" proposal as "the most important single contribution which the present U.N. session could make to the peace of the world." After declaring that he saw nothing "fantastic" [an expression that had been used by M. Khrushchov] in the spectacle of U.S. and Soviet planes flying over each other's territories to maintain international peace, Mr Lodge added: "If we succeed in shackling surprise attack, we may set a seal against war itself. We believe that this vision of 'sentinels of peace' crossing each other in the 'open skies' is something which millions of people in every country can see plainly It will be as reassuring as the policeman on his beat . . "

Among other speakers, **Mr. Krishna Menon** (India) criticized alliances such as SEATO and the Baghdad Pact as contrary to the terms of the U.N. Charter He asserted that India was being "encircled" by such alliances, and that they constituted "an incipient threat to India's authority and a challenge to her self-respect"

The Political Committee approved the resolution after rejecting a Soviet amendment calling for the prohibition of nuclear tests and the banning of nuclear weapons **M. Sobolev** (U.S.S.R.) asserted that the four-Power resolution "supplants the fulfilment of the tasks of reducing armaments, prohibiting nuclear weapons, and instituting international control"

After the four-Power resolution had been endorsed by the full Assembly by the above-mentioned majority (on Dec. 16), **Mr. Cabot Lodge** described it as "the most significant resolution on disarmament the U.N. has yet passed", and declared that the acceptance of President Eisenhower's "open skies" plan by so large a majority would "mobilize the irresistible force of world opinion so that no Government can long stand out against it." He added: "Our action will make the 'open skies' plan a household word in every land. I am confident that the Soviet Union will join"

M. Kuznetsov (U.S.S.R.), however, maintained that the resolution had "really failed to undertake disarmament," and asserted that it "in fact leaves us as we were."

Review of U.N. Charter.

By 43 votes to six (the Soviet group and Syria opposing), with nine abstentions, the General Assembly adopted on Nov. 21 a six-Power resolution—sponsored by the U.K., the U.S.A., Canada, Ecuador, Iraq, and Siam—providing (*a*) that a general conference of all U.N. members should be held "at an appropriate time" to discuss the question of reviewing the U.N. Charter; (*b*) that a committee, consisting of all U.N. members, should consider the time, place, organization, and procedure for such a conference, in consultation with Dr. Hammarskjold (the U.N. Secretary-General); and (*c*) that this committee should make its recommendations to the 12th session of the General Assembly during the latter part of 1957. The resolution also said that the review of the Charter "should be conducted under auspicious international circumstances."

The U.N. Charter, signed in 1945 at San Francisco, provides that the 10th session of the General Assembly (i.e. the 1955 session) should consider the question of calling a special conference to review the Charter—if such a conference had not taken place earlier—in the light of the experience gained during the first ten years of the Charter's working. Under Article 109 of the Charter, any revision recommended by a review conference would require a two-thirds majority vote at that conference, and would go into effect only when ratified by two-thirds of all U.N. members, including all the permanent members of the Security Council.

Since the question of Charter revision concerned all U.N. members, the subject was debated only in the full Assembly, and not in committee. As originally introduced on Nov. 17, the six-Power resolution proposed that the time and place for a review conference should be decided by an 18-member committee representing the five permanent members of the Security Council plus Australia, Burma, Chile, Colombia, Czechoslovakia, the Dominican Republic, Egypt, El Salvador, India, the Netherlands, Norway, the Philippines, and Turkey. During the debate, however, there was a general consensus of opinion that the committee should include all U.N. members, and the resolution was amended accordingly.

M. Kuznetsov (U.S.S.R.) maintained that there was no need to hold a conference to review the Charter's working, nor any need to revise the Charter itself, which had proved "a fairly satisfactory international instrument" Shortcomings in the work of the U.N., he declared, were not the result of imperfections in the Charter but of "violations of the most important provisions of the Charter." He expressed the opinion that what was necessary was not a review of the Charter but "a sincere desire by member-States for international co-operation among nations." The Soviet, Polish, and Czechoslovak delegates subsequently announced that they could not take part in any action to revise the Charter, and would thus be unable to serve on any committee that might be created for that purpose

Sir Pierson Dixon (U.K.) believed that the holding of a review conference would be desirable. He stressed, however, that it would be "wise to await the effects of an increase in the membership of the U.N. before we start reviewing the Charter itself," since this would give new members time to gain experience in the practical working of the Organization before they were called upon to give their views on any suggested improvements to the Charter. Sir Pierson thought that one possible amendment—which could be effected without calling a review conference—might be an increase in the size of the Security Council, once the deadlock on the admission of new U.N. members had been broken, so as to provide for suitable representation of all parts of the world under the new circumstances

The six-Power resolution was adopted on Nov. 21, after the rejection of a Syrian amendment (by 35 votes to 14, with nine abstentions) urging that no decision be taken to hold a review conference. The nine countries abstaining on the Syrian amendment, as well as on the final vote, were Denmark, Norway, Sweden, Iceland, India, Yugoslavia, Afghanistan, Saudi Arabia, and Yemen Delegates of several of these countries maintained that a review conference would only serve to intensify international disagreement, and that the time was not auspicious to decide upon such a conference

The proposal to leave it to a later Assembly session to decide on the actual date for a review conference originated with Dr. Hammarskjold. His suggestion was adopted by the sponsors of the six-Power resolution, and was incorporated in that resolution

Resolution on South African Racial Legislation. - South African Walk-out from Tenth Session.

By 41 votes to six, with eight abstentions, the Assembly adopted on Dec. 6 a 17-Power resolution (sponsored by the Arab-Asian group and two Latin American countries) expressing concern at the South African Government's policy of racial discrimination (*apartheid*) and calling upon it to observe its obligations under the U.N. Charter. At the same time, however, the Assembly decided to discontinue the three-man U.N. Commission which had studied the *apartheid* question for the past three years, and to remove this question from the agenda of the 11th session—thereby reversing the *ad hoc* Committee's decision that the U.N. Commission should remain in being and that the question of racial discrimination in South Africa should remain on the Assembly's agenda.

Prior to the final vote, however, the South African Government had withdrawn from the 10th session of the U.N., and recalled its permanent representative, after the *ad hoc* Committee had adopted the full 17-nation resolution on Nov. 9. The resolution was denounced by the Union Minister for External Affairs (Mr. Eric Louw) as an unwarrantable interference in South Africa's domestic affairs such as "no self-respecting State can tolerate."

[The South African walk-out, following the French walk-out on Sept. 30 in protest at the Assembly's decision to discuss the Algerian situation (see 14461 A), meant that two national delegations had withdrawn from the Assembly's 10th session. Whereas, however, the French delegation subsequently returned when the Assembly dropped the Algerian question (see below), the South African delegation remained absent for the rest of the session.]

The three-man U.N. Commission of inquiry into the racial situation in South Africa was set up by the Assembly in 1952, with Dr. Hernan Santa Cruz (Chile) as chairman and M. Dantes Bellegarde (Haiti) and M. Henri Laugier (France) as its other members, and had reported annually to the Assembly on the Union Government's *apartheid* policies. In its third report—a 150,000-word document—presented on Oct. 12, 1955, the Commission stated that South Africa's progress towards *apartheid* had been extremely slow in the past year, and expressed the hope that this "marks the beginning of a change of mind in favour of the principles upheld by the United Nations." The Commission stressed, however, that the general lines of the *apartheid* policy had not changed, and said that the Union Government had enacted a series of legislative measures which were consistent neither with South Africa's obligations under the U.N. Charter nor with the Universal Declaration of Human Rights.

As regards discriminatory legislation, the Commission drew particular attention to the effects of the Bantu Education Act (see 14077 A), which was described as "a negation of the principles of human rights." By these and other measures the Union Government had diminished the Bantus' opportunities of education, limited their freedom of movement, and curtailed their free choice of employment. "*Apartheid* in education," the Commission declared, ". . . is likely to accentuate even more and to spread among the entire native

population a Bantu nationalism with a strong anti-White orientation The Commission believes that the Nationalist Government, in carrying its policy of school segregation to extremes, may receive some sad surprises, including a stiffening in the anti-European attitude of the Bantu population. . "

Concerning the effects of *apartheid* on non-Europeans, the Commission said "Every day more and more non-Europeans are confronted with some basic facts of international life—for example, they have now become aware that there is not another country in any of the five continents that has set up racial segregation as an absolute and eternal principle. . In no other country of the world is there an ethnic minority labouring to clear up to its own advantage a racial muddle which it has itself created."

After expressing regret that the Union Government refused to co-operate with the Commission, and recommending that South Africa should "reconsider its policy towards the U.N and enter into close and extensive co-operation with the Organization," the Commission repeated the suggestion (made in its earlier reports) that the U.N. should "offer co-operation to South Africa, including, as special technical assistance, the intellectual and material resources which the U N and its specialized agencies can command, for the purpose of promoting international studies and contacts and carrying out economic and social manoeuvres conducive to a peaceful settlement of the racial conflicts in the Union. . ." It also suggested that inter-racial conferences between "white and coloured men of good will" should take place in the presence of the highest-ranking U.N representatives.

The South African permanent representative at the U.N. (Mr. du Plessis) walked out of the *ad hoc* Committee on Oct. 24 in protest against its decision to discuss the *apartheid* question. As at previous sessions, he maintained that discussion of this matter was a "flagrant intervention" in the Union's internal affairs and thus a violation of the U.N. Charter. He reserved the right to return to the committee and take part in the voting on any resolution that might be presented.

The above-mentioned 17-Power resolution was adopted by the *ad hoc* Committee on Nov. 9 by 37 votes to seven, with 13 abstentions. Mr. du Plessis (who had returned to take part in the vote, after having boycotted the committee's discussions during the preceding fortnight) thereupon announced that South Africa would take no further part in the 10th session of the Assembly, and would recall her delegation for the remainder of the session.

The resolution was presented jointly by Afghanistan, Bolivia, Burma, Egypt, Ethiopia, Haiti, India, Indonesia, Iraq, Lebanon, Liberia, Pakistan, Persia, the Philippines, Saudi Arabia, Syria, and Yemen. It (*a*) expressed concern that the Union Government continued to give effect to the *apartheid* policy, despite previous Assembly requests that it should reconsider its position "in the light of the high principles contained in the Charter," and in view of "the pledge of all member-States to respect human rights and fundamental freedoms without distinction as to race"; (*b*) called upon South Africa to observe her obligations under the Charter, and to co-operate with the U.N. Commission, (*c*) kept the Commission in being, and requested it to keep the *apartheid* question under review and to report to the 11th session; and (*d*) retained the *apartheid* question on the Assembly's agenda.

The seven countries voting against the resolution, and supporting South Africa's contention that its racial policies were a domestic affair outside the purview of the U N., were Australia, Belgium, Canada, the Netherlands, New Zealand, South Africa, and the United Kingdom. The 13 abstaining countries were Argentina, Brazil, Nationalist China, Colombia, Cuba, Denmark, Honduras, Nicaragua, Norway, Peru, Turkey, the U.S.A., and Venezuela

Mr. du Plessis made the following statement after the resolution had been adopted by the *ad hoc* Committee:

"I have been instructed to inform the Committee that the Union Government regard in a most serious light the inquiry into the legislation of the Union which resulted from previous resolutions and which will now no doubt continue. The Government considers that such an inquiry constitutes the most flagrant of all examples of transgression of Article 2 of the Charter, which no self-respecting sovereign State can tolerate Patience has been exercised in the hope that wiser counsels would prevail, but that hope has not been realized. South Africa is no longer prepared to accept this position. After very serious consideration, my Government have accordingly decided to recall the South African delegation, and also the permanent representative at the U.N [i.e. Mr du Plessis himself] from the present session"

Before leaving the room with the other members of the South African delegation, Mr. du Plessis accused the Indian delegation of having pursued a "vendetta" against South Africa "practically from the inception of the U.N." He added that this "vendetta" had "again found expression" in the speech which the Indian delegate made to the Committee and in the resolution which had been adopted—"a resolution which has been sponsored by many countries of the Arab-Asian bloc, but in the formulation of which, we have no doubt, India played the leading role." [The South African *apartheid* policy had been strongly denounced during the debate by the Indian representative, Mr. Ali Yawar Jung, and by several of the Arab delegates.]

The following statement was issued in Pretoria on Nov. 10 by Mr. Louw, the Union Minister for External Affairs:

"By appointing the Santa Cruz Committee to inquire into Union Government policy, and into legislation passed by the South African Parliament, the U N went to the utmost lengths in transgressing the provisions of Article 2, Paragraph 7 of the Charter. The *ad hoc* Committee has now decided that a policy of supervision over the domestic affairs of the Union is to be continued, which means that the U.N. would arrogate to itself the role of a policeman in regard to South African governmental and legislative action.

"No self-respecting sovereign State can tolerate such an interference in its domestic affairs as is contained in the resolution of the *ad hoc* Political Committee. Its decision constitutes an even more flagrant transgression [of the Charter] than that which led to France's recent withdrawal of her delegation.

"For nine years successive Union delegations have vigorously opposed interference in South Africa's domestic affairs The Union, on its part, has faithfully carried out its obligations under the Charter, including the sending of a military contingent to Korea, where a number of South African airmen lost their lives

"A few months ago, at the San Francisco anniversary session, I made the following statement: 'The U N., by interfering in the domestic affairs of member-States, has embarked on a dangerous course, which, if persisted in, may ultimately lead to its disintegration.' The warnings were not heeded, and the withdrawal, first of the French and now of the South African delegation, is 'the writing on the wall'"

Mr. Strauss, the Leader of the Opposition in the Union Parliament, issued the following statement endorsing South Africa's walk-out from the United Nations:

"While, as a general rule, we as a party [i e. the United Party] are opposed to withdrawing from and boycotting . . . the United Nations merely because we disagree with some of its views, we believe the step taken by the Union delegation to have been fully justified by the special circumstances. The appointment of an *ad hoc* committee to inquire into the Union's internal affairs and to keep the racial situation under review in the next 12 months is an act contrary to the letter and spirit of the Charter."

The 17-Power resolution came before the full Assembly on Dec. 6 for a paragraph-by-paragraph vote.

The Assembly approved—with the necessary two-thirds majorities—those sections of the resolution expressing concern at the *apartheid* policy and recalling South Africa's obligations under the Charter to observe human rights The clause empowering the U.N. Commission to remain in existence and to report further on the *apartheid* situation failed, however, to obtain the required two-thirds majority (the voting was 33 in favour of the clause, 19 against, and nine abstentions—only one vote short of the required majority), and was therefore not adopted

The 33 countries voting for the clause were—Afghanistan, Bolivia, Burma, Byelorussia, Chile, Czechoslovakia, Ecuador, Egypt, El Salvador, Ethiopia, Greece, Guatemala, Haiti, India, Indonesia, Iraq, Lebanon, Liberia, Mexico, Pakistan, Panama, Paraguay, Persia, the Philippines, Poland, Saudi Arabia, the Soviet Union, Siam, Syria, Ukraine, Uruguay, Yemen, and Yugoslavia.

The 17 dissenting votes were those of Australia, Belgium, Brazil, Canada, Cuba, Denmark, France, Israel, Luxemburg, the Netherlands, New Zealand, Nicaragua, Norway, Peru, the U K., the U.S A, and Venezuela, whilst the nine abstentions were Argentina, Nationalist China, Colombia, Costa Rica, Dominican Republic, Honduras, Iceland, Sweden, and Turkey. The South African delegation was absent, having earlier withdrawn from the Assembly

A Costa Rican amendment "to continue consideration of this question at the 11th session" also failed to obtain the necessary two-thirds majority (27 in favour, 15 against, 15 abstentions), whereupon the resolution as a whole (excluding all references to the U.N. Commission) was carried by 41 votes to six, with eight abstentions.

In its final form, therefore, the resolution merely expressed the U.N.'s concern at the *apartheid* policy, and appealed to South Africa to observe the provisions of the Charter, abandon all forms of racial discrimination, and take note of former Assembly resolutions. The U.N. Commission was disbanded and the *apartheid* question dropped from the Assembly's agenda, on which it had figured at every session since 1946.

The Government of India had presented a memorandum to the U N. on Nov. 13 declaring that South Africa was "fast becoming a police State," and saying that the bitterness and hostility created by the Union Government's *apartheid* policy constituted "a serious threat to peace and co-operation between the different races, and one which must sooner or later react on the peace of the world."

Status of South-West Africa.

The Assembly approved a series of resolutions on South-West Africa similar to those adopted at every session since 1946.

By 40 votes to two (Belgium and South Africa), with 10 abstentions, the Trusteeship Committee passed a resolution (sponsored by Burma, Colombia, Costa Rica, El Salvador, India, Siam, Syria, and Yugoslavia) on Nov. 7 calling upon the South African Government to place S.W. Africa under U.N. trusteeship; inviting it to present annual reports on the territory; and noting that, with the exception of S.W. Africa, "all mandated territories which have now achieved independence have been brought under trusteeship."

The Trusteeship Committee also passed, by 44 votes to one (South Africa) and four abstentions, a resolution accepting and endorsing the advisory opinion of the International Court of Justice on the voting procedure to be adopted on reports and petitions concerning S W Africa [The Court had ruled unanimously that the two-thirds majority procedure was applicable to such reports and petitions—see 14323 F.]

The South African representative (**Mr. Donald Sole**) reiterated that his Government could not recognize or accept the International Court's ruling in respect of S.W Africa He emphasized that General Smuts, at the San Francisco conference of 1945, had made it clear to all U.N members that the South African Government did not propose to bring S W Africa under the trusteeship provisions of the Charter, and would seek to incorporate the territory in the Union of South Africa

By majority vote, the Trusteeship Committee decided to give a hearing to the **Rev. Michael Scott,** the British clergyman who had acted at previous sessions as spokesman of the native tribes of S W Africa, and whose entry into South Africa had been banned by the Union Government Mr Scott presented complaints on Nov. 11 from leaders of the Herero and other tribes alleging that native communities in S W Africa were deprived of medical facilities and essential water supplies, that their movements were limited to certain periods, and then only with official passes; and that the indigenous peoples were denied education and the opportunity of economic advancement He asked that U.N. specialized agencies, such as the World Health Organization and the Food and Agriculture Organization, should be allowed to send technical missions to South-West Africa

The various resolutions adopted by the Trusteeship Committee were approved by the full Assembly early in December. That recommending the placing of S W Africa under U.N trusteeship was carried by 43 votes to two, with nine abstentions, whilst the resolution inviting South Africa to co-operate with the Assembly's Committee on S.W. Africa was carried by 45 votes to one (Britain), with 10 abstentions.

In protest against the Trusteeship Committee's action in giving a hearing to the Rev. Michael Scott—a decision officially described in Pretoria as "a calculated affront" to South Africa—the Union Government announced on Nov. 14 that it was closing down the New York office of its delegation to the U.N., thereby severing the last link between South Africa and the 10th Assembly session. The office had continued to remain open despite the earlier withdrawal of the South African delegation.

Indian Community in South Africa.

By 48 votes to nil, with eight abstentions, the Assembly adopted a resolution on Dec. 14 urging South Africa, India, and Pakistan "to pursue negotiations with a view to bringing about a settlement of the question of the treatment of people of Indian origin in the Union of South Africa." The resolution invited the three Governments to report to the 11th Assembly session, either jointly or separately, on any action taken to implement it.

The resolution was presented to the *ad hoc* Committee on Dec. 9 by Yugoslavia and eight Latin American countries, and was carried by 43 votes to nil, with eight abstentions (Australia, Belgium, Colombia, France, Luxemburg, the Netherlands, New Zealand, and the U K) **Mr. Krishna Menon** (India) informed the Assembly that his Government desired to negotiate with South Africa "in spite of the attitude of the South African Government."

[The ninth U.N Assembly had adopted a resolution recommending (i) that India, Pakistan, and South Africa should negotiate directly within six months on the question of the Indian minority in South Africa, and (ii) that the U N Secretary-General should designate a person to assist in resolving the dispute if a settlement had not been reached within the six-month period. As no such settlement had been reached by June, 1955, Dr. Hammarskjold accordingly nominated Senhor Luis de Faro, a Brazilian diplomat, to facilitate contacts between the parties Senhor de Faro, however, subsequently reported that his efforts had been unsuccessful because the South African Government had "regretfully" declined to collaborate with him on the ground that the matter was "purely of domestic concern"]

Dropping of Algerian and Moroccan Questions. - French Delegation returns to Assembly.

On the initiative of the Arab-Asian group, headed by Mr. Krishna Menon (India), the Political Committee decided on Nov. 25—by unanimous vote, and without debate—to remove the question of Algeria from the Assembly's agenda for the current session. A resolution to this effect was approved by the full Assembly on the same day, also by unanimous vote.

The decision was warmly welcomed in France, whose delegation had been withdrawn from the Assembly on Sept. 30 after the Arab-Asian resolution to place the Algerian question on the agenda had been approved by a majority of one vote. The French Foreign Minister (M. Pinay) said on Nov. 25 that the Assembly's new decision to refrain from a debate on Algeria represented "a victory for reason" and would enable France to return to the United Nations. The French delegation, led by M. Hervé Alphand, accordingly returned to the Assembly on Nov. 29, after an absence of two months.

The formula devised by **Mr. Menon,** and accepted by the Political Committee and the full Assembly, was worded as follows: "The General Assembly decides not to consider further the item entitled 'The Question of Algeria,' and therefore is no longer seized of this item on the agenda of the 10th session." Mr. Menon explained that the formula was a procedural one which did not imply any change in the political, juridical, or moral attitudes of the parties to the dispute.

The Political Committee similarly decided on Nov. 28 (by 40 votes to nine, with five abstentions) not to debate the Moroccan situation. This decision was upheld by the full Assembly on Dec. 3 by 51 votes to nil, with five abstentions.

A 31-nation resolution to this effect was presented by all the Arab-Asian countries (which had originally sponsored the placing of the Moroccan question on the agenda) and nearly all the Latin American countries Although French policy in Morocco was criticized in the Political Committee by Arab and Asian delegates, the criticisms were of a moderate character, and confidence was expressed that France and Morocco would come to an understanding, particularly as a result of the latest steps taken by France to give Morocco an important measure of self-government (see 14528 A; 14473 A).

The resolution "noted that negotiations between France and Morocco will be initiated," expressed confidence that a satisfactory solution of the Moroccan question would be achieved, and recommended the Assembly "to postpone further consideration of this item." The five abstaining countries—both in the Political Committee and in the full Assembly—were Australia, Belgium, Luxemburg, the Netherlands, and the U K, who abstained on the ground that the matter was one in which the U N had no competence

The French delegation, although it had returned to the Assembly, was not present during the debates on Morocco, in conformity with its policy at previous U N sessions

The Korean Situation.

By 44 votes to nil, with 11 abstentions, the Assembly adopted on Nov. 29 a U.S. resolution affirming its intention "to continue to seek an early solution of the Korean question in accordance with the objectives of the United Nations"; urging continued efforts to achieve those objectives; keeping the Korean question on the Assembly's agenda for the 11th session; commending the work of the U.N. Korean Reconstruction Agency (UNKRA); and asking that the Agency's programmes should be expeditiously implemented.

The resolution also approved the report presented to the U.N 's ninth session by the countries represented on the U N Command in Korea, expressed the hope that it would soon be possible to make progress towards achieving by peaceful means a unified, democratic, and independent Korea, and asked that the armistice agreement should remain in force until superseded by an appropriate agreement for a peaceful settlement of the Korean question

Both **Sir Pierson Dixon** (U.K.) and **Mr. Jacob Blaustein** (U S A) expressed concern on Nov 11—when the debate opened in the Political Committee—at what they described as "violations" and "evasions" of the armistice agreement by the North Koreans. Mr Blaustein spoke of the "significant Communist build-up" in North Korea, particularly of aircraft, tanks, and heavy artillery, and asserted that there were still in Communist-controlled territory "tens of thousands of people who are entitled under the terms of the armistice agreement to proceed to the territory under the control of the Republic of Korea." Although the exact number of these persons was unknown, Mr Blaustein said that there were 24,000 ROK military personnel and at least 17,000 ROK civilians still unaccounted for

M. Malik (U S S R.) described Mr Blaustein's figures as "fantastic," and alleged that they had been advanced "only to divert attention from the numerous violations of the armistice committed by the U.N. Command in Korea." He added that the "already enormous armies" maintained by South Korea "kept the country and its people in a state of perpetual tension"

After an acrimonious debate, the Political Committee adopted the U S. resolution on Nov. 22 by 45 votes to nil, with 11 abstentions. At the same time it approved a U.S proposal (by 44 votes to five, with nine abstentions) to invite the Republic of Korea (South Korea) to participate in the debate. A Syrian amendment to invite North Korea also was defeated by 34 votes to 14, with 10 abstentions, the U.S A and a number of other countries maintaining that North Korea could not be invited because she was the aggressor in the Korean conflict. The countries supporting the Syrian resolution were the Soviet group, Afghanistan, Burma, Egypt, India, Indonesia, Saudi Arabia, Yemen and Yugoslavia, in addition to Syria herself

A Polish amendment for the deletion of that part of the resolution approving the report presented to the ninth session by the countries represented on the U.N. Command in Korea was rejected by 38 votes to nine, with eight abstentions

Netherlands New Guinea.

Without debate, and by unanimous vote, the Political Committee (and subsequently the full Assembly) approved on Dec. 12 a resolution, sponsored jointly by Ecuador, India, New Zealand, Norway, and Syria, expressing the hope that "the dispute between the Netherlands and Indonesia over Western New Guinea will be peacefully resolved." The resolution noted that discussions between the Netherlands and

Indonesian Governments had begun on Dec. 1, 1955, and expressed the hope that they would be "fruitful." It was understood that the terms of the resolution had been approved beforehand by the Netherlands and Indonesian delegations.

Netherlands Antilles and Surinam.

By 21 votes to 10, with 33 abstentions, the Assembly approved a resolution recognizing the self-governing status of the Netherlands Antilles and Surinam, and freeing the Netherlands Government from the obligation to submit reports to the U.N. on social and economic conditions in those territories. The new status of the Netherlands Antilles and Surinam as integral parts of the Kingdom of the Netherlands, equally with Metropolitan Holland, had been laid down in the Statute of the Realm signed by Queen Juliana in December, 1954 (see 14041 A).

The resolution had been adopted by the Trusteeship Committee on Nov. 30 by 18 votes to 10, with 27 abstentions. Most of the abstentions resulted from an Uruguayan amendment (incorporated in the resolution) asserting the Assembly's competence to decide whether a dependent territory had achieved full self-government.

The Prime Ministers of Surinam and the Netherlands Antilles (respectively **Dr. Johan Ferrier** and **Dr. Jonckheer**) appeared before the committee. Both expressed their full satisfaction with the new status of the two territories as component parts of the Kingdom of the Netherlands, and both emphasized that it had never been the desire of the two territories to sever their relations with the Netherlands Crown and form a separate and independent State.

Mr. Schurmann (Netherlands) disputed the claims of some delegations that the U.N. Charter envisaged the attainment of total independence for all non-self-governing territories; he also disagreed with the Uruguayan contention that it was for the General Assembly to decide whether or not a territory had attained a full measure of self-government.

U.N. Plebiscite in British Togoland.

By 42 votes to seven, with 11 abstentions, the Assembly approved on Dec. 15 the holding of a plebiscite in British Togoland under U.N. supervision, and requested the United Kingdom to make the necessary arrangements without delay. The object of the plebiscite will be to ascertain whether the inhabitants of British Togoland wish their territory to join an independent Gold Coast, when the latter is constituted, or to remain under U.N. trusteeship pending the final determination of their future. The Assembly also confirmed the appointment of Señor Eduardo Espinosa Prieto, Mexican representative on its Trusteeship Committee, as U.N. Plebiscite Commissioner, with the task of supervising the plebiscite in a free and neutral atmosphere.

In addition, the Assembly approved the eventual holding of a plebiscite in French Togoland, and asked the U.N. Trusteeship Council to study the matter in consultation with France and to report, if possible, to the 11th session.

The resolution was based on the recommendations of a U.N mission which had visited Togoland, and which submitted its report on Oct. 30. This mission had been appointed after the British Government's announcement that Togoland would cease to be a trust territory when the Gold Coast attained independence. The report recommended that the inhabitants of British Togoland (about 400,000) should be given the opportunity of deciding by plebiscite (*a*) whether they wished the territory to be integrated with the Gold Coast, when the latter attained independence, or (*b*) whether they desired the continuance of U.N. trusteeship, with Great Britain as the administering Power. For the purposes of the plebiscite it was recommended that British Togoland should be divided into three electoral areas—northern, central, and southern.

The U.N. mission expressed agreement with the British administration's view that British Togoland should be integrated with the Gold Coast, particularly as the two territories had become closely associated as a result of nearly 40 years of joint administration, and as the area of British Togoland was too small and its resources too limited to make its continued existence as a separate entity feasible.

The mission pointed out, however, that if the British Togolanders voted for a continuation of U.N trusteeship, the whole question of their political status would be bound up with the future of French Togoland, where the authorities contemplated the holding of some form of popular consultation "in due course." In such an eventuality the mission recommended that, after the political future of French Togoland had been decided (i.e. when its inhabitants had decided whether they wanted the territory to become independent or to remain part of the French Union), the people of British Togoland should be given another opportunity to decide by plebiscite (*a*) whether they wished to join the Gold Coast, or (*b*) whether they wished to join French Togoland under its new status.

[Before the First World War the territories now comprising British and French Togoland formed the German colony of Togo. After 1918 the colony was mandated by the League of Nations to France and Great Britain, by far the greater part coming under French administration and a small area (adjacent to the Gold Coast) passing under British rule. When the League of Nations was succeeded by the United Nations after 1945, the two Togolands passed under U.N. trusteeship, with France and Britain continuing to administer their respective territories.]

An Indian resolution incorporating the U.N. mission's recommendations was adopted by the Trusteeship Committee on Dec. 12 by 40 votes to five (the Soviet group), with eight abstentions.

It (1) called for the holding of a plebiscite in British Togoland under U.N. supervision with the minimum of delay, so as to give the inhabitants an opportunity of expressing their wishes on the future of the territory; (2) proposed the appointment of Señor Espinosa Prieto, the Mexican member of the Committee, as U.N Plebiscite Commissioner; (3) asked that the General Assembly, on the basis of the Plebiscite Commissioner's report and in consultation with Great Britain, should determine the further steps to be taken after the Gold Coast had attained independence; and (4) took note of French assurances that political reforms would be introduced in French Togoland as a prelude to a "popular consultation" in that territory during the next few years. The resolution incorporated a Liberian amendment that British Togoland might remain temporarily separate from the Gold Coast, under continued British administration, pending the final determination of its status.

Mr. Henry Hopkinson (then British Minister of State for Colonial Affairs) told the Assembly that its vote on British Togoland marked "a unique and historic occasion—the decisive step in the first termination of a trusteeship by an administering Power according to the U.N. Charter" **Mr. Krishna Menon** (India) warmly praised Britain's action as "a great act in fulfilment of the Charter," and as an example which would enable other dependent African peoples to gain independence more speedily **Senor Espinosa Prieto,** in accepting his appointment as Plebiscite Commissioner, said that he would do all in his power to discharge his duties with the greatest conscientiousness. (It was stated at the U N that Señor Espinosa Prieto would be assisted by an international staff, including observers, recruited by the U.N. Secretary-General)

On his return to London, Mr. Hopkinson announced that the Togoland plebiscite would be held in April 1956.

U.N. Fund for Under-developed Countries.

The Economic and Financial Committee unanimously adopted on Nov. 25 a 32-nation resolution (sponsored by the Arab-Asian-African group, 13 Latin American countries, and Greece, the Netherlands, and Yugoslavia) asking all members of the U.N. and the specialized agencies to give their detailed views by March 31, 1956, on the structure and operation of the proposed Special U.N. Fund for Economic Development in under-developed countries (SUNFED), the creation of which had been recommended at the ninth session.

The resolution asked the President of the Assembly to set up a committee of Government representatives to analyse the replies received, and requested that committee to submit interim reports to the Economic and Social Council and a final report by 1957, on the understanding that no Governments would be committed by any suggested course of action.

The full Assembly unanimously approved the resolution on Dec. 6, when it was announced that Señor Maza had appointed a 16-member committee (comprising representatives of Canada, Chile, Colombia, Cuba, Egypt, France, India, Indonesia, the Netherlands, Norway, Pakistan, Poland, the Soviet Union, the U.K., the U S.A., and Yugoslavia) to study the views presented by member-countries.

U.N. Technical Assistance Programme.

At a one-day "pledging conference" held on Oct. 26, 61 member-countries pledged a total of $28,031,536 for the U.N. Technical Assistance Programme to under-developed countries during 1956—the highest annual amount raised since the programme was launched in 1950. (The 1955 figure was $27,966,017, pledged by 70 countries.)

The executive chairman of the Technical Assistance Board, Mr. David Owen, announced that ten countries had raised their 1955 donations by 20 per cent (the biggest proportionate increases being those of Israel, the Netherlands, and Belgium) and that seven others had bettered that ratio The U.S.A. made $15,500,000 available for the 1956 programme, whilst the British and Soviet contributions remained unchanged at $2,240,000 and 4,000,000 roubles ($1,000,000 at the official exchange rate) respectively.

The sum finally allocated for the 1956 Technical Assistance programme, and approved by the General Assembly, amounted to $29,734,085, divided as follows:

Food and Agriculture Organization	$8,057,000
U.N. Technical Assistance Administration	$6,434,852
World Health Organization	$5,689,280
Unesco	$4,940,933
International Labour Organization	$2,933,900
International Civil Aviation Organization	$1,081,750
World Meteorological Organization	$382,170
International Telecommunications Union	$214,200

U.N. Refugee Fund.

Without opposition, the Assembly approved a resolution by its Social, Cultural and Humanitarian Committee urging all member-Governments to give "early and serious consideration" to making contributions to the $16,000,000 U.N. Refugee Fund so as to attain the targets set for 1955 and 1956, and thereby to make it possible for the U.N. High Commissioner for Refugees (Dr. van Heuven Goedhart) to carry out fully his programmes for those years.

The resolution noted with satisfaction that the main emphasis of the High Commissioner's work would be on reducing the number of persons in refugee camps, and asked him to continue his efforts to solve the refugee problem through voluntary repatriation, resettlement, and integration.

The resolution, sponsored by nine countries (Australia, Belgium, Costa Rica, Denmark, the Netherlands, Norway, Sweden, the U K. and the U S A.), had been approved by the Social, Humanitarian and Cultural Committee in October by 42 votes to nil, with 14 abstentions By 29 votes to 14, with 10 abstentions, the Committee rejected a Soviet proposal whereby the Assembly would instruct the High Commissioner to encourage the early return of refugees and displaced persons to their homelands, on the basis of the principle of voluntary repatriation

Palestine Arab Refugees.

By 38 votes to nil, with 17 abstentions, the Assembly adopted on Dec. 3 a resolution, presented by the U.S.A., the U.K., and Turkey, with the following provisions:

(1) Directing the U.N. Relief and Works Agency (UNRWA) to continue its programme for the relief and rehabilitation of Palestine Arab refugees; (2) noting that the position of the refugees continued to be "a matter of grave concern", (3) calling upon Governments in the Near East to make a "determined effort" to carry out projects capable of supporting a substantial number of refugees, in co-operation with UNRWA, and without prejudice to the U.N. resolution of 1948 which envisaged repatriation or compensation as a solution to the refugee problem, (4) calling upon all Governments, whether members or non-members of the U N, to make voluntary contributions to UNRWA; and (5) requesting private organizations to meet the needs of other claimants for relief—e.g. those of frontier villages in Jordan, of non-refugees in the "Gaza strip," of various Bedouin groups, and of a number of refugees in Egypt—"to the extent that local Governments cannot do so."

The resolution had been adopted on Nov 30 by the *ad hoc* Committee (by 38 votes to nil, with 19 abstentions), which had previously (Nov. 14) heard a report by **Mr. Henry Labouisse,** the Director of UNRWA Mr Labouisse stressed that "difficult political decisions" were a pre-requisite for a solution of the "very human problem" of the 900,000 refugees "displaced from their homes in Palestine and with no future in sight" The refugees, he said, were one of the causes of the present tension in the Middle East, in view of the "simple but insufficiently appreciated fact" that they constituted "a very large and restive proportion" of the population of the countries in which they now lived. For example, in the Gaza area they outnumbered the local population by more than two to one, in Jordan they made up over one-third of the population, and in the Lebanon they comprised nearly 10 per cent of the population.

Mr. Labouisse emphasized that it would "not be feasible for the Agency to carry out fully the intent of the Assembly resolutions concerning their reintegration into the economic life of the Near East" unless and until some opportunity was given to the refugees to choose between repatriation and compensation for loss of or damage to their property in their original homeland, as provided in the Assembly's original resolution, "or unless and until some other political solution to the Palestine problem can be agreed upon." For reasons which were "partly human, partly economic, and partly political," UNRWA had been able to rehabilitate or reintegrate only a relatively small number of refugees

"In the minds of the great majority of refugees," said Mr. Labouisse, "participation in a rehabilitation project—which they consider synonymous with permanent resettlement—means the giving up of rights guaranteed to them by the U N, this, in spite of repeated U.N statements to the contrary" After observing that relief assistance in the area would be required for "several years to come," no matter what ultimate solution of the refugee problem might be reached, he appealed to Governments to make funds available to UNRWA so that its work could continue Furthermore, he appealed also to the host countries in which the refugees were living "not to interfere in the internal affairs of the Agency," and to accord UNRWA "the rights and privileges pertaining to an organ of the United Nations." Mr Labouisse also referred to the activities of "small groups of agitators" who were trying to obstruct UNRWA'S operations "from purely selfish motives or at the instigation of political trouble-makers."

Mr. Shukairy (Syria), supported by a number of other Arab delegates, urged that the refugees should be given the opportunity to return to their original homes or, alternatively, should receive compensation. A proposal was put forward by Mr Shukairy (but not taken to a vote) for the creation of a special U N. Commission, consisting of the U.S A., the U.S.S R., and Persia, to settle the refugee problem along the following lines: (1) "effective measures to emancipate all areas assigned to the Arabs [under the 1947 U N. partition plan for Palestine] from Israeli control, and thereupon to repatriate the refugees to their homes"; (2) the restoration of their homes to refugees living in areas controlled by Israel; (3) compensation for refugees who did not desire repatriation; (4) guarantees to secure full political, civic and human rights for refugees returning to their homes.

Mr. Eban (Israel) rejected the solution proposed by Mr. Shukairy, declaring that it would be "unmerciful and imprudent" to hold out hopes that could not be fulfilled. He accused the Arab States of keeping the refugee issue alive "for the sake of sterile political controversy", asserted that the refugees had been prevented from settling down in and becoming part of the economically expanding Arab world, to which they naturally belonged, and stressed that the repatriation of many thousands of refugees to Israel would hold "great perils both for Israel and for the refugees themselves," and would give rise to grave security and economic problems.

Mr. James Wadsworth (U.S.A.) declared that responsibility for improving the lot of the Palestine Arab refugees required "courage and imagination from all, but particularly from the Arab States directly concerned, whose brothers the refugees are." Inability to settle important political questions should not stand in the way of bettering the refugees' conditions, on which a start "should have been made long ago" Appealing for an immediate start "in beginning a new and better life for the refugees," Mr Wadsworth said that "in making this start our Arab friends will understand that what will benefit the refugees will benefit the Arab countries themselves" He agreed, however, with Mr Labouisse that UNRWA could not fully carry out its mandate unless there was a settlement of the important political questions involved

Miscellaneous Subjects.

Other decisions taken at the Assembly's 10th session are summarized below:

U.N. Administrative Tribunal. Procedures for reviewing judgments of the U.N. Administrative Tribunal were approved by the Assembly on Nov. 9. (The Tribunal, appointed by the Assembly, is the highest body of appeal for U.N staff members on matters involving the alleged non-observance of their contracts.) The procedures adopted permit a member-State, the Secretary-General, or the individual on whose case the Tribunal has rendered judgment, to apply to a special screening committee for a review of the judgment if they think the Tribunal "has exceeded its jurisdiction or competence, or . . . has failed to exercise the jurisdiction vested in it, or has erred on a question of law relating to the provisions of the Charter, or has committed a fundamental error in procedure which has occasioned a failure of justice." A time-limit of 30 days was set for filing an application to the screening committee, whose members will consist of representatives of the countries on the Assembly's Steering Committee In addition, the revised procedures permit the Secretary-General, or the applicant concerned, to apply to the Tribunal for the revision of a judgment on the basis of the discovery of some decisive fact unknown at the time the judgment was given

The proposal for the new procedures was submitted by the U.S A. after the Tribunal's action in ordering the payment of heavy compensation by the U.N to 11 American citizens dismissed from U.N. employment following Congressional loyalty checks (see page 14012, second column) The Assembly adopted the resolution by 33 votes to 17 (with 9 abstentions) on the recommendation of its Administrative and Budgetary Committee.

Safety of Commercial Aircraft. By 45 votes to nil, with 13 abstentions, the Assembly adopted a resolution on the safety of commercial aircraft flying in the vicinity of, or inadvertently crossing, international frontiers [The resolution was based on the Israeli memorandum drawing attention to incidents in recent years in which civilian aircraft had been shot down in such circumstances, and referring specifically to the shooting-down of an Israeli airliner by Bulgarian planes—see page 14464, top of first column.] It noted that such incidents caused loss of life, affected relations between States, and were thus a matter of international concern, called upon all States to take the necessary measures to avoid such incidents; and drew the attention of the appropriate international organizations to the resolution.

Dissolution of U.N. Libyan Tribunal. The Assembly approved a resolution by its Legal Committee for the dissolution of the U.N. Tribunal in Libya as from Dec. 31, 1955, and its replacement by an Italo-Libyan Mixed Arbitration Commission of three members—one chosen by Italy, one by Libya, and a third appointed by the U.N Secretary-General in agreement with the two countries.

The U.N. Libyan Tribunal was set up by the Assembly in 1950 to decide any economic and financial disputes arising between Italy and Libya The expenses of the successor body will be borne exclusively by the two countries and not by the United Nations.

Elections to Economic and Social Council. Six vacancies on the U.N. Economic and Social Council, caused by the expiration (on Dec. 31, 1955) of the three-year terms of Australia, India, Turkey, the U.S.A., Venezuela, and Yugoslavia, were filled by the election of Brazil, Canada, Greece, and Indonesia and the re-election of the U.S A. and Yugoslavia. The membership of the Council during 1956 is—Argentina, Brazil, Canada, Nationalist China, Czechoslovakia, Dominican Republic, Ecuador, Egypt, France, Greece, Indonesia, Netherlands, Norway, Pakistan, Soviet Union, United Kingdom, United States, and Yugoslavia.

Elections to Trusteeship Council. Two vacancies on the Trusteeship Council were filled by the election of Guatemala in place of El Salvador and the re-election of Syria. The membership of the Trusteeship Council during 1956 is—Australia, Belgium, Burma, Nationalist China, France, Guatemala, Haiti, India, Italy, New Zealand, Soviet Union, Syria, United Kingdom, and the U S A.

Italy, as the Power responsible for administering Italian Somaliland (a trust territory), had automatically joined the Trusteeship Council when she was elected to U.N. membership (see 14637 A). As the U.N Charter provides that membership of the Council must be equally divided between States which administer trust territories and those which do not, elections were held on Dec. 20 for another non-administering member to restore the equal composition of the Council. Burma was elected after six inconclusive ballots, the unsuccessful candidates being Liberia and Cambodia.

U.N. Budget for 1956. A U.N. Budget of $48,566,350 for 1956 was approved by the Administrative and Budgetary Committee on Dec 13, and was agreed to by the General Assembly by 56 votes to seven, with one abstention. A supplementary amount of $3,264 200 was appropriated for the 1955 Budget of $46,963,800 In addition, a Working Capital Fund of $20,000,000 was established for 1956 to meet special expenses incurred in enlarging the seating capacity of the Assembly Hall and Committee rooms

Dr. Hammarskjold announced on Dec. 22 that he would leave New York on Jan. 15, 1956, on a world tour during which he would visit 15 capitals—London, Athens, Ankara, Cairo, Tel-Aviv, Beirut, Damascus, Baghdad, Karachi, Delhi, Rangoon, Bangkok, Jakarta, Canberra, and Wellington. While in India he would attend the twelfth session of the U.N. Economic Commission for Asia and the Far East, to be held at Bangalore.—(United Nations Review, New York - U.N. Information Centre, London - Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Le Monde, Paris - Netherlands News Agency - The Statesman, Calcutta - Cape Times)

(Prev. rep. U.N. Tenth Session, 14637 A ; 14461 A.)

A. NORWAY. — Plan for Export of Electric Power to Sweden. - New Hydro-electric Plants. - Completion of Iron and Steel Works in Northern Norway.

The *Storting* approved on Dec. 6, 1955, by 81 votes to 63, the Norwegian Government's proposals for exporting electric power to Sweden from a plant to be built at Nea, near Trondheim. The plant will have an estimated output of 600,000,000 kw.-hours a year, of which 330,000,000 kw.-hours will be exported to Stockholm under a contract with the municipality of that city. The total cost of the Nea power-station was estimated at some 102,000,000 kroner (£5,900,000), of which 90,000,000 kroner (£4,500,000) will be raised by a loan in Sweden, to be repaid over 15 years through the delivery of power from Nea. The cost of the electricity to Stockholm will be 2.6 ore (about ¼d.) a unit.

The opponents of the scheme urged that power from the Nea plant should not be exported but used for the expansion of aluminium production at the State-owned Ardal works, in Western Norway.

Work started in December on Norway's largest hydro-electric power project at Tokka, in Telemark (south-eastern Norway). On the completion of the first stage (which is expected to take six years) the plant will have a capacity of 350,000 kilowatts, which will be increased during the second stage by another 600,000 kilowatts—making it one of the largest hydro-electric schemes in the world. The total cost is estimated at between £30,000,000 and £35,000,000, part of which it is hoped to finance through the International Bank.

It was also reported in December that Norway's hydro-electric generating capacity had increased during 1956 by 560,000 kilowatts, the largest increase ever recorded, and equivalent to the increase during the 14-year period from 1927 to 1940 As a result of large-scale hydro-electric expansion since the end of the war, Norwegian electricity output at the end of 1955 had reached 23,000,000,000 kw.-hours a year, or more than double the output in 1945.

Norsk Jernverk, a new Government-owned iron and steel plant at Mo i Rana, within the Arctic Circle in Northern Norway, went into production in May 1955. Built at a cost of 500,000,000 kroner (£25,000,000), it will have a total capacity of 180,000 tons of pig-iron and 170,000 tons of rolled steel products annually when its third furnace is completed early in 1956 ; with a fourth furnace planned, pig-iron production will increase to 240,000 tons. The plant will utilize extensive local iron-ore deposits.—(Aftenposten, Oslo - Arbeiderbladet, Oslo - Royal Norwegian Embassy, London) **(Prev. rep. 12039 E.)**

B. FRANCE. — Formation of State Broadcasting Corporation for Overseas Territories.

A decree was published in the *Journal Officiel* on Jan. 21 providing for the creation of a State-owned Broadcasting Corporation for Overseas France (*Société de radiodiffusion de la France d'outre-mer*, or Sorafom). The new corporation will be independent of the French Metropolitan Broadcasting Corporation (R.T.F.) and will be governed by an administrative council of 10 to 14 members nominated by the Ministry of *France d'outre-mer*. The council was given powers to elect its president and to appoint a director-general, after approval by the Minister.

The corporation—whose initial capital was fixed at 5,000,000 francs (£5,000), all held by the State—will have financial autonomy and will be able to negotiate loans. M. Pierre Schaeffer, head of broadcasting services in the Ministry of *France d'outre-mer*, was elected president of "Sorafom."

(Le Monde, Paris)

C. LITERATURE. — Book Selections for January.

Selected books published in Great Britain, the United States, France, and Germany are given below :

Great Britain. Baldwin, A. W —"My Father The True Story." (Allen & Unwin, 25s)

Desio, Ardito—"The Ascent of K-2." Translated from the Italian (Paul Elek, 21s.)

FitzGibbon, Constantine—"The Shirt of Nessus" The Story of the Attempts to assassinate Hitler. (Cassell, 21s.)

Masters, John—"Bugles and a Tiger A Personal Adventure." (Michael Joseph, 16s.)

"Memoirs of Michael Karolyi . Faith without Illusion" Translated from the Hungarian (Jonathan Cape, 35s.)

Steegmuller, Francis—"La Grande Mademoiselle" The Story of the Duchesse de Montpensier. (Hamish Hamilton, 21s)

Thompson, J. Eric—"The Rise and Fall of Maya Civilization." (Victor Gollancz, 21s.)

Germany. Weymar, Paul—"Konrad Adenauer · Die autorisierte Biographie" (Kindler Verlag, Munich, 24 DM)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14606 B.)**

D. SOUTH AFRICA. — New Political Party.

The formation was announced on Dec. 17, 1955, of a new political party under the name of the South African Bond (*Suid Afrikaanse Bond*).

A statement by the party's action committee said that "the ideal of a united South African nation at the time of Union has not been achieved by any of the existing political parties," and that the relationship between the European groups had deteriorated because "party interests have been placed before principles, and the lack of a uniform policy towards the less-developed groups in the Union has resulted in racial tension."

The new party's principles were listed as the building of a united nation among the White population ; a positive policy of guidance and development of the Native races , the raising of the "moral tone" in the conduct of the State, business, and the home, with a guarantee of equal justice for all; and the development of an economic policy for peace, progress and prosperity in place of the "unrealistic political approaches" by existing political parties

The party undertook, if eventually returned to power, to govern the country in accordance with the Constitution as set out in the South Africa Act, 1910, and as in operation until May, 1955, and not to alter South Africa's present position in the Commonwealth without the approval of two-thirds of the electorate in a national referendum It also emphasized that the existing political rights of Natives would not be diminished, and pledged itself to the social and economic development of the Native community.

Mr. C. A. Retief, a Johannesburg broker, is chairman of the new party.—(Cape Times) **(Prev. rep. New Parties, 13431 D.)**

E. INTERNATIONAL SUGAR COUNCIL. — Export Quotas for 1956. - Proposed Review of International Sugar Agreement.

The International Sugar Council met in London on Nov. 28-Dec. 1, 1955. After considering estimates of the requirements of the "free market" in 1956, and of the amount of sugar likely to be available from countries which are not parties to the International Sugar Agreement, it decided on a 10 per cent cut in basic export tonnages, the initial export quotas for 1956 being fixed at a total of 3,996,000 metric tons. A reserve of 20,000 tons was created to enable additional export quotas to be allotted in cases of special hardship. The Council also decided to request the United Nations to call a conference in 1956 to review the International Sugar Agreement.

At a further meeting on Jan. 25-28, 1956, the Council set up a preparatory committee and a technical sub-committee to undertake preliminary work for a full-scale survey of world trade in sugar during the forthcoming U.N. conference. The Council estimated the requirements of the free market in 1956 at 4,570,000 metric tons.—(Financial Times) **(Prev. rep. 14512 A.)**

F. UNITED STATES. — Steel Production in 1955.

U.S. steel production in 1955 reached the record level of 117,000,566 tons, nearly 29,000,000 tons higher than in 1954 and over 5,000,000 tons more than the previous record figure achieved in 1953. Over the year as a whole steel plants operated at an average of 93 per cent of rated capacity.—(New York Times)

A. EASTERN GERMANY - COMMUNIST CHINA. — Herr Grotewohl's Visit to China, North Korea, and Outer Mongolia. - East German-Chinese Friendship Treaty. - Economic and Cultural Co-operation with China, North Korea, and Mongolia.

Herr Grotewohl, the East German Prime Minister, accompanied by Dr. Lothar Bolz (the Foreign Minister) and senior officials, left East Berlin at the beginning of December for an official visit to the People's Republic of China. He arrived in Peking on Dec. 8 and during his stay in the Chinese capital had discussions with Mao Tse-tung (Chairman of the Chinese People's Republic), Chou En-lai (the Prime Minister and Foreign Minister), and other members of the Chinese Communist Government. In a formal ceremony on Dec. 11 Herr Grotewohl handed to the Chinese Prime Minister ten banners of the Boxer movement (the *I Ho Tuan*) which had been seized by the German Imperial troops in 1901 during the suppression of the Boxer rising.

After visiting a number of other Chinese cities and industrial areas, Herr Grotewohl and the East German delegation flew to North Korea, where a joint statement was signed on Dec. 21 with the Prime Minister of the Korean People's Democratic Republic, Marshal Kim Il Sung.

On the German delegation's return to Peking, Chou En-lai and Herr Grotewohl signed a friendship pact between the Chinese People's Republic and the German Democratic Republic on Dec. 25, and also issued a statement on the joint aims of the two Governments in the international field.

On Dec. 26 the German delegation left Peking for Ulan Bator, the capital of Outer Mongolia, where Herr Grotewohl and the Prime Minister of the Mongolian People's Republic, Marshal Zedenbal, signed a joint statement on Dec. 27.

The various agreements concluded during Herr Grotewohl's visit to the Far East are summarized below.

East German - Chinese Friendship Pact.

Art. 1. The two contracting parties agreed to "co-operate in all international fields which aim at guaranteeing world peace and the security of nations in accordance with the principles of the U N. Charter."

Art. 2. The parties agreed to confer "in a spirit of fraternal alliance" on all important international questions affecting the interests of both countries. They would "devote particular attention to the necessity of guaranteeing the inviolability of their respective sovereign territories and the security of their States, and to safeguarding world peace."

Art. 3. The parties undertook "to strengthen and broaden their friendly relations in all spheres on the basis of mutual respect for their sovereignty, non-intervention in internal affairs, equality of rights, and mutual benefit."

Art. 4. "The parties will extend to each other all possible economic help, and will further develop their economic co-operation in the interests of the peaceful construction of both countries"

Articles 5 and 6 dealt with increased scientific and cultural co-operation.

Art. 7 said that the pact would come into effect upon ratification and would remain in force until the "reunification of Germany as a peace-loving and democratic State," or until the parties decided to amend or terminate it.

East German - Chinese Joint Statement.

(1) Both Governments stated that they would support the stand taken by the German Democratic Republic on the solution of the German problem, as outlined in the East German proposals submitted to the Four-Power Foreign Ministers' Conference at Geneva (see 14537 A)

(2) "Aggressive circles in the U.S A and their supporters are attempting to pursue further the bankrupt 'policy of strength.' One expression of this is the extremely hostile attitude adopted towards the Chinese People's Republic and the German Democratic Republic This policy is doomed to failure."

(3) "Both countries are ready to do everything in their power to maintain peace, and to participate in all international actions which serve peace and collective security."

(4) "The Government of the German Democratic Republic declares that it would welcome a normalization of relations between the Chinese People's Republic and the German Federal Republic [i.e. Western Germany] in the interests of peace and the unification of Germany as a peace-loving and democratic State."

(5) "Both countries agree that the tension created by the American occupation of the Chinese territory of Taiwan [Formosa] must be speedily removed. The Chinese People's Republic must take its rightful place in the United Nations and in the Security Council."

(6) "All countries which meet the conditions of the U.N. Charter should be accepted as members of the United Nations."

(7) "Both countries urge compliance with the Geneva agreement on the restoration of peace in Indo-China. They agree that an international conference of all interested States should be called as soon as possible for a peaceful solution of the Korean question."

(8) "Both sides welcome the speedy development of the national democratic forces in the Asian and African area. They reject every form of colonialism and support all States and peoples in their struggle for national independence and the defence of State sovereignty and territorial integrity. They support the rightful demand of India for the return of Goa, and of Indonesia for the return of West Irian [Dutch New Guinea], the fight of the peoples of North Africa for their national right of self-determination; the rightful claims of the Arab peoples; and their resistance against being drawn into aggressive military blocs"

(9) "Both sides are strongly opposed to aggressive military blocs, and believe that the security of the countries of Europe, Asia, and Africa is menaced by NATO, the Western European Union, SEATO, the Manila Pact, and the Baghdad Pact."

(10) "International disputes must be solved by peaceful negotiations between all interested States, irrespective of their social system The aim must be to abolish military blocs, to establish general security and disarmament, and to ban the production, testing, and use of atomic and hydrogen bombs."

East German - Korean Statement.

This statement called for the withdrawal of all foreign troops from both Korea and Germany It said that the reunification of Germany and Korea was primarily a matter for the German and Korean peoples to solve, that it must be accomplished by peaceful means, and that it should be achieved "step by step through mutual contacts between the two States existing respectively in Germany and Korea." Both Governments pledged themselves to a further extension of their existing friendly relations in the economic and cultural spheres

East German - Mongolian Statement.

This statement similarly envisaged an extension of economic and cultural co-operation between the two countries. The Mongolian Government expressed its "full solidarity" with the German people "in their struggle for the peaceful reunification of Germany on a democratic basis" The statement strongly criticized the Chinese Nationalist veto against the admission of Mongolia to U N membership (see 14637 A)

On their return flight the East German delegation stopped in Moscow on Dec. 29 for discussions with Marshal Bulganin, M. Khrushchov and M. Molotov.

An official statement said that the U S S R and the German Democratic Republic agreed that the organization of a European collective security system, with the co-operation of the two German States, would create the necessary pre-requisites for a settlement of the German problem It added that in present conditions the only "realistic method" of bringing about the unification of Germany as a peaceful and democratic State was through *rapprochement* between the Democratic Republic and the Federal Republic.

Herr Grotewohl and the members of his delegation arrived back in Berlin on Dec. 30. At a Cabinet meeting on Jan. 6 Herr Grotewohl announced that he had agreed with the Chinese Government on the drawing-up of a five-year trade agreement between the two countries, instead of the existing annual agreements, so as to allow East German industry to plan ahead. The value of East Germany's trade with China was recently stated to have trebled since 1951, making China the most important trade partner of Eastern Germany after the Soviet Union. (A.D.N. Agency - Neues Deutschland, Berlin)

B. UNITED KINGDOM. — Trade Union Finances.

The annual report of the Registrar of Friendly Societies, published on Nov. 7, showed that in 1954 the 411 registered employees' trade unions had a membership of 8,356,617 and received subscriptions totalling £18,380,000, compared with £17,917,000 in 1953, when membership was 8,322,706. Average expenditure per head was £2. 4s., while the average contribution was only £2. 2s. 11d., but after adding investment income the unions' total funds had increased by over £3,000,000 to £73,887,000. Expenditure on strike pay, at £483,000, was nearly twice as great as in 1953 and higher than in any year since 1926—the year of the general strike. Unions with political funds had 7,707,000 members, but 899,000 of these had contracted out of political contributions. Total political funds at the end of 1954 amounted to £981,000—nearly twice as much as at the end of 1945. (Ministry of Labour Gazette) **(14440 A.)**

C. BRITISH EAST AFRICA. — Armed Forces. - Commissions for Africans and other Non-Europeans.

It was announced in London and Nairobi on Jan. 4 that residents of British East Africa who were British subjects or British-protected persons could now obtain commissions in the East African Land forces, regardless of race. The decision meant that military commissions would be open to Africans and other non-Europeans who met the necessary standards.

(Times - New Commonwealth)

D. FRANCE. — Population Figures.

The population of Metropolitan France as at Jan. 1, 1956, was estimated by the French National Institute of Statistics at 43,430,000, an increase of over 300,000 since Jan. 1, 1955. During 1955 there were 800,000 births, 520,000 deaths, and 315,000 marriages.—(Le Monde, Paris) **(Prev. rep. 14056 C.)**

A. UNITED KINGDOM. — Defence Policy. - Reorganization of Reserve Army. - Alteration in National Service Call-up.

The Secretary for War (Mr. Head) announced in the House of Commons on Dec. 20 the following " drastic changes " which were proposed in the organization of the Reserve Army :

(1) Only two Territorial divisions, together with the necessary supporting troops, would remain organized at full strength in order to meet Britain's NATO requirements.
(2) The remainder of the Reserve Army would be reorganized for home defence, but the divisional organization would be retained.
(3) The two armoured divisions and the Lowland mixed division would be converted to infantry divisions, but six armoured units would be retained to support the British NATO divisions
(4) The Airborne Division would be reduced to a parachute brigade of about 4-5 battalions, and the remainder of the division would be absorbed in infantry divisions
(5) Apart from the two divisions and supporting troops available to meet NATO commitments, and some light anti-aircraft units there would be no requirement for non-divisional artillery, and a number of non-divisional artillery units would be converted to other roles.
(6) A " considerable number " of Army Emergency Reserve units would be disbanded.
(7) The Home Guard would be placed on a reserve basis
(8) Throughout the Reserve Army the £12 bounty would be increased to £20 after three years' service.

Explaining the proposed changes, Mr. Head stressed that it was " no longer realistic " to adhere to the conception that it would be possible in a global war to send out from Britain 10 or 12 fully-equipped Reserve divisions. Instead, the Reserve forces constituted " the country's potential strategic reserve," and if war came they would initially have to maintain the life of the nation and deal with raids and sabotage. They must be capable of acting in close co-operation with the Civil Defence services and of providing the reserve power necessary for the various aspects of home defence. They would therefore continue to be organized as military forces with a fighting capacity, and the retention of the divisional organization afforded the best method of control, both operationally and geographically. As regards the units of the Army Emergency Reserve to be disbanded, it was hoped to offer to the great majority of volunteers the opportunity of transferring to other units Details were being worked out of the future role on mobilization of the Home Guard, which in the event of war would play a most useful part in the country's defence ; meanwhile it was intended that sector and battalion commanders, and two other members of each battalion, should remain to keep war plans up-to-date and maintain the lists of those registered for service.

A White Paper was published on Oct. 28 giving details of the alterations in National Service announced by the Prime Minister on Oct. 8, 1955 (see 14498 A).

It was explained that under the Government's plan each age-group called up would still cover men born within a given three months, but that the actual call-up would be spread over four months. Thus, the age-group following would be called up one month later than would previously have been the case, and at the end of the year three, instead of four, registrations would have taken place. The call-up age would be increased by one month at each registration, or by three months in a year, so that it would be raised to about 19 by March 1958.

The White Paper gave the following table showing, on the basis of present estimates, how the call-up age would normally rise as a result of registering only three quarterly age-groups a year :

Date of birth 3-month period	Date of Registration	Age	Medical examination	Call-up (oldest first) in 4-month period	Average age of call-up
Oct. to Dec , 1937	Nov. 19, 1955	17.11 to 18.1	Jan. to April, 1956	March to June, 1956	18.5 to 18.6
Jan. to March, 1938	March 3, 1956	18 to 18.2	May to Aug., 1956	July to Oct., 1956	18.6 to 18.7
April to June, 1938	July, 1956	18.1 to 18.3	Sept. to Dec., 1956	Nov. 1956, to Feb., 1957	18.7 to 18.8
July to Sept., 1938	Nov , 1956	18.2 to 18.4	Jan. to April, 1957	March to June, 1957	18.8 to 18.9

The White Paper stressed that the Government's decision would afford substantial relief to industry, since it would mean a manpower accession of 20,000 by March 1956, and of a further 80,000 by March 1958. Moreover, although interruption of working life was inseparable from National Service, the higher call-up age would mean that the men called up were more mature physically and mentally, and had had more time to train for jobs to which they could return after National Service. It was also hoped that the eventual raising of the call-up age to 19 would induce more youths to take up apprenticeships on leaving school, whilst the additional year would be particularly helpful to those engaged in commerce or studying at evening classes, who did not normally qualify for deferment. Special arrangements would be made to reduce uncertainty about the date of call-up, and the existing provision to allow certain classes of young men (e g. those wishing to go to a University after completing National Service) to be called up early if they wished, would remain.

As regards National Service reservists, the White Paper explained that the general reduction of the training period from 60 days to not more than 20, announced by the Prime Minister, would not apply to (*a*) naval National Service reservists who had served as signalmen, telegraphists, or coders ; (*b*) technical and operating members of the reserve flights supporting R.A F control and reporting systems, as well as certain other R A F units , (*c*) members of all Services who had received specialized language training during active service. In all, however, not more than 8,000 of the National Service-men transferred each year to the reserve would be called up for more than 20 days' training.

Regulations were announced by the Ministry of Labour and National Service on Oct. 11, 1955, making all full-time farm workers eligible for deferment of National Service (instead of only workers on small farms and stockmen, as previously), provided that the Agricultural Advisory Panel and the National Service Board were satisfied that there would be a substantial loss of food production if they were called up.
(Times - Daily Telegraph - Manchester Guardian) **(14493 A.)**

B. CHILE. — Major Cabinet Changes. - Anti-Inflationary Legislation. - Strike Movements.

A number of Cabinet changes took place in Chile in the latter half of 1955 and early 1956, mostly arising out of the continuing inflation in the country and disagreement within the Cabinet on methods of dealing with the problem.

The Minister of Economy (Señor Arturo Zúñiga) resigned on Aug. 12, following which the remaining members of the Cabinet also resigned to enable President Ibañez to reorganize the Government. A new Cabinet was completed towards the end of August in which Señor Oscar Palacios (hitherto Minister of Education) became Minister of Economy, and new Ministers were also appointed to the portfolios of Justice, Agriculture, Education, and Land and Colonization.

On Oct. 1 the Minister of Finance (Señor Abraham Pérez) resigned because President Ibañez disapproved of his measures to prevent stock-market speculation, the Finance portfolio being taken over by the Minister of Economy. The Cabinet was again reorganized on Dec. 9 after a number of Ministers had submitted their resignations, new Ministers of Public Works, Agriculture, and Labour being appointed

Señor Oswaldo Koch, Minister of the Interior, who had been a member of every Cabinet formed by President Ibañez since 1952, resigned on Dec. 23 for reasons of health, whilst on Jan. 2, 1956, the Foreign Minister (Rear-Admiral Kaare Olsen Nielsen) resigned to take up an appointment in the Navy. Señor José Serrano Palma was appointed as the new Foreign Minister, but owing to opposition to his appointment by the Liberal Party, whose support the President needed in order to obtain Congressional approval of a Bill to regulate wages and prices, he was obliged to resign after only two days in office and was succeeded by Señor Enrique O. Barbosa Beaza, a well-known lawyer and academician.

As a result of the above-mentioned changes, the membership of the Chilean Cabinet on Jan. 4, 1956, was as follows :

Colonel Benjamin Videla Vergara, Interior ; Señor Enrique O. Barbosa Baeza, Foreign Affairs ; Señor Oscar Herrera Palacios, Finance and Economy , Vice-Admiral Juan Francisco O'Ryan Orrego, Defence ; Señor Santiago Wilson Hernandez, Justice ; Señor Tobias Barros Ortiz, Education ; Señor Adalberto Fernandez Ferreira, Public Works , Señor Aníbal León Bustos, Agriculture ; Señor Mariano Fontecilla Vargas, Land and Colonization , General René Vidal Merino, Labour , Dr Raúl Barros Ortiz, Health , Señor Osvaldo Sainte-Marie Sorucco, Mines.

On Jan. 4, 1956 the Senate approved (by 20 votes to 19) the Government's proposals for dealing with inflation. These proposals, which had been approved earlier by a large majority in the Chamber of Deputies, but had been held up by a split vote in the Senate, " froze " the prices of most commodities at the levels of Nov. 15, 1955 ; drastically restricted credit ; limited the automatic readjustments of pensions ; lowered social legislation benefits ; and modified the existing scale for wage increases. On Jan. 24 the Central Bank published estimates which showed that the cost of living in Chile had risen by 93.1 per cent during 1955 and the early part of January 1956.

A general strike was called by the Central Union of Workers on Jan. 9 in protest against the anti-inflationary legislation, but was called off on the following day owing to lack of support and to the prompt action taken by the Government. Troops had been called out to guard key points in the principal cities and to maintain essential services, and a number of persons—estimated at over 300, and including all the union's leaders—were arrested. In addition, a state of siege (a modified form of martial law) was proclaimed in 20 provinces.

Five provinces had been under a state of siege since Sept. 26 after a strike in the copper mines ; though the miners subsequently returned to work, a new law regulating relationships between the workers and management led to a further strike in the mines on Dec. 14, which only ended on Jan. 7, 1956, after President Ibañez had agreed not to put the law into effect.
(Bank of London and South America, Fortnightly Review - New York Times - New York Herald Tribune - Times - Le Monde, Paris) **(Prev. rep. Chile, 14284 B.)**

A. MOROCCO. — Cabinet formed by Si Bekkai. - Administrative Reforms. - Disorders and Terrorist Activities. - Revival of Riff Revolt. - Legalization of Moroccan Trade Unions. - Meetings between M. Dubois and General Garcia Valino. - Death of El Glaoui. - Political and Economic Reforms in Spanish Morocco. - Statements by General Franco.

Morocco's first Cabinet, in which 15 of the 21 portfolios were held by members of the two leading nationalist parties, was formed on Dec. 7, 1955, by Si Bekkai, the former Pasha of Sefrou. The tasks before the new Government had previously been defined by the Sultan in a public speech on Nov. 18, the 28th anniversary of his accession.

After recalling his recent discussions with the French Government, which had resulted in an agreement on essential principles, the Sultan spoke as follows "We rejoice to be able to announce the end of the regime of wardship and protectorate, and the opening of an era of freedom and independence. . . . The independence towards which our people aspire must not mean a loosening of our links with France, for the friendship between our two countries is deep-rooted and goes back into history. . Our first objective is the formation of a responsible and representative Moroccan Government which will be an authentic expression of the will of the people It will have to carry out three tasks (1) The conduct of public affairs (2) The creation of democratic institutions, freely elected, and based on the principle of the separation of powers within the framework of a constitutional monarchy, granting to Moroccans of all religious beliefs the rights of citizens and the exercise of political and trade union liberties. . . (3) The opening of negotiations with the French Government. . .

"The ideas of liberty and democracy have become so widespread in the post-war world that the conscience of humanity cannot tolerate that independence and dignity should remain the exclusive prerogative of a few peoples only. On the other hand, the problems of the modern world and the interpenetration of interests are driving all countries into closer unity and co-operation, in order to safeguard their patrimony and ensure their security. That is why the Moroccan Government must define, in the course of negotiations, the framework and content of our country's independence and the new relations of interdependence between Morocco and France, on the basis of equality and mutual respect for sovereignty These new relations are not incompatible with the maintenance of our spiritual and cultural links with the other Arab peoples. We wish to see the West take account of the needs and aspirations of these peoples and co-operate with them for the common good of humanity At the conclusion of the negotiations the protectorate will come to an end and Morocco will enter a new era in which it will exercise its sovereignty within the framework of new agreements, and in a spirit of understanding and co-operation with the French Government. . . .

"It is important not to forget that Morocco includes among its inhabitants a considerable number of French citizens, who have contributed to its general progress and particularly to its economic prosperity. We have noted with satisfaction the understanding shown by the majority of them towards our people's aspirations for liberty and independence We desire them all to be reassured regarding their future. We are always ready to guarantee their interests, rights, and personal status, with due respect for Moroccan sovereignty. It is our wish to see Moroccans and Frenchmen co-operating for the prosperity of Morocco and the good of all . . ."

The Sultan accepted on Nov. 22 the resignation of the Council of the Throne and of the Premier-designate, Si Fatmi Ben Slimane, and began consultations with spokesmen of the political parties, the trade union movement, and other bodies with a view to forming a Government. Si Bekkai accepted the Sultan's invitation to form a Government on Nov. 30, and after prolonged discussions succeeded in doing so on Dec. 7, 1955.

The left-wing nationalist Istiqlal, as the largest party, had at first demanded half and subsequently 45 per cent of the seats, whereas the right-wing nationalist Democratic Independence Party (P.D.I) had maintained that the seats should be evenly divided between the Istiqlal, the P.D I., and the independent nationalists. At Si Bekkai's suggestion, a compromise was finally reached whereby the Istiqlal received nine seats and the P.D.I. and Independents six each.

The membership of the Moroccan Cabinet was as follows:

Si M'Barek Ben Mostapha El Bekkai (Independent)	Prime Minister.
Si Mohammed Zeghari (Independent)	Vice-Premier.
Maître Renda Guedira (Independent)	Ministers of State.
Maître Mohammed Cherkaoui (P.D.I.)	Ministers of State.
Maître Abderrahim Bouabid (Istiqlal)	Ministers of State.
Maître Driss M'Hamedi (Istiqlal)	Ministers of State.
Maître Abdelkrim Bendjelloul (Istiqlal)	Justice.
Si Lahcen Lyoussi (Independent)	Interior.
Si Moktar Soussi (Istiqlal)	Religious Foundations.
Maître Abdelkader Bendjelloun (P.D.I.)	Finance.
Si Ahmed Lyazidi (Istiqlal)	Commerce and Industry.
Si Ahmed Ben Mansour Nejai (Istiqlal)	Agriculture.
Si M'Hamed Douiri (Istiqlal)	Public Works.
Maître Thami Ouazzani (P.D.I.)	Industrial Production and Mines.
Dr. M'Hamed Ben Bouchaib (P.D.I.)	Town Planning and Housing.
Si Mohammed El Fassi (Istiqlal)	Education.
Si Abdelhadi Boutaleb (P.D.I.)	Labour and Social Questions.
Dr. Farradj (Independent)	Public Health.
Si Abdallah Ibrahim (Istiqlal)	State Secretary for Information.
Si Ahmed Ben Souda (P.D.I.)	State Secretary for Youth and Sport.
Dr. Benzaquen (Independent)	Posts and Telegraphs.

The various Government departments became Ministries on Dec. 9, and the French directors previously in charge of them became advisers to the new Ministers. The Moroccan Cabinet—most of whose members were drawn from the professional classes—did not include any representatives of the aristocratic families which had previously monopolized the high offices of state, and contained only two former *caïds* (Si Lahcen Lyoussi and Si Ahmed Ben Mansour) Dr. Benzaquen, a Casablanca physician, was appointed to the Cabinet on Dec. 27 as representative of the Jewish community. The average age of the Cabinet was comparatively low, its oldest member (Si Moktar Soussi) being 55 and its youngest (M Thami Ouazzani) only 28 Over half the new Ministers had served periods of imprisonment, detention, or residence under surveillance for their former political activities.

Si Bekkai gave details of his Government's programme in a broadcast on Dec. 13, 1955.

The Government's first task, he said, would be to negotiate a new agreement with France, which, "after having formally announced the abrogation of the Treaty of Fez of 1912, will define the basis of the relationship between the two States" Morocco's independence had already been recognized by France, and it was the Government's "fundamental and unchanging position" that Moroccan sovereignty must be complete Morocco needed French assistance, however, in the fields of defence, the national economy, and technical matters, and there would be a "close, honourable, and fruitful co-operation" between the two countries By its geographical position and its economic needs Morocco was a Western country, but it also belonged to the great Moslem community, and his ambition was to make it "a meeting-place of two civilizations"

The Prime Minister declared that the Government would democratize the country's institutions, reorganize and "purify" the caïdal system of administration, and reform the judicial system, which would be based on the principle of the separation of powers Civil liberties would be restored, implying the raising of the state of siege, agricultural workers would be granted trade union rights; and measures would be taken for the development of industry, agriculture, education, and housing, the improvement of working conditions, and the modernization of the countryside. In conclusion, the Prime Minister appealed to the Moroccan people to assist the Government by maintaining order.

One of the first measures of the new Government was a decree, issued on Dec. 19, dividing Morocco for administrative purposes into two autonomous cities (Rabat and Casablanca) and 13 regions (Meknès, Fez, Taza, Oujda, Agadir, Safi, Mazagan, Beni-Mellal, Marrakesh, Ouarzazate, Rabat, Tafilet, and Chaouia), each of which was placed under an *amel* (plural *oumal*), or governor. The *oumal*, who were appointed on the same day, included Si Fatmi Ben Slimane and Si Tahar Ou Assou (a former member of the Council of the Throne), who were appointed governors of the Fez and Safi regions respectively. No appointments were made for the Marrakesh and Ouarzazate regions, which fell within the sphere of influence of the Pasha of Marrakesh, El Glaoui.

This reorganization of the administration was made necessary by the fact that the Sultan's restoration had undermined the authority of those pashas and *caïds* who had supported the ex-Sultan Ben Arafa In consequence, certain rural areas had lately lapsed into semi-anarchy; tribesmen had refused to pay taxes, many *caïds* had been driven away, and a number had been murdered. To restore governmental control throughout the country, the *oumal* were given responsibility for the maintenance of order, and were also required to supervise the conduct of the pashas and *caïds* in order to prevent any abuse of their authority The Ministry of the Interior emphasized that no activities calculated to disturb public order would be tolerated; that all taxes must be paid regularly, and that officials guilty of corruption or misappropriation would be severely punished.

The Sultan appointed on Jan. 12 new pashas for the towns of Meknès, Port-Lyautey, Agadir, and Azemmour, as well as 14 new *caïds*, to replace former supporters of Ben Arafa who had been dismissed.

A general amnesty had been issued by the Sultan on Dec. 2 for all prisoners sentenced by the Sherifian courts on political charges since January 1954. The Resident-General, M. Dubois, had previously announced that all political prisoners and certain common-law prisoners who had been sentenced by the

Sherifian courts to terms of two years or less would be released; that the sentences on other prisoners would be reduced; and that the cases of prisoners condemned by French or military courts would be examined in Paris.

Dr Causse, M. Mattei, and M Cambiazo (leading members of the *Présence Française*), as well as Maitre Legrand (a prominent pro-nationalist lawyer), all of whom had been expelled from Morocco following the July riots in Casablanca (see 14473 A), were granted permission to return on Dec. 21

Other recent developments in Morocco are described below under cross-headings.

Policies of Nationalist Parties.

The executive of the Istiqlal, at the conclusion of a four-day meeting in Madrid, issued a policy statement on Nov. 21 expressing support for the main lines of the Sultan's speech of Nov. 18, and calling for the abolition of the protectorate system set up by the Treaty of Fez.

The statement said that the Istiqlal took the side of "the exploited and oppressed classes, that is, the workers, peasants, and small traders," and rejected "any economic conception based on profit alone." The statement was signed by Si Allal El Fassi (the party leader, who had refused to return to French Morocco until independence was achieved), Hadj Ahmed Balafredj (the secretary-general), Si Mohammed Lyazidi (a brother of Si Ahmed Lyazidi), M Bouabid (Minister of State), and Hadj Omar Abd-el Djellil

An Istiqlal party congress held at Rabat on Dec. 2-4 adopted resolutions demanding the abrogation of the Treaty of Fez, the conclusion of an agreement with France recognizing Morocco's full independence, including the right to diplomatic representation and a national army, wage increases, agrarian reforms, and other measures to raise living standards; the lifting of the state of siege and other restrictions on civil liberties, equal rights for women, including the right to vote and to hold public office; equality of treatment for all citizens, regardless of race or creed; and full civic and political rights for the Jewish community. A notable feature of the congress was the active part played by women delegates, all of whom were unveiled and some of whom wore European dress.

At a press conference on Nov. 17, M. Bendjelloun defined the policy of the P.D I., which, he said, would demand diplomatic representation for Morocco, the formation of a Moroccan army and police force, the admission of Morocco to the U.N., and the opening of negotiations between France and Spain "in order that the whole of Morocco's territory may recover its independence." He added that the United States had no right to establish bases in Morocco without the Sultan's consent, and that the P.D.I. would demand the opening of negotiations "so that these bases may be regularly installed."

After a number of clashes between members of the Istiqlal and the Democratic Independence parties (one of which resulted in the death of several people and injuries to over 30), and after an appeal by the Sultan, who severely condemned such inter-party strife, a conference of representatives of the Istiqlal, the Democratic Independence Party, the National Reformist Party, and the Party of Unity and Independence was held on Jan. 28. It adopted a resolution, subsequently signed at the Imperial Palace in the presence of the Sultan, providing for the setting up of a four-party "committee of conciliation and union" to settle inter-party disputes and to reinforce a "fraternal spirit" between all Moroccan patriots.

Disorders and Terrorist Activities.

Despite the Sultan's return, local disorders continued throughout the latter half of November and during December and January.

At Rabat on Nov. 19, the Khalifa (deputy pasha) of Fez was killed in the courtyard of the Sultan's palace, together with his bodyguard, after he had drawn his revolver on a threatening crowd, a *caïd* and a sheikh were murdered by members of their respective tribes, and five other "collaborators," including two *caïds*, were seriously injured All these incidents were attributed to tribesmen who had entered Rabat to pay homage to the Sultan, and who were less amenable than the townspeople to the discipline imposed by the militias maintained by the big political parties To prevent further violence, the Sultan announced that he would receive no more deputations, and issued an appeal for order.

In Casablanca three Moroccans were fatally wounded on Nov. 19 when guards used tear-gas to suppress a mutiny of political prisoners A general strike in the city was called as a protest on Nov. 22—the day of their funeral, which was attended by over 100,000 people—without any incidents occurring

In southern Morocco serious riots, in which three Moroccans were killed and nine injured by police fire, occurred at Marrakesh on Dec 5, following the funeral of a Moroccan who had been found murdered and whose death was popularly attributed to Europeans. Troops which had been sent on Jan. 9 to El-Kelaa (60 miles E of Ouarzazate), where rioting had recently taken place, opened fire when stoned by the crowd, five people being killed. In the Oulmes mountains (70 miles S.E of Rabat), an area which had hitherto remained peaceful, about 15 men attacked a forestry post during the night of Jan. 15-16, and killed a French forestry official.

Numerous incidents were also reported from north-eastern Morocco, where some 200 *fellaghas* were believed to be operating with the aim of encouraging the turbulent Beni-Snassen tribe to revolt and thereby to establish a continuous "front" from the Riff area to Algeria, as a result, the number of terrorist acts in the Beni-Snassen country during October and November reached 98, as against 84 during the whole of the previous nine months. In other parts of N E Morocco, a French patrol was ambushed near Berkane on Dec. 3, and a wounded rebel, together with his two guards, was carried off from the hospital at Berkane during the night of Dec 5-6 by a uniformed commando of about 30 men Near Taforalt the house of a *caïd* who had supported Ben Arafa was attacked during the night of Dec 8-9, one of his guards being killed, and a police officer was killed during an attack on a police post on Dec 19 In the Oujda area an armed band attacked on Jan. 16 the house of the French director of a rural development scheme, who was murdered together with his wife

Ten murders took place on Jan 15-16 in different parts of Morocco, five of them in Casablanca, whilst on Jan. 17 a Frenchman was shot in Casablanca and a French soldier and a Jewess were murdered at Fez. The Sultan and the Cabinet issued a statement on Jan. 18 denouncing these crimes and saying that their authors had "made clear their criminal determination to disturb the atmosphere of confidence in the country on the eve of the negotiations which are about to open between France and Morocco."

The *Agence France-Presse* reported on Nov. 21, 1955, that over 6,000 acts of terrorism had occurred between the Sultan's deposition on Aug. 20, 1953, and his return to the throne, as a result of which 710 persons (including 103 Europeans) had been killed and about 2,000 injured, 460 of whom were Europeans. An official estimate of the number of terrorist acts in recent months was given on Dec. 12 as follows: August, 822; September, 613; October, 536; November, 386. During November one European and 79 Moroccans were killed and 33 Europeans and 107 Moroccans were injured.

The Riff Revolt.

The general unrest among the tribes was particularly marked in the Riff area, where there was also a flaring-up of *fellagha* attacks.

The most serious incident since the beginning of the Riff uprising occurred on Nov. 25, when about 100 rebels ambushed a French force escorting an ambulance between Tizi Ouzli and Aknoul; 19 soldiers and at least five insurgents were killed, and eight soldiers wounded French casualties in the Riff from Oct 1 - Dec. 1 were given on Dec. 3 as 101 killed and 173 wounded.

General Agostini was appointed on Nov 26 to the command of this area, where 15,000 French troops were said to be operating. The rebels, who were helped by the almost inaccessible mountainous terrain, were believed to number about 2,000, under the command of Mohammed el-Khabouchi, a former company-sergeant-major in the French Army, who had served in Indo-China and had been taken prisoner at Dien Bien Phu

After an interval during which only minor skirmishes were reported, the insurgents began a new offensive on Dec 29. They unsuccessfully attacked the post of Beni-Ouled, after blowing up bridges and cutting telephone lines in the area, but succeeded in overrunning the frontier posts of Bab-Mareklo and Taounate-El-Kchourne during the night of Dec 31 - Jan 1. In the fighting, which was spread over a 95-mile front, the rebel bands suffered heavy casualties, 56 being killed in an action at Tizi-Ouzli on Dec 29. General Agostini launched a large-scale operation on Dec. 31, with artillery and air support, in which the two posts were recaptured

Violent fighting again broke out in the Riff on Jan. 28 when a battalion of the Foreign Legion clashed with a rebel band some 300 strong north of Taza, the engagement being the bitterest since October last In fierce hand-to-hand fighting at least 40 rebels and 18 Foreign Legionaries were killed, but with darkness falling the rebels broke off the fight and made off into the hills, carrying away a number of their dead and wounded. Jet fighters and bombers of the French Air Force attacked the rebels on Jan. 30, and more troops were moved up to the high barren mountains The French military authorities connected the increased rebel activity with a recent meeting held at Nador by North African nationalists, in the course of which it was decided to intensify operations in Eastern Morocco and on the Algerian-Moroccan border

Legalization of Moroccan Trade Unions.

A prominent part in the negotiations before the formation of the Cabinet was taken by the *Union Marocaine du Travail* (U.M.T.), or Moroccan Workers' Union, which, however, decided against accepting representation in the Government. This organization had been formed on March 20, 1955, when Moroccan trade unions were still prohibited, but was legalized by a decree issued on Sept. 19.

Although Moroccans had been forbidden since 1938 to organize or join trade unions, this prohibition was largely evaded in practice as many Moroccans joined European unions. A draft decree permitting the formation of Moroccan unions, on condition that all executive offices were held by Europeans, was rejected in 1948 by the Sultan, who two years later appealed to the French Government to grant Moroccans full trade union rights The *Union Générale des Syndicats Confédérés du Maroc* (affiliated to the Communist-led

C G T. in France) was formed in 1951, but ceased to exist after the arrest of its leaders on charges of complicity in the Casablanca riots of December 1952 (see 12643 A). The investigating magistrates of the French military court found on Sept 27, 1954, however, that no case had been established against 51 of the nationalist and trade union leaders arrested at that time, and ordered their release

The conference on March 20, 1955, at which the U M.T. was formed, decided that it should be independent of all the existing French trade union federations. It elected a purely Moroccan executive, with M Ben Seddik as general secretary, adopted a resolution emphasizing that the U M T. was intended to unite all the workers of Morocco, irrespective of religion, nationality, or race, and voted in favour of affiliation to the International Confederation of Free Trade Unions. The Casablanca dock-workers, both French and Moroccan, subsequently announced on April 19 their decision to join the U.M.T. The Moroccan section of the C G T dissolved itself as from Jan 1, 1956, and appealed to its members to join the U.M.T.

After consultation between the French authorities and the U M.T. leaders, a decree granting to Moroccans (except agricultural workers) the right to organize and belong to trade unions was issued on Sept 19, 1955. A second decree promulgated on Sept 28 provided for the election, in all enterprises with more than 50 employees, of workers' delegates empowered to negotiate on wages and working conditions and to co-operate with the management in the administration of welfare schemes Government and municipal employees were excluded from the scope of the decree, and it was stated that the date of its entry into force, and the method of its application as regards agricultural workers, would be announced later

Death of El-Glaoui.

The Pasha of Marrakesh, who had recently undergone a serious operation, resigned his post on Jan. 13 and died on Jan 23, 1955.

Sidi Hadj Thami Ben Mohammed El Glaoui (who was over 80) was born at Telouet, in the Great Atlas, the son of a Berber chief claiming descent from Mohammed. In his youth he took part in tribal wars which brought a large area south of the Atlas under the domination of the Glaoui tribe, and was appointed Pasha of Marrakesh and many of the surrounding areas in 1908, after a revolt led by his elder brother had caused the abdication of Sultan Mulai Abdul Aziz and the enthronement of Sultan Mulai Hafid, Following the establishment of the French protectorate in 1912, El Glaoui consistently supported French interests, helped to suppress Berber revolts, and maintained order when French troops were withdrawn during the 1914-18 war. In 1952 he declared for the Allies after the landings in North Africa, and in consequence was allowed to retain control of the police and the administration of justice in Marrakesh, to levy taxes, and to maintain a private army. His influence was increased by his great wealth, derived mainly from his large agricultural estates and from mining interests.

After a quarrel with Sultan Mohammed V (the official title of Sultan Ben Youssef) in 1950 he emerged as the leader of the "traditionalists," and in 1951, by sending a large force of Berber tribesmen against Fez and Rabat, compelled the Sultan to dismiss his nationalist advisers. In May 1953 he launched an agitation for the Sultan's deposition, which culminated in August in the latter's exile and the enthronement of Ben Arafa. The nationalists replied with a terrorist campaign, during which an attempt was made on El Glaoui's life The Marrakesh riots of July 1955, and the Middle Atlas rising in the following month, showed that his influence had been undermined, and on Oct. 25 he publicly announced his support for the restoration of Mohammed V, to whom he subsequently appealed for pardon

Relations between French and Spanish Morocco.

The French High Commissioner in Morocco, M. Dubois, and the High Commissioner of Spanish Morocco, Lieut.-General Garcia Valino, met for discussions on Jan. 10 at Palafito, in the Spanish zone. A joint communiqué stated that the talks had taken place in an atmosphere of "cordiality and mutual understanding"; that they had considered questions affecting both zones, and particularly the situation in the Riff; that General Garcia Valino had informed M. Dubois of the Spanish Government's intention to introduce "political reforms which will permit, by a parallel development, the independence of Morocco to be assured, while safeguarding the legitimate interests of the two Powers"; and that he had accepted an invitation to meet M. Dubois shortly in the French zone. The meeting was the first to be held between the French and Spanish representatives in Morocco since January 1953.

Nationalist Agitation in Spanish Morocco. - Political and Economic Reforms.

From November, 1955, onwards demands for the unity and independence of Morocco were put forward by the two nationalist parties operating in the Spanish zone—the Reformist Party and the Unity and Independence Party.

A delegation from the latter party was received by Sultan Ben Youssef on Nov. 28, and subsequently issued a communiqué expressing the hope that "Spain, which has never ceased to give promises to the Moroccan people, will carry out those promises now that France has recognized the principle of Moroccan independence" M Abdelkhalek Torres (leader of the Reformist Party and Minister of Social Affairs in the Khalifa's Cabinet) issued on Dec. 10 a joint statement with Si Allal El Fassi, who was then visiting Tetuan, in which they appealed to the Spanish Government to "take the measures which are now called for to help in the attainment of Morocco's independence and territorial integrity."

General Franco declared on Nov. 30, in an interview with U.S. journalists, that it would be a "grave error" to introduce a democratic system in Morocco, as France appeared to be doing; he added that political evolution must be brought about gradually, "as we are doing in our zone," until the Moroccans were ready to govern themselves. In a further statement on Dec. 15 he said that it would be contrary to the interests of the Moroccan people to introduce "the trickery and internal strife of political parties on the European model," and that democracy would open the door to Communism. General Garcia Valino announced on Dec. 19 that he would "increase the responsibilities of Ministers of the native Government and intensify the transfer of administrative powers to Moroccans," but added that "several long and complex stages" must be passed through before Morocco achieved complete unity and independence.

General Franco's statements aroused strong dissatisfaction in Spanish Morocco. Sheikh Mekni Naciri, the leader of the Unity and Independence Party, said on Jan. 2, 1956, that they had caused "stupefaction in Arab circles" and that the Moroccans were "beginning to feel reserved as to Spain's policy in Morocco." M. Torres and Si Abdallah Guennoun (Minister of Justice) resigned from the Khalifa's Cabinet on Jan. 9, and the Khalifa himself issued a statement expressing the hope that General Franco would make as soon as possible "a declaration recognizing the independence and territorial unity of Morocco and the sovereignty of the Sultan."

The Spanish Government issued on Jan. 13 a statement announcing its decision "(1) to make known its firm intention to continue to defend, with the authority of the legitimate Sultan Mohammed V, the unity of the Empire and the independence of Morocco; (2) to supply, in agreement with the Khalifa and in collaboration with the Moroccan Government and authorities, the means of attaining the self-government of the zone by its natural authorities in an orderly and peaceful manner; (3) to continue to assist and co-operate with the Moroccan people, so as to ensure that neither Communism nor any other form of subversion will be able to disturb the peaceful execution of this task; (4) to follow attentively the development of the general situation in Morocco, as well as the policy pursued in the neighbouring zone [i.e., French Morocco], so as to realize the aspirations of the Moroccan people without injuring Spain's legitimate interests."

In statements made on Jan. 17-19, the National Reformist Party, as well as Si Abdallah Guennoun, expressed their willingness to accept a separate Government in the Spanish zone and to co-operate with the Spanish authorities, on the understanding that such a Government would be of a transitional character pending the realization of the independence and unity of the whole of Morocco.

A decree promulgated in Madrid on Jan. 28 authorized General Garcia Valino to reorganize his administration in such a way as to transfer governmental powers progressively to Moroccans, under the authority of the Khalifa. General Franco's previous assent was required for any such measure.

A new economic and financial charter for the Spanish possessions in Morocco, including the ports of Ceuta and Melilla, came into operation on Jan. 1 under a law approved by the *Cortes* in December.

The preamble, which described these territories as of "inalienable Spanish sovereignty," said that Spain had the obligation to develop the "exceptional natural advantages" of Ceuta and Melilla by converting them into modern commercial and industrial centres, bearing in mind "the possible consequences of today's decisions on the more or less near future, not only in these territories but also with regard to the evolution of the neighbouring peoples and the permanent influence of Spain in North Africa"

The most important feature of the charter was that the free Customs zone, previously confined to the port areas of Ceuta and Melilla, was extended to the whole of Spanish Morocco, thus facilitating the establishment of processing industries for foreign materials imported duty-free without losing their nationality of origin and intended for re-export abroad. To attract capital, the taxes on profits obtained in the territories were reduced by 50 per cent, and relief was given from some other levies Provision was also made for an extensive programme of public works.

Melilla has been Spanish since 1496, and Ceuta since 1581.

(Prev. rep. Morocco, 14528 A.)

A. UNITED KINGDOM. — Labour Party. - Mr. James Griffiths elected Deputy Leader. - Working Parties to report on Party Policies.

Mr. James Griffiths was elected deputy leader and vice-chairman of the Parliamentary Labour Party on Feb. 2, receiving 141 votes against 111 for Mr. Aneurin Bevan, with 23 Labour M.P.s not voting. The deputy leadership became vacant after the resignation of Mr. Herbert Morrison.

Mr. Griffiths (65), a former miner, and onetime president of the South Wales Miners' Federation, has represented Llanelly since 1936 and has been a member of the National Executive of the Labour Party since 1939. He was Minister of National Insurance from 1945-50 and Secretary of State for the Colonies in 1950-51.

The two vacancies on the Parliamentary Committee of the Labour Party (the "shadow Cabinet"), resulting from the election of Mr. Gaitskell and Mr. Griffiths as party leader and deputy-leader, were filled—in accordance with party procedure—by the two runners-up in the "shadow Cabinet" election of October last: Mr. Kenneth Younger (a former Minister of State at the Foreign Office) and Mr. Tom Fraser (a former Under-Secretary of State for Scotland). Mr. Gaitskell and Mr. Griffiths are *ex-officio* members of the "shadow Cabinet" in their new capacities.

At a press conference on Nov. 24, Mr. Griffiths had announced that special studies of a number of subjects would be carried out by working parties, including representatives of the T U C, which had already been set up. These working parties would report to the party conferences during the next few years, and their reports, if approved by the party, would form the basis of the Labour Party's electoral programme. Three subjects would be given priority for the next (1956) conference—studies of "equality," of "the individual and society," and of housing. Four more reports (on social security and old age, publicly-controlled industries, ownership of industry, and control of industry) would be presented to the 1957 conference, and the remaining three—on "the atomic and automative age," agriculture, and education—to the 1958 conference. Mr. Griffiths explained that the new studies would be a continuation and extension of the policies embodied in the previous policy statement, *Challenge to Britain*, and the election manifesto, *Forward with Labour*, and that existing policy covered in those documents would remain unchanged for the time being.

Mr. Morgan Phillips (the party secretary) announced on the same day that the National Executive had agreed to set up two new sub-committees to deal respectively with party organization in the regions and with the organization of young people. He explained that, with the concurrence of Mr Harold Wilson, the National Executive had decided not to create a special standing sub-committee on party organization, such as had been proposed in the Wilson Report on party organization. It was subsequently announced that Mr. Wilson had been appointed chairman of the Organization Sub-committee, and Miss Alice Bacon chairman of the Executive's Publicity and Political Education Sub-committee (a new body).

The National Executive decided on Jan. 25 that Mr. Hugh Gaitskell should continue to hold the post of treasurer of the Labour Party, concurrently with that of party leader, until the next annual conference in October. Mr. Morgan Phillips recalled that a precedent existed in the case of Mr. Arthur Henderson, who had simultaneously held the positions of leader, treasurer, and secretary of the party.—(Daily Herald) **(Prev. rep. Mr. Gaitskell, 14583 A; Wilson Report, 14468 A; Margate Conference, 14515 A.)**

B. ISRAEL. — Protest to Soviet Union.

The Foreign Minister of Israel (Mr. Sharett) made a strong verbal protest on Dec. 30 to the Soviet Ambassador in Tel-Aviv (M. Abramov) at M. Khrushchov's references to Israel in his speech to the Supreme Soviet on Dec. 29 (see page 14655, second column). No details were made public, but it was stated in the Israeli press that the Government of Israel took particular exception to M. Khrushchov's statement that Israel had adopted a "hostile and threatening" policy towards her neighbours since the State came into existence, and that she had allowed herself to be used by "imperialist Powers" as their "instrument against the Arab peoples." It was understood that Mr. Sharett had warned the Ambassador that M. Khrushchov's remarks could be construed as a direct encouragement to the Arab States to attack Israel.
(Times - Le Monde, Paris) **(Prev. rep. 14654 A.)**

C. YUGOSLAVIA. — U.K. and Turkish Requests for Clarification of Marshal Tito's Criticism of Baghdad Pact.

The British and Turkish Ambassadors in Belgrade (Sir Frank Roberts and M. Sadi Kavur) called at the Yugoslav Foreign Ministry on Jan. 14 to request a clarification of President Tito's criticisms of the Baghdad Pact, made after his return from his visits to Egypt and Ethiopia. No official statement was issued, but it was understood that satisfactory assurances had been received.—(Daily Telegraph - Le Monde) **(Prev. rep. President Tito, 14659 A.)**

D. BAGHDAD PACT. — Inaugural Meeting of Economic Committee. - Anglo-Iraqi Agreement on Disposal of U.K. Property in Iraq. - Abolition of Visas between Turkey and Pakistan.

The inaugural meeting of the Economic Committee of the Baghdad Pact was held in Baghdad on Jan. 10-11 under the chairmanship of Mr. A. H. Ebtehaj (Persia), and was attended by delegates from Iraq, Pakistan, Persia, Turkey, and the United Kingdom, and also by U.S. observers. The Committee agreed that, in order to secure joint consideration of the economic problems affecting the area, special studies should be made by working parties in a number of fields, including trade relations, communications, agriculture and land use, joint development projects, technical education and training, health, and other matters. It was also agreed to propose to the Council of the Baghdad Pact the establishment, with British assistance, of an atomic energy training centre in Baghdad for the benefit of all member-countries.

Lord John Hope, Joint Parliamentary Under-Secretary, Foreign Office, announced in the House of Commons on Dec. 21, 1955, that an exchange of Notes between Britain and Iraq regarding certain matters arising from the special agreement of April 4, 1955 (see 14137 A) had been signed in Baghdad on the previous day.

He recalled that it had been agreed that certain property in Iraq was to be handed over to the Iraqi Government and paid for at its *in situ* value, and said that as a result of subsequent negotiations the value of this property had been agreed at £2,755,000. The two countries had decided that their common interest in the defence of the area would best be served if Britain waived the payment of this sum and Iraq, in return, undertook to devote in the years 1956 and 1957 at least £2,000,000 to the purchase in the U.K. of arms, equipment, and defence stores, and the remainder to expenses connected with the training of Iraqi forces in co-operation with British forces. The Iraqi Government had also undertaken to make available in Iraq, free of charge, certain facilities for the British armed forces. Lord John Hope added that these measures were designed to strengthen the close connexion between the British and Iraqi forces and thereby to consolidate the new defensive association of the Baghdad Pact.

A Turkish-Pakistani agreement abolishing visas for travel between the two countries was signed on Jan. 7.—(Times - Board of Trade Journal - Pakistan High Commissioner's Office, London) **(Prev. rep. Baghdad Pact, 14565 A.)**

E. UNITED STATES. — Central Intelligence Agency. - Appointment of Reviewing Committee.

The appointment of a part-time "watchdog" committee to keep under review the activities of the Central Intelligence Agency, and other departments concerned with gathering security information, was announced by President Eisenhower on Jan. 18.

The members of the committee were Dr. James R. Killian jr., president of the Massachusetts Institute of Technology (chairman); Admiral Richard L. Conolly, president of Long Island University; Lieut.-General James H. Doolittle; Mr. Benjamin F. Fairless, director of the United States Steel Corporation, General John E. Hull, former Commander of the U.S. Forces in the Far East, and now president of the Manufacturing Chemists Association; Mr. Joseph P. Kennedy sr, former Ambassador to Britain; Mr Robert A. Lovett, former Secretary of Defence and Under-Secretary of State, and Mr Edward L Ryerson, chairman of the executive committee of the Inland Steel Corporation.

The setting-up of such a committee was one of the recommendations made by the Hoover Commission on the Organization of the Executive Branch of the Government, which had published a report on the U.S. intelligence services on June 28, 1955. The commission had noted "administrative deficiencies" in the Central Intelligence Agency and had urged an internal reorganization of the C.I.A. It had also expressed "deep concern" about the lack of intelligence data from the Soviet Union and other Communist countries.—(New York Times - New York Herald Tribune) **(Prev. rep. C.I.A., 12701 A; Hoover Commission, 14364 A.)**

F. CEYLON. — Prime Minister's Home donated to Orphan Children of Ceylon.

The Ceylon Government Information Department announced in December last that the Prime Minister of Ceylon, Sir John Kotelawala, was to make a gift of his Colombo home, Kandawela, to the orphan children of Ceylon, irrespective of caste, creed or race. The income from the Kandawela estate, nearly 10,000 rupees a month, would go to finance a Home for the orphan children of Ceylon on the lines of Dr. Barnardo's Homes in Britain.

(Ceylon Government Information Department, Colombo)

FEBRUARY 4—11, 1956

A. FRANCE. — M. Guy Mollet forms "Republican Front" Government. - Socialist and Radical Coalition. - M. Mollet's Policy Statement. - Vote of Investiture by National Assembly. - M. Mollet's Visit to Algeria. - French Settlers' Demonstrations against Appointment of General Catroux as Resident Minister. - Resignation of General Catroux. - M. Lacoste appointed Minister Governor-General in Algeria.

The newly-elected National Assembly met for the first time on Jan. 19 under the chairmanship of M. Marcel Cachin, the 86-year-old Communist leader, who presided as *doyen d'âge* pending the election of the President of the Assembly. M. Cachin opened the new Parliament with a speech in which he called, *inter alia*, for the formation of a "Popular Front" Government, increased social security benefits, and recognition of the right of colonial peoples to administer their own affairs.

An official list of party affiliations in the new National Assembly, differing only slightly from the figures issued by the Ministry of the Interior after the elections (see 14625 A), was published on Jan. 25 in the *Journal Officiel*, and is reproduced below. It excludes the 30 deputies still to be elected in Algeria, as well as one result (for French Oceania) still outstanding from the overseas territories. The figures include deputies who are *apparentés* (affiliated) to the various parties:

Communists and *progressistes*	150
Socialists	95
Radicals	58
U.D.S.R. and *Rassemblement Démocratique Africain* (R.D.A.)	19
R.G.R. and *Centre Républicain*	14
M.R.P. (Popular Republicans)	73
Overseas Independents	10
Independents and *Paysans d'Action Sociale*	83
Paysans	12
Social Republicans (Gaullists)	21
Poujadists	52
Non-inscrits (unaffiliated)	6

Notes. (1) The Communist figure of 150 deputies comprises 144 Communists, 5 *Progressistes* affiliated to the Communists, and one deputy affiliated to the *Progressistes*.

(2) The total Radical and affiliated strength is 91, comprising 58 "Mendesian" Radicals (the left-wing of the Radical Party, led by M. Mendès-France), 19 U.D.S.R. and R.D.A. deputies (supporting M. Mendès-France), and 14 R.G.R. deputies (the Radical right-wing led by M. Edgar Faure, the outgoing Prime Minister). Owing to the split between the two wings of the Radical Party, the R.G.R. will, in effect, follow an independent policy in the National Assembly.

(3) The *Journal Officiel* described the Overseas Independents as *apparentés* to the M.R.P., giving the latter party a total voting strength of 83 in the Assembly.

(4) The "Moderate" (Conservative) parties—Independents, Independent *Paysans*, and Dissident Gaullists—formed themselves into a group under the designation *Indépendants et Paysans d'Action Sociale* (see below). The *Journal Officiel* described the 12 *Paysan* deputies as affiliated to this group, thus bringing the total voting strength of the *Modérés* to 95—equivalent to that of the Socialists, and making these two parties the largest in the Assembly after the Communists.

(5) The Poujadists (who include one *apparenté*) took the official designation of *Union et Fraternité Française* (UFF), by which name they will be known in the Assembly.

(6) The *non-inscrits* include the three deputies of the right-wing *Rassemblement National* group. They also include the deputy who was returned for New Caledonia on Jan. 8 as an Overseas Independent, but who was not officially listed as such in the *Journal Officiel*.

M. André Le Troquer (Socialist) was elected President (Speaker) of the National Assembly on Jan. 24, after three ballots, in succession to M. Pierre Schneiter (M.R.P.), who presided over the former Assembly.

On the first two ballots no candidate succeeded in obtaining the absolute majority required for election, the figures on the first ballot being: M. Schneiter (M.R.P.) 212, M. Cachin (Communist) 145, M. Le Troquer (Socialist) 133, and M. Ruf (Poujadist) 57. The Communists then announced that they would support M. Le Troquer, the vote on the second ballot being: M. Le Troquer 279 (two less than the absolute majority needed), M. Schneiter 217, M. Ruf 56. On the third ballot (in which only a relative majority was required) M. Le Troquer received 280 votes against 205 for M. Schneiter, and was accordingly elected. [A biography of M. Le Troquer is given in 13359 A.]

Six Vice-Presidents of the Assembly were elected, as follows: M. Garaudy (Communist); M. Lacoste (Socialist); M. Bruyneel (Independent), M. Konaté (U.D.S.R.-R.D.A.), a deputy from the French Sudan, M. Liquard (Social Republican), and Mme. Vaillant-Couturier (Communist).

M. Le Pen (Poujadist) maintained that his party was entitled to one of the vice-presidential posts on the basis of its representation, and asserted that the Assembly had departed from its usual procedure of allotting these posts between the parties on a proportional basis. By 387 votes to 160, however, the Assembly defeated a Poujadist motion asking it "not to give consideration" to the vice-presidential appointments.

Prior to the inaugural session of the new National Assembly, the various political parties had held meetings to define their policies in the new Parliament. The most important decision was that of the Socialists and Radicals to co-operate in forming a "Republican Front" Government, based upon a coalition of the Socialist Party, the "Mendesian" Radicals, and the U.D.S.R. group.

Socialists. A congress of the Socialist Party (Jan. 15) unanimously approved a motion calling for a "Republican Front" Government without alliances with either "the representatives of reaction" (i.e. the parties of the Centre and Right) or "the enemies of democracy" (i.e. the Communists and Poujadists). Reviewing the various kinds of Government that could theoretically be formed, M. Mollet said that the parties of the Right and Centre did not have a sufficient majority to form an administration, whilst the democratic parties of the Left would be unable to form any "Popular Front" Government which did not depend either on Centre or on Communist support. Were the Communists to be included in a "Popular Front" Government, there was every reason to expect that they would try to sabotage it from within, as they had sabotaged M. Léon Blum's Government in 1936-37. A Government of national union was also out of the question because the Socialists could not co-operate with parties whom they had denounced for their "disastrous" policies in the past. The only solution, therefore, M. Mollet concluded, was a "Republican Front" Government comprising the Socialists, Radicals, and affiliated groups.

The short-term aims of such a minority Government, M. Mollet declared, should be the establishment of budgetary stability; an increase in the purchasing power of wage-earners by increasing the minimum wage and gradually abolishing the differentiation between minimum wage-levels in various parts of France, the introduction of three weeks' paid holiday a year, instead of the present official fortnight, and tax reforms for the benefit of small shopkeepers. The Government would also have to face the problems of reforming the Constitution and the electoral system, although these could be left to the Assembly and not necessarily to Government initiative. The Socialist Party would unanimously support the abrogation of the *Loi Barangé* providing for the payment of subsidies to Catholic schools, but the defence of the principle of *laicité* must not be allowed to take on an anti-religious character. Finally, the problem of Algeria had to be solved, and this could only be done by negotiations with an Algerian Assembly freely elected by a single college of voters. Such a solution must pay due regard to the rights of minorities, and particularly of the European minority.

Radicals. The executive committee of the Radical Party, meeting on Jan. 16, approved the formation of a "Republican Front" Government with the Socialists, and gave full support to a three-point programme (put forward by M. Mendès-France) comprising (1) a settlement of the Algerian problem by free elections to be held within six months, (2) constitutional reforms; and (3) reform of the electoral law of 1951. M. Mendès-France stressed that no alliance was possible with the Communists, in view of fundamental differences on questions of foreign policy, electoral and constitutional reform, and North Africa.

The committee also confirmed the exclusion from the party of M. Edgar Faure, subject to confirmation by the next party congress in October. M. Faure, who attended the meeting, reiterated that he had had no obligation to seek the party's approval for decisions taken in his capacity as Prime Minister, nor had he been under any obligation to submit to party discipline at the time when he held the Premiership.

M. Mendès-France subsequently had conversations with M. Mollet at which full agreement was reached on the policy to be pursued by a "Republican Front" Government.

Moderates. The deputies of the "Moderate" parties unanimously agreed on Jan. 18 to form a single group in the Assembly under the name of the *Indépendants et Paysans d'Action Sociale*. M. Antoine Pinay (Foreign Minister under M. Faure) was unanimously elected leader of the group, which, it was stated, would "place the interests of France above all else."

M.R.P. The national committee of the M.R.P. passed a resolution recommending the formation of a Government based upon "the necessary union of Republicans", disapproving of any form of minority Government; and opposing the formation of any "Popular Front" Government which included the Communists.

Poujadists. A three-day conference of the U.D.C.A., held at the Vélodrôme d'Hiver in Paris on Jan. 14-16, ended with the adoption of motions reiterating the party's demand for the convening of a "States-General" (without, however, precisely defining this body) and for economic and financial reforms to benefit the shopkeepers, artisans, and "small men." No definite statements of policy were issued on other matters—e.g., on Algeria, electoral reform, etc.

M. Poujade reiterated that the U.D.C.A. would not act as "saboteurs" in the National Assembly; again denied that he was in any way a Fascist; and declared that his movement was "attached to democratic institutions—but they must be clean." He insisted that the Poujadist deputies were "professional and syndical," and

declared that "once we have achieved fiscal reform and the convocation of a States-General, our deputies will consider that our task is ended and will go home." In reply to questions, M. Poujade said that candidates of his movement, including Moslems, would stand in the Algerian elections, and that Poujadist branches would be formed in the overseas territories

Addressing the Foreign Press Association in Paris on Jan 18, at a luncheon at which he was guest, M Poujade declared that his party were not opposed to taxation but had been "driven to action" by an "unjust and antiquated" system of taxation which, he alleged, benefited the rich and hit the "small man" severely He strongly denied that his movement was activated by racial hatred, declaring in this connexion ·

". . The Constitution of the First Republic guaranteed equality to all citizens If the authors of the Declaration of the Rights of Man were Fascists, I shall accept that designation for myself . Racialism—which means the exaltation of a race—is impossible here. France is a melting-pot of many races . I have attacked Jewish Ministers because they were Ministers, not because they were Jews. I have never denied the right of Mendes-France to govern the country if he can get a mandate for it . . I have attacked others —such as Pinay and Bidault—just as violently, and the Vatican has made no complaint." M Poujade added that there were Jews in his movement, and that he had written to the Chief Rabbi of France to assure him that he was not anti-semitic. Asked whether he approved of a violently anti-semitic statement made at the Vélodrôme d'Hiver meeting by one of his leading supporters, M Léon Dupont, M. Poujade said that he deprecated M. Dupont's method of expression, but added that M. Dupont had been "carried away by the atmosphere." In answer to further questions, also on the subject of anti-semitism, M Poujade expressed the opinion that immigrants should not be allowed to hold public office until they had been "some time" in France—"perhaps three generations"

Despite M. Poujade's denials of anti-semitism, the chairman of the U.D C.A. in the Bas-Rhin *département*, M Jean Kaufman, resigned from the party on Jan 25 in protest at its alleged anti-semitic tendencies In a letter to M Poujade, he said that statements by certain leading members of the party, notably M Dupont, had "the same smell as Hitler's propaganda," and added that the atmosphere of the Vélodrôme d'Hiver meeting had been one of "hate, provocation, and racialism"

After M. Le Troquer's election as President of the Assembly, M. Edgar Faure formally tendered his resignation from the Premiership to President Coty, who, after two days of consultations with party leaders, asked M. Guy Mollet on Jan. 26 to form a new administration. M Mollet accepted the task and subsequently announced the formation of a Government in which two posts—those of Minister for Ex-Servicemen's Affairs (to which M. Chaban-Delmas was appointed) and of State Secretary for Industry and Commerce—were allotted to the Social Republicans, the other portfolios being distributed between the Socialists, Radicals, and the U.D.S R.-R.D.A. group.

The Social Republican group in the National Assembly, however, passed a resolution on Jan. 30 refusing to take office in M. Mollet's "Republican Front" Government, though promising to support it in the Assembly. Accordingly, a revised Cabinet list was issued by M. Mollet on Jan. 31, and subsequently confirmed by President Coty, comprising 13 Ministers, 19 Secretaries of State, and two Under-Secretaries, as follows :

The Cabinet.

M. Guy Mollet (Socialist) . .	Prime Minister.
M. Pierre Mendès-France (Radical)	Minister of State.
M. François Mitterrand (U.D.S.R.)	Minister of State and Minister of Justice.
M. Christian Pineau (Socialist) . .	Foreign Affairs.
Senator Gilbert Jules (Radical) . .	Interior.
M. Maurice Bourgès-Maunoury (Radical)	National Defence and Armed Forces.
M. Robert Lacoste (Socialist) . .	Economic Affairs and Finance.
M. René Billères (Radical) . .	Education, Youth, and Sport.
M. Gaston Defferre (Socialist) .	Overseas Territories (*France d'outre-mer*).
M. Albert Gazier (Socialist) . .	Social Affairs.
M. François Tanguy-Prigent (Socialist)	Ex-Servicemen and War Victims.
General Georges Catroux (non-party)	Resident Minister in Algeria.
M. Félix Houphouet-Boigny (U.D.S.R.-R.D.A.) . . .	Minister attached to the *Présidence du Conseil.*

Secretaries of State. Of the 19 State Secretaryships, three were for the *Présidence du Conseil*, two for Foreign Affairs, two for the Interior, three for National Defence, six for Economic Affairs, two for Social Affairs, and one for Education, as follows .

Présidence du Conseil :
Scientific Research and Atomic Energy—M. Georges Guille (Soc.)
Information—M. Gérard Jacquet (Soc)
Civil Service—M. Pierre Métayer (Soc.)

Foreign Ministry
Foreign Affairs—M. Maurice Faure (Rad.)
Morocco and Tunisia—M. Alain Savary (Soc)
Interior
Departmental and Communal Affairs—Senator Maurice Pic (Soc)
Algerian Administration—Senator Marcel Champeix (Soc.)
National Defence
Land Forces (operations in Algeria)—M Max Lejeune (Soc)
Air—M. Henri Laforest (Rad)
Navy—M Paul Anxionnaz (Rad.)
Economic Affairs
Budget—Senator Jean Filippi (Rad)
Economic Affairs—M Jean Masson (Rad)
Public Works, Transport, and Tourism—Senator Pinton (Rad.)
Agriculture—Senator André Dulin (Rad.)
Reconstruction, Housing, Industry, and Commerce—Senator Bernard Chochoy (Soc.)
Posts and Telegraphs—M Eugene Thomas (Soc)
Social Affairs ·
Labour and Social Security—M Jean Minjoz (Soc.)
Public Health and Population—M André Maroselli (Rad)
Education
Arts and Letters—Senator Jacques Bordenave (Rad)

Under-Secretaries. The four Under-Secretaries of State were M. Roger Duveau (U.D S R -R D.A.), Merchant Marine , M Hammadoun Dikko, a French Sudanese deputy (Soc), Industry and Commerce , M. Kléber-Loustau (Soc.), Agriculture , and M Pierre de Félice (Rad), Reconstruction and Housing

Only three members of M. Mollet's Government held office under M. Edgar Faure—M. Bourgès-Maunoury, formerly Minister of the Interior ; Senator Gilbert Jules, formerly State Secretary for Finance and the Budget ; and M. Henri Laforest, formerly State Secretary for Defence. An important innovation was the appointment of General Catroux, one of France's most distinguished soldiers, to the new post of Resident Minister in Algeria. Of the 13 Ministers in the new Cabinet, 11 (including M. Mollet himself, and also General Catroux) had previously held ministerial office, mainly in the immediate post-war years, whilst two entered the Cabinet for the first time—M. Billères and M. Houphouet-Boigny. Many of the State Secretaries were newcomers to Government office.

Apart from the change in the Premiership, and the entry of M. Mendès-France into the Cabinet as Minister of State, the formation of the "Republican Front" Government resulted in the following changes :

M Pineau succeeded M Pinay at the *Quai d'Orsay* , M Mitterrand succeeded M Robert Schuman as Minister of Justice , Senator Jules succeeded M. Bourgès-Maunoury as Minister of the Interior , M Bourgès-Maunoury took over the portfolio of National Defence from General Billotte , M. Lacoste succeeded M Pflimlin as Minister for Economic Affairs and Finance ; M Billères succeeded Senator Berthoin at the Ministry of Education ; M. Defferre became Minister for *France d'outre-mer* in succession to M Teitgen ; M Gazier took the portfolio of Social Affairs from M Paul Bacon, who had also held the portfolio of Labour , M Tanguy-Prigent succeeded M Badie as Minister for Ex-Servicemen's Affairs , and M Houphouet-Boigny became Minister attached to the *Présidence du Conseil* in place of M. Pierre July

A feature of the new Government was the drastic reduction in the number of Cabinet Ministers, and a corresponding increase in the number of State Secretaryships. The changes introduced by M. Mollet involved the abolition of the former Cabinet portfolios of Public Works and Transport, Industry and Commerce, Agriculture, Reconstruction and Housing, Labour, Public Health and Population, Posts and Telegraphs, Merchant Marine, and Moroccan and Tunisian Affairs, and the placing of these subjects under Secretaries of State, overall responsibility being exercised by various Cabinet Ministers.

No fewer than six State Secretaryships relating to economic and financial matters came under the overall control of M Lacoste , the three State Secretaryships relating to the armed forces came under the control of M. Bourgès-Maunoury , and two State Secretaryships relating to Social Affairs came under M. Gazier As shown above, M. Pineau and Senator Jules each became responsible for two State Secretaryships under their respective departments, whilst the three Secretaries of State for the *Présidence du Conseil* came under the supervision of M Mollet himself

The new Ministry was the 22nd to be formed in France since the liberation, and the first since 1947 to be headed by a Socialist.

M. Guy Mollet (50) was born on Dec 31, 1905, at Flers (Orne department), the son of a textile worker who died of wounds received in the First World War. He took a degree in English and for many years taught that language in various schools. He joined the Army at the outbreak of war in 1939 (at which time he was teacher of English at the Arras *lycee*) and was wounded in action in 1940, being taken prisoner by the Germans After his release in 1942 he became a leader of the Resistance movement in the Pas-de-Calais department, and subsequently an officer in the Free French Forces of the Interior. He was captured by the Gestapo in 1943, but

succeeded in escaping almost immediately and took part in the battles which followed the Allied landings in Normandy. He was secretary of the *Comité de libération* of Arras, became mayor of that city in 1945, and entered the Constituent Assembly in the same year as deputy for a Pas-de-Calais constituency, which he has represented ever since

An active Socialist since the age of 16, M. Mollet became secretary-general of the Socialist Party in September 1946. He was Minister of State in M. Léon Blum's Government (1946-47) and Minister of State for Council of Europe Affairs in the Government of M. René Pleven (1950-51). On the resignation of M. Pleven, M. Mollet accepted an invitation from President Auriol to form a Government (March 1951), but failed to obtain the absolute majority required in the National Assembly. He was, however, a Vice-Premier in the short-lived Government formed by M Queuille in the same year.

M. Mollet has been a delegate to the Consultative Assembly of the Council of Europe since 1949, and has given strong support to the various projects for European unity. He is the author of an English grammar, *Du français à l'anglais*, and holder of the Legion of Honour, the *Croix de Guerre*, and the *Médaille de la Résistance*.

M. Christian Pineau (51), the new Foreign Minister, played a leading role in the Resistance movement, founded the clandestine newspaper *Libération* in occupied France, and was liaison officer between the *Résistance* and General de Gaulle's Free French organization in London After successfully carrying out two secret missions to London, he was captured by the Germans and deported to the Buchenwald concentration camp, from which he was liberated in 1945 by U S. troops. He received many French decorations, as well as the Order of the British Empire, for his wartime exploits.

After serving as Minister for Food Supplies in General de Gaulle's Cabinet (1945), M. Pineau subsequently held the posts of President of the Assembly's Finance Commission (1945-47), Minister of Public Works in the Cabinets of M. Robert Schuman and M. André Marie (1947-48), Minister of Finance and Economic Affairs in the second Schuman Cabinet (1948), and Minister of Public Works in the Queuille and Bidault Cabinets (1948-50). A lawyer by profession, and a graduate in economics and political science, he has been a prominent member of the Socialist Party for many years

M. Robert Lacoste (57), who was given the important portfolio of Economic Affairs and Finance, is a lawyer by profession, and an expert on financial and economic questions. A leading member of the Resistance movement, he held the portfolio of Industrial Production in General de Gaulle's post-liberation Government, and was Minister of National Production in the Blum and Ramadier Cabinets (1946-47 and 1948) From 1947 to 1950 he was a member of the Schuman, Marie, Queuille and Bidault Cabinets as Minister of Industry and Commerce Before the last war he was secretary-general of the *Fédération générale des fonctionnaires*.

General Catroux (80), Grand Chancellor of the Legion of Honour, was Governor of Indo-China at the outbreak of the Second World War. He rallied to General de Gaulle immediately after the Bordeaux armistice, commanded the Free French Forces in the Syrian campaign, and became Free French High Commissioner in the Levant He negotiated the agreement between Generals de Gaulle and Giraud in 1943, became a Minister of State in the first Free French Government formed in North Africa, and was subsequently appointed Governor-General of Algeria, in which capacity he issued the decree of March 1, 1944, giving the Algerian Moslems equal status with French nationals After serving as Minister for North Africa in the first post-liberation Government he was appointed Ambassador in Moscow in 1945, holding that post until 1948. In September 1955 he went to Antsirabé (Madagascar), on behalf of the Government, for discussions with the Sultan of Morocco, who was then in exile

M. Billères served in M Mendès-France's Government (1954-55) as State Secretary in charge of the Civil Service, after having been president of the Assembly's Commission of National Education from 1948-54. He is a teacher by profession **M. Houphouet-Boigny,** a doctor of medicine, is president of the *Rassemblement Démocratique Africain* and has represented the Ivory Coast (where he was born, and where he owns large properties) in the National Assembly since 1945 All the other Ministers, as stated above, had held office in previous Governments, mainly before 1951. [A biography of **M. Mendès-France** is given on page 13631, second column.]

M. Mollet made a statement of policy to the National Assembly on Jan. 31, and was confirmed as Prime Minister by 420 votes to 71, with 83 abstentions. The majority vote included 141 Communists and *progressistes*, 93 Socialists, 94 M.R.P. and Overseas Independents, 76 Radicals and UDSR-RDA deputies, 16 Social Republicans, 10 R.G.R. deputies, one Independent, and one *non-inscrit*, whilst the opposing votes comprised 49 Poujadists, 14 Independents, six *paysans*, and two *non-inscrits*. The abstentions included 67 *modérés*.

The policy statement made by M. Mollet is summarized below under cross-headings :

Constitutional and Electoral Reform. M. Mollet said that three problems of the first importance had to be solved : (1) constitutional reforms " to reinforce the stability of the Executive power and strengthen the authority of the State " ; (2) electoral reform, in which connexion the country desired " a clear and simple " electoral system , (3) the reform of parliamentary procedure, which at present hampered and " paralysed " the working of the National Assembly.

The Schools Question. " There is another problem," said M Mollet : " one which the wise and prudent believe that I should not mention, but one which will have to be solved—the question of *laïcité*, or more precisely the *question scolaire* The Government will assure the application of the present legislation [i e. the *Loi Barangé* extending State aid to Catholic schools], will respect liberty of conscience, and will also respect the complete independence of the State *vis-à-vis* the Churches. But certain proposals will be laid before the Assembly for the repeal of earlier legislation [i e. the *Loi Barangé*]. The Government will not take up a definite position in the debate on this matter, and the decision will be left to a free vote of members . . ."

Algeria. The " saddest and most pressing problem " facing the Government was that of Algeria. " It is to this problem," M. Mollet declared, " that the Government must give first priority I will devote my fullest personal efforts to its solution. . . ." After saying that the appointment of an " eminent personality " (i e. General Catroux) as Resident Minister in Algeria showed the importance which the Government attached to this question, M. Mollet continued :

" What matters today is not opposing theories : it is intentions, objectives, and methods that are important. The objective of France and the Government is, in the first place, to re-establish peace, to liberate the people from fear, and to end terrorism and blind repression To this end we must foster the democratic evolution of political institutions, assure the co-existence of the two elements of the population which history has linked together, and which we must never permit to be severed, and promote the country's economic and social development We must maintain and reinforce the indissoluble union between Algeria and Metropolitan France . . whilst at the same time respecting the *personalité algérienne* and achieving full political equality for all the inhabitants of Algeria "

" The population of Algeria comprises two main groups," he continued. " On the one hand there is an important minority of European origin, which is itself divided into a group whose egoism and short-sightedness is largely responsible for the present situation, and another—for the most part consisting of persons of modest origin, of conscientious workers devoted to their country—by whose efforts France is present in Algeria. On the other hand there is the autochthonous population, growing every day in numbers. If this latter group includes a minority of madmen and criminals, the immense majority desires only to maintain its ties with France. The Moslems already have equality of duties they must now have full equality of rights.

" These objectives being fixed, it remains to determine the methods by which they shall be achieved. In any case, the National Assembly must solemnly affirm that the future of Algeria shall never be determined unilaterally It must also affirm unequivocally that we shall never accept a solution which one element of the population might attempt to impose forcibly on the other.

" The Government intends, with the shortest possible delay, to carry out a true popular consultation by free elections with a single electoral college. This implies electoral reform . In a short time the Government will present the necessary legislation to the Assembly asking for powers to carry out certain preliminary reforms—notably the reform of the municipal administration and the reform of the Civil Service in Algeria. These fundamental decisions will bring about a change of climate. . . . In addition to these indispensable reforms, all political prisoners will be released except those who have committed offences punishable by the penal code. . . . Moreover, urgent and indispensable measures of an economic and social character will be taken, and the greatest importance will be attached to agrarian reform. . . ."

Morocco and Tunisia. " The Government will immediately enter into negotiations with the Government of his Majesty the Sultan of Morocco with the aim of defining anew the links uniting the two countries, based upon recognition of the independence of the Sherifian Empire. These agreements will define and consolidate the interdependence of France and Morocco. They will guarantee the rights and assure the future of the hundreds of thousands of Frenchmen who have been the pioneers of modern Morocco The French Government will be happy to welcome his Majesty Sidi Mohammed Ben Youssef in Paris, and to express to him its pleasure that he has given his country a modern and constitutional form of government. I firmly believe that the Moroccan Government, headed by the great soldier Si Bekkai, will use its full authority to end the rebellion in the Riff, which is not justified by any Moroccan national consideration.

" Our policy with regard to Tunisia is based on the principles of the Conventions of June 3, 1955, conferring internal autonomy on Tunisia—a policy which assures both independence and interdependence. . . . In the spirit of the historic initiative taken by Pierre Mendès-France, the Conventions will permit the aspirations of the young State to be reconciled with the imperatives of Franco-Tunisian solidarity.

" It is within the framework of common institutions with France, freely defined and accepted, that Morocco and Tunisia will achieve their full independence The principle of interdependence has been laid down—it must now be translated into concrete measures with the aim of maintaining and developing the solidarity created by geography, history, and identity of interests and aspirations."

International Policy. M. Mollet pledged the Government's full support for the North Atlantic Treaty ; expressed its determination to maintain solidarity with France's allies ; and defined the objectives of its international policy as " the consolidation of peace, the solidarity of the free nations, general and controlled disarmament, and the construction of Europe." He added that " the way towards the reunification of Germany is by general and controlled disarmament."

European Unity. The Government would give its full support to all projects aimed at bringing about *construction europeenne*, and, in particular, would support the proposals for a common European market and the formation of a European atomic energy "pool" (Euratom) M Mollet stressed the desirability of close British association with these projects, particularly with "Euratom"

Economic, Financial, and Social Policy. After declaring that his Government would fight inflation, devaluation, and all forms of social injustice, M. Mollet outlined a programme which included industrial expansion with full employment; a new modernization and re-equipment plan with emphasis on heavy industry; organization of agricultural markets with guaranteed prices for farmers; the extension of legal paid holidays from two to three weeks a year; the gradual abolition of regional differences between minimum wage-rates; immediate assistance to old persons and the "economically weak"; and fiscal reforms which would include the abolition of the system whereby small shopkeepers and artisans "had to make themselves their own tax-collectors"—an announcement which was warmly welcomed by the Poujadist deputies. M. Mollet added that the Government would seek special powers from the Assembly to carry out some of these reforms.

At his first Cabinet meeting on Feb. 3, M. Mollet announced that he intended to visit Algeria immediately for discussions with the leaders of the European and Moslem communities, and that General Catroux would follow a few days later to take up the post of Resident Minister. M. Mollet's arrival in Algiers on Feb. 6, however, was marked by serious rioting on the part of thousands of French settlers, who demonstrated violently against General Catroux and the Prime Minister and who attempted to break into the Governor-General's residence, where M. Mollet was staying. In view of these hostile demonstrations, General Catroux announced on the same day (Feb. 6) that he had resigned from the post of Resident Minister in Algeria—which, in fact, he had not yet taken up.

The announcement of General Catroux's appointment had aroused strong opposition among the French settlers in Algeria, and had led to a number of protests to President Coty and M. Mollet, coupled with demands that the outgoing Governor-General (M. Jacques Soustelle) should remain at his post. The *Fédération des maires de l'Algérie*, in a telegram to the President of the Republic, expressed "indignation" at the appointment of General Catroux, whom it described as "a specialist in the abandonment of the empire overseas," whilst the European elected members of the Algerian Assembly sent a memorandum to M Mollet on Feb. 3 protesting both against General Catroux's appointment and against M. Mollet's proposal for a single electoral college in Algeria.

The memorandum to M. Mollet welcomed the Government's intention "to place the solution of the Algerian problem in the first rank of its preoccupations." It stated, however, that it saw "no advantage" in the substitution of the post of Governor-General by that of Resident Minister, particularly since the former post was "a very old institution" which had been confirmed by the Statute of Algeria adopted in 1947. The memorandum continued .

"Whilst we respect the Grand Chancellor of the Legion of Honour [General Catroux], we fear that his appointment will give rise to dramatic consequences (*conséquences dramatiques*), and we urge you not to expose Algeria to this new risk. Relations between the two *collectivités* [i.e. Europeans and Moslems] have already deteriorated enough as a result of terrorist activities, without a further aggravation of the situation. We do not doubt that your examination of the Algerian question will be seriously conducted. We fully agree with you that terrorism is the work of 'a minority of madmen and criminals,' and that the immense majority of the population desire only to maintain their ties with France. You, an eminent specialist in international questions, are certainly aware that this minority is fomented from abroad. . . ."

The memorandum added that M. Mollet's proposal for a single electoral college would "strike a considerable blow" at the European community in Algeria. Moreover, as the Government apparently intended to introduce this reform without consulting the European community, it was an apparent contradiction of the Prime Minister's own declaration that the future of Algeria would not be determined by unilateral action The "only conceivable system" was one which gave equality of representation to both the European and the Moslem communities.

At a mass meeting in Algiers on Feb. 4, attended by tens of thousands of French settlers, the Federation of Ex-Servicemen in Algeria pledged themselves to resist the appointment of General Catroux by all means in their power. A telegram was sent to President Coty requesting his personal intervention, declaring that General Catroux's appointment would mean "the collapse of Algeria and all French Africa," and adding that his arrival in Algiers would "collide with an irresistible popular movement."

Although the Ex-Servicemen's Federation had appealed for the maintenance of order, M. Mollet's arrival in Algiers was made the signal for violent demonstrations against General Catroux and against the Prime Minister personally. Great crowds of European demonstrators called for the "hanging" of General Catroux, told M. Mollet to "return home," and demanded the reappointment of M. Soustelle as Governor-General. After a ceremony at which M. Mollet had laid a wreath on a war memorial, the memorial gardens were rushed by thousands of demonstrators—many of them youths and young men—who destroyed the wreath, tore down tricolour flags, and threw rotten vegetables, eggs, and earth at the Prime Minister, who was struck several times. Later in the day about 1,000 demonstrators tried to break into the Governor-General's residence, where M. Mollet was staying, and fought a pitched battle with heavily-armed police outside the building. Many of the demonstrators received minor injuries, the mob being eventually dispersed by tear-gas. The Moslem population of Algiers took no part in the disturbances.

After the news of the disturbances reached Paris, General Catroux sent a message to M. Mollet asking to be released from his appointment as Resident Minister, in view of the "critical situation in Algeria" and the "complete opposition shown by the Algerian ex-servicemen." He expressed the hope that "the policy which you (M. Mollet) have promised, and which alone is capable of making the destinies of Algeria and France inseparable, will be crowned with success."

M. Mollet announced in Algiers the same evening that he had accepted General Catroux's resignation, since "it does not seem either fitting or possible to expose General Catroux to conflicts over actions of national importance which would involve him with his former comrades-in-arms." M. Mollet added: "Directly he heard of today's demonstrations in Algeria, and particularly when he heard that his name would become a matter of discord between him and his former war comrades, General Catroux asked me to give him his liberty. Anxious not to add to the drama which already divides Algeria, I have accepted his resignation."

The news of General Catroux's resignation led to renewed demonstrations in which large crowds of French settlers paraded the streets singing the *Marseillaise* and renewing their demand for the re-appointment of M. Soustelle.

The situation in Algiers returned to normal on Feb. 7-8, when M. Mollet had a number of meetings with representatives of the European and Moslem communities, including representatives of the Federation of Ex-Servicemen. He also had discussions with the Roman Catholic Archbishop of Algiers, Mgr. Duval. No official statement was issued, but it was understood that M. Mollet had reassured the European representatives that France did not intend to abandon Algeria.

M. Mollet announced in Algiers on Feb. 9 that M. Robert Lacoste, the newly appointed Minister for Economic Affairs and Finance, would succeed General Catroux in Algeria with the official title of Minister Governor-General. A. PERSIA. — Attempt to assassinate M. Hussein Ala. - Trial and Execution of "Fadayan Islam" Leaders. - Outlawing of "Fadayan Islam" Sect.

Four members of the extreme nationalist *Fadayan Islam* ("devotees of Islam") sect, including one of its leaders, were executed by a firing-squad in Teheran on Jan. 18 after trial by a military court. They were Navab Safavi, a leader of the movement; Mohammed Vahedi, one of his principal followers; Khalil Tahmesebi, who assassinated General Razmara (the former Prime Minister) in 1951 but was subsequently released by the Mossadeq Government; and Mozaffar Ali Zulghader, who made an unsuccessful attempt to assassinate M. Hussein Ala (the present Prime Minister) on Nov. 17, 1955. The Shah refused appeals by the condemned men for clemency. Several other members of *Fadayan Islam* were sentenced to hard labour for terms of up to six years.

The attempt on M. Hussein Ala was made while he was entering the Shah Mosque in Teheran, the Prime Minister being slightly wounded (The assailant, Zulghader, flung his gun at M. Ala and struck him in the neck after he had fired wide). During the next few days widespread arrests of *Fadayan Islam* members were carried out, Safavi and others being subsequently tried and found guilty on charges of plotting to overthrow the Government, planning the assassination of General Razmara, and attempting to assassinate M. Ala. The *Fadayan Islam* sect itself—which is strongly opposed to all foreign influences, both Western and Soviet, and which claims to base itself strictly on the Islamic religion—was outlawed on Nov 18, 1955.

It was announced in Teheran on Jan. 18 that the Persian Army authorities had detained the Mullah Kashani, leader of the *Fadayan Islam* sect, for questioning in connexion with the assassination of General Razmara. The Mullah (who is 72) was Speaker of the Majlis during Dr. Mossadeq's administration, and was notorious for his violent anti-British sentiments.

A. UNITED KINGDOM - UNITED STATES - CANADA. — Sir Anthony Eden's and Mr. Selwyn Lloyd's Visits to Washington and Ottawa. - The "Declaration of Washington." - Agreement on U.K. - U.S. Attitude to Middle East Problems.

Sir Anthony Eden and Mr. Selwyn Lloyd, the new British Foreign Secretary, arrived in Washington on Jan. 30 for talks with President Eisenhower and Mr. Dulles on the international situation. The White House Press Secretary (Mr. Hagerty) had stated on Jan. 26 that, although many subjects had been put down for discussion, there would be "no fixed agenda."

At the end of the three-day conference a joint communiqué was issued on Feb. 1 by the President and Sir Anthony Eden, which, after describing their meeting as a "friendly and fruitful reunion," set out the various matters they had discussed. The President and the Prime Minister also issued a joint "Declaration of Washington" reaffirming Anglo-American unity of purpose in the defence of democracy.

The text of these documents was as follows:

Joint Communiqué.

"Conscious of the unity of purpose of our two countries, we have restated in a separate Joint Declaration our view of the challenge which confronts the free world and the principles which it seems to us are required to meet it In our conversations we have also reviewed other matters of mutual concern to the two Governments in various areas of the world.

Europe.—We reaffirm that the North Atlantic Treaty is essential to our common security. We regard this association as far more than a military alliance We welcome the increasing range of consultation in the Council on political and other problems

In the economic field we recognize the contribution which the O.E.E C. makes to the stability of Europe Within the framework of the Atlantic community, and with regard for its broader interests, we support further progress on the Continent towards unity, both political and economic

With respect to Germany, we agree that so long as it remains divided there can be no genuine and stable peace We shall continue our efforts to bring about the reunification of Germany in freedom. We regard the Government of the Federal Republic as the only German Government freely and legitimately constituted, and therefore alone entitled to speak as the representative of the German people in international affairs.

We reaffirm our abiding interest in the security and welfare of Berlin. We shall continue, as we have stated in the past, to regard any attack against Berlin from any quarter as an attack upon our forces and ourselves.

Middle East.—We discussed the tensions which prejudice the stability of the area and carry a potential threat to world peace. It was agreed that every effort should be made to decrease sources of misunderstanding between this area and the Western world We are eager to contribute wherever possible to the settlement of difficulties between States in the region We wish to help peoples of this part of the world to achieve their legitimate aspirations

A settlement between Israel and her Arab neighbours is the most urgent need This will be possible only if both sides are willing to reconcile the positions which they have hitherto taken. Our two Governments have declared their readiness to contribute to such a settlement by assisting financially in regard to the refugee problem and by guaranteeing agreed frontiers.

In the meantime we are concerned at the state of tension in the area and have considered what steps can be taken to reduce it. The Tripartite Declaration of May 25, 1950, provides for action both inside and outside the United Nations in the event of the use of force or threat of force, or of preparations to violate the frontier or armistice lines We are bound to recognize that there is now increased danger of these contingencies arising. Accordingly, we have made arrangements for joint discussions as to the nature of the action which we should take in such an event The French Government is being invited to participate in these discussions.

We believe that the security of States in this area cannot rest upon arms alone but rather upon the international rule of law and upon the establishment of friendly relations among neighbours. The action of the Soviet bloc in regard to arms supplies to Middle East countries has added to the tensions in the area and increased the risk of war. Our purpose is to mitigate that risk

We express our full support for the efforts of General Burns, head of the U N. Truce Supervisory Organization, to maintain peace on the borders. We would favourably consider recommendations for any necessary enlargement of his organization and improvement of its capabilities.

The Baghdad and SEATO Pacts.—We discussed the work of the Baghdad Pact and agreed upon its importance for the security of the Middle East. We noted that this association, in addition to its defence aspects, has an important part to play in the economic and political development of member-countries. We believe that it serves the interests of the area as a whole and provides no reason for impairing the good relations we wish to maintain with non-member countries

The U.S. Government will continue to give solid support to the purposes and aims of the pact, and its observers will play a constructive part in the work of its committees.

We reviewed the situation in Arabia and the Persian Gulf, with particular reference to current disputes and differences in that area We believe that these differences can be resolved through friendly discussions.

We reaffirm our view that the South-East Asia Treaty Organization [SEATO] is a stabilizing influence. We will continue to give it our full support and to work with those countries who are associated with us as our allies in this organization. We welcome the co-operation of our allies and ourselves with other free nations in this important area, through such organizations as the Colombo Plan, in developing the resources and well-being of all participating countries.

Far East.—We discussed the situation in the Far East We are firmly united in our purpose: to deter and prevent aggressive expansion by force or subversion, and to assist the free nations of the area in their self-defence and in maintaining domestic stability and welfare. We are agreed that our policies must be directed to achieve these ends After frank discussion, some differences remain in our judgments as to the most effective means to achieve these.

We are agreed that trade controls should continue and should be reviewed now and periodically as to their scope, in the light of changing conditions, so that they may best serve the interests of the free world

Atomic Energy.—We noted with great satisfaction that atomic energy information now being exchanged as a result of the agreements concluded between our Governments last June represents a gain to the common security. We discussed the development of our close co-operation in this field. We confirmed our resolve to push forward with the setting-up, with suitable safeguards, of the International Agency for the promotion of the peaceful uses of atomic energy."

The Declaration of Washington.

"We are conscious that in this year 1956 there still rages the age-old struggle between those who believe that man has his origin and his destiny in God and those who treat man as if he were designed merely to serve a State machine Hence, we deem it useful to declare again certain truths and aims upon which we are united and which we are persuaded are supported by all free nations.

Because of our belief that the State should exist for the benefit of the individual, and not the individual for the benefit of the State, we uphold the basic right of peoples to governments of their own choice. These beliefs of ours are far more than theory or doctrine. They have been translated into the actual conduct of our policy, both domestic and foreign. We are parties to the Atlantic Charter, the U N. Charter, the Potomac Charter, and the Pacific Charter In them we have, with other friends, dedicated ourselves to the goal of self-government and independence of all countries whose people desire and are capable of sustaining an independent existence

During the past ten and more years 600,000,000 men and women in nearly a score of lands have, with our support and assistance, attained nationhood Many millions more are being helped surely and steadily towards self-government. Thus, the reality and effectiveness of what we have done is proof of our sincerity.

Further, we know that political independence cannot alone assure men and nations full opportunity to pursue happiness and to fulfil their highest destiny There is likewise need for economic sustenance and growth. This, too, we have helped to provide. We seek to develop with others a large volume of mutually beneficial trade.

Likewise we seek, through technical assistance, the Colombo Plan, and other programmes we support, to help economic progress in the less developed countries and to raise the living standards of their peoples. In these programmes we have not sought nor desired extension of either economic or political power. The purpose is not to dilute but to enrich and secure their freedom.

During this period of notable co-operative progress in the free world, those who assert the supremacy of the State and deny the inherent rights of man have also been active. Millions of people of different blood, religions, and traditions have been forcibly incorporated within the Soviet Union, and many millions more have in fact, although not always in form, been absorbed into the Soviet Communist bloc. In Europe alone, some 100,000,000 people, in what were once ten independent nations, are compelled, against their will, to work for the glorification and aggrandizement of the Soviet Communist State.

The Communist rulers have expressed in numerous documents and manifestos their purpose to extend the practice of Communism by every possible means, until it encompasses the world. To this end they have used military and political force in the past They continue to seek the same goals, and they have now added economic inducements to their other methods of penetration.

It would be illusory to hope that in their foreign policies, political and economic, the Soviet rulers would reflect a concern for the rights of other peoples which they do not show towards the men and women they already rule. Any free nation that may be persuaded, by whatever threat, promise or enticement, to embrace Communism will lose its independence, and its people will forfeit their rights and liberties. These contrasting records of recent years reflect the essence of the struggle between free countries and the Communist rulers.

In the face of the Communist challenge, almost 50 nations which cherish freedom have drawn together in voluntary associations for their collective security. These associations uphold for all their members the right to independent existence, the right to free expression, and the right to differ The purpose of their union is to preserve those national rights, just as within a State people join together to preserve their individual rights.

We reject any thought that the cleavage we have described should be resolved by force. We shall never initiate violence. Moreover, we shall use our full influence to assure that Soviet efforts to inflame old antagonisms will not succeed in breaking the peace. The U.N. provides appropriate machinery to assist countries desiring peacefully to bridge their differences and to settle disputes. Many nations of the free world are anxious to proffer their good offices to promote the same end. Our two countries stand constantly ready to aid in negotiation and conciliation with others directly concerned, so as to achieve just settlements of the concrete issues that now trouble the world.

We shall persevere in seeking a just and lasting peace and a universal and effectively controlled disarmament which will relieve mankind of the burden and terror of modern weapons Meanwhile, the society of free nations must retain the power needed to deter aggression. We recognize that such power should never serve as a means of national aggrandizement, but only as an essential shield for every member of the community of nations. We are determined to make the conquest of the atom a pathway to peaceful progress, not a road to doom.

We will not be deflected from the policies and purposes we have herein stated. On the contrary, we will maintain and, where necessary, strengthen and extend them Thus we shall help ourselves and others to peace, freedom, and social progress, maintaining human rights where they are already secure, defending them when they are in peril, and peacefully restoring them where they have temporarily been lost.

While resolutely pursuing these aims, which are the products of our faith in God and in the peoples of the earth, we shall eagerly grasp any genuine opportunity to free mankind of the pall of fear and insecurity which now obscures what can and should be a glorious future."

On Feb. 2 Sir Anthony Eden addressed the two Houses of the U.S. Congress separately. His speech to the Senate was as follows:

" We have just brought to a conclusion a memorable conference in the service of peace I must first express my sincere gratitude to the President of the United States for the patience, initiative, and understanding which alone made our results possible It was a privilege to work with him, and an added pleasure to find him in such good health. . . .

" It is a sombre prospect which we confront together. Uncertainty and fear stalk the world ten years after the victory was won. The scene shifts our problems take on different forms, but we have still to recognize them for what they are

" The most powerful nations on earth today possess the most destructive weapons man has ever had at his command. This has created a mutual deterrent. You and we and the Russians each command or will soon command the means to annihilate each other. But the warning does not end there. New weapons, guided missiles, rockets, and the like bring new powers of destruction to mankind. Is the world then in a few years to shoot itself to destruction at long range? You and we alone cannot give the answers to these questions. But we can face and examine them together and determine what conclusions we should draw

" Wars in the past have often begun because one Power or combination of Powers has believed its force sufficient to win and hold some overwhelming advantage. This has dazzled the eyes and enticed the minds of conquerors down the ages. Sometimes their ambition has brought them victory. It can never do so in this nuclear age, when oblivion confronts aggressor and victim alike.

" I wish I could say that on this account all possibility of world conflict is excluded I cannot. The direct danger is reduced. The indirect threat remains, and its consequences can equally be mortal.

" Brought to a halt in Europe, Soviet expansion now feels its way south and probes in other lands. There is nothing particularly new in this You can read it all in Russian imperialist history. But the emphasis has changed, and the symbol and method too. This is a struggle for men's minds, once expressed in these regions in conflicting faiths, but now in rival ideologies From the Kremlin streams forth into the lands of the Middle East, and into all Asia, a mixture of blandishment and threat, offers of arms and menaces to individuals, all couched in terms of fierce hostility to Western ideals.

" In the face of this, what answer should the West give? We do not intend to base our policies on the revival of old threats or the creation of new ones. We know that we can neither hold Communism, nor beat it back, by force of arms alone.

" Friendship and freedom and help of all kinds on which to base a rising standard of life—these are what we offer. It is not so much military containment as political enlightenment which is the need of the day. Let us therefore be quite clear about our philosophy in the appeal we make to other lands. We invite nations to share our free way of life. We neither compel them to join our company, nor hold them by force once they have done so. That is the difference between our approach to the rights of nations and the Communist denial of them.

" No-one supposes that the countries under Soviet domination today, from Prague to Stettin, from Sofia to Warsaw, are under Communist command because they like it. If they did, why do you think that over a quarter of a million refugees have escaped from Eastern Germany to the West in this last year? How many more people would follow them from other lands if they could? But, of course, these considerations don't influence Communist thought. Soviet rule is absolute what the people want is immaterial. For them, man exists for the State, not the State for man. The one-party system is, after all, so much simpler to handle. . . That is why Communists are convinced that free elections are a great mistake

" The contrast cannot, we think, be more sharply shown than in our Commonwealth community. Its older members—Canada, Australia, New Zealand, and South Africa—have for generations played their free and individual parts in world affairs, and made their distinctive contributions More lately they have been joined by the new partners in Asia—India, Pakistan, and Ceylon.

" But I would not like you to think that the process has stopped there, or can do so. It is a continuing development. Everywhere through our Commonwealth and Empire nations are growing up. This places a heavy responsibility upon the parent. He has to be sure that patience is shown, that guidance is given, that experience is passed—as a warning but not as a command.

" The process is continuing and its consequences will be far-reaching In many territories of the Commonwealth constitutional progress has reached, or is approaching, the last stage before their peoples assume full responsibility for their own affairs. I could give you examples of this in Africa, in South-East Asia, and in the Caribbean. . . . At this very moment her Majesty the Queen is in Nigeria, where dwell more than 30,000,000 of her people with elected Legislatures and African Ministers The spontaneous enthusiasm of her welcome will have shown how the people really feel.

" No-one can tell you yet to what these great adventures in self-government will lead There has been nothing like it in the world before. There are risks in it, grave risks, as there are in everything worth while. But there are also great rewards

" I have painted you this scene because you will see how different it is from the view of a Soviet leader who recently told us that he could not understand why people should go into other countries except to pump out their wealth and resources The Washington Declaration which the President and I signed yesterday sets out the principles of the faith we share.

" I suggest to you that we should follow the courses I will now describe to give it effect.

" First, we should maintain our alliances and friendships firmly, loyally, and without apology. This does not exclude a willingness to meet and talk with Communist Powers

" Secondly, in the areas where the danger of conflict is most acute, we should whenever we can declare our unity of purpose. For instance, between the Arab States and Israel, where the danger has increased, we have done well to make clear that we are to discuss together what action we should take. The more prepared we are, the less likely is an emergency to arise

" Thirdly, it would be a useless exercise to chase Soviet activity all round the world in the sense of trying to cap every offer they profess to make by a better on our own account. I doubt whether even the resources of your great country could stand that strain, and it would be a foolish effort anyway. I am convinced that our method should be different, that we should continue to give economic help in those areas where it is most needed, putting first the reasonable requirements of our own friends, but not forgetting others. . . .

" But this is not the only outcome of the conference. We have done more. We have shown once again that we can work together in the closest comradeship Of course we do not always agree at every point, but it is the strength of our unity that we have no need to conceal this. Never, I am sure, has the measure of agreement between us been so wide and true as it is today. Never has the identity of our common purpose been so plain. This is the keynote of our work together in these days."

In his speech to the U.S. House of Representatives, Sir Anthony Eden spoke of the need to maintain Britain's strength, and of the heavy burden imposed by the cost of overseas defence on Britain's budget and balance-of-payments.

" These costs," he continued, " are, in fact, infinitely larger than those of any other country except yours. Add to this the direct charges for defence—the medium bomber force, which we alone in Europe are today building as part of the deterrent; the cost of the hydrogen bomb, which we are engaged in making—and you will understand. I hope that we are not an unworthy partner. Of course our contribution is small in amount by comparison with yours. But in proportion to our size, our effort is comparable to yours.

" I know it is sometimes said in this country that the Prime Minister of the United Kingdom only comes to the United States in order to get dollars. I should like to lay this ghost. We are sincerely grateful for the economic aid we have had in the past. It has helped us to repair the consequences of six years of bombardment and war. But apart from a measure of defence aid, which we value, we now stand on our own feet. We intend to continue to do so."

Continuing, Sir Anthony said: " The scale of U.S. assistance for the free world in these post-war years has been an act of generosity unmatched in history. Marshall Aid . . . brought salvation to Europe at a critical hour. The world should not forget that you offered that help to all, on either side of the Iron Curtain. These policies you have upheld manfully and at heavy cost to yourselves. Never has a nation in years of peace so heavily taxed itself for others.

"As I have said, we have to continue to build our economic strength. It is with this in mind that we have never spared our efforts to develop nuclear power. These are now taking many forms. . . Our first atomic power station will be working this year. A number of others are under construction, and will come into operation in due course But machinery and power alone are not enough. To keep pace with these and other scientific needs, we are now undertaking an extensive programme of technological education. This will be spread over the next five years and will bring new opportunity to our young people, so that in quality we may hold our own in all these new fields. Though Britain is an old country, she is young in heart, ready to compete even with you in the expansion of this new industry which may well create a new industrial age for us all."

After speaking of the need for the free world "to display political stability," and of the British contribution to "imaginative and progressive policies abroad," Sir Anthony declared: "It is our faith that the confidence which self-government breeds is the best antidote to Communism. But we are also aware that a danger of our time is that freedom can be lost by subversion You will have noticed how those peoples who are just reaching nationhood are the special object of Communist ambitions, which seek to take advantage of any inexperience or weakness they may show. We know that these are the attendant hazards. Yet we are convinced that the encouragement of these many peoples toward self-government will prove itself as wise statesmanship. Indeed, the recent experience of the Commonwealth shows that this is true.

"The foreign policies of the free world should fairly measure the realities of the world in which we live. There are certain principles to which we hold: the sanctity of treaties, good faith between nations, the interdependence of peoples from which no country, however powerful, can altogether escape. We can join in building a free world. What of those who lie beyond it? I do not think that we should fear contact with those with whom we do not agree If we have faith in ourselves and in our convictions, we should be ready to meet with others of contrasting ideology .. The Declaration of Washington embodies our faith. It expresses our principles and shows confidence in our destiny. If we have the tenacity to maintain these before the world, and the courage to defend them in conference or in conflict, we can together face the future unafraid."

On Feb. 3 Sir Anthony Eden and Mr. Selwyn Lloyd flew to Ottawa, where they stayed as the guests of the Governor-General of Canada, Mr. Massey. On Feb. 6 they opened discussions with Mr. St. Laurent (the Canadian Prime Minister), Mr. Lester Pearson (Secretary for External Affairs), and other Canadian Ministers and also met Mr. Drew, the leader of the Progressive Conservative party and Leader of the Opposition in the Federal House of Commons.

Sir Anthony Eden addressed a joint session of the Canadian Parliament on the same date.

Referring to his talks with President Eisenhower, he said: "There has never been so full a measure of agreement between our Governments In the whole field of European policy there was no difference between us ... Much of our meeting was devoted to the difficult and critical problems of the Middle East Here, too, we were in agreement that the first danger was the continuing Arab-Israel dispute. We were also in agreement as to what we should do to try to resolve it.

"It has been decided that the necessary treatment of the troubles in the Middle East should be of three kinds:

(1) To work without publicity and by every means to bring about a settlement in that area. This can only be realized if both sides are prepared to reconcile the positions they have taken up to now. That means a compromise. But we can both help, and are ready to do so—e g., by financial help to settle the refugee problem, and by a guarantee of agreed frontiers.

(2) Britain, France, and the U.S A. have responsibilities under the 1950 Tripartite Declaration. We have arranged for discussions on the action to be taken to meet an emergency should it arise. The French Government have agreed to join us in this. Personally, I am convinced that to make ready in this way is to reduce the risk of conflict.

(3) Strengthening of the U.N. Truce Supervisory Organization to prevent incidents Both the U.K. and the U.S. Governments are very ready to agree to this. But of course we should wish to be guided by General Burns, who is resolutely carrying out his thankless task.

"The United States has declared its solid support for the Baghdad Pact, to which Britain belongs. This again we welcome, and here again our views are alike The pact has economic purposes and aims which fully match its military provisions and importance. We have considered the kind of help which each member-country needs, and we are determined to make a success of the pact. All this does not exclude help to other countries in the area. An example is Jordan, to whom we shall continue to make substantial payments under our treaty."

As regards the principles set forth in the Declaration of Washington, Sir Anthony Eden declared: "Some say that these have been stated before. Maybe, but it does no harm to state them again in a manner which makes it clear that we are aware of the modern Communist challenge. The Declaration . . . is in fact a charter to which the whole of the free world can subscribe."

Among the subjects discussed by the British and Canadian Ministers were the Middle East, U.N. affairs, atomic energy developments, the agenda for the Commonwealth Prime Ministers' Conference in 1956, and Anglo-Canadian trade. At a press conferene on Feb. 7 Sir Anthony pointed out that Canadian exports to Britain in 1955 had been about twice as large as British exports to Canada. It was most important, he said, that this trade balance should be rectified; "we understand that Canada is a highly competitive market, and we want to be in the competition."

Sir Anthony Eden and Mr. Selwyn Lloyd arrived back in London on Feb. 9. (Times - Daily Telegraph - Manchester Guardian - New York Times - New York Herald Tribune - Montreal Star) **(Prev. rep. 14566 B)**

A. UNITED KINGDOM. — Leeds and Blaydon By-elections.

By-elections were held on Feb. 9 at Leeds North-East and on Feb. 2 in the Blaydon division of County Durham.

Leeds North-East. The by-election was caused by the conferment of a peerage on Mr. Osbert Peake (now Viscount Ingleby), the former Minister of Pensions and National Insurance. Result:

Joseph, Sir Keith (Conservative)	14,081
Waterman, H M. (Labour)	8,212
No change Conservative majority .	5,869

Figures at the general election were: Osbert Peake (C.) 24,902, H. M. Waterman (Lab.) 15,623—Conservative majority, 9 279.

The Conservative candidate received 63.2 per cent of the votes in the by-election and the Labour candidate 36.8 per cent, compared with respective percentages of 61 4 and 38.6 at the general election. The Conservative proportion of the vote thus rose by 1.8 per cent.

39 9 per cent of the electorate voted in the by-election, compared with 73.1 per cent at the general election. The electorate numbered 55,876, an increase of 435 since the general election.

Sir Keith Joseph (38), a barrister, Fellow of All Souls College, Oxford, and director of a building and civil engineering company, contested the new London constituency of Barons Court at the general election, being narrowly defeated by 125 votes His father, Sir Samuel Joseph, was Lord Mayor of London in 1942-43.

Blaydon. The by-election was caused by the death of Mr. William Whiteley, the former Opposition Chief Whip. Result:

Woof, Robert E. (Labour)	18,791
Reay-Smith, John (Conservative)	8,077
No change. Labour majority .	10,714

Figures at the general election were: W. Whiteley (Lab) 25,273, J. Reay-Smith (C.) 12,750—Labour majority, 12,523.

The Labour candidate received 69.9 per cent of the votes in the by-election and the Conservative candidate 30.1 per cent, compared with respective percentages of 66.5 and 33.5 at the general election. The Labour proportion of the vote thus increased by 3.4 per cent.

56.4 per cent of the electorate voted in the by-election, as against 80.6 per cent at the general election. The electorate numbered 47,626, an increase of 488 since the general election.

Mr. Woof (44) is a coal-face worker and a member of Durham County Council.

Mr. William Whiteley (73), a former miners' agent, represented Blaydon from 1922-31 and from 1935 until his death on Nov. 3, 1955. He was Joint Chief Whip in the wartime Coalition Government, and also served as Comptroller of the Household and Joint Parliamentary Secretary to the Treasury. After Labour's electoral victory in 1945 he became Chief Government Whip, and when Labour went out of office in 1951 became Chief Opposition Whip, a post he resigned a few months before his death (see 14287 A). He was a Companion of Honour and a Privy Councillor.
(Times - Daily Herald) **(Prev. rep. By-elections, 14582 B).**

B. FRANCE. — Formal Expulsion of M. Lecoeur from French Communist Party.

The Communist newspaper *Humanité* announced on Nov. 16, 1955, that M. Auguste Lecoeur had been finally expelled from the French Communist Party. M. Lecoeur, previously one of the party's leading members, had been removed from the post of party secretary in March 1954, and on Jan. 27, 1955, the central committee of the party had decided to expel him from the party for one year because of his "failure to admit his mistakes," this expulsion being now made permanent.

M. Lecoeur, a deputy for the Pas-de-Calais department in the former National Assembly, had left the Communist Parliamentary Party in December, 1954, and had since sat as a *non-inscrit*. In October 1955 he published a book, under the title *l'Autocritique attendue*, in which he rejected the accusations made against him and severely criticized the Communist Party's leadership.—(Le Monde, Paris) **(Prev. rep. 13830 A.)**

A. INDIA. — Government's Proposals for Reorganization of States. - Serious Rioting in Bombay and Orissa. - Chief Ministers' Proposals for Merger of West Bengal and Bihar. - Riots denounced by Congress Working Committee.

The Government of India announced on Jan. 16 that it had accepted most of the recommendations of the States Reorganization Commission, with certain minor adjustments, but proposed that Bombay State should be divided into a Marathi and a Gujarati State, with Bombay City as a Centrally-administered area. It was also proposed that all the States should be grouped into five zones, each with a zonal council which would deal with matters of common concern. Decisions on the future of the Punjab and the Telengana area of Hyderabad were, it was stated, still under consideration.

The official announcement said that the Government, after giving "careful and anxious thought" to the views of the State Governments and the opinions expressed in Parliament and the State Assemblies, had arrived at conclusions which would be embodied in the States Reorganization Bill This Bill would be placed before Parliament after the Legislatures of the States concerned had been consulted. In general, the Government had accepted the Commission's recommendations, and the departures which had been made from them were "restricted to a few cases in which it has been found that minimum measures of agreement necessary for an efficient working of administrative units would not be forthcoming on the basis of the Commission's recommendations." In regard to certain disputed border areas some minor adjustments had been made, largely by agreement. The Government had accepted the recommendations that the existing constitutional disparity between the different States should disappear; that the present Part B States should be equated with Part A States by omitting Article 371 of the Constitution and abolishing the institution of Rajpramukh; that Part C States should disappear as a category of States; and that such of the existing Part C States as could not be merged in adjoining States should be directly administered by the Central Government. The question of devising suitable arrangements for associating representatives of the people of these areas with their administrations was under consideration.

Turning to the Commission's detailed proposals, the communiqué said that the Government had accepted its recommendations regarding the formation of the new States of Kerala, Karnataka (which would be named Mysore), and Madhya Pradesh, and regarding the continuance of the States of Madras, Rajasthan, Uttar Pradesh, Bihar, West Bengal, Assam, and Orissa, broadly on the basis proposed by the Commission Some minor adjustments had been made as regards areas to be included in some of these States.

"The Government of India," the communiqué went on, "have carefully considered the Commission's recommendation regarding the formation of Bombay and Vidarbha States. The proposal appears to be fair and reasonable. But in view of the strong opposition from the Marathi-speaking areas to the creation of the proposed bilingual State, and in view also of the special position of the City of Bombay and public opinion in this area generally, the Government of India have arrived at the conclusion that two States—namely, a Gujarat State comprising the Gujarati-speaking areas, with its capital within the State, and a Maharashtra State comprising the Marathi-speaking areas, including the areas of the proposed Vidarbha State, with its capital within the State, as well as one Centrally-administered area, namely, Bombay—should be constituted in place of the States of Bombay and Vidarbha as proposed by the Commission . The question of devising a suitable form of administration for Bombay and associating the people of this area with its goverance is under examination."

The Government had also decided that Tripura, in accordance with the wishes of its people, should for the time being remain a Centrally-administered area, and that the Laccadive, Minicoy, and Amindivi Islands, which at present formed part of Madras State, should be transferred to and administered by the Centre, in accordance with a suggestion by the Madras Government. The Commission's recommendations about the formation of (i) a Punjab State comprising the territories of the existing States of Punjab, PEPSU, and Himachal Pradesh, and (ii) a residuary Hyderabad State, or alternatively a larger Andhra State [i.e. Visalandhra], were still under consideration.

With regard to border adjustments, the Government had proceeded on the basis of the Commission's recommendations Some minor adjustments, however, had been made, largely by agreement, and others might follow if agreement were reached. The Commission's recommendations on safeguards for linguistic minorities, to which the Government attached great importance, had been accepted in principle, together with certain suggestions in the report intended to correct parochial trends or to secure greater inter-State co-ordination. Final decisions on some of these matters, however, would have to be taken in consultation with the State Governments.

The communiqué continued: "The Government feel that if the implications of the fact that the Indian Constitution recognizes only one citizenship—a common citizenship of the entire Indian people, with equal rights and opportunities throughout the Union—are fully appreciated and accepted, undue importance will not be attached to the question of territorial redistribution between States of the Union. As a further step in the direction of inter-State co-ordination, the Government propose, simultaneously with the creation of the new States, to establish Zonal Councils to deal with matters of common concern to the States in different zones, including economic planning and questions arising out of reorganization. The Zonal Councils will be deliberative and advisory bodies; their creation will not, therefore, in any way detract from the legislative and executive authority of the States If properly worked, however, these bodies should serve to promote inter-State concord and arrest the growth of acute State-consciousness

"It is proposed to group States and areas into the following zones for the purpose of establishing Zonal Councils. (1) Northern Zone, comprising the existing States of Punjab, PEPSU, Himachal Pradesh, Delhi, and Rajasthan, with such territorial adjustments as may be made; (2) Central Zone, comprising Uttar Pradesh and the proposed Madhya Pradesh State; (3) Eastern Zone, comprising the proposed States of Bihar, Orissa, West Bengal, Assam, Manipur, and Tripura, (4) Western Zone, comprising the proposed States of Maharashtra and Gujarat and the Centrally-administered area of Bombay, and (5) Southern Zone, comprising the States of Andhra and Madras, together with the proposed States of Mysore and Kerala and the residuary State of Hyderabad, as proposed by the Commission The Government also contemplate the appointment of common Governors and the establishment of common High Courts and common Public Service Commissions in certain regions"

An appendix to the communiqué, giving details of the proposed boundary changes, stated that Uttar Pradesh would remain as at present constituted; that Madhya Pradesh, Rajasthan, and Orissa would be as proposed by the Commission; that Madras, Kerala, Karnataka (Mysore), Bihar, and West Bengal would be as proposed by the Commission except for minor boundary adjustments, and that Assam would be as proposed by the Commission, except that Tripura would not be included in its territories. Maharashtra would consist of the Marathi areas of Bombay, Madhya Pradesh, and Hyderabad, and Gujarat of Saurashtra, Kutch, and the Gujarati areas of Bombay. The Commission's recommendations regarding the transfer to Andhra of certain parts of the Bellary district of Mysore were still under consideration

The Government's proposals aroused violent opposition in Bombay and Orissa, where serious disturbances took place during the following week. Strong discontent was also evident in West Bengal and Bihar, and, to allay the ill-feeling aroused by these boundary disputes, the Chief Ministers of West Bengal and Bihar proposed on Jan. 23 a merger between the two States. Repercussions in the various States to the Government of India's proposals are described below.

Bombay. Before the announcement of the Government's proposals, 451 Communist and other left-wing Marathi leaders were taken into preventive detention by the Bombay City police in the early hours of Jan. 16. When the proposals became known, the Bombay Municipal Council adjourned as a protest, and a protest motion was also adopted unanimously by the Poona Municipal Council During the day many textile and other factories in Bombay were closed because of a *hartal* observed by the workers in protest against the preventive arrests; many schools were closed down, whilst factories, buses, and cars were stoned by the mob, over 400 people being arrested After a broadcast in the evening by Mr. Nehru, who called unavailingly for the maintenance of order, more serious acts of violence began, and the police twice opened fire on crowds which were trying to set fire to a building and stoning buses and trams. One person was killed and seven injured.

Rioting continued on Jan. 17, when thousands of demonstrators carrying black flags with the inscription "Death to Nehru" thronged the streets of the city; one man was killed and three injured by police fire, and about 100 people arrested.

A call by left-wing organizations for a one-day strike on Jan 18 was generally observed by textile, engineering, and dock workers, bringing the port of Bombay to a standstill. Numerous clashes took place between demonstrators and the police, who had been given orders to fire at sight on looters and arsonists. The mobs barricaded streets, attacked buses and trams, set fire to public buildings, and threw stones and acid-filled bulbs at the police, who used tear-gas and opened fire 114 times, together 14 people were killed by police fire, 60 received bullet-wounds, and over 250 were injured by stone-throwing or *lathi* charges Train services were disorganized after rioters had cut down overhead power lines and damaged railway tracks, and an unsuccessful attempt was made to sabotage the power station at Kapoli (about 50 miles away), on which Bombay depends for its electricity supply. Mr S. A. Dange, general secretary of the Communist Party, was arrested at Bombay airport when he arrived from Delhi, and a curfew was imposed from 7.30 p.m. to 6 a.m.

The rioting reached its height on Jan. 19, when mobs streamed through the streets in an orgy of violence, hurling flaming torches into residential buildings, police posts, and Government premises, causing a number of fires, attacking buses and private vehicles, and looting many shops. Telephone communications were disrupted, electric train-wires cut, and train services seriously dislocated. Local curfews were proclaimed by the police in a number of areas, and 11 people were killed when the police opened fire on rioters.

As a result of the continued imposition of curfews in the main trouble areas, and following appeals by political and trade union leaders for the resumption of normal activities, the situation improved on Jan 20, looting of shops and attacks on private property nevertheless continued, one person being killed by police fire and 43 arrests being made. By Jan. 23, however, the city had virtually returned to normal. According to official figures 75 people were killed in the riots, although unofficial reports put the number of killed at over 300 and of injured at over 500, including about 200 policemen.

The mob violence into which the movement had developed was strongly condemned by the Maharashtrian leaders. Mr. Shankarrao Deo, the president of the *Samyukta Maharashtra Parishad*, declared that he had never envisaged the realization of Maharashtrian claims other than on a basis of peace and goodwill between the majority and minority communities, and that the restoration of peaceful conditions now took precedence for him over all other aims The Bombay police attributed the mob excesses to a carefully prepared rising engineered by Communists profiting by the friction aroused over the States' reorganization proposals.

Elsewhere in Bombay State, strikes and demonstrations occurred at Poona (where the mayor and corporation resigned in a body on Jan. 19), Sholapur, Kolhapur, and Sangli.

Five Congress members of the Bombay Legislative Assembly announced on Jan 18 that they had resigned their seats as a protest against the Government of India's decision and the "repressive policy" of the State Government. On the following day it was announced by Mr. N. V Gadgil (president of the Maharashtra Pradesh Congress Committee) that all Maharashtrian Ministers, Parliamentary Secretaries, M P.s , and members of the State Legislature would be called upon to resign Accordingly, Mr. Hiray (the Finance Minister) and Mr. Shavan (Minister for Local Government) announced their resignation from the State Government on Jan. 23 ; the Chief Minister (Mr Desai) refused, however, to accept their resignations The Deputy Minister for Prohibition, Dr Naravane, had resigned on Dec 27 at the request of Mr. Desai, who charged him with "undermining the Congress Party and the State ministry" by his activities.

Orissa. Strong feeling was aroused in Orissa by the Government's rejection of the State's claims to certain areas of Bihar and Madhya Pradesh Twenty leading Congressmen, including Ministers and members of the Central Parliament and the State Assembly, resigned from the party on Jan. 17. A general strike began at Cuttack (the State capital) on Jan 20, during which the All-India Radio station was attacked by students, aircraft were prevented from landing at the airport, and train services were disorganized by demonstrators who squatted on the railway lines. On Jan. 22-23 serious rioting occurred at Puri, where the mob burned down the railway station and several Government buildings, held up trains by squatting on the rails, and stormed the local gaol, liberating several convicts. Several hundred troops were flown in from Calcutta on Jan 23 to help the police, which had to fire repeatedly to disperse threatening crowds in Cuttack

West Bengal and Bihar. The Government's proposals aroused discontent both in Bihar, because of the proposed transfer of certain border areas to West Bengal, and in West Bengal, because an area of 500 square miles recommended for transfer by the States Reorganization Commission would remain part of Bihar The Chief Minister of Bihar, Dr S. K. Sinha, was reported on Jan. 18 to have asked Mr. Dhebar (the Congress President) for permission to resign, and during the next few days mass demonstrations and *hartals* occurred in the disputed areas. In West Bengal the Pradesh Congress Committee adopted on Jan. 13 a resolution declaring that the Commission's recommendations had fallen short of their expectations, and that a "greater wrong" was about to be perpetrated A general strike in Calcutta on Jan 21, called jointly by some Leftist organizations and a committee of prominent citizens, passed off peacefully except in one suburban area, where two people were killed and 25 injured in clashes caused by the refusal of some factories to close

The Chief Ministers of Bihar and West Bengal, respectively Dr. Sinha and Mr. B. C. Roy, issued a joint statement on Jan. 23 proposing that the two States should merge into one bilingual State, since the Government's decisions had satisfied neither of them. [The language of West Bengal is Bengali, whilst Hindi is spoken in Bihar.] The statement said, in part:

"Recent developments in various parts of India in regard to the proposals for the reorganization of the States have caused us and many others profound dismay. Provincial and linguistic feelings have been roused to such a pitch that separatist tendencies are imperilling the unity of India. This situation has been discussed by the Working Committee of the Congress Party, who have passed a resolution on this subject. In this resolution they have drawn attention to the grave danger that faces the nation, and have suggested that the whole question of the reorganization of States must be viewed from a positive point of view so that it might lead to the promotion of Indian unity.

"We have given earnest thought to the resolution of the Working Committee, and feel that we, the Chief Ministers of Bihar and West Bengal, should endeavour to give some content to this proposal in the larger interest of the nation, as well as in the interests of our two States.

"The Government of India has given its decision on the recommendations of the States Reorganization Commission regarding the border areas of West Bengal and Bihar. As subsequent events have shown, neither the report nor the Government of India's decision has given satisfaction to the people of Bengal or of Bihar. The people of Bihar are dissatisfied because the decision means the transfer of some territory from Bihar to West Bengal. On the other hand, the people of West Bengal feel that their State has not been given enough territory.

"These feelings . . . are easy to understand when the decisions are considered from the point of view only of the two States, but we cannot forget the fact that these two States are part of the Indian Union and are closely allied to each other in many ways. Some of the border areas between the two States have many common features and, from the economic point of view, many projects also concern the two States. Inevitably, there has to be close co-operation between the two for their mutual advantage. Any step which creates misunderstanding and leaves a sense of bitterness and frustration will be harmful to both the States, as well as to the larger cause of India. . . . We feel that every attempt should be made to find a more permanent solution of this problem. . .

"We propose, therefore, that the two States should be merged to form a single State It was not very long ago that Bengal and Bihar were parts of one State. It should not be difficult to create an atmosphere of a happy voluntary merger. . . From the economic point of view, and that of the five-year plans, it will also be easier to plan for progress in both these areas In particular, this will be a significant example of that positive approach to the problem of Indian unity to which reference was made in the Working Committee's resolution. . . .

"While we have made this proposal and have expressed our agreement to the merger of Bihar and West Bengal, in full confidence of its acceptance by the people concerned, it is clear that the details will have to be carefully worked out The people concerned will have to be consulted, and an atmosphere of voluntary reunion and co-operation has to be created To that end we intend to devote ourselves immediately"

Mr. Nehru, in a statement on the same day, warmly welcomed the proposal of the two Chief Ministers, and expressed the hope that "the great lead they have given will be accepted by the people of the two States, and will wake up others also to the realities of the situation today." He added: "We have had enough folly in this country during recent weeks, and it is time we turned our faces away from it."

The Congress Working Committee, in a resolution adopted on Jan. 23 (entitled *A Call to the Nation*), strongly condemned the disturbances in Bombay City and in other parts of India, which, it said, had "produced a situation imperilling the future of India and her people."

After recapitulating the Committee's efforts to "find as large a measure of agreement as possible in regard to the reorganization of States," the resolution went on: "The Committee was, above all, anxious that the unity and solidarity of India should be maintained and furthered It noted with deep regret that disrupting forces were at work in the name of linguistic provinces, but often with other aims in view. It tried to check them and to emphasize that primary importance should be attached to the solidarity of India as a whole, and not to administrative divisions Unfortunately, disruptive elements, taking advantage of the people's love of their language, misled many people and gathered strength . . In spite of the efforts of the Committee, serious disturbances took place in Bombay City. Bombay and India were disgraced and dishonoured In some other parts of India, also, deplorable occurrances took place, though on a lesser scale. All these occurrences have produced a situation which imperils the future of India and her people.

"Even though mob violence has been curbed by governmental action, the situation that has arisen is a dangerous one, and full of peril for the nation. It should be clearly understood that there can be no surrender to violence and methods of terrorism, and that they have to be met with all the forces of the State in order to protect innocent citizens and the well-being of the nation. It must also be clearly understood that no changes will be made in the decisions already arrived at, or that might be taken later, in regard to the reorganization of States because of violence or terroristic methods."

The resolution appealed to all Congressmen who had resigned from Ministries or Legislatures to withdraw their resignations.

Sir Chintaman Deshmukh (a Maharashtrian), the Indian Finance Minister, tendered his resignation on Jan. 22 as a protest against the Government's decision on the future of Bombay. On Jan. 30, however, he was reported to have agreed to reserve his decision until further consultations had been held with a view to reaching a settlement.—(The Hindu, Madras - The Statesman, Calcutta - Times of India, Bombay - Indian High Commissioner's Office, London) (14616 A.)

Note. It was stated by British press correspondents in India that the Gujaratis formed about 18 per cent of the population of Bombay City and the Marathis 48 per cent, the remaining one-third consisting of Sikhs, Moslems, Parsees, etc. The wealthy Gujarati community, it was pointed out, largely controlled the city's business and political life, whereas the Marathis formed the bulk of the working-class population (Times - Manchester Guardian)

A. FRANCE - ICELAND. — Legations raised to Embassy Status.

The *Quai d'Orsay* announced on Feb. 3 that the French and Icelandic Governments had agreed to raise their diplomatic missions in Reykjavik and Paris to the status of embassies. (Le Monde, Paris)

B. YUGOSLAVIA. — Diplomatic and Trade Relations with Ecuador.

It was announced in Belgrade and Quito on Jan. 30 that Yugoslavia and Ecuador had agreed to establish diplomatic and trade relations. (Tanjug Agency, Belgrade)

A. UNITED STATES. — Progress of Racial Desegregation in Southern States. - Virginian Referendum on Schools Question. - Inter-State Commerce Commission's Ban on Segregation on Trains and Buses. - Supreme Court Ruling against Segregation in Public Parks. - Allegations of Racial Discrimination in Mississippi. - Formation of "Federation for Constitutional Government." - Southern States' Counter-measures against Desegregation.

Following the U.S. Supreme Court's ruling of May 31, 1955, that States should make a "prompt and reasonable" start towards implementing the Court's earlier ruling that segregation in schools was unconstitutional, a number of southern and border States took measures at the start of the school year in September to abolish the separation of white and negro students in their public (i.e. State-assisted) schools. In Mississippi, Georgia, and South Carolina, however, action had already been taken to enable the State authorities to abolish the public school system and thus to avoid the Supreme Court's rulings (see page 14245, second column), whilst similar action was taken by Alabama and Virginia in the latter half of 1955.

The Governors of Georgia, Mississippi, South Carolina, and Virginia, with the Governor of North Carolina attending as an observer, met in Richmond (Virginia) on Jan. 24, 1956. They adopted a resolution declaring that "the States have not delegated to the Federal Government or any agency thereof the power to prohibit the segregation of the races in public schools," and stating that their respective legislatures would be recommended to take the following action:

"(1) That there be adopted a resolution of interposition or protest in appropriate language against the encroachment of the Central Government upon the sovereignty of the several States and their people. ['Interposition' is a theory by which dissenting States are held to possess powers to 'interpose' their rights against a supposed usurpation of the Constitution by the Federal Government.]

"(2) That a call be made upon the Congress of the United States to take such action within the limits of its constitutional authority as to protect the States and their peoples against present and future encroachment by the Central Government.

"(3) That each State exercise its right to enact and utilize such other appropriate legal measures as it may deem advisable to protect its sovereignty and the rights of its people."

Governor Hodges of North Carolina stated after the meeting that the programme would be given "serious consideration" by the North Carolina advisory commission on education, and by himself, with a view to submitting it to the next session of the State legislature.

Senator Eastland (Democrat, Mississippi), speaking on Jan. 26 at a meeting in Columbia (South Carolina) organized by groups in favour of maintaining segregation, outlined a strategy of organized delay by which the Southern States could circumvent the Supreme Court's ruling.

If necessary, he said, the States could abolish school districts, create other areas, and thus remove the basis of the legal actions which had been decided on by the Supreme Court. This would mean that the whole case would have to start again, with years of delay. The States could also, when necessary, close down schools. By changing State laws and creating new State policies which would have to be ruled upon by the courts, and eventually by the Supreme Court, the States could "litigate this for an indefinite time in hostile Federal courts." This would give the States time to frame a segregation policy based on factors other than race. Welcoming the proposal for State "interposition" put forward by the four Southern State Governors two days earlier, Senator Eastland said: "What we attempt to do is to point to the illegality and to void by constitutional and legal means an unconstitutional and illegal act committed by the Supreme Court."

A summary of the action taken by various Southern States in regard to "desegregation" in schools, and other related matters, is given below.

Alabama. On July 22, 1955, the Alabama State Legislature completed action on a Bill giving local school-boards almost unlimited authority to determine where individual pupils must attend school. Although the Bill made no mention of the race or colour of pupils, it provided that each child should be given his assignment on an individual basis, in accordance with what the school-board considered to be the best interests of the child and the community, and taking account (among other things) of his intelligence, learning ability, and personal character.

Among the relevant factors which school-boards were asked to consider were available room and teaching capacity in the various schools; the availability of transportation facilities; the effect of the admission of new pupils "upon established or proposed academic programmes"; the suitability of established curricula for particular pupils; the adequacy of the pupil's academic preparation for admission to a particular school and curriculum; the scholastic aptitude, relative intelligence, or mental energy or ability of the pupil; the psychological qualification of the pupil for the type of teaching and association involved; the effect of the admission of the pupil on the academic progress of other students, and on prevailing academic standards; the psychological effect on the pupil of attendance at a particular school; the possibility or threat of friction or disorder among pupils or others; the possibility of breaches of the peace or ill-will or economic retaliation within the community; the home environment of the pupil; the maintenance or severance of established social and psychological relationships with other pupils and with teachers; and the morals, conduct, health, and personal standards of the pupil.

Although the Bill was vetoed by the State Governor (Mr. James E. Folsom) it was re-enacted by the State Legislature with an overwhelming majority, the Governor's veto thus being overridden.

On Oct. 10, 1955, the U.S Supreme Court enjoined the University of Alabama to admit two Negro students who had been refused admission to the university "solely on account of their race and colour." The two students—Miss Autherine Lucy and Mrs Polly Anne Myers Hudson—had been seeking admission since 1952. Mrs Hudson, who was seeking a divorce at the time, was subsequently refused admission to the university on grounds of her "marital record" whilst Miss Lucy was suspended indefinitely on Feb. 6, after her first appearance at the university the previous week had led to anti-Negro demonstrations by white students.

Arkansas. For the first time in the State's history, a number of schools in Eastern Arkansas were opened to white and Negro pupils on equal status at the beginning of July, 1955.

Delaware. Only 15 of the 62 school districts had abolished segregation at the beginning of the 1955-56 school year, but there was no repetition of the disorders which had marked the start of desegration a year earlier (see page 14245, second column) The 15 districts which admitted Negroes to the local schools were all in Wilmington (the State capital) or its suburbs.

District of Columbia. The Superintendent of Schools for the District of Columbia (Dr. Horning) stated on Sept. 10, 1955, that discrimination on racial lines in the capital's school system had now been abolished Dr. Horning differentiated, however, between desegregation—which he described as "moving people and things about" in such a way as to remove the "colour line"—and integration—which he defined as "putting together two school systems that have been entirely separate for many years." He emphasized that although schools in the District of Columbia had been desegregated, full integration would take some years

Florida. The State Supreme Court ruled on Oct 19, 1955, that "the theory of separate but equal facilities, under which this State had developed its educational system, has been abolished by the decision of the Supreme Court . . . and we deem it to be our inescapable duty to abide by this decision. . ." The Court (which was giving its decision on a case in which a Negro graduate had been refused admittance to the University of Florida Law School) ruled that the State Board of Control could not lawfully refuse to admit the applicant "merely because he is a member of the Negro race and because equal facilities are available [elsewhere in Florida] for Negroes."

Georgia. The Georgia Board of Education unanimously adopted a resolution on July 12, 1955, which provided for the automatic revocation of the teaching licence and salary of any teacher who "supports, encourages, condones, offers to teach, or teaches" classes of mixed races On Aug 1 the Board ordered all teachers who were members of the National Association for the Advancement of Coloured People to resign from that organization by Sept. 15 or to have their teaching licences revoked for life

The State Attorney General (Mr. Eugene Cook) announced on Aug. 3 the appointment of 25 "special deputies" to assist his office to preserve racial segregation in public schools.

On Jan. 16-18, 1956, the State Senate passed six Bills designed to convert public schools into private schools and thus evade the Supreme Court's ruling on desegregation.

Kentucky. In the first suit to abolish segregation in Kentucky's public schools, a Federal District judge in Louisville ruled on Dec. 1, 1955, that the Supreme Court's decision outlawing segregation must be complied with "at the earliest practicable date."

Maryland. The integration of Negroes in Maryland's public schools, inaugurated in Baltimore in September 1954, was extended in September 1955 to 10 of the State's 23 counties, with only a few instances of comparatively minor friction.

Mississippi. Governor James P. Coleman, in his inaugural address to a joint session of the State legislature on Jan. 18, 1956, announced that Mississippi would retain segregation of Whites and Negroes without violence and despite the Federal Government "With all due respect to the mighty power of the U.S. Government," he declared, "it will never be able to force racial integrogation in Mississippi or in any other State where the people are unwilling to have it done" He predicted that at the end of his four years in office "the separation of the races in Mississippi will be left intact and will still be in full force and effect, in exactly the same manner and form as we know it today."

Missouri. Public school segregation in Kansas City was abolished on Sept. 7, when the city's 90 schools were opened to children of all races for the first time.

North Carolina. The State Advisory Commission on Education, after a meeting with Negro educational leaders in the State on July 8, 1955, recommended that local authorities should continue segregated schools during the 1955-56 school year unless the Commission had completed its studies on the problems of integration in time to make an earlier change.

The University of North Carolina announced on Sept. 15 that it would admit three Negro students to its undergraduate school, for the first time in the university's 166-year history. The university's action followed a ruling by a Federal Court on Sept. 10 that the university must consider the applications of the three Negro youths without regard to race or colour.

South Carolina. A Federal circuit court in Columbia issued an injunction on July 15 ordering the trustees of schools in the Somerton District of Clarendon County to establish, "with all deliberate speed," a school system not based on racial discrimination. The case was one of the original ones which had led to the Supreme Court's ruling on segregated schools, in 1952 the circuit court had ruled that segregated schools in Clarendon County were not illegal if equal facilities were provided, but this decision was reversed by the Supreme Court, which subsequently remitted the case to the lower court with instructions to order the Negro plaintiffs to be admitted to public schools 'on a racially non-discriminatory basis with all deliberate speed"

Tennessee. The State Board of Education, on June 15, 1955, approved a programme of gradual desegration in the State's colleges, beginning with the graduate schools in the autumn of 1955 The State's Assistant Attorney General said in an official opinion that the State law requiring segregation in schools had been invalidated by the Supreme Court decisions and was therefore no longer effective.

Texas. The State Supreme Court ruled on Oct. 13, 1955, that the U S Supreme Court's decision outlawing school segregation annulled a Texan constitutional ban on the mixing of white and Negro students in schools.

On July 8 the Board of Regents had abolished segregation in the Graduate School of the University of Texas and at Texas Western College, with effect from the coming term The board also announced that it intended to abolish segregation in the undergraduate courses of the main university in the autumn of 1956, and that it would formulate a policy of selective admission based on merit and applicable to all, beginning with the academic year 1956-57

Virginia. Although the City School Board of Norfolk—the largest city in Virginia—approved the principle of integration of Whites and Negroes in public schools "without mental reservation" on July 3, 1955, there was strong opposition elsewhere in the State to the abolition of segregation in schools. This opposition was particularly centred on Prince Edward County, a rural area in southern Virginia where the Negro population is numerically greater than the white population, and from where one of the original cases had gone to the Supreme Court A Federal circuit court in Richmond, giving its ruling on the question of school segregation in the light of the Supreme Court's decisions, directed on July 18 that Prince Edward County must eventually establish a school system which was not based on racial discrimination. As in the case of Clarendon County (South Carolina), however, the court neither fixed a time-limit nor prescribed the procedures by which that objective should be accomplished

On Nov. 12, 1955, the report was published of a special commission of 32 members of the State Legislature which had been appointed in August 1954 to find legal means of avoiding enforced integration in schools The commission recommended (1) that local school-boards should be permitted to assign pupils to schools on bases other than race or colour (as in Alabama—see above), and (2) that tuition grants should be paid to parents for the private schooling of their children if they refused to let them attend racially-integrated schools, or if they lived in communities which abolished public schools rather than integrate them The Commission expressed its conviction "that separate facilities in our public schools are in the best interest of both races, educationally and otherwise, and that compulsory integration should be resisted by all proper means in our power."

As the second of the commission's recommendations involved the amendment of the State's constitution, a special session of the Virginian Legislature was called at the beginning of December 1955 and passed a Bill which authorized the holding of a referendum on the matter within 60 days The referendum (in which voters were asked to decide for or against the election of a State convention to amend the constitution) was held on Jan. 9, 1956, and resulted in a large majority for the proposal. some 300,000 votes were cast in favour and 143,000 against.

A number of other recent developments in connexion with racial segregation are summarized below.

Ruling against Segregation in Parks and Bathing Places. The U.S Supreme Court, in two decisions on Nov 7, 1955, unanimously ruled that racial segregation in public parks, playgrounds, golf courses, and bathing beaches was unconstitutional. As in its decision on segregation in schools, the Court dismissed the doctrine of "separate but equal" facilities for Negroes One of the two cases originated in Maryland and the other in Georgia

On Jan 18, 1956, the Georgia Senate passed two Bills concerning the disposal of State parks in order to prevent their use by Negroes

Ban on Segregation on Inter-State Trains and Buses. The Inter-State Commerce Commission ruled on Nov 25, 1955, that racial segregation on inter-State trains and passenger buses, and the segregation of inter-State travellers in public waiting-rooms, were unlawful and must be brought to an end by Jan 10, 1956. [The Commission has no authority to lay down regulations regarding passengers travelling wholly within any State.] The Commission rejected the principle of "separate but equal" facilities which had previously guided its rulings, declaring that "in assigning or directing Negro inter-State passengers to coaches or portions of coaches designated or provided for the exclusive use of such passengers, and in maintaining waiting-rooms in stations designated for the exclusive use of such passengers," the Negro passengers were being subjected to "undue and unreasonable prejudice and disadvantage" The Commission's ruling was given in regard to two cases, brought by the National Association for the Advancement of Coloured People and by a Negro woman respectively. The Department of Justice had submitted a brief supporting the applicants' claim for the abolition of segregation.

Governor Kennon of Louisiana declared on Jan. 10 that the I C C 's decision was "illegal" and ordered all State, parish, and municipal officials in Louisiana to continue rigid enforcement of State laws requiring separate facilities for the races at stations. He said that the Commission's order directly violated a Supreme Court opinion in an 1833 civil rights case to the effect that the regulation of accommodation and facilities for public conveyances was reserved to the States under the Tenth Amendment to the U S Constitution. [The Tenth Amendment provides that powers not delegated to the Federal Government by the Constitution are reserved to the States]

Allegations of Racial Discrimination in Mississippi. The National Association for the Advancement of Coloured People requested the Department of Justice on Sept 7, 1955, to take "prompt and effective action" against what it described as "a state of jungle fury" in Mississippi It alleged that "White Citizens' Councils" had created an atmosphere of violence in the State which had resulted in three murders, hundreds of threats of violence, a drastic reduction in the number of Negro voters, and numerous instances of intimidation

The allegations about the "reduction in the number of Negro voters" arose out of incidents at the Gubernatorial Democratic primary election on Aug 23, when Negro voters were reported to have been turned away from the polls or their ballots challenged over a widespread area An inquiry into the allegations was instituted by the U S Attorney General, Mr Brownell. President Eisenhower, in his recent State of the Union Message, requested the setting-up of a Congressional bipartisan commission to examine the charges (see page 14653, second column).

Southern Opposition to Desegregation. Delegates from 12 southern States met in secret at Memphis (Tennessee) on Dec 28-29, 1955, to constitute formally a new national organization to fight racial integration and what were termed "other efforts to destroy the Constitution" It was disclosed that the organization—called the Federation for Constitutional Government—had been founded at a meeting at Jackson (Mississippi) on Jan 21-22, 1955, with Mr John U. Barr, a New Orleans industrialist, as chairman of its executive committee

Desegregation in Maryland National Guard. Governor McKeldin issued an order on Nov 20, 1955, providing for the immediate desegregation of the Maryland National Guard Maryland was the first of the Southern States to take such action

A report on the progress of race relations in the U.S.A. during 1955, published on Dec. 30 by Dr. L. H. Foster, president of the Tuskegee Institute, referred to "hundreds of formerly segregated schools" which had been desegrated "without creating serious tensions or conflict." The report also noted, however, that opponents of desegregation had resorted to "economic pressure, intimidation, and violence" in some areas. (New York Times - New York Herald Tribune)

A. BELGIUM - UNITED KINGDOM. — Atomic Energy Agreement.

An atomic energy agreement between the U.K. and Belgium was signed in London on Nov. 19, 1955, by Mr. Macmillan (then U.K. Foreign Secretary) and M. Spaak (the Belgian Foreign Minister).

The agreement (which runs for 10 years) provides for the sale of uranium from the Belgian Congo to Britain, and thus continues the tripartite arrangements made in 1944 between Belgium, Britain, and the U S.A., whereby Belgium agreed to supply the major part of its uranium production in the Congo to the Anglo-American Combined Development Agency

The second part of the agreement provides for collaboration between British and Belgian scientists in the development of the Belgian atomic industry. It also lays down that selected Belgian scientists and engineers who have been cleared for security purposes by the two Governments will be admitted to Calder Hall and other U K. atomic establishments to gain technical training and experience. In addition, Belgium will be able to buy supplies of purified natural uranium metal and agreed amounts of specially enriched fuels from the U K., on condition that such fuels will be returned for processing once they have been used in an atomic reactor.

The agreement was similar to that concluded between the U.S.A. and Belgium on June 15, 1955 (see page 14361).

B. INDIA. — New Chief Justice.

Mr. Justice Sudhi Ranjan Das was sworn in on Feb. 1 as Chief Justice of the Supreme Court of India in succession to Chief Justice Mukerji, who had resigned because of ill-health. Before joining the Federal Court in January 1950, Mr. Justice Das was Chief Justice of the Punjab High Court.
(Indian High Commissioner's Office, London) **(13978 G.)**

C. CANADA. — Cabinet Appointment.

Mr. Hugues Lapointe, Minister for Veterans' Affairs, took over the additional portfolio of Postmaster-General on Nov. 8, 1955, in succession to Mr. Alcide Cote, who had died some months earlier.—(Montreal Star) **(Prev. rep. 13682 B.)**

A. UNITED KINGDOM. — Wage Increases and Trade Disputes in 1955. - The Wage-Price Relationship. - Statement by Chairman of Stock Exchange on Relationship between Wage Increases and Company Profits.

A general review of wage increases and industrial disputes in British industry during 1955 was published in the January issue of the *Ministry of Labour Gazette* and is summarized below:

Wages and the Cost of Living. The average increase in weekly wages during the year was about 7 per cent, and the average rise in the level of retail prices about 6 per cent, compared with increases of 4.5 per cent and 4 per cent respectively in 1954. The wage-price relationship in 1955 is shown in the following monthly index figures (June 30, 1947 = 100):

	Wages	Prices
January	146	146
February	147	146
March	149	146
April	152	147
May	152	147
June	152	150
July	153	150
August	153	149
September	153	150
October	153	152
November	154	154
December	154	154

During 1955 about 11,889,500 workers received increases totalling £5,138,700 weekly, an average of about 8s. 10d. per worker. The following table shows the approximate number of workers affected in each of the principal groups of industries, and the net amount of the weekly changes in wage-rates

	Approximate number of workers affected	Estimated net weekly increases £
Agriculture, Forestry, Fishing	818,000	269,000
Mining and Quarrying	476,000	299,600
Treatment of Non-metalliferous Mining Products other than Coal	233,500	85,000
Chemicals and Allied Trades	201,500	78,800
Metal Manufacture	211,000	119,900
Engineering, Shipbuilding and Electrical Goods; Vehicles; Metal Goods not elsewhere specified	2,500,500	1,133,900
Textiles	482,500	153,600
Leather, Leather Goods and Fur	50,500	24,400
Clothing	401,500	132,400
Food, Drink and Tobacco	371,500	160,600
Manufactures of Wood and Cork	185,500	95,600
Paper and Printing	290,500	96,400
Other Manufacturing Industries	112,500	73,800
Building and Contracting	1,217,000	616,000
Gas, Electricity and Water	246,500	136,200
Transport and Communication	1,136,500	632,200
Distributive Trades	1,469,000	474,300
Public Administration	853,500	393,100
Miscellaneous Services	632,000	163,900
Total	11,889,500	5,138,700

Of the wage increases granted, £2,032,300 (39.5 per cent) was obtained through direct negotiations, £1,591,300 (31 per cent) through joint industrial councils, £785,800 (15.3 per cent) through wage councils and other statutory wages boards, £300,100 (5.8 per cent) under sliding scales based on the index of retail prices, £244,500 (4.8 per cent) by arbitration and mediation, and £184,700 (3.6 per cent) through other standing joint councils or conciliation boards

The index figures of weekly rates of wages (June 30, 1947 = 100) for each month of 1955 are shown below:

Date (end of month)	Men	Women	Juveniles	All Workers
1954:				
December	142	148	156	144
1955:				
January	144	151	158	146
February	145	151	158	147
March	147	153	160	149
April	150	154	162	152
May	151	154	163	152
June	151	155	163	152
July	151	155	163	153
August	151	155	164	153
September	152	156	164	153
October	152	156	165	153
November	152	157	165	154
December	152	158	166	154

Industrial Disputes. There were 2,424 industrial disputes involving stoppages of work during 1955, compared with 1,989 in 1954. About 670,900 workers (approximately 2 3 per cent of the working population) were affected, the total number of working days lost (3,794,000, an average of 5½ day per worker involved) being the highest since 1932.

The largest number of stoppages (involving 353,600 workers and causing the loss of 1,113,000 working days) occurred in the coal industry, but were mostly of relatively short duration.

Stoppages in the transport industry, however, accounted for 1,688,000 days lost, or nearly one-half of the aggregate loss of time through all disputes; the principal strikes were that of railway locomotivemen in May-June (see 14140 A, 14280 A), in which about 865,000 working days were lost, and the dock strikes of the same months, costing 875,000 working days An unofficial strike—which at its height involved about 1,700 ships' stewards and seamen—broke out at Southampton and Liverpool at the end of May in protest against the alleged undermanning of certain ships, after costing about 25,000 working days and holding up many liners, it ended on June 25 after call-up notices had been sent to the strikers on the ground that by leaving their employment as seamen they had forfeited their exemption from National Service.

Stoppages in the vehicle-building and shipbuilding industries accounted for the loss of 452,000 and 121,000 working days respectively. In the former, the principal stoppages were (*a*) a strike of about 7,000 men employed at three Rolls-Royce aero-engine works in the Glasgow district, owing to the rejection of their demand for the dismissal of a worker who had been deprived of his trade union membership for alleged failure to comply with a workshop decision not to exceed a certain bonus limit (245,000 days lost in October - December), (*b*) a strike of aircraft workers at the Hawker-Siddeley Blackpool works, arising out of the rejection of a demand for an extra bonus for night-shift workers.

The principal stoppage in the shipbuilding industry began at Birkenhead in September over the employment of sheet-metal workers on work claimed by joiners. After 14,000 working days had been lost, the strike ended in October, but three weeks later another stoppage began as a result of the employers' termination of an agreement about demarcation; by the end of the year about 900 workers had become involved and 19,000 working days lost. About 24,000 working days were lost in a wage dispute at East Scottish shipyards (September-December).

Losses of 73,000 and 767,000 working days respectively were caused by the London strike of printing machinery engineers in March-April (see 14176 A), and by stoppages in the engineering industry generally.

The relationship between increases in company profits and dividends on the one hand, and wages and salaries on the other, was compared by Sir John Braithwaite, chairman of the Stock Exchange, in an open letter published in the Press on Aug. 29, 1955. He stated that in the seven-year period 1947-55 advances in wages and salaries had totalled nearly 14 times as much as the volume of the rise in interest and dividends.

After recalling that in March, 1955, figures of interest and dividends had been published in respect of most securities quoted on the Stock Exchange, Sir John attributed the misconceptions on the subject—which, he said, still persisted—principally to "the use of percentages without stating the total sums to which they apply." Since no true view could be obtained without reference to both at the same time, and since "decisions of the first importance to the economic life of the country" might be influenced by the views held on these matters, it was important that the two methods of measurement should be brought into relationship with each other.

"Any broad consideration of these matters," the letter continued, "must go back to the spring of 1948, when Sir Stafford Cripps, with the support of the T U C, called for . . a standstill on the figures for 1947 [see 9053 A]. The Federation of British Industries obtained from its members an agreement not to increase dividends for 1948, and again for 1949, and Sir Stafford Cripps acknowledged in the House of Commons that these agreements had been substantially observed. . . . The fact that wages and salaries rose by £1,040,000,000, or 19 per cent, when dividend limitation was substantially observed must be borne in mind in considering the rises in dividends which came later. . . . Neither of the post-war Governments has been able to prevent a steady rise in the cost of living, though happily this rise has throughout kept well behind the compensating rise in wages and salaries, which have not at any time since 1947 been chasing prices, as is sometimes stated"

Sir John then quoted published statistics showing that wages and salaries for the year ended Dec. 31, 1954, totalled £9,265,000,000, compared with a total of £1,122,000,000 for interest and dividends on securities quoted on the Stock Exchange—i.e., eight times as much. Wages and salaries had advanced since 1947 by 69.2 per cent (£3,790,000,000), compared with increases of 51 6 per cent (£877,000,000) in company trading profits and of 32 1 per cent (£273,000,000) in interest and dividends. The rise in wages and salaries had thus been appreciably more than the rise in company profits by percentage, and four time more by volume; moreover, it had been more than double the rise in interest and dividends by percentage and nearly 14 times as much by volume. Sir John added that in each year since 1947 the rise in wages and salaries had exceeded by at least £80,000,000 the whole total of the rise in interest and dividends on Stock Exchange securities over the entire seven-year period from 1948 to 1954.

In conclusion, Sir John stressed that whilst no firm statistics were available beyond Dec. 31, 1954, the rises were continuing in all three sectors, and there were no indications of any material alteration in the relative positions.—(Ministry of Labour Gazette - Times - Financial Times - Manchester Guardian) **(Prev. rep. 14064 A; Sir Anthony Eden, Bradford Speech, 14639 A.)**

FEBRUARY 11—18, 1956

A. CYPRUS. — Increase in Terrorist Activities. - Proclamation of State of Emergency. - Ban on Cyprus Communist Party. - Discussions between Sir John Harding and Archbishop Makarios. - Anti-British Broadcasts by Athens Radio. - British Protests to Greece.

The internal situation in Cyprus during the past three months (mid-November to mid-February) was marked by a great increase in terrorist activities by the outlawed Eoka organization, bomb-throwing and other outrages being of almost daily occurrence in Nicosia, Limassol, Famagusta, and other centres. During this period a number of British servicemen were murdered by Eoka terrorists, several of them being shot dead in the streets of Nicosia and other towns by assailants who succeeded in escaping. [The number of British servicemen murdered by terrorists since the start of the emergency totalled 17 by the middle of February.] To counter the growth of terrorism, the Governor (Field-Marshal Sir John Harding) imposed a state of emergency, involving the death penalty for anyone found in possession of arms and ammunition, whilst all British forces in the island were placed on a war footing.

The situation was exacerbated by violent and inflammatory anti-British broadcasts from Athens radio in support of the campaign for *enosis* (union with Greece), leading to strong representations by the British Government. A feature of this propaganda was its effect on Greek Cypriot students and schoolchildren, who staged many anti-British demonstrations and attacked and stoned British troops on numerous occasions. As a result, 15 of the island's 35 secondary schools, and many elementary schools, had been closed down by the middle of February because of the pupils' indiscipline and the failure of the school authorities to maintain order.

Terrorist Activities. - Operations by Security Forces.

The principal incidents during the three-month period are described below chronologically, in continuation of 14513 A:

Nov 13, 1955 Three British soldiers were wounded, two seriously, in Famagusta by terrorists who shot them as they were leaving a cinema. The assailants escaped.

Nov 14. Police and troops used tear-gas to disperse a large-scale pro-*enosis* demonstration in Nicosia by students and schoolchildren who tore down British flags and stoned the security forces, 27 arrests were made, including 16 schoolboys.

Nov. 15. After further demonstrations by children and young persons, Sir John Harding ordered the closing-down of a large secondary school in Nicosia whose pupils had taken a leading part in the disturbances. All other secondary schools in the island were warned that they would also be closed down if they continued to tolerate mass absenteeism of their pupils and other forms of indiscipline.

Nov 18 A British staff-sergeant was killed and a warrant-officer seriously wounded when a time-bomb exploded outside the sergeants' mess at the Kykko camp, near Nicosia.

Nov 19 Eight soldiers of the South Staffordshire Regt. beat off a night attack by armed raiders on an explosives store at a mine some 20 miles from Nicosia.

Nov 21 A British sergeant was killed in Famagusta by terrorists who opened Sten-gun fire on an Army lorry, two men of a Commando unit were wounded when a convoy was ambushed at night in the mountains west of Nicosia, and widespread rioting occurred in Nicosia and Larnaca, bombs being thrown and the police being stoned before order was restored by tear-gas and baton charges. A hand-grenade thrown into a British-owned bar in Nicosia seriously injured a Cypriot woman, who died later in hospital; British soldiers in the bar were unhurt.

Nov. 23 Bombs were thrown at the homes of three British officers in Famagusta, no casualties being caused. Other bomb outrages occurred in different parts of the island, a road-bridge near Nicosia being blown up.

Ten prominent Greek Cypriots were arrested by the security forces in a dawn raid at Limassol. They included two members of the Ethnarchy Council of the Greek Orthodox Church, Dr Tritoftides, a well-known gynaecologist, Mr. Kotsapas, a Limassol merchant; and five of his sons. (A sixth son had been detained earlier for having weapons in his car.)

Nov. 24. A British sergeant was shot dead in a Nicosia street by a terrorist who succeeded in escaping. In the mountainous country west of Nicosia an Army lorry was ambushed by terrorists near the village of Khandria, a British private being killed and two other soldiers wounded. A Cypriot who tried to approach the lorry was shot dead by Commandos after he had failed to answer a challenge and tried to run away; he was believed to be one of the terrorists who took part in the attack.

Nov. 27. Five people were injured at the Ledra Palace Hotel, Nicosia, when a bomb exploded during a ball organized by the Caledonian Society of Cyprus.

Dec. 4. A large quantity of arms and explosives was seized by Customs officers at Limassol when they opened cases sent from the Piraeus (Greece) and consigned to a Limassol bookseller, Andreas Joannides. The cases—which were landed from a Greek ship, ostensibly as containing books—were found, on examination, to contain sub-machine guns, a Sten gun, pistols, quantities of ammunition, "limpet" mines, some T.N.T., fuses, and detonators. The consignment was seized and the bookseller arrested.

Dec 5. A police car travelling with a military escort in the Troodos mountains was ambushed by terrorists who killed a British soldier, a Cypriot policeman, and a Cypriot civilian who was cycling along the road at the time and was caught by the terrorists' fire.

Dec 7. Four British soldiers walking in mufti in a Nicosia street were wounded by a terrorist who opened fire on them from behind with a Sten gun, and who subsequently escaped.

Dec. 8 About 1,000 troops carried out a search for hidden weapons in monasteries throughout the island. An official statement said that some weapons and a small quantity of explosives had been found during these searches, and eight arrests made. Some dynamite was found at the Kykko monastery, the largest in Cyprus.

[In a sermon on Dec. 12, Archbishop Makarios denounced the troops carrying out these searches as "British barbarians," and accused them of having "violated the sanctity of holy places." It was commented by some press correspondents that the Archbishop's sermon was made on the same day on which one of his own priests had been arrested in possession of explosives—see below.]

Dec. 11-13. British troops carried out several arrests and detained a number of suspects for interrogation during searches in terrorist-infested areas of the Troodos mountains. Among those taken into custody was a Cypriot priest found in possession of detonators and explosives, and a 22-year-old Cypriot (Renos Kyriakides, a brother of the Bishop of Kyrenia) who was found in possession of a loaded revolver—an offence punishable by death under the emergency regulations imposed on Nov 27 (see below).

[Kyriakides was subsequently committed for trial, and was sentenced on Feb. 9, 1956, to 12 years' imprisonment. He had pleaded "guilty" to carrying a loaded revolver.]

Dec 14. Two British soldiers were shot in the back in Nicosia by a terrorist, one of them later dying in hospital. Several other British soldiers were wounded in bomb and shooting outrages in different parts of the island, whilst a Cypriot official was seriously injured by terrorists at Limassol.

Dec 15. Four terrorist gunmen ambushed a British military vehicle on a mountain road near the village of Lefka (35 miles west of Nicosia), the driver—a British soldier—being killed by automatic fire. An officer of the Royal Engineers who was travelling in the car (Major Brian Combe) jumped out and engaged the gunmen single-handed, killing one, seriously wounding another, and capturing a third. After expending his ammunition he returned to the car, replenished his supply, renewed the exchange of fire, and stood guard over the captured men until help arrived. The man killed by Major Combe was found to be Charalambos Mouskos (22), a cousin of Archbishop Makarios and a well-known terrorist on whose head a reward of £5,000 had been placed.

[Major Combe, who was subsequently awarded the George Medal for "courage and initiative of the highest order," held a press conference on Dec 23 at which he deplored the fact that the Cypriots were "acclaiming the dead man [Mouskos] as their hero and the British Press acclaiming me as theirs." After declaring that the great majority of the Cypriot people were peaceful citizens who were "cowed by fear of a handful of murderers at large in the island," Major Combe asked that there should be "no jubilation over this tragedy" [the death of Mouskos], and appealed to all to wipe out the evil of terrorism and "save the island from more deaths, tears, and sorrow."

Dec. 16. The port of Limassol was placed out of bounds to British troops after a series of bomb incidents in which an R.A.F. man and two Cypriots were wounded.

Dec. 18 Three bombs were thrown into a Nicosia bar, wounding ten British Servicemen, a British civilian, three Americans, and a Greek Cypriot woman. In Famagusta, two British officers in mufti were shot in the back by a terrorist in the centre of the town, one of the officers being severely wounded.

The funeral of the terrorist Charalambos Mouskos, who was buried on this date in Nicosia cemetery, was made the occasion for nationalist demonstrations in different parts of the island. Disregarding instructions from the authorities, demonstrators created disturbances during the funeral ceremony and attempted to attack troops and police who were present to keep order. Archbishop Makarios, who conducted the funeral service, subsequently protested to Sir John Harding at the presence of "British troops and Turkish policemen," whom he accused of having "acted barbarously" by using tear-gas and batons to repulse the demonstrators. Sir John Harding rejected the protest, pointing out that only relatives of the dead man, clergy, and pall-bearers had been given permission to attend the funeral, that these orders had been wilfully disobeyed by members of the public, and that the security forces had been compelled to intervene to maintain order. The Governor also pointed out that Mouskos was "an outlaw who had taken part in ambushing and murdering a British soldier."

Dec 28 Troops operating in the mountains near Paphos caught a wanted terrorist who had gone into hiding in a monastery; a large quantity of military stores was seized during a search of the monastery.

It was disclosed in Nicosia that a lance-corporal of the Royal Leicestershire Regiment had disappeared from a military camp at Kyrenia some days earlier and could not be found. It was thought possible that he had been captured by terrorists and was being held as a hostage.

Jan. 2, 1956. Patrols of the Royal Marine Commandos and Gordon Highlanders, assisted by police dogs recently flown to the island from London, captured the biggest quantity of arms to date during searches in the snowbound Troodos mountains, where many terrorists were known to be hiding in caves. The arms seized included three machine-guns, a number of bombs, hand-grenades, and many small arms. Eight terrorists—three of whom were in possession of arms and ammunition—were captured during these searches after being tracked down by the police dogs. Searches of abandoned caves indicated that the terrorists were receiving food supplies from Amiandos and other villages in the area.

Two British soldiers were wounded by a bomb explosion in Famagusta, whilst a Cypriot policeman was shot and seriously injured by masked terrorists in a Nicosia suburb.

Jan. 5. A masked gunman broke into a ward in the Nicosia General Hospital and fired three shots at a woman patient who had been denounced by Athens radio as a "spy" against the Eoka organization. The assailant escaped by climbing down a fire-escape. The woman —Ariadne Constantiniou, a 45-year-old midwife—received bullet-wounds in the face, and it was feared that she would lose her sight

Jan 6. A time-bomb exploded outside a British military hospital near Nicosia but caused no casualties A bomb thrown by a terrorist into the home of a British serviceman in Nicosia wounded a three-year-old child, who, however, was only slightly injured and was subsequently discharged from hospital.

Jan. 11. A Turkish police sergeant (Abdullah Ali Riza), who had given evidence in trials of Eoka members, was shot dead by terrorists outside his home in Paphos. The murder aroused violent indignation among the Turkish community in Cyprus, the windows of Greek shops being smashed in Paphos and Nicosia The Turkish underground organization known as *Volkan* issued leaflets threatening that reprisals would be taken against five Greeks for every Turk killed, whilst a newly-formed Turkish Cypriot youth organization also distributed leaflets threatening "a life for a life and blood for blood." The leaflets declared that the Turkish Cypriots were supported by "25,000,000 Turks on the mainland," and said that "bearded priests will not be allowed to thrust us under the mercy of the Greeks."

Dr. Kutchuk, the leader of the Turkish Cypriot community, sent a telegram to Sir John Harding declaring that the Turks of Cyprus were enraged at the "cowardly and unprovoked" murder of Sergeant Ali Riza, and urging the Government to compel those who supported the terrorists to compensate Ali Riza's widow and children. He also sent a message to Archbishop Makarios demanding that the Greek community should unequivocally condemn the murder.

Jan. 15. A British soldier was shot dead in Famagusta while on sentry duty, the assailant escaping

Jan. 19. A British officer—Capt. J. P. Lane, of the R.A.O.C.—was shot five times in the back by two gunmen in one of the main squares of Nicosia, and died while being taken to hospital. The attack was carried out in broad daylight, the murderers escaping. Captain Lane was living in Nicosia with his wife and nine-weeks-old child.

Jan. 23. During the night of Jan. 22-23 masked terrorists in 28 towns and villages came to the doors of houses and ordered householders to hand over all guns in their possession. It was reported from Nicosia, however, that only some 200 sporting guns and air-guns had been obtained by these means. A Government order was immediately issued requiring everyone in Cyprus possessing shotguns, rifles, etc., to hand them over within 24 hours to prevent terrorists from getting them by threats of force. In compliance with this order, hundreds of such weapons were surrendered to the authorities in Nicosia, Famagusta, Larnaca, and other centres.

Jan. 27. Violent anti-British demonstrations were staged in Nicosia by several hundred schoolchildren who erected barricades in the streets, pelted British troops with stones and bottles, and hoisted the Greek flag Order was restored after tear-gas and batons had been used, one British soldier being wounded by the stone-throwing. The children were encouraged by two Greek Cypriot priests who remained in the background.

Jan. 29. A British soldier was wounded, and subsequently died in hospital, by a bomb flung into a police-station in a village near Paphos.

The Pan-Cyprian Gymnasium in Nicosia (the largest secondary school in Cyprus, with over 2,000 pupils) was closed down by Sir John Harding for an indefinite period. An official statement said: "During the past week the Greek secondary schools in Nicosia have failed to maintain proper discipline. and on every day of the week one or more of them have indulged in mass absenteeism, demonstrations, or clashes with the security forces The Nicosia Pan-Cyprian Gymnasium, in particular, has behaved deplorably. . . ."

Feb. 5. Tear-gas was used to disperse rioting schoolchildren at Limassol. The Headmaster of Limassol College (Mr. Avramides) was seriously wounded by a bomb intended by unknown assailants for a British military patrol.

Men of the Gordon Highlanders, aided by police and police dogs, searched three villages in the north of the island. Using masked informers to identify suspects among the male population, they made 19 arrests and seized some arms and ammunition.

Feb. 6. The Pan-Cyprian Gymasium in Famagusta was closed down after the pupils—about 1,000 boys and girls—had run riot in the streets, stoned British troops, and smashed the windows of an Army education centre. Tear-gas and baton charges were used to restore order.

Feb. 7. An 18-year-old Greek Cypriot youth, Petros Yiallouris, was shot dead by a British soldier in Famagusta during demonstrations in which barricades were erected and the security forces stoned The shot—which had been intended as a warning shot—was fired after another British soldier had been severely wounded by a stone which struck him on the head.

In the Limassol area, troops arrested three men—two of whom were terrorists for whose capture rewards of £5,000 had been offered —during searches in villages It was officially stated that the arrest of the three men was due to information received by the authorities in one of many anonymous letters denouncing the Eoka movement which were being sent on an increasing scale by the general public.

Feb. 10. Demonstrations were staged throughout Cyprus by secondary and elementary schoolchildren (some of the latter being only six years of age) in protest against the shooting of Yiallouris in Famagusta three days earlier In Limassol and Famagusta, children in the 6-11 age-group tore down Union Jacks and smashed portraits of the Royal family in their schools, hoisted the Greek flag, stoned British troops, and broke the windscreens of cars Schoolgirls in Limassol forcibly resisted men of the Norfolk Regt who entered their school to haul down a Greek flag, fought the troops for possession of the flag, and paraded the streets shouting anti-British slogans and stoning British soldiers British troops were also stoned by children at Paphos.

Feb 12 Two R.A.F men in mufti were shot dead in a Nicosia street, and another seriously wounded, by gunmen who opened fire on them while they were looking into shop-windows. The area was cordoned off but the assassins could not be found Nicosia was subsequently put out of bounds to British troops for the first time.

Feb 13. The wife of a British sergeant was severely injured, and subsequently had to have a foot amputated, by a bomb thrown into her home at Larnaca by a terrorist. Her young child was rendered unconscious by the explosion, and was only saved from being burned to death by a policeman who broke into the house and rescued it.

British troops were heavily stoned at the village of Kolossi, near Limassol, to which they had been sent to remove Greek flags being publicly flown. The population refused to disperse and adopted a threatening attitude, whereupon the troops opened fire. One person was killed and another injured.

The Abbot Epiphanios, head of the Krysoroyiatissa monastery, was shot dead by a masked and black-robed intruder who broke into the monastery and subsequently escaped.

Proclamation of State of Emergency. - Imposition of Collective Fines.

In view of the deterioration of the situation resulting from the increase in terrorist activities, Sir John Harding proclaimed a state of emergency in Cyprus on Nov. 27.

Under new regulations issued in the Official Gazette, the unlawful use or possession of firearms, bombs, and ammunition became an offence punishable by death, acts of sabotage such as interference with communications, power supplies, and water supplies became punishable by life imprisonment; the unlawful wearing of military or police uniforms also made the offender liable to life imprisonment; and looting, unlawful drilling, the wearing of disguises, and the harbouring of terrorists became punishable by imprisonment from five to seven years.

In addition, communities whose inhabitants engaged in unlawful activities became liable to collective punishment such as the imposition of fines, the closing of shops, and confiscation of property; youths under the age of 18 who engaged in such activities became liable to whipping; the Governor was given powers to deport or detain terrorists, impose a censorship, requisition property, and ban the display of flags, slogans, etc.; all public assemblies were banned with the exception of cinema and theatrical performances and religious services; and strikes unconnected with trade disputes were declared illegal.

With the concurrence of the British Colonial Secretary (Mr. Lennox-Boyd), Sir John Harding signed a proclamation on Nov. 28 placing the 10,000 British troops in Cyprus on a war footing for a period of three months. A Service spokesman said that this action "amounts to a parallel measure to the proclamation of a state of emergency by the civil power." The British forces in Cyprus were reinforced in January and February by units of the Highland Light Infantry and the Royal Horse Guards (The Blues).

Collective fines were imposed during December on three villages—Lefkoniko, Ypsonas, and Paralimni—under the emergency regulations. At Lefkoniko, where the post-office had been burned down by schoolboys, the 1,000 inhabitants were fined £2,000 (£2 per head), at Paralimni, a notorious trouble-spot, a collective fine of £1,500 was imposed, and at Ypsonas, where the telephone lines had been repeatedly cut, the inhabitants were fined £200 The fines were payable by all male members of the communities, under threat of imprisonment or confiscation of their property, and were paid over at the local police-stations without disorders. Sir John Harding paid a personal village visit to Lefkoniko to warn its inhabitants that they had "a very bad record."

Under the emergency regulations, several students in Famagusta, Paphos, and other centres were birched after having been found guilty of taking part in unlawful demonstrations and attacking the security forces. The youths were all between the ages of 15 and 18.

Field-Marshal Harding's Warning to Terrorists.

In a New Year message to the people of Cyprus, broadcast on Jan. 1, Sir John Harding warned the Eoka organization that " its days were numbered " and that " the net is slowly but surely closing around them."

The Governor said in his broadcast " We cannot look back at the last few months with much satisfaction We have seen this once happy, peaceful and prosperous island brought to a condition which all must deplore. Parents see the education of their children disrupted and the young incited to indiscipline and excesses Peaceful citizens see their businesses damaged and find it difficult to lead normal lives Worst of all, this island lives in the foul atmosphere of violence, murder and fear I warn Eoka here and now that their days are numbered, and that the net is slowly but surely closing around them No matter what temporary successes they may still gain by murder, raid, or ambush, they and their organization will be destroyed. I believe that 99 per cent of the population of Cyprus are longing for this sorry state of affairs to be brought to an end "

After denouncing the acts of brutality committed by the terrorists, such as the shooting of unarmed men in the back, Sir John Harding continued " I am glad that some people are now beginning to come forward and give the security authorities information about the terrorists I am not surprised to learn from captured terrorists that there exists in their ranks a growing sentiment of defeat . .

" There are people who say ' If only the British would not be so obstinate, if only they would agree tomorrow to the application of the principle of self-determination, all our problems would be solved. We could ring the bells and all live happily ever afterwards.' But anyone who sits down and thinks for a moment knows better than that. Would Cyprus, Greece, Turkey, the Middle East, and the world generally at once be safer and happier if Britain suddenly abdicated her responsibilities ? That would be unrealistic Any solution of the political problems here must take into account First, the wishes of all sections of the people of Cyprus ; secondly, the strategic requirements of the defence of the free world as a whole , and thirdly, the relations between the Powers concerned, primarily Britain, Greece and Turkey

" I am a soldier, and cannot help looking at the map of the world and thinking of the disaster that we are striving to avoid. We must all strive to reach a solution which will be acceptable to the pride and national interests of the peoples of Cyprus, Greece, Turkey, and Great Britain—a solution which will advance the political and economic development of Cyprus, and one which will keep our common front strong and unbroken."

Ban on Cyprus Communist Party.

The Communist Party of Cyprus (known as AKEL), together with all its subsidiary organizations—e.g. the youth and women's branches—was banned by Sir John Harding on Dec. 14 as an unlawful organization. At the same time the police arrested 135 leading Cypriot Communists, including M. Papaioannou (the secretary-general of AKEL), the Communist mayors of Limassol and Larnaca, and the deputy mayor of Famagusta. The Communist newspaper *Neos Democratis* was closed down and its machinery and equipment removed. A number of leading officials of the Pan-Cyprian Federation of Labour were detained at the same time, although the Federation itself (which has 22,000 members) was not proscribed. The Government announced that it was anxious not to disturb the work of legitimate trade unionists, who, it was recognized, had an important part to play in promoting stability and prosperity in the island.

M. Papaioannu had recently made violent attacks on Archbishop Makarios for his " conciliatory " attitude towards Sir John Harding.

Meetings between Sir John Harding and Archbishop Makarios.

Archbishop Makarios, the leader of the *enosis* movement, returned to Cyprus on Nov. 18 after a 17-day visit to Athens during which he had discussions with the Greek Prime Minister, M. Karamanlis, and the Foreign Minister, M. Theotokis. In a statement on Dec. 7, he called upon the people of Cyprus to " remain calm pending new developments."

The Archbishop disclosed that he had rejected a proposal by the Cyprus Government which, " although recognizing the right of self-determination for Cypriots," made its application " dependent on certain pre-requisites, and thus substantially unattainable." He reiterated that the Greek Cypriots were " determined not to accept any solution which does not secure in a positive manner the application of self-determination in the island."

In a further statement on Dec. 30, the Archbishop said that the solution of the Cyprus problem was " simply a question of time." He added : " As the people of Cyprus have taken the irrevocable decision to regain their freedom, and as the British Government have recognized the existence of a problem calling for a fair and honourable solution, I personally consider the question to be solved."

Sir John Harding and Archbishop Makarios met on Jan. 9 and Jan. 13 at the residence of the Anglican Archdeacon of Cyprus in Nicosia. No statement was issued except that the Governor and the Archbishop had discussed " the political and constitutional future of Cyprus." On Jan. 19 Sir John Harding flew to London for consultations with the Government, returning to Nicosia on Jan. 25 after having discussed the Cyprus question with Sir Anthony Eden and other Ministers, including Mr. Selwyn Lloyd, Mr. Lennox-Boyd, and Sir Walter Monckton, the Minister of Defence. On Jan. 27 he had a further meeting with Archbishop Makarios at which he presented new proposals by the British Government on the constitutional future of Cyprus. After these proposals (details of which were not made public) had been studied by the Ethnarchy Council, the Archbishop's reply was handed to Sir John Harding on Feb. 2. Further exchanges of correspondence between the Governor and the Archbishop took place during the next fortnight. Both before and after his visit to London, the Governor had received representatives of the Turkish community for exchanges of views on the constitutional problem.

Mr. Lennox-Boyd informed the House of Commons on Jan. 26 that the Government and Sir John Harding were " in complete agreement " on the next steps to be taken in Cyprus. He added that the Governor's talks with Archbishop Makarios had " not been concerned with the details of constitutional developments in Cyprus but with finding a general basis for co-operation in its development."

House of Commons Debate on Cyprus.

A statement on the British Government's attitude to the Cyprus problem was made by Mr. Harold Macmillan (then Foreign Secretary) on Dec. 5, when the Cyprus situation was debated by the House of Commons.

Mr. Macmillan stated that discussions had been going on in a number of ways since the end of the London conference on Cyprus in an effort to bridge the gap between the views of the Governments concerned [i.e. Great Britain, Greece, and Turkey]. He continued : " The only good settlement of the Cyprus problem is . . . one that commends itself as fair and honourable to all the Governments and peoples concerned It is that settlement we still hope to achieve. In this hope we shall no doubt have disappointments, but we are not prepared to accept defeat Meanwhile, we shall carry out our duty to ensure law and order. There will always be the critics abroad —and some, alas, at home—who will blame as guilty of reactionary, blimpish obstinacy any British Government which does not immediately accede to any demand made on it There are some people who seem to think this is merely a question of Britain being an ageing parent with an adolescent son. ' The boy is of age, give him his freedom and have done with it.' If that were all it was, it would be simple. . ."

Turning to the differences between the Greek and Turkish viewpoints, Mr Macmillan said that the Greek Government had appealed to the principle of self-determination, maintaining that the majority of the Cypriots were Greek and ought to have the eventual right of joining Greece. The principle of self-determination was a good one, which Britain as a nation had accepted in the U.N. Charter and had " honestly and honourably pursued over a wide area." The question in Cyprus, however, was not whether this principle should be recognized, but whether it should be applied without regard to other considerations.

The Turks, on the other hand, maintained that Britain had occupied Cyprus since 1878 " under a sort of tenancy," and with the duty of defending the whole area against possible Russian aggression. They argued that whilst Cyprus was 500 miles from Athens, it was only 40 miles from Turkey ; that the island might become " a pistol pointed at Turkey's heart " ; and that it should revert to Turkey if Britain abandoned her sovereignty over the island It would be a grave mistake to underestimate the strength of Turkish feeling on this matter—" a mistake which might well prove fatal to Greece, Turkey, and the NATO, as well as to ourselves and the peace of the world."

At the London conference (Mr Macmillan continued) the attitude of the three Governments to the question of self-determination for Cyprus could be summarized as follows Greece—" this year, or at any rate in a year or two " ; Turkey—" never ", Britain—" some time." As " dangerous and passionate feelings " were involved, he suggested that the three Governments should for the moment postpone their final decision on the island's future and co-operate in attempting to bring about self-government. When there were elected representatives of the Cypriot people who could join the discussions, the Governments could " sit down again to see whether they could settle by agreement the future status of the island."

" We are still hopeful," Mr. Macmillan declared, " that as the practical character of our plan begins to be understood, and the generosity and sincerity of what we are trying to do becomes known, the basis for an honourable settlement may be found. . . . Why cannot we all agree to work together for self-government, while refraining at this anxious moment in world history from too precise a definition of every word and phrase in our different approaches to the problem of the final status of the island ? "

After making this appeal to the Greek and Turkish Governments, as well as to the people of Cyprus, Mr. Macmillan pointed out that, in addition to the national opinions involved, there were "sinister forces at work who are opposed to any settlement and who are trying to make everything worse and not better." He added. "These are the forces which are using all the methods of terrorism to make sure the moderates do not get support and that the extremists win the day. By a strange paradox, the Communist agitators have taken advantage of a liberty of speech and action which would not be allowed them had Cyprus been part of Greece. I cannot believe that the Archbishop looks without misgivings on this strange and unholy alliance. A great responsibility lies on him. I trust and believe he will rise to it."

The Foreign Secretary concluded "It would be easy to win sympathy, and even the support of unthinking people, if we were to make a gesture of abdication in conformity to a vague feeling of sentiment But I must warn the House that if we did so the consequences would be grave and even disastrous We would be abdicating our duty, not only to ourselves, but to the Greek and Turkish peoples. We would be bringing about, not peace in the Eastern Mediterranean, but bitter war and strife. We would be failing in our obligations to all other peoples who depend on us as one of the main buttresses in the defence of freedom and democracy, both in NATO and the Middle East. We would be, in this sense, abandoning our task instead of doing it as we intend to do"

Mr. James Griffiths (formerly Colonial Secretary in the Labour Government) said that the Government's handling of the Cyprus question "left much to be desired and much to be condemned." It was still not clear whether the Government accepted and recognized the principle of self-determination for Cyprus, and he himself did not believe that a settlement was possible unless that principle was accepted. If self-determination was agreed to, a Constitution could be worked out containing full safeguards for the rights of minorities He urged that "everything is to be gained and nothing lost" by setting a definite date—for example, five years—for the introduction of self-government Whilst he did not ignore the fact that there were strategic considerations in the area—a fact that had been recognized both by the Greek Government and by Archbishop Makarios—he felt that from every standpoint it was better to have in Cyprus "a people who are working with us rather than a people hostile and bitter." Mr Griffiths added that he would like to see Sir John Harding and Archbishop Makarios issue a joint appeal to the people of Cyprus urging them to refrain from all forms of violence and to preserve law and order.

Greek Support for "Enosis." - British Protests at Athens Broadcasts to Cyprus.

The British Government's proposals for a settlement in Cyprus, presented at the London tripartite conference, were rejected by the Greek Government on Sept. 15, 1955, when a Note to this effect was handed to the British Ambassador in Athens, Sir Charles Peake. Diplomatic contacts between the British and Greek Governments nevertheless continued during succeeding weeks, and on Dec. 5 the Greek Government announced that it would not take the Cyprus question to the 10th session of the U.N. General Assembly (then in session) since such action would "not be in the interest of the Cypriot cause" at the present moment. [The General Assembly had earlier rejected a Greek proposal that it should debate the Cyprus situation—see page 14465, second column.] A senior official of the Greek Foreign Office visited Nicosia at the end of December for discussions with Sir John Harding and Archbishop Makarios.

Violent anti-British and pro-*enosis* demonstrations, principally by students, occurred in Athens, Salonika, and other Greek cities on various occasions during November and December, leading to clashes between the police and demonstrators. Students of the University of Athens and at high schools went on strike on Nov. 22 to urge intervention by the Greek Government on behalf of Savva Karaoulis, who had been sentenced to death after having been found guilty of the murder of a Cypriot policeman in Famagusta on Oct. 5 (see page 14514, end of first column) A Greek petition for the reprieve of Karaoulis, bearing over 1,600,000 signatures, was subsequently forwarded to the United Nations.

The premises of the British Council building in Athens were damaged on Dec. 16 by a time-bomb. Several suspects were detained by the police for questioning.

A strong British protest was presented in Athens on Jan. 16 by Sir Charles Peake, the Ambassador, following a broadcast by Athens radio in which it was alleged that the Turkish police sergeant killed at Paphos on Jan. 11 (see above) had been murdered by "British stooges" with the aim of inciting the Turkish community against the Greek Cypriots. A British Foreign office spokesman said that "this monstrous allegation is the latest and most grotesque example of the campaign of calumny about the Cyprus situation which has been consistently conducted by Athens radio." A Greek Note claiming that Athens radio was an "autonomous" organization, and that the Greek Government had no control over its broadcasts, was rejected by the British Embassy on Jan. 27 as "unsatisfactory and evasive."

The British Foreign Office published extracts on Jan 20 from monitored Athens broadcasts to Cyprus, covering the period from July 1955 to January 1956, in which, *inter alia*, the Cypriots had been exhorted to "talk [to the British] in the language of fighters"; to "disarm their opponents and seize their weapons", to "buy their liberty with their blood instead of receiving it as a favour"; and to "sweep away the constables of the Queen of England" Other Athens broadcasts described the terrorist Mouskos as a "hero"

A British spokesman in Cyprus denounced Athens radio on the same day (Jan 20) for perverting the minds of children by broadcasts which glorified Eoka terrorists who shot helpless women in hospital and killed men by shooting them in the back A direct responsibility fell upon Athens radio for encouraging Cypriot children to make "heroes" of murderers, and for playing on the worst emotions of children at the most emotionally unstable period of their lives

Mr. Lennox-Boyd informed the House of Commons on Jan. 30 that the British Government were "prepared" to jam broadcasts from Athens radio, if they considered it necessary, although it was hoped that such action would not be needed.

Asked by **Mr. Patrick Wall** (C.) what action the Government proposed to take "to prevent the spread of false and seditious anti-British propaganda" by Athens radio, **Mr. Lennox-Boyd** replied. "I have no statement to make at present; but I must make it plain that H.M. Government reserve the right to take any countermeasures which they may consider necessary and justified to preserve Cypriot and British lives from outrages directly provoked by these broadcasts, which contain incitements without precedent between allies and for which it would be difficult to find a parallel in the history of broadcasting"

Asked further by **Mr. Wall** whether he would consider the jamming of Athens broadcasts as a last resort, in view of their "incitement to murder British troops," **Mr. Lennox-Boyd** agreed about the "dreadful effect" of such broadcasts. After pointing out that 15 British servicemen and seven policemen had already been killed in Cyprus, he added: "I can only say that a decision has been taken to prepare to take any measures we may consider necessary, including jamming. But of course we hope that discussions now going on in Cyprus may lead to the end of the broadcasts and, consequently, of the need to take such measures"

Turkish Attitude to Cyprus Question.

A four-point statement on the Turkish Government's attitude to the Cyprus problem was issued on Jan. 25 by the Foreign Minister, Professor Koprulü, as follows:

(1) "Our Government is actively concerned with the progress of the Cyprus issue and is maintaining close contact with the British Government on the subject."

(2) Whilst Turkey accepted the principle of self-determination as an international principle, she was "of the opinion that this principle cannot be admissible in every part of the world, and especially in Cyprus."

(3) "We are of the opinion that the elimination of terrorism in Cyprus, the restoration of law and order, and the removal of animosities between the different communities are pre-requisites for the adoption of self-government in Cyprus. Even if these are achieved, the Turkish community must participate in the island's administration and government, enjoying equal rights with the other communities. Only in this way would it be possible to prevent oppression of the Turks and their reduction to an inferior position. Our Government has conveyed these views to the British Government"

(4) After declaring that Archbishop Makarios "cannot have the right to assume the position of representing the people of Cyprus," Professor Köprülü noted that Sir John Harding had had discussions with representatives of the Turkish community as well as with the Archbishop, and expressed the hope that "such contacts will continue as the situation requires"

American Appeal to Greece and Turkey.

Mr. Dulles, the U.S. Secretary of State, sent letters on Sept. 18, 1955, to the Prime Ministers of Greece (then Field-Marshal Papagos) and Turkey (M. Menderes) expressing "deep concern" at the developments which had adversely affected Greco-Turkish friendship "at a time when these two allies are in great need of mutual understanding." Despite the differences between the two countries on the Cyprus question, and the tension caused by the anti-Greek riots in Istanbul and Izmir (see 14424 A), he urged the two countries not to let these "unhappy events" destroy their partnership in the free world. "Regardless of the causes of this disagreement," said Mr. Dulles, "I believe that the unity of the North Atlantic community, which is the basis of our common security, must be restored without delay."

The U.S. Government requested Greece on Sept. 21 to agree to a postponement of the Cyprus debate in the U.N. General Assembly in order to ease the Greco-Turkish tension caused by the Cyprus dispute. As stated above, the Greek Government subsequently agreed not to press for a U.N. debate on Cyprus.—(Times - Daily Telegraph - Manchester Guardian - New York Times - Turkish Embassy Press Bulletin, London)

A. UNITED KINGDOM. — Gainsborough, Hereford, and Taunton By-elections.

By-elections were held on Feb. 14 at Hereford, Gainsborough (Lincolnshire), and Taunton (Somerset), the Government retaining the three seats with reduced majorities.

Gainsborough. The by-election was caused by the conferment of a peerage on Mr. Harry Crookshank (now Viscount Crookshank), formerly Lord Privy Seal and Leader of the House of Commons. Result:

Kimball, Marcus (Conservative)	12,836
Walston, Harry (Labour)	11,830
Spence, Major Ivan (Liberal)	6,806
No change Conservative majority	1,006

Figures at the general election were H F. C Crookshank (C) 21,576, G. R S. Hawkins (Lab.) 17,107—Conservative majority, 4,469.

The Conservative candidate received 40 8 per cent of the votes in the by-election, the Labour candidate 37 6 per cent, and the Liberal candidate 21 6 per cent At the general election (when the seat was not contested by the Liberals) the Conservatives obtained 55.8 per cent of the votes and Labour 44 2 per cent

61 7 per cent of the voters went to the poll, compared with 76.7 per cent at the general election. The electorate numbered 50,806.

Mr Kimball (27) is a farmer and a member of Rutland County Council. He unsuccessfully contested South Derby at the general election

Hereford. The by-election was caused by the conferment of a peerage on Mr J P L Thomas (now Viscount Cilcennin), formerly First Lord of the Admiralty. Result.

Gibson-Watt, David (Conservative)	12,129
Owen, Frank (Liberal)	9,979
Stanley, Bryan (Labour)	5,277
No change. Conservative majority	2,150

Figures at the general election were. J. P L. Thomas (C.) 18,058, F. Owen (L.) 8,658, Mrs. E. L P. Seers (Lab.) 8,154—Conservative majority, 9,400

The Conservative candidate received 44.3 per cent of the votes in the by-election, the Liberal candidate 36.4 per cent, and the Labour candidate 19 3 per cent, compared with respective percentages of 51 8, 24.8, and 23.4 at the general election The Liberal proportion of the vote thus increased by 11.6 per cent, whilst the Conservative proportion fell by 7 5 per cent and the Labour proportion by 4.1 per cent.

61.5 per cent of the voters went to the poll, compared with 78.8 per cent at the general election. The electorate numbered 44,529.

Mr. Gibson-Watt (37) is a farmer and a member of Radnorshire County Council.

Taunton. The by-election was caused by the conferment of a peerage on Mr. Henry Hopkinson (now Lord Colyton), formerly Minister of State for Colonial Affairs. Result.

du Cann, Edward (Conservative)	19,820
Pestell, Reginald (Labour)	19,163
No change Conservative majority	657

Figures at the general election were H L. d'A Hopkinson (C.) 22,962, R. Pestell (Lab.) 17,420, Brigadier G Barrington (L.) 3,684 —Conservative majority, 5,542

The Conservative candidate received 50 8 per cent of the votes in the by-election and the Labour candidate 49 2 per cent At the general election (when there was a Liberal candidate) the Conservatives obtained 52 1 per cent of the total votes, Labour 39.5 per cent, and the Liberals 8.4 per cent.

75 per cent of the voters went to the poll, compared with 85.5 per cent at the general election The electorate numbered 51,978.

Mr. du Cann (31), secretary to a group of investment companies, opposed Mr Attlee at West Walthamstow in 1951, and unsuccessfully contested Barrow-in-Furness at the last general election.

Taking the three by-elections together, and comparing them with the polling in the same constituencies at the general election, the Conservatives polled 45.8 per cent of the votes cast (a decline of 7.4 per cent), Labour polled 37 per cent (an increase of 0.7 per cent), and the Liberals polled 17.2 per cent (an increase of 6.7 per cent).—(Times - Daily Telegraph)

(Prev. rep. By-elections, 14687 A.)

B. EGYPT. — Soviet Aid in Atomic Research.

It was announced in Moscow on Feb. 10 that the Soviet Government would assist in the establishment of a nuclear laboratory in Cairo "for work concerned with the peaceful utilization of atomic energy"; that Soviet specialists would advise on the planning and construction of the laboratory; that Egyptian specialists would receive training in the Soviet Union; and that the U.S.S.R. would also supply Egypt with "equipment and instruments for carrying out geological research." It was stated that this agreement had been concluded after the visit of an Egyptian scientific mission to Moscow.

(Times - Manchester Guardian) **(Prev. rep. 14486 B.)**

C. NORWAY. — Arrest of 16 Soviet Fishing Vessels for Infringement of Norwegian Territorial Waters. - Soviet Admission of Liability.

Four Soviet herring drifters alleged to have been fishing in Norwegian territorial waters were arrested by Norwegian naval craft on Jan. 30 and taken into the harbour of Aalesund. A further eight vessels, together with the depot ship *Tambov*, were arrested on Jan. 31, the total number of Soviet ships detained at Aalesund reaching sixteen by February 2.

The Norwegian Government, in a Note to the Soviet Government on Feb 1, protested against the alleged violation of Norwegian territorial waters, which Hr. Lange (the Norwegian Foreign Minister) described as "more comprehensive than any violation of the fisheries frontier we have ever seen on any part of our coast." He explained that although in previous years Soviet vessels (except for one instance in 1954) had been careful to keep outside the Norwegian territorial limit, the captured drifters formed part of a large Soviet herring fleet which "in many cases had been fishing well inside the border line"

The Soviet Ministry of Fisheries, in a statement broadcast on Feb. 1, pointed out that the masters of all Soviet fishing vessels had "strict instructions not to violate the limits of the Norwegian fishing area," and said that the masters of the detained vessels had claimed that at the time of arrest their vessels were outside Norwegian territorial waters. The statement added "In sea fishing practice, however, there have been cases when the fixing of the precise location of ships has proved difficult owing to weather conditions. . . The U.S.S.R. Ministry of the Fishing Industry regards the detention of the ships as a misunderstanding, and expects speedy consideration by the Norwegian authorities of this question and the release of the vessels."

The Norwegian Foreign Ministry stated on the same day, however, that legal proceedings had been instituted, and that the question of whether the Soviet vessels had or had not been fishing in Norwegian waters would be determined by the law courts in accordance with usual Norwegian practice.

The official Soviet reply to the Norwegian Note, received in Oslo on Feb. 4, admitted an infringement of Norwegian territorial waters, but stressed that this had been "unintentional" and that the incident was "a regrettable misunderstanding."

On Feb. 6 it was announced that the masters of the detained fishing vessels had agreed to pay a total of 629,500 kr. (£31,475) in fines and compensation imposed by the Norwegian courts, and that payment had been guaranteed by the Soviet Embassy in Oslo. The vessels left Aalesund on February 7.

(Royal Norwegian Embassy, London - Aftenposten, Oslo)

D. CANADA. — Defence. - Full Strength reached by Royal Canadian Air Force.

In a review of its activities during 1955, issued on Dec. 28, the Royal Canadian Air Force announced that it had reached its planned strength of 41 squadrons during the year.

The R.C.A.F. disclosed that it had 12 *Sabre* jet fighter squadrons in Europe, nine jet-fighter interceptor squadrons for home defence, four transport squadrons, three maritime reconnaissance squadrons, one photographic squadron, and 12 reserve squadrons. It was also stated that the consolidation of the Canadian Air Division in Europe had now been completed with the movement of No. 1 Fighter Wing, R.C.A.F, from Britain to France The personnel strength of the R.C.A.F. passed 50,000 during the year, making it the largest of the three Canadian Services.

It was also disclosed that the transport tasks handled during the year included the large-scale movement by helicopters of equipment for the mid-Canada radar warning line along the 55th parallel. As regards equipment, it was stated that U S.-built *Neptune* medium bombers had replaced *Lancasters* on maritime reconnaissance, that Mark VI *Sabre* jets had continued to replace earlier marks of that fighter, and that a new version of the Bristol *Britannia* was being manufactured at Montreal for the Air Transport Command.

Greece became the tenth NATO country to send aircrews to Canada for training under the scheme introduced in 1950 as part of the Canadian contribution to NATO. Since the introduction of the scheme some 3,500 NATO aircrews from Britain, the Netherlands, France, Norway, Belgium, Portugal, Turkey, Italy, and Denmark have been trained by the R.C.A.F.

(Montreal Star) **(Prev. rep. 14365 A; 11842 A; 11295 A.)**

E. TURKEY. — Population Census.

Preliminary figures of a population census taken in October, 1955, were issued in January. They showed the population of Turkey as 24,111,778, compared with 20,936,524 in 1950, the population of the six largest cities being as follows (1950 figures in parentheses): Istanbul 1,214,616 (983,041), Ankara 453,151 (288,536), Izmir (Smyrna) 286,310 (227,578), Adana 172,465 (117,642), Bursa 131,336 (103,812), Eskisehir 122,755 (89,879). There were 17 cities with 50,000 to 100,000 inhabitants.

A. UNITED KINGDOM. — Motor Industry. - Record Production and Exports in 1955. - Control of Singer Motors acquired by Rootes Group.

The Society of Motor Manufacturers and Traders announced on Jan. 20 that the British motor industry had produced a record total of 1,236,146 vehicles in 1955, or about 18.99 per cent more than the previous record of 1,036,956 produced in 1954.

The 1955 total comprised 897,562 cars, 329,851 goods vehicles, and 8,733 buses and coaches (compared with 769,165 cars, 260,633 goods vehicles, and 7,158 buses and coaches in 1954), all the 1955 figures being records, and production of cars having doubled since 1952.

Car exports rose by only 2 per cent, but exports of goods vehicles rose by 14.1 per cent to a new peak of 122,668, and exports of buses and coaches by 75.8 per cent to 4,936. The total value of the industry's exports in 1955 (including vehicles, spares, accessories, etc.) rose by £47,000,000 to the new record of £387,000,000, of which cars accounted for £122,500,000, commercial vehicles for £87,100,000, tractors for £48,400,000, and spares and accessories for about £129,000,000. The Society explained that a serious fall during the year in exports to Sweden (from £12,700,000 to £6,100,000) and also to the U.S.A., had been offset by higher exports to Australia and South Africa, whilst Finland had trebled her imports of British commercial vehicles and tractors. The announcement added: "Although the final figures for 1955 from the industry's rivals have not yet been received, it is already clear that the British motor industry retains its lead as the world's largest exporter of cars and of cars and commercial vehicles combined."

Mr. Stanley Clark, the Society's chief executive, commenting on the 1955 production figures, said that motor manufacturers were aiming at still higher output and exports in 1956, and that the effect of the industry's expansion scheme—which had cost "well over £100,000,000 for factories in Britain alone"—had "still hardly begun to be felt." He added, however, that in some export markets, particularly in Europe, "all-out competition is now the battle cry," whilst home sales were "bedevilled by the credit squeeze and purchase tax" and rising costs were "a deadly menace to all the industry's plans."

Recent developments in the British motor industry are summarized below:

Output of British Motor Corporation in 1955. Sir Leonard Lord, chairman of the British Motor Corporation, announced on Dec. 30 that during 1955 the Corporation had exported nearly 200,000 vehicles (worth about £75,000,000), or more than any other motor-vehicle manufacturers in the world. Total output for the year had been 468,943 vehicles, an increase of 26.7 per cent over 1954, and equal to nearly four vehicles per minute of every working day. Sir Leonard added: "No other motor manufacturer outside America has ever achieved this output, and even in America it has been exceeded by only three of the great corporations."

Production Cuts and Short-time Working. Most of the 18,000 workers at the Longbridge (Birmingham) works of the Austin Motor Company—one of the component companies of the British Motor Corporation—were placed on a four-day working week from Jan 9 owing to the fact that production of Austin vehicles had overtaken demand and large stocks were accumulating. On the same day a small number of workers at the Humber works (Rootes group) at Ryton-on-Dunsmore, near Coventry, were also placed on a four-day week, and it was announced that the Standard Motor Company (also of Coventry) had cut production of smaller cars by 10 per cent, but had been able to avoid short-time owing to increased demand for their larger cars, particularly in export markets. An Austin spokesman had previously described the cut as "'a temporary phase which merely reflects current market conditions," adding: "Indications are that normal working should be resumed in the course of the next few weeks"

Control of Singer Company acquired by Rootes Group. It was announced on Dec. 29 that the stockholders of Singer Motors Ltd had accepted an offer by Rootes Motors Ltd. to acquire the control of the Singer company. It was explained in the Press that Singers had incurred serious losses in recent years, amounting in 1953-54 to £79,000 and in 1954-55 to £140,000. Sir William Rootes, chairman of the Rootes Group, stated on Dec. 29 that whilst it was too soon to outline future plans, the company would continue to produce Singer cars. Meanwhile the present Singer board would remain in office, but would be expanded to include representatives of Rootes, whilst Singer employees would be retained as far as possible.

The Austin Motor Company announced on Jan. 21 that, as a result of the work of a research team which had been trying to solve the problem of producing an economical gas-turbine engine since 1949, "the construction of a gas-turbine power unit suitable for modern production methods and road conditions is now a possibility." The statement added that the problem of producing a cheap heat-exchanger of light construction had still to be solved, but that when this had been done, and improvements achieved in compressor and turbine efficiencies, fuel economies might be expected "comparable to those of diesel engines."—(Times - Daily Telegraph - Manchester Guardian - Financial Times) **(Prev. rep. 1954 Production, 14037 B; Gas Turbine Car, 10598 A.)**

B. TRINIDAD. — Constitutional Reforms.

Proposals for constitutional changes in Trinidad and Tobago, based on recommendations contained in the majority report of a committee on constitutional reform which had been appointed by the Governor (Sir Edward Beetham) in 1955, were announced on February 11.

The principal changes included (1) the creation of the post of Chief Minister, who would be elected by the Legislative Council and would be the leader of the Government in both the Legislative and Executive Councils; (2) the replacement of the Financial Secretary by an elected Minister of Finance, (3) the removal of the nominated member from the Executive Council and the addition of one other elected member, increasing the number of elected members on the Executive Council to eight. (4) the replacement in the Legislature of a nominated Speaker by an elected one, and the creation of an elected Leader of the House in the person of the Chief Minister, (5) an increase in the number of elected members of the Legislature from 18 to 24.

Mr. Lennox-Boyd, the Colonial Secretary, informed the Governor on the same day that he had been "impressed by the thoughtful and reasonable nature of most of the views put forward." He said that he was prepared to recommend the proposals, with certain minor amendments, for approval by H.M. the Queen.—(Times - Manchester Guardian) **(Prev. rep. 12758 A; 9856 D.)**

C. NORTHERN IRELAND. — Select Committee Findings on Ineligibility of Members of Parliament.

The N.I. Senate and House of Representatives adopted on Feb. 8 the reports of the Select Committees of both Houses which had been inquiring into the position of Sir Norman Stronge, Sir William McCleery, Dr. Eileen Hickey, and Senator H. S. C. Richardson. The Select Committees found that the four members were ineligible to sit in the N.I. Parliament because they had technically held "offices of profit" under the Crown, and that their elections were therefore invalid. It was stressed that all four members had acted in good faith and without knowledge of the legal complexities involved, and that they had never received any remuneration in respect of their "offices of profit." The committees recommended that representations should be made to the Imperial Parliament to indemnify the members and validate their elections.
(Belfast Telegraph - Northern Whig) **(Prev. rep. 14661 B.)**

D. SOUTHERN RHODESIA.—Cabinet Changes.

A reorganization of the Southern Rhodesian Cabinet was announced on Jan. 31 following the resignation of Mr. George Davenport, the Minister of Mines, Lands, and Surveys. The changes were as follows: (*a*) Mr. Garfield Todd, the Prime Minister and Minister of Labour, also became responsible for Native Education, which was detached from the Native Affairs portfolio; (*b*) Mr. P. B. Fletcher became Minister of Lands in addition to remaining Minister of Native Affairs; (*c*) Mr. C. J. Hatty, the Minister of the Treasury, took over in addition the Ministry of Mines; (*d*) Mr. G. Ellman-Brown became Minister of Surveys, whilst retaining the portfolios of Roads and Road Traffic, Irrigation, and Housing. Mr. Stumbles remained Minister of Justice and Internal Affairs. The reorganization reduced the membership of the Cabinet from six Ministers to five.—(Federal Information Department, Salisbury) **(Prev. rep. 14549 C.)**

E. INDIA. — Cabinet. - Mr. Krishna Menon appointed Minister without Portfolio.

It was announced in Delhi on Feb. 3 that Mr. V. K. Krishna Menon had been appointed a Cabinet Minister, and that Mr. Rajbahadur (Deputy Communications Minister) and Mr. B. N. Datar (Deputy Home Minister) had been appointed full Ministers. It was subsequently announced that Mr. Menon would become Minister without portfolio, the Indian Press stating that he would assist Mr. Nehru in the conduct of foreign affairs. Mr. Menon (59) had led the Indian delegation at the U.N. during the past few years, and had played a prominent part in the U.N. General Assembly's sessions.
(The Hindu, Madras - The Statesman, Calcutta)
(Prev. rep. Cabinet, 14370 C.)

F. UNITED NATIONS. - Security Council Recommendation for Sudanese Membership of U.N.

The Security Council, meeting on Feb. 6, unanimously approved a resolution—submitted jointly by France, Britain, and the U.S.A.—for the Sudan's admission as the 77th member of the United Nations. The recommendation will be considered by the General Assembly at its 11th session.
(U.N. Information Centre, London) **(Prev. rep. Sudan, 14624 B; U.N. Membership, 14637 A.)**

A. UNITED KINGDOM. — The Burgess-Maclean Case. - Moscow Press Statement by Missing Diplomats.

The two former British diplomats, Guy Burgess and Donald Maclean, who had left England in May 1951 and whose whereabouts had since been unknown, reappeared in Moscow on Feb. 11, when they summoned two British and two Soviet correspondents to a press conference at a Moscow hotel and handed them a prepared statement giving the reasons for their flight.

The statement, which was handed to the Reuters and *Sunday Times* correspondents in Moscow and to two representatives of the Tass agency, denied that either Burgess or Maclean had ever been Soviet agents and declared that their aim had been to achieve a "better understanding" between Russia and the West—an aim which, they alleged, neither Britain nor the United States had been seriously working for at the time. The two men admitted that they were living in Moscow, Maclean with his wife and children, but refused to elaborate further on their statement or to answer questions. The text of their statement was as follows:

". . It seems to us that doubts as to our whereabouts and speculation about our past actions may be a small but contributory factor that has been and may again be exploited by the opponents of Anglo-Soviet understanding. Accordingly we have thought it best to issue the following statement:

We both of us came to the Soviet Union to work for the aim of better understanding between the Soviet Union and the West, having both of us become convinced from official knowledge in our possession that neither the British nor, still more, the American Government, was at that time seriously working for this aim. We had, in the positions we occupied, every reason to believe that such an understanding was essential if peace was to be safe We had every reason to conclude that such an understanding was the aim of Soviet policy We had had every opportunity to know and grounds for fearing the plans and outlook of the few but powerful people who opposed this understanding

At Cambridge we had both been Communists We abandoned our political activities not because we in any way disagreed with the Marxist analysis of the situation in which we still both find ourselves, but because we thought—wrongly, it is now clear to us—that in the public service we could do more to put these ideas into practical effect than elsewhere It was probably our action in necessarily giving up political activities by entering the public service that, falsely analysed, led the Foreign Office to say it 'believed' we had been Soviet agents at Cambridge. The Foreign Office can of course 'believe' anything it wishes. The important point however, is that on this question we know, and it does not. We neither of us have ever been Communist agents. So far the ground was common for us both. Details of our subsequent careers were completely different. .

As regards Maclean, he worked in London and in Paris, Washington, and Cairo as a regular member of the Foreign Service from 1935 to 1951 and as such was part of the machine which, with the exception of the war period, carried out a policy unacceptable not only to him but to many others. He was by no means alone inside the Foreign Service in objecting to British foreign policy before the war, particularly as regards Abyssinia, the Spanish civil war, and Munich. But he was increasingly isolated in doing so after the war. It became more and more difficult to find anyone willing to think or speak of anything but the 'menace of Communism' or to understand the folly and danger of American policy in the Far East and Europe.

Further work in the Foreign Service was becoming impossible. In May, 1951, there were clear signs that whatever future course he might work out for himself, the Foreign Office and security authorities had plans of their own. His telephones in his office and private house were used as microphones. Plain-clothes policemen followed him wherever he went, and one of his colleagues was put up to act as provocateur. Maclean therefore decided to come to the Soviet Union to do whatever he could to further understanding between East and West from there The difficulty of leaving the country while being tailed by the police was solved by a meeting with Burgess shortly after the latter's return from the Washington Embassy to London. The latter not only agreed to make arrangements for the journey but to come too The risks of such a journey would have been too great for Mrs. Maclean, who was shortly expecting a child. She and the children came to the Soviet Union in 1953.

As regards Burgess, when he decided to leave Cambridge he joined the B.B C. Subsequently, positions were offered to him which he accepted, first in a department of the secret service and secondly in the Foreign Office Throughout, he sympathized with Soviet policy and became increasingly alarmed by the post-war trend of Anglo-American policy. Most alarming of all was its failure first to reach, and later even to seek to reach, a *modus vivendi* between East and West Neither in the B B.C. nor in the Foreign Office, nor during the period that he was associated with the secret service and also M.I 5 itself, did he make any secret from his friends or colleagues either of his views or the fact that he had been a Communist His attitude in these positions was completely incompatible with the allegation that he was a Soviet agent.

This statement of Burgess's position is necessary to understand the situation which arose a week or so after his return to London from Washington in 1951 He went to see Maclean as head of the American Department of the Foreign Office. They found that their information and opinion about the political situation and the danger of war were in agreement.

What now happened was determined by the following facts. Burgess, who some months previously had himself initiated arrangements to obtain a new job with a view to leaving the Foreign Office, was faced with the fact that the Foreign Office had independently and subsequently decided that they would no longer employ him. It is, of course, obvious that no agent would take the initiative in arranging to leave the Foreign Office However, when the break came, Burgess was doubtful whether he wanted or could conscientiously do the new job he had been arranging Therefore, when Maclean told Burgess that he himself had decided that he could no longer work for the Foreign Office and its policies, and suggested that they should both go to the U.S.S.R., Burgess had no difficulty in agreeing. There alone there appeared to both to be some chance of putting into practice in some form the convictions they had always held. As a result of living in the U S.S.R., we, both of us, are convinced that we were right in doing what we did. . . ."

The Foreign Secretary, Mr. Selwyn Lloyd, made a statement in the House of Commons on Feb. 13 on the reappearance of Burgess and Maclean, in which he said that if the aim of the Soviet authorities in producing the two men had been to drive a wedge between Great Britain and the U.S.A. after the close accord reached at the Washington talks (see 14685 A), they would not succeed.

Replying to a question by **Mr. Herbert Morrison** (Lab), Foreign Secretary at the time of the disappearance of the two men, **Mr. Selwyn Lloyd** said: "I have certain comments to make on the appearance of these two men and their press conference First, it brings out into clear relief the consistent lack of candour of the Soviet authorities in their statements about these men. In addition to what had appeared in the Soviet Press suggesting that the whole story was Western anti-Soviet propaganda, in October of last year Mr. Macmillan asked Mr. Molotov in Geneva for information about them Mr. Molotov said that he was quite unable to provide any. As recently as Jan. 12, when Mr. Harold Wilson [the Labour M.P.] saw Mr. Khrushchov, he put the question. Mr. Khrushchov was reported to have replied: 'Are they in our country then? I have not heard anything of them from any Soviet officials, nor have I ever met them, so it stands to reason I cannot know what they are doing.' The House must form its own opinion about the veracity of those statements in view of this latest development. This kind of conduct shows how difficult it is to establish the relations of mutual trust which the Soviet Union professes so much to desire.

"The second comment I have to make is on the contents of the statement itself. The House will have noted that it is designed to be used for propaganda purposes, and that the two men were not permitted to answer any questions. In fact, no credence can be placed in their word. There is nothing in the statement which causes me to modify that view.

"My third comment is that there has been a certain amount of speculation about the reasons which have led the Soviet Government to change their ground and to announce, through this interview, the presence of these men in Moscow. One view is that it was to forestall awkward questions during the visit of the Soviet leaders to this country. That may be so. Another view is that, after the visit of the Prime Minister and myself to Washington, and the close accord we reached with the U.S. Government on so many matters, the Soviet authorities wished to create distrust and to drive a wedge. If this is the explanation, they will not succeed."

Mr. Morrison asked three further questions: Had there been anything to prevent Burgess and Maclean resigning from the Foreign Service and continuing propaganda in Britain on the lines of their opinions? Was it not the case that during and since the war the British Government had sought to improve friendly relations with the Soviet Union in the cause of peace? Was there any evidence that the two men had been agents acting on behalf of a foreign Power or the Communist Party?

Mr. Selwyn Lloyd replied. "There is nothing to prevent anyone in the Foreign Service from resigning and conducting such propaganda in this country. In my view all Governments since the war have sought most genuinely to improve relations with the Soviet Union. As to whether there is evidence that these men were Soviet agents: as was stated in the White Paper, suspicions of the person responsible for a known leakage of information to the Soviet authorities was narrowed down to Maclean before he departed. This was confirmed by his departure, and subsequently by what Mr. Petrov had said. With regard to Burgess, no suspicion attached to him before his departure, but strong suspicion fell on him when he departed, and that has also been confirmed by what Petrov has said."

Sir James Hutchison (C.) expressed disquiet at the fact that two men who had confessed to having been members of the Communist Party at Cambridge should subsequently have been employed in the Foreign Service, and that one should have been employed in the B.B C. and the secret service. He asked whether the steps taken as a result of the Privy Council examination would stop a repetition of the possibility, if it were true. **Mr. Selwyn Lloyd** said that he did not accept what had been said about the two men, and that, as far as Burgess was concerned, this had been explained in the White Paper. As regards the future employment of such men in the Foreign Service, he thought—as indicated in the earlier House of Commons debate—that adequate steps had been taken. In reply to a further question, the Foreign Secretary said that he did not believe that Burgess claimed exactly to have served in the secret service and M I.5, but that he had been employed in a department which on the outbreak of war dealt with propaganda to neutral countries—an organization which later came to be known as S.O.E.

Sir Anthony Eden was asked by **Mr. Morrison** whether he intended to make a statement about the conference of Privy Councillors' report on the security service In reply, the Prime Minister said that he had studied the report carefully and that the Government were considering what steps could be taken to give effect to it He hoped to be able to make a statement on it in due course, but would not be able to make its terms public

Mr. Vladimir Petrov—the former Soviet Embassy official in Canberra, who had alleged in a newspaper article in 1955 that Burgess and Maclean were "long-term Soviet agents" (see 14457 A)—expressed the view on Feb. 12 that the joint statement by the two men had been made under the direction of the Soviet authorities and was "a Soviet propaganda move against the Western Governments."

Mr. Petrov repeated his allegation that Burgess and Maclean were Communist agents, and added: "If, as alleged in the statement, Burgess and Maclean had gone over to the Soviets with a view to achieving peace between the Soviet Union and the British and U.S. Governments, why did not the Soviet authorities reveal the whereabouts of Burgess and Maclean and state their alleged reasons for deserting their posts in England when such publicity was given to the matter in the first place outside the Soviet Union?"

A spokesman of the British Foreign Office denied the assertion in the joint statement that Burgess had been "associated with the Secret Service and also M.I.5. itself." He said that Burgess had never been a member of the M.I.5. organization and that the only connexion he had had with it was that, when working for the B.B.C., he had from time to time reported to M.I.5. information about Germany received by him from a contact.—(Times - Daily Telegraph - Manchester Guardian - Observer - Sunday Times) **(Prev. rep. 14571 A.)**

A. SCOTLAND. — Transport Council.

The Minister of Transport and Civil Aviation (Mr. Harold Watkinson) informed the House of Common on Feb. 7 that he had appointed a Scottish Transport Council.

The Council's terms of reference are: "To examine questions of common interest to the transport undertakings which are nationalized, controlled by a nationalized undertaking, or State-aided, for the purpose of assisting the persons carrying on those undertakings in the consideration of plans for developing an efficient and coordinated system of public transport in Scotland, and to consult, as necessary, with other transport interests."

The membership of the council is. Mr. C. J D Shaw, Q.C. (Sheriff of Ayr), chairman; Mr. William Hughes (Lord Provost of Dundee) and Mr. T. G. Robinson, independent members; Sir Ian Bolton, representing the British Transport Commission, Sir Patrick Dollan, representing British European Airways; Mr. Ian Napier, representing D. MacBrayne, Ltd.; Mr. Robert Taylor, representing the Scottish Advisory Council for Civil Aviation; and Sir John Erskine, representing the Transport Users' Consultative Committee for Scotland.

The decision was taken after consultation with the Secretary of State for Scotland.—(The Scotsman, Edinburgh) **(14607 C.)**

B. TURKEY. — Parliamentary Investigation into Activities of Former Ministers.

The Turkish National Assembly decided on Jan. 11 to open a parliamentary inquiry into the activities of three members of the former Menderes Cabinet (M. Zorlu, M. Yircali, and M. Polatkan) on charges of irregularities in the granting of import permits. The inquiry had been demanded by the parliamentary group of the Democratic Party in connexion with alleged irregularities in the issuing of import licences and foreign exchange permits by the committee of which the three Ministers had been members.

The setting-up of a parliamentary committee to examine charges against M. Mukarek Sarol, Minister of State in charge of press affairs in the former Menderes Cabinet, was also ordered by the Turkish National Assembly on February 8.
(Times - Le Monde, Paris) **(Prev. rep. 14624 A.)**

C. UNITED KINGDOM. — Extent of Repayment of U.S. and Canadian Dollar Loans.

Mr. Macmillan, the Chancellor of the Exchequer, stated in a parliamentary written answer on Feb. 7 that total payments made since 1951 in respect of loans received from the U.S.A. and Canada in the immediate post-war years amounted to Can. $188,500,000 for interest and principal on the Canadian loan, and U.S. $727,400,000 for interest and principal on the U.S. loans. The amount remaining to be paid was Can. $1,697,000,000 for interest and principal on the Canadian loan, and U.S. $6,796,200,000 for interest and principal on the U.S. loans. In reply to questions, Mr. Macmillan pointed out that "this immense burden hangs over us for many years to come," and said that "we have to carry out our affairs in such a way as to be able to shoulder it." (Times) **(Prev. rep. 14628 B.)**

D. UNITED STATES - HUNGARY. — U.S. Ban on Travel to Hungary. - Further Restrictions on Movement of Hungarian Diplomats in Washington.

It was announced in Washington on Feb. 3 that the U.S. Government had reimposed the ban on travel to Hungary by American citizens, and that it intended to impose new restrictions on the movements of Hungarian diplomats in the U.S.A. so as to bring about "full reciprocity corresponding to the limitations affecting the movement of U.S. Legation staff in Hungary." It was added that the U.S. Government no longer considered feasible the possibility of talks with Hungary on "various problems" between the two countries.

A Note was handed to the Hungarian Minister in Washington (M. Szarka) charging the Hungarian Government with persecuting Hungarian employees of the American Legation in Budapest and curtailing the freedom of the Press by interfering with the legitimate activities of U.S. news agencies. The Note referred to the recent trial by a Hungarian military court of M. and Mme. Marton and of two Hungarian employees of the U.S. Legation, to the secrecy surrounding their long detention and the trial, and to their subsequent imprisonment on charges of espionage (see 14653 A). The Note also mentioned that, in addition, seven other Hungarian employees of the U.S. Legation had been seized by the Hungarian police between 1951 and 1954, their fate being unknown.

"The U.S. Government," the Note declared, "will not remain silent while the Hungarian Government, through its secret police, continues to persecute Hungarian employees of the American Legation It is obvious that such persons have been singled out as special targets, falsely accused of subversion, and subjected to cruel and wholly unwarranted punishment for the purposes of adding to the terrorism of the Hungarian people, attempting to discredit the American Legation, and undermining the prestige of the U.S.A. before the Hungarian people.

"For many years the Government and people of the U S.A. have looked in vain for some sign that the present leadership of Hungary might one day be disposed to act like an independent and responsible government, to honour its international obligations, and to show a decent respect for the rights of the Hungarian people Whatever its pretensions to principle, the Hungarian Government can command no credence in its words and no confidence in the rectitude of its actions. Now, as in the past, the Hungarian Government continues unabated its systematic suppression of human rights and liberties in violation of its specific treaty obligations. This policy, together with the irresponsible treatment and abuse of accredited foreign diplomatic missions by Hungarian authorities, stands in stark contrast to the insistent claims put forward by the Hungarian Government of qualification for membership in the United Nations. The record, including the latest incidents, not only contradicts those claims but also places in serious doubt the ability or willingness of Hungary, under its present Government, to carry out in good faith the Charter obligations it has assumed upon admission to the United Nations"

Budapest Radio announced on Feb. 6 that the Hungarian Government had refused to accept the U.S. Note on the ground that it was "couched in an unqualifiable tone" and contained "a series of slanders which deeply injure the feelings of the Hungarian Government and people."

On Sept. 1, 1955, the U.S. State Department had requested the Hungarian Legation in Washington to "cease all information activities" except for those carried on within the Legation building. This implied a ban on the distribution by mail of the Legation's magazine *New Hungary*, and on film shows and photographic exhibitions sponsored by the Legation. The U.S. action was stated to have been a reprisal for Hungarian interference with U.S. information activities in Budapest.

A ban on travel to Hungary by U.S. nationals had first been imposed in 1949. It was lifted in 1951 following the release of Mr. Robert Vogeler; reimposed in December 1952 following the forcing-down of a U.S. Dakota transport plane by Soviet fighters over Hungarian territory, and the trial and sentencing of four U.S. airmen by a Hungarian court; but lifted again on Oct. 31, 1955. Travel restrictions on Hungarian diplomats in the U.S.A. had been imposed in 1951 but were relaxed in October, 1953, when such diplomats were allowed to travel within 40 miles of Washington (instead of 18 miles as previously) without the special premission of the State Department.—(New York Times) **(14653 A; 12061 A.)**

E. UNITED KINGDOM. — Trade Figures for December and Year 1955.

Imports into the United Kingdom in December totalled £335,900,000, exports £253,700,000, and re-exports £10,700,000, the adverse visible balance thus amounting to £71,500,000. Provisional figures for the year 1955 showed that imports were £3,886,000,000, exports £2,905,000,000, and re-exports £119,000,000. The adverse balance was thus £862,000,000, compared with the revised figure of £599,000,000 for 1954.
(Board of Trade Journal) **(Prev. rep. 14623 C; 14127 A.)**

A. EASTERN GERMANY. — Formation of "People's Army" and Ministry of National Defence. - Herr Stoph appointed Defence Minister. - Herr Grotewohl's Proposals for East and West German Collaboration. - Western Protests at Para-military Activities in East Berlin.

A law creating a "National People's Army" in Eastern Germany, and at the same time setting up a Ministry of National Defence, was unanimously passed by the East German *Volkskammer* on Jan. 18. The official text stated that the National People's Army would consist of "ground, sea and air forces necessary for the defence of the German Democratic Republic," and that the army's numerical strength would be "limited in accordance with the tasks of defending the territory of the German Democratic Republic, defending its frontiers, and air defence."

The law was introduced in the *Volkskammer* by Herr Willi Stoph (Deputy Premier in the East German Government), whose appointment as Minister of National Defence was announced on Jan. 20. Herr Stoph declared that the "strengthening of the defences of the German Democratic Republic" had become necessary as a result of Western Germany's entry into the "aggressive North Atlantic pact," the establishment in Western Germany of "a mercenary army under the supreme command of U.S. NATO generals," and the "transformation of Western Germany and West Berlin into a NATO war base."

Herr Stoph (41), a former building worker, joined the German Communist Party in 1931 and worked underground during the Nazi regime. He was elected to the central committee of the Socialist Unity Party in Eastern Germany in 1950, became Minister of the Interior in 1952, and was appointed a Deputy Premier in 1954. It was stated that he would continue as a Deputy Premier concurrently with his new post as Minister of National Defence.

A proposal that the two German States should formally pledge themselves to refrain from the use of force against each other was made in the *Volkskammer* on the same day (Jan. 18) by Herr Grotewohl, the East German Prime Minister.

After declaring that "both parts of Germany must realize the danger of the policy of NATO and of military pacts," Herr Grotewohl called upon the "progressive forces" in Western Germany "to join with us immediately in seeking a way to release Germany from the deadly policy of American militarism." He put forward the following proposals:

(1) Both German States should (*a*) support a European Collective Security Treaty, (*b*) urge a reduction in the number of foreign troops, and (*c*) "pledge themselves in treaty form to refrain from all use of force against each other, and to use only peaceful methods in their efforts for the reunification of Germany."

(2) All "propaganda and preparations for atomic war on German soil" should be brought to an end. The two German Governments should reach "joint agreement on the renunciation of the atom bomb and on the mutual renunciation of the manufacture of atomic weapons."

(3) The German Democratic Republic and the German Federal Republic should "make efforts to normalize their relations with each other, and conclude relevant agreements in the various fields of economic and cultural life."

Herr Grotewohl reiterated his Government's earlier proposal for the formation of an All-German Council in which these matters could be discussed.

The British, U.S., and French Ambassadors in Bonn sent identical Notes on Feb. 10 to the Soviet Ambassador in East Berlin (M. Pushkin) protesting at the increase of East German para-military activities in the Soviet sector of the city, and drawing attention to the "serious implications" of such activities.

The Notes referred in particular to a demonstration on Jan. 15 in which thousands of civilians had marched through East Berlin, ostensibly to commemorate the assassination of Rosa Luxemburg and Karl Liebknecht in 1919, and had used the occasion to demonstrate against NATO and the rearming of the German Federal Republic. The British Note, after expressing the "growing concern" of H.M. Government at "the development in recent months of para-military activities in the Soviet sector of Berlin," continued:

"These activities assumed an ominous form when some thousands of civilians, armed with machine-pistols and other weapons, marched through East Berlin on Jan. 15. This demonstration even included the participation of young boys and girls carrying firearms. The formation of para-military groups and their employment in provocative displays have serious implications which H.M. Government cannot ignore. Their continued activity can only create unrest among the population and result in a heightening of international tension in the Berlin area.

"Such activity could have the gravest consequences. As your Government is aware, the United Kingdom, in common with the U.S.A. and France, has formally undertaken to defend the safety and welfare of the population in their sectors against attacks from any quarter. The U.K. cannot recognize any waiver of responsibility by the Soviet Government for acts which could lead to any such attack.

"As you are aware, the bearing of arms by members of the general public is prohibited by quadripartite legislation to which the British, French, and U.S. Commandants attach great importance, and which they have been careful to observe in their sectors.

"H.M. Government hopes that the Soviet Government, as the responsible authority, will prevent the local authorities in the Soviet sector from creating dangers to the peace of Berlin through the sponsorship of activities by armed civilian groups or through other threats directed at the Western sectors."

It was understood—although no official announcement was issued—that the militarized "people's police" (the *kasernierte Volkspolizei*, about 120,000 strong) would be incorporated *en bloc* in the "people's army." During a budget debate in the *Volkskammer* on Feb. 8, the East German Finance Minister (Herr Rumpf) stated that expenditure on the "people's army" in 1956 would amount to 974,800,000 East German marks [over £80,000,000 at the official East German rates, but only about £16,000,000 at the unofficial rate of approximately 5 East German marks = 1 West German mark]. Herr Rumpf added that the creation of the "people's army" would not raise the level of defence expenditure because the estimates for the "people's police" had been dropped.—(A.D.N. Agency - Neues Deutschland, Berlin - Times - Daily Telegraph - Le Monde, Paris - New York Times - Frankfurter Allgemeine Zeitung - Neue Zurcher Zeitung) **(Prev. rep. 14264 C.)**

B. SOVIET UNION. — New Minister of Internal Affairs. - Dismissal of M. Kruglov. - New Premiers of Russian, Lithuanian, and Uzbek Soviet Republics.

It was announced in Moscow on Feb. 1 that M. Sergei Kruglov, the Soviet Minister of Internal Affairs, had been "relieved of his duties" and had been succeeded by M. Nikolai Duderov.

The fact that the announcement made no reference to M. Kruglov's transfer to other duties was taken by foreign correspondents to indicate that he had been dismissed. M. Kruglov, formerly an official in the Ministry of Internal Affairs, became Minister in 1946; he was succeeded by the late Lavrenti Beria in 1953 after Marshal Stalin's death, but was reappointed to the post after Beria's arrest. Shortly afterwards the Ministry of Internal Affairs was stripped of its "security" functions, which were transferred to the State Security Committee, but M. Kruglov continued to retain command of large numbers of militarized police troops, in addition to the police (or "militia") proper. M. Kruglov has been a member of the central committee of the Soviet Communist Party since 1934.

M. Duderov worked with M. Khrushchov in the Moscow Committee of the Soviet Communist Party, where he was head of the Committee's construction department. Later he was appointed deputy chairman of the Moscow Executive Committee (the Moscow municipal council), and subsequently head of the construction department of the Communist Party's central committee. In his capacity as a "construction expert" he had recently travelled abroad to study building practices in other countries, including Britain. He is regarded as a close associate of M. Khrushchov.

It was remarked in the Western Press that in the past few years there had been complaints in the Soviet Press about the conduct and efficiency of the militia and its inability to maintain public order, suppress hooliganism, and deal with crimes.

An announcement in Moscow (Jan. 24) stated that M. Alexander Puzanov, Premier of the Russian Soviet Republic (the largest constituent Republic of the U.S.S.R.) since 1952, had been removed from the Premiership and appointed a Deputy-Premier, and that he had been succeeded by M. Mikhail Yasnov, hitherto mayor of Moscow. Both M. Puzanov and M. Yasnov are members of the central committee of the Soviet Communist Party. M. Yasnov visited London in October 1955 in his capacity as mayor of Moscow.

On Jan. 19 it had been announced that M. Mechislovas Gedvilas, Premier of the Lithuanian Soviet Republic since 1943, had been succeeded by M. Moteyus Shumauskas, First Secretary of the Lithuanian Communist Party. In December, following a visit by Marshal Bulganin and M. Khrushchov to Uzbekistan, it had been announced that the Premier of the Uzbek Soviet Republic, M. Nuritdin Mukhitdinov, had been appointed First Secretary of the Uzbekistan Communist Party and replaced in the Premiership by M. Sabir Kamalov. (Times - Daily Telegraph - Manchester Guardian - Le Monde, Paris - New York Times) **(Prev. rep. Soviet Cabinet, 14512 F; M. Kruglov, 13029 A; M. Puzanov, 12608 C.)**

C. SOUTH AFRICA. — Cyclotron in Operation.

South Africa's first cyclotron, the only one in the African continent, was formally inaugurated on Jan. 26 by the Minister of Economic Affairs and Mines, Dr. van Rhyn. It was built by the Council for Scientific and Industrial Research at a cost of about £100,000, and forms part of the national research laboratories' headquarters near Pretoria. (Cape Times)

A. CHINA - UNITED STATES. — Deadlock in Geneva Ambassadorial Talks. - Chinese and U.S. Statements. - Further Releases of American Citizens from China. - Repatriation of Chinese Citizens in the U.S.A.

Following the agreement reached in September, 1955, on the return of U.S. and Chinese civilians to their respective countries, the Geneva talks between Mr. Alexis Johnson (U.S. Ambassador in Prague) and Mr. Wang Ping-nan (Chinese Ambassador in Warsaw) became deadlocked over the second item on the agenda—" other practical matters at issue between the two sides." On Jan. 18, 1956, after a further 18 meetings had been held since mid-September without any agreement being reached, the Chinese Foreign Ministry issued a long statement accusing the U.S. Government of " dragging out " the talks, to which the U.S. State Department replied on January 21.

The two statements showed that the talks had become deadlocked principally over the question of Formosa. Whilst both sides were prepared to make a statement renouncing the use of force, the Chinese would not agree that such a statement should infringe their " sovereign right " to " liberate " Formosa. The United States, on the other hand, was not prepared to agree to any declaration on the renunciation of force unless Formosa was specifically mentioned in this respect, and unless a reservation was made regarding the " inherent right of individual and collective self-defence."

The two statements are summarized below.

Chinese Statement.

As soon as agreement had been reached on the return of civilians of both sides (the statement said) the Chinese delegate had put forward two subjects for discussion under the second item of the agenda—the U.S. embargo on exports to China, and the question of preparing for Sino-American negotiations at a higher level. The Americans, however, had refused to proceed to any substantive discussion of these subjects and had proposed on Oct. 8 that the two countries should make a joint declaration renouncing the use of force

The Chinese statement added: " If the so-called declaration renouncing the use of force means that China and the U.S.A. should, in accordance with the purposes and principles of the U.N. Charter, settle peacefully disputes between them without resorting to force, then it is precisely what China has consistently advocated " However, " the question of the non-use of force in the international relations between China and the U.S.A. should in no way be mixed up with the domestic affairs of either China or the United States. So far as the question of Taiwan [Formosa] is concerned, the occupation of China's territory by the U.S.A. is an international dispute between China and the U.S.A., whilst the liberation by the Chinese people of their own territory of Taiwan is China's sovereign right and internal affair. The Chinese Government has repeatedly declared that it would strive for the liberation of Taiwan by peaceful means so far as it is possible But this internal affair of China's cannot possibly be a subject of the Sino-American talks."

After having made their position clear in the talks, the Chinese had put forward on Oct. 28 the draft of an agreed declaration on the question of the renunciation of force, as raised by the U S Ambassador. This draft had proposed (i) that the two sides, in accordance with the U.N. Charter, should " settle their international disputes by peaceful means " and should " refrain in their international relations from the threat or use of force against the territorial integrity or political independence of any State ", (ii) that they should agree to settle any disputes between themselves " by peaceful means without resorting to the threat or use of force "; and (iii) that they should hold a conference of Foreign Ministers " to settle through negotiations the question of relaxing and eliminating the tension in the Taiwan area."

The U S. representative, however, had expressed " unwillingness " to make specific reference to the U N. Charter in the announcement, or to have it provide explicitly for the holding of a Sino-American Foreign Ministers' conference, and on Nov 10 had put forward a U.S. draft of a joint statement. The substantive part of this had been a declaration by both parties that " in general, and with particular reference to the Taiwan area," they renounced the use of force " except in individual and collective self-defence." Such a declaration (the Chinese statement declared) was an attempt " to confuse the international dispute between China and the U.S.A. in the Taiwan area with the domestic matter between the Chinese Government and the Chiang Kai-shek clique, and a demand that China should accept the *status quo* of the U.S. occupation of Taiwan and give up its sovereign right to liberate Taiwan." The statement added: " That is absolutely unacceptable to China. Taiwan is Chinese territory There can be no question of defence so far as the U.S.A. is concerned. . . ."

Nevertheless, in order that the talks might " progress step by step," the Chinese had put forward a new draft on Dec. 1 omitting all reference to the U.N. Charter or to a meeting of Foreign Ministers, and stating simply that the two countries were " determined that they should settle their disputes . . . through special negotiations without resorting to the threat of force," and that the two Ambassadors should continue their talks " to seek practical and feasible means for the realization of this common desire."

However after first refusing to make any specific comments, the U.S.A. had put forward a counter-proposal on Jan. 12 According to this, the two sides would announce that they would " settle disputes between them through peaceful means "; that, " without prejudice to the inherent right of individual and collective self-defence," they would not resort to the threat or use of force " in the Taiwan area or elsewhere ", and that (as in the Chinese text) the two Ambassadors " should continue their talks to seek practical and feasible means for the realization of this common end." " It is obvious," said the Chinese statement, " that in substance there is no difference whatsoever between this counter-proposal of the American side and its draft announcement of Nov. 10, which the Chinese side firmly rejected long ago."

On the question of the return of civilians of both sides to their respective countries, the Chinese statement accused the U S A of " continuously haggling " over the implementation of the agreement, and of violating it by failing to furnish China with a complete list of names and other information concerning Chinese residents and students in the U.S A, " thus making it difficult for India to carry out the tasks of a third country [i.e as mediator in the repatriation of U.S. and Chinese nationals] specified in the agreement " The statement added

" . There are tens of thousands of Chinese in the United States Owing to continued obstructions and threats by the American side, in violation of the agreement, the great majority of them have up to now not been able, or have not dared, to apply for return to China As for the Americans in China, their number was not very large to begin with. During the Sino-American talks, out of the 59 law-abiding Americans in China, all 16 who applied have been permitted to depart Even among the 40 Americans who committed offences against the law in China, 27 have been released before the completion of their sentences as a result of the lenient policy of the Chinese Government In spite of these facts, the American side still kept raising groundless charges in the talks. This can only be interpreted as an attempt to shirk its responsibility for violating the agreement and to manufacture a pretext for dragging out the talks."

In conclusion, the Chinese statement stressed that the tension in the Formosa area was the key issue between the two countries, and that " the root of the tension is the U.S. armed occupation of China's territory " It claimed that China had constantly been striving through the Ambassadorial talks to find a " practical and feasible means " of settling this dispute, whilst alleging that the U.S. side had " deliberately dragged out " the talks and had refused to enter into agreement on means of relaxing and eliminating tension in the area. In the meantime, the U.S. Secretary of State, Mr. Dulles, had " openly proclaimed recently that he would not scruple to start an atomic war in order to hold on to China's territory and infringe China's sovereignty." Such threats, however, would " not frighten the Chinese people into giving up their sovereign rights."

American Statement.

The State Department, in reply, said that the Chinese Government had issued " a misleading statement " on the course of the Geneva discussions, and that it was therefore necessary that " the record be set straight " Referring first to the repatriation of civilians, the statement said that to date only six out of the 19 Americans for whom representations were being made on Sept. 10 had been released, the remaining 13 still being held in Chinese prisons. As regards Chinese citizens in the U.S A., they were all free to leave the country for any destination of their choosing, and not a single one had been refused exit The Indian Embassy in Washington, which had been designated to assist any Chinese who wished to leave, had not brought to the attention of the U S. Government any case of a Chinese who claimed that he was being prevented from leaving, nor had it stated that it was in any way being impeded in carrying out its functions under the terms of the agreed announcement of Sept. 10

With regard to the Geneva discussions on the second item of the agenda, the U.S. statement said that it had been made clear, when the U.S. draft declaration of Oct. 8 had been put forward, that the renunciation of the use of force was not designed to commit the Communists to renounce the pursuit of their policies by peaceful means with respect to Formosa. The Chinese counter-proposal of Oct. 27 omitted any reference to the Formosa area or to the recognition of the right of self-defence, but inserted a provision about an immediate Foreign Ministers' meeting. It had not been acceptable to the U S.A because it would have made it possible for the Communists to claim that the proposal did not apply to the Formosa area, " which is the very place against which the Communist threats are directed," and to claim further that the U.S A. had renounced the right to use force in self-defence. The U.S. representative, moreover, had pointed out that " consideration of higher-level meetings was neither appropriate nor acceptable under existing circumstances."

The revised U.S. draft declaration of Nov. 10 had made it clear " that the renunciation of the use of force was without prejudice to the peaceful pursuit of its policies by either side; that it had general application, but applied particularly to the Taiwan area; and that it did not deprive either side of the right of self-defence." This had been rejected by China, and the Chinese counter-proposal of Dec 1, while representing an advance over their previous proposal by dropping the proposal for a Foreign Ministers' meeting in favour of continuing the ambassadorial discussions, had still pointedly omitted any references to the Formosa area and to recognition of the right of self-defence. In a further effort to reach agreement, the U.S. representative had on Jan. 12 suggested two simple amendments to the Chinese counter-proposal—the insertion of the words " without prejudice to the inherent right of individual and collective self-defence ", and of the words " in the Taiwan area or elsewhere."

The U.S. statement said that two points must be made clear with regard to Formosa "First, the United States is not occupying Taiwan, and Taiwan has never been a part of Communist China. The claims of Communist China and the contentions of the U.S.A. with respect to this area are well known, and constitute a major dispute between them It is specifically with respect to this dispute that the U S A has proposed the principle of renunciation of force and the settlement of differences by peaceful means This is the principle which the Communists say they have accepted In this connexion the U S A. has made completely clear that in renouncing the use of force neither side is relinquishing its objectives and policies but only the use of force to attain them.

"Secondly, the U S A. has rights and responsibilities in the Taiwan area, also it has a mutual defence treaty. Accordingly it is present in the Taiwan area. The Communist refusal to state that the renunciation of force is without prejudice to the right of self-defence against armed attack can only be interpreted as an attempt to induce the U S A to agree that, if attacked, it will forego the right to defend its lawful presence in this area The right of individual and collective self-defence against armed attack is inherent. It is recognized in international law, it is specifically affirmed in the U.N Charter No country can be expected to forego this right Indeed, the Communists should be as anxious to preserve this right as is the United States"

In conclusion, the U S. statement said that the Ambassadorial talks had made the following points clear

"(1) Four months after the Communists announced that they would adopt measures to permit Americans in China to return to the U S.A, 13 Americans are still held in Communist prisons.

"(2) The U S A. proposed that the parties should renounce the use of force without prejudice to the right of individual and collective self-defence against armed attack, in order that the discussions might take place free from the threat of war.

"(3) The U S.A. made it clear that this renunciation would not prejudice either side in the pursuit of its objectives and policies by peaceful means.

"(4) The Communists, while stating that they accept the principle of the renunciation of force, have deprived such acceptance of its value by refusing to agree that it is without prejudice to the right of individual and collective self-defence against armed attack, and that it is applicable to the Taiwan area

"In short, the Communists so far seem willing to renounce force only if they are first conceded the goals for which they would use force.

"The United States for its part, intends to persist in the way of peace We seek the now overdue fulfilment by the Chinese Communists of their undertaking that the Americans now in China should be allowed expeditiously to return. .. We shall also seek with perseverance a meaningful renunciation of force, particularly in the Taiwan area."

A further Chinese statement, issued in Peking on Jan. 24, reiterated the previous Chinese claims about the status of Formosa; asserted that the "new China" had "succeeded to China's entire territory and sovereignty"—an "indisputable fact" which "no statement by the U.S. State Department can alter"; and warned the United States that it must take responsibility for "all the consequences" if the Geneva talks broke down. "The real intention of the American side," it declared, "is to maintain and aggravate the tension in the Formosa area and to pursue its so-called 'brink of war' policy of intimidation."

Twenty-four U.S. nationals were released from China between Sept. 16 and Dec. 20, 1955 (eight of those whose release had been promised on Sept. 6, the ten whose release had been announced on Sept. 10, and six of the remaining 19 listed as still under detention in China), whilst 51 Chinese from the U.S.A. arrived at Hong Kong on Jan 31 *en route* for China. Most of the released Americans complained of having been imprisoned on false charges of "espionage."
(New York Times - New York Herald Tribune) **(14415 A.)**

A. UNITED KINGDOM. — Gold and Dollar Reserves in January. - Increase of $29,000,000.

The sterling area had a gold and dollar surplus in January of $29,000,000 after taking account of (*a*) the receipt of $6,000,000 in U.S. defence aid, (*b*) the payment of $23,000,000 to the European Payments Union, representing that part of the December deficit which had to be settled in gold or dollars, and (*c*) the payment of $2,000,000 under bilateral settlements with creditors of the E.P.U. As a result of the January surplus —the first increase in the reserves since April 1955—the sterling area's gold and dollar reserves rose to $2,149,000,000 on January 31, 1956.

Provisional figures for the E.P.U. January settlement showed that the U.K. had a deficit of $11,200,000 (£4,000,000), which would be settled in February three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.—(Treasury Press Office) **(Prev. rep. 14629 E.)**

B. SUDAN. — All-Party Government.

An all-party national Government was formed in Khartoum on Feb. 2 by the Prime Minister, Mr. Ismail Azhari. Negotiations for the formation of an all-party administration had been in progress since November, and particularly since the defeat of Mr. Azhari's Government in the Sudanese Parliament in January. The composition of the new Cabinet was as follows:

*Mr. Ismail Azhari (National Unionist) . .	Prime Minister and Minister of Interior.
*Mr. Mubarek Zarrouk (National Unionist) .	External Affairs and Justice.
*Mr. Ibrahim el-Mufti (National Unionist) . .	Trade, Industry, and Supply.
*Mr. Ali Abdel Rahman (National Unionist) .	Education.
*Mr. Hammad Tawfik (National Unionist) .	Communications.
*Dr. Amin el-Sayed (National Unionist) .	Health.
*Mr. Buth Diu (National Unionist)	Animal Resources.
*Mr. Santino Deng (National Unionist)	Stores and Equipment.
Mr. Abdullah Khalil (Umma Party)	Defence and Public Works.
Mr. Ibrahim Ahmed (Independent)	Finance.
Mr. Benjamin Lowki (Liberal) ..	Mineral Resources.
Mr. Mirghani Hamza (Liberal Socialist) .	Agriculture and Irrigation.
Mr. Mohamed Nur el-Din (Unionist) . ..	Local Government.
Mr. Yousif el-Agab (Republican Socialist) . ..	Minister without portfolio.
Mr. Stanislaus Abdulla Payasama (Liberal)	Mechanical Transport.
Mr. Ziada Arbab (Unionist) ..	Social Affairs.

* Member of previous Cabinet.

The Cabinet thus comprised eight National Unionists (the former Government party, led by Mr. Azhari) and eight members of the former Opposition. Of the latter, Mr Abdullah Khalil is leader of the Umma Party, Mr Mohamed Nur el-Din was the leader of that section of the National Unionist Party which favoured union with Egypt, and had been dismissed by Mr. Azhari in June 1955 owing to disagreement over Sudanese policy towards Egypt (see 14377 A); whilst Mr. Mirghani Hamza had resigned from Mr Azhari's Government in December 1954 because he favoured a more independent policy in relations with Egypt (see 13969 A) Mr Ibrahim Ahmed, the new Finance Minister, is a prominent supporter of the Umma Party but is not a member of Parliament, and was hence shown in the official list as an Independent.

Japan officially recognized the independence of the Sudan on January 6.—(Sudan Diplomatic Mission, London)
(Prev. rep. Cabinet, 14559 A; Independence, 14624 A.)

C. WORLD FEDERATION OF TRADE UNIONS. — Vienna Headquarters closed by Austrian Government.

The Austrian Minister of the Interior (Herr Oskar Helmer) issued an order on Feb. 4 withdrawing legal recognition from the Communist-dominated World Federation of Trade Unions, and "dissolving" the WFTU's headquarters in Vienna. The premises were closed down by the Austrian police two days later.

Herr Helmer declared that the WFTU—which he described as "an agglomeration of Communist-orientated trade unions of various countries"—had abused Austrian hospitality by engaging in propaganda against countries with whom Austria maintained diplomatic relations and who, like Austria herself, were members of the United Nations. By these actions the WFTU had exceeded its legitimate sphere of activity, endangered the interests of the Austrian Republic, and therefore failed to fulfil the conditions under which it had been registered as a society under Austrian law. [This registration had only taken place after the ending of the occupation.] In particular, it had issued publications and bulletins of a political character, for dissemination abroad, criticizing conditions in friendly countries, and had thereby overstepped the limits of its proper activities It had been hoped that the WFTU would have respected Austria's new status after the signing of the State treaty and the ending of the occupation, but it was apparent that the Federation was not prepared to respect the obligations arising from Austria's neutrality

In announcing the closing-down of the Vienna headquarters of the WFTU, Herr Helmer declared that "we shall not allow Austria to become a meeting-ground for foreign agents," nor would the Government tolerate "our country becoming a field for propaganda war."

M. Louis Saillant, the French secretary-general of the WFTU, described the Austrian Government's action as an "attack on trade union freedom," and announced that the Federation would establish its headquarters in another country. The headquarters of the WFTU had been established in Vienna since 1951, after having been expelled from Paris.
(Wiener Zeitung) **(Prev. rep. W.F.T.U., 11631 A.)**

A. **EASTERN EUROPE. — Prague Meeting of Warsaw Treaty Powers. - East German Army admitted to Joint Military Command. - Budapest Meeting of East European Council of Mutual Economic Assistance.**

The Political and Consultative Committee of the Warsaw Treaty Organization held a two-day meeting in Prague on Jan. 27-28 which was attended by the Foreign and Defence Ministers of all the eight signatories to the Warsaw Treaty —the Soviet Union, Poland, Czechoslovakia, Hungary, Rumania, Bulgaria, Albania, and Eastern Germany—and also by the Premiers or Deputy Premiers of some of the countries. The Soviet delegation was headed by M. Molotov and Marshal Zhukov, whilst Marshal Koniev was present in his capacity as Supreme Commander of the armed forces of the Warsaw Treaty Powers. The People's Republic of China was represented by an observer, as at the founding conference in Warsaw.

The following decisions were taken at the Prague meeting, as announced in a communiqué:

(1) Contingents of the new East German Army (see 14701 A) would be incorporated in the unified command of the Warsaw Treaty Powers. The East German Defence Minister (Herr Stoph) would become a deputy commander under Marshal Koniev.

[Although Eastern Germany signed the Warsaw Pact in 1955, her participation in the unified command was deferred at the time for later consideration. Following the creation of a "National People's Army" in Eastern Germany, a formal request for the admission of the German Democratic Republic to the joint command was made to the Prague meeting by Herr Ulbricht (First Deputy Premier in the East German Government), and was agreed to by the other member-countries. The Defence Ministers of the "Warsaw Treaty" countries are deputy commanders of the joint military organization.]

(2) The Political and Consultative Committee would meet whenever necessary, and in any case not less than twice a year, "to discuss questions resulting from the application of the Warsaw Treaty." The chairmanship would rotate between the various countries.

(3) Two subsidiary bodies would be set up with headquarters in Moscow: (i) a Permanent Commission which would make recommendations on questions of foreign policy, and (ii) a Secretariat whose staff would be drawn from all the member-countries.

A joint declaration was also issued in which it was proposed, *inter alia*, that neither the East German nor the West German armed forces should possess atomic weapons, and that the NATO and the Warsaw Treaty Organization should give an undertaking to solve their differences by peaceful means.

Although denouncing the Western Powers for having created "aggressive military blocs" in recent years, thereby "heightening the tension between nations," the declaration spoke of "an improvement in the international situation" following the Geneva meetings of Heads of Government and Foreign Ministers. It affirmed that European peace could best be ensured by a Collective Security Treaty of which the NATO and Warsaw Treaty Powers should be signatories. In the meantime, non-aggression pacts between the U.S.S.R., the U.S.A., France, and Great Britain should be concluded, and consideration should be given to the British proposals [put forward at the Geneva "summit" conference by Sir Anthony Eden] for the creation of a demilitarized zone in Europe.

It was specifically proposed that the Soviet, American, French, and British forces in Germany should exclude nuclear weapons from their armament, as a step towards the "relaxation of tension"; that, in conformity with the "interests of the German people," neither the East German nor the West German forces should possess such weapons, and that immediate steps should be taken to improve relations between neighbour-States, "irrespective of their present or eventual membership of one or other military blocs"—e.g., between the U.S.S.R. and Turkey, Bulgaria and Greece, Albania and Italy, and Czechoslovakia and the German Federal Republic.

Speeches were made by the leaders of all delegations. M. Molotov declared *inter alia* that the Warsaw Treaty Powers "cannot accept it as a fact that the danger of war is past"; that the Eastern European countries had been obliged to concert common policies for their security because of the dangers arising from "aggressive military blocs and the renewal of German militarism"; and that "the unification of Germany cannot be achieved except through agreement between the two German States."

The East European Council of Mutual Economic Assistance met in Budapest from Dec. 7-11, 1955, the meeting being attended by representatives of the eight member-countries—the Soviet Union, Poland, Czechoslovakia, Eastern Germany, Hungary, Rumania, Bulgaria, and Albania. It was announced that the Council had discussed (1) the main trends of economic development in the member-countries during the next few years, the rise in standards of living already achieved, and matters relating to the conclusion of long-term trade agreements between the countries; and (2) the question of specialization and co-operation in the manufacture of certain types of machinery and equipment, with a view to achieving greater production, improving quality, and lowering costs through the extended application of new industrial techniques.
(Polish Embassy Press Bulletin, London - Hungarian Review, Budapest - Le Monde, Paris) **(Prev. rep. Warsaw Treaty, 14249 A; East European Economic Council, 9768 B.)**

B. **BRAZIL. — Inauguration of President Kubitschek. - New Cabinet. - Senhor Kubitschek's Visit to Europe. - Abolition of Press Censorship. - Brazilian Five-year Plan.**

Senhor Juscelino Kubitschek was formally inaugurated on Jan. 31 as President of Brazil for a five-year term, Senhor João Goulart being sworn in as Vice-President. Their election had been officially proclaimed on Jan. 27 by the Supreme Electoral Tribunal, which had given the following final revised figures for the presidential election: Senhor Kubitschek, 3,061,000; General Tavora, 2,601,000; Senhor de Barros, 2,221,000; Senhor Salgado, 713,411. Senhor Goulart polled some 200,000 votes more than his nearest rival, Senhor Milton Campos, in the vice-presidential election.

Before his inauguration, President Kubitschek had made a three-week tour of foreign countries during which he visited 10 capitals and had discussions with Government leaders and officials. Leaving Brazil on Jan. 4, he flew first to the U.S.A. for a meeting with President Eisenhower at Key West (Florida) before going on to Washington and New York. He left the United States for the Netherlands on Jan. 10, and on Jan. 11 flew from Holland to Britain, where he was received in audience by Queen Elizabeth II and dined with Sir Anthony Eden. From Britain he went to Luxemburg (Jan. 12), Belgium (Jan. 12-13), France (Jan. 13-15), Western Germany (Jan. 15-17), Italy (Jan. 17-20), Spain (Jan. 20-22) and Portugal (Jan. 22-23), arriving back in Rio de Janeiro on Jan. 25. President Kubitschek was received in audience by the Pope during his visit to Rome.

President Kubitschek completed his Cabinet on Jan. 30, its membership being as follows:

†Senhor José C. Macedo Soares.	Foreign Affairs.
*Dr. Nereu Ramos	Justice and Interior.
Senhor José Maria Alkimin .	Finance.
†General Henrique Teixeira Lott	War.
†Admiral Antonio Alves Camara	Navy.
†Brigadier Vasco Alves Secco	Air.
Commandant Lucio Meira .	Transport and Communications.
Senator Parsifal Barroso .	Labour.
General Ernesto Dornelles .	Agriculture.
Senhor Clovis Salgado .	Education.
Professor Mauricio Medeiros ..	Health.

* Acting President prior to the inauguration of Senhor Kubitschek.
† Held same portfolio in President Nereu Ramos's Cabinet

The press censorship, imposed in November 1955, was abolished by President Kubitschek on Feb. 1 as one of his first acts on taking office. The state of siege, however, imposed on Nov. 25 for 30 days and subsequently extended to Feb. 25, remained in force. A five-year plan of economic development, providing *inter alia* for a two-thirds increase in power capacity, the installation of a 10,000 kw. industrial atomic reactor, a 30 per cent rise in agricultural and livestock production, and the establishment in Brazil of lorry, motor car, locomotive, and heavy electrical equipment plants, and of shipyards, was also announced by President Kubitschek on Feb. 1.—(New York Times - New York Herald Tribune - Times - Le Monde, Paris) **(Prev. rep. Brazil, 14584 A.)**

C. **SOVIET UNION - UNITED KINGDOM. — Soviet Proposal on Gold Holdings of Former Baltic States.**

It was announced by Moscow Radio on Jan. 10 that the Soviet Union had suggested to Britain that sums still outstanding in compensation to two British companies formerly operating in Russia should be settled out of the former gold holdings of Latvia, Lithuania, and Estonia, amounting to £5,700,000, which were "frozen" by the Bank of England under an Order-in-Council in July 1940, when these countries were occupied and subsequently incorporated in the Soviet Union (see 4163 A). The two British companies concerned were the Tetiukhe Mining Corporation and the Lena Investment Trust, whose properties and holdings in Russia were seized by the Soviet Government in 1932 and 1934. A British Foreign Office spokesman stated on Jan. 11 that claims for compensation under these heads amounted to £2,500,000, but that they represented only a small part of total U.K. claims against the Soviet Union. The Moscow announcement said that the Soviet offer had been made last autumn but that there had been no British reply.—(Financial Times)
(Prev. rep. "Freezing" of Baltic States' Assets, 4175 E.)

FEBRUARY 18—25, 1956

A. UNITED KINGDOM. — Financial and Monetary Policy. - Increase in Bank Rate. - Further Anti-inflationary Restrictions on Public Expenditure and Hire Purchase. - Reduction in Bread and Milk Subsidies. - Suspension of Industrial Investment Allowance.

The Bank of England announced on Feb. 16 that the Bank Rate was being increased with immediate effect from 4½ per cent to 5½ per cent—the highest level since 1931, when it was raised for a while to 6 per cent.

This step was followed on Feb. 17 by the announcement of further anti-inflationary measures by Mr. Macmillan, the Chancellor of the Exchequer, in the House of Commons. The new measures included:

Hire Purchase. Deposits on consumer goods already controlled were increased (as from Feb 17) from 15 to 20 per cent for furniture, floor coverings, cookers, cycles. and clocks, and from 33⅓ to 50 per cent for radio and television sets, gramophones, washing machines, refrigerators, and vacuum cleaners

Control was extended to hire purchase of certain capital goods, including aircraft, ships, commercial vehicles, and machinery, with a minimum deposit of 50 per cent and a maximum repayment period of two years.

Perambulators were freed from control

Food Subsidies. The bread subsidy, now costing about £50,000,000 a year, would be cut by £18,000,000, and the milk subsidy, now standing at £37,000,000, would be reduced by £20,000,000—a total cut of £38,000,000. The price of bread would accordingly be increased from 7½d. to 8½d per loaf as from Feb 26, and the price of milk by ½d. a pint from July 1.

Private Capital Expenditure. The investment allowance to industry for capital expenditure (introduced in the 1954 Budget) would be suspended with immediate effect, and the former initial allowances restored Investment allowance would still be granted, however, where a definite contract had already been placed for the purchase or construction of capital assets, and for capital expenditure on shipbuilding and scientific research

Capital Issues. - Bank Credits. The Capital Issues Committee would be instructed to follow a "vigorously critical attitude" to new issues, and its consent would be recommended only under pressure of definite urgency for current requirements "Loopholes" arising out of the absence of control for capital issues below £50,000 were under review by the Government.

Banks would be asked to continue their efforts to reduce advances, and businesses would be urged to finance development out of their own resources.

Public Expenditure. The programmes of the nationalized industries for 1956 would be cut by a further £50,000,000; capital spending by the Government would be reduced by over £20,000,000; and local authority projects would be restricted by severely restraining loan sanctions. The hospital building programme would go on as announced, but some school building would be postponed, although the total amount authorized would not be cut.

The Chancellor's speech, in which he gave a survey of the Civil and Defence Estimates for the next financial year (1956-57), was as follows:

"The Government has come to the conclusion that further measures are needed to deal with the overload which has put such a strain on our balance of payments I propose to give a brief explanation of the measures we have taken and propose to take When the debate takes place, there will be an opportunity to develop at greater length the reasons why we think them necessary. I will confine my remarks today to a factual review.

Before, however, dealing with the wider field, I should like to refer to the current expenditure of the central Government The expenditure which we propose for 1956-57 is made known in the Defence White Paper and in the Civil Vote on Account, which are both published today. I should like to say a word about the new figures

The Defence total will be £1,499,000,000 net, as against the original Estimates of £1,494,000,000 for 1955-56 As the White Paper will show, we have carried out a comprehensive and forward-looking review of our defence effort In this we have had regard both to the needs of the new strategic situation and to the dangers of overloading the economy with the cost of defence, whether in terms of manpower, materials or money. The total Estimates for Defence would have been much lower but for the increases in Service pay and emoluments, which are to cost £67,000,000 in all

The Civil Estimates, at £2,481,000,000 show an increase of £112,000,000 over the original Estimates for 1955-56, of the increase, the Social Services account for £99,000,000.

It will be seen that the total estimates, defence and civil, are £117,000,000 more than those presented at this time last year. This represents a rise of about 3 per cent in money This, at a period of higher costs, is actually a fall in real terms—that is, in demand on labour and materials. If the Government had not exercised the most rigorous check, the increases in Service and Civil Service pay, in wages generally, and in the costs of all the supplies needed for the Government services, would of themselves have carried the total of the Estimates to far higher figures. But we have made vigorous and sustained efforts, initiated by the Lord Privy Seal and continued by me since I took up my present office, with the help of all my colleagues, to reduce the total The fact is that rises in Education, the Health Service, and Service Pay more than account for the net total increase. Over the rest of the field, notwithstanding developments such as those of Atomic Energy and roads, we have brought the total estimates below this year's figure.

We shall continue our efforts to reduce the total of public expenditure and shall not hesitate to ask the country to accept a reduction of existing services if we judge it at any time proper and expedient to do so. We shall also pursue a continuous search for further administrative economies We have already carried this so far that, short of changes in policy, such economies cannot yield large sums; but as an earnest of our intentions I would remind the House that in his speech at Bradford (see 14639 A) the Prime Minister said that our target was a reduction in the staffs of Government Departments by a further 10 000 to 15,000 This work is being put in hand.

Now I come to the wider problem There is general agreement that the combined demands of investment and consumption are growing too fast for our economic health This has held back our exports, swollen our imports, forced us into a balance-of-payments deficit, helped to reduce our reserves by a quarter, and driven up our domestic price level After much study during the past few weeks of developments under all these heads, it is clear to me that something more must be done, in addition to the measures taken by the Government in the course of last year. The more quickly we are able to act, the more effective will be the results We must make an even more determined attack on the roots of the trouble and enforce still further reductions in investment and consumption

I will state first the measures which are being taken in the monetary field. As the House knows, the Bank of England yesterday increased the Bank Rate from 4½ to 5½ per cent I regard this as a timely move which will reinforce the further disinflationary measures on which the Government have decided Next, the reduction in bank advances has accomplished a good deal, but I must look to the banks to continue their efforts to reduce the total of their advances. Similarly I look to the Capital Issues Committee to maintain a vigorously critical attitude towards all applications The Committee should recommend consent only where they are satisfied that the purpose has a definite urgency under current requirements; where such urgency is not proved, they need not be moved by the argument that the applicant has committed himself to the development in advance of Treasury consent

Credit restrictions are designed to slow down investment and consumption in the private sector of the economy. I would also appeal to businessmen who are able to finance investment out of their own resources to apply the same tests as to the timing and rate of their investment as if they had to borrow.

Meanwhile I have given careful thought to the question whether it is right, in present conditions, to continue the investment and initial allowances. I have reached the conclusion that I should suspend the investment allowance and in its place restore the former initial allowances I propose that as a general rule no investment allowances shall be given in respect of capital expenditure becoming due and payable after today but that such expenditure should qualify for the rate of initial allowance in force in 1953. There will be two classes of exception. In the first place, where a definite contract has already been placed for the purchase or construction of capital assets, the investment allowance will still be given in respect of the relevant expenditure when it becomes payable. Secondly, capital expenditure on the construction of ships and on scientific research assets will continue to qualify for investment allowance. The necessary resolutions and legislation will be brought forward in the Budget and the Finance Bill.

Again, we have reviewed the Orders regulating the terms of hire purchase. We propose to tighten up the present arrangements in three ways First, the minimum down payments for consumer goods will be increased from the present 15 per cent and 33⅓ per cent to 20 per cent and 50 per cent respectively. Maximum periods of repayment will remain unchanged Second, power will be taken to control hiring of certain of these goods. Third, the control will be extended to a comprehensive range of capital goods subject to a 50 per cent down payment and maximum repayment period of two years. We expect these changes to restrict credit over a wide field I regret the need for these changes, which will disappoint many people. But at a time when we are restricting borrowing for investment and production, we must also restrict borrowing for purchase. We must all join in the battle against inflation.

But the Government must also play its part in this campaign through the public authorities and departments over which it has control. I have therefore made a full review of all these plans with the Ministers concerned. Useful works already started must be completed with all expedition. But we shall take measures to impose delay on some works not yet started so as to reduce, as quickly and by as much as possible, our demands on productive industry, especially building and heavy engineering.

I will deal first with the nationalized industries. As a result of previous requests, they had already reduced their programmes of capital expenditure in 1956 before submitting them to their appropriate Ministers. They have readily co-operated further and by reassessing priorities and by re-phasing they have now further reduced their programmes, as submitted, by just under £50,000,000 In the result, the total capital requirements of the Fuel and Power industries should be some £20,000,000 less than in 1955, though investment in coal production will in fact be higher. On the other hand, the British Transport Commission, although they have agreed

to substantial reductions in their 1956 programmes, must spend more than in 1955 in order to make a start with their major plan for re-equipping and speeding up the railways. The contributions of the various authorities are :

Central Electricity Authority and the two Scottish Electricity Boards	£13,750,000
Gas Council and Area Boards . .	£5,000,000
National Coal Board (on items other than coal production	£5,000,000
British Transport Commission . .	£22,000,000
Airways Corporations and Airports .	£2,250,000
B.B.C. and I.T.A.	£1,500,000

Next, capital expenditure financed direct by the Central Government will be reduced by over £20,000,000 in all below what had been planned for 1956. Towards this the Post Office, by rearranging its programmes, will find £5,250,000 ; and the restriction of storage facilities and stockpiling for Home Defence will save £10,000,000 on the original plan. The New Town Corporations are also being asked to defer the starting of new capital projects wherever possible We do not propose any change in the programme of hospital building already announced.

The same principles must be applied to the capital programmes of Local Authorities. As regards Housing, the Government's proposals have been embodied in the Bill now before the House. As regards Education, the changes which the Ministers concerned are making in the school building programmes affect only timing The programme stands. But the 1955-56 programmes of the local authorities are seriously in arrears. It is therefore prudent to make room in the 1956-57 programmes for starting the carry-over from the current year. For this purpose a control of starts will be necessary The Minister of Education will therefore postpone until 1957-58 a proportion of the 1956-57 programme of starts. The Secretary of State will take the corresponding action in Scotland. My right honourable friends will shortly issue circulars to Local Authorities explaining these arrangements in detail. The grant of loan sanctions for other capital schemes of Local Authorities will have to be severely restrained, save where there are exceptional circumstances. The sanctioning Ministers will be sending out circulars to explain the new arrangements for the services with which they are concerned.

Finally, I must refer again to the question of the current expenditure of the central Government. This is part of the total demand on our resources, and we cannot allow any expenditure for which there is not full justification.

So far nearly all the decisions of the Government, whether in the monetary or in the physical sphere, bear principally on investment We regret the need for this ; but even investment, on which our future prosperity depends so much, cannot be allowed to outrun our resources of men and materials or to make excessive demands on the balance of payments.

Nevertheless, it would not be right to put the whole burden on the future, especially when we are paying out large sums to encourage consumption. In present circumstances, with full employment and high wages, it is difficult to justify the continuance of these general consumer subsidies on their present scale. At the same time a period of reasonable stability in prices remains a primary aim of Government policy ; and the progressive reduction of these subsidies must take place consistently with that aim The bread subsidy, which amounts to about 2½d. on the 7½d. loaf, costs about £40,000,000 a year. Ordinary milk—I am not speaking of school or welfare milk—is subsidized to the extent of £37,000,000 a year As a first step, the Government have decided to reduce the subsidy on bread by 1d. on the 7½d. loaf This will operate as from Feb. 26, and will represent an immediate reduction in the subsidy at the rate of some £18,000,000 a year. The retail price of milk will be put up by ½d. a pint as from July 1 The saving will be at the rate of some £20,000,000 a year. These proposals do not, of course, affect the cost of welfare or school milk to mothers and children.

The immediate increase in the price of bread amounts to an increase of 0.6 of a point in the cost-of-living index. The milk increase in July will amount to 0.4 of a point But these movements, although important, are not the true test of our measures. The real effect must be judged in the light of the general success or failure of the national campaign against inflation.

I have now completed my account of the results of the review which the Government have made of the whole range of public expenditure, capital and current. The reductions we have been able to make in the capital expenditure of the Government and of the nationalized industries will reduce the pressure of demand in 1956 by some £70,000,000. The savings on the food subsidies will amount to £38,000,000. To these must be added—though I cannot put a figure on them at this stage—the reductions in outlay which will result from the rephasing of Local Authorities' capital expenditure. Finally, we must expect that the continuing, and—in the case of hire purchase—the still tighter restriction of credit, coupled with the increase in the Bank Rate, will achieve a more definite slowing-down of demand from private industry and the consumer.

I have made this statement today to give hon. members good time to think over its contents before the debate on February 20. I trust that hon. members, in considering it, will bear in mind this one thing We are attempting to grapple with inflation, an obstinate and gravely serious problem which has beset us ever since the war, and has not been fully mastered at any time by any Government. Yet it must be mastered if our personal lives are not to be darkened by continual anxiety and uncertainty, and our country's position in the world steadily undermined.

Though our measures are restrictive, our purpose is positive and constructive. We want to call a halt to the prospect of a general continuing rise in costs, so that the constant upward pressure on prices will be relieved We want to safeguard the internal purchasing power of the pound, so that the shopping money will go as far at the end of the year as it does at the beginning. We want fixed incomes to mean what the figures say and not be reduced by a dwindling of the value of the money they represent We want to fill the gap between our exports and our imports by successful trading, not by draining our gold and dollar reserves. We want to go further than that and build up the strength and effectiveness of the whole Sterling Area by increasing our reserves. We want in fact to safeguard the striking gains in our standard of life that have been achieved since the end of the war, and to lay a firm foundation for renewed progress Never before has the standard of living been so high or general well-being so widespread Never before has every individual home had so great a stake in the continued prosperity and solvency of Britain I believe, therefore, that although these measures will necessarily result in some sacrifice or some disappointment, they will be accepted as wise and timely."

The Chancellor replied to a number of questions after making his statement to the House of Commons.

Asked by **Mr. Harold Wilson** (Lab) whether he intended to reintroduce building licensing in order to stop "frivolous building expenditure," **Mr. Macmillan** said · "We have no intention of introducing the old building licence system, which had practically broken down when it came to an end a year or two ago With a very high proportion of total building—over 90 per cent—on housing or factories, it is doubtful whether it is worth having "

Mr. Clement Davies (L) asked why the Chancellor had delayed his measures, although the Government must have known about the weak economic position for some considerable time. **Mr. Macmillan** replied : "One of the steps upon which we rely is the Bank Rate. I would have been very much averse—and so were the authorities—to raising it by itself until we were in a position to fortify it by the general Government decisions. Raising the Bank Rate a few weeks after I had taken office would have been regarded abroad as a sign of weakness and fear, while I believe now, combined with these measures, it will be regarded as a sign of strength."

Mr. Bellenger (Lab.) asked whether it was intended to maintain the £50,000 limit below which it was not necessary to obtain the authority of the Capital Issues Committee, and whether there was not some evidence that this limit was being circumvented by certain companies, particularly in hire-purchase, through the flotation of several £50,000 companies **Mr. Macmillan** replied that this loophole was under review, but added "I should hesitate to make a general line reducing the £50,000 limit, because it would be inconvenient to administer."

Replying to **Mr. Douglas Jay** (Lab.), who asked whether it was proposed to raise old-age pensions and national assistance rates in view of the cut in the bread and milk subsidies, **Mr. Macmillan** replied that national assistance rates had only recently been increased "to a figure which takes account of a greater increase than is covered by my proposals "

Mr. Crossman (Lab.) asked whether the £70,000,000 which Britain might have to pay for the British Army of the Rhine in the next financial year was included in the Chancellor's calculations. In reply, **Mr. Macmillan** said that the Government were allowing for the receipt of £50,000,000 from the German Federal Government When **Mr. Strachey** (Lab.) asked : "Why does the Chancellor think he can bring in an item of £50,000,000 for German support costs into his calculations ? ", and added . "Are his other calculations likely to be as unfounded as that appears to be ? " **Mr. Macmillan** replied : "Mr. Strachey must think it very odd if I were to embark on negotiations by starting to write off a figure before we began." [Mr. Strachey's remarks referred to statements made by Dr. Schäffer, the Federal German Finance Minister, that Western Germany would no longer make any contributions for the upkeep of the British, French, and U.S. forces on German soil—a question on which negotiations are in progress between the three Western Allies.]

Further details of the Government's decisions were announced on the same day, as follows :

Local Government Expenditure. The curtailing of capital expenditure by local authorities was the subject of a communication by the Ministry of Housing and Local Government to all local authorities in England and Wales. After referring to Government intentions with regard to housing and school building, the circular stated that in respect of other local government services, except certain major works on roads, loan sanctions would be severely restricted for at least six months. It continued ·

"During this period it should be assumed that there will be a virtual embargo on all new capital projects, or expansions of existing schemes, which can be deferred without risk to health, safety, or other vital interests. The restrictions will be applied to all capital expenditure which has not already received loan sanction, even though it may already have been approved in principle or for the purposes of grant."

Hire Purchase and Credit Sales. In addition to the changes mentioned above, the new Orders on hire purchase which came into force on Feb. 18 contained the following provisions :

(1) Instalments under credit sale agreements for less than nine months, for which no deposit had been required, would henceforward have to be paid in approximately equal payments at equal intervals.

(2) Goods affected by the new restrictions on rental agreements would include radio and television sets, gramophones, washing machines, vacuum cleaners, and refrigerators. The main restrictions were that for a hiring agreement of up to nine months, payment of the whole of the rentals and service charges would have to be made before the agreement was signed. In any other hiring agreements all rentals and charges payable during the first nine months would have to be paid in advance.

(3) Where goods had been hired for a definite period of nine months or less, the Order prohibited any further hiring of those goods to the person concerned, except that hirings for a period of less than one month might be extended up to a total of one month.

(4) Exemptions from the Order included (in addition to the goods mentioned in 14067 A) seagoing ships intended for commercial transportation of goods or passengers, tugs, and fishing vessels, equipment for such vessels, aircraft capable of carrying more than 10 passengers; livestock; and medical, surgical, dental, and veterinary appliances, equipment, and apparatus The exclusion of larger seagoing ships and aircraft meant that the new restrictions were directed at the purchase of smaller boats, ships, and aircraft for pleasure purposes.

[In the list of goods subject to hire purchase restrictions given on page 14333 (first column), the first series of items under the section "Deposit to remain at 15 per cent" should end with "clocks and watches," not "books and watches"]

Public Capital Expenditure Cuts.—*British Transport Commission.* The overall cut of £22,000,000 would be achieved by reducing expenditure (1) on British Railways, by £12,000,000 through economies on minor improvement schemes and by deferring the purchase of some new rolling stock; (2) on British Road Services, by £9,000,000 by deferring the purchase of new vehicles; (3) on "other smaller schemes," by £1,000,000. The cuts would not have any effect on the major development work on the modernization plan. As compared with this £22,000,000 cut, the recent wage settlement on the railways would cost £22,750,000 a year.

National Coal Board. The cuts of about £5,000,000 would be made by (1) reducing expenditure on "inherited ancillaries" such as coke-ovens and brickworks taken over from the coal owners, and (2) deferring some mining schemes which would not be expected to show a return for more than 10 years. Some of the long-term development would cease, whilst quick-return investment would continue.

Central Electricity Authority and Scottish Electricity Boards. The cuts of £13,750,000 would affect the construction of new power stations, reducing the completion of new generating plant in 1958 and 1959.

Post Office. The saving of £5,250,000 would be effected by spreading out some of the longer-term projects, but would not affect the arrangements for extending the telephone service in 1956.

B.B.C. and I.T.A. Dr. Charles Hill, the Postmaster-General, announced on Feb. 22 that both the B.B.C. and the I.T.A. had applied for consent to provide a second television programme, but that the Government had decided to defer consideration of this matter for two years; he added that such a postponement had the advantage that it should be possible by then to make a better assessment of the influence of current technical developments, including colour television. Dr. Hill also stated that the £1,500,000 cut in capital investment for broadcasting represented a reduction of the order of 20 per cent as compared with the original estimates, resulting in a slowing-down of the process of extending and improving existing services.

The Chancellor's statement led to a further improvement in the value of the pound, the official sterling-dollar rate closing at \$2.80 $\frac{11}{16}$ against an opening rate of \$2.80$\frac{1}{2}$. Transferable sterling in New York closed at \$2.77$\frac{5}{8}$—\$2.77$\frac{3}{4}$, against \$2.77$\frac{1}{2}$ - \$2.77$\frac{5}{8}$. Sterling remained firm on succeeding days, the official sterling - dollar rate rising to \$2.80$\frac{3}{4}$ by Feb. 21.

(Times - Daily Telegraph - Financial Times - Manchester Guardian) **(Prev. rep. 14332 A; Bank Rate, 14067 A.)**

A. IRISH REPUBLIC. — Creation and Functions of Gaeltacht Department of State.

A Bill setting up a special Department of State to promote the cultural, social, and economic welfare of the Irish-speaking areas of the Republic (the *Gaeltacht*) was issued in Dublin on Feb. 21. The new Department—known as the Department of the *Gaeltacht*—will encourage the preservation and extension of the Irish (Gaelic) language, and will consult with and advise other Departments of State on matters affecting the welfare and progress of the Irish-speaking areas. It gives the Government powers to define from time to time areas where the population is predominantly Irish-speaking and which ought for this reason to be included in the *Gaeltacht*. The Bill was printed in Irish and English, being the first Irish legislative measure to be printed in both languages.

The 1946 census showed that 588,725 people over the age of three years, or 21.2 per cent of the total population, were able to speak Irish as well as English. Only 40,000, however, spoke Irish habitually. Out of some 4,880 national schools in the Republic, only 486 use Irish as the medium of instruction. (Irish Times, Dublin)

B. CANADA. — Mr. Lester Pearson's Statement on Canadian Policy towards Communist China.

An important statement on Canada's attitude to Communist China, indicating that Canada might be moving towards recognition of the Peking regime and towards support for its representation in the United Nations, was made by the Secretary for External Affairs, Mr. Lester Pearson, in the Canadian House of Commons on Jan. 31.

Mr. Pearson stated that the Canadian Government had been re-examining its policy with regard to the recognition of Communist China, and had reached the conclusion that the policy which they had been following was the right one—"rejecting on the one hand immediate diplomatic recognition, but rejecting on the other hand the view that a Communist regime in Peking can never be recognized as the Government of China." After emphasizing that, although "moral considerations" were involved in the case of a "ruthless Communist regime," the decision was predominantly a political one to be taken "on the basis of enlightened self-interest," Mr. Pearson continued.

"It should not, however, be assumed that Canadian recognition of the Peking Government—even if it were to be granted at some time in the future—would extend to the island of Formosa. As we see it, the legal status of Formosa is still undecided, and no step taken *vis-à-vis* the Communist regime should prejudice that issue. In particular, we would not be a party to any action which handed over the people or Government of Formosa against their will to any mainland Government, let alone to a Communist Chinese Government.

"We condemn the cruelties and tyrannies of the Peking regime, and we continue to hope that the Chinese people will one day be governed by a more enlightened government of their own choice. But . . we must accept the fact of Communist control of mainland China That is one thing we cannot fail to recognize, with the corollary that in certain circumstances and in our own interests we may be obliged to deal—as we already have been obliged to do at Geneva and elsewhere—with that Government in respect of certain problems which cannot be solved without it. Nor should we . . . base our policy on the likelihood of the Nationalist Government of Chiang Kai-shek returning to power on the mainland Furthermore, the anomaly of that Government representing China at the United Nations, with a veto that can block any action desired by the other members, is becoming increasingly apparent I believe also that we should accept no commitment to intervene on behalf of the Nationalist Government in the struggle for the Chinese offshore islands.

"As for Formosa, the only commitment we have is that which might arise out of our obligations under the U.N. Charter. So far as diplomatic recognition is concerned, we should from time to time review the position in the light of conditions, of our own interests, and of the views of our friends and allies. However, I believe that we should not get ourselves into such an inflexible position that a change in policy, if it were to be considered wise and necessary, could be brought about only with maximum difficulty."

Mr. Pearson added that they must not let "this complicated and controversial problem of legal recognition" distract them from the longer-term issues raised by the emergence of Communist China as a new and powerful force in the world. "The consolidation and growth of Chinese power under Communist rule which is now taking place," he declared, "may be historically as important an event as the Russian Revolution of 1917." (Department of External Affairs, Ottawa) **(Prev. rep. 14117 A.)**

C. SOUTH AFRICA. — Exchange Control Measures.

The Finance Minister, Mr. Louw, announced on Feb. 21 that South Africa would not follow Britain by raising her Bank Rate, but would tighten up exchange controls to prevent investment funds from leaving the Union to secure higher interest rates in Britain. In future, South African residents would have to report their sterling holdings in the same way as their holdings of other currencies, and would not be allowed to transfer funds to London for the sole purpose of earning higher rates of interest. No restrictions, however, would be placed on the transfer of funds by South African residents for current commercial transactions, or for the purchase in London of South African shares quoted on the London Stock Exchange. The repatriation of capital by non-residents of South Africa would also be unaffected. Mr. Louw said that the new regulations would be administered "in a sympathetic spirit" and that exceptions would be allowed to prevent inconvenience to the public.—(Times - Financial Times) **(Prev. rep. U.K. Bank Rate, 14705 A; South African Rate, 14441 B.)**

D. UNITED KINGDOM. — Industrial Accidents.

The number of fatal industrial accidents (excluding accidents to seamen and fishermen) during 1955 was 1,351 (1,324 in 1954), comprising 480 in mining and quarrying, 700 in factories, foundries, engineering works, gas works, power stations, docks, and building operation, and 171 in the railway service. There were 209 fatal accidents among seamen and fishermen. (Ministry of Labour Gazette) **(Prev. rep. 14064 A; 14661 A.)**

A. ITALY. — Establishment of Constitutional Court.

After a deadlock lasting over two years, the Italian Parliament succeeded on Nov. 30, 1955, in electing five members of the Constitutional Court which, under the post-war Italian Constitution, will act as the highest tribunal in the country on all constitutional matters. The Constitution provided that the Court should consist of 15 judges—five appointed by Parliament, five nominated by the President of the Republic, and five nominated by the judiciary. Although the judiciary had earlier appointed its five nominees, President Gronchi had refrained from appointing the five presidential nominees until agreement had been reached on the five parliamentary nominees, for whose election a three-fifths majority was required in a joint session of both Houses.

Although joint sessions of the Italian Parliament had been held for this purpose in 1953 and 1954, party differences prevented any of the candidates from obtaining the necessary three-fifths majority At a joint session on Nov. 15-16, 1955, however, two parliamentary nominees were elected to the Constitutional Court after four ballots —Professor Ambrosini (professor of constitutional law in the University of Rome), whose candidature was sponsored by the Christian Democrats, and Professor Bracci (professor of administrative law in the University of Siena), who was sponsored by the Left-wing (Nenni) Socialists.

Further disagreements arose, however, on the election of the remaining three parliamentary nominees. Whereas the Christian Democrats claimed the right to a second nominee, the other parties of the Government coalition (Liberals and Republicans) claimed one of the three remaining nominations, whilst both the Left-wing and Right-wing groups (i.e. the Communists and Nenni Socialists on the one hand, and the Monarchists and neo-Fascist M.S.I. on the other) also demanded the right to nominate a candidate.

After several inconclusive ballots, followed by attempts at mediation by President Gronchi, and the Presidents of the Chamber and Senate, a compromise was eventually reached between the Government and Left-wing parties whereby the Christian Democrats agreed to support a Communist nominee, whilst the Communists and Nenni Socialists agreed to vote for candidates sponsored by the Government parties. When the Italian Parliament met in joint session on Nov 30, the Monarchists and neo-Fascists walked out before the vote was taken, protesting that the agreement between the Government and Left-wing parties would deprive the Right-wing parties of a nominee in the Constitutional Court.

The three remaining vacancies were then filled by the election of Professor Cappa, nominated by the Christian Democrats; Professor Cassando, nominated by the Liberals; and Professor Jager (professor of civil law at the University of Milan, and a Roman Catholic), nominated by the Communists. The five parliamentary nominees in the Constitutional Court therefore comprised two Christian Democrats, one Liberal, one "Nenni" Socialist, and one Communist.

The membership of the Constitutional Court was completed on Dec. 4, 1954, when President Gronchi nominated the following five members—Senator Enrico de Nicola, the first post-war President of the Italian Republic; Dr. Gaetano Azzariti, honorary president of the Court of Appeal; Professor Giuseppe Capograssi, professor of the philosophy of law in the University of Rome; Signor Giuseppe Castelli-Avolio, a member of the Council of State; and Professor Tommaso-Perassi, professor of international law in the University of Rome.

The Constitutional Court met for the first time in Rome on Jan. 23, 1956, and unanimously elected Senator de Nicola as its President. The court's headquarters are at the palace of the Consultà, once the seat of the Italian Foreign Office.

B. FRANCE. — M. Poujade fined for Slander.

M. Pierre Poujade was fined 500,000 francs (about £500) on Jan. 21 by a Paris court after having been found guilty of slandering M. Pierre Schneiter, the president of the former National Assembly.

The slander concerned allegations—made by M. Poujade on various occasions during the election campaign—that M. Schneiter, while sub-prefect of Reims at the end of the war, had murdered a woman and appropriated for his own use the sum of 6,000,000 frs. parachuted to the Resistance movement Similar allegations had been made against M. Schneiter by M. Léon Dupont, a prominent Poujadist, who had earlier been fined 400,000 frs. for slander, and M. Poujade's counsel claimed that his client had acted in good faith in repeating M. Dupont's charges. The court pointed out, however, that the allegations against M. Schneiter had been investigated earlier and had been proved to be completely false.

M. Schneiter (who did not claim any damages) was awarded nominal damages of one franc, with costs against M. Poujade. He was also given the right to choose five newspapers in which the court's judgment should be published. M. Poujade subsequently announced that he would appeal against the verdict. (Le Monde, Paris - Le Figaro, Paris)

(Prev. rep. M. Poujade, 14681 A; 14615 A.)

C. UNITED STATES. — Ford Motor Company. - Capital Reorganization and Public Sale of Stock.

The trustees of the Ford Foundation announced on Nov. 7 that the stock of the Ford Motor Company was to be reclassified and that shares would be offered to the public for the first time in the company's history. It was stated that the Foundation itself, which owned more than 88 per cent of all the outstanding shares, planned to make a public issue of about 15 per cent of its holdings "in order to diversify its investment portfolio," whilst members of the Ford family, at present holding all the voting rights, would surrender 60 per cent of these rights to the holders of the shares which would be offered publicly.

The existing stock of the company consists of 172,645 shares of voting "B" stock, all owned by members of the Ford family and family interests, and 3,322,395 shares of non-voting "A" stock. Of the latter, 3,089,908 are owned by the Ford Foundation, 190,347 by members of the Ford family and family interests, and 42,140 by 108 key employees of the company (who also have options to buy in instalments over the next three years some 101,000 additional shares). The entire stock will be reclassified in three types, each of which will have the same interests per share in earnings and assets, but will vary as to voting rights—viz, a new voting Common stock (having 60 per cent of the voting power), a new voting "B" stock (having 40 per cent of the voting power), and a new "A" stock without voting rights.

Each of the existing "A" shares will be exchanged for 15 new shares and each of the existing "B" shares for 21 new shares, making a total of 53,461,470 new shares The "A" shares owned by the Foundation will become new non-voting "A" shares, but will be converted into Common stock when sold to the public. The existing "A" shares owned by company employees will become shares of new voting Common stock, whilst the "A" shares owned by members of the Ford family and their interests will become shares of the new voting "B" stock. The existing "B" shares owned by the Ford family will be exchanged for new voting "B" stock

As a result of the public interest shown in the proposed share offer, the Ford Foundation subsequently decided to dispose of some 22 per cent of its holdings, instead of 15 per cent as originally planned; 10,200,000 shares were accordingly offered for sale on Jan. 17, 1956, at $64.50 a share. The offer was made by a syndicate of 722 underwriting houses and was immediately oversubscribed, each purchaser being limited to 200 shares. The offering—one of the largest to be made on the New York Stock Exchange—realized $657,900,000.

Data filed by the Ford Motor Company with the U.S. Securities and Exchange Commission, and published for the first time on Dec. 21, showed that the company had total assets of more than $2,400,000,000, making it the third largest manufacturing enterprise in the United States. [The first two are the General Motors Corporation and the United States Steel Corporation.] In its first published statement of annual earnings and dollar sales (Feb. 20) the company reported that its profits in 1955 were $437,000,000 on total sales of $5,594,000,000, and were equivalent to $8.90 a share; this compared with net profits in 1954 of $227,800,000 on net sales of $4,062,000,000. Production in 1955 reached the record level of 2,614,558 cars and lorries, compared with 1,990,020 in 1954.—(New York Times - New York Herald Tribune) **(Prev. rep. Ford Foundation, 14606 C.)**

D. UNITED KINGDOM. — Roll of Honour of Civilian War Dead placed in Westminster Abbey.

A Roll of Honour containing the names of 60,000 civilians killed in the United Kingdom by enemy action during the Second World War was placed in the custody of the Dean and Chapter of Westminster on Feb. 21 by the Duke of Gloucester, president of the Imperial War Graves Commission. The names of the civilian war dead (nearly 20,000 of whom were Londoners, and ranging from newly-born infants to centenarians) are inscribed in six bound volumes which will be placed in a Memorial Case near the Tomb of the Unknown Warrior. One volume, over which a light will burn continually, will lie open in the case and a page will be turned every day. A seventh volume, containing the names of civilians who lost their lives abroad or at sea, will be added later.

(Times - Daily Telegraph - Manchester Guardian)

E. SOVIET UNION. — Abolition of M.V.D. Tribunal.

The legal journal *Soviet State and Law* disclosed on Feb. 9 that the secret M.V.D. tribunal which could send people to forced labour camps had been abolished in 1953 after Stalin's death, and that all cases previously referred to it were being dealt with by the ordinary law courts. The tribunal had dealt chiefly with political offenders, and had power to pass sentences by administrative decree without calling for the appearance of the persons concerned. (Times - Manchester Guardian)

A. AUSTRALIA. — Nation-wide Dock Strike.

A strike of waterside workers broke out at Australian ports on Jan. 23 after the failure of negotiations between the shipowners and the Waterside Workers' Federation over the W.W.F.'s claim for increased pay. The stoppage, which lasted over three weeks, completely paralysed shipping movements at Australian ports and caused serious disruption of the country's economy, including the cancellation of wool sales, the suspension of wheat shipments, and heavy losses to fruit growers.

The Federation's original demand was for a pay increase of 1s ½d. an hour, as well as an increase in "attendance money"—i e. the amount (at present 16s. daily) paid to men who attend for work but are not allotted any The shipowners had offered 6d an hour more, conditional on the workers abandoning certain restrictions and speeding up the turn-round of ships They claimed that dockers' pay at the leading Australian ports averaged £18. 6s 4d. for a 32.7 hour week, and that the increase of 6d an hour offered by the shipowners would bring the average wage up to £19 6s 1d. weekly; moreover, by working two hours' overtime a man would be able to earn £29. 8s. 7d. for less than 36 hours' work

Mr. Menzies (the Commonwealth Prime Minister) appealed on Jan. 23 for a speedy resumption of work, and gave a warning of the "evil consequences for the Australian economy" which a prolonged strike would entail This appeal, however, proved fruitless, the W W F. refusing an offer by the employers to submit the dispute to arbitration On Jan 27 Mr Justice Ashburner, of the Sydney Arbitration Court, granted the shipowners' application for an order declaring the strike illegal, and on Jan. 31 the Federal Minister of Labour (Mr Holt) gave a warning that the Government would have to consider introducing emergency measures, including appropriate legislation, if the strike continued.

On the Federal Cabinet's invitation, a conference of representatives of the shipowners, the W W F , and the Australian Council of Trade Unions (to which the W.W.F is affiliated) took place under Mr. Holt's chairmanship on Feb 2. The employers insisted on the submission of the dispute to arbitration, and Mr. Holt accordingly proposed (1) that Mr Justice Ashburner should be invited to preside at a further conference with a view to reaching a mutually acceptable settlement which would be registered with the Arbitration Court, (2) that if a settlement could not be reached voluntarily, the parties should agree to Mr. Justice Ashburner's arbitration on the sum (not less than 6d an hour) to be awarded "as fair compensation for the W W.F.'s acceptance of the shipowners' conditions, or of such of them as the judge shall determine are proper", (3) that every effort should be made to resume work on Feb 6, and that the judge should be asked to proceed with the conference as soon as this had been done; (4) that the shipowners should agree that some increase in attendance money was justified, and Mr Justice Ashburner be requested to decide the amount as quickly as possible.

Although these proposals were accepted by the shipowners, they were rejected by the W W F. and the A.C T U. The W.W.F. offered to call off the strike if the shipowners would agree either (*a*) to an increase of 9d. an hour, or (*b*) to the submission of the dispute to a judge of the Arbitration Court as a "straight wage issue," asking him to award between 6d. and 1s. an hour but to exclude altogether the review of working conditions desired by the shipowners.

The Minister for Trade (Mr. McEwen), discussing the effects of the stoppage on Feb. 5, stressed that while Australia was running up bills for imports at the rate of about £A65,000,000 a month, goods intended for export were piling up on the wharves at the rate of £A2,000,000 a day. The strike was causing hardship and ruin to Australian industries, which could not get delivery of the imports they had already paid for, and could not export their products. Something like £A15,000,000 worth of orders for wheat and flour "looked like being lost" because exporters could not meet delivery dates; butter storages were overflowing; meat storages were full and abbattoirs were being shut down; and fruit was piling up in cold stores because the picking of fruit crops had already begun. The physical problem of clearing the wharves of incoming cargoes was so difficult that shipowners had been asked to prepare an emergency scheme for cargo handling. Wool sales had been cancelled since Feb. 2 because of the strike.

On Feb. 7 Mr. Holt announced that the Cabinet had completed plans to deal with the stoppage if a resumption of work did not soon take place. On that day, however, the executive of the A.C.T.U., after a meeting in Melbourne with W.W F. leaders, ordered the strikers to return to work immediately and then to apply to the Arbitration Court for an increase of not less than 6d. an hour. This order aroused strong opposition amongst waterside workers in some States (notably in Queensland), but on Feb. 11 the Federal council of the W.W.F. instructed its members to resume, and on Feb. 15 all the 27,000 strikers reported for work.

It was unofficially estimated that the stoppage (which involved 185 ships at 55 ports) had resulted in a loss to the strikers of £A.1,750,000 in wages and in a cost to the shipowners of nearly £A.8,000,000.—(Australian News and Information Bureau - Times) **(Prev. rep. 14188 D.)**

B. ISRAEL. — Arab Unit for Israeli Army.

Hundreds of Christian Arab volunteers from Nazareth, Tiberias, and other areas enrolled on Feb. 23 in the Israeli Army, of which they will form the first Arab unit. (Daily Telegraph)

C. ITALY. — New Ministers for the Budget and Treasury. - Death of Senator Vanoni.

President Gronchi signed decrees on Feb. 19 appointing Senator Adone Zoli as Minister of the Budget in place of Senator Ezio Vanoni, who had died on Feb. 16, and Senator Medici as Minister for the Treasury in succession to Signor Silvio Gava, who had resigned on Jan. 28 after disagreeing with the Government's acceptance of large-scale salary increases for civil servants.

Senator Vanoni (52), the author of Italy's ten-year plan and an eminent economist, collapsed and died in the Senate after making a speech defending the Government's economic policy. He had replied to a no-confidence motion, tabled by the Monarchists and the neo-Fascist M.S.I., which was rejected by 111 votes to 18, with 56 abstentions.

Ezio Vanoni was born on Aug 3, 1903, at Morbegno (Lombardy), and had a distinguished academic career at the University of Pavia, where he graduated in economics and finance. He became Professor of Economics in the University of Rome in 1939, after holding several academic posts, and entered Marshal Badoglio's Cabinet in 1943 as Commissioner for Labour and Commerce An active member of the Christian Democratic Party, he organized underground resistance in Rome during the German occupation, and was subsequently a member of the Consultative and Constituent Assemblies before his election to the Senate in 1948.

Senator Vanoni became Minister of Foreign Trade in 1947, and acted as economic adviser to Signor De Gasperi at the Paris Peace Conference. He was Minister of Finance in all the De Gasperi Cabinets between 1948 and 1953, and Minister of the Budget in the Scelba and Segni Governments. In 1955 he published his ten-year plan (the "Vanoni Plan") which was designed to increase Italy's national income by five per cent annually over the 10-year period, to eliminate unemployment, and to develop Southern Italy, Sicily, and Sardinia. He was also the author of important tax reforms.

Senator Zoli had been Minister of Justice under Signor De Gasperi and Minister of Finance in the Fanfani Cabinet. He became president of the Christian Democratic Party after Signor De Gasperi's death. Senator Medici had served as Minister of Agriculture in several post-war Cabinets.
(Giornale d'Italia, Rome - Corriere della Sera, Milan)
(Prev. rep. Segni Cabinet, 14320 A.)

D. UNITED KINGDOM. — British Transport Commission. - Traffic Receipts in 1955.

Traffic receipts of the British Transport Commission in 1955 totalled £642,730,000, compared with £645,416,000 (revised figure) in 1954. An increase of £9,268,000 in total passenger receipts from railways and bus services was more than offset by a drop of £12,314,000 in receipts from freight, parcels, and mails. Details are tabulated below, with revised 1954 figures shown for comparison.

	1955 £'000	1954 £'000	Increase or Decrease £'000
British Railways			
Passengers	117,987	116,381	+1,606
Parcels	41,927	40,708	+1,219
Merchandise and Livestock	106,020	110,627	−4,607
Minerals	48,955	45,900	+3,055
Coal and coke	119,063	115,706	+3,357
	433,952	429,322	+4,630
British Railways Collection and Delivery Services	12,252	12,137	+ 115
Road Passenger Transport			
Provincial and Scottish buses, coaches, trolley-buses and trams	54,113	50,735	+3,378
London Transport			
Railways	20,735	19,150	+1,585
Road Services	52,979	50,718	+2,261
Other Services			
British Road Services, Ships, Inland Waterways, etc.	68,699	83,714	−15,015
Total	642,730	645,776	−3,046

The decline in total receipts—the first since the Commission was established in 1948—was attributed to the further denationalization of road haulage and to the 17-day strike of locomotivemen in June. It was pointed out in the Press that without these factors a substantial increase in receipts could have been expected as a result of the increase in most charges during the year, whilst the Commission had also had the benefit of a full year's income from the higher charges which came into force in 1954.—(Financial Times) **(14139 A.)**

E. ALBANIA. — Amnesty Offer to Exiles.

It was announced in Tirana on Jan. 11 that the Presidium of the Albanian National Assembly had declared an amnesty, expiring on Dec. 31, 1957, for Albanians who had fled abroad after committing crimes "during the anti-popular [i.e. pre-war] regimes, the liberation struggle, or after." (New York Times)

A. MALAYA.—London Conference on Constitutional Development. - Agreement on Independence and Self-government within British Commonwealth by August 1957. - Breakdown of Meeting between Malayan and Singapore Chief Ministers and Communist Leader. - Withdrawal of Amnesty Offer to Terrorists.

A conference on the future constitutional development of the Federation of Malaya was held in London from Jan. 18 - Feb. 8 under the chairmanship of the British Colonial Secretary, Mr. Lennox-Boyd. The Malayan delegation, which was led by the Chief Minister (Tengku Abdul Rahman), consisted of four elected Ministers and four representatives of the rulers, whilst other participants in the conference included the High Commissioner of the Federation, Sir Donald MacGillivray, and representatives of the Colonial Office, the Treasury, the Ministry of Defence, and the Service departments.

A report published at the conclusion of the conference announced that a constitution providing for full independence and self-government for Malaya would be introduced " at the earliest possible date," and that " full self-government and independence within the Commonwealth " for the Federation of Malaya would be proclaimed, if possible, by August 1957. Every effort would be made by the British and the Federation Governments to achieve this by the time proposed. In the meantime, the Malayan Government would take over responsibility for finance, internal defence, and security, including the prosecution of the war against the Communist terrorists, whilst Britain would continue to have direct responsibility for the external defence and external relations of the Federation of Malaya.

The report emphasized that throughout the discussions on defence and internal security the conference had drawn a distinction between the interim period before self-government and the time when full self-government and independence was achieved. " We have framed our proposals for the interim period," it was stated, " so that, as well as reflecting the distribution of responsibility between H.M. Government and Malayan Ministers during that period, they will be capable of being continued into the stage of full self-government with the minimum of administrative and other disturbances." The conference agreed that during the interim period the member of the Government responsible in the Executive and Legislative Councils for matters of internal defence and security should be a Malayan Minister, to be known as the Minister for Internal Defence and Security.

The transfer of the administration of the local internal security forces would be put in hand forthwith, and new arrangements would be made for handling operations during the remainder of the emergency. It was agreed in this latter connexion that it was consistent with the present stage of political development of the Federation that there should be some change in the arrangements for concerting the operations of the armed forces, the police, and the civil departments and agencies concerned. To this end, the present committee, of which the Director of Operations was chairman, would be replaced by an Emergency Operations Council with the Minister for Internal Defence and Security as chairman, and including the Director of Operations among its members. The armed forces required for the prosecution of the emergency would remain under the operational command of the Director of Operations and would be used to aid the civil authorities in giving effect to the directions of the Emergency Operations Council. Both the Emergency Operations Council and the post of Director of Operations would cease to exist when the emergency ended.

The administration of the armed forces of the Federation would be separated from that of the U.K. forces, for which purpose a Federation Armed Services Council would be set up under the Minister for Internal Defence. This would be a permanent body, distinct from the Emergency Operations Council and broadly corresponding to the Army and Air Councils in Britain.

During the interim period before full self-government, the British Government would retain in the Federation the forces which it considered necessary for external defence and " for the fulfilment of Commonwealth and international obligations." There would be consultation between the British and Federation Governments on all matters arising out of the stationing of British or Commonwealth forces in the Federation, and the Federation Government would be informed in advance of any proposed substantial changes in the size or character of those forces. At the end of the interim period, when the Federation became responsible for external defence as well as for all other duties of government, a mutual defence assistance treaty would be concluded between Britain and Malaya, under which Britain would retain the right to keep in the Federation the forces needed for fulfilling her international obligations. Details of this treaty would be worked out by a working party, which would be set up in the Federation under the chairmanship of the Commissioner-General for South-East Asia and with Australian and New Zealand observers.

The report also made a number of recommendations for the administration of the police during the interim period, and for its " Malayanization." Operational control of the police during this period would be the same as for the Federation's armed forces.

Responsibility for all financial matters, including foreign exchange, would be immediately transferred to a Malayan Minister of Finance, who would take over from the present Financial Secretary. Malaya would remain in the sterling area after attaining full self-government, would have responsibility for exercising restraint in dollar expenditure, and would encourage overseas investment The British Government recognized that financial aid from the U.K. was needed during the emergency if the Federation Government was to undertake a programme for social and economic development, and a conference would be held as soon as possible to decide what aid was necessary. If the emergency had not ended by the time self-government was attained, the British Government would be prepared to consider special assistance in meeting the cost over and above " the substantial assistance which will continue to be given through the forces."

Further recommendations dealt with the future organization of the public services, and provided for the setting-up of a Public Services Commission. The report recognized, however, that control of these services would be exclusively the concern of the Federation Government. Recommendations in principle were made about the compensation of officers retiring after the " Malayanization " of the services. The conference also considered a Malayan request for the withdrawal of the British Advisers to the Malayan Rulers It was stated in this connexion that it was the collective view of the Rulers that the time had come when these Advisers should be withdrawn, and that the British Government had not opposed this view.

Malayan and Singapore Premiers' Meeting with Chin Peng.

In accordance with the suggestion made in September by Chin Peng, secretary-general of the Malayan Communist Party and leader of the terrorists, a meeting to arrange for a possible ending of the hostilities in Malaya took place at Baling, some 20 miles from the Siamese border, on Dec. 28-29. Those taking part were the Chief Ministers of Malaya and Singapore, Tengku Abdul Rahman and Mr. David Marshall, and the leader of the Malayan Chinese Association, Sir Cheng Lock Tan, on the one side; and Chin Peng and two other Communist leaders—Abdul Rashid bin Maiden and Chen Tian—on the other. A cease-fire was ordered on Dec. 22 in an area of some 400 square miles around the site of the talks, and remained in force until ten days after the talks had concluded. The talks broke down, however, over Tengku Abdul Rahman's insistence on the dissolution of the Communist Party, and on the Communists' refusal to accept an investigation of their loyalty to Malaya after the cessation of hostilities, as had been demanded by the two Chief Ministers.

According to an account of the meeting given by the Government side, Tengku Abdul Rahman had emphasized that he and Mr. Marshall were the elected representatives of the people of the Federation and Singapore, and were neither the mouthpieces nor " stooges " of the British Government. The Communists had replied that they fully realized this, and had asked for recognition of their party if they ceased hostilities Tengku Abdul Rahman, however, had refused this request and had insisted that the Communist party would have to be dissolved—though he had given an assurance that, once freed from any detention to which party members might become liable after investigation, they could enter political life in some form or other

On the question of detention, the initial Communist standpoint had been that those who laid down their arms should go entirely free and have the right to join existing parties. Tengku Abdul Rahman had insisted that the people of Malaya could not accept this position, and that some detention and investigation would be required. Former terrorists who undertook to be loyal to Malaya and to refrain from Communist activity would be freed, except for possible restriction of residence and an obligation to report to the police, once allowed to " rejoin society " they might join existing parties or form new ones, provided these were not Communist. Those wishing to return to China would be repatriated.

The Communists' refusal to accept a loyalty investigation after the cessation of hostilities was based on the argument that it would imply that they had surrendered. This, they declared, they would never do, and they would rather continue the struggle " to the last man." Nevertheless, a statement issued by the Communists on the second day of the talks stated . " As soon as the elected Government of the Federation obtains complete control of internal security and the local armed forces, we will end hostilities, lay down our arms, and disband our forces. This does not amount to accepting the present amnesty terms."

Prior to the talks, the Malayan Communist Party, in letters sent to Malayan newspapers on Dec. 24, had put forward an eight-point " united front " programme.

This called for the cessation of hostilities by negotiations, and the abolition of the emergency regulations; independence for Malaya; reform of the political system; guarantees for all Malayan citizens of " democratic rights " in their religious and political beliefs; equality of the sexes; improvement of culture, education, health and welfare; development of industrial production; and support for world peace.

The letters also announced that the central committee of the party had elected a Malayan, Musa Bin Ahmad, as its new chairman and an Indian named Balan as its vice-chairman.

Following the breakdown of the talks, Tengku Abdul Rahman announced in a broadcast on Dec. 30 that, with the concurrence of the High Commissioner and the Director of Operations, the amnesty offered to the terrorists in September would be ended on Feb. 8, 1956, and that the war against them "must be intensified." "I have no intention of meeting the Communist leader again," he declared, "unless the Communists indicate beforehand their desire to see me in order to make a full and complete surrender. I regret having to resort to this course of action, but my Government and my party are convinced that no half-measures would ever bring to an end this struggle which has been going on for the past eight years."

Tengku Abdul Rahman said that the Malayan people were "sick and tired" of the state of emergency, but that the Communist leaders had turned down the Government's offer to end the struggle, thus indicating that "our ideology of peace and goodwill cannot exist side by side with their ideology of violence and hatred" "The war must be intensified until one or other must give in," he declared, "and it is certain that I will not give in and betray the Malayan people So the Malayan Communist Party must give in. . . "

On Feb. 22, on his return from the London conference, Tengku Abdul Rahman broadcast a personal appeal to Chin Peng to surrender. He said that as Malaya was now to be granted control of internal defence and security the Communists should honour their pledge, made at the Baling meeting, to lay down their arms.

Terrorist Activities. - Operations by Security Forces.

Terrorist activities continued throughout the period mid-November to mid-February, three Europeans being killed in various incidents—an Army officer, a police officer, and a rubber planter. As announced by Tengku Abdul Rahman, the amnesty offer to the terrorists was terminated on Feb. 8; it was announced that 73 terrorists had surrendered under the offer, but that over 3,000 were still at large.

Eleven terrorists were killed and one wounded on Dec 13 in the Ulu Langat area of Selangor, in what was considered to be the greatest single success of the security forces in the past four years A terrorist permanent camp was wiped out in the operation, one of the terrorists killed being Chang Lo, secretary of the Selangor State Committee of the Malayan Communist Party. On Jan. 13 Second-Lieut Bolam was killed and a soldier in his platoon wounded in an operation near Kuala Lumpur, a police officer, Lieut. Hughes was killed in a terrorist ambush in Johore on Jan. 24; and Mr. Richard MacVeigh, an assistant estate manager, was killed in an ambush in the Kulai district of Johore on Feb 1. On Feb 15 a gang of about 30 terrorists killed six Malay special constables in Perak State, near the new village of Langkap, by exploding a land-mine. Thirteen terrorists were killed near Kluang (Johore) on Feb. 21 in a successful R.A.F. air strike against a Communist camp, their bodies being subsequently found when the area was occupied by British and Fijian troops.

Tengku Abdul Rahman was given an enthusiastic welcome by all Malayan communities on his return from the London conference. In a speech at Malacca on Feb. 20 he thanked Britain for granting independence and self-government to Malaya, whilst on returning to Kuala Lumpur later in the day he announced his intention of calling a conference of all Commonwealth countries and territories progressing towards independence, to be held in Kuala Lumpur in May or June; he stated that the countries to be invited would include the Gold Coast, Nigeria, the Caribbean islands, and Singapore. On Feb. 21 the Malayan Premier announced that Britain would pay for the raising of two more battalions of the Malay Regiment, and that the Federation must also have an air force and a navy to defend its long coastline.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Malaya, 14563 A.)**

A. GOLD COAST. — New Railway.

The new rail link from Achiasi to Kotoku (see 13622 E), virtually revolutionizing the Gold Coast rail system and nearly halving the distance between Accra (the capital) and Takoradi (the chief port)—from 367 miles to under 200 miles—was officially opened on Feb. 1. It was built in 2½ years by the British firm of Taylor, Woodrow Ltd.

The line, driven through dense forest, bush, and swamp, involved the clearance of over 2,250,000 cubic tons of earth and nearly 1,000 acres of forest, in some parts of which trees 200 ft. high and 36 ft in girth formed an almost impenetrable wall. The work also involved the construction of seven bridges ranging from 30 ft. to 240 ft.; seven intermediate stations between Achiasi and Kotoku; and many cuttings, some more than 40 ft. deep.

In addition to speeding communications between the eastern part of the Gold Coast, where the Volta River development scheme is in progress, and the western part, where the £5,000,000 extensions to Takoradi harbour are nearing completion, the new line will make it possible to open up the rich area through which it passes.—(Times) **(Prev. rep. Rail Project, 13622 E; Volta River Scheme, 12846 A; 12645 A.)**

B. ATOMIC ENERGY. — British and U.S. Firms to co-operate in Building of Nuclear Plants. - First Privately-owned Reactor in Britain. - Anglo-Indian Co-operation in Peaceful Uses of Atomic Energy.

It was announced in London and New York on Feb. 14 that a British and an American company—Mitchell Engineering Ltd., of London and Peterborough, and A.M.F. Atomics Inc., of New York—had agreed to co-operate in designing and building nuclear power plants in the British Commonwealth and other countries. The agreement was the first of its kind between firms in different countries, and was sanctioned by the U.K. Atomic Energy Authority and the U.S. Atomic Energy Commission.

The chairman of the British company (Mr. F. C. Mitchell) stated that Mitchell Engineering and A.M.F. Atomics were prepared to quote for nuclear power plants "in practically the whole world," and described the agreement as "the first practical expression of Anglo-American policy to encourage the peaceful uses of atomic energy at home and abroad." He said that the "water-cooled" type of reactors to be developed would be particularly useful in South Africa, since they would overcome the problems of hauling coal and oil over long distances, moreover, they could be operated on the natural uranium which South Africa possessed in large quantities. Mr. Mitchell disclosed that the nuclear power plants would be built wholly underground, the only buildings on the surface being the control room and the fuel-handling room.

The chairman of A M F Atomics (General Bedell Smith) described the agreement with Mitchell Engineering as "the first international agreement made by private industry to fulfil the promise of President Eisenhower's atoms-for-peace speech before the U.N. General Assembly" (see 13285 A) He added: "We have every hope that this venture will result in the development of industry and agriculture in areas of the world now without adequate power, and in areas where power costs are prohibitive"

It was also disclosed on the same day that Britain's first privately-owned nuclear reactor would be built at Aldermaston (Berkshire) by Associated Electrical Industries.

The reactor, known as "Merlin" (medium energy light-water-moderated industrial research reactor) will be of the "swimming-pool" type and will use enriched uranium fuel provided by the U.K Atomic Energy Authority. Apart from its use by the companies associated with A E I., it will be used for research and training purposes by the universities (Oxford, London, Birmingham, Reading, and Southampton being mentioned particularly) and technical colleges. "Merlin"—which is claimed to represent a new departure in the development of atomic energy—will be built by the A E I.-John Thompson Nuclear Energy Company, subject to planning permission, and is expected to be fully operational by the end of 1957. Output in thermal power will range from one to five megawatts.

It was announced in London and Delhi on Dec. 23, 1955, that discussions between the U.K. Atomic Energy Authority and the Indian Department of Atomic Energy had resulted in an agreement for "close co-operation and mutual assistance between the Authority and the Department in the promotion and development of the peaceful uses of atomic energy." The agreement provided (1) that members of the staffs of both bodies would consult and work together on mutually agreed topics; (2) that the U.K. Atomic Energy Authority would provide the Indian Dept. of Atomic Energy with enriched uranium fuel elements for a "swimming pool" reactor under construction at Bombay; and (3) that the Authority would also assist in the design and construction of a high-flux reactor which might be built in India at a later date.
(Times - Manchester Guardian - New York Herald Tribune - The Statesman, Calcutta) **(Prev. rep. 14691 A; 14416 A.)**

C. UNITED STATES. — Relaxation of Restrictions on Trade with Soviet Union and Eastern Europe.

The U.S. Secretary of Commerce, Mr. Weeks, announced on Nov. 3, 1955, that the regulations applying to exports of non-strategic goods to the Soviet Union and Eastern Europe were to be relaxed by the end of the year and brought into line with those applying to Western European countries. He stated that the relaxation was being made in accordance with Mr. Dulles's promise at the Geneva Conference on Oct. 31 (see page 14545, second column), and was "designed to carry out further the objectives—urged by President Eisenhower at the Geneva 'summit' conference—to create conditions which will encourage nations to increase the exchange of peaceful goods."

A U.S. State Department official disclosed on Dec. 7 that Mr. Dulles, in a private discussion with M. Molotov at Geneva on Nov. 13, had referred to the "rather large surpluses" in the U.S.A. and to the possibility of trade in non-strategic goods with the Soviet Union. The official added that M. Molotov had made no response and that the matter had been dropped.

A. MALTA. — Referendum on Integration Proposals. - Majority for Union with Britain. - Nationalist and Constitutional Parties' Opposition to Integration. - Nationalist Boycott of Referendum. - Referendum opposed by Archbishop of Malta. - Additional Guarantees demanded by Roman Catholic Church.

The referendum on the Maltese Government's proposals for integration with the United Kingdom, including Maltese representation at Westminster, was held on Feb. 11-12 with the following result:

In favour of integration	67,607
Against integration	20,177
Invalid votes	2,559

Out of the total electorate of 152,823 (of whom some 80,000 were women), 90,343 voted in the referendum—just over 60 per cent, compared with 82 per cent at the general election held in 1955. Of the total votes cast, approximately 75 per cent were in favour of integration and 27 per cent against, although the pro-integration vote was only 45 per cent of the electorate as a whole. It was commented by press correspondents that the votes in favour of integration were almost identical with the total of votes (68,000) cast for the Malta Labour Party at the general election, which was fought primarily on the integration issue.

As described below, the Malta Nationalist Party had called upon its supporters to boycott the referendum, whilst the Roman Catholic Archbishop of Malta (Mgr. Michael Gonzi) had asked for a postponement of the referendum—a request which was rejected by Mr. Mintoff, the Prime Minister—on the ground that the traditional position of the Roman Catholic Church in Malta was not sufficiently guaranteed by the integration proposals. The figures showed that over 62,000 voters, or approximately 40 per cent of the electorate, had abstained from voting.

Political developments in Malta between the publication of the report of the Round-table Conference (see 14589 A) and the referendum are described below under cross-headings.

Nationalist Party's Boycott of Referendum.

The leader of the Nationalist Party, Dr. Borg Olivier, called upon his supporters on Jan. 19 to boycott the referendum. At the same time he issued a statement—copies of which were forwarded to British Ministers and M.P.s, the Prime Ministers of all Commonwealth countries, and all non-Communist members of the United Nations—complaining of the conditions in which the referendum was to be held, and setting forth his party's objections.

Dr. Olivier said that the Nationalist Party objected to the referendum for the following reasons, among others:

(1) The Maltese Government had "rushed" the Referendum Bill through the Legislative Assembly without allowing sufficient time for proper discussion. The Opposition had therefore withdrawn from the Assembly because they were "unwilling to assist in a measure that would denationalize Malta and put an end to the legitimate aspirations of the Maltese people."

(2) Mr. Mintoff's decision to hold a referendum before the report of the Round-table Conference had been debated by the British House of Commons, and before any agreement had been reached with H M Government, was a denial of the promises made in his party's electoral manifesto.

(3) As illiterate voters—of whom there were a great number—would be able to cast their votes through "persons of trust," these latter persons would be able to exercise undue influence at the ballot, moreover, voting through "persons of trust" was calculated to lead to intimidation. [The electoral regulations laid down that persons who were illiterate or physically incapacitated could vote by proxy through "persons of trust."]

(4) Neither the U.K. nor the Maltese Governments were making any attempt to explain to the electorate that "integration and representation" was by no means a pre-requisite of British financial and economic assistance to Malta.

(5) The Maltese Government (it was alleged) had monopolized the island's broadcasting system to put forward its own views, and had denied similar propaganda facilities to the Nationalist Party.

Dr. Olivier declared that a referendum in existing circumstances would be "a mockery of democratic principles," and that his party would therefore refuse to recognize the result of the referendum, whatever it might be. He added that a referendum, if held at all, should take place under the supervision of an independent commission chosen from member-States of the Commonwealth, or otherwise selected and agreed to by all the parties concerned.

The Maltese Commissioner-General in London (Mr. Ellul) issued a statement on Jan. 24, on behalf of the Maltese Government, repudiating Dr. Olivier's allegations, and describing the Nationalist Party's boycott as "a declaration of political bankruptcy" and "a clear admission of defeat."

Denying the Nationalist charge that the Referendum Bill had been "rushed" through the Legislative Assembly, Mr Ellul said that the Government had allotted five sittings for its discussion and had offered to extend the normal time of sittings—a proposal declined by the Nationalists Far from being a "plot to denationalize Malta and put an end to the legitimate aspirations of the Maltese," as Dr. Olivier had alleged, the referendum would in fact give every Maltese an opportunity of saying what his own legitimate aspirations were

As regards the "persons of trust" provision, to which Dr Olivier had also taken objection, Mr. Ellul pointed out that it had been adapted from the Saar referendum law, and was designed solely to enable illiterates and the physically incapacitated to record their votes. To allay *bona fide* fears of misuse, however, the Government had now amended the regulations so as to provide that two assistant commissioners would be present at every polling station to cast the ballots of illiterate or incapacitated voters who were unable to do so for themselves, such voters, if they wished, could be accompanied by their own "persons of trust" who would be enabled to watch the assistant commissioners and see that the ballot was cast in accordance with the voter's directions.

With regard to Dr. Olivier's assertion that Mr. Mintoff had departed from the promises of his own election manifesto, Mr. Ellul pointed out that in February 1955 (when the manifesto was issued) it could not be known that the U K Government would decide to appoint a Round-table Conference That conference had recommended in its report that Maltese representation at Westminster should be conceded if the Maltese showed they wanted it, and it therefore followed that the people should express their views beforehand

Constitutional Party's Opposition to Integration.

The leader of the Progressive Constitutional Party, Miss Mabel Strickland, issued a statement on Jan. 5 viewing "with deep misgivings the manner in which the Maltese Government propose to conduct the referendum," and asserting that the referendum was being "organized and controlled by an interested party [i.e. the Malta Labour Party] and rushed through ahead of decisions in Great Britain, leaving the Maltese people in blinkers."

Miss Strickland said that her party "consider it to be in the best interests of Britain and Malta to live and work side by side with each other, but not as part of each other's legislatures." She added, *inter alia*, that it was a "fundamental plank" in her party's policy that the Maltese people should enjoy their own autonomy, as laid down in the Declaration of 1802 (see page 14594, first column); that U K. "interference" in Malta's domestic affairs would be increased if Maltese M P.s sat at Westminster, and that British economic aid could still be granted to Malta "regardless of which party is in office, and without political integration with all its pitfalls" After declaring that the referendum law was "open to wide abuse," Miss Strickland said "If the referendum is to have any national significance, it must be held in a manner which will secure the trust of all Maltese electors. To do this, the referendum should be conducted by a joint U.K.-Maltese commission on which Commonwealth representatives should be invited to sit."

Miss Strickland instituted legal proceedings on Jan. 11 against the Governor of Malta (Major-General Sir Robert Laycock) and the referendum commissioners in which she asked the Civil Court to declare that the warrant issued by the Governor fixing the dates for the referendum was outside the power of his commission, and therefore null and void. She alleged that no such power had been confided to the Governor, either in the Letters Patent creating his office or under Royal instructions, and therefore contended that the referendum commissioners should be "restrained from further purporting to conduct a referendum as at present devised." Sir Robert Laycock filed a counter-application pleading that a Maltese law of 1828 granted immunity to the Governor in all temporal matters, thereby making it clear that the Governor could not be subject to the jurisdiction of the local courts.

In a ruling given on Jan. 19 by Mr. Justice Magri, the Civil Court upheld the Governor's plea and rejected Miss Strickland's application that the referendum should be declared *ultra vires*. Miss Strickland appealed against this verdict to the Court of Appeal, which, however, upheld the Civil Court's verdict and dismissed Miss Strickland's appeal with costs. On Jan. 27 the Court of Appeal disallowed Miss Strickland's request for leave to appeal to the Privy Council, whereupon she withdrew her action.

Attitude of Roman Catholic Church.

Monsignor Gonzi, the Roman Catholic Archbishop of Malta, visited Rome on Jan. 17-18 for discussions with the Papal Pro-Secretary of State, Mgr. Tardini, on questions relating to the position of the Roman Catholic Church in the new situation created by the proposal for integration between Malta and Britain. In a pastoral letter on Jan. 22, Mgr. Gonzi called for assurances that the position of the Roman Catholic Church in Malta would remain unchanged in the event of integration, and expressed fears that no concrete agreement on this matter had been reached.

A special issue of the Government *Gazette* was published in Valetta on Jan. 24 containing the text of correspondence exchanged between Mr. Mintoff, Mgr. Tardini, and Mgr. Gonzi.

Mgr. Tardini, in a letter to Mr. Mintoff, said that the Holy See was "not concerned with the purely political aspect of the proposed integration" but attached importance "to the preservation of the *status quo* which the Catholic Church has enjoyed for centuries." "The [Papal] Secretariat of State," he added, "was caused certain anxiety by a declaration which your Excellency is said to have made in London on Sept 19 last, before the Round-table Conference—namely, that when integration came into force the British Parliament would have power to legislate not only in matters of defence and foreign relations, but also in matters of social services and education..."

After recalling that Mr Mintoff had sent an *aide-mémoire* to the Vatican stating that "any future integration would not in any way affect the position or interests of the Catholic Church (such as, for example, marriage, the family, schools, and education), the *status quo* of which would accordingly not be modified," Mgr. Tardini remarked

"What will be in practice the nature, characteristics, and limits of the said integration can only emerge from the instruments which define and promulgate it, as also from any official declarations which may accompany it It is therefore necessary that these instruments . . should contain assurances and guarantees which, in harmony with the praiseworthy intentions referred to above, will guarantee the preservation of the *status quo* as far as the Catholic Church in Malta is concerned in such a manner that the religious interests of the Catholic people shall remain absolutely unprejudiced"

Mr. Mintoff and other Ministers sent a letter to Mgr. Gonzi—in reply to the Archbishop's pastoral letter—reassuring him that integration would not involve any deterioration in the position of the Roman Catholic Church In reply to the Archbishop's fears (expressed in the pastoral letter) that the presence of Maltese M.P.s at Westminster might imply that the British Government would have greater powers to interfere in Church matters, Mr. Mintoff stressed that it would be one of the most important duties of the Maltese members "to ensure that no such interference would take place"

The British Colonial Secretary (Mr. Lennox-Boyd) was asked in the House of Commons on Feb. 1 by Mr. James Griffiths (Lab.) whether he would "give an assurance that H.M. Government accepted and supported the assurances given to the Archbishop of Malta by representatives of the Malta Round-table Conference, as set out in paragraph 79 of the report." [This paragraph gave assurances to the Roman Catholic Church in Malta.]

Mr. Lennox-Boyd replied. "I have read the pastoral letter of the Archbishop of Malta with the attention and respect that any pronouncement from him is bound to command It would be unworthy of the importance of the issues we have to decide if his Grace's words were misinterpreted by protagonists of either side in the controversy over integration. I would remind the House of what the Prime Minister said on Nov 10 to the member for Brighton, Pavilion [Mr. William Teeling, C]. 'My hon. friend can be assured that H.M. Government will take no action to prejudice the position of the Roman Catholic Church in Malta'

"I feel sure that the House, when it comes to debate the report [of the Round-table Conference], will pay very great attention to the views on this matter of the members of the conference, which was representative of all parties in this House. I can moreover assure the House that H M Government will not commend to Parliament any proposals which run counter to the assurances given to the Archbishop of Malta by representatives of the Round-table Conference as set out in paragraph 79 of the report."

Mr. Hugh Gaitskell (Leader of the Opposition) and **Mr. Clement Davies** (leader of the Liberal Party) welcomed the Colonial Secretary's statement and fully endorsed the assurances given to the Archbishop of Malta in the report of the Round-table Conference

In reply to a question by **Mr. Teeling** (C.), who had recently visited Malta and seen Mgr. Gonzi, **Mr. Lennox-Boyd** said: "Clearly steps will have to be taken, if the House is in favour of integration, to put into concrete form the assurance I have given, but I hope that what I have said will be regarded as an adequate assurance. It is not, of course, possible to formulate written guarantees in connexion with new constitutional documents in advance of a decision by the House that such documents should be prepared"

Mr. Mintoff and all other Maltese Ministers issued a statement on Feb. 2 noting Mr. Lennox-Boyd's declaration "with deep satisfaction," and stressing that "the Maltese Government are at one with the Church in their desire to secure from H.M. Government at the appropriate time satisfactory guarantees for the Catholic people in Malta."

Despite these assurances, a resolution was adopted unanimously on Feb. 3 by all Roman Catholic organizations in Malta —including Catholic Action, the Legion of Mary, the Young Christian Workers, and the Knights of St. Columba, with a total membership of about 30,000—asking the population "not to vote in favour of integration in the forthcoming referendum unless the Church declares herself satisfied with the constitutional guarantees which she has asked for and which have not been granted." The resolution said that it "appears clearly," both from Mgr. Gonzi's pastoral letter and from Mgr. Tardini's letter to Mr. Mintoff, "that if the integration proposals were to be accepted without the guarantees which the Church demands, faith and Catholic morals in Malta would be endangered."

On Feb. 5 Mgr. Gonzi asked Mr. Mintoff to postpone the referendum, since he was not yet satisfied with the assurances and guarantees given by the British Government about the position and privileges which the Roman Catholic Church would enjoy in Malta if the integration proposals were carried out. It was understood that the Archbishop sought specific guarantees, in writing and in detail, with regard to religion, family life, marriage, and education.

The Special Correspondent of *The Times* in Malta wrote (Feb. 5): "The Church authorities, besides fearing Maltese secular influences, fear the possibility of the infiltration of Protestant influence and of British practices in such matters as marriage laws, for example. It consequently seems probable that, before withdrawing his opposition to integration, the Archbishop will seek assurances not merely of British non-interference in Maltese religious affairs but guarantees that the Church's existing rights in Malta shall be substantially preserved Thus the constitutional document by which integration would be brought about would become the guarantor of the Church's position and privileges, rather than a Maltese Government which might not maintain this position unchanged for all time..."

Mr. Mintoff announced on Feb. 7 that he had examined the Archbishop's suggestion "on its merits" and "in a spirit of conciliation," but had come to the conclusion that the postponement of the referendum "would not only not be in the best interests of Malta but might actually prejudice the very purposes his Grace and we alike have so much at heart."

After emphasizing that the most explicit assurances had been given by the British Prime Minister, the Colonial Secretary, and the leaders of the British political parties that there would be no interference "in matters pertaining to our religion or to our Church" Mr. Mintoff declared that the Roman Catholic Church had "unofficially thrown its entire weight and influence against the Malta Labour Government and all it stands for." He alleged that certain members of the clergy and lay organizations had issued circulars "couched in the most intemperate language, abusing the Prime Minister personally and inciting members to open hostility against the [integration] proposals."

In a broadcast on Feb. 9 (subsequently read in all Maltese churches) Mgr. Gonzi accused Mr. Mintoff of having "declared war on the Church" and of "vulgar insinuations against the authority of the Church and the clergy." He asserted that the island would have had "peace" had the referendum been postponed, and said that the Government had missed a great opportunity. Mr. Mintoff, in an eve-of-the-poll broadcast on Feb. 10, denied that he had "declared war" on the Church, and said that the Archbishop's "violent outburst" was concerned with matters "which have nothing to do with our faith as Catholics." After emphasizing that Britain had never interfered in Maltese religious matters since she assumed sovereignty over the island in 1801, Mr. Mintoff reiterated that the British Government had given full assurances, both to the Vatican and to the Archbishop, that all matters pertaining to the Church would be left in Maltese hands after integration.

Post-Referendum Statements.

Mr. Mintoff declared on Feb. 14 that the referendum had shown that "a clear and unmistakable majority" of the people favoured integration, and expressed his pleasure at "the rock-steady support of the Malta Labour Government's plan for union with Britain." He added that "although voting took place in regrettable and exceptional difficulties, the votes in favour of integration were the same as those which assured our victory at the last general election." Dr Borg Olivier, however, said that the referendum had shown "the people's lack of confidence in integration," and demanded that the plan should be "dropped forthwith," whilst Miss Strickland said that it was "quite impossible to integrate on such terms." A spokesman for Mgr. Gonzi said that the referendum was "not a clear and unmistakable expression of the wishes of the people which the Round-table Conference stipulated."

Seven British M.P.s accepted an invitation from the Malta Government to visit the island as independent observers of the referendum. They comprised three Conservatives (Sir Roland Robinson, Mr. Biggs-Davison, and Mr. Patrick Wall), three Labour members (Mr. James Callaghan, Mr. Roy Jenkins, and Mr. Mellish) and one Liberal (Mr. Grimond).—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Malta, 14589 A.)**

A AUSTRIA. — Membership of Council of Europe.

The Austrian Federal Chancellor (Herr Raab) announced on Feb. 21 that Austria intended to join the Council of Europe as its fifteenth member.—(Wiener Zeitung)

(Prev. rep. U.N. Membership, 14637 A.)

A. INDIA. — Nationalization of Life Insurance. - Preparatory Taking-over by Government. - Proposed Compensation Terms. - Creation of State Life Insurance Corporation.

The Government of India promulgated an Ordinance on Jan. 19 providing for the taking-over, with immediate effect, of all life insurance business in India as a preparatory step towards its nationalization. The Ordinance, which applied also to the foreign business of Indian insurance companies and to the Indian business of foreign insurance companies, provided that firms which conducted life insurance business only should be taken over in their entirety. As regards general insurance companies, however, their general business would be unaffected and would continue to be managed as at present, although their life insurance business would be taken over. In all the businesses taken over, the existing managements would continue in office pending the appointment of Government custodians; they would act, however, as Government agents and would have no authority to make investments.

The nationalization proposals affected 109 Indian and three foreign companies doing purely life assurance business, and 40 Indian and 13 foreign companies doing both life assurance and general insurance business.

Sir Chintaman Deshmukh (the Indian Finance Minister) said in a broadcast the same evening that the nationalization of life insurance would be "another milestone on the road the country has chosen in order to reach its goal of a socialist pattern of society," and "a further step in the direction of a more effective mobilization of the people's savings." He stated that "reasonable compensation" would be paid for the businesses taken over.

After emphasizing that the nationalization of life insurance was a "vital part" of the planned acceleration in investment under the Second Five-year Plan, Sir Chintaman Deshmukh said that some 5,000,000 policies were at present in force, paying annually premiums amounting to Rs 550,000,000. Life insurance assets amounted to roughly Rs. 3,800,000,000, from which the companies derived a net income of about Rs 120,000,000 annually. Total insurances in force exceeded Rs. 10,000,000,000, or a little over Rs. 25 a head, and he was in complete agreement with a recent claim made by private enterprise that business could be increased to Rs. 80,000,000,000 and *per capita* insurance to Rs. 200.

Explaining why the Government had decided against taking over general insurance, the Minister said that the consideration which had influenced them most was the basic fact that general insurance was "part and parcel of the private sector of trade and industry" and functioned on a year-to-year basis; errors of omission and commission in the conduct of its business did not directly affect the individual citizen. Life insurance, on the other hand, directly concerned the individual citizen "whose life savings, such as needed for economic development, may be affected by any acts of misuse or misfeasance on the part of those in control, or be retained by their lack of imaginative policy."

Insurance (Sir Chintaman continued) was a type of business which ought not to fail if properly run; but during the past 10 years 25 companies had gone into liquidation, whilst another 25 had "frittered away" their resources to such an extent that they had had to be transferred to other companies at a loss to their policy-holders. "Far too unhealthy enterprise" had been shown by some companies in the investment of funds, and in the recent case of the Bharat Insurance Company some Rs. 20,000,000 had been "misapplied." The amount of money required for starting an insurance company was extremely small, as compared with the total life sum that the company might come to control. Once control was secured, however, the tendency, not infrequently, had been to utilize funds to meet the capital requirements of policies in which the managements were interested, rather than those which were really in the interests of policy-holders.

Sir Chintaman gave an assurance that the Government did not intend to divert the available funds to the public sector to a greater degree than under the present arrangements, but would ensure "that at least as much money as is today made available for investment in the private sector continues to be made available" He also emphasized that the Government had not been influenced by "any doctrinaire dislike of private enterprise," but had been prompted by the "misuse of power, position, and privilege that we have reason to believe occurs under the existing conditions."

On Feb. 17 the Government gave notice of two Bills confirming its decision to nationalize life insurance and defining its future organization: (1) the Life Insurance (Emergency Provisions) Bill, which confirmed the Ordinance providing for the taking over of all life insurance; and (2) the Life Insurance Corporation Bill, which provided for the transfer of all business to a new body to be called the Life Insurance Corporation of India.

Compensation to shareholders of former life insurance companies was fixed under the first Bill at 20 times the average annual distributed surplus, or 10 times this average plus total paid-up capital—whichever was the greater. Foreign companies would also be allowed to recover any assets originally brought in from outside India for the building-up of life insurance business there; in addition, they could continue to service policies issued in foreign currency in favour of non-Indian nationals, and could retain sufficient assets to meet their liabilities under these policies.

The new corporation to be established, for which the Central Government would provide an initial capital of Rs 50,000,000 (£3,750,000), would consist of 15 Government-appointed members, five of whom would form a committee for general superintendence and direction of business. It would have complete discretion in the investment of funds (subject to the rules, if any, made by the Government), and would be authorized to divest itself of any or all life insurance business carried on abroad if it considered this expedient. The corporation would have offices in Bombay, Calcutta, Delhi, and Madras, but it had not yet been decided where the head office would be located

On Feb. 4 the Government had announced that, as a first result of nationalization, a uniform system of rates and policy conditions would be applied in future to all life insurance business in India, and that premium rates on new policies which came into effect on or after Jan. 20 were to be lowered. The premium rates hitherto quoted by the Oriental Government Security Life Assurance Company would be reduced by one rupee for every Rs. 1,000 of the sum assured, and these rates would serve as the basis for the new rates on other policies. Where the existing premium was below 20 rupees per 1,000 rupees, however, the reduction would amount to five per cent. (The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London) **(Prev. rep. Nationalization of Imperial Bank, 14279 F.)**

B. UNITED KINGDOM. — Housing Construction in 1955. - White Paper on Slum Clearance. - New Town at Cumbernauld (Lanarkshire).

Figures published by the Ministry of Housing and Local Government on Feb. 3 showed that 283,326 permanent houses and flats were completed in Britain in 1955, compared with 347,605 completed in 1954. Of the 1955 total, 162,525 houses and flats were built by local authorities, 109,934 by private builders, 4,444 by housing associations, and 6,423 by Government departments. The total number of permanent houses and flats completed in Britain since the end of the war was given as 2,239,650, of which 1,665,776 had been built by local authorities.

A White Paper on Slum Clearance, based on returns submitted by local authorities under the Housing Rents and Repairs Act, was published on Nov. 8, 1955.

The White Paper stated that of the 12,935,177 permanent houses and flats in England and Wales, 847,112 were estimated to be unfit for habitation It was proposed to demolish 375,484 of these during the first five years of slum clearance, whilst 88,278 houses would be retained for temporary use during this period.

Liverpool had the highest number of unfit dwellings (88,233 out of 204,486 permanent houses), followed by Manchester (68,000 out of 208,144), Birmingham (50,250 out of 311,805), and Leeds (22,500 out of 164,478). Other provincial cities with large numbers of unfit houses were Hull (14,768), Sheffield (13,500), Salford (12,026), Stoke-on-Trent (12,000), Bradford (11,148), Bristol (10,000), Portsmouth (7,000), Stockport (6,000), Wolverhampton (5,600), and Bolton (5,500).

The number of unfit houses in the London area was given as 20,947, the boroughs with the greatest numbers of such houses being Stepney (2,645), Bethnal Green (2,434), Woolwich (1,442), Lambeth (1,417), Poplar (1,330), Bermondsey (1,289), and Southwark (1,240).

The Secretary of State for Scotland (Mr. James Stuart) issued a draft Order on July 27, 1955, designating 4,150 acres at Cumbernauld (Lanarkshire) as the site of a proposed new town to accommodate about 50,000 people, mainly "overspill" from Glasgow. [The construction of a new town at Cumbernauld to relieve congestion in the Clydeside area had been recommended by the Clyde Valley Regional Planning Authority in 1949.] A Cumbernauld New Town Corporation was appointed in February, 1956, under the chairmanship of General Sir Gordon Macmillan.—(Ministry of Housing and Local Government - Times - Daily Telegraph - Manchester Guardian - Glasgow Herald) **(Prev. rep. Housing, 14490 A; Slum Clearance Plans, 14255 A; Clyde Valley Plan, 10296 A.)**

C. ARGENTINA. — Reappearance of "La Prensa."

The Buenos Aires newspaper *La Prensa*, which had been expropriated by the Peronista regime on Jan. 26, 1951, and was subsequently converted into the organ of the General Confederation of Labour, reappeared on Feb. 3 under its legitimate owner and editor-in-chief, Dr. Alberto Gainza Paz, who had recently returned to Argentina after nearly five years' exile in the United States. In a leading article Dr. Gainza Paz said that *La Prensa*, after "five years of enforced silence," would "resume its service in the cause of truth, justice, and progress, and, as always, in the defence of freedom." (New York Times) **(Prev. rep. 14553 A; 11848 D; 11653 A.)**

A. INDONESIA - NETHERLANDS. — Breakdown of Dutch-Indonesian Negotiations. - Unilateral Abrogation of Netherlands-Indonesian Union by Indonesia.

The Indonesian Government decided on Feb. 13, by unilateral action, to abrogate the Netherlands-Indonesian Union, following the breakdown of negotiations between the two Governments on an agreed dissolution of the Union and on financial and economic matters connected therewith. These negotiations had been held at the request of the Indonesian Government, after the refusal by the Indonesian Parliament to ratify the agreement on the dissolution of the Union which had been signed at The Hague on Aug. 10, 1954.

As a result of preliminary discussions between the Special Indonesian Ambassador in The Hague (Mr. Utojo Ramelan) and the Netherlands Minister without portfolio for Foreign Affairs (Mr. Luns), the following agenda for the renewed discussions had been announced on Dec. 7 :

(1) The Indonesian proposal that a new agreement on the dissolution of the Netherlands-Indonesian Union should be concluded to replace the unratified 1954 agreement

(2) The Indonesian proposal to replace the existing financial and economic provisions of the Round-table Conference agreements of 1949 by one or more new conventions, and to discuss the way in which this might be achieved.

(3) Certain problems concerning Dutch New Guinea (West Irian), on the understanding that each party maintained its own position regarding the sovereignty of that territory, and that the question was excluded from the discussions

(4) Other issues which either of the parties might consider important for the improvement of relations between the two countries [According to reports in the Netherlands Press, the last item had been proposed by the Netherlands Government in order to permit discussions on the arrest of 16 Dutch citizens in Indonesia on charges of alleged subversive activities.]

The conference opened in The Hague on Dec. 10, the Indonesian delegation being led by Mr. Anak Agung Gde Agung (Foreign Minister) and including Dr. Sumitro (Finance Minister) and Mr. Kasimo (Minister of Economic Affairs). The Netherlands delegation was headed by Mr. Luns and included Mr. van de Kieft (Finance Minister) and Professor Zijlstra (Minister of Economic Affairs).

At the Indonesian delegation's suggestion, it was agreed on Dec. 13 to adjourn the conference to Geneva, in order that it might take place in a neutral atmosphere. The political committee of the conference accordingly held its first meeting in that city on Dec. 16, and the financial and economic committee on the following day. A communiqué issued on Jan. 4, 1956, stated that three main areas of disagreement remained : (1) what procedure should be followed in arbitrating differences in the interpretation of whatever agreements were reached ; (2) whether the treaties between the two countries or Indonesian national legislation should prevail in the event of conflict between the two ; and (3) whether the Indonesian Government should recognize rights and concessions granted to Dutch citizens by the former Government of the Netherlands East Indies. The talks were adjourned on Jan. 7 to enable the two delegations to consult their respective Governments on these matters.

The conference had meanwhile met with strong criticism both in the Netherlands and in Indonesia.

During a foreign policy debate on Dec. 23 in the Second Chamber of the Dutch States-General, members maintained that the discussions were ill-timed ; that there was no guarantee that agreements concluded with the present Indonesian Government would be honoured by its successor ; and that the Netherlands Government should refuse even to discuss the sovereignty of Dutch New Guinea. In reply, Mr. Luns pointed out that the discussions had been undertaken at the Indonesian Government's request, as the Netherlands desired good relations with Indonesia.

In Indonesia, the *Nahdlatul Ulama* (Moslem Association), the second strongest party in the Indonesian Government, had announced on Dec. 6—i.e. before the opening of the conference —that it would take no part in it. Both the Socialist Party (which is also represented in the Government) and the Opposition Nationalist Party expressed the opinion that the Netherlands Government's refusal to discuss the sovereignty of Western New Guinea would render the conference of little value, whilst on Dec. 20 the Moslem Political Federation (P.S.I.I.)—another of the Government parties—voted in favour of suspending the conference.

This division of opinion among the Indonesian Government parties led to a serious crisis in Mr. Harahap's Cabinet in January. The *Nahdlatul Ulama* and the P.S.I.I. presented a joint note to Mr. Harahap on Jan. 11 in which they were reported to have demanded that the conference should be broken off immediately and that the delegation should report to the Cabinet. As the two parties considered Mr. Harahap's reply unsatisfactory, the Ministers belonging to these parties refused to attend a Cabinet meeting on the following day. On Jan. 13 the Minister of Information (Mr. Makmur) announced that there would be no further exchanges of views between the Dutch and Indonesian delegations, and that all that remained to be done was formally to end the conference. After a second Cabinet meeting on Jan. 16, Mr. Makmur announced that the Indonesian delegation would be recalled from Geneva immediately.

On Jan. 17, however, Mr. Djanu Ismadi (the First Vice-Premier) stated that the recall of the Indonesian delegation was meant only as a " temporary postponement " of the negotiations, and that it would depend on internal political developments whether or not the discussions were resumed. The four *Nahdlatul Ulama* and P.S.I.I. Ministers in the Government—Mr. Sunarjo (Home Affairs), Mr. Iljas (Religious Affairs), Mr. Tjokroaminoto (Second Vice-Premier), and Mr. Sudibjo (Social Affairs)—thereupon resigned, whilst their parties demanded the entire Cabinet's resignation and the final breaking-off of the negotiations. The Indonesian Cabinet nevertheless decided on Jan. 19 to reverse its decision to recall its delegation, and on Jan. 22 instructed them to conclude the negotiations with a final meeting. Mr. Harahap decided at the same time to abolish the office of Second Vice-Premier and to assign the portfolios of Home, Religious, and Social Affairs temporarily to other members of the Cabinet.

After some delay caused by Dutch requests for future clarification of certain Indonesian statements, notably with reference to the trial of the arrested Netherlands citizens, the conference reopened on Feb. 7, when agreement was reached in principle on the abrogation of the Netherlands-Indonesian Union and the financial and economic agreements. It was also decided that the problems referred to under item (4) of the agenda should be settled through diplomatic channels. No progress was made, however, on the question of a provisional agreement for the settlement of disputes, pending the conclusion of a permanent agreement. An Indonesian proposal that disputes should be submitted to an *ad hoc* committee set up by the two parties on a basis of parity was rejected by the Netherlands delegation as too vague, whilst a counter-proposal for the appointment of an arbitration commission was rejected by the Indonesian delegation on the ground that such a commission would be in an even stronger position than the Union Court of Arbitration. Negotiations were accordingly broken off on Feb. 11.

The official joint statement announcing the end of the conference stated · " The delegations were confronted with a difference of opinion, at present insurmountable, relating to the formulation of arrangements for the settlement of possible disputes. The extensive exchange of ideas . . . has contributed towards an understanding of the respective standpoints " Both the Dutch and Indonesian Foreign Ministers expressed their disappointment at the failure of the discussions.

The Indonesian Chargé d'Affaires in The Hague handed a Note to the Netherlands Foreign Ministry on Feb. 21 announcing Indonesia's withdrawal from the Netherlands - Indonesian Union with immediate effect, and declaring that Indonesia no longer considered herself bound to the Union Statute and the agreements connected therewith. A Netherlands official spokesman described Indonesia's unilateral abrogation of the Statute as " unprecedented in international relations in peace-time and a bad example to the whole world."

B. UNITED KINGDOM. — £100,000 Ford Foundation Grant to University of Oxford.

The University of Oxford accepted on Feb. 21 a grant of $280,000 (£100,000) made by the Ford Foundation to Nuffield College. Half the amount will be used to endow a Fellowship in Comparative Politics at the college, and the other half will be spent over a ten-year period on research into the government and politics of European countries, and into European political and economic organizations such as the O.E.E.C.—(Times)
(Prev. rep. 14588 E ; 14606 C.)

A. NEPAL. — Ending of Direct Monarchial Rule. - Cabinet formed by Mr. Tanka Prasad. - Five-year Economic Development Plan. - Indian Economic Aid.

The period of direct rule by King Mahendra of Nepal, which had started on March 2, 1955, ended on Jan. 27, 1956, when a Cabinet was formed by Mr. Tanka Prasad, leader of the *Praja Parishad*, with the following membership: Mr. Tanka Prasad—Prime Minister, Home Affairs, and General Administration; Mr. C. P. Sharma—Foreign Affairs, Food, and Agriculture; Mr. Gunjman Singh—Finance and Planning; Mr. Pashupatinath Ghosh—Public Works, Transport and Communications; Mr. P. V. Shah—Defence; Mr. Balchandra Sharma—Education and Health; Mr. A. P. Singh—Law and Parliamentary Affairs.

Mr Balchandra Sharma (the former president of the Advisory Assembly), Mr. Pashupatinath Ghosh, and Mr. C. P. Sharma are, like the Prime Minister, members of the *Praja Parishad*, whilst Sardar Gunjman Singh, Mr. S. P. Shah, and Mr. A. P. Singh had previously been members of the King's Advisory Council. Negotiations for the formation of a coalition Government containing representatives of the *Praja Parishad*, the Nepali Congress, and the Nepali National Congress had broken down on Jan. 21, when all three parties rejected a proposal by the King that there should be no Prime Minister and that the Sovereign himself should preside over Cabinet meetings

Mr. Tanka Prasad issued a press statement on Jan. 20 outlining his Government's policy.

Mr Prasad said that Nepal would pursue a policy of "friendship with all" in her international relations, and would "join the forces of world peace." His Government would accept help from all friendly countries "such as India, China, Britain, America, and France," and would also accept Soviet aid if it was unconditional, as all foreign aid must be. In addition, Nepal desired "direct trade relations with other countries" and supported Asian solidarity and the ending of colonialism

After paying tribute to the progress made by "our two great neighbours, India and China," Mr. Prasad said that his party would "respect the mass awakening in Nepal" and would initiate "a new social order" King Mahendra, he added, held progressive views, and the Government's task would be to give concrete shape to the King's progressive ideals. The Government would welcome co-operation from all individuals and parties in solving the country's problems, and would tackle domestic problems by "ending the old feudal order and introducing a new order of equality and social justice."

Other recent political and economic developments in Nepal are summarized below.

Political Parties. Mr. Subarna Shumshere (a member of the Rana family who led the uprising of 1950-51, and a former Finance Minister), was elected president of the Nepali Congress on Jan. 7 in succession to Mr. B. P. Koirala, who did not seek re-election. The party's annual convention (Jan. 24-26) approved a draft election manifesto defining the party's aim as the achievement of Socialism by peaceful and democratic methods The manifesto also advocated a constitutional monarchy on the British model; government by a Cabinet responsible to the people's representatives; a unicameral legislature elected by universal adult suffrage; independence of the judiciary, recruitment of the Civil Service by an independent Public Service Commission on the basis of merit; a foreign policy based on neutrality and co-existence; the industrialization of Nepal either through its own resources or with foreign aid, if the latter were granted without pre-conditions detrimental to national prestige and security, the reorganization of agriculture on Socialist lines by means of "legislation and persuasion"; State planning of the national economy; and the inauguration of industrial and agricultural enterprises by the State.

A new organization known as the United Democratic Party was founded on Oct. 22, 1955, by Dr. K. I. Singh. At a press conference at Lucknow on Nov. 17 he expressed his support for a constitutional monarchy, adding that the King's direct rule had been far better than that of the Koirala brothers. He repudiated violent methods as no longer necessary, and said that he believed in friendship with other countries on a basis of equality and independence.

Economic Development Plan. King Mahendra announced on Oct. 10, 1955, a five-year plan for the economic, cultural, and social development of Nepal, involving an expenditure of 210,000,000 Nepalese rupees (£10,000,000). The King stated that the plan would be financed from Nepal's own resources and would include the building of cement, pulp, and sugar factories; hydro-electric schemes; the construction of 900 miles of roads; village and agricultural development on a community basis; encouragement of cottage industries; the foundation of a residential university in Khatmandu, with faculties of arts, science, engineering, and medicine; and the development of tourism.

Indian Economic Aid. Under a "Colombo Plan" agreement concluded in July 1954, the Indian Government had undertaken to contribute Rs. 5,000,000 during the next four years towards the development of communications, irrigation projects, and water-supplies in Nepal. The Nepalese Government subsequently announced that work had begun on two irrigation projects in the Khatmandu valley which would bring 30,000 acres under cultivation; that two similar projects were envisaged in Western Nepal; and that two further projects were under survey in the Raxaul area. When completed these six projects would irrigate about 81,000 acres.

Lieut.-General Daman Shumshere Jung Bahadur Rana presented his credentials to President Prasad on Nov. 4, 1955 as Nepalese Ambassador to India. He had previously been Ambassador to Great Britain, France, and the United States (see 13855 B).

King Mahendra and Queen Ratna of Nepal paid a six-weeks' visit to India from Nov. 6 to Dec. 19, 1955, as the guests of President Prasad, during which they visited Delhi and Calcutta and toured industrial and development centres. Before leaving India the King invited President Prasad and Mr. Nehru to visit Nepal.—(The Statesman, Calcutta - Indian High Commissioner's Office, London - Times) **(Prev. rep. Political Developments, 14430 C; Indian Economic Aid, 14651 A.)**

B. SOUTH AFRICA. — Closing of Soviet Consulates.

The South African Minister for External Affairs, Mr. Louw, announced in the Union House of Assembly on Feb. 1 that a Note had been presented to the Soviet Consul-General in Pretoria informing him that Soviet consular representation was "not in the interest of peace and the well-being of South Africa," and requesting that all Soviet consulates in the Union should be closed and their staffs withdrawn by March 1. The Note stressed that this step would not affect diplomatic and trade relations between the two countries.

"The establishment of Russian Consular representation in South Africa," the Note said, "had its genesis in the exigencies of the last World War, in which South Africa and the Soviet Union were associated as allies. In the post-war period the situation has changed entirely. The Government has evidence that the Consulate-General, through the members of its staff, has cultivated and maintained contact with subversive elements in South Africa, particularly among the Bantu and Indian population, and that it has served as a channel of communication between such elements and the authorities of Soviet Russia Furthermore, the same channel has been used for the diffusion of Communistic propaganda directed particularly at the Bantu population, in transgression of the law which proscribes Communistic propaganda in any form. Confirmation is provided by a recent broadcast by Radio Moscow, controlled by the Soviet Government, which serves as a propaganda medium and expresses the views of that Government. The broadcast was in effect an incitement of the Bantu and non-European population, more particularly the African and Indian National Congresses respectively, to resist the South African Government."

The Note also alleged that the provisions of the Liquor Act had "not been observed on the premises of the Consulate-General" and that recently "a serious infringement of the Act was committed on those premises notwithstanding a previous warning." [This was understood to refer to a party at the Consulate-General on Nov 7 (the Soviet National Day) when, contrary to South African law, vodka and other alcoholic drinks had been served to non-European guests.]

After stating that the Union Government was satisfied that Soviet Consular representation was "not in the interest of peace and the well-being of South Africa," the Note requested the closing-down of the Soviet Consulate-General at Pretoria, the Consulate at Cape Town, "and any other Soviet agencies that may exist in South Africa." It added: "The termination of Soviet Consular representation in South Africa does not involve the discontinuation of diplomatic, trade, and other relations, which can in future be conducted by the Soviet Ambassador in London through the medium of the Union's High Commissioner there."

A Soviet reply to the South African Note, released for publication by Mr. Louw on Feb. 19, said that there was no foundation for the South African allegations that the Soviet consulates had maintained contacts with people carrying on subversive activities in South Africa. In particular, the reply denied the statement that there were special relations between the consulates and the Indian and Bantu people in the Union, and said that relations with all social levels had not gone "beyond the ambit of social intercourse customary for such occasions." (State Information Department, Pretoria - Cape Times)
(Prev. rep. 5742 C; 5299 B.)

C. UNITED STATES. — Release of "Tokio Rose."

Mrs. Iva Toguri D'Aquino ("Tokio Rose"), who had been sentenced in 1949 to ten years' imprisonment for broadcasting Japanese propaganda to the U.S. forces during the war, was released on Jan. 28 after having served six years of her sentence. A native of Los Angeles and a graduate of the University of California, she is the wife of a Portuguese journalist living in Japan.—(New York Times) **(Prev. rep. 10490 B.)**

D. NETHERLANDS. — Increase in Bank Rate.

The Netherlands Bank raised its discount rate on Feb. 6 from 2½ to 3 per cent—the first change in the rate for nearly three years. (Netherlands News Agency) (Prev. rep. 12871 D.)

A. SOVIET UNION. — The Sixth Five-year Plan, 1956-60. - State Budget for 1956. - Decentralization of Agricultural Planning. - New Ministry for Automation.

The draft directives for the sixth Soviet Five-year Plan, covering the years 1956-60 inclusive, were published on Jan. 15 prior to their presentation to the 20th Congress of the Soviet Communist Party, which opened on Feb. 14. The plan—which, for the first time, gave many of the targets to be achieved in figures instead of only as a percentage of some previous year—provided for an overall increase in industrial output of 65 per cent by the end of 1960, as compared with 1955, and for a rise of 70 per cent in the output of heavy industry. The national income was planned to rise by 60 per cent, and real wages of workers (who were estimated to number 55,000,000 by 1960) to increase by about 30 per cent. It was stated in this connexion that a special Government wages committee had been set up under M. Lazar Kaganovich (a First Deputy Premier, and chairman of the advisory commission on labour and wages) to supervise changes in the system of "norms" under which wage payments are made.

The plan called for an increase of "not less than 50 per cent" in industrial productivity generally and of at least 52 per cent in productivity in the building trade, and for an increase of 70 per cent in output per man on State farms and of 100 per cent on collective farms. The need for an increase in the pace of mechanization in industry was especially emphasized, and it was urged that more attention should be paid to introducing automotive production processes in industry on a wider scale, and to building fully automatic industrial establishments.

In a general passage it was stated that the Soviet aim was "to achieve, on the basis of the priority development of heavy industry, continued technical progress, higher labour productivity, and a further mighty advance of all branches of the national economy, to effect a steep advance in agricultural production; and, on this basis, to secure a considerable rise in the material well-being and cultural level of the Soviet people." "The Soviet Union," it declared, "now has a powerful socialistic production . . . and considerably more material resources and skilled personnel than ever before . It now commands every requisite for solving, in a short period of time and through peaceful economic competition, the U S S R 's chief economic task—that of catching up with and outstripping the most developed capitalist countries in output per head"

The directives also gave some figures regarding the achievements of the fifth Five-year Plan. A summary of these, together with a summary of the targets for the Sixth Five-year Plan, is given below.

Achievements of 1951-55 Plan. Gross industrial output rose by 85 per cent during the five years, the output of producer goods being 91 per cent higher and that of consumer goods 76 per cent higher, by the end of 1955 the level of industrial output was 3.2 times that of 1940. In all the most important branches of heavy industry the Five-year Plan had been more than fulfilled e g steel production (45 200,000 tons) was 1,000,000 tons in excess of the target, electricity output (170,200,000,000 kwh) was over 7,000,000,000 kwh more than originally planned; whilst oil and coal production showed a similar rise. Output of pig-iron, however, was some 700,000 tons short of the target of 34,000,000 tons.

Output of consumer goods, on the other hand, fell almost uniformly below both the original goals set in 1952 and the revised goals set in 1953 For example, the output of cotton textiles in 1955 was 5,910,000,000 metres, compared with the original target of 6,100,000,000 metres and the revised figure of 6,300,000,000 metres, of refrigerators, 151,200 (330,000 planned), and of washing machines, 86,600 (296,300 planned).

It was stated that the output of consumer goods, as well as the development of light and food industries, had been held up because of the failure to attain the planned level of agricultural production Nevertheless, major headway had been made: the development of hitherto uncultivated land had added another 60,000,000 acres to the area under grain, and output of meat and dairy produce had risen.

As a result of these increases in production it was claimed that real income had increased by 40 per cent for workers and by 50 per cent for collective farmers during the five years, whilst the national income had increased by about 70 per cent.

Agricultural Targets for 1956-60. Big increases were planned in all sectors, some of the principal increases being as follows (percentage increase in 1960 as compared with 1955): raw cotton, 56; flax fibre, 35; sugar-beet, 54; potatoes, 85; other vegetables, 118; meat, 100; milk, 95; eggs, 154; wool, 82. Planned 1960 production of other agricultural products was given in actual figures, as follows (1955 production in parentheses): granulated sugar 6,530,000 tons (3,418,800 tons); meat (excluding that to be consumed on farms), 3,950,000 tons (2,219,100 tons); butter and other dairy products, in milk equivalent, 25,000,000 tons (13,400,000 tons); vegetable oil, 1,115,100 tons (1,840,000 tons); fish, 4,200,000 tons (2,675,100 tons).

Mechanization of agriculture would be intensified, and during the five years it was planned to supply 1,650,000 tractors, 560,000 combine harvesters, 180,000 reapers, 400,000 combine pick-ups for grain, and 250,000 maize and silage combines.

The grain crop was planned to reach 180,000,000 tons by 1960, and hybrid seed production would be organized on a large scale. A new time-limit was set for bringing in the grain harvest—not more than 10 working days in the European part of the Soviet Union, and 7 to 8 days in Siberia and the Far East. Pigs would in future be raised for pork and bacon instead of for lard, and their numbers would be increased so as to provide about half the country's meat requirements. Cattle would be initially raised on the dry pastures of Kazakhstan, Siberia, and the Volga region, and fattened later on special farms.

A total of 75,000,000 acres of previously virgin or idle land would be sown to crops during 1956, but no major expansion of the sown area was contemplated thereafter. The area of irrigated land would increase by over 5,000,000 acres, and water would be brought to some 200,000,000 acres of pasturage. Afforestation would be carried out over 475,000,000 acres; shelter belts would be planted on about 920,000 acres, whilst collective farm "windbreaks" would cover 1,150,000 acres

"Milk-vegetable zones" would be organized around all major cities and industrial centres to supply milk, potatoes and vegetables to the urban population, and new State farms would be set up in these zones. In addition, city workers and collective farmers would be encouraged to grow vegetables on their private lots.

Production Targets for 1956-60. The following figures were given showing Soviet production of key commodities in 1955 and planned production for 1960

	1955 Output	1960 Target
Pig-iron (million tons)	33 3	53
Steel (million tons)	45 2	68 3
Rolled metal (million tons)	34 7	52.7
Coal (million tons)	390 1	593
Oil (million tons)	70 7	135
Gas ('000 million cubic metres)	13.9	40
*Electricity ('000 million kwh)	170 2	320
Mineral fertilizers (million tons)	9.6	19 6
Caustic soda (thousand tons)	565	1,000
Soda ash (thousand tons)	1,440 5	2,420
Metallurgical equipment (thousand tons)	171 8	280
Chemical equipment (thousand tons)	113 0	2 08
Oil equipment (thousand tons)	48 4	120
Steam and gas turbines (million kw.)	4 1	10.5
Hydraulic turbines (million kw.)	1 5	2.6
Generators for steam, gas and hydraulic turbines (million kw)	4 5	11
Metal-cutting machine tools (thousands)	104 7	200
Forging and pressing machines (thousands)	13 5	25.8
Motor vehicles (thousands)	445 2	650
Tractors (thousands)	163 4	322
Grain combines (thousands)	47 9	140
Electric locomotives (units)	194	550
Diesel locomotives (units)	136	1,630
Goods wagons (thousands)	34 4	52
Passenger coaches (units)	1 770	2,800
Cut timber (million cubic metres)	197	264
Sawn lumber (million cubic metres)	57 8	80
Cement (million tons)	22 4	55
Window glass (million square metres)	99 4	155
Cotton textiles (million metres)	5,911	7,270
Woollen textiles (million metres)	250 3	363
Linen (million metres)	305 5	556
†Silk textiles (million metres)	526.5	1,074
Artificial fibre (thousand tons)	110.4	330
Knitwear (million pieces)	429 6	580
Shoes (million pairs)	297.4	455
Watches and clocks (millions)	19.6	33.6
Radio and television sets (millions)	4 0	10 2
Refrigerators (thousands)	151 2	635
Washing machines (thousands)	86 6	528
Sewing machines (thousands)	1,608.5	3,780
Motor-cycles (thousands)	243 8	395
Bicycles (thousands)	2,877 5	4,230
Paper (thousand tons)	1,864 4	2,722

* Including 23,100,000,000 kwh. of hydro-electricity in 1955 and 59,000,000,000 kwh. in 1960 † Including both natural and synthetic silk textiles

Automation. Automotive processes would be introduced on a large scale, and the use of remote-control systems would be extended in power stations, at oilfields, and in other sectors of the economy. Open-hearth furnaces would "to a considerable extent" be controlled automatically, and such control would also be introduced for blast furnaces; underground transport and ore extraction in iron and manganese mines would be carried out by remote control; 40 steel-rolling and tube-drawing mills would be "automated"; automatic and semi-automatic production lines would be introduced for the manufacture of furniture, 60 per cent of all weaving looms in the textile industry would be made "automatic"; in the coal industry, automation and remote control would be "expanded" in underground operations and at plants, in engineering, at least 220 fully automatic and semi-automatic lines and workshops would be established; and 600 automatic lines for fish processing would be set up. (The plan listed hundreds of other processes in which automation would be introduced.) A "long-term plan for automation in all branches of industry" would be drawn up, in order that the change-over might be carried out without disturbance and that the necessary equipment and instruments should go where they might be used to the best advantage.

The radio and instrument industries, particularly those sections concerned with the manufacture of devices for the regulation and control of technological processes, would be developed "all-embracingly," to increase the output of the "means of automation" by 3 5 times. Work on electronic computers would be "intensified," and large-scale scientific research would be developed in order to evolve "new means of automation."

Atomic Energy. The peaceful uses of atomic energy would be considerably extended, and it was planned to build in the next five years atomic power stations with a total capacity of 2,500,000 kw. Development work would also be carried out on atomic-powered engines for transport, and an atomic-powered icebreaker with special ice-melting equipment would be designed. The further use of radio-active substances in agriculture, industry, and medicine would be extensively developed

Fuel and Power. New underground and opencast coal mines would go into operation. and the rate of tunnelling and the speeds of many other operations would be doubled. In the gas industry new gas deposits would be developed and several trunk pipelines, totalling about 5,600 miles, would be built. There would be "great advances" in the provision of electric power—for industry, agriculture, transport, and the domestic consumer. The Kuibyshev and Stalingrad hydro-electric stations, already in the final stages of construction, would be completed, whilst other big hydro-electric projects on the Volga, Kama and Dnieper rivers to be started or completed during the five years would include those at Saratov (1,000,000 kw.), Votkinsk (540,000 kw.), Lower Kama (900,000 kw.), Cheboksary (800,000 kw), Kremenchug (450,000 kw.), and Dneprodzerzhinsk (250,000 kw). In Siberia, the 660,000-kw Irkutsk station and the first section of the 3,200,000-kw. Bratsk station (both on the Angara River) would go into operation, as well as the 400,000-kw Novosibirsk station and the 500,000-kw. Kamenskaya station on the Ob. A new 3,000,000-kw station would be started at Krasnoyarsk, on the Yenisei.

Transport and Communications. The amount of freight carried by the Soviet railways would be increased by 40 per cent by 1960; over 4,000 miles of new track—twice as much as that built in the last five years—would be completed, over 5,000 miles would be electrified, and about 4,100 miles of single track would be doubled There would be a great increase in railway electrification and in the use of diesel power, and some 40-45 per cent of all goods traffic would be hauled by diesel or electric engines by 1960 The Soviet freighter and tanker fleet would be trebled, and the Soviet fishing fleet expanded almost fourfold. As regards air transport, new "fast, many-seated passenger planes" would go into operation on air transport routes; passenger traffic would be raised by 28 per cent, and freight traffic would be doubled. Big increases were also planned in the telephone, telegraph, radio, and postal services.

Building and Construction. In all the building programmes the greatest use would be made of standardization in building units etc, and of the most up-to-date assembly-line methods, with wide use of prefabrication. Transition to standard layouts would be completed in housing, etc., by 1957, and mainly completed in industry, agriculture and transport by 1958. The State housing programme over the five years would provide twice the accommodation that had been put up in 1951-55, corresponding to more than 5,000,000 two-living-room dwellings (i.e. two living rooms, plus kitchen, bathroom, hall, etc.). At the same time everything would be done to encourage workers and farmers to build their own homes, with the help of State and collective farm loans, and special supplies of prefabricated housing materials would be made available to meet this demand

Consumer Goods and Food. There would be an overall increase of about 50 per cent in supplies of goods in the shops, many more shops would be built, and staffs were expected to increase by about 40 per cent Sales of certain key goodstuffs and consumer goods were expected to increase by the following percentages as compared with 1955: meat products, 85; fish products, 59; butter, 57, vegetable oils, 60; cheese, 140; eggs, 160; milk and other dairy products, 170; sugar, 70, cotton fabrics, 30; woollen cloths, 100, silks, 100; leather footwear, 65; linen fabrics, 260; manufactured garments and apparel, 67, furniture, 100; clocks and watches, 70, bicycles, 46; radio sets, 120, TV sets, 400; household refrigerators, 370; vacuum cleaners, 290; washing machines, 500.

Film Industry and Television. By 1960 the Soviet film industry would be producing 120 full-length films a year. New cinemas seating 500,000 people would be built during the five-year period. Radio stations would increase their capacities by 90 per cent, and by 1960 there would be 75 television stations in the Soviet network.

Education and Technical Training. To enable the U S S.R. to cope with the expansion in all branches of industry, the plan provided for "50 per cent more technicians" by 1960 Full 10-year schooling to the age of 17 would be extended to the entire country, and the school curricula would be arranged so that all children got a good idea of the work in all key branches of modern industry and agriculture. All existing tuition fees—in colleges, technical schools, and the senior forms of secondary schools—would be abolished

State Budget for 1956.

Prior to the publication of the sixth Five-year Plan, the Soviet Budget for 1956 had been presented by M. Zverev, the Finance Minister, on Dec. 26 and approved by the two houses of the Supreme Soviet on Dec. 28. It provided for expenditure of 569,635,000,000 roubles and revenue of 592,761,200,000 roubles, giving an estimated surplus of 23,126,200,000 roubles. This compared with expenditure of 563,482,000,000 roubles, revenue of 590,192,000 roubles, and a surplus of 27,710,000,000 roubles in 1955.

No strict comparison could be made between the figures for the two years because of a reduction—made on April 1, 1955—in the prices charged to Soviet Government agencies for heavy industrial products, and in freight rates. Although these reductions had not been passed on to consumers, and amounted in effect to a book-keeping adjustment, they had increased the amount of goods and services which could be bought for a given amount of roubles. Some indication of the extent of this reduction was given by M Zverev in his Budget speech, when he explained that the 1956 appropriation of 158,700,000,000 roubles for heavy industry was 15 per cent more in terms of purchasing power than the 1955 appropriation of 163,600,000,000 roubles

The principal categories of expenditure in 1956 were social and cultural services (including education, public health, and family welfare), 161,200,000,000 roubles; heavy industry, 158,750,000,000 roubles; defence, 102,500,000,000 roubles (nominally a reduction of 9,600,000,000 roubles compared with 1955, and representing 18.2 per cent of total Budget expenditures as against 19.9 per cent in 1955); and consumer goods industries, 26,000,000,000 roubles. In addition, 160,800,000,000 roubles was provided for investment in capital expansion, including 96,600,000,000 roubles for heavy industry, 21,300,000,000 roubles for agriculture, 21,500,000,000 roubles for transport and communications, and 7,800,000,000 roubles for light industry, including consumer goods.

In the course of his speech M Zverev said that the reduction in defence expenditure meant that the Soviet Union "not only in words but in deeds, shows its concern for lessening world tension and ensuring peace and international security"—recalling in this connexion the decision to demobilize 640,000 men (see 14599 B) and to return the Porkkala naval base to Finland (see 14512 B) M Zverev criticized inefficiency in Government services, and said that 750,000 superfluous "white-collar" workers had been discharged and had "gone back into production." He announced that the Government planned a 4 5 per cent reduction in retail prices in 1956, and confirmed that the U S.S R was building "atomic power stations of 50,000 and 100,000 kw capacity"—though he did not say how many.

Agricultural Problems.

The failure to achieve the targets set for agricultural production in the fifth Five-year Plan had been causing concern for some time, and a radical change in the Government's policy had been announced on March 9, 1955. A decree issued on that date in the name of the Soviet Government and the Soviet Communist Party admitted that "serious mistakes" had been made in the methods of planning agriculture, and criticized the "extreme centralization" which, it said, had fettered the initiative of collective farms and machine-tractor stations and had thereby decreased their output. It was therefore proposed that the system of planning control should be decentralized, and that more responsibility and initiative should be given to the farmers themselves.

Under the new system, the higher organs of planning (i.e , the State Planning Commission, the Ministry of Agriculture, and other organs of the central Government) would exercise more general and less detailed supervision, and would deal mainly with such matters as determining the relative allocation of resources between agriculture and other branches of the national economy, and controlling the fulfilment of the overall agricultural plan They would still set quotas for delivery of farm produce to the State, but it would be left to the farms to decide how these quotas should be filled. The decree stated that the main consideration under the new system must be "volume of production" actually obtained, and not the number of acres sown or the number of heads of livestock maintained; the planning of agriculture, it declared, "must begin directly in the collective farms, the machine-tractor stations, and the State farms, taking into consideration the best possible utilization of land."

In its denunciation of "bureaucratic, highly inflated, and unrealistic planning," the decree cited several examples of the results of over-centralized planning. (i) Farms in the southern Ukraine had been ordered to plant spring wheat, although local farmers knew that winter wheat would give better yields, whilst farms in Kazakhstan, Siberia, and the Urals had been ordered to grow winter crops, although local conditions were unfavourable (ii) The planting of maize had been limited to the southern regions of the U.S.S.R., although it could be—and now would be—grown over a much wider area (iii) Peasants in Latvia, Lithuania, and Estonia, who for many decades had fed pigs for bacon, had been ordered to fatten them instead. (iv) Semi-urban districts had been ordered to raise sheep, although it was well-known that areas with limited pasture were best suited for cows and pigs; on the other hand, possibilities for breeding merino sheep in Siberia, Kazakhstan, and Central Asia had been neglected, although those areas had "enormous pastures." (v) Various areas of the U S S.R. had not been encouraged to grow their own food, although able to do so, and food had had to be sent to them from other areas; this was particularly true of the Soviet Far East, where the growing of potatoes, vegetables, and livestock had been neglected. (vi) Machine-tractor stations had been ordered to do a great variety of tractor work instead of being left to decide for themselves what type of work would yield the best results.

The decree said that the new system would permit collective and State farms to "improve the utilization of the land assigned to them and sharply increase the production of field crops and livestock." This would make it possible in a shorter time to "solve the national problem of a great upsurge in agriculture."

On March 30, 1955, M. Khrushchov announced at a conference of agricultural workers at Voronezh that "tens of thousands" of new managers were to be appointed to the collective farms in an effort to raise their level of production. It was subsequently stated in *Pravda* that the number of posts affected was about 30,000.

M. Khrushchov said that the results of the most successful collectives showed that under a good manager even the most backward farm could raise its production in one or two years. "Therefore the party has found that the strengthening of farms by experienced leaders is the most important task of collective farm development. Proceeding from this, the central committee of the Communist Party and the Council of Ministers have decided to select and recommend for the posts of farm chairman, notably in the case of backward farms, tens of thousands of the most experienced workers in party and Soviet organizations, enterprises, scientific research institutes, and other institutions. . . ."

M. Khrushchov cited cases of "criminal neglect" of farm equipment, saying that it had often been left to rust and deteriorate in the fields, and had even been "looted." "There have been cases," he declared, "in which brand-new machines were dismantled and their parts used to repair old machines . . . We must declare war on neglect, mismanagement, and irresponsibility. We must inflict the severest punishment on those guilty of such a barbarous attitude towards equipment."

M. Kozhevnikov, the Deputy Minister of State Farms, announced on Jan. 19, 1956, that the mass recruitment of settlers for the uncultivated steppelands of Siberia, Kazakhstan, and the Volga region (see 13604 A) had been ended, as people had come forward in sufficient numbers. Pointing out that settlers were still needed, he stated that 450,000 persons, mostly former factory workers from industrial centres in the European part of the Soviet Union, had answered the Government's appeal to migrate to the areas concerned.

After paying a tribute to their "heroism in overcoming enormous difficulties," notably their poor living accommodation in severe winter conditions, M Kozhevnikov stated that the new settlers had created 425 State farms, each of 50,000 - 62,000 acres, during the past two years. About half of the country's 2,400,000-ton increase in grain production during 1955 had come from the new lands, and the Government planned that each farm should carry 2,500 - 5,000 cattle, up to 15,000 sheep, 1,000 pigs, and over 1,000 poultry. The Minister strongly denied reports that many settlers had found conditions in the steppe too rigorous and had returned to urban areas, whilst conceding that there had been individual cases of people returning, he asserted that there had been no question of a mass return

It was announced in Moscow on Jan. 22 that a new "Ministry of Machine-Tool Construction and of Means of Automation" had been set up under M. Lesechko, an engineer. The new Ministry took over certain functions of the former Ministry of Machine and Machine-Tool Construction, which was renamed the Ministry of Machine Construction.—(Soviet Weekly - New York Times - Times - Daily Telegraph - Financial Times - Manchester Guardian - Le Monde, Paris - Neue Zurcher Zeitung) **(Prev. rep. Fifth Five-year Plan, 12709 A, 12489 A; 1955 Budget, 14160 B; Agricultural Policy, 13604 A; 13167 A.)**

A. FRANCE. — M. Ramadier appointed Finance Minister. - Social Republicans join Cabinet.

M. Mollet, who had returned to Paris from Algiers on Feb. 11, appointed M. Paul Ramadier (Socialist) on Feb. 14 as Minister for Economic Affairs and Finance in succession to M. Robert Lacoste, consequent upon the latter's appointment as Minister Governor-General in Algeria after the resignation of General Catroux. It was disclosed that M. Mollet had first offered the portfolio to M. Jules Moch, who had declined it because he wished to continue his work as French member of the U.N. Disarmament Sub-commission.

M. Ramadier (67) was Prime Minister from January to November, 1947. He lost his seat in the National Assembly in 1951 but was returned for the Aveyron department at the recent general election. A biography of M. Ramadier is given on page 8391.

M. Pierre-Olivier Lapie (Socialist), a former Minister of Education, succeeded M. Lacoste as one of the six vice-presidents of the National Assembly.

The Cabinet was enlarged on Feb. 20 by the appointment of two Social Republican (ex-Gaullist) Ministers—M. Chaban-Delmas, who became Minister of State without portfolio (a post similar to that held by M. Mendès-France), and M. Lemaire, who was appointed State Secretary for Commerce and Industry. The Social Republicans thereby reversed their earlier decision not to join M. Mollet's "Republican Front" Government. (Le Monde, Paris) **(Prev. rep. Cabinet, 14681 A.)**

B. EUROPEAN UNITY. — Proposed Creation of "European Postal Service." - Ministerial Meeting.

M. Edouard Bonnefous, then French Minister of Posts and Telecommunications, proposed to the Consultative Assembly of the Council of Europe in Strasbourg on July 9, 1955, a plan for a "European organization of posts and telecommunications," including closer administrative and technical co-operation between the various national organizations, the introduction of a new "international postal traveller's cheque," the issue of a "European stamp," and the development of television on a continental basis.

A conference of the Ministers of Posts and Telecommunications of the six member-countries of the European Coal and Steel Community (Belgium, France, Western Germany, Italy, Luxemburg and the Netherlands), held in Paris on Jan. 20, 1956, under the chairmanship of M. Bonnefous, took the following preparatory decisions for the implementation of the "postal pool" plan:

(1) The issue in September 1956 of a European stamp whose design would symbolize the "European idea," and which would be issued for sale in each of the six member-countries, its denomination being expressed in the respective national currencies

(2) The setting-up of three working parties to prepare the following measures of co-operation:

(*a*) In the sphere of telecommunications, the development of fully automatic and semi-automatic telephone links between the large European cities—a measure which, it was stated, would not present any technical difficulty and was only dependent on the settlement of various administrative and accountancy questions;

(*b*) in the sphere of postal services, the simplification of exchanges of correspondence;

(*c*) in the sphere of postal cheques, a joint investigation of mechanization measures, based on "revolutionary" experiments carried out in the U.S.A. and aiming at a speeding-up of operations and a reduction of "staff fatigue"

M. Bonnefous declared that the decisions taken had constituted "a first step towards a European postal service," and that the possibility of the adherence of other countries had been taken into account. The meeting was attended by a British observer.—(Council of Europe, Strasbourg - Le Monde, Paris) **(Prev. rep. European Transport, 14531 C.)**

C. RUMANIA. — Release of M. Gheorghe Tatarescu. - Death of Dr. Juliu Maniu and M. Dinu Bratianu. - Government Appeals for Return of Exiles.

It was disclosed in the latter half of 1955 that M. Gheorghe Tatarescu, the former leader of the National Liberal Party, a pre-war Premier, and Foreign Minister in the first post-war Government, had been released by the authorities after having been detained for over five years. In an interview with the *New York Times* correspondent in Bucharest, published on Oct. 21, M. Tatarescu confirmed earlier reports that Dr. Juliu Maniu, the veteran leader of the Rumanian Peasant Party, had died in 1952 while under detention, and said that he understood that M. Dinu Bratianu, a former leader of the National Liberal Party, had also died in prison in 1950. M. Tatarescu also stated that M. Alexandru Alexandrini (a prominent member of the National Liberal Party), who had resigned as Finance Minister in 1947 at the time of M. Tatarescu's resignation as Foreign Minister, had been tried in 1953 and condemned to hard labour for sabotage and other crimes.

With regard to his own case, M. Tatarescu said that after retiring from public life after his resignation he had been arrested in 1950 and placed in a political prison in Transylvania He had never been brought to trial, but had been subjected to prolonged questioning for over a year before going to hospital in 1952 with pneumonia and pleurisy. After having stayed at convalescent homes, he had been released in July 1955.

It was announced on Nov. 18 that a Rumanian Committee for Repatriation had been formed in order to encourage Rumanian exiles abroad to return to Rumania under a decree of June 24, 1955 promising them resettlement and freedom from punishment. The committee, whose members included M. Tatarescu, established an office in East Berlin.

Another appeal to Rumanian exiles was made by M. Titel Petrescu, the former secretary-general of the Rumanian Social Democratic Party, who had been released from imprisonment in October. In a letter to *Scanteia* (Dec. 18) he said that he had become convinced of the "righteousness" of the Rumanian Workers' [i.e. Communist] Party's policy, and invited Rumanian Socialist exiles "to return home and join in the people's effort towards a new life"

A new Rumanian radio station, the "Voice of the Homeland," began broadcasting in December as part of the campaign to encourage exiles to return.—(Agerpres, Bucharest - Le Monde, Paris - New York Times) **(Prev. rep. Amnesty, 14479 B; M. Tatarescu, 8975 B; Dr. Maniu, 10024 B.)**

A. VENEZUELA. — Economic and Political Developments. - Public Works Programmes. - Development of Caracas. - Creation of Venezuelan Steel Industry. - New Policy on Oil Concessions. - Building of International Centre for Neurology and Brain Research.

The President of Venezuela, General Marcos Perez Jimenez, officially " dedicated " on Dec. 2, 1955, a series of public works projects—the most extensive ever carried out in Venezuela—on which more than 1,105,000,000 bolivares ($331,615,000) had been spent during 1955. The programme—which covered a total of 1,083 public projects—was the third of its kind since President Perez Jimenez took office in 1952, and had been preceded by similar programmes during 1954 and 1953. The total value of the projects completed during the three years amounted to 3,352,000,000 bolivares ($1,005,000,000). Similar programmes will be carried out during the next few years.

A review of Venezuelan development since the inception of these programmes is given below under cross-headings.

Development of Caracas. A National Housing Programme, designed to make the Venezuelan capital one of the world's most beautiful cities, and to abolish the " slum belt " encircling the city, had begun in 1952 and had made rapid progress towards its objectives by the end of 1955. During the latter year a low-rent housing project consisting of 13 buildings, each 15 storeys high and containing nearly 2,000 apartments in all, as well as 52 four-storey buildings containing 416 apartments, was completed at a cost of 41,500,000 bolivares ($13,000,000). These buildings, of the most modern type and equipped with lifts, were used to rehouse 2,366 former slum families Shopping centres, kindergartens, schools, and sports fields were also included in the rehousing projects.

Extensive new highways were opened in Caracas during 1955 as part of a National Programme for City Improvement. Important extensions were also carried out at the University of Caracas, which has been redeveloped as a University City (see 6324 A).

Agriculture, Social Welfare, etc. Extensive agricultural, irrigation, and social welfare projects have been carried out in different parts of the country in the past three years, involving the building of many new schools, hospitals, clinics, agricultural research stations, waterworks, highways, bridges, etc. During 1955 alone 34 rural schools were built for over 17,000 children, together with 17 kindergartens and 22 other schools; considerable extensions were made to the University of the Andes at Mérida, and to other institutions of higher learning; 17 new electricity generating plants were built, and an extensive programme of modernization was set on foot or completed in many small towns and rural communities. Improvements were also made to ports and airfields, and a number of modern hotels were built in Caracas and other centres for the increasing tourist traffic. Four new cargo and passenger vessels, each of nearly 5,000 tons, were added to the State-supported shipping fleet—the *Compañía Venezolana de Navegación*

Highway Construction. Under a " Master Highway Programme," begun in 1950 and still being carried out, nearly 800 miles of new Federal highways have been added to the country's road network, another 7,000 miles being scheduled for completion during the next ten years. The programme so far completed has included the building of an expressway between Caracas and La Guaira, linking the capital with the sea; the opening of nearly 300 miles of the new Pan-American Highway; important progress in the construction of a Trans-Andean Highway, involving engineering problems of the first magnitude; and the construction of 87 steel and concrete bridges

Steel Industry. A $173,000,000 contract for the construction of a steel plant was signed by the Venezuelan Government on Dec. 31, 1955 with two Italian firms—the Fiat company and the Innocenti engineering company, a subsidiary of Fiat. The plant will be built on an 11,000-acre site at the confluence of the Orinoco and Caroni rivers, and is planned to be in full production by 1959. Power will be supplied by a new hydro-electric plant to be built in the vicinity, and all raw materials—iron-ore, coal,and limestone—will be obtained from Venezuelan sources The Italian firms obtained the contract in the face of competition from British, American, French, German, Belgian, and Norwegian firms.

The decision to establish a Venezuelan steel industry had been taken in 1954. The new plant will have an initial output of 300,000 tons of steel a year, rising progressively to 420,000 tons, and will make Venezuela completely independent of steel imports

Oil Industry. Although no oil concessions had been granted in Venezuela since 1945, it was announced on Jan. 11, 1956, that the Venezuelan Government had decided in principle to revoke this policy and to invite new applications for concessions. It was stated that President Perez Jimenez had reached this decision for the following reasons · (1) The desirability of increasing the country's oil reserves and avoiding the exhaustion of existing supplies; (2) the advisability of establishing more refining and by-products industries based on petroleum; (3) the attraction of capital that might otherwise be invested in other countries.

It was officially stated that applicants for new concessions would be required to pay higher taxes and royalties than those at present in force; to refine in Venezuela a larger percentage of oil extracted than had hitherto been customary, to build townships for oil workers instead of fenced-in camps; to co-operate with the Government in industrial and agricultural development, as well as in its health and communications policies; and to co-operate with Government agencies in the acquisition of radio-active isotopes and the extraction of rare minerals associated with petroleum, which would not be included in the oil concessions.

It was added that concessions would be granted to applicants who met the above-mentioned requirements, that all bids and negotiations for concessions would have to be made directly to the Ministry of Mines and Hydrocarbons, which would have sole jurisdiction over the oil industry; and that there would be no intermediaries or commission agents, either inside or outside the territory of the Republic.

An agreement was signed in Washington on June 14, 1955, whereby the U.S. Government agreed to furnish technical aid and certain radioactive materials in connexion with research work to be undertaken at the Venezuelan Institute of Neurology and Brain Research. This institution—created in 1954 as an autonomous agency of the Venezuelan Government—is being built on a 1,200-acre site overlooking Caracas and will be devoted to fundamental research on the structure and functions of the nervous system, using the most advanced biophysical, biochemical, and biomathematical techniques. The Institute is conceived not only as a national institution but also as a regional research centre for the whole of South America and, eventually, as an international neurological research and training centre.

The U.S.-Venezuelan agreement provided that Venezuela would receive information on the design, construction and operation of research reactors for peaceful purposes, that the U.S. Atomic Energy Commission would supply the Venezuelan Government with up to six kilograms (13 2 pounds) of enriched uranium; and that the two countries would exchange unclassified information relating to the use of radio-active isotopes in physical and biological research, medical therapy, agriculture, and industry

President Perez Jimenez had formally taken office as President of Venezuela for a five-year term on April 19, 1953. At the time of his inauguration he was the youngest President of any Latin American country, being only 39 years of age.

His installation had been preceded in November, 1952, by general elections—the first held since the overthrow of President Gallegos in 1948 (see 11221 B)—which were contested by the Independent Electoral Front (*Frente Independiente Electoral*, or F E I), representing the *junta* which assumed power after the deposition of President Gallegos; the National Democratic Union (U R.D), the principal Opposition group, the *Copei* (Christian Socialist) party; and some minor groups. The Democratic Action Party (*Acción Democratica*), which supported Dr. Gallegos, had been outlawed by the *junta* and thus took no part in the elections, which were for a Constituent Assembly of 104 deputies charged with drafting a new Constitution. The results, as announced by the Supreme Electoral Tribunal, were . F E I. 60 seats, U.R.D. 29, *Copei* 14, and one other.

Shortly after the elections it had been announced that General (then Colonel) Perez Jimenez, Minister of Defence and one of the three members of the *junta*, had taken office as Provisional President; that he would wield the powers formerly exercised by the *junta* collectively; and that the other two members of the *junta*—Dr Germán Suarez Flamerich and Colonel Luis Llovera Paez—had resigned. Dr. Suarez Flamerich had been head of the *junta* Government since December 1950.

The population of Venezuela was estimated on Dec. 31, 1954 at 5,858,000 (latest available figure), the natural rate of increase—3.6 per cent—being one of the highest in the world. According to official statistics, Caracas had a population of 946,969, being one of the most rapidly growing cities on the American continent, followed by Maracaibo (330,470), Barquisimeto (142,255), and Valencia (111,320).

Over 328,000 foreign-born nationals were living in Venezuela at the end of 1954, the rate of immigration—particularly from Italy and Spain—being about 6,000 a month. The Italians formed the largest foreign-born community (105,463), followed by 76,880 Spaniards, 33,390 Americans, 22,768 Portuguese, 20,609 Colombians, 9,400 British, 6,875 Cubans, 5,805 French, and 5,342 Germans. The figures included foreigners—principally U.S. and British nationals—working in the oil industry. (Venezuelan Embassy, Washington - New York Times)

B. SWEDEN. — National Wages Agreement.

After negotiations lasting several months, a proposal involving an all-round increase in wages and salaries of about four per cent on a national basis was accepted on Feb. 5 by the employers', trade union, and salaried employees' organizations. The agreement, which was worked out by a Government-appointed arbitration committee, will be valid for one year (beginning on March 6) and affects over 1,800,000 employees. Previous wages agreements had been concluded between the trade unions and employers' organizations separately, the increases in 1955 having varied from two to ten per cent in the different industries. The new nation-wide agreement was believed to be the first of its kind in the world.

(Svenska Dagbladet, Stockholm)

FEBRUARY 25—MARCH 3, 1956

A. SAAR TERRITORY. — General Elections. - Electoral Victory for Pro-German Parties. - New Cabinet formed by Dr. Ney. - Saar Parliament's Demand for Political and Economic Union with Germany. - Opening of Franco-German Negotiations.

Following the referendum of Oct. 23, 1955, in which the Statute for the proposed "Europeanization" of the Saar had been rejected, polling took place on Dec. 18 for a new Saar *Landtag* of 50 members. The elections resulted in a big majority for the three pro-German parties—the Christian Democrats, Saar Democrats, and Social Democrats, led respectively by Dr. Hubert Ney, Dr. Heinrich Schneider, and Herr Kurt Conrad—which had campaigned against the Saar Statute.

The elections were carried out on the basis of an electoral law approved by the former *Landtag* on Nov 18 (by 41 votes to 3, the Communists opposing) and accepted by the Commission of the Western European Union for the Saar (the new name given by the W.E.U. on Nov. 4 to the former European Plebiscite Commission). Voting was by proportional representation, the various parties presenting lists of candidates in the three electoral districts into which the Saar was divided (Saarbrucken, Saarlautern, and Neunkirchen). Parties obtaining less than five per cent of the total votes were ineligible for representation in the new *Landtag*. The franchise was exercised by all those who were entitled to take part in the referendum, provided they had been resident in the Saar for at least five years.

After prolonged negotiations between the pro-German and "pro-European" parties, conducted through the intermediary of Dr Welsch (the "caretaker" Premier who succeeded Herr Hoffmann after the referendum), it had been agreed to abstain from the use of such expressions as "separatist," "nationalist," "nazi," and "traitor to the fatherland" during the electoral campaign.

Nominations for the *Landtag* elections closed on Nov. 27, when lists of candidates were presented by nine parties : (i) the three pro-German parties, who were grouped into a *Heimatbund* as in the referendum campaign ; (ii) the two pro-European parties—the Christian People's Party and the Saar Socialist Party ; (iii) the Communists ; and (iv) three minor parties—the Christian Social Union, the German Democratic Union (neutralist), and the Supranational European People's Party. Herr Johannes Hoffmann, the former leader of the Christian Democratic Party, did not seek re-election and was succeeded in the party leadership by Herr Franz Ruland, who had been Minister of Economics in Herr Hoffmann's Cabinet. The Saar Socialist Party was led by Herr Peter Zimmer, the *Oberbürgermeister* of Saarbrucken.

The electoral campaign was conducted in a quiet atmosphere, and without any disturbances such as had occurred during the early stages of the referendum campaign The pro-German parties campaigned under the slogan "Union with Germany, friendship with France, and peace for Europe and the world," whilst the pro-European parties stressed the economic advantages of a "Europeanized" Saar and the important role it could play as a bridge between France and Germany. The German Federal Chancellor (Dr. Adenauer) issued an eve-of-the-poll appeal to the Saarlanders to vote for the Christian Democrats so that the Saar problem could be solved from "a German, European, and Christian point of view."

Out of an electorate of 664,077 voters, 600,200 (90.8 per cent) went to the polls, 589,110 votes being valid and 11,090 invalid. The results were as follows :

Pro-German parties :—	Votes	Percentage	Seats
Christian Democrats ..	149,516	25.4	14
Saar Democrats ..	142,593	24.3	12
Social Democrats .	84,408	14.4	7
Pro-European parties :—			
Christian People's Party	128,648	21.9	13
Saar Socialists .. .	34,284	5.8	2
Communists . .	38,696	6 6	2
Minor parties	10,995	1.6	—

The pro-German parties, with a total of 376,517 votes (63.8 per cent), thus obtained 33 seats in the new *Landtag*, whilst the two pro-European parties, with a total of 162,932 votes (27.6 per cent), received 15 seats. Despite their overall majority, the pro-German parties nevertheless failed to win the three-fourths majority (i.e. 38 seats in the *Landtag*) needed to change the Saar Constitution and eliminate the clauses describing the Saar as an autonomous territory economically linked to France.

The new *Landtag* held its first session on Jan. 2, 1956, when it elected Dr. Schneider (the leader of the Saar Democratic Party) as its President by 32 votes to 15, with three abstentions. Dr. Kratz (Christian Democrat) and Herr Schremer (Social Democrat) were elected vice-presidents of the *Landtag*.

Dr. Schneider visited Bonn on Jan. 5—Dr. Adenauer's 80th birthday—to convey to the Federal Chancellor greetings from what he described as "the tenth *Land* of the Federal Republic." He declared in a press statement that the pro-German parties aimed at the Saar's political incorporation in the Federal Republic "as quickly as possible," and at its economic incorporation "after a transitional period of about two years." Whilst emphasizing that the Franco-Saar customs union "must be abolished," and that French participation in Saar industrial and financial enterprises must also be ended, Dr. Schneider stressed that the Saar's political and economic incorporation in Federal Germany should be carried out in a spirit of Franco-German friendship and in harmony with the interests of France Germany, and Europe.

Cabinet formed by Pro-German Parties.

By 32 votes to nil, with 15 abstentions, the *Landtag* elected Dr. Ney on Jan. 10 as Prime Minister of the Saar in succession to Dr. Welsch ; two votes were invalid and one member was absent. The new Saar Cabinet, drawn from the three pro-German parties and including a non-party expert, was approved at the same time, as follows :

Dr. Hubert Ney (Christian Democrat)..	Prime Minister.
Herr Fritz Schuster (Saar Democrat) .	Interior.
Herr Norbert Brinkmann (Christian Democrat)	Economic Affairs.
Herr Kurt Conrad (Social Democrat)	Labour.
Herr Egon Reinert (Christian Democrat)	Education and Justice.
Professor Adolf Blind (non-party)	Finance.
Herr Erich Schwertner (Saar Democrat)	State Commissioner for Reconstruction.

Dr. Ney's Statement of Policy.

The new Ministers were sworn in after Dr. Schneider, in his capacity as President of the *Landtag*, had ruled that the oath required under the existing Saar Constitution did not prevent the Cabinet from amending its preamble. [This preamble describes the Saar as a territory independent of Germany and linked economically with France.] Prior to the swearing-in ceremony, Dr. Ney had made a statement of policy in which he emphasized that his Government would work for the Saar's political and economic union with the German Federal Republic.

Dr. Ney emphasized that the goal of his Government, and of all future Saar Governments, had been clearly laid down in the result of the October referendum—the political and economic reunification of the Saar with the German Federal Republic. The Saar's integration as a *Land* of the Federal Republic could only be attained, however, through an understanding between France and Germany. After saying that France had accepted the result of the October referendum "with dignity," Dr. Ney expressed the hope that new Franco-German negotiations on the Saar would take place "in the same conciliatory spirit" The Saar Government itself should take an active part in these negotiations, and not play the role of a mere passive observer.

Continuing, Dr. Ney emphasized that the existing Saar Constitution —and, in particular, its preamble—had been rejected in the October referendum, and that it was therefore his Government's task to dissolve the economic union with France and secure the territory's economic integration in the German Federal Republic. The economic ties with France, however, could not be cut "like a Gordian knot" ; their dissolution must be undertaken gradually and in a manner which would not be harmful to the Saar's economic interests, which were closely linked with both France and Germany. Economic relations which were mutually advantageous to the Saar, to Germany, and to France should be not only maintained but intensified, in which connexion Dr. Ney declared that "we are ready to co-operate with France in a spirit of true partnership."

Saar Parliament's Demand for Political and Economic Union with Germany.

On Jan. 31 the Saar *Landtag* adopted a joint declaration of principles, subscribed to by the Government (pro-German) parties and also by the Christian People's Party, setting forth its immediate political and economic demands. The declaration was worded as follows :

"The *Landtag* believes that it has the duty of translating into actuality the will of the people of the Saar, as expressed on Oct 23, 1955 [i.e in the referendum]. It expresses its firm determination to end the separation of the Saar from Germany, and will in due course take all necessary measures within its competence to attain this goal In consequence, it demands a solution of the Saar question on the basis of the following principles :

(1) The Saar is a part of Germany. Political union with the German Federal Republic, which represents the whole of Germany, must be achieved as rapidly as possible.

(2) Political union between the Saar and the German Federal Republic must be followed by re-integration with the Customs and monetary system of the Federal Republic.

(3) This objective should be attained by an economic integration in stages, carried out by agreement with the Federal Republic and France, as far as possible without creating new Customs barriers, and without detriment to the Saar's economy, to Saar industry, or to the working population of the Saar.

(4) The existing commercial and economic relations between the Saar and France must be maintained and developed, on principles of reciprocity, through agreements concluded between the German Federal Republic and the French Republic."

In this connexion the declaration listed the following as among the immediate objectives which would be sought by the *Landtag*—the administration of the Saar mines should be transferred to the Saar; the future of the coal deposits in the Warndt forest (at present worked by France) should be settled in a manner "corresponding to the legitimate interests" of the inhabitants of the Saar"; the Röchling steel plant should be returned to the Rochling family, in accordance with the *Landtag* resolution of Jan. 17 (see below).

Any compensation payments for French claims against the Saar or Saarlanders, which might be raised as part of the settlement of the Saar question, should be borne by the whole of Germany. Under no circumstances, however, should the economic conditions to be laid down for the Saar affect the incorporation of the Saar in the German Federal Republic.

(5) 'All efforts aimed at the creation of a common European market should be supported."

(6) Such a settlement should "serve Franco-German understanding as well as European unification."

The adoption of this declaration followed negotiations between the Government parties and the Christian People's Party, each of which had originally drafted a separate declaration of objectives. The Christian People's Party's text, whilst agreeing on political unification with Germany, had made no mention of economic reunification but had spoken only of guaranteeing full employment and developing the existing trade and economic relations between France and the Saar After inter-party discussions, however, it was agreed that the economic integration of the Saar and Germany should be achieved by stages, and in a manner not prejudicial to the economy of the Saar.

Demand for Return of Röchling Steelworks.

By 46 votes to nil, with four abstentions (the two Communists and two Saar Socialists), the *Landtag* passed a resolution on Jan. 17 demanding the abrogation of the Franco-German agreement of May 3, 1955 (see 14223 A) on the sale of the Rochling steelworks at Volklingen, and calling for its return to the Rochling family. [The agreement had provided for the sale of the concern for 200,000,000 Swiss francs and for equal French and German participation in its operation.] Spokesmen of the Government parties and the Christian People's Party maintained that the agreement was directly linked with the proposed European Statute for the Saar, and that it had been rendered obsolete by the rejection of the Statute in the October referendum.

The Rochling family itself had informed the French and Federal German Governments early in December that they no longer considered themselves bound by the agreement of May, 1955, in view of the result of the Saar referendum. It was claimed that an overwhelming majority of the employees were in favour of the return of the steelworks to its former owners.

Miscellaneous Measures.

Amongst other measures taken in the Saar since the referendum on the European Statute were (*a*) a decision by the Government of Dr. Welsch to revoke all expulsions, restrictions on residence, etc., ordered under the Hoffmann regime (Nov. 3, 1955); (*b*) the abolition by Dr. Welsch's Government of the former Information Department (also on Nov. 3); (*c*) a decision by the Social Democratic Metalworkers' Union (one of the two largest unions in the Saar) to leave the former Saar trade union federation and to join the recently-formed German Labour Federation of the Saar (Nov. 6); and (*d*) a resolution of the new *Landtag* to abolish the red, blue, and white Saar flag introduced by the Hoffmann Government and to restore the black, red, and gold tricolour of the German Federal Republic (Feb. 7, 1956).

Franco-German Negotiations.

Prior to the Saar elections, the French Foreign Minister (then M. Pinay) had had discussions on Nov. 13, 1955, with Dr. Adenauer at the latter's home at Rhondorf (near Bonn) on matters of Franco-German interest, including the Saar question, and on the international situation generally.

A communiqué said that the French and Federal German Governments were in "complete agreement" on international questions; that they had taken note of the result of the Saar referendum; and that they would seek a solution of the Saar problem, in consultation with the Saar Government, after the general elections for the Saar *Landtag*. It was stated that this solution would "take into account the essential interests of the two countries, especially in the economic field," and that the two Governments would "continue their efforts towards the construction of a balanced European edifice based on close co-operation between France and the German Federal Republic."

An official spokesman in Bonn said on Feb. 1 that the Saar *Landtag's* resolution on political and economic union "conformed to the programme" which the German Federal Government intended to follow in the forthcoming negotiations with France on the Saar question.

On Feb. 2, however, M. Pineau (the new French Foreign Minister) issued a statement declaring that the *Landtag* resolution could "only be regarded as the expression of a wish" and that "the actual position can only be modified in agreement with the French Government." After saying that the Rhondorf communiqué had made it clear that no unilateral action on the future of the Saar could be taken by the *Landtag*, M. Pineau added: "It is regrettable that the *Landtag* resolution makes no mention of French rights and interests. The French Government can accept no solution which does not take into account the essential economic interests of France, the volume of trade agreed between France and the Saar, and the necessary balance within the European organizations. . . ."

Franco-German negotiations on the Saar and other matters of common interest—including economic and cultural relations, and the proposed canalization of the Moselle River—opened in Paris on Feb. 20. The Prime Minister of the Saar, Dr. Ney, had previously visited Paris on Feb. 9 for discussions with M. Pineau, and Bonn on Feb. 17-18 for discussions with Herr von Brentano. It was stated after the Bonn discussions (in which Herr Conrad and Dr. Brinkmann also participated) that the Saar and Federal German Governments were in complete agreement on the policy to be followed in the Paris talks.

After being opened by M. Pineau and Herr von Brentano, the Franco-German negotiations were continued on Feb. 20-21 by M. Maurice Faure and Dr. Hallstein, the French and West German Secretaries of State for Foreign Affairs. It was agreed on the latter date, however, to suspend the talks until the beginning of March in order that experts of the two sides could study the memoranda presented by the French and Federal German Governments.

Although no official statement was issued, it was understood that there were considerable areas of disagreement between the two sides. According to the French and German press, these were mainly concerned with the following questions: (1) the future administration of the Saar mines; (2) the coal deposits of the Warndt forest, at present worked by France under lease, (3) the future fiscal system of the Saar; (4) the French economic position in the Saar after the end of the proposed transitional period, (5) the proposed canalization of the Moselle River.

It was understood that particular difficulties had arisen over the last-mentioned point, as the French Government were reported to have made acceptance of the Moselle project a condition for a general agreement on the Saar.

(Prev. rep. Saar Referendum, 14497 A.)

A. CHINA. — Latinization of Chinese Alphabet.

The New China News Agency announced on Feb. 10 that official approval had been given to a 30-letter Latin alphabet to replace the approximately 30,000 ideographic characters at present used in written Chinese. It was stated that the Latinized alphabet would include all the English letters except V; that five additional letters had been added to reproduce sounds common in Chinese—"a soft G sound, ZH, CH, SH, and NG"; and that the letter Y had been adapted as a sixth vowel, pronounced like the German U with a diaeresis (··) or *umlaut*. A number of consonants in the English alphabet would be altered for adjustment to Chinese pronounciation.

It was pointed out that the introduction of a Latin alphabet would not entail the immediate abolition of the ideographic script; that the two scripts would continue to be used side by side for the time being; and that the Latinized alphabet had been introduced for "discussion and trial" in the Government campaign to modernize Chinese writing and eradicate illiteracy. The Latinized alphabet would be applied to the Peking (Mandarin) pronunciation, which the Government aimed at promoting throughout China.

The scheme to Latinize the Chinese alphabet was drafted by a Chinese Written Language Reform Committee which had been appointed in 1952 under a directive issued by Mao Tse-tung. In addition to announcing this reform, the committee also announced that it had approved a new Mongolian alphabet in Cyrillic (Russian) characters, which would be introduced in Inner Mongolia during the next few years.

There are about 20 principal Chinese dialects (Mandarin, Cantonese, etc.) and some 200 minor ones, but only one form of written Chinese—the ideographic characters, which have been used for some 3,500 years. The necessity for memorizing some 30,000 of these characters, coupled with the fact that they are pronounced differently in different parts of the country, has been a principal reason for the high illiteracy rate hitherto prevailing in China.—(New York Times - Manchester Guardian)

A. UNITED STATES. — Protests by Communist Countries against U.S. Balloon Launchings.

Protests against the sending of balloons across their territory were made to the United States during February by the Soviet Union, the Chinese People's Republic, Poland, Hungary, Eastern Germany, Czechoslovakia, Bulgaria, Rumania, and Albania, whilst the U.S.S.R. also protested to Turkey and Western Germany against the use of their territory for the launching of such balloons. The protests referred both to balloons carrying propaganda leaflets, launched in Western Germany by the "Free Europe Committee" (a private organization financed by U.S. citizens), and to balloons carrying photographic and other equipment—all of which were stated to be a danger to air traffic and a violation of the territorial airspace of the countries concerned. Allegations that balloons carrying photographic equipment were designed for aerial photographic reconnaissance were denied by the U.S. Government, which emphasized that they had been launched solely for the purpose of obtaining and recording meteorological information in the interest of international scientific research.

The **Soviet Note to the U.S.A.**, which was handed to the U.S. Ambassador in Moscow on Feb. 4, said that "during January of this year a large number of aerial spheres with a diameter of up to 15 metres [about 50 feet] and carrying suspended apparatus of various kinds and other ballast were discovered in the Soviet airspace." These balloons, it was alleged, had been launched by "U.S. military organs from the territory of Western Germany and from U.S. air bases on the territory of several States bordering on the Soviet Union." The Note stated that apparatus carried by the balloons included automatic photographic cameras for aerial photography, radio transmitters, radio receivers, and other items, all of which had clearly been manufactured in the United States. In addition, it was alleged that "U.S. organizations" were continuing to launch into the Soviet airspace balloons carrying "pamphlets and propaganda literature hostile to the U.S.S.R."

After referring to the danger from the balloons to aircraft flying over Soviet territory, the Note declared: "The launching of these spheres into Soviet airspace . . . represents a gross infringement of Soviet airspace and is a violation of the universally accepted principles of international law that every State has full and exclusive sovereignty in respect of airspace over its territory. . . The said actions by U.S. military bodies represent a violation of the territorial integrity of the U.S.S.R., are contrary to the obligations assumed by the U.S. Government under the U.N. Charter, and are incompatible with normal relations between States. The Soviet Government . . . demands . . . the immediate cessation of the said inadmissible acts by the U.S. military organs."

The **Soviet Note to Western Germany** recalled that M. Molotov, the Soviet Foreign Minister, had raised the question of the balloons with Dr. Adenauer when the latter had visited Moscow in September last (see page 14426, first column), and said that Dr. Adenauer had then promised to look into the matter with the U.S. authorities; far from having abated, however, the sending of balloons over Soviet territory had assumed even larger proportions. The Soviet Government therefore asked the German Federal Government to take "prompt and effective action" to end the use of its territory for the despatch of balloons into Soviet airspace. The **Soviet Note to Turkey** requested that country also to take measures to ensure that its territory was not used in future for the despatch of balloons over Soviet airspace.

The **Chinese protest**, as quoted by Peking radio on Feb. 7, referred to the finding on Chinese territory of a large number of "military reconnaissance balloons designed to photograph topographical positions in China for military use." "In openly sending military reconnaissance balloons over Chinese territory," it declared, "the U.S.A. has committed a grave encroachment upon the territorial airspace of China. We strongly protest against this and demand that the U.S. Government stop this provocative action immediately." The **Polish Note** referred to specific incidents in which, it asserted, U.S. balloons had floated near the aircraft carrying Mr. Lester Pearson, the Canadian Minister for External Affairs, over the Lodz area on Oct. 5, 1955, whilst other balloons had on the same day, come dangerously near a British courier plane *en route* from Berlin to Warsaw. The **Hungarian Note** alleged that the balloons had caused two fatal accidents to Hungarian aircraft.

The **U.S. reply to the Soviet Note** (released on Feb. 8) referred to "an apparent confusion" in the Soviet Note between "a publicized meteorological operation and previous Soviet allegations concerning the launching of propaganda balloons directed towards the Soviet Union." The U.S. Note recalled that oral denials had already been given to the Soviet Foreign Ministry about official U.S. participation in the launching of propaganda balloons, and declared: "The U.S. Government wishes to reaffirm that it is not directly or indirectly participating in any project to despatch propaganda balloons over the Soviet Union."

With regard to meteorological balloons, the Note stated that the U.S. Government was "happy to supply information complementary to that which is already public knowledge." Under U.S. auspices, a meteorological survey was being carried out by the launching of balloons which remained aloft for several days and "at a very considerable height," thus placing them out of the range of commercial aircraft. A number of balloons had been launched in several parts of the world, and many had been passing over the United States. One particular balloon, sent up on Jan. 8 in California, had crossed the United States, the Atlantic Ocean, and the Eurasian continent and had been identified on Jan. 20 transmitting homing signals from the Western Pacific. Whilst most of the balloon flights had taken place inside the U.S.A., the announced opening of additional U.S. research stations in Europe, Alaska and Hawaii had not led to objections by any Government.

Giving details of the equipment carried by the balloons, the Note said that they included instruments to measure and record meteorological phenomena such as jet streams, and photographic apparatus to provide pictures of cloud formations bearing on air movements at various velocities. Much valuable scientific information was being accumulated, and it was hoped that this method of meteorological research would contribute substantially to the forthcoming International Geophysical Year programmes. The declared purpose of the project was made clear by the fact that the equipment itself contained instructions in several languages, including Russian, for its recovery and delivery to the authorities charged with evaluation of the data obtained. The Note said that it would be "much appreciated if, in the interest of scientific research, the Soviet Government would return the instruments which had come into its possession."

In conclusion, the U.S. Note explained that all the balloons were equipped with safety devices and constituted no hazard, even to dense civilian air traffic, and expressed the U.S. Government's willingness to explain further to the Soviet Government the safety measures incorporated in the project. Finally, it stated that "provisionally, in order to avoid misunderstandings and in view of the Soviet Government's objection," the U.S. Government would seek to avoid the launching of balloons which, on the basis of known data, might cross the U.S.S.R.

The U.S. Air Force had stated on Feb. 6 that 500 weather balloons had been launched since the start of the current programme on Jan. 8—200 from "Scotland and other places in Europe," and 300 from the U.S.A., Japan, Okinawa, Alaska and Hawaii.

Mr. Dulles, the U.S. Secretary of State, answered questions about the balloons at a press conference on Feb. 7.

The U.S. Government, he emphasized, had not sent, either directly or indirectly, any propaganda balloons towards Soviet territory. Balloons of this type were launched by private organizations operating outside the United States, but the U.S. Government could not control them, nor had it any disposition to try to do so. With regard to the legal aspect of despatching balloons over other countries' territories, Mr. Dulles said that although the law was not clear, the U.S.A. felt that it had a perfect right to send up weather balloons provided that they did not interfere with anybody else's use of the air. Weather balloons were designed to rise to 50,000 feet, at which height they did not interfere with air traffic, if they failed to rise above 30,000 feet shortly after launching, a barometric device assured their destruction.

Mr. Dulles also stressed that charting the velocity and direction of jet streams in the upper atmosphere would give valuable information on weather and temperature changes; that the very nature of the project required balloons to travel long distances, and that their flight could not be predicted. When the data gathered by the balloons had been collated, it would be made available to all nations participating in the International Geophysical Year.

On Feb. 9 the Soviet Government called a conference of foreign press correspondents in Moscow at which it exhibited a number of the balloons and radio and photographic equipment said to have been sent across Soviet territory by the U.S. Government.

The spokesman of the Soviet Foreign Ministry (M. Ilyichev) reiterated the Soviet charges that the equipment had been used for aerial photographic reconnaissance, and said that other balloons had been used for carrying leaflets and propaganda literature hostile to the Soviet Union. He added that even if the balloons had been intended for meteorological research, the launching of them over Soviet territory would, in the Soviet view, be a violation of the territorial integrity of the U.S.S.R.

A Soviet Army officer (Colonel Tarantsov), who was described as a "specialist", stated at the press conference that "a most thorough examination of the apparatus had failed to disclose any equipment capable of recording meteorological data or any radio equipment which could have transmitted data to the base from which it was launched." He expressed the view that "all this equipment was therefore intended exclusively for aerial photography and might be described as a flying camera." He displayed an aerial photograph, said to be of a Turkish military airfield, which he claimed had been taken from a balloon caught over the Soviet Union, and said that there were also many photographs of Soviet territory. Colonel Tarantsov stated that the apparatus carried by the balloons was able to record the map co-ordinates of every photograph taken, and that the camera was equipped with sufficient film to take 450-500 photographs.

Further Soviet Notes were delivered to the U.S. and Turkish Ambassadors in Moscow on Feb. 18 and Feb. 20 respectively. In the Note to the U.S.A., the Soviet Government rejected the U.S. explanation about the balloons, saying that it had been refuted by "expert investigation." It reiterated the previous charges about aerial reconnaissance photography and about

the danger to aircraft, and offered to exhibit its specimens of U.S. balloons in Washington, London, Paris, or any other city to prove its charges. In the Note to Turkey, the Soviet Government again referred to the "serious violation" of Soviet territorial integrity and the infringement of international law, and asked whether the Turkish Government would consider sending specialists to Moscow to inspect balloons and equipment sent over Soviet territory.

In a reply on Feb. 12 to the first Soviet Note, the Turkish Government had pointed out that the balloons had been released in co-operation with the U S. services for scientific research on weather conditions at high altitudes. It also pointed out that the fact that their release had been publicized in the Press at the time showed that there was no ulterior motive. In view of the Soviet objections, however, measures had been taken in conjunction with "competent American services" to avoid similar incidents in the future.

The Czechoslovak Government sent a further protest to the U.S.A. on Feb. 26 against the release of balloons over its territory from Western Germany. The Note alleged that a leaflet balloon had caused a Czechoslovak civil aircraft to crash on Jan. 18 with the loss of 22 lives, and demanded that the U.S. Government should "punish with the utmost severity" those responsible for having launched it. The Free Europe Committee, in a statement on Feb. 22, denied that a balloon carrying leaflets had been responsible for the disaster. Whilst expressing "deep sympathy" for those who had lost their lives, the statement said that launching records proved that no balloons had been launched towards the region of Slovakia—where the crash took place—either on Jan. 17 or Jan. 18.—(New York Times - New York Herald Tribune - Times - Manchester Guardian - Le Monde, Paris - Soviet Weekly)

A. FINLAND. — Election of President Kekkonen.

Dr. Urho Kekkonen (55), the Prime Minister and leader of the Agrarian Party, was elected President of Finland on Feb. 15 for a six-year term in succession to President Juho Paasikivi (85), whose term of office was due to expire in March.

The presidential election had officially begun on Jan. 16-17, when elections were held for the Electoral College of 300 members which, under the Finnish Constitution, elects the President of the Republic. All the political parties presented candidates for the presidency, the nominees being Dr. Kekkonen (Agrarian); M. Karl-August Fagerholm (Social Democrat), the President of the Diet; Dr. Sakari Tuomioja (Conservative), Finnish Ambassador in London; M. Ralf Torngren (Swedish People's Party), a former Prime Minister; M. Eino Kilpi, nominated by the (Communist-dominated) People's Democratic Union; and M. Rydman, of the Finnish People's Party (Liberals). About 70 per cent of the electorate went to the polls, the results being as follows: Dr. Kekkonen, 88 seats in the Electoral College; M. Fagerholm, 72; Dr. Tuomioja. 57; M. Kilpi, 56; M. Torngren, 20; M. Rydman, 7.

When the Electoral College met on Feb. 15, Dr. Kekkonen was elected to the Presidency on the third ballot with the minimum possible majority—151 votes, against 149 for M. Fagerholm. [The Presidency goes to the candidate who first obtains a simple majority of the 300 electors, not more than three ballots being permitted and the final ballot being restricted to the two leading candidates in the second ballot.] After the first ballot, in which all groups voted for their own candidates, the nominations of Dr. Tuomioja, M. Kilpi, M. Torngren, and M. Rydman were withdrawn and the name of President Paasikivi put forward in their stead, although the outgoing President had not formally offered himself for re-election. The second ballot resulted in 114 votes for M. Fagerholm, 102 for Dr. Kekkonen, and 84 for President Paasikivi—an inconclusive result. The third and final ballot was thus contested by M. Fagerholm and Dr. Kekkonen, the latter being elected. In addition to receiving the 84 Agrarian votes, Dr. Kekkonen received the 56 votes of the People's Democratic Union, as well as the votes of 11 other electors.

President Kekkonen, a lawyer by profession, had been Prime Minister since October 1954, and had also headed several Governments between 1950 and 1953. A short biography is given in 10790 C.—(Berlingske Tidende, Copenhagen - Svenska Dagbladet, Stockholm - Times - Le Monde, Paris - New York Times) **(Prev. rep. Presidential Election, 10790 C; Dr. Kekkonen, 14073 A.)**

B. BRAZIL. — Ending of State of Siege.

The state of siege in Brazil, proclaimed on Nov. 25 in order to prevent action being taken to impede the inauguration of Señor Kubitschek as President, was ended on Feb. 15 under a Bill signed by President Kubitschek.—(New York Times) **(Prev. rep. 14704 B.)**

C. OBITUARY. — Lord Trenchard.

Marshal of the R.A.F. Lord Trenchard, the principal architect of British air power and creator of the Royal Air Force in its present form, died in London on Feb. 10, aged 83.

Hugh Montague Trenchard was born on Feb. 3, 1873, the son of an Army officer (Capt. Henry Montague Trenchard) descended from an old Dorset family Unsuccessful in the examinations for Woolwich and Dartmouth, he entered the Army in 1893 (being subsequently commissioned in the Royal Scots Fusiliers) and served for the following 20 years on the North-West Frontier, in the South African War (in which he was severely wounded), and in West Africa

After being invalided home from Nigeria in 1912 he became interested in aviation, qualified as a pilot and a flying instructor, and on the outbreak of war in 1914 was seconded from the Royal Scots Fusiliers to the Royal Flying Corps, then part of the Army. Eight months later he was appointed to the command of the R F.C. on the Western front, and quickly won a reputation as a distinguished and aggressive commander His primary objective—the attainment of decisive air superiority over the enemy—was achieved before the battle of the Somme. and from that time onwards the R F.C. maintained a supremacy in the air which, in spite of shortcomings in aircraft production and design, it held until the end of the war

In January 1918—in which month he was awarded the K.C.B — Sir Hugh Trenchard was recalled to London to become the first Chief of the newly formed Air Staff, following the creation of the Royal Air Force through the merger of the R.F.C. and the Royal Naval Air Service He resigned a few weeks later owing to differences of opinion with the Secretary of State for Air, Lord Rothermere, but in August 1918 was appointed to the command of the projected Inter-Allied Independent Air Force and made responsible only to the Supreme Allied Commander, Marshal Foch. Owing to the German surrender three months later, however, this new air force was not created. [The Allied war plans of 1918 had envisaged the creation of an Independent Air Force, with large contingents of bombers from all the principal Allies, to carry out a heavy air offensive against Germany in 1919 if the war continued into that year.]

Sir Hugh Trenchard, whose war services were rewarded by a baronetcy and a grant of £10,000 by the House of Commons, was reappointed Chief of Air Staff in 1919 by Mr. Winston Churchill, who then held the portfolios of War and Air in Mr. Lloyd George's Coalition Cabinet During the ten years in which he held that post (1919-29) he laid the foundations of the R A F in its present form, and established the organization which enabled it to play its outstanding role in the Second World War. Among the innovations carried out by him while Chief of Air Staff were the short service commission, the auxiliary squadrons, and the university air squadrons He had been made an Air-Marshal in 1919, an Air Chief Marshal in 1922, and the first Marshal of the R.A F. in 1927, and received a viscounty in 1930 after his retirement.

In 1931 Lord Trenchard became Commissioner of the Metropolitan Police, a post he held until 1935. In this capacity he carried out a number of important reforms—the "Trenchard reforms," embodied in the Metropolitan Police Act, 1933—which included the creation of the Police College at Hendon, the short-service scheme for recruiting police on a 10-year engagement, and the extended application of scientific methods to police work. On leaving the police service he became chairman of the United Africa Company, a position he held from 1936 to 1953.

Lord Trenchard held many British and foreign honours, and was a member of the Order of Merit. He was the founder of the R A.F. Benevolent Fund, which, since its establishment in 1919, has disbursed over £6,000,000 for the relief of distress among members of the R A F and their dependants He was succeeded in the viscounty by his second son, Capt Thomas Trenchard (32). His elder son, Hugh Trenchard, was killed in action in North Africa in 1943.

The ashes of Lord Trenchard were interred on Feb. 21 in Westminster Abbey, being buried in the Royal Air Force Chapel. The funeral service, conducted by the Archbishop of Canterbury, was attended by the Duke of Edinburgh (representing H.M. the Queen), Queen Elizabeth the Queen Mother, Sir Anthony Eden and other Ministers, Sir Winston Churchill, leaders of the armed forces, the Commonwealth High Commissioners, and foreign Ambassadors.

(Times - Daily Telegraph - Manchester Guardian)

D. GEOGRAPHY. — Ojos del Salado found to be Highest Peak in Western Hemisphere.

A Chilean Army expedition which had climbed the Andean peak of Ojos del Salado, in northern Chile, reported on Feb. 7 that it had been found to be higher than Aconcagua, hitherto believed to be the highest peak in the Western hemisphere. Ojos del Salado (some 280 miles south-east of Antofagasta) was previously thought to be about 22,550 feet high, but was now reported to be at least 23,293 feet, compared with the 23,080 feet of Aconcagua. (New York Times)

E. UNITED KINGDOM. — January Trade Figures.

Imports into the United Kingdom in January totalled £346,300,000, exports £257,900,000, and re-exports £14,200,000, the adverse trade balance thus amounting to £74,200,000. (Board of Trade Journal) **(Prev. rep. 14700 E.)**

A. UNITED KINGDOM. — Inland Waterways. - £5,500,000 Development Plan. - Committee of Inquiry into Future of Inland Waterways.

The general manager of the inland waterways division of the British Transport Commission (Sir Reginald Kerr) announced on Jan. 19 that, unless tighter Government control of capital expenditure intervened, the Commission planned to spend £5,500,000 during the next five years on developing the principal inland waterways.

Sir Reginald said that development would be concentrated on 325 miles of the seven wide waterways which carried substantial traffic and offered scope for commercial development Although these seven waterways represented only 15 per cent of the total mileage of inland waterways vested in the Commission, they had carried 8,194,000 tons of goods in 1954, or two-thirds of the total canal traffic. Estimated expenditure would be as follows:

	Tonnage passing in 1954 Tons	Proposed expenditure £
Aire and Calder Navigation Canal	2,581,150	765,000
Sheffield and South Yorkshire Navigation	941,250	614,000
River Trent	715,390	595,000
River Weaver	626,110	387,000
Grand Union Canal (below Berkhamsted)	736,150	1,396,000
River Lea (below Enfield Lock)	2,096,280	852,000
River Severn (including Gloucester-Berkeley Canal)	497,790	891,000
Total	8,194,120	5,500,000

Even in their present state, Sir Reginald stressed, these waterways had shown "a substantial and progressive increase in traffic since 1949," about 350,000 tons more having been carried in 1954 than in 1953 Although the Commission's fleets of barges and those of private traders were being modernized and extended, the canals were not being used to their full extent, and the Commission was "doing everything possible to attract traffic" and would "welcome private enterprise" Much of the work under the plan was essential maintenance and would be started immediately, but those parts which involved capital expenditure would be subject to considerations of the national investment policy and would be put in hand as economic conditions permitted

The greatest expenditure (£3,345,000) would be on bank protection and navigation works (necessitated by the effect of the general use of powered craft), followed by widening of locks (£1,105,000), additional dredging craft and plant (£636,000), and modernization of workshops and premises (£414,000) The plan did not include the improvement of carrying craft, warehouses, etc , for which schemes totalling £500,000 had already been announced in respect of the Trent and the Aire and Calder waterways, with many other smaller projects authorized.

Sir Reginald added that the remaining 994 miles of "narrow" waterways which the Commission considered worth retaining for transport purposes (and all of which were at present open for navigation) would have improved maintenance, whilst further narrow boats would be brought into operation

The Minister of Transport and Civil Aviation (then Mr. Boyd-Carpenter) stated in a parliamentary written answer on Nov. 16, 1955, that complete information about the tonnage carried on inland waterways was not available. Figures for the majority of canals and inland waterways (excluding estuarial rivers and the Manchester Ship Canal) were as follows: 1938, 12,952,000 tons; 1948, 12,218,000 tons; 1950, 12,817,000 tons; 1951, 13,341,000 tons; 1952, 13,430,000 tons; 1953, 13,714,000 tons; 1954, 13,253,000 tons; 1955 (to Sept. 11), 8,950,000 tons (estimated).

The terms of a private Bill authorizing the British Transport Commission, after consultations with interested parties, to prepare a scheme for the extinguishment of navigational rights on the Kennet and Avon Canal between Reading and Bath (as had been recommended by the Board of Survey of Canals and Inland Waterways, (see 14316 A) were published on Dec. 3, 1955.

The proposed closing of the canal had aroused strong public opposition, and on Nov 25 a meeting at the House of Commons—attended by M P s of all parties, as well as representatives of local authorities, industrial firms, yachtsmen, and other canal users—passed a resolution demanding an impartial public inquiry into "the best method of administering navigable waterways so as to retain, restore, and develop them for commercial and recreational navigation and at the same time promote . . . their uses for water supply, land drainage, angling, and as rural and urban amenities"

A petition to H M the Queen, bearing over 20,000 signatures and urging that the Kennet and Avon Canal should be preserved, was despatched from Bath to London *via* the canal on Jan. 16, and presented to the Minister of Transport on Jan. 28

Mr. Watkinson, the newly-appointed Minister of Transport and Civil Aviation, announced in the House of Commons on Feb. 1 that, in view of the interest aroused by the report of the Board of Survey appointed by the B.T.C. in 1954 (see 14318A), the Government had decided that there was need for a further inquiry on a broader basis, and had accordingly appointed an independent committee under the chairmanship of Mr. Leslie Bowes, managing director of the Pacific Steam Navigation Company.

The committee was given the following terms of reference: "To consider and report on the future of the country's system of inland waterways and to make proposals for any measures necessary to achieve (i) the maximum economic use of the system, (ii) the future administration of and financial arrangements for such inland waterways as cannot be maintained economically for transport purposes, having regard in particular to the requirements of public health and safety and to the facilities which these waterways can provide for purposes other than transport, such as recreation, water supply, land drainage, and disposal of effluents, and (iii) the conversion of canal sites to other purposes when this is considered desirable and practicable. To consider the present law relating to the closing of waterways to navigation, and to make recommendations"

The other members of the committee, apart from the chairman, were: Mr. John Corbett, partner in Peat, Marwick, Mitchell and Co., chartered accountants; Mr. G. C. Godber, Clerk to the Shropshire County Council; Mr. H. E. Hopthrow, assistant secretary, Imperial Chemical Industries; Mr. W. A. Muddell, chairman, Land Drainage Committee, River Boards Association; Mr. Francis Ritchie, a member of the National Parks Commission; Mr. Michael Rowe, Q.C.; and Mr. John Wilson, general manager and secretary, Clyde Navigation Trust.—(Times - Daily Telegraph - Manchester Guardian)

B. LONDON. — The Elephant and Castle Scheme.

A scheme to convert the Elephant and Castle area, badly bombed during the war, into "the main commercial, shopping, and entertainment centre" of South London was sanctioned by the London County Council on Feb. 7. The total cost will be about £15,000,000 (much of which is expected to be provided by private enterprise), and the whole project is estimated to take 10 to 15 years for its completion. During the next five years the L.C.C. will spend about £3,500,000 on acquiring 30 acres for redevelopment.

The scheme, as approved by the L C C. Town Planning Committee, includes the construction of two traffic roundabouts; extensive road-widening and road-improvement works, involving the conversion of Newington Butts into a four-stream traffic road; new shopping centres, including a 17-storey building, a pedestrian concourse; and pedestrian subways No decision has been taken about the Elephant and Castle public house (from which the area gets its name), but it is expected to be re-sited on one of the roundabouts The area is at present one of the most congested traffic centres in London, being at the intersection of the approaches to six Thames bridges and several main roads to the south

It was stated at County Hall that the scheme would be the biggest of its kind to be undertaken by the London County Council since the redevelopment of Kingsway.

(Times - Daily Telegraph)

C. INTERNATIONAL TIN AGREEMENT. — Ratification by Majority of Producing and Consuming Countries. - Agreement in Force.

The Indonesian Parliament on Feb. 1 approved the ratification by Indonesia of the International Tin Agreement, thus completing the necessary action by a sufficient number of producing and consuming countries for the agreement to be brought into force.

The agreement had earlier been ratified by Canada (Sept 13, 1954); Denmark (Nov. 19, 1954); Australia (Nov 20, 1954); the United Kingdom, and also by the U K on behalf of Malaya and Nigeria (Dec. 15, 1954), Bolivia (Dec 29, 1954), India (Jan. 15, 1955); Ecuador (March 7, 1955); Belgium, and also on behalf of the Belgian Congo and the Trust Territory of Ruanda-Urundi (May 16, 1955); Spain (June 7 1955); France (Sept. 16, 1955), and the Netherlands (Nov. 5, 1955)

Dr. Walter Hallstein, State Secretary in the Federal German Foreign Ministry, had announced on Sept. 23, 1954, that the German Federal Republic had decided not to join the International Tin Agreement for the time being because she thought that consumer countries' interests were insufficiently represented.—(International Tin Council, The Hague - Indonesian Embassy Press Dept., London - Financial Times)

(Prev. rep. 13710 A.)

D. WORLD FEDERATION OF TRADE UNIONS. — Headquarters to be transferred to Rome.

Following the Austrian Government's decision to withdraw legal recognition from the Vienna headquarters of the World Federation of Trade Unions, the Federation's secretariat announced on Feb. 6 that it would transfer its headquarters to Rome. At the same time it issued a protest against the Austrian decision, alleging that it was based on the despatch from Vienna of letters and literature which bore the Federation's name without its authority and were "crude falsifications."

(Le Monde, Paris) **(Prev. rep. W.F.T.U., 14703 C.)**

A. MIDDLE EAST.—Arms Supplies to Middle Eastern Countries. - British White Paper on Surplus Arms Shipments. - House of Commons Debate. - Mr. Lester Pearson on Canadian Shipments. - U.S. Tank Shipment to Saudi Arabia. - Ban on Swiss Arms Shipments.

A White Paper (Cmd. 9676) on the export of British war surplus material, dealing especially with recent shipments of reconditioned British tanks from Belgium to Egypt, was published on Jan. 19. Concern about such shipments had been voiced in Britain when it was reported on Dec. 21 that an Egyptian cargo ship, the *El Kahira*, had sailed from Antwerp on that date with a cargo of British war surplus tanks. On the same day Customs officers at Cardiff detained 35 railway wagons containing several hundred tons of steel tank tracks, understood to be Army surplus, which were in transit to Belgium. It was subsequently announced on Jan. 13 that this consignment had been seized.

In a parliamentary written answer on Dec. 12, Mr. Turton (then Under-Secretary, Foreign Office) stated that the Government had received reports that some equipment, for which export licences had been granted on the understanding that it would be used for civilian purposes, had been reconditioned and re-exported as war material, and that the Government was taking measures to prevent this evasion. On Dec. 31 the Foreign Office announced that no export licences were now being granted for the export of surplus war material, and that licences had not been issued for the export of any significant quantities of surplus war material for several months; the announcement added that during this period no licences had been issued for tanks. A spokesman of the Belgian Foreign Ministry had stated on Dec. 29 that talks between the British and Belgian Governments on the export of disused war material had been going on for some time.

Mr. Hugh Gaitskell, Leader of the Opposition, accompanied by two other members of the Labour "shadow Cabinet," Mr. Robens and Mr. Younger, called at 10, Downing Street on Jan. 2 to discuss with Sir Anthony Eden and other Ministers the export of surplus war stores and the Government's policy of exporting arms to the Middle East. Mr. Gaitskell pressed for the issue at the earliest possible moment of a White Paper disclosing in full the facts of the situation. Meanwhile, he asked specifically that, in addition to the suspension of export licences for surplus war material, the actual exports should be completely banned, and that the Belgian Government should be invited to take similar action immediately. He also asked that the matter be debated in Parliament before the Prime Minister and the Foreign Secretary left for Washington at the end of January.

A statement issued from 10, Downing Street before the meeting reiterated the Government's intention to do all in their power to prevent an arms race in the Middle East "whatever the source of supply." It said that no licences would be granted to private dealers for the export of war materials which might be reconditioned and re-exported as weapons of war, unless the Government of the country of destination was prepared to give a guarantee against this happening.

The Government's White Paper, which was concerned solely with exports of surplus war materials by commercial firms in Britain to commercial firms abroad, showed that in the ten years 1945-55 over £800,000,000 of "surplus" had been disposed of—some £675,000,000 in the four years 1945-49. Of the total, about £300,000,000 worth had been disposed of overseas, of which the total value of the *Sherman* and *Valentine* tanks which had given rise to the recent public concern amounted to some £200,000. Other points from the White Paper are summarized below.

Government Policy. The White Paper began with a statement of Government policy, worded as follows: "The general policy of H.M. Government on the sale of arms is primarily governed by political and strategic considerations; only when these have been satisfied are economic considerations—i.e. the contribution of arms sales to export earnings—taken into account

"In respect of the Middle East, the policy is governed by the Tripartite Declaration of 1950. This Declaration acknowledges the right of the Arab States and Israel 'to maintain a certain level of armed forces for the purposes of assuring their internal security and their legitimate self-defence, and to permit them to play their part in the defence of the area as a whole' H.M. Government have supplied, and continue to supply, strictly limited quantities of arms in accordance with this Declaration. On this, as on other matters arising from the Declaration, they are in close consultation with the co-signatories (the United States and France) and also, as occasion arises, with other friendly countries who may be potential suppliers There are many foreign countries which supply arms, and it will be realized that not all of them take the same view of their international responsibilities as the U.K. and her allies. For their part H.M. Government have tried, and will continue to try so far as lies within their power, to prevent an arms race in the Middle East

"Subject to these considerations and to their obligations under the Tripartite Declaration, it is the policy of H.M. Government to supply, or to authorize manufacturers in the U.K. to supply, reasonable quantities of military equipment to Middle Eastern countries Spares are also supplied for the maintenance of equipment already exported under Government authority. (Among such supplies of spares are those recently reported as having been shipped from Liverpool in the *Star of Suez*.) It has been the policy of successive Governments not to disclose details of authorized exports of military equipment to foreign Governments, whether in the Middle East or elsewhere The present document, therefore, is concerned solely with exports of surplus war material by commercial firms in this country to commercial firms abroad.

"Since the war millions of tons of surplus obsolete and worn-out material of every description have been disposed of in this country and in the various theatres of war abroad, both by ourselves and by our allies. Most of the equipment was sold in 1946. 1947, and 1948 The process is still going on. and will continue as re-equipment progresses and Service requirements change, but on a smaller scale, as the large stocks left over from the war are now virtually exhausted. . . ."

Demilitarization of Equipment. The White Paper stressed that no surplus field, anti-aircraft, anti-tank, or naval guns had been disposed of to private traders except as scrap Before disposal, the breech-block (which carries the firing mechanism) was removed and made unusable, and the breech-ring was also cut so that even if breech-blocks could be obtained elsewhere, the guns would still be useless All the guns were sold subject to an obligation on the buyer to melt them down and furnish a certificate that this had been done. Automatic weapons were crushed in Army depots for sale as scrap, non-automatic rifles, small arms, and their ammunition were sold only to registered dealers, and other ammunition was either broken down or destroyed. Tanks, armoured cars, etc, had any automatic or light weapons, wireless, and periscopes removed. and the breech-blocks were taken out of the heavy guns before the vehicles were sold Combat aircraft were only sold to private persons under a contractual undertaking to reduce them to scrap or spares The effect of these various measures was "to render all such equipment unserviceable as weapons of war without major repairs at a cost which would be out of all proportion to the military value of the reconditioned article"

Export Control Machinery. Applications for licences to export military material had to state the proposed destination and use of the goods, the name of the foreign buyer, and the nature of his business. They were then passed, through an inter-Departmental Committee under Ministry of Defence chairmanship, to all the Departments which might have an interest in the transaction on foreign policy, strategy, supply, or economic grounds, to ensure that licences were granted in accordance with Government policy The Board of Customs and Excise were then responsible for seeing that goods subject to export licensing were not exported unless the necessary export licence had been issued.

Recent Transactions. *Shervicks.* These were former *Sherman* tanks converted into heavy-duty "crawler" tractors by stripping them of their upper armour and otherwise modifying them so that they were "of no more military use than an ordinary heavy farm tractor" Some of the parts might be of use for military purposes, but *Sherman* tank spares could in any case be obtained in many foreign countries. The *Shervick* had been designed for, and used by, the Overseas Food Corporation in place of heavy tractors (which were not then available) for the purpose of the East African groundnuts scheme. When this scheme was abandoned, 51 *Shervicks* were sold to the Israeli East African Purchasing Organization, the Israeli Government had stated that they were still in the hands of the Government-sponsored organization which took delivery of them in the first instance, and were all still in use in connexion with agricultural projects A further 398 *Shervicks*, sold to the Belgian firm of Jef Peeters et Fils, had been shipped to Belgium in 1954 and 1955, and the Belgian Government had given an assurance that they would not permit them to be exported from Belgium to any non-NATO country, either in the form of tractors or as spares

Sherman Tanks A licence had been issued in February 1954 to the British firm of Rotinoff Construction Ltd for the export of 54 demilitarized *Sherman* tanks to the French firm of *Societé Aero-Marine* In support of their application, the exporters had stated in writing that their clients had informed them that the tanks would be broken down for scrap and that the engines would be reconditioned and offered for re-sale A further licence had been issued to Rotinoff Construction Ltd in November, 1954, for the export of 55 more demilitarized *Shermans* to the same firm. In applying for this licence the firm had produced a letter from their clients which stated, *inter alia*. "We again confirm that this entire transaction has been authorized by the French Government and will be under special supervision by the French Customs authorities." A letter from the French firm had also stated that the 54 demilitarized tanks previously delivered were being dismantled.

In March, 1955 (the White Paper continued) information had been received from the Middle East of the despatch of 55 *Sherman* tanks to Israel from France This had immediately been investigated in co-operation with the French Government, who had stated on March 25 that some 50 *Shermans* had passed in transit through Cherbourg from the United Kingdom. As this did not correspond with the conditions under which export from the U.K. had been authorized, the French authorities had been asked to make further inquiries and to ensure that the tanks were not being reconditioned in France for re-export As a result of enquiries, the French Government stated on July 8 that the tanks had not been reconditioned in France but that some of them had gone on to Israel Meanwhile, in May 1955, Messrs Rotinoff had been advised by H.M. Government that no more exports of *Shermans* to the French firm would be permitted.

Valentines. After emphasizing that the term "Valentine tank" had been variously applied to the tank itself, to a self-propelling gun adapted from the tank, and to a bridge-laying vehicle, the White Paper said that no *Valentine* tanks, as such, had been sold since January 1948, except four to Australia However, 468 self-propelled gun-mountings, with their breech-blocks and detachable equipment removed, had been sold in the U.K in January 1955.

In May 1955 a licence had been issued to a Mr J Dawson-Ellis, of London, authorizing the export to Jef Peeters et Fils of "100 used Valentine self-propelled mountings for tractors," the exporters stating in support of their application that the machines were to be used for heavy haulage work. These had subsequently been shipped to Belgium, and on July 21 H.M. Government had been notified by the Belgian Government that the latter had issued a licence for the export from Belgium to Egypt of 100 demilitarized *Valentines*, described by the Belgians as "tanks bought in the U.K." The Belgian Government had stated that they could not revoke this licence, but would consult H.M. Government before approving any future exports of this kind. At that time the U.K Government had been considering an earlier request from the Egyptian Government for "100 demilitarized *Valentines*" from the U.K. as personnel carriers. In view of the Belgian Government's statement, it had been decided to refuse the export of demilitarized *Valentines* to Egypt from the U K , but not to prevent the shipment to Belgium of the remaining 15 *Valentines* covered by the export licence The Belgian authorities had since stated that these 100 *Valentines* had been imported into Belgium as "demilitarized tanks suitable for tractors" and that, both when they were imported and when they were re-exported, they had had guns but no breech-blocks or gun-sights.

Earlier, in March 1955, an export licence had been issued to a Mr. Cockerill of the Trading and Shipping Company (London) Ltd authorizing the export to *Etablissements Van Heyghen Frères* (Ghent) of 4,000 tons of "scrap armoured vehicles and parts relative thereto." The applicant had stated in a letter, accompanied by an official Belgian import certificate, that the equipment would be broken up on arrival in Belgium and scrap metal recovered from it. Shipments, which had taken place between March and October 1955, had included 259 *Valentine* self-propelled mountings, 146 of which were said to have had engines and gearboxes and 113 to have been without them In November and December information had been received that the *Valentines* exported from the U K. under the licence might be re-exported to Egypt, and the licence was therefore revoked as a precautionary measure on Dec. 12 The Belgian Government had since confirmed that 51 old and demilitarized *Valentines* had been received in Belgium under this licence and had subsequently been re-exported. These, said the White Paper, were the vehicles which were shipped in the *El Kahira* in December.

The White Paper then referred to the 400 tons of tank tracks seized by the Customs authorities at Cardiff, but withheld any further comment on the matter as the case was still *sub judice*

Aircraft. Seventy-three surplus *Mosquito* aircraft, with all their armament removed, had been sold by the Admiralty in 1953 to a Mr Short without the usual undertaking to reduce them to scrap or spares Licences to export 20 of these aircraft to Israel had been issued , the remainder were still in the U K., and a number of them had been scrapped by Mr Short.

Action by H.M. Government. From the time when doubts were aroused in July 1955 about the destination of the *Valentines* exported to Belgium, the U K Government had not issued any licences for the export of significant quantities of surplus war material to private dealers on the Continent unless the Governments of the countries concerned furnished H.M Government with a guarantee against re-export. Four applications had been received in August for the grant of licences to export various quantities and types of surplus war material to Belgium, but the Belgian Government had not felt able to give an assurance that they would not be re-exported. Three of the applications had therefore been refused, the fourth having meanwhile been withdrawn

A licence had been issued in October for the export to Holland of 8,000 tons of armoured fighting vehicle spares for use with agricultural tractors and for other civil purposes. This application had been granted on an undertaking from the Netherlands Government that the goods concerned would be prevented from leaving Holland in a form in which they could be used for military purposes.

Since Dec. 5 all outstanding licences to export armoured vehicles and spares and other munitions of war had been reviewed by the Inter-Departmental Committee referred to above Ten licences had been revoked as a precautionary measure, and the firms concerned had been asked to re-submit their applications, if they so desired.

The White Paper rejected a suggestion that the only really effective way of preventing the "remilitarization" of war material was to ensure that nothing was sold as surplus unless it had been so mutilated before sale that it was incapable of restoration This, it pointed out, could only be done at a great cost in money and manpower, and at a great waste of material of potential civilian use The Government believed that the better course was to permit the export of demilitarized vehicles or weapons only when the Government of the country of destination was willing to give a guarantee that the material would not be re-exported in a condition fit for use as weapons of war. Experience had shown that, without an agreed international system of control and elaborate machinery to enforce it at home and abroad, assurances about ultimate destination from the U.K. exporter, based on statements furnished by the foreign importer, did not of themselves afford an adequate safeguard.

The White Paper concluded: "H.M. Government deprecate the fact that surplus war material originating in the U.K. has indirectly found its way to the Middle East . . But from the exhaustive enquiries which they have made, they are satisfied that these have in no way disturbed the balance between the relative strengths of the parties concerned. All that these investigations have revealed is that between 50 and 100 old *Sherman* tanks, without breech-blocks, which had been licenced for export to France (a co-signatory of the Tripartite Declaration) have reached Israel and that 151 old *Valentine* self-propelled mountings, without breech-blocks, which had been licenced for export to Belgium, have reached Egypt. It can thus be fairly said that the surplus war material which is known to have found its way indirectly to Egypt and Israel in the course of the last year has been not only relatively small in quantity but obsolete, ineffective, and unreliable for war."

The French Foreign Ministry, in a statement on Jan. 20, took exception to the implication in the White Paper that the French Government had in any way been responsible for the re-export of 55 *Sherman* tanks to Israel.

The statement said that the Foreign Ministry could not agree with the White Paper's interpretation of the facts, and insisted that the import into France of the material in question had been quite regular and had been accomplished under conditions which could leave no doubt about its final destination The French firm of Aero-Marine had been given a licence explicitly for the import of the tanks and their re-export in their existing state, and it was after the granting of that licence that the British authorities had, in their turn, issued an export licence. The affair was simply one of ordinary transit, and as such could meet with no objection on the part of the French authorities.

A Foreign Office spokesman in London, amplifying the White Paper's account of the tank shipment to France, said that when the export licences were granted the exporters had produced what were taken to be French import licences, but were in fact French re-export licences. It might be that these French licences should have been more carefully scrutinized, but they had been accompanied by written assurances that the tanks would be scrapped, and in one case by an assurance that the entire transaction had been authorized by the French Government

The matter was debated in the House of Commons on Jan. 24—the day that Parliament reassembled after the Christmas recess, and immediately before the Prime Minister and Foreign Secretary left for their discussions in Washington. After Sir Walter Monckton had reviewed the position as outlined in the White Paper, the Leader of the Opposition criticized the Government's handling of the case.

Mr. Gaitskell, making his first major speech as Leader of the Opposition, referred to the matter as "an extraordinary picture of confusion and incompetence," and said that Labour did not criticize the disposal of surplus stores as such but complained that surplus arms had gone to the Middle East at an extremely dangerous time through "lax administration." Many questions remained to be answered about the "administrative weaknesses and blunders" . for example—Why, when British industry was desparately short of scrap and when large imports were necessary, were export licences for scrap granted? Were proceedings being taken against any of those concerned for making false declarations?

On the Middle Eastern situation generally, Mr. Gaitskell said that the Czech deliveries of arms to Egypt had profoundly changed the position as a whole. He found it extremely surprising that a Government whose Foreign Secretary made such bitter complaints against the Russian intervention should nevertheless have made it so much easier for the Egyptians to pay for those arms by doubling the rate of release of sterling balances. The Russian intervention had seriously tilted the balance of power in the Middle East in favour of the Arab States, and two grave dangers emerged as a result · the Arabs were bound to be encouraged to hope that in the not very distant future they would have their revenge by a war to eliminate Israel; and the Israelis, realizing that the balance was tilted against them, might be tempted to take preventive action.

Mr. Gaitskell suggested that three steps should be taken in the present situation. (1) The Russians should be asked "formally and openly" whether they would join in discussions to safeguard the peace between Israel and the Arab States; if they agreed, it would mean that they would have to give up the type of intervention on which they had embarked, and if they refused, "we should know better where we stood" (2) There should be immediate talks between the signatories of the Tripartite Declaration of 1950 [i e. the U.S.A., Britain, and France] on how it could be implemented. (3) The Government should invite Russian co-operation in preserving peace, and General Burns should be asked whether it would assist him in maintaining peace on the frontiers if there was a small international force at two or three points. Finally, a long-term settlement should be worked out covering such matters as the resettlement of refugees, the rectification of frontiers, and economic aid for the development of the whole area.

Mr. Selwyn Lloyd (Foreign Secretary), replying to the debate, said that no proceedings were contemplated with regard to the *Sherman* tanks exported to France, because there were no grounds for suspicion that the British firm had acted otherwise than in good faith. With regard to the *Valentines*, however, the question of proceedings was under consideration. There was no trace of any private trading in breech-blocks.

With regard to the supply of arms generally to the Middle East, the Foreign Secretary said that the Government's critics seemed to believe that it lay within the power of Britain to control or prevent the traffic in arms. That was not the case, because there were many other countries willing and anxious to supply arms to the Middle East. He recognized that the Russian arms deal had changed the situation and that in the course of time it would tilt the balance.

With regard to Mr. Gaitskell's second point, the signatories of the Tripartite Declaration had in fact discussed the situation both at the United Nations and subsequently at Geneva. An approach had been made at more than one level to the U.S.S.R., but the Russian answer had always been unpromising.

In conclusion, Mr. Lloyd said that if Britain were to supply to Israel quantities of arms equivalent to those supplied by the U.S.S.R. to the Arab States, the Soviet Union would at once supply more to the Arabs, and the result would be that Israel would be ringed round by Arab States armed to the teeth with Soviet arms. There would be no security for Israel in such a situation, which would be highly dangerous to the world. The better course was to try to persuade the Arab States of the grave dangers which they incurred in becoming dependent on Soviet arms, and to point out the risks they ran by further deals of this sort. "We must try to keep the peace on the frontiers and to continue trying to get negotiations going, at the same time watching the situation carefully, pointing out that quality as well as quantity mattered."

Referring finally to the Tripartite Declaration, Mr. Lloyd denied that it constituted a permanent guarantee of the present frontiers of Israel. He pointed out that the declaration said that any attempt to change the present frontiers or the armistice lines "by force" must be dealt with in the way stated, and emphasized that the Government intended to honour Britain's obligations under the declaration "in the spirit and the letter."

Other recent developments in connexion with arms shipments to the Middle East are described below.

Canadian Arms Shipments. The Canadian Minister of External Affairs (Mr. Lester Pearson) stated in the Canadian House of Commons on Jan 24 that the warlike stores exported by Canada to Israel in 1955 had amounted to $1,332,110, an increase of some $596,536 over 1954, whilst those exported to Egypt (consisting mostly of *Harvard* training aircraft and spare parts) had amounted to $770,825, an increase of $770,529. Shipments had included 25-pounder guns and accessories; tracks and spare parts for *Sherman* tanks; 3·7 in anti-aircraft guns, with accessories, spare parts, and ammunition, and small quantities of 75 mm. shells and anti-tank equipment. Israel had been the main recipient of the tank tracks and spare parts, which would be used only for servicing that country's existing stock of tanks. Mr. Pearson said that he was reluctant to make available to the public exact inventories of these stores, as Israel might feel that her security was being prejudiced. He emphasized also that the figures mentioned related to exports which had been approved, and that requests for similar stores, many times as great, had been rejected. On the question of dismantled parts of field artillery weapons which might be sold separately outside Canada by trading firms, Mr. Pearson said that there were procedures affecting the control of these items, but they did not constitute an effective control system. Nevertheless, a check-back to the beginning of 1952 had revealed that any gun barrels or breech-blocks disposed of in the form of scrap had been mutilated before delivery.

On the general question of arms shipments to the Middle East, Mr. Pearson pointed out that no embargo had been laid down by the U.K., France, and the U.S.A. Canada had followed the arms supply policy of the three Powers towards this sensitive area; moreover, there had been consultation and exchange of information about orders and requests with the Governments that had responsibilities in these fields, except in the case of insignificant orders. The Egyptian orders for *Harvards*, for example, had first been discussed with Britain and the U.S.A., and neither country had raised any objections. Egyptian inquiries about the supply of F-86 jet fighters had, however, been turned down.

Finally, Mr. Pearson said that his talks with Egyptian and Israeli leaders had left him with the impression that there was a basic desire on both sides for peace, which was indispensable for social and economic progress. An essential requirement for peace, however, was that the Arab States should recognize the legitimate and permanent existence of Israel. As a step towards Canada's "equal" attitude in the Middle East, Mr Pearson stated that he hoped soon to visit Israel [where he had not gone on his recent tour—see 14630 C].

The Canadian Government placed an embargo on all arms shipments to the Middle East on Jan 20, but lifted it again on Feb. 6.

U.S. Shipment of Tanks to Saudi Arabia. A number of protests were made in Congress following the disclosure by the State Department on Feb. 16 that the U.S.A. had sold 18 modern light tanks to Saudi Arabia. The tanks—which were being loaded on the s.s. *James Monroe* at New York when the announcement was made—were M-41 Walker "Bulldogs," which carry a 76 mm gun and machine-guns, and have a speed of 40 m.p.h. As a result of the opposition aroused, the shipment of all arms to the Middle East was temporarily suspended on Feb 17, but this decision was reversed on the following day and the *James Monroe* sailed on Feb 20 with the 18 tanks aboard. The Israeli Ambassador in Washington, Mr. Eban, denounced the shipment as "a regrettable departure" from the announced U.S. policy of trying to maintain an arms balance between Israel and the Arab States.

An explanatory memorandum on the shipment, issued by the State Department on Feb 18, noted that while the three Western Powers, under the Tripartite Declaration of 1950, were opposed to the development of an "arms race" in the area, they recognized that the Arab States and Israel all needed to maintain armed forces for purposes of legitimate self-defence and for the defence of the area as a whole. During recent years they had made many requests for U.S. arms, which had been scrutinized in the light of all the circumstances, including their justification within the framework of tripartite policy. Limited deliveries had been authorized from time to time for Israel and the Arab countries, but a U.S. export licence was required in every instance.

The memorandum explained that purchases of arms and military material could be made either through ordinary commercial channels or from the Government under the provisions of the Mutual Defence Assistance Act, and that they required an assurance from the purchasing country that they would be used only for internal security or self-defence. Since August 1955 the U.S.A. had authorized licences for arms exports to the Middle East involving a total of less than $16,000,000. A large proportion of these orders had been for spare parts and other technical equipment, and much of it had already been shipped; all outstanding licences, including the Saudi Arabian shipment, fell within this total. This, however, represented only a fraction of the large orders for U.S. arms placed by Middle Eastern countries within the past year, totalling some $150,000,000.

The Saudi Arabian Government, stating that it had no tanks, had asked the U.S.A. in April 1955 to sell a limited number for training purposes. After several months of negotiations, the sale of 18 tanks had been agreed upon last August, and full payment for them (at $135,000 each) had been made in November. The transaction had been subjected to the closest scrutiny in the light of the Tripartite Declaration and also of the "general discussions" with Saudi Arabia during the negotiation of the 1951 agreement. [Under this agreement the U.S.A. had undertaken to sell arms and defence material to Saudi Arabia, and to provide military training in the use of equipment purchased, in return for the continued use of the Dhahran air base—see 11609 B.] The memorandum added that outstanding requests for arms which had not yet been approved would continue to be subjected to "the most careful scrutiny" in the context of the three-Power declaration and the applicable Acts of Congress.

Suspension of French Shipments of Light Arms. It was announced in Paris on Feb 17 that the French Government had decided to suspend all shipments of light arms and ammunition to Arab countries. Though no official reason for this action was given, it was believed to be designed to prevent the smuggling of such weapons to Algeria, Tunisia, and Morocco, where they might be used against the French security forces. Heavy arms were not affected by the embargo, as the possibility of smuggling them was much less.

U.N. Report on Western Arms Shipments. The U.N. Commodity Trade Statistics, published on Jan. 27, showed that in the 4½-year period ending in mid-1955, $22,000,000 worth of arms (including tanks, but excluding aircraft) had been shipped by Western countries to Israel and the Arab countries. The total—which did not include Britain's supply of arms and equipment to Jordan, or the arms left in Egypt when British troops began their withdrawal from the Canal Zone—included British and U.S. sales totalling $1,763,000 to Israel and $6,708,000 to Egypt, Iraq, Lebanon, Saudi Arabia, and Syria. British shipments had amounted to £625,000 to Israel, £1,232,500 to Iraq, £502,140 to Egypt, £260,710 to Syria, and £259,300 to Lebanon. Apart from the U.S.A. and Britain, Belgium, Canada, Denmark, Finland, Western Germany, Italy, Luxemburg, and Sweden had supplied arms to the Middle Eastern countries. French shipments were not listed in the report.

A Swiss Government spokesman stated on Nov. 21 that for the time being no export permits would be granted for arms deliveries to the Middle East, in conformity with the Swiss policy of not sanctioning the sale of arms to areas where tension might give rise to the possibility of armed conflict.—(Cmd. 9676 - Times - Daily Telegraph - Manchester Guardian - New York Times - Montreal Star - Le Monde, Paris - Neue Zurcher Zeitung)

A. WESTERN GERMANY - UNITED STATES. — Atomic Energy Co-operation Agreement.

It was announced in Bonn and Washington on Feb. 13 that an agreement on co-operation in the peaceful uses of atomic energy had been concluded between the U.S. and Federal German Governments. The agreement (which was on similar lines to those signed by the U.S.A. with nearly 30 other countries) provided for U.S. aid to Western Germany in building a reactor for experimental purposes, and also for the loan of up to six kilogrammes of enriched uranium. The loan of uranium, however, was subject to the provisions of the Paris Agreements under which Western Germany agreed not to possess more than 3.5 kilogrammes of uranium for two years—a restriction which will expire in November 1956.

It was also provided that both countries would consult each other on the construction of atomic power plants; that there would be exchanges of unclassified information on atomic matters; and that the U.S.A. would supply isotopes for scientific, medical, industrial, and agricultural purposes.—(New York Times - Frankfurter Allgemeine Zeitung) **(14641 D; 14360 A.)**

A. UNITED KINGDOM. — Final Report of Royal Commission on Taxation of Profits and Income.

The final report of the Royal Commission on the Taxation of Profits and Income, appointed by the Labour Government in 1950, was published on June 7, 1955 (Cmd. 9474). Among the Commission's principal recommendations were: rejection of a capital gains tax; a simplified, flat-rate, profits tax; special relief for fluctuating incomes; exemption for the B.B.C. from income and profits tax on the trading profits of their main activities; capital allowance for commercial buildings; abandonment of the attempt to assess "home savings" under personal expenses; termination of the special relief for additional travelling costs through wartime circumstances; and a review by an expert committee of the provisions imposing penalties for tax offences. Three members of the Commission, however, found themselves unable to sign the majority report because of a "fundamental difference of view between ourselves and the majority on the basic requirements of an equitable system of taxation." The minority members, in a dissenting report, recommended *inter alia* the introduction of a capital gains tax which should be charged on the net realized gains of the year, after deduction of net realized losses.

The majority report was signed by Lord Radcliffe, who had succeeded Lord Cohen as chairman in April 1952 (see 12230 A); Sir Geoffrey Heyworth, chairman of Lever Brothers and Unilever Ltd, Mr S G. Gates, chairman of Tecalemit and Barclay Perkins, who had succeeded Mr. W. J. Keswick, one of the original members, Mr. J. E Greenwood, the former vice-chairman of Boots Pure Drug Company, Miss L. S. Sutherland, Principal of Lady Margaret Hall, Oxford, Dr. Vera Anstey, Reader in Commerce, London School of Economics, Professor J. R Hicks, Fellow of Nuffield College, Oxford, Mr W F Crick, general manager for research and statistics at the Midland Bank; Mr W. S Carrington, a partner in the accountancy firm of Whinney, Smith and Whinney, and Sir J. Millard Tucker, Q C, a specialist on taxation law and chairman of the Government committee on the taxation of trading profits Sir Thomas Gill, a former chairman of the Co-operative Wholesale Society, would have signed the majority report, but died suddenly just before the report was issued.

The minority report was signed by Mr George Woodcock, Assistant Secretary-General of the T.U C, Mr H. Bullock, former chairman of the T U.C General Council; and Mr. N Kaldor, Reader in Economics, University of Cambridge.

A summary of some of the most important of the Commission's 90 recommendations is given below.

Capital Gains. These, as normally understood, should not be brought under income or surtax charge on general income, nor under any supplementary flat rate Lump-sum payments on cancellations of contracts, however, should be subject to tax, except where such payments were made as compensation for loss of office through injury, where future earning capacity was impaired. Furthermore, in the company field, special distributions paid from capital profits should be regarded as income in the hands of shareholders, and profits capitalized in the form of debentures should be included in income for surtax purposes. The Commission appreciated, on the other hand, that other scrip issues were mere paper transactions giving no monetary value, and should accordingly not be taxed.

Profits Tax. A flat rate of profits tax should be charged in place of the two present rates on distributed and undistributed profits; when this was done, the exemption and abatement reliefs applicable to small companies should be dropped In principle, nationalized undertakings should be taxed on the same basis as other concerns, as should the profits and distributions of public utilities

Under the flat-rate profits tax, industrial and provident societies should be taxed only on the retained balance of profits In the case of building societies, also, only the retained balance of profits should be charged—at the undistributed rate pending the introduction of the flat-rate form of tax

The B.B C. should be exempt from income tax and profits tax on the "trading profits" of their main activities, but should be liable to both taxes in respect of their subsidiary sources of income

Income from Property. The Schedule A charge should be retained for owner-occupiers but the assessments should be revised annually, if necessary, thus obviating the need for "excess rent" assessments required under existing law. Gross annual value under Schedule A should be determined by the rent paid by the occupier or the gross annual value for rating purposes. The scale of statutory deductions for repairs should be reviewed at the next valuation

Schedule B (applying to landowners) should be abolished, and land and houses should be taken together for the purpose of maintenance. Relief for lost rent should be authorized by statute in Great Britain, as it was in Northern Ireland. The annual value of a Church of England parsonage house should cease to be attributed to the incumbent as income No scheme should be introduced for taxing premiums paid for leases, and, conversely, amortization allowances should not be granted to the payer

Expenses. The scope of special legislation regulating the tax treatment of benefits in kind, and payments to reimburse expenses when received by a company director or by an employee with remuneration of £2,000 or more, should be modified. The legislation should apply to any person, director, or employer with remuneration of £2,000 or more, but not to a director with remuneration below that figure unless he was a controlling director of a director-controlled company. Directors or employees of charitable bodies or non-trading concerns, and employees of educational establishments or local authorities, should cease to be excluded. The Inland Revenue Department should abandon their attempt to take into account so-called "home savings" (when the taxpayer is forced to be away on business). The special relief for additional travelling costs occasioned by war circumstances should be terminated.

The Schedule E rule governing deductible expenses should be amended to permit the allowance of expenditure "reasonably incurred for appropriate performances" of the duties of the office or employment.

Fluctuating Incomes. To mitigate the hardship of progressive taxation where incomes were markedly irregular, a fall in total income from one year to the next of at least 50 per cent should entitle the recipient to relief by averaging Consequentially, the special provisions for spreading certain receipts from the sale of literary and other copyright should be repealed

Charities. Relief to the subscribers themselves in respect of charitable subscriptions could not be recommended. Charities should continue to receive repayment of the tax deducted from subscriptions under covenant A more restrictive definition of charity for tax purposes should be enacted.

Superannuation. Relief should be continued and extended, but subject to a restriction in the amount of the lump-sum benefit taken in tax-free form

Depreciation. Capital allowances should be given for commercial buildings Surpluses realized on the sale of assets qualifying for capital allowances should be subject to tax, except for ships built before 1946 or agricultural buildings and works

Covenants. The maker of a covenant in favour of a child, grandchild, or other member of his family should be required to produce each year formal declarations by himself and the beneficiary as to the absence of any agreement for the return of any part of the benefit.

Mining Concerns. A depletion allowance should be granted for the cost of acquiring, after an appointed day, mineral rights or areas in the U K The existing depletion allowance for overseas minerals should be brought into line by removal of the present limitation by reference to the cost to the first U K purchaser. Balancing allowances should be adjusted for overseas mines or concessions to cover certain items

Post-Cessation Receipts. Post-cessation receipts which at present escaped tax by accruing after a trade or profession had come to an end should be rendered taxable, but only when the recommendations for superannuation relief and relief for fluctuating incomes had been implemented. The method of charging such receipts should take due account of expenses of collection and of unrelieved losses in the trade or profession

Relief for Losses. A loss in farming or market gardening should not rank for set-off against the taxpayer's general income unless the activities giving rise to the loss were genuinely carried on on a commercial basis

Tax Evasion. Everyone carrying on a trade, profession or vocation should have an obligation to keep certain simple business records, unless given a dispensation by the local inspector of taxes.

Return of Wife's Income. The report said that "one of the curiosities of the present system" was that a husband was required to make and sign a return of the income of himself and his wife without sure means of knowing precisely what his wife's income was "We think that it is, on any view, unfair to the husband, since it exposes him to the making of incorrect statements without any real power of safeguarding himself" It was therefore suggested that the wife should sign her husband's return, verifying those statements that related to her own income. The existing powers of the Board of Inland Revenue to require a taxpayer to produce business records for inspection should be extended to cover records of his own or his wife's private affairs

Betting and Gambling Winnings. The position of gambling profits in the tax code was best left as it was The most discouraging feature of making any alteration was the administrative aspect of a tax on gambling.

Partnership Income. A partner with a deficit should have the full amount recognized as a loss, while the full surplus of another partner should be regarded as taxable income.

Tax Avoidance by Companies. The law prohibiting "company emigration" without Treasury consent "might well be made subject to annual re-enactment so as to mark its character as an emergency provision which should be abrogated when the emergency that brought it into existence has receded."

Overseas Income of Individuals. This question should be clarified, and the maintenance of a place of abode in the U K. should cease to be of decisive importance in determining residence The test should be put on a basis laid down in the report, two of the conditions being (*a*) that anyone spending 183 days or more in the U.K in a year of assessment was resident, but (*b*) that no-one outside the U.K. for the whole of a year of assessment should be classed as a resident.

Overseas Profits. A special category of overseas trading concerns should be recognized, styled "overseas trade corporations," and their profits should be exempted from tax so long as they were undistributed. This would not preclude central management and control within the U K., but would be strictly limited in regard to any other internal activities.

Codification. This should be carried out regularly every 10 years from 1962.

Minority Recommendations. The minority members, in recommending a capital gains tax, thought that no distinction should be made between long- and short-term gains; that transfer of property through inheritance or *inter vivos* gifts or settlements should reckon as realization; but that gains arising out of the sale of owner-occupied houses, to the extent of one residence for each taxpaper, should be exempt from capital gains tax. Among other recommendations, the minority suggested that company profits should be subject to only one tax—the corporation profits tax; that earned income relief should be available to incomes assessed under Schedule E, without any upper limit; and that, apart from some financial concerns, losses should in future be offset only against future income from the same source

The Chancellor of the Exchequer (then Mr. Butler) stated when introducing the autumn Budget on Oct. 26 (see 14500 A) that the change to a single flat rate of profits tax, as recommended by the majority of the Royal Commission, would "not be directed to our present needs" because companies which distributed a high proportion of their profits would gain, whilst those which put a large proportion to reserve would lose. With regard to a capital gains tax, he said that he was "far from convinced" by the arguments of the minority of the Commission, and that it would be "most unwise" to revert to any conception of an excess profits tax or a special contribution or levy.—(Cmd. 9474 - Times - Daily Telegraph - Financial Times - Manchester Guardian) **(Prev. rep. Royal Commission, Interim Reports, 13616 A; 12880 B; Appointment, Membership, and Terms of Reference, 11163 E.)**

A. LITERATURE. — Book Selections for February.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Birdwood, Lord—"Two Nations and Kashmir." (Robert Hale, 21s.)

Bridges, Yseult—"How Charles Bravo Died." (Jarrolds, 21s.)

Carrington, Richard—"A Guide to Earth History." (Chatto & Windus, 21s.)

Driberg, Tom—"Beaverbrook · A Study in Power and Frustration." (Weidenfeld & Nicolson, 21s.)

Gollancz, Victor—"From Darkness to Light: A Confession of Faith in the Form of an Anthology." (Gollancz, 15s.)

Gowers, Sir Ernest—"A Life for a Life? : The Problem of Capital Punishment." (Chatto & Windus 7s 6d.)

Hyland, Stanley—"Curiosities from Parliament." (Allan Wingate, 12s. 6d.)

Jarman, T. L.—"The Rise and Fall of Nazi Germany." (Cresset Press, 25s.)

Jolly, Cyril—"The Vengeance of Private Pooley." (Heinemann, 15s.)

Kotelawala, Sir John—"An Asian Premier's Story." (Harrap, 15s)

Waugh, Alec—"Island in the Sun." (Cassell, 16s.)

United States. O'Connor, Edwin—"The Last Hurrah." (Atlantic-Little, Brown & Co., Boston, $4.00.)

Young, Roland—"Congressional Politics in the Second World War." (Columbia University Press, New York, $4.50.)

B. UNITED KINGDOM. — Walthamstow By-election.

Voting took place at West Walthamstow on March 1 in the by-election caused by the conferment of an earldom on Mr. Clement R. Attlee (now Lord Attlee), the former leader of the Labour Party. Result ·

Redhead, E. C. (Labour)	13,388
Hornby, R. P. (Conservative)	4,184
Smedley, Oliver (Liberal)	3,037
*Boaks, Lt.-Cdr. W. G. (Independent) ..	89
No change. Labour majority	9,204

* Forfeited deposit.

Figures at the general election were · C. R. Attlee (Lab.) 19,327, R. P. Hornby (C.) 10,077—Labour majority, 9,250

The Labour candidate polled 64 7 per cent of the votes in the by-election, the Conservative candidate 20.2 per cent, the Liberal candidate 14.7 per cent, and the Independent candidate 0.4 per cent. At the general election Mr. Attlee received 65.7 per cent and Mr. Hornby 34.3 per cent in a straight fight. The Labour proportion of the poll thus dropped by 1 per cent, and the Conservative proportion by 14 per cent.

51.9 per cent of the voters went to the poll, compared with 72.4 per cent at the general election. The electorate numbered 39,839—a decrease of 731 since the general election.

Mr. Redhead, a former mayor of Walthamstow, has been general secretary of the Society of Civil Servants since 1948. He was previously a high official in the Customs and Excise. (Times - Daily Herald) **(Prev. rep. By-elections, 14697 A.)**

C. ITALY - WESTERN GERMANY. — Italian Ministerial Visit to Bonn. - Italo-German Cultural Agreement. - Preparation of Treaty of Friendship, Commerce, and Navigation. - Return of German Properties in Italy.

The Italian Prime Minister, Signor Segni, accompanied by the Foreign Minister, Professor Martino, arrived in Bonn on Feb. 6 on a three-day official visit to the German Federal Republic. During their stay they had extensive discussions with Dr. Adenauer, Herr von Brentano (the Federal Minister of Foreign Affairs), and Professor Erhard (the Federal Minister of Economic Affairs), and called upon President Heuss.

A communiqué issued on Feb. 9 stated that the discussions had been conducted "in an atmosphere of trust and great amiability" and had dealt with the general political situation, Italo-German co-operation in the spheres of European unification and security, and Italo-German relations generally.

After recording "full agreement" on the general political situation the communiqué said that both countries regarded the effective defence of Europe and continued progress towards European unification as essential, in conformity with the aims of the late Signor De Gasperi. The two countries were also agreed on the need for strengthening their joint co-operation in NATO, the Western European Union, and other peaceful organizations, with particular reference to a more efficacious implementation of Article 2 of the North Atlantic Treaty. [This Article envisages joint action to improve the economic and social conditions of the NATO countries]

Both the Italian Government and the German Federal Government—"the only freely-elected and legitimate representative of the whole German people"—were also agreed that the reunification of Germany on the basis of free elections was an indispensable condition for a lasting relaxation of tension and for peace in Europe and the world.

As regards Italo-German relations, the communiqué announced that a cultural agreement had been signed by Herr von Brentano and Professor Martino; that a successful start had been made in implementing the recent agreement on the employment of Italian workers in Germany (see 14632 B) through arrangements for bringing 13,000 Italian farm workers to the Federal Republic, with more to follow; that the German draft of a treaty of friendship, commerce, and navigation had been handed to the Italian Ministers for further study; that both sides had expressed the wish to increase their economic co-operation and trade exchanges; and that measures had been discussed which would help in the realization of the Italian reconstruction programme (i.e. the 10-year "Vanoni Plan") within the framework of international co-operation.

The cultural agreement to which reference was made in the communiqué contained the following provisions:

The education authorities of the two countries would intensify the study of the language, culture, literature and history of the other in universities, schools, and other educational establishments. Textbooks printed in the two countries would not contain "incorrect statements on the history and way of life of the other country."

There would be exchanges of professors, teachers, scientists, students, and artists; scholarships to enable German students to study in Italy and Italian students to study in Germany; close co-operation between German and Italian cultural, artistic, and scientific bodies; and mutual visits by scientists, technicians, and artists. Consideration would be given to the possibility of recognizing the examinations of the other country.

Facilities would be given for the exchange and distribution of cultural and scientific books and periodicals, and for exchanges of lectures, concerts, exhibitions, broadcasts, theatrical performances, films, etc.

A permanent joint commission (consisting of four German and four Italian members) would be established to implement the agreement The commission would meet at least once a year, alternately in Germany and Italy, and would be presided over by the German Federal Foreign Minister (or his representative) during its sessions in the Federal Republic and by the Italian Foreign Minister (or his representative) when meeting in Italy

The agreement (which also applied to West Berlin) would come into force one month after exchange of ratifications; would remain in force for five years; and would automatically be renewed unless six months' notice was given by either party.

During his visit to Bonn, Signor Segni formally handed back to the Federal Government the control of two former German properties in Italy—the Villa Massimo in Rome and a hospital at San Remo (Italian Riviera)—which had been requisitioned by the Allies after the war and later made over to the Italian Government.—(Frankfurter Allgemeine Zeitung - Corriere della Sera, Milan) **(Prev. rep. 14632 B.)**

D. AUSTRIA. — Cabinet Appointment.

Herr Anton Proksch (Socialist), secretary-general of the Austrian Trade Union Federation, became Minister of Social Welfare in Herr Raab's Cabinet on Jan. 23 in succession to Herr Karl Maisel. The latter (also a Socialist) had tendered his resignation for personal reasons after having achieved the enactment of new and comprehensive social insurance legislation, which was passed by the *Nationalrat* on Sept. 9, 1955. (Wiener Zeitung) **(Prev. rep. Cabinet, 14016 E.)**

A. UNITED STATES. — The 1956-57 Budget. - Expenditure of $65,865,000,000. - Estimated Surplus of $435,000,000. - President Eisenhower's Budget Message.

President Eisenhower submitted to Congress on Jan. 16 his Budget proposals for the fiscal year 1957 (i.e. July 1956 to June 1957). Total expenditure was estimated at $65,865,000,000 (of which $40,370,000,000, or 61 per cent, was for major national security programmes) and revenue at $66,300,000,000, giving a budgetary surplus of $435,000,000. Detailed estimates of expenditure and revenue are shown in the following table :

	Actual 1955	Estimate 1956	Estimate 1957
		($ million)	
Estimated Expenditure :			
Major national security	40,626	39,467	40,370
International affairs and finance	2,181	2,053	2,108
Veterans' services and benefits	4,457	4,793	4,879
Labour and welfare	2,552	2,767	2,995
Agriculture and agricultural resources	4,411	3,376	3,364
Natural resources	1,081	1,045	1,031
Commerce and housing	1,622	2,182	2,071
General government	1,201	1,611	1,757
Interest	6,438	6,875	7,066
Reserve for contingencies	—	100	225
Total	64,570	64,270	65,865
Estimated Receipts :			
Individual income taxes	31,650	33,555	35,118
Corporation income and excess profits taxes	18,265	20,300	20,300
Excise taxes	9,211	9,894	9,887
Employment taxes	6,220	7,420	7,585
Estate and gift taxes	936	1,025	1,120
Customs	606	690	700
Miscellaneous receipts	2,566	2,505	2,805
Deduct :			
Transfer to Federal old-age and survivors' insurance trust fund	5,040	6,475	6,635
Transfer to Railroad Retirement account, excluding military service credits	599	625	660
Refunds of receipts (excluding interest	3,426	3,789	3,920
Total	60,390	64,500	66,300
Budget Surplus or Deficit	−4,180	+230	+435

Extracts from the President's Budget message are given below.

Defence. Expenditure on defence, the main constituent of the item "major national security," was estimated at $34,575,000,000, of which $15,960,000,000 was for the Air Force, $9,435,000,000 for the Navy, and $8,510,000,000 for the Army. The principal items were pay of the armed forces, $10,336,000,000; operation and maintenance, $9,100,000,000; major procurement and production, $11,719,000,000 (including $6,751,000,000 for aircraft, $1,032,000,000 for ships, and $1,276,000,000 for guided missiles), and research and development, $1,430,000,000.

The President stated that during the past three years the defence programme had been "successfully reoriented to reflect the changing nature of the threat to our security, the revised requirements brought about by the end of the Korean conflict, and the increasing availability of new weapons of unprecedented strategic and tactical importance." This re-orientation had been accomplished by developing the defence programme on the basis of policies and concepts which involved (1) Gearing the defence programme to "a long period of uncertainty instead of to a succession of arbitrarily assumed dates of maximum danger." (2) Maintaining the capability to deter a potential aggressor from attack (3) Developing military forces which minimized the numbers of men by making maximum use of science and technology. (4) Maintaining a strong and expanding peacetime industrial structure, readily convertible to the tasks of defence and war. "The readjustment of our military forces in line with these principles," the President declared, "is providing this nation with the greatest military power in its peacetime history."

Total military personnel on active duty would increase from an estimated 2,814,000 in June 1956 to 2,838,400 in June 1957. During the year there would be significant increases in certain combat elements, particularly units employing new weapons and units assigned to continental defence. "Every reasonable measure" would have to be taken to increase the attractiveness of a service career, and legislation would therefore be proposed to provide added incentives for members of the armed forces The number of Reserve personnel engaged in regularly paid drills was expected to increase to 1,100,000 by the end of 1957; in addition, the Budget provided for six months' active duty training under the Reserve Forces Act (see 14387 A) for about 80,000 Reserve forces personnel.

With regard to major procurement and production, although expenditure in 1956-57 would be about the same as in the previous fiscal year, there would be a change of emphasis within this total in line with the policy of modernizing the forces. The accelerated production programme for the B-52 long-range jet-bomber and the F-101 and F-104 supersonic interceptors would be continued, and in addition there would be substantial procurement of the Navy's new F-8U supersonic fighter. Expenditure on guided missiles would be the highest recorded—about one-third more than in 1955-56 and about double that in 1954-55 Expenditure on electronic and communications equipment would remain high so as to meet the needs for continental defence and the combat forces. Expenditure on ammunition, combat vehicles, trucks and other major equipment items would continue to decline, as requirements had now largely been met.

The naval shipbuilding programme would be continued at a slightly higher level than in 1955-56 in order to carry forward the modernization of the fleet, most of which had been built in the Second World War. In addition to the new ships already authorized by Congress, the Budget provided for the construction of a sixth aircraft-carrier of the *Forrestal* class (60,000 tons), additional nuclear-powered submarines, guided missile destroyers and frigates, and an experimental nuclear-powered cruiser. Conversion of ships now in the fleet would be undertaken to provide them with additional nuclear weapons and with guided missile capabilities, and to permit them to operate modern high-speed aircraft.

To ensure continued flexible authority for mobilization readiness, the President recommended that the Defence Production Act should be extended for a further two years.

Atomic Energy and Research. $1,945,000,000 was provided for atomic energy development under the "major national security" heading. After emphasizing that the U.S A had "long sought and continues to seek means to banish the threat of nuclear warfare," the President declared "Pending a trustworthy agreement, however, we must continue to increase our nuclear weapons stockpile which, together with the means of delivery, is the principal deterrent to armed aggression in the world." At the same time the U.S.A. would "speed the development of the peaceful uses of atomic energy and make the resulting benefits, under appropriate controls, available to other nations for the well-being of all mankind."

The President repeated his request, first made in April 1955 (see page 14361, second column), that Congress should authorize the construction of a nuclear-powered merchant ship to carry his "Atoms-for-Peace" message to the ports of the world.

Other atomic projects would include the construction by the Atomic Energy Commission of a special reactor for use by the Defence Department in developing methods of preserving food through irradiation.

Mutual Security Programme. Total expenditure was estimated at $4,292,000,000, of which $2,500,000,000 would be for military aid (included in the "major national security" section) and $1,792,000,000 for economic and technical aid (included in the "international affairs and finance" section). The message stated that about one-half of the military aid in 1956-57 would be for Korea, Pakistan, Formosa, and Turkey.

Agriculture. Gross expenditures for agricultural programmes were estimated at $9,100,000,000 in 1956-57, but this included loans made and commodities purchased by agencies of the Department of Agriculture and the Farm Credit Administration Receipts from agricultural programmes, reflecting loan repayments and commodity sales by these agencies, were estimated at $5,700,000,000, reducing the estimate of net Budget expenditure to $3,400,000.

Programmes designed to stabilize farm prices and incomes accounted for over 60 per cent of the estimated gross expenditures for agriculture and agricultural resources. Operations of the Commodity Credit Corporation—the agency principally responsible for agricultural price support activities—would entail gross expenditure during 1956-57 of $5,100,000,000; receipts from repaid loans and sales of commodities would amount to $3,500,000,000, leaving a net expenditure of $1,600,000,000. In recent years receipts had been substantially less than new outlays, and the stocks of the C C.C. had been rising steeply; on Oct 31, 1955, C.C C loans and commodity stocks had amounted to $7,700,000,000, as compared with $6,600,000,000 a year earlier The price support operations of the C.C C had realized losses in 1954-55 of about $800,000,000, of which more than one-half was on dairy produce Future losses on the loans and commodity stocks which the Corporation held in June 1955 were estimated at $2,400,000,000, of which about two-thirds represented anticipated losses on maize and wheat.

Other items in the agricultural budget included $400,000,000 for a proposed "soil bank." This would include an "acreage reserve" to reduce current and accumulated surpluses of crops in most serious difficulty, and a "conservation reserve" to achieve other needed adjustments in the use of agricultural resources.

Civil Defence. $90,000,000 was provided for this purpose in the "commerce and housing" budget. The President stated that comprehensive studies were being conducted jointly by the Federal Civil Defence Administration, the States, and "critical target cities" to determine the best procedures to be adopted in case of atomic attack. The Budget included funds to extend civil defence preparations to more metropolitan target zones, and also to accelerate the procurement of field-type emergency hospitals and to increase stockpiles of medical and radiological supplies.

The total "new obligational authority" (i.e. authority to enter new commitments for which payment might not be made until future years) recommended in the Budget was $66,300,000,000, as compared with $62,000,000,000 in 1955-56. (New York Times - New York Herald Tribune)

(Prev. rep. U.S. Budget, 14459 D; 14088 A.)

A. GREECE. — General Elections. - New Cabinet.

The Greek Parliament elected in 1952 was dissolved on Jan. 10, 1956, by King Paul, who signed a decree for the holding of general elections on Feb. 19. Five non-party Ministers —all retired from their former professions—were sworn in by the King on Jan. 11 to hold office in the "caretaker" Cabinet of M. Karamanlis during the pre-election period.

The new Ministers were M. Bouropoulos, a former judge of the Supreme Court (Justice); General Sergiopolis, retd. (Defence), M. Lianopoulos, formerly chairman of the Civil Service Commission (Interior); Dr Frangilas, a university professor (Minister for Northern Greece); and General Mandakis, retd. (Under-Secretary of State for the Interior).

The elections were carried out on the basis of a new and complex electoral law, introduced by the Karamanlis Government, which had been passed by the Chamber of Deputies in December 1955. The law abolished the former method of election by simple majority vote, and replaced it by a "mixed" system combining majority voting and proportional representation. It was stated that the primary objective of the new electoral system was to make possible the introduction of a strong two-party system of government.

The electoral law divided Greece into some 40 constituencies with unequal numbers of seats It laid down that elections would be conducted in the following manner: (*a*) in constituencies with one, two, or three seats, all the seats would go to the party polling the highest number of votes; (*b*) in constituencies with four, five or six seats, the party with the second highest number of votes would get one seat, whilst all the other seats would go to the majority party, (*c*) in constituencies with seven, eight, or nine seats, the second strongest party would receive two of the seats, the remainder going to the majority party; (*d*) in ten-seat constituencies, the second largest party would receive three seats and the majority party the other seven; (*e*) in constituencies with over ten seats (including Athens, the Piraeus, Salonika, and Larissa) the seats would be shared proportionately between the two leading parties on the basis of the votes obtained. The number of deputies remained at 300.

The elections were contested by two principal political groups—the National Radical Union, a new governmental party founded by M. Karamanlis as the successor to the Greek Rally, the party founded by the late Field-Marshal Papagos; and the Democratic Union, a heterogeneous coalition of seven parties led by M. Papandreou (the Liberal leader), and ranging from the Populists (royalists) on the right to the pro-Communist E.D.A. group on the left. There were also a number of minor parties and independent candidates.

The formation of the National Radical Union as the successor to the Greek Rally had been announced on Jan. 4 by M. Karamanlis, who declared that the Rally "could not survive its founder." The Rally had been considerably weakened by defections both before and after the death of Field-Marshal Papagos, and the great majority of its members joined the National Radical Union under the leadership of M. Karamanlis. At the last (1952) elections the Greek Rally obtained an absolute majority in the Chamber of Deputies.

The Democratic Union consisted of the following parties (several of them newly formed), listed politically from right to left—the Populist Party (royalist) founded by the late M Tsaldaris and now headed by his nephew; the Liberal Party led by M. Papandreou, who was also head of the Democratic Union; the Liberal Democrats led by M Sophocles Venizelos, who had returned to political life after having announced his retirement in 1954 (see 13529 C), the EPEK party, founded by the late General Plastiras and now led by M. Papapolitis; a new Agrarian Party founded by General Pausanias Katsotas (retd.), the mayor of Athens; a new Democratic Party led jointly by M. Kartalis and Professor Svolos; and the E.D A. (United Democratic Left), which is regarded as the successor to the outlawed Communist Party. It was emphasized by M Papandreou that the Democratic Union had been formed solely for the purpose of contesting the elections and not as a permanent political grouping, and that the centre parties would not co-operate with the E.D A. if returned to power [There were about 20 E.D.A. nominees in the joint list of 300 candidates.]

Other new parties contesting the elections included the Populist Social Party, formed by M Stephanopoulos (the former Foreign Minister), and the Progressive Party, formed by M Markezinis (formerly Minister for Economic Co-ordination) Among many minor political groups was a "Poujadist Party of Greece," formed by a M. Socrates Papadopoulos and demanding tax reforms similar to those advocated by M. Poujade in France.

Domestic issues played little part in the elections, attention being focussed mainly on foreign policy and on the question of *enosis* (the union of Cyprus with Greece)—a demand strongly upheld by all the parties. The Democratic Union accused the Government of being unduly subservient to Western influences, and campaigned on a platform which included a "neutral" foreign policy based on equal friendship with the countries of East and West, an economic policy to safeguard the people against "economic oligarchy," the "full operation of a free democratic regime," and a general amnesty. M. Karamanlis—who described the Democratic Union as an "unholy alliance"—deplored the decision of the centre parties to join forces with the extreme left-wing, and said that this might have "unpredictable repercussions" on Greece's future.

The electorate of about 4,000,000 included 1,900,000 women voters, who voted for the first time in a general election after having been enfranchised in 1952 (see 12252 A). There were 13 women candidates. All leading political personalities were returned with the exception of M. Stephanopoulos, who was defeated in his home constituency in the Peloponnesus, and M. Markezinis.

The "caretaker" Minister of the Interior, M. Lianopoulos, announced on Feb. 22 that counting of civilian votes had been completed, that 3,243,926 valid votes had been cast, and that their distribution between the parties had been as follows—Democratic Union, 1,614,878 (49.8 per cent); National Radical Union, 1,484,587 (45.7 per cent); Progressives, 71,553 (2.2 per cent); others 72,908 (2.3 per cent). The votes of the armed forces (about 176,000) were still being counted and the figures were therefore liable to adjustment.

Owing to the working of the new electoral system, the National Radical Union won a majority of seats in the Chamber of Deputies, despite the fact that it had polled fewer votes than the Democratic Union. (The Ministry of the Interior announced that the N.R.U. would have 155 seats and the Democratic Union 145, though the figures might be slightly modified when the forces' votes had been counted.) The election results were challenged by the Opposition parties on the ground that they had not truly reflected the voting, and three parties of the Democratic Union (the Liberals, Liberal Democrats, and Democrats) appealed to King Paul to order new elections under a system of proportional representation. M. Karamanlis, however, maintained that the National Radical Union was entitled to form a Government as it possessed a clear parliamentary majority.

After formally tendering his resignation on Feb. 27, M. Karamanlis was asked by King Paul to form a new administration. The new Government, drawn entirely from the National Radical Union, was sworn in on Feb. 29 with the following membership:

*M. Constantine Karamanlis	Prime Minister.
*M. Andreas Apostolides	Vice-Premier.
*M. Spyros Theotokis	Foreign Affairs.
M. Demetrios Makris	Interior.
M. Protopapadakis	National Defence.
M. Demetrios Helmis	Economic Co-ordination.
M. Christos Thivaios	Finance.
*M. Papaconstantinou	Justice.
*M. Giorgios Rallis	Public Works.
M. Evangelos Averoff	Agriculture.
Mme. Lina Tsaldaris	Social Welfare.
M. Leonidas Bournias	Labour.
*M. Petros Levandis	Education.
M. Papahgouras	Trade and Industry.
M. Stelios Kotiades	Merchant Marine.
*M. Paparigopoulos	Northern Greece.
Professor Grigoris Kassimatis	Minister without portfolio.
M. Constantine Tsatsos	Minister attached to the Prime Minister's Office.

* Member of former Government.

Several members of the former Karamanlis Cabinet remained in office, including the Vice-Premier, M. Apostolides, and the Foreign Minister, M. Theotokis. New Ministers included Mme. Tsaldaris, the widow of the pre-war leader of the Populist Party, and the first woman to become a Cabinet Minister in Greece. She has devoted her life to welfare work and has frequently represented Greece in U.N. commissions and congresses.—(Times - Daily Telegraph - Le Monde, Paris - New York Herald Tribune) **(Prev. rep. General Elections, 12604 A; Cabinet, 14496 B; 14467 A.)**

B. UNITED STATES. — Administration Appointments. - New Director of the Budget.

Mr. Rowland R. Hughes, Director of the Budget, resigned on Jan. 20 for "personal and family reasons," and was succeded by Mr. Percival F. Brundage, the Deputy Director.

On Feb. 11 President Eisenhower announced the appointment of Mr. Edward P. Curtis, vice-president of the Eastman Kodak Company, to a new Administration post of Special Assistant for Aviation Facilities Planning. In appointing Mr. Curtis the President emphasized that the "revolutionary possibilities and all-embracing character of aviation development require an independent, overall study of the national problem."

Mr. William H. Jackson, who in 1953 had been chairman of a special committee appointed to study the problem of unifying America's psychological warfare programme (see 12805 A), was appointed on Jan. 28 to succeed Mr. Nelson Rockefeller as Special Assistant to the President. (New York Times) **(Prev. rep. Administration, 13943 B; 13526 C.)**

MARCH 3—10, 1956

A. BRITISH WEST INDIES. — London Conference on Caribbean Federation. - Agreement on Constitutional Proposals. - Setting-up of Standing Committee for Final Pre-Federation Stages.

A conference to take final decisions on the major outstanding issues concerning the formation of a British Caribbean Federation, and to take the necessary administrative steps prior to the establishment of the Federation itself, was held in London from Feb. 7-23 under the chairmanship of the British Colonial Secretary, Mr. Lennox-Boyd. It was attended by delegations from Antigua, Barbados, Dominica, Grenada, Jamaica, Montserrat, St. Kitts-Nevis and Anguilla, St. Lucia, St. Vincent, and Trinidad and Tobago—all of whose Legislatures had approved the federation proposals—as well as by observers from British Honduras and British Guiana, whose legislatures had voted against participation in the proposed federation. Representatives of the U.K. Treasury and Colonial Office also participated in the discussions.

The leaders of the various delegations were: **Antigua**—Mr. V. C. Bird, Minister of Trade and Production; **Barbados**—Mr. Grantley H. Adams, Premier, **Dominica**—Mr. F. A. Baron, Member of the Executive Council; **Grenada**—Mr E. M Gairy, Member of the Executive Council; **Jamaica**—Mr. Norman W. Manley, Chief Minister, **Montserrat**—Mr W H. Bramble, Member of the Legislative Council, **St. Kitts-Nevis and Anguilla**—Mr R. L. Bradshaw, Minister of Trade and Production; **St. Lucia**—Mr. C. G. D. La Corbiniere, Member of the Executive Council; **St. Vincent**—Mr. J. A. Baynes, Member of the Legislative Council; **Trinidad and Tobago**—Mr. A. Gomes, Minister of Labour, Industry, and Commerce.

The observers attending were: **British Guiana**—Mr P. A. Cummings, Member for Labour, Health, and Housing on the Executive Council, **British Honduras**—Mr L. I. A. Richardson, Member for Natural Resources on the Executive Council

The conference agreed that the plan for a British Caribbean Federation put forward at the London Conference in April 1953 (see 12998 A), and subsequently endorsed by the Legislatures of all the territories concerned, should, with certain modifications, be the basis for the Federal Constitution, which would be drafted by the end of 1956. Federal elections should be held as soon as practicable after Jan. 1, 1958, and in any event not later than March 31, 1958. In the period between the ending of the present conference and the appointment of the Federation's first Governor-General, the British Caribbean delegations to the conference would continue as a standing body to carry out the necessary preparatory constitutional and administrative arrangements.

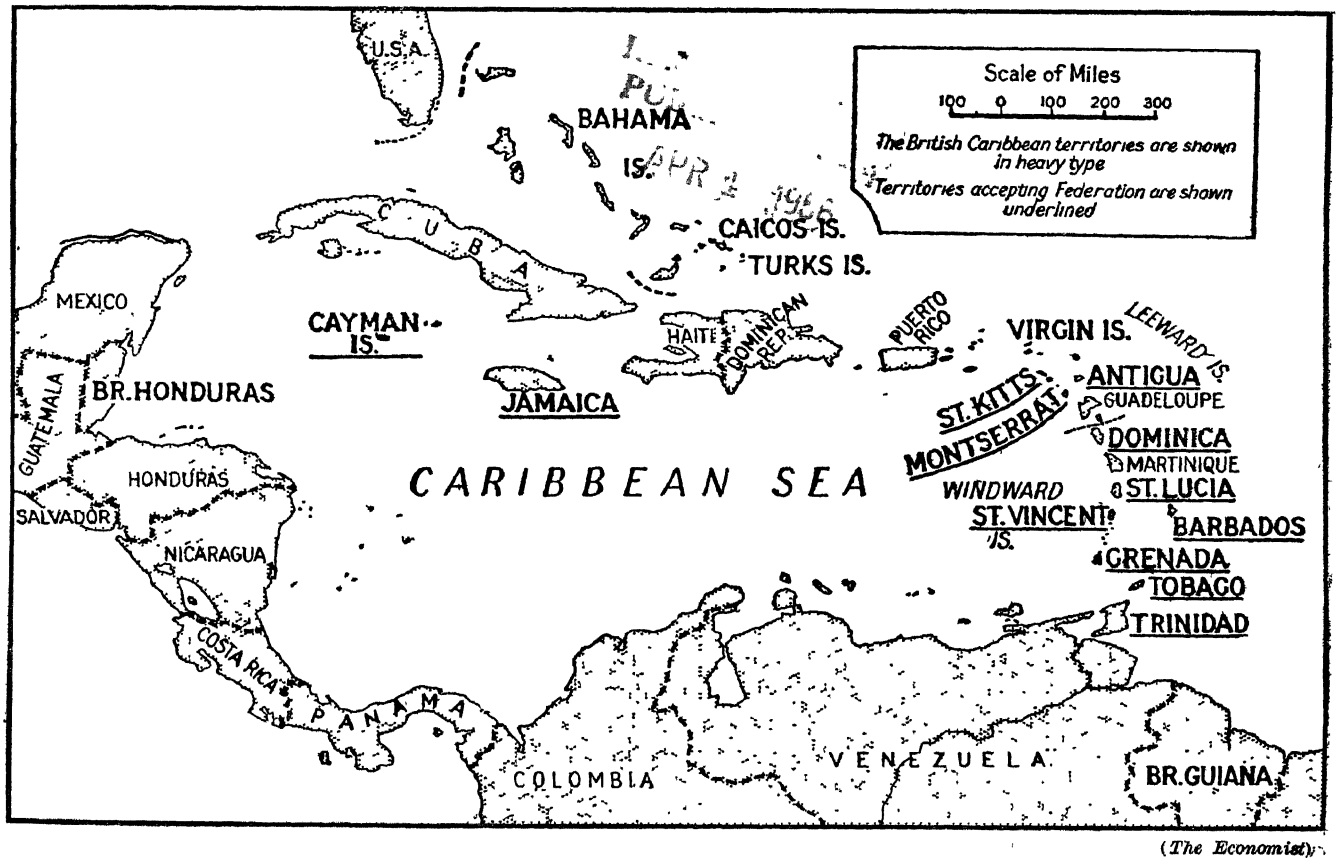
The conference was unable to reach agreement on the site of the Federal capital, and proposed that a fact-finding commission should be appointed to make recommendations.

Mr. Lennox-Boyd, in his opening address to the conference, announced that as the delegates had full powers and could take final decisions within the framework of the agreed Federal plan, without the necessity for further reference back to their Legislatures, he was prepared—subject to the conference reaching agreement on all substantial points—to introduce an enabling Bill in the U.K. Parliament at an early date. He hoped that it would be possible to pass it through all stages in both Houses before the summer of 1956. Such an Act would enable the constitutional instruments of the Federation to be embodied in an Order-in-Council which would provide for the establishment of the Federation, including the appointment of a Governor-General and the holding of Federal elections.

After reiterating that H.M. Government intended to do all in its power to further the wishes of the West Indies in regard to federation, Mr. Lennox-Boyd said that federation would facilitate the eventual achievement of West Indian self-government within the Commonwealth He emphasized, however, that self-government meant "something more than the relinquishment by the U.K. Government of formal powers of control"—it meant that a country must be able to stand on its own feet economically and financially, that it would finance its own administration, and that it was prepared to assume responsibility for its defence and its international relations to the extent that either was involved by its geographical or international standing. Nevertheless no country in these days was independent in the sense of being entirely self-contained and self-sufficient; mutual help was one of the great principles of the Commonwealth, and there was no reason why one member or group of members should not help other members with their economic development, perhaps on the lines of the Colombo Plan. He also gave an assurance that self-government would not preclude arrangements for inter-Commonwealth commerce, such as the Commonwealth Sugar Agreement.

On the question of membership of the Commonwealth, Mr. Lennox-Boyd said that this was a matter for all members to consider. He assured the conference, however, that when the British Caribbean Federation felt "in due course ready to assume the responsibilities and obligations involved," H.M. Government would be glad to sponsor its admission to full Commonwealth membership.

Mr. Norman Manley, Chief Minister of Jamaica, agreed that the Federation would require assistance from Britain to achieve economic stability, and welcomed the Colonial Secretary's assurance on this point. With regard to constitutional arrangements, he appealed for flexibility. "The draft constitution before us," he said, "bristles with peculiarities deriving from history and geography. We must not lay up troubles for ourselves in the future, as other federations have done, by the formulation of iron-clad constitutions which later prove difficult or impossible to amend"



(*The Economist*)

The principal decisions reached by the conference, in addition to those given above, are summarized below.

Constitutional Matters.

(1) The preamble to the Federation's Constitution should guarantee freedom of religious worship.

(2) A special clause should be added to the constitutional instruments to provide for the entry of other territories into the Federation, particularly British Guiana and British Honduras. After expressing the desire of the conference that the way should be "made as easy as possible" for these two territories to join the Federation, the report said that the terms of admission for new members should therefore not apply in respect of British Guiana and British Honduras.

(3) The proposed Council of State would not contain three official members as originally planned, but the Governor-General would nominate three officials who would be able to attend the meetings of the Council.

(4) The Governor-General would have to consult the Governors of the "units" (the former Colonies) before making appointments to the Federal Senate.

(5) The prohibition of simultaneous membership of both "unit" and Federal Legislatures, recommended in the report of the Standing Closer Association Committee but cancelled at the 1953 London conference, should be reinstated. [The prohibition of simultaneous membership of "unit" and Federal Executives had not been altered in 1953.] However, the period within which a member of a "unit" legislative or executive body was required to resign after becoming a member of the Federal Legislature should be extended from one month to three months.

(6) The Federal authorities would be empowered to co-ordinate such matters as the administration of the University College of the West Indies, the student services in the U.K. and the U.S.A., and intra-regional shipping.

(7) The "concurrent legislative list" (i.e. the list of subjects on which both the Federal and the "unit" legislatures might legislate, with Federal law prevailing) should be amended to take account of the recommendations of the 1955 Trinidad Conference on Movement of Persons within the Federation (see 14136 A).

Financial and Economic Matters.

(1) The preamble to the Constitution should include "a recital to the effect that it is essential for the economic strength of the area that there should be an integrated trade policy for the Federation, and that there should be introduced, as far and as quickly as practicable, a Customs Union, including internal free trade" A Commission on Trade and Tariffs should be set up as soon as possible, and in any case during 1956, to examine and report to the Federal Government on the economic, fiscal, and other technical problems involved in the establishment of a Customs Union for the Federal area, bearing in mind the possible accession of British Guiana and British Honduras, and to work out a scheme for a Customs Union to be implemented, if necessary, by stages. The Commission should make its report not later than two years after the setting-up of the Federal Government.

(2) The Constitution should provide that during the first five years the Federal Government should obtain its revenue from (i) the profits on the currency issue (i.e income from commissions and interest on investments held as backing for the currency, after deducting expenses of issue and statutory additions to the reserve funds), and (ii) a mandatory levy on the "unit" Governments, calculated on the percentage incidence of the Federal duties There should also be provision in the Constitution for the Federal Government to have concurrent legislative power to raise revenue by means of Excise and Customs duties.

(3) In view of the increased estimated cost, H.M Government agreed to increase their contribution to the cost of the Federal capital from £500,000 to a maximum of £1,000,000. This would be made available as soon as it was needed, thereby deferring the necessity for the Federal Government to raise by loan the remaining funds required for this purpose.

Civil Service Matters.

(1) The report of the Civil Service Commission (see below) should be remitted for detailed consideration by the post-conference organization in order that certain of the recommendations might be amplified. However, this should not be allowed to delay the inception of the Federation.

(2) Whilst it was agreed that there should be the greatest freedom of movement of staff between territories it was considered that complete unification of the public services was a separate issue from that of providing a Federal Civil Service.

(3) It was recognized that "unit" Governments must be prepared to make some sacrifices in order to obtain the best possible officers for the Federal Civil Service. Consideration should be given to the recruitment of eminent West Indians not at present employed in the public services, and also to arranging—where the officers concerned were willing—for the return of former members of the public services in the West Indies who were now serving elsewhere in the U.K. Oversea Civil Service.

Judicial Matters.

(1) Federal judges should be appointed by the Governor-General after consultation with the Prime Minister of the Federation.

(2) There should be no right of appeal from the Supreme Court of a "unit" direct to the Privy Council except with the consent of the Federal Supreme Court, which should grant it only in exceptional circumstances. There should, however, be no restriction on the prerogative right of Her Majesty in Council to grant special leave to appeal to the Privy Council from any decision of a "unit" Supreme Court or the Federal Supreme Court.

Post-Conference Machinery.

The delegations to the conference should continue as a standing body, to be known as the Standing Committee of the Federation of the British Caribbean, in order to carry out the constitutional and administrative work required before the appointment of the first Governor-General. On the constitutional side this would entail agreement on a complete draft Constitution, involving decisions on points of detail not covered by the 1953 plan or the conclusions of the present conference. The administrative work would include the selection of key officers; the setting-up of "skeleton" departments; the acquisition of buildings, including housing, for the Federal capital, and the drafting of laws, regulations, and standing orders for the Federal Assembly, etc.

Other Matters.

(1) It was agreed that the territories which had not yet decided to join the Federation—British Guiana, British Honduras, and the British Virgin Islands—should be enabled, on reimbursement of an appropriate proportion of the costs, to use the regional economic, advisory and co-ordinating services which the Federal Government would organize, and also to participate with the Federal territories in group membership of international organizations.

(2) The decision of the 1953 conference in favour of Grenada as the site of the Federal capital had not been endorsed by all the West Indian Legislatures, and it had therefore been necessary to review the matter. After lengthy discussion the conference had decided that it was not in possession of all the necessary information and had therefore agreed that the Colonial Secretary should be asked to appoint a three-man fact-finding commission composed of wholly impartial persons who had never resided in the West Indies, to submit recommendations to the Standing Federation Committee on the three most suitable sites In making their recommendations this commission should bear in mind such factors as political and social sentiment in the area, the convenience of the site in relation to the Federal area, the availability of land for immediate building and for future expansion; the cost of the buildings and other works; the suitability of communications by sea, air, cable, telephone and road; and the services available as regards general accommodation, hotels, water and power supplies, educational facilities, etc.

(3) The Governments of the "unit" territories should be asked to promulgate February 23 as an annual holiday throughout the British Caribbean in commemoration of "the historic decision to federate taken at this conference"

Before the opening of the conference, the reports had been published on Jan. 2 of the three commissions whose appointment had been announced by Mr. Lennox-Boyd in February 1955. These reports—which served as a basis of discussion for many of the questions considered by the conference—were those of the Fiscal Commission (Cmd. 9618), the Civil Service Commission (Cmd. 9619), and the Judicial Commission (Cmd. 9620).

The Fiscal Commission, which was under the chairmanship of Sir Sydney Caine, assumed that the Federal Government would be initially of modest size and of considerable flexibility, controlling no large executive staffs but employing advisers and high-level administrators. The total capital cost of building offices, houses, etc for the Governor-General, the Legislature, the judiciary, and executive Ministries was estimated at £2,000,000. It was also estimated that the annual Budget would be just over £2,000,000, with the addition of 50 per cent proposed by the 1953 London conference as a reserve. About three-quarters of the expenditure would fall on the "unit" Governments, and the extra cost of federation would be about £350,000. The revenue basis had to be re-examined as the suggested basis—15 per cent of Customs revenue—would yield only about £1,700,000, and it was therefore proposed that the Federal revenue should be obtained mainly from taxes under the direct control of the Federal Legislature, which would yield more than £2,000,000 a year.

The Civil Service Commission (under the chairmanship of Sir Hilary Blood) stated that, except for the present regionally controlled services, no immediate federalization of services was envisaged, although at an early stage Federal officers might be given powers of direction over Customs or postal administrations in the "units." The commission suggested that the initial organization of the Federal Government should consist of 12 offices and departments, among which would be distributed duties arising from the Constitution, the legislative lists, and other sources.

The report of the Judicial Commission, prepared under the chairmanship of Sir Allan Chalmers Smith, contained recommendations for the constitution of a Federal Supreme Court, whose principal work would be appellate. As it was not considered that sufficient candidates of suitable calibre for the Bench were likely to be obtained direct from the practising Bar, either in Britain or the West Indies, it was recommended that the qualification be extended to include membership of the Bar of any of the Commonwealth countries.

The population of the proposed Caribbean Federation is about 2,892,000, divided as follows: Jamaica (and dependencies) 1,545,100, Trinidad and Tobago, 697,600; Barbados, 222,900; St. Lucia, 86,200; Grenada, 82,100; St. Vincent, 73,100; Dominica, 59,100; St. Kitts-Nevis and Anguilla, 53,600; Antigua, 50,900; and Montserrat, 13,700. Of the non-participating territories, British Guiana has a population of 465,400, British Honduras of 78,100, and the British Virgin Islands of 7,600.—(Colonial Office, London - Times - Daily Telegraph - Manchester Guardian) **(14136 A; 12998 A.)**

A. SPAIN. — Student Agitation against Falangist Control of University Education. - Student Riots in Madrid. - Temporary Closing of University of Madrid. - Suspension of Constitutional Guarantees. - New Minister of Education and Secretary-General of Falangist Party.

Increasing discontent among Spanish university students, which had been evident for several months, culminated during February in serious rioting in Madrid between anti-Falangist and pro-Falangist students The disturbances were followed by the temporary suspension of two Articles of the Spanish Constitution (the Bill of Rights drafted in 1945—see 7419 A), amounting in effect to the suspension of *habeas corpus*, and by changes in the Government and in the leadership of the Falangist Party.

Towards the end of 1955 an outspoken report was drawn up by the Rector of the University of Madrid, Don Pedro Lain Entralgo, analysing the causes of the prevailing discontent among university students and suggesting remedies This report—which was presented to General Franco and to leading civil and ecclesiastical officials—enumerated the following causes, among others: the "restrictive and censorious paternalism" often exercised by the Government; the "sorry example" of large sections of Spanish society whose "preoccupation with immediate economic gain has become general and abusive"; the fact that more and more Spanish students went abroad and developed an "intense curiosity" about foreign intellectual movements, ways of life, and freedom of expression—"things which have for them the irresistible attraction of forbidden fruit"; and the fact that "the increase in jobs has not kept pace with the expanding university population" Don Lain Entralgo gave a warning that, although there was as yet no sign of Marxism among Spanish students, "it would not be strange if it were gestating among those whose conscience tends toward radicalism."

On Feb. 1, 1956, the students of the University of Madrid issued an open letter to the Government, the Ministry of National Education, and the secretary-general of the Falangist Party (the only political party permitted in Spain) demanding an end to Falangist control over the "thought, expression, and corporate life" of university students.

The open letter strongly denounced the Spanish University Syndicate (*Sindicato Español Universitario*, or S E U.), which is directed by the Falangist Party, exercises complete control over students and their activities, and acts as representative of the student body with the higher authorities. After calling for a national congress of Spain's 100,000 university students to work out some other form of organization, the letter spoke of the present "system of humiliating inertia . . in which all that is best in youth is being fatally lost year after year" The S E U was described as "an artificial structure which prevents or deforms true student representation," and as a barrier which "humiliates us in all international contacts with students of other countries." The letter also complained that university faculties were deficient in quality because many able professors and teachers were excluded from university life for "ideological or personal reasons."

Violent rioting occurred in Madrid on Feb. 8, 9 and 10, when pitched battles were fought in the streets between Falangist and anti-Falangist students of the University of Madrid. The anti-Falangists, about 1,000 strong, demonstrated against the Falangist Party's control of university life and education and also against General Franco's proposals for the restoration of the monarchy, whilst copies of the Falangist newspaper *Arriba* were publicly burned by students of the Law and Medical faculties. Order was eventually restored after police intervention, a number of students and others being arrested. A police statement, issued on Feb. 10, alleged that "elements of Communist affiliation" had been involved in the attacks against Falangist students and had used clubs, knives, and pistols, whilst *Arriba* alleged that a student seriously wounded in the riots had been shot by "Communists or fellow-travellers." The Ministry of Education announced that all classes at the University of Madrid had been suspended until further notice and that the Dean of the Faculty of Law had been dismissed. [The legal faculty was reported to be a stronghold of anti-Falangism.] It was officially stated that 57 persons had been arrested, among them Dionisio Ridreujo, a well-known poet and former Falangist director of propaganda, and Miguel Sanchez Mazas, the son of a leading Falangist writer.

After a meeting of the Spanish Cabinet, presided over by General Franco, it was decided on Feb. 11 to suspend two Articles of the Bill of Rights for a period of three months—Article 14, which gives Spaniards the right to reside in any part of the national territory, and Article 18 which lays down that no-one may be arrested without a judicial warrant, or detained for more than 72 hours without being brought before a magistrate. An official communiqué said that the Government had decided to apply the law vigorously against persons who "directly or indirectly cause disturbances of the peace or who may in future attempt to disrupt peace and public order and foment disunity among the Spanish people."

The suspension of the above-mentioned Articles implied that individuals could be banished from their places of residence to other parts of the national territory, or could be detained without judicial warrant for an indefinite period

Two changes in the Spanish Government—the first since 1951—were announced on Feb. 15: the appointment of Señor Jesus Rubio as Minister of Education in succession to Señor Joaquin Ruiz Jimenez, and of Señor José Luis Arrese as secretary-general of the Falangist Party and Minister without portfolio *vice* Señor Raimundo Fernandez Cuesta.

Señor Rubio (48), professor of commercial law in the University of Madrid, was Under-Secretary for Education from 1939 to 1951; he joined the Falangist movement at the outbreak of the Spanish Civil War, and spent that period as a political refugee in the Chilean Embassy in Madrid Señor Arrese (51), who joined the Falange on its foundation in 1933, had been secretary-general of the party from 1941 to 1945; an architect by profession, he is the author of a number of works expounding Falangist views on economic and social problems, and a close associate of General Franco

The University of Madrid was reopened on Feb. 20 after having been closed for ten days as a result of the student disturbances.—(A.B.C., Madrid - Le Monde, Paris - Times - Manchester Guardian - New York Times)

(Prev. rep. Spain, 14300 A.)

B. UNITED KINGDOM. — First Air-to-Air Guided Missiles for R.A.F. - Proposed Extension of Bahamas Proving Grounds. - Rocket Site in Cumberland.

The Ministry of Supply announced on Feb. 11 that it had placed a contract with the Fairey Aviation Co. for limited production of an air-to-air guided missile known as the *Fireflash*. This missile would be carried as part of the armament of piloted aircraft, would be propelled to supersonic speed by solid fuel rockets, and would have a "proximity-fused" warhead designed to explode as soon as it came within lethal range of its object. Delivery of the *Fireflash* would begin during the financial year 1956-57.

The Fairey Aviation Company announced on Feb. 27 that a *Fireflash* guided weapon [understood to have been fired from a Gloster *Meteor* night-fighter over the guided missile range at Aberporth, Cardigan Bay] had successfully destroyed a Fairey *Firefly* target aircraft. A week earlier (Feb. 20) it had been disclosed by the Royal Aircraft Establishment's guided missile department at Farnborough (Hants.) that on April 7, 1954, a *Firefly* target aircraft had been destroyed by a ground-to-air guided missile fired from a ramp at Aberporth, when the target was flying at a height of about 10,000 feet and about 8,000 yards from the missile launching-point.

It was explained that although this was the first time in Britain that a target had been destroyed by a ground-to-air missile fitted with a warhead, such missiles without warheads had been fired to within lethal distances some time earlier Altogether nearly 1,000 test missiles had been fired at Aberporth besides others on Salisbury Plain, whilst much testing was being done on the Woomera range in Australia.

Mr. Nutting (Minister of State, Foreign Office) announced on Feb. 7 that the British and U.S. Governments were engaged in negotiations to extend the Bahamas long-range proving ground for guided weapons (already extended in 1952 to include the Turks and Caicos Islands) to St. Lucia in the Windward Islands and Ascension Island in the South Atlantic. He explained that whilst the U.S. Government was free to reactivate any of the British bases which had been leased to the U.S.A. in 1941, separate agreements were needed to permit the establishment of long-range guided missile stations on these islands.

It was announced on Feb. 29 by the Minister of Supply (Mr. Maudling) that the Government were considering taking over an 8,000-acre site in the Cumberland fells as a testing-ground for rockets and rocket-motors. The area, known as Spede Adam Waste, contains only one inhabited dwelling, and is a few miles from the moorland hamlets of Gilsland and Moscow, near Hadrian's Wall.—(Times - Daily Telegraph)

C. CEYLON. — Mr. D. Senanayake resigns from United National Party.

Mr. Dudley Senanayake, the former Prime Minister of Ceylon, announced on Jan. 13 that he would resign from the United National Party (the Government party), and retire from active politics when the present Parliament was dissolved in February.

A. INDONESIA. — General Elections. - Population Census. - Start of Constituent Assembly Elections.

Indonesia's first general elections to the House of Representatives opened on Sept. 29 and concluded on Nov. 30, 1955. No single party obtained a majority, 198 of the 257 seats open to direct election being divided between the Nationalist Party, the *Masjumi* (Council of Indonesian Moslem Associations), the *Nahdlatul 'Ulama* (Moslem Association or Religious Teachers' Party), and the Communists, whilst the 59 remaining seats were distributed between 24 smaller parties. The final results —which were not officially announced until March 1, 1956— were as follows:

	Votes	Seats
National Party (PNI)	8,434,653	57
Masjumi	7 903,886	57
Nahdlatul-'Ulama	6,955,141	45
Communist Party (PKI)	6,176,914	39
United Moslem Party (PSII)	1,091,160	8
Protestant Christian Party (Parkindo)	1,003,325	8
Catholic Party	770,740	6
Socialist Party (PSI)	753,191	5
Movement for Defence of Indonesian Independence (IPKI)	541,306	4
Islamic Party (Perti)	483,014	4
National People's Party (Partai Rakjat Nasional)	242,125	2
Labour Party (Partai Buruh)	224,167	2
Movement for Defence of Pantja Sila	219,985	2
Indonesian People's Party (PRI)	206,261	2
PPPRI (Association of Police Personnel)	200,419	2
Party of the Masses (Partai Murba)	199,588	2
Consultative Assembly of Indonesian Citizens (Baperki)	178,887	1
Greater Indonesian Union (PIR)—Wongsonegoro group	178,481	1
Germda	154,792	1
Association of Indonesian Proletariats (Permai)	149.287	1
Dayak Association (Persatuan Dayak)	146,054	1
Greater Indonesian Union (PIR)—Hazairin group	114,644	1
Partai Tharikat Islam Indonesia	85,131	1
AKUI (minor Islamic party)	81,454	1
Village People's Party (Partai Rakjat Desa)	77,919	1
Party of the Independent Republic of Indonesia (PRIM)	72,523	1
Communist Youth Movement (Acoma)	64,514	1
" R Sudjono alias Prawirisudarso "	53,305	1

The long period between the opening of the elections and the announcement of the results was due partly to geographical reasons and partly to the complex nature of the electoral system. As Indonesia consists of hundreds of islands of varying size spread over a very large area, many of which are mountainous and covered with jungle, communications presented a particularly difficult problem, e.g., in Borneo electors living in remote areas had to travel to the polling stations by canoe along the rivers. In view of these difficulties, and also because of the activities of the *Dar-ul-Islam* and other rebel organizations, voting was spread over a period of two months in certain areas of Sumatra, Borneo, the Moluccas, and Celebes. In most areas voting took place in an orderly atmosphere, but in Central Java attempts to disrupt the elections were made by *Dar-ul-Islam* bands, and a second poll was ordered in Semarang and certain other towns after allegations of irregularities by both Nationalist and *Masjumi* supporters.

The process of electoral registration, which also served the purpose of a census, established that the population numbered 77,987,879, of whom 42,000,000 formed the electorate. All citizens over 18 were entitled to vote. The number of seats in the House of Representatives was fixed at 260 (one for every 300,000 people) and that for the Constituent Assembly (see below) at 520 (one for every 150,000 people). Seats were not divided among the 16 electoral districts on a strict population basis, however, additional representation being granted to districts with a comparative small number of voters. The distribution of seats was as follows:

Electoral District	Population	Number of Seats in the Constituent Assembly	Number of Seats in the House of Representatives
1. East Java	17,950,818	117	58
2. Central Java	17,602,101	115	57
3. West Java	14,419,993	94	47
4. Greater Jakarta	1,664,640	11	6
5 South Sumatra	3,155,830	20	10
6. Central Sumatra	3,360,548	22	11
7. North Sumatra	4,894,787	32	16
8. West Kalimantan (Borneo)	1,108,929	8	4
9. South Kalimantan	1,629,298	11	6
10. East Kalimantan	353,997	6	3
11. North-Central Sulawesi (Celebes)	1,605,850	11	6
12. S.E. and South Sulawesi	4,459,295	29	14
13. Maluku (Moluccas)	685,754	6	3
14 East Nusa Tenggara (Lesser Sunda Is)	2,183,545	15	8
15. West Nusa Tenggara	2,579,107	17	8
16 West Irian (Dutch New Guinea)	333,387	9	3
Total	77,987,879	520	260

The members for West Irian were nominated by the Government. The provisional Constitution laid down that Indonesian citizens of Chinese, Arab, and European origin should be represented in the House of Representatives by at least nine, six, and three members respectively, and in the Constituent Assembly by twice as many, and that if these numbers were not attained in the elections the Government should appoint additional representatives for these minorities.

Candidates, who were required to be at least 25 years of age, were allowed to stand either as individuals or on a party list. Individual candidates and the first candidate on a list had to be nominated by 200 voters, and other candidates by 25 voters As a large proportion of the electors were illiterate, each party list or individual candidate was represented by a symbol on the ballot paper, and the voter pierced a hole against the list or candidate of his choice inside the polling booth, afterwards placing it in the ballot box in public. [During earlier elections for certain seats in the House of Representatives, voters had been required to place blank papers privately inside a box marked with the symbol which they favoured—as is done in Indian elections. This system was abandoned, however, as some voters were found to have retained their ballot papers and sold them to political parties, which gave them to their supporters to drop in their boxes.]

Under the system of proportional representation employed, an electoral quotient was fixed for each district by dividing the total number of votes cast by the number of seats allocated to the district, and each individual or list receiving the required number of votes was declared elected. A new quotient was then fixed by dividing the " unspent " votes from all the districts by the number of seats still unfilled; candidates attaining this figure were returned, and any remaining seats were allocated to the candidates or lists with the highest number of votes. During the second stage of the counting, parties from the same district were allowed to " pool " their votes in order to reach the required quotient, whilst individual candidates were permitted to attach themselves to party lists with the same object

A total of 168 parties and groups contested the elections, most of which could be broadly classified as religious, nationalist, or marxist parties. Details of the leading parties are given below.

Religious Parties. The *Masjumi* was founded in 1945 as a federation of Moslem organizations, and has been represented in most Governments since Indonesia achieved her independence Generally regarded as " right of centre " in its outlook, it advocates the establishment of an Islamic republic and favours a pro-Western and anti-Communist foreign policy. It emerged as the strongest party in West Java, Greater Jakarta, Sumatra, West and East Borneo, the Celebes, the Moluccas, and East Nusa Tenggara.

The success of the *Nahdlatul 'Ulama* was the most unexpected feature of the election results. Founded in 1926 as a non-political organization, it joined the *Masjumi* in 1946 but broke away in 1952. Ultra-orthodox in its religious outlook, it is strongly nationalist and anti-Western in foreign policy and radical in its internal policy. It received the largest vote in East Java and South Borneo. The *PSII* (Moslem Political Federation or United Moslem Party) was founded in 1912, and was associated with the *Masjumi* from 1945-47 It stands to the left of the *Masjumi*, and is neutralist in foreign policy.

The *Christian Party*, founded in 1945, represents the Protestant community and draws its support mainly from the Moluccas, northern and central Celebes, and northern Sumatra. The *Catholic Party*, founded in 1949, received its highest vote in the Moluccas.

Nationalist Parties. The *Indonesian National Party* (PNI) was founded in 1946 by the merger of several nationalist organizations, and is left-centre in outlook and neutralist in foreign policy. Its home policy is based on the principle of " marhaenism," or the welfare of the common man, and is aimed at the establishment of a distinctively Indonesian form of democratic Socialism. It headed the poll in Central Java, and took second place in West Java, Jakarta, East Borneo, and East Nusa Tenggara.

Smaller nationalist parties include the *Indonesian People's Party* (PRI) and the *Greater Indonesian Union* (PIR). The latter has been split since 1954 into two groups, led respectively by Mr. Wongsonegoro and Professor Hazairin.

Marxist Parties. The *Communist Party*, founded in 1920, has increased greatly in membership in recent years—from less than 5,000 in 1948 to 500,000 in 1954 It won most of its votes in Java, taking second place in Central and East Java. The *Indonesian Socialist Party* was founded in 1948 as the result of a split in the Socialist Party, whose left-wing joined the Communists. It is regarded as pro-Western in outlook, and has co-operated closely in the past with the *Masjumi*. Smaller left-wing parties include the *Labour Party* (Partai Buruh) and the *Party of the Masses* (Partai Murba).

Elections to the Constituent Assembly, which will be a separate body entrusted with the drafting of a new Constitution to replace that adopted in 1950, commenced on Dec. 15, 1955, but have not yet been completed.

A. JORDAN. — Dismissal of Glubb Pasha from Command of Arab Legion. - Sir Anthony Eden's Statement. - British Executive Officers withdrawn from Arab Legion.

King Hussein of Jordan issued a decree early on March 2 ordering the immediate dismissal on pension of Lieut.-General John Bagot Glubb (Glubb Pasha), the British commander of the Arab Legion, and appointing Brigadier Radi Innab (the Assistant Chief of Staff) as successor to General Glubb, with the rank of major-general. The decree also terminated the services of Colonel Sir Patrick Coghill, British head of the Legion's intelligence service, Brigadier Hutton, British infantry commander with the Legion, and three Jordanian officers. The dismissal of General Glubb—who was asked to leave the country immediately—had been preceded by a seven-hour emergency meeting of the Jordanian Cabinet during the night of March 1-2.

The following official statement was issued in Amman on March 4: "To clear the doubts of many people abroad concerning the relations of Jordan with Great Britain, King Hussein and his Government wish to emphasize that no changes have occurred in those relations, and that the Jordanian Government continues to preserve and respect the 1948 treaty with Britain. As regards the remaining British officers engaged in the Arab Legion, they will remain in their posts as technical advisers and instructors." Assurances to the same effect were conveyed to the British Ambassador in Amman, Mr. Charles Duke.

The announcement of General Glubb's dismissal gave rise to mass demonstrations throughout Jordan, extending over three days, in which large crowds acclaimed the King as a national hero, denounced General Glubb as a "traitor," and demanded Arab financial aid to Jordan in place of the annual grants at present given by Britain. Addressing the thousands of demonstrators who had gathered outside the royal palace in Amman to acclaim him, the King described March 2 as "a holy day on which we have succeeded in our movement by God's will." He added: "I hope God will help us to regain our stolen rights and to work unitedly side by side to serve our country."

The dismissal of General Glubb was also greeted with rejoicing in Egypt, Syria, and Saudi Arabia. In Damascus, the Syrian Prime Minister (Sayed Ghazzi) repeated that the three countries were ready to offer financial assistance to Jordan in place of the annual British grants, whilst the Syrian Chamber of Deputies passed a resolution of unanimous support for King Hussein. The Secretary-General of the Arab League (Abdel Khalek Hassouna) issued a statement in Cairo declaring that "the transfer of the Arab Legion's command to Arab hands is a cause for rejoicing to every Arab in the entire Arab world."

General Glubb (58), who had been Chief of Staff of the Arab Legion since 1939 after having been second in command since 1930, left Amman by air for Cyprus on March 2, accompanied by his family. On arrival at London Airport on March 3, he said: "Jordan and Britain have been friends for 35 years. The last thing I should like is that my personal affairs should cause any weakening of that friendship. I am neither shocked, dazed, nor angry. I have always been treated with great kindness by the Hashemite royal family, and have no complaints."

The British Foreign Office issued a statement on March 2 saying that "the abrupt dismissal of this distinguished officer, who has so long a record of service to Jordan, has come as a deep shock to opinion here." It added "The full facts which have led to the King's sudden action are not known. H.M. Government have received from the King and the Jordan Government assurances that they wish the friendly relations between the two countries to continue. But they are deeply concerned at these developments and the possible consequences, internal and external, to which they may lead."

After calling at the Foreign Office for discussions with Mr. Nutting, the Minister of State for Foreign Affairs (deputizing for Mr. Selwyn Lloyd, then abroad), General Glubb lunched at Chequers on March 4 with the Prime Minister, to whom he made a personal report. On the following day Sir Anthony Eden made a statement to the House of Commons after a Cabinet meeting at which developments in Jordan were discussed in the light of General Glubb's report, and which was attended by the Chief of the Imperial General Staff and the Chief of Air Staff.

Sir Anthony Eden made the following statement to the House of Commons: "The House will have heard with resentment and regret of the summary dismissal of General Glubb and two other senior British officers of the Arab Legion. The lifetime of devoted service which General Glubb has given to the Hashemite kingdom of Jordan should have received more generous treatment.

"The King of Jordan and the Jordan Prime Minister have told H.M. Ambassador that they do not want any change to take place in Anglo-Jordan relations, and that they stand by the Anglo-Jordan treaty. The Prime Minister has also issued a public statement to this effect in which he said that the Jordan Government 'intends to retain the British officers now working with the Arab Legion in the work and services which they are carrying out'. . . The Jordan Government have also given assurances as to the maintenance of order and the protection of British lives and property.

"Her Majesty's Government have given due weight to the Jordan Government's statement regarding the officers. They feel that in view of the treatment meted out to the British officers who have been dismissed, it would be wrong for British officers in the Arab Legion to be left in an uncertain position. It is with this immediate problem that I propose to deal today.

"In our opinion officers in executive commands cannot be asked to continue in positions of responsibility without authority. We have, therefore, asked that such officers should be relieved of their commands. Those on the active list of the British Army—about 15 in number—will be recalled, the future of those on contract with the Jordan Government will be discussed with the Government. Other British officers in the Legion are being asked to continue to carry out their duties for the present.

"In this statement I have dealt only with the position of the British officers. We are considering the effect which these events will have on our relations with Jordan and indeed on the whole situation in the Middle East. These are matters which we are discussing with our allies, but I do not propose to comment on this wider aspect today."

Mr. Crossman (Lab.) asked whether, in spite of the Jordanian Government's assurances, the dismissal of General Glubb and the other British officers was "an anti-British *coup d'etat* which has created an entirely new situation in Jordan." He also asked whether the removal of all British control from the Arab Legion might not create "the gravest danger" of new incidents on the Israel-Jordan frontier.

Sir Anthony Eden replied: "There is no obligation under the terms of the Anglo-Jordanian treaty for the Jordan Government to employ British officers. There is an obligation on the British Government to supply British officers if requested. At the same time, it is clear from the treaty that its whole spirit is based on the need for consultation to ensure mutual defence, and in this sense General Glubb's dismissal is, in the view of the Government, against the spirit of that treaty. . . As for the effect on the international situation and on Israel, the House must judge, and can judge as well as the Government, the effect of the presence or absence of these British officers. I would have thought that many would realize that the effect on the military value of the Legion will be very serious indeed."

Mr. Hugh Gaitskell (Leader of the Opposition) asked whether it was not clear that the dismissal of General Glubb "constitutes a major change in our relations with Jordan and . . . also . . . a major setback for British policy in the Middle East." He declared that the Opposition "cannot allow the matter to rest here," and must insist on an early debate. **Sir Anthony Eden** said that he had not sought "in the slightest degree to minimize the seriousness of the events," and agreed that the House should debate the matter "at the earliest possible moment."

[The debate was held on March 7 and will be brought in a subsequent issue.—*Ed. K.C.A.*]

The Prime Minister of Jordan (Samir el-Rifai) saw the British Ambassador on March 7 and expressed the hope that Sir Anthony Eden would reconsider his decision to withdraw the British officers of the Arab Legion. The Jordanian Foreign Minister (Dr. Khalidi) said on the same day that the Jordanian Government desired to retain the services of all British officers of the Legion, and "did not intend to effect any change in their position or status."

King Hussein issued a statement on March 6 in which he said that he had dismissed General Glubb because he had "lost faith in his judgment and loyalty to Jordan."

After saying that General Glubb "had the mentality and policy of the Victorian era," King Hussein added: "Since my assumption of constitutional powers in May 1953, and until recently, I had repeatedly warned General Glubb that he should reform the Army's administration, eliminate corruption, and help strengthen the Army's morale, which was continuously weakened by General Glubb himself. He repeatedly lectured officers and tribal chiefs, asserting that Israel was stronger than the Arabs and that Arab diplomacy was unwise and foolish.

"Since the summer of 1954 I repeatedly asked General Glubb, who advocated that Jordan should evacuate a major part of the western bank of the River Jordan in the event of Israeli aggression, to draw up a defensive plan. We wanted to defend every inch of Jordan's territory and could not accept the theory of evacuation. But all was in vain. General Glubb remained deaf to my repeated orders. I lost faith in his judgment and loyalty to Jordan. Consequently I decided to terminate his services. He was on the basis of a contract with Jordan.

"General Glubb was dismissed, but treated with full honours. My car carried him from his residence to the airfield, and my Director of the Cabinet and Defence Minister, representing the Cabinet, saw him off. I gave him a souvenir in recognition of previous services, with a personal dedication. This was an indication that we treated him quite decently in a personal manner, although we disagreed with his ways and policy.

"I have instructed my Government in writing that General Glubb's removal does not change the existing friendly relations between Jordan and Britain, and that the remaining British officers will continue in their jobs in fulfilment of their contracts."

General Glubb said on March 7 that he was "astonished" at the statement issued by King Hussein, as he had been by the King's suggestion that he should relinquish the command of the Arab Legion. He added:

"Only 24 hours before I was informed of the King's wishes, I enjoyed a long and cordial interview with him. What I did point out was that Israel was undoubtedly stronger numerically than Jordan, which is common knowledge. I never at any time discussed the country's defences with Arab chiefs. . . Although nearly a year ago the King stated that he wished to defend every inch of Jordan, he gave me to understand subsequently that this was impracticable, since when he has never mentioned the subject to me again."

Referring to King Hussein's statement that he (the King) had continually warned him to eliminate corruption from the Arab Legion, General Glubb emphasized that the Legion had for years been famous for its incorruptibility. "The Legion's integrity and loyalty," he added, "have been a by-word in the world"

The following letter was written by General Glubb to *The Times* on March 8:

"Since my arrival in England . . . I have noted with regret a number of statements to the effect that the people of Britain resent the manner of my dismissal from Jordan While deeply appreciating the generous feelings expressed in Britain towards myself, I cannot avoid the fear that such feelings of resentment might well lead to unwise political decisions. I feel that such decisions should be taken in an atmosphere of calm reflection and not under the influence of resentment.

"There are two factors which may have influenced King Hussein in his decision to dismiss me The first is largely a personal one. His Majesty is still young and enthusiastic and is intensely desirous to serve and benefit his country. The tragic situation in which Jordan is placed, with one-third of its population destitute refugees and an active enemy on a 400-mile-long frontier, convinced me of the necessity of caution. His Majesty tended to favour bolder courses of action than I felt it my duty to advise, not that there was ever any open difference between us. King Hussein invariably treated me with kindness and indeed with cordiality Our discussions were frank, but they revealed this difference in tone I favoured caution while his Majesty tended to favour a more enterprising policy.

"The second factor which might have influenced his Majesty is that of pressure by Egypt and Saudi Arabia These two countries have made no secret of their desire for my removal. But the Egyptian Revolutionary Government is ideologically opposed to monarchy and would form an extremely unreliable ally for King Hussein King Saud, at the same time, is a hereditary enemy of King Hussein for reasons of dynastic rivalry. Egypt and Saudi Arabia are therefore unlikely to prove satisfactory allies to Jordan, and King Hussein may indeed be in need of help against such friends if his throne is to survive

"I cannot therefore avoid the impression that it would be a serious political error to 'get tough' with Jordan at this stage. Armed coercion is out of the question, and suddenly to cut off the [British] subsidy would either destroy Jordan or force the King into the arms of friends who would almost certainly ruin him. I feel strongly that such irrevocable action should not be taken under the influence of resentment."

It was announced on March 5 that H.M. the Queen had conferred the K.C.B. on General Glubb.

(Prev. rep. Jordan, 14646 A.)

The Arab Legion. The Arab Legion has 64 British officers, of whom 16 are employed by the Jordanian Government on local contracts and the remaining 48 are volunteer Regular officers seconded—usually for three years—from the British Army and the Royal Air Force Of the officers who have been dismissed, General Glubb and Sir Patrick Coghill had both been on local contracts, whilst Brigadier Hutton was a seconded Regular officer whose tour of duty had almost terminated.

The Legion (about 20,000 strong) was created by Britain in 1920 and is entirely financed and equipped by the U.K. Government, the current rate of subsidy being around £9,000,000 a year. It comprises one infantry division, two armoured car regiments, an anti-tank regiment, and base installations, being the strongest military component of the Jordanian Forces. The National Guard, about 30,000 strong, is controlled by the Arab Legion and has duties analogous to those of the British Territorial Army and Home Guard—primarily in policing the frontiers

Small British military forces and installations, including infantry and armoured units, are stationed in Jordan under the 1948 treaty There are also R.A.F. bases at Amman, Mafrak, and Akaba.

A. INDIA - INDONESIA. — Mutual Aid Agreement between Indian and Indonesian Air Forces.

An agreement on mutual aid between the air forces of India and Indonesia was signed in Jakarta on Feb. 28. Valid for five years, it provides for the exchange of pilots and officers, the training of Indonesian Air Force officers in India, the sale, loan, or exchange of equipment by the two Governments, and the maintenance of courier air communications.

B. UNITED KINGDOM. — Civil Estimates, 1956-57.

The Civil Estimates for the financial year 1956-57 were published on Feb. 16, together with the Estimates for the Revenue Departments and the Ministry of Defence (civil expenditure). They showed an estimated total expenditure of £2,969,492,938, an increase of £77,349,783 over the total of the Original and Supplementary Estimates for 1955-56.

The sums required for the various classes of expenditure, with the corresponding amounts for 1955-56 given for comparison, are shown in the following table:

	Total Civil Estimates† 1956-57 £	1955-56 £
Central Government Services	20,849,475	21,723,997
Foreign and Colonial Offices, etc.	90,469,128	118,190,666
Home Department, Law and Justice	89,214,275	83,987,648
Education and Broadcasting	413,571,029	379,057,487
Health, Housing, and Local Government	728,731,862	693,244,256
Board of Trade, Ministries of Labour and Supply	257,507,394	232,623,699
Ministry of Works, Public Buildings, Stationery and Printing, Ministry of Information	74,391,613	66,818,085
Ministries of Agriculture, Food, etc.	324,078,392	363,951,212
Ministries of Transport and Civil Aviation and of Fuel and Power, Department of Scientific and Industrial Research, Atomic Energy, Roads, etc.	158,648,630	141,666,475
Ministry of Pensions and National Insurance, etc.	455,752,840	445,015,930
Total Civil Estimates	2,613,214,638	2,546,279,455
Revenue Departments		
Customs and Excise	14,756,300	13,810,700
Inland Revenue	38,014,000	35,849,000
Post Office	287,298,000	277,894,000
Total for Revenue Departments	340,068,300	327,553,700
Ministry of Defence*	16 200,000	18,300,000
Grand Total	2,969,482,938	2,892,133,155

* See also Defence Estimates. † Adjusted for Transfers

Particulars of the more important items included in the Civil Estimates are given below, with comparative figures for 1955-56 (revised) in parentheses:

National Health Service. £502,715,130 (£479,330,405), of which £446,836,175 was for England and Wales and £55,878,955 for Scotland.

Housing. England and Wales £62,998,280 (£62,170,020), Scotland £13,981,540 (£12,845,500).

Agricultural and Food Subsidies and Grants. £237,327,430 (£265,056,760).

Ministry of Education. England and Wales £304,834,218 (£276.493,636) and Scotland £42,537,493 (£38,744,090).

Ministry of Supply. £213,400,000 (£187,719,000).

Other Estimates included £213,282,000 for National Insurance and Family Allowances; £127,626,000 for the National Assistance Board; £88,841,000 for War Pensions; £22,496,526 for Colonial Services; £18,000,000 for Colonial Development and Welfare; £34,419,900 for grants to Universities and Colleges; £28,894,000 for Broadcasting; £28,307,000 for Public Buildings; £54,390,630 for Roads; and £68,264,390 for Atomic Energy.
(1956-57 Votes on Account) **(Prev. rep. 14163 A.)**

C. PAKISTAN. — New Governor of East Pakistan.

It was announced in Karachi on March 5 that Mr. Fazlul Huq, the Pakistani Minister of the Interior, had been appointed Governor of East Pakistan in succession to Mr. Amiruddin Ahmed. Mr. Fazlul Huq, leader of the United Front, had been Premier of East Bengal (now East Pakistan) after the United Front's electoral victory in March 1954, but had been dismissed by the then Central Government in May 1954 (see 13746 A).

Mr. Amiruddin Ahmed, formerly Chief Justice of the Dacca High Court, had been sworn in as acting Governor of East Pakistan on June 14, 1955, following the resignation of Mr. Shahabuddin.—(Pakistan High Commissioner's Office, London)
(Prev. rep. 14273 C; Mr. Fazlul Huq, 14371 A.)

D. NETHERLANDS. — New Minister of Justice.

Professor Julius C. van Oven was sworn in on Feb. 15 as Minister of Justice in the Netherlands Government in succession to Mr. L. A. Donker, who had died on Feb. 4. Professor van Oven (74) was professor of Roman Law at the University of Leiden from 1925 to 1952, and was formerly foreign editor of the newspaper *Nieuws van den Dag*.—(Netherlands News Agency)
(Prev. rep. 14363 B.)

A. UNITED KINGDOM. — Capital Punishment. - House of Commons Majority for Abolition of Death Penalty.

After rejecting on Feb. 16, by a majority of 31 on a free vote, a Government motion to retain the death penalty while amending the law of murder, the House of Commons adopted an amendment in favour of the abolition or suspension of capital punishment by a majority of 46 votes. The Prime Minister, Sir Anthony Eden, subsequently announced on Feb. 23 that the Government would give priority to the Death Penalty (Abolition) Bill, a private member's Bill sponsored by Mr. Sydney Silverman (Lab.) which had already been given a first reading on Nov. 15, 1955.

Mr. Silverman's Bill provided (1) that no person should be sentenced to death for murder, (2) that any enactment requiring a court to pronounce a death sentence for murder should be construed as requiring the court to sentence the offender to life imprisonment; (3) that the provisions of the Act could be ended by an Order-in-Council upon the recommendation of both Houses of Parliament at any time not earlier than five years after its passage, (4) that if, however, the legislation had not been repealed by such an Order within 10 years, it would continue indefinitely. The Bill was supported by seven Labour members (Mr. Chuter Ede, Mr Aneurin Bevan, Mr. Wedgwood Benn, Mr Paton, Mr. Daines, Mr Paget, and Dr Stross), two Liberals (Mr Clement Davies and Mr. Wade), a Conservative (Sir Beverley Baxter), and an Ulster Unionist (Mr Montgomery Hyde).

Government Motion.—The Home Secretary's Speech.

A Government motion "that this House is of opinion that, while the death penalty should be retained, the law relating to the crime of murder should be amended" was tabled on Feb. 9 by Sir Anthony Eden, Mr. R. A. Butler (Lord Privy Seal), Major Gwilym Lloyd-George (Home Secretary), Mr. James Stuart (Secretary for Scotland), and Sir Reginald Manningham-Buller (Attorney-General). The Government's proposals provided for the amendment of the law relating to constructive malice, provocation, and "suicide pacts," the motion being introduced in the House on Feb. 16 by the Home Secretary.

Major Lloyd-George said that no-one who had any close responsibility for capital punishment wanted to retain it for its own sake. There could be no Home Secretary, and no-one among his advisers, who would not be thankful to be relieved of the terrible burden which the existence of capital punishment laid upon them It was incumbent upon those who wished to abolish capital punishment, however, to show that a change in the law would be beneficial The Government were bound to start from the assumption that, in a matter of this kind, the law should not be changed unless it could be clearly shown that there was good reason for the change, and that it would not prejudice the safety or well-being of the public

The most important argument used in favour of the abolition of capital punishment was that there was no clear proof that it was an effective deterrent. Statistics, however, afforded "no reliable evidence one way or the other" The Royal Commission on Capital Punishment had not said that capital punishment was not a uniquely effective deterrent—in some respects they thought it was The abolitionists' case was that since the death penalty could not be proved by statistics to be a uniquely effective deterrent, therefore it was not one, but he did not believe that "what could not be proved by statistics could not be true."

"The argument against capital punishment which has assumed some importance recently," he continued, "is that there is a risk of an innocent man being hanged. 'No human institution,' it is said, 'is infallible, a mistake can be made.' That, as an abstract proposition, is no doubt true, but consider how many institutions, before an innocent man can hang, must make, not only a mistake, but the same mistake—the police, the judge, the jury, the Court of Criminal Appeal, all anxiously searching for the truth. . . . If in a capital case there is a scintilla of doubt, the invariable practice is to recommend a reprieve."

It had been suggested, in a recent case, that three innocent men would have been hanged if a policeman who had been attacked had died [In the case referred to, three men were convicted in 1954 of causing grievous bodily harm to a policeman, and sentenced to long terms of imprisonment After two other prisoners had confessed to the crime, the three men were released on Jan. 14, 1956] It was doubtful, however, whether they would have been convicted, as the evidence of the principal witness as to identity—the constable—would not have been available, or would have been available only in the form of a dying deposition. Even if there had been a conviction, he did not believe that any Home Secretary would have thought it safe to allow the sentence to be fulfilled It was untrue, as had been suggested in the Press, that people who killed policemen were never reprieved; during the present century 15 people had been sentenced to death for murdering policemen, and four had been reprieved.

"I do not believe," the Home Secretary declared, "that there has been in recent times any case in which an innocent man has been hanged I say that advisedly, and after full consideration of the cases of Rowland and Evans." [Walter Rowland was hanged for the murder of a woman in 1947. While he was awaiting execution a man named Ware confessed to the crime, but afterwards retracted his confession. Ware was subsequently convicted of the attempted murder of a woman in 1951, but was found to be insane and ordered to be detained during the King's pleasure. For details of the Evans case see page 14285, end of second column]

Major Lloyd-George continued: "I believe capital punishment to be justified only if it is likely to reduce the amount of murder. If there is reason to think that without it there might be more murder, then I think it should be retained I am not shaken in that view by the fact that capital punishment causes suffering both to the condemned man and to others Murder causes suffering. I see neither sense nor humanity in risking an increase of suffering by innocent victims and their families in order to reduce the suffering of murderers and theirs. The first function of capital punishment is to give emphatic expression to society's peculiar abhorrence of murder . . It is important that murder should be regarded with peculiar horror, which is in itself a powerful psychological barrier against killing. The fact that we now recognize it is wrong to hang for petty theft does not prove it is wrong to hang for murder. Nor does the fact that hanging did not deter from theft when there was no effective means of detection prove that hanging does not deter from murder now there are effective means of detection"

As regards the alleged deterrent effect of capital punishment, he said: "On common sense, I should have thought it was obvious that death is more feared than practically any other punishment. Many people are inclined to discount the fear of hanging—first, because less than half the people found guilty of murder are hanged, and secondly, because murder is commonly in this country the sudden unpremeditated outcome of passion or insanity, of a situation in which the murderer neither thinks nor cares whether he hangs or not But that is not in itself highly significant The effect of hanging as a deterrent is to be seen not in those who commit murder, but in those who do not Of this type there can be no statistics"

The type of murderer who was conspicuously rare in Britain was the professional criminal. The Royal Commission had found that it was the unanimous view of witnesses from the police and prison service that the existence of the death penalty was the main reason why lethal violence was not more often used, and why criminals did not carry weapons. The professional criminal was apparently prepared to accept imprisonment as an "occupational risk," but not hanging If a man with a bad record was convicted of robbery, house-breaking, or burglary, he stood a good chance of imprisonment or preventive detention for up to 14 years, and in some circumstances of a life sentence. If capital punishment were abolished he would run little or no additional risk if he committed murder, and there would be nothing to deter him from shooting to avoid capture or to silence the only witness of his crime.

It was sometimes said that it would be necessary to deal with this situation by arming the police The police themselves disliked this idea because it would adversely affect the whole relationship between the police and the public, and it would be exceedingly unfortunate if it became necessary. In some areas and at some times they might have to be armed, but the arming of the police did not touch the real problem. The way to keep the peace was not to have "an arms race" between the police and criminals but "to ensure as nearly as possible that arms were not used. "We are fortunate in this country that criminals are in general unarmed," Major Lloyd-George observed. "We must not lightly forgo the deterrent that is likely to keep them so"

Continuing, the Home Secretary said that the average number of murders per million people in England and Wales in the three decades from 1910 to 1939 was 4.1, 3.9, and 3.3, whilst in Scotland the corresponding figures were 1.9, 2.9, and 2.6. The next lowest figures were those of Norway (5.4, 4.9, and 5), which, unlike the British figures, excluded infanticide. Elsewhere the figures were higher, and in some cases substantially so The fact that the murder-rate in Britain was the lowest in the world did not prove that capital punishment had a deterrent effect, but it did afford additional evidence of the danger of relying on statistics, since the effect of the abolition of capital punishment in countries with a comparatively high murder-rate could not be regarded as a reliable indication of the possible effects of abolition in a country where murder was much less prevalent It might be that in Britain murder had been narrowed down almost to that very small number of cases where no form of deterrent could operate, but it could not be assumed that this would continue if the only deterrent which seemed likely to operate effectively were removed.

The number of murders was about one-third above the pre-war average, although at present it showed no tendency to rise. The number of crimes of violence against the person was about three times the number before the war, and there had been a continuing increase over the last few years The same was true of indictable sexual offences against women. Too much need not be read into these figures, as part of the increase might be due to improvement in enforcement or to a tendency to charge offences in more serious categories; but a time when such crimes were on the increase, as at present, was not one when capital punishment could be safely abolished

On the question of an alternative penalty, the Home Secretary said that any alternative must be as effective a deterrent as possible and must be acceptable to public opinion. In certain cases of murder the only possible alternative was a long and indefinite term of imprisonment. It was rare at present for a reprieved murderer to stay in prison for more than nine years, but if capital punishment

were abolished some prisoners would have to be detained for the rest of their lives, or until they were too enfeebled to present a risk. At a tentative estimate, the number of murderers in prison would gradually increase to a maximum of 250 more than at present, of whom at any given time there would be 150 who could be released after periods of up to 20 years The remaining 100, who might have to be detained for longer periods, some possibly for the rest of their lives would have to be kept in conditions of maximum security because of the danger that they would commit further offences if they escaped Many of the more dangerous and violent of this group were in their twenties or early thirties, and they would be faced with the possibility of 30 or 40 years in prison Releasing some of these men who at present would be executed would involve considerable risk. It was true that only one murderer who had been released had committed a second murder, but murderers now reprieved and ultimately released were not of the type who were likely to commit murder a second time.

His conclusion, and that of the Government, was that, in spite of the abhorrence with which capital punishment was viewed by many sections of the community, the time had not come when the Government could recommend with any confidence that it should be abolished. The Government would, however, continue to keep the problem under review, taking into account any changes in public opinion, as well as other factors. If they considered that capital punishment could safely be abolished they would not hesitate to propose that course to Parliament.

Turning to the Government's proposals, Major Lloyd-George said that the Royal Commission's proposals for the alteration of the statutory age limit, the giving of discretion to the jury, and the alteration of the M'Naghten Rules, were unacceptable to the Government. The Commission had dismissed as impracticable the proposal to define degrees of murder, but had suggested three points at which the scope of murder might be reduced—the doctrine of constructive malice; the doctrine that words alone could not, save in the most exceptional circumstances, constitute sufficient provocation to reduce murder to manslaughter; and the liability of the survivor of a "suicide pact" to be convicted of murder.

The present scope of the doctrine of constructive malice was by no means clear, but it could still produce the result that an act done while committing a felony or resisting an officer of justice might be murder, although if done in other circumstances it would only be manslaughter. The Commission had recommended the abolition of this doctrine, with the proviso that an accomplice should remain liable to be found guilty of murder if the principal was so liable. The Government agreed that the law was at present unsatisfactory in this respect; but they wanted to make sure, in whatever they proposed that they did not eliminate the deterrent against criminals carrying weapons.

As regards provocation, the Royal Commission had recommended that it should be open to the jury to reduce a charge of murder to one of manslaughter on the grounds of provocation by words alone. The Government agreed that the law on this point should be amended.

With regard to "suicide pacts," the law said at present that if two people agreed to commit suicide and only one died, the survivor was guilty of murder; but if the survivor had made a genuine attempt to kill himself the practice was to recommend a reprieve. The Royal Commission considered that if the survivor had killed the other party he should be guilty of murder, but it had recommended that one who only aided, abetted, or instigated another's suicide should be guilty of that offence but not of murder, and might be liable to life imprisonment. The Government accepted this recommendation.

Both the Government and the Royal Commission had given much thought to the problem of mental abnormality. The first question was how to identify insanity, and the second was how to deal with persons who, though not insane, were of sufficient mental abnormality to be regarded as less than fully responsible for their actions. On the question of legal insanity, the Government held the view that some formula was necessary for the guidance of juries. They recognized that the M'Naghten Rules were open to criticism, but so was every alteration which had been suggested. They preferred the definition whose operation was known, and which, in practice, led to little hardship or injustice, to one which might be equally imperfect and, in practice, less harmless.

There remained the question whether anything could be done about "the no-man's-land between the clearly sane and the clearly insane." The Royal Commission thought there were strong arguments for adopting in England the Scottish doctrine of diminished responsibility. The Government would give the matter full consideration, and if they concluded that something on these lines should be done, proposals would be laid before the House.

In conclusion, the Home Secretary said that the law must be drafted in terms of offence and not of individual offenders. However it was amended, it would not of itself distinguish between those murderers who, while capital punishment was retained, ought to suffer death and those who ought not. The Government's view was that discretion should continue to be exercised by means of the Royal prerogative of mercy. In considering whether to recommend the exercise of this prerogative he would give full weight to the points to which the Royal Commission had drawn attention as matters appropriate for consideration at this stage. No Home Secretary, he reiterated, wished to retain capital punishment for its own sake, but the Government, after long and anxious consideration, felt it their duty to advise the House that capital punishment must be retained.

Amendment for Abolition of Capital Punishment. - The Parliamentary Debate.

Mr. Chuter Ede, Home Secretary in the 1945-51 Labour Government, moved the following amendment: "That this House believes that the death penalty for murder no longer accords with the needs or the true interests of a civilized society, and calls upon H.M. Government to introduce forthwith legislation for its abolition or for its suspension for an experimental period."

Mr. Ede said that the Home Secretary's speech, to which he had listened with "increasingly heavy disappointment," really meant that there was to be no change at all. Affirming that there had been important changes in public opinion, Mr Ede said that he had not met a single person who believed that the execution of Timothy Evans was justified by the facts subsequently revealed. In another recent case, the Home Secretary had recommended a reprieve only a few days after deciding that the law must take its course. If a Home Secretary could have second thoughts, how could one say that there was no possibility of error? Such things troubled responsible public opinion, which had been profoundly shocked by the Evans case.

Mr. Ede continued: "The Home Secretary is confronted, as we all are, with statistics which really prove nothing because, as he said, we do not know the potential murderers who do not commit murder —who are, in fact, deterred. If we are to wait until we can get some proof that would satisfy the Home Secretary on the line he adopted this afternoon, I do not believe that any such proof will ever be forthcoming. What we have to face is the state of public opinion and the extent to which the public feel it is safe that this irrevocable penalty can be used. I believe that events during the last two or three years have gravely shaken public opinion on that point, far more than it was ever shaken One can also point to the fact that the voice of the various religious communities has been more outspoken on this issue than ever before."

Sir Patrick Spens (C.) said that in his four years as Chief Justice of India he had presided over a great number of appeals against death sentences "I am convinced," he declared, "that fear of violent death is a deterrent. No statistics or arguments will convince me that it is not. You will do a grave injury to society if you suspend or abolish the death penalty." The abolition of capital punishment, he added, would mean running the risk that some innocent man, woman or child would be murdered who would not have been killed if the death penalty had been retained.

Mr. Herbert Morrison (Lab.)—a former Home Secretary, like Mr. Chuter Ede—spoke as follows: "I confess that on this issue I have been uncertain in my mind. I thought in 1948, with Mr Ede and the then Government, that in the circumstances then obtaining it would have been wrong to advise the House to abolish the death penalty. But the more I think about this, and the more one studies it, I become increasingly uncertain as to whether it is right to defend the death penalty. I am less convinced that it is a decisive deterrent in cases of murder. Having thought and thought, and wrestled with my mind and conscience about it, I have become increasingly doubtful whether the death penalty is so decisive a deterrent, or is more a deterrent than life imprisonment. I feel that since 1948 there has been a change in public opinion in favour of abolition or suspension. I am not going to argue that there is yet a majority opinion if you count heads . . But there are times when the House must not be afraid to be a little in advance of public opinion. . . . I have it in my bones that this change is going to come. . . . I would sooner have the House facing this important change freely and of its own wisdom than waiting until we are pushed into it in an undignified way, possibly in a wave of emotion about a particular case."

Sir Lionel Heald (C), a former Attorney-General, maintained that both Evans and Christie had been concerned in the murder for which Evans was hanged. "I was Attorney-General at that time," he declared, "and I prosecuted Christie. I knew all about the case and I think Evans was guilty of murder. My own view is that both Christie and Evans were concerned in that matter, and if there was a miscarriage of justice it was a technical one in that Christie was not hanged at that time." Calling for the retention of capital punishment, Sir Lionel pointed out that if the death penalty were to be abolished for murder it could not logically be retained under the Treason Act, or in colonial territories such as Malaya and Kenya.

Mr. William Reid (Lab.), who supported the abolition of capital punishment, described an execution which he had had to attend as a junior magistrate in Glasgow, he said that the condemned man had been the calmest person present, and the most agitated had been the Prison Governor, whose mangled body had some time later been found on the rail track between Glasgow and Ayr. Mr. Reid described capital punishment as "legalized murder committed by the State," and said that "we should be a cleaner and healthier nation without it."

Mr. Atkins (C.) said that he welcomed any measures designed to exclude from the category of murderer everybody but "the cold-blooded, calculating man who deliberately set out to take another's life." For such persons he had reluctantly come to the conclusion that the law should not be altered.

Mr. George Rogers (Lab), who demanded the abolition of capital punishment, said with reference to the Evans case. "The time will come when I will demonstrate that Evans was innocent and that the judges were wrong" After referring to the Ruth Ellis case, he added: "Ruth Ellis had a son. I took that boy into my home to try and save him from the horror of the day of execution. Can you imagine the agony experienced by my wife and children when they had to

pretend to that fatherless boy that everything was normal when at the same time his mother was being taken from the condemned cell to be hanged ? "

Mr. Knox Cunningham (U U.) said that he favoured the retention of capital punishment because he believed in the sanctity of human life, and because murder was an evil thing. " On one occasion in my life," he added " I had grave temptation to commit a murder One of the factors which influenced me was the fear of hanging I think today, if ever the temptation came again, I should also find hanging a deterrent. I believe capital punishment is a deterrent, and because of that I will support this motion."

Mr. Kennth Younger (Lab.) said that while at the Home Office [in which he was an Under-Secretary during the Labour Government] he had become convinced that the death penalty was not necessary. He observed that the only body of evidence in favour of retaining the death penalty seemed to be the police, who apparently believed that more criminals would carry arms and use them if the death penalty was abolished. This view, however, was only a " hunch " and not a conclusion based on evidence.

Mr. Nigel Nicolson (C.), who supported the amendment, thought it unlikely that capital punishment would be in existence in 50 years' time. He asked whether sufficient attention was paid to the distinction made by the law between attempted murder and actual murder, and in this connexion cited two cases in which women had fired revolvers at their lovers In one case the man was killed and the woman who shot him was hanged ; in the other, the bullet missed the intended victim by a fraction of an inch, and the woman was today walking about free. Mr. Nicolson commented that " any system which can allow for such an appalling distinction of penalty is wrong."

Mr. Stanley Evans (Lab.), who supported the retention of the death penalty, said that he had discussed the question with all sorts of people—" waiters, quarrymen, lorry drivers, shopkeepers, chambermaids, and hall porters "—and had found no-one who was in favour of abolishing capital punishment where the murder was cold-blooded and premeditated.

Sir Hugh Lucas-Tooth (C) said that although he had voted against abolition at the last debate, he would now vote for it if the choice were between no immediate action and total abolition As a result of his experience as a former Under-Secretary at the Home Office, he had reached the opinion that the death penalty should be abolished except where it was committed in the course of a robbery and with a weapon likely to cause death The terms of the Government motion were not incompatible with what he would like to see, though the Home Secretary's actual proposals fell a great deal short of what he would like. He would therefore support the motion, whilst reserving his freedom of action on the Bill which would follow.

The **Rev. Llewellyn Williams** (Lab.), who spoke in favour of abolition, drew attention to the " dangerous psychological damage " which was being inflicted on the minds of adolescents and children by the sensationalism with which murder trials were treated in some sections of the Press

Mr. Sydney Silverman (Lab.) observed that members were unanimously agreed that there should be some change in the law. There was no member of the House who would not rejoice if he felt he could vote for the abolition of the death penalty without doing harm to the principle of the sanctity of human life Another proposition, not universally accepted, was that in a case where everyone wanted the same thing, but were divided on the way it could be done, a compromise should be reached This gave attractiveness to the idea that the death penalty should be retained for some capital crimes and abolished for others. In the end, however, the question which the House had to decide could not be answered out of the law books and legal precedents, or by statistics—it was a great moral issue which the House had to decide. The onus of justifying the death penalty was on those who wished to retain it, and those who supported the amendment were entitled to ask the House not to retain the death penalty if they had a reasonable doubt about its effectiveness. " Over and above all these arguments about deterrents, retribution, the status of the law, and onus of proof," he went on, " there remains in all our minds the fear that, from time to time, at some eight o'clock or nine o'clock in the morning you take an innocent man out of a cell and break his neck." Many votes had been swayed in 1948 by the assurances of Sir John Anderson and Sir David Maxwell-Fyfe (both former Home Secretaries) that there was no reasonable probability of an innocent man being convicted, yet within two years Evans had been hanged. The worst thing about the death penalty was that it could persuade a highly intelligent, responsible, conscientious, and humane man like the Home Secretary to convince himself, because he dared not believe the contrary that Evans was guilty. Mr. Silverman concluded " Let us, as free men, free women, free members of Parliament in a free society, go forward and wipe this dark stain from our Statute Book for ever."

Mr. R. A. Butler, replying to the debate, said that when there was a free vote the Government would naturally expect to base their actions, if necessary after deliberation, on the decision of the House. It was right that there should be a Government motion, although there was a free vote ; the Government had a mind on the matter, and a great responsibility to the public as the supreme authority. They were taking from the Royal Commission certain recommendations which they thought would improve the law of murder, but they were not attempting to define degrees of murder, or, as the Administration had unsuccessfully done in 1948, to define crimes. As far as he could ascertain, no innocent man had been hanged within recent memory, and judgment should not be based on the " erroneous belief " that innocent men had been hanged. Mr. Morrison had indicated that the Government must " gallop ahead " of public opinion, but this was not the way the Government should behave in regard to the death penalty. If members decided to abolish the death penalty, they would have to accept something which many of them felt was infinitely more cruel [i e. lifelong imprisonment]. In his opinion, it would be unwise to abolish the death penalty without waiting for the Government's amendments.

Majority Vote for Abolition of Capital Punishment.

Mr. Chuter Ede's amendment was put to the vote and carried by 293 votes to 262. The motion, as amended, was then adopted by 292 votes to 246, the result being received with loud cheering from the supporters of abolition.

The 295 members (including tellers) voting for the amendment included 48 Government supporters, among them Mr. Julian Amery, Mr. J J. Astor, Lord Balniel, Sir Beverley Baxter, Sir Robert Boothby, Mrs. Evelyn Emmet, Mr. Foster, Sir Henry d'Avigdor Goldsmid, Mr Reader Harris, Lord Hinchingbrooke, Mr. Montgomery Hyde, Mr. Leather, Mr. Nicolson, Mr Ormsby-Gore, Brigadier Prior-Palmer, and Miss Joan Vickers [Seventeen of these had either voted against the suspension of the death penalty or abstained in the debate in February 1955, and 17 others had entered the House for the first time at the general election.] Five Liberals also voted for the amendment, including the Liberal leader, Mr. Clement Davies, who had opposed the suspension of capital punishment in the previous debate. Eight Labour members (Mr. Boyd, Mr Evans, Mr Fletcher, Mr. Hobson, Mr. Moody, Mr. Philips Price, Mr. Turner-Samuels, and Mr Wells) voted for the Government motion—i e. to retain the death penalty.

Sir Anthony Eden and ten other Cabinet Ministers, as well as Sir Winston Churchill, voted for the retention of the death penalty, whilst three other Ministers—Mr. Selwyn Lloyd (Foreign Secretary), Mr. Macleod (Minister of Labour), and Mr Heathcoat Amory (Minister of Agriculture)—abstained from voting. Junior Ministers who abstained or were absent included Mr Nutting, Mr. Enoch Powell, Mr. Walker Smith, Mr. Bevins, Sir Edward Boyle and Mr. Carr. [In a free vote it is the accepted practice that Ministers who disagree with the Government's policy on the question under discussion may abstain, but not vote against the Government]

In reply to a question by Mr. Chuter Ede, the Prime Minister stated after the debate : " The Government will give full weight at once to a decision taken by this House on a free vote, but I must add that we will at the earliest opportunity make a considered statement of the consequences which will flow from that."

Major Lloyd-George stated on Feb. 23 that it would be unconstitutional for the Home Secretary and the Secretary of State for Scotland to " abrogate capital punishment by administrative action in anticipation of the amendment of the law," and that each case would be considered on its merits, regard being had to " all relevant considerations either of a public or private nature."

Priority for Death Penalty (Abolition) Bill.

On Feb. 23 Sir Anthony Eden announced that the Government had decided to find time for a second reading of the Death Penalty (Abolition) Bill on a free vote, as they did not consider it appropriate for the Government to bring forward a measure against which they had recently advised the House.

The Prime Minister's decision was criticized by **Mr. Gaitskell** (Leader of the Opposition) and by **Mr. Herbert Morrison,** who maintained that it was inconsistent with the pledges given on Feb. 16 by Mr. Butler and Sir Anthony Eden himself This view was rejected by **Sir Anthony Eden,** who contended that the Government could not be asked to do more than to offer time for Mr. Silverman's Bill both in second reading and for later stages if required, and to offer a free vote at each stage. The Government, he added, certainly could not contemplate introducing legislation in a contrary sense to their own expression of view **Mr. Silverman** suggested that a suitable precedent was provided by the Labour Government's action in 1948, when, after advising against the contemplated reform. Mr. Attlee had " loyally accepted the decision of the House and adopted the remaining stages as a Government measure " He also asked what, if the Commons passed the Bill, would be the Government's attitude in " pursuing any matters which have to be pursued thereafter with the House of Lords." **Sir Anthony Eden** replied that, after the decision of the House, the Government considered that Mr. Silverman's Bill was " entitled to jump the queue and be given time and a free vote," but that he could not attempt to answer questions on what the Lords might do in any hypothetical circumstances.

Resolution by Prison Officers' Association.

The Prison Officers' Association, in a resolution sent to Major Lloyd-George on Feb. 22, referred to the disquiet aroused among prison officers by the House of Commons decision, and pointed out that " a convicted murderer may in the early stages of his sentence commit a further murder of either a fellow prisoner or a member of the prison staff without altering in any material way the sentence which he has to serve." The Association therefore requested " (1) that where a second murder is committed by a person serving a sentence for murder,

his position shall be catered for under special legislation"; and (2) that the Civil Service Superannuation Act of 1949 should be amended to make special provision for the widows or dependants of prison officers who might be killed "as a result of an attack by a prisoner."

Resignation of Chief Public Executioner.

The Home Office announced on Feb. 26 that the chief public executioner, Mr. Albert Pierrepoint, had asked the Prison Commissioners to remove his name from the list of executioners. Mr. Pierrepoint (who is landlord of a public house near Preston, Lancs.) declined to discuss the reasons for his resignation, but said that they were unconnected with "present discussions about capital punishment." Mr. Pierrepoint (47) had been chief executioner since 1946, on the retirement of his uncle, Mr. Thomas Pierrepoint. His father was also a public executioner.—(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. 14285 A.)**

A. UNITED STATES. — Foreign Aid, 1954-55.

A report of the U.S. International Co-operation Administration, dated Nov. 16, 1955, showed that during the fiscal year July 1954 - June 1955 the I.C.A. had allocated a total of $1,841,228,000 in foreign aid, of which $921,964,000 had gone to countries in the Far East; $477,874,000 to the Near East, Africa, and South Asia; $212,026,000 to Europe; and $46,339,000 to Latin America. Of the total, $807,146,000 had been for defence support; $502,000,000 for direct forces support; $256,329,000 for development assistance; and $111,796,000 for technical co-operation.

All the allocations to Europe—except $55,000,000 for direct forces support ($35,000,000 to the U.K and $20,000,000 to Yugoslavia)—were for defence support activities, divided as follows: Spain, $84,900,000, German Federal Republic, $24,051,000; Yugoslavia, $23,749,000, Italy, $16,072,000, Austria, $612,000; France, $518,000, Portugal, $76,000; Norway, $64,000, Belgium-Luxemburg, $49 000; Netherlands, $47,000; United Kingdom, $40,000, Denmark, $27,000.

The $46,339,000 to Latin America was entirely for development assistance and technical co-operation, the principal recipient countries being Bolivia ($12,887,000), Guatemala ($6,658,000), Brazil ($4.457,000), Haiti ($2,955,000), Peru ($2,418,000), and Chile ($2,130,000).

The division of aid between the countries in the Far East and the Near East, Africa, and South Asia is shown in the following table:,

	Direct Forces Support	Defence Support	Development Assistance ($'000)	Technical Co-operation	Total
Far East—					
Cambodia	25 000*	13,200	—	—	38,200*
Laos	35,000*	5,900	—	—	40,900*
Vietnam	234,800*	85,500	—	—	320,300*
Formosa	31,000	103,598	—	3,050	137,648
Indonesia	—	—	—	5,700	7,200†
Japan	—	—	—	475	475
Korea	—	236,194	—	—	236,194
Philippines	9,500	12,400	—	7,250	29,150
Siam	12,200	29,700	—	4,650	46,550
Near East, Africa, and South Asia‡—					
Afghanistan	—	—	—	2,021	2,021
Egypt	—	—	40,000	2,924	42,924
Ethiopia	—	—	—	4,091	4,091
Greece	10,000	24,110	—	—	34,110
India	—	—	69,135	15,168	84,303
Iraq	—	—	—	2,860	2,860
Israel	—	—	40,000	1,475	41,475
Jordan	—	—	5,000	2,293	7,293
Lebanon	—	—	5,700	1,995	7,695
Liberia	—	—	—	1,870	1,870
Libya	—	—	3,540	1,645	5,185
Nepal	—	—	1 675	772	2,447
Pakistan	—	65,500	950	5,300	71,750
Persia	—	—	65,800	8,730	74,530
Saudi Arabia	—	—	—	300	300
Turkey	25,000	65,690	—	—	90,690

* An additional $65,000,000 was allocated for direct forces support to the Indo-Chinese States as a whole. † Including $1,500,000 for other (unspecified) purposes. ‡ Also listed under this heading was $2,729,000 for technical co-operation in the overseas territories of Belgium, France, Italy, Portugal, and the United Kingdom, over half of which ($1,568,000) was for U K. territories.

The report gave cumulative totals of U.S. foreign aid since the start of the European Recovery Programme in April, 1948, showing that in this period a total of $19,908,527,000 had been allocated—$14,603,583,000 to Europe, $2,666,029,000 to the Far East, $2,330,477,000 to the Near East, Africa, and South Asia, and $110,815,000 to Latin America.—(International Co-operation Administration, Washington) **(14442 B.)**

B. FINLAND. — Coalition Cabinet formed by M. Fagerholm. - General Strike.

M. Fagerholm, the leader of the Social Democratic Party, was asked by President Kekkonen on Feb. 17 to form a Government, following the resignation of the former Cabinet which had been headed by Dr. Kekkonen before his election to the presidency. After prolonged inter-party negotiations, M. Fagerholm formed an administration which, like the Kekkonen Government, was based on a coalition of the Social Democrats and the Agrarians, and which also included one member each from the Finnish People's Party (Liberals) and the Swedish People's Party. Its membership was announced on March 3 as follows:

M. Karl-August Fagerholm (Social Democrat)	Prime Minister.
M. Ralf Torngren (Swedish People's Party)	Foreign Affairs.
M. Vilho Vayrynen (Social Democrat)	Interior.
*M. Aare Simonen (Social Democrat)	Finance.
*M. Emil Skog (Social Democrat)	Defence.
*M. Johannes Virolainen (Agrarian)	Education.
M. Eino Palovesi (Agrarian)	Posts and Telecommunications.
*M. Martti Miettunen (Agrarian)	Agriculture.
*M. Kauno Kleemola (Agrarian)	Commerce and Industry.
M. Eino Saari (Finnish People's Party)	Social Affairs.
M. Mauno Jussila (Agrarian)	Deputy Minister of Finance.
*M. Hannes Tiainen (Social Democrat)	Deputy Minister of Posts and Telecommunications.
*Mme. Vieno Simonen (Agrarian)	Deputy Minister of Agriculture.
Mme. Tyynne Leivo-Larsson (Social Democrat)	Deputy Minister of Social Affairs.

* Member of former Government.

Apart from M. Fagerholm's appointment as Prime Minister, the most important Cabinet change was the appointment of M. Torngren (the leader of the Swedish People's Party) as Foreign Minister in succession to M. Virolainen, who became Minister of Education. M. Simonen, the new Finance Minister, succeeded M. Tervo, who had been killed in a car accident on Feb. 26.

The new Cabinet was formed while a nation-wide general strike was in progress—the first general strike in Finland since 1917, at which time the country was under Russian rule. The strike began on March 1, when the 200,000 members of the Finnish Trade Union Federation struck work after the Government and the employers had refused to meet union demands for all-round wage increases of five per cent to balance the rising cost of living caused by an increase in farm prices. Although all factories, transport and postal services in Finland were brought to a standstill, the T.U. Federation agreed not to extend the strike to public utilities for humanitarian reasons.

M. Fagerholm's Government set up a three-man committee on March 5 to mediate between the parties with a view to reaching a settlement of the general strike. Its members were M. Teuvo Aura, a former Minister of Commerce; M. Aku Sumu, formerly head of the Trade Union Federation; and M. Klaus Waris, Governor of the National Bank of Finland. (Berlingske Tidende, Copenhagen - Svenska Dagbladet, Stockholm - Times) **(Prev. rep. President Kekkonen, 14724 A; Cabinet, 14509 C; 14073 A.)**

C. UNITED KINGDOM. — Gold and Dollar Reserves in February. - Increase of $61,000,000.

The sterling area had a gold and dollar surplus in February of $61,000,000 after taking account of (*a*) $6,000,000 received in U.S. defence aid; (*b*) the payment of $8,000,000 to the European Payments Union, representing that part of the January deficit which had to be settled in gold or dollars; and (*c*) the payment of $2,000,000 under bilateral agreements with creditors of the E.P.U. As a result of the February surplus —which was the largest increase in the reserves in any month since May 1954—the sterling area's gold and dollar reserves rose to $2,210,000,000 on Feb. 29.

Provisional figures for the E.P.U. February settlement showed that the U.K. had a deficit of $22,400,000 (£8,000,000), which would be settled in March three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union.—(Treasury Press Office, London) **(14703 A.)**

A. UNITED STATES. — Presidential Election. - President Eisenhower to seek Second Term of Office.

President Eisenhower announced at a press conference on Feb. 29 that he was prepared to stand for a second presidential term if the Republican Party chose him as their candidate in the presidential election to be held in November 1956.

A fortnight earlier (Feb. 14) the President had been examined by six doctors, headed by Dr. Paul Dudley White (the Boston heart specialist), and had been pronounced fit to stand for a further term of office. The doctors said that "medically the chances are that the President should be able to carry on an active life satisfactorily for another five to ten years,"

In making his announcement, the President said that he had discussed the problem of whether or not he should run for a second term with "everybody that I thought was my friend and some that I wasn't so sure of" He stated that his decision had partly been influenced by his personal conviction that he could "last out the (next) five years," and declared that his campaign would be conducted "on the record I have established before the American people"

The President explained more fully his reasons for seeking a second term in the following broadcast made on the same evening:

". . . I have decided that if the Republican Party chooses to re-nominate me, I shall accept that nomination Thereafter, if the people of this country should elect me, I shall continue to serve them in the office I now hold I have concluded that I should permit the American people to have the opportunity to register their decision. .

In reaching this conclusion I have, first of all, been guided by the favourable reports of the doctors . Their reports are that my heart has not enlarged, that my pulse and blood-pressure are normal that my blood analysis is excellent and my weight satisfactorv, and that I have shown no signs of undue fatigue after periods of normal mental and physical activity.

In addition I have consulted literally with multitudes of friends and associates, either personally or through correspondence With their advice—once I had been assured of a favourable medical opinion—I have diligently sought the path of personal responsibility and of duty to the immense body of citizens who have supported me and this Administration in what we have been jointly trying to do In the last analysis, however, the decision was my own Even the closest members of my family have declined to urge me to any specific course, merely saying that they would cheerfully abide by whatever I decided was best to do.

From the moment that any man is first elected President of the United States there is continuous public interest in the question as to whether or not he will seek re-election In most instances Presidents in good health have sought, or at least have made themselves available for, a second term. In my own case this question, which was undecided before my recent illness, has been complicated by the heart attack I suffered. . . Aside from all normal considerations, I have been faced with the fact that I am classed as a recovered heart patient. This means that, to some undetermined extent, I may possibly be a greater risk than is the normal person of my age My doctors assure me that this increased percentage of risk is not great.

So far as my own personal sense of well-being is concerned, I am as well as before the attack occurred. It is, however, true that the conclusions of the doctors that I can continue to carry the burdens of the Presidency contemplate for me a regime of ordered activity, interspersed with regular amounts of exercise, recreation, and rest. I must keep my weight at a proper level. I must take a short midday breather I must normally retire at a reasonable hour, and eliminate many of the less important social and ceremonial activities.

But let me make one thing clear As of this moment, there is not the slightest doubt that I can now perform, as well as I ever have, all of the important duties of the Presidency. This I say because I am actually doing so, and have been doing so for many weeks Of course, the duties of the President are essentially endless. No daily schedule of appointments can give a full time-table—or even a faint indication—of the President's responsibilities. Entirely aside from the making of important decisions is the formulation of policy through the National Security Council and the Cabinet, and co-operation with Congress and with the States. There is for the President a continuous burden of study, contemplation, and reflection.

Of the subjects demanding this endless study, some deal with foreign affairs, with the position of the U.S A. in the international world—her strength, her aspirations, and the methods by which she may exert her influence in the solution of world problems and in the direction of a just and enduring peace. These are a particular constitutional responsibility of the President. The subjects that require this study and contemplation include major questions affecting our economy, the relationship of our Government to our people, the Federal Government's proper role in assuring our citizens access to medical and educational facilities, and important economic and social policies in a variety of fields. The President is the constitutional Commander-in-Chief of our armed forces, and is constantly confronted with major questions as to their efficiency, organization, operation, and adequacy. All these matters, among others, are with a President always: in Washington, in a summer White House, on a weekend absence, indeed, even at a ceremonial dinner and in every hour of leisure. The old saying is true—a President never escapes from his office.

These are the things to which I refer when I say that I am now carrying the duties of the President So far as I am concerned, I am confident that I can carry them indefinitely. Otherwise I would never have made the decision I announced today. The doctors insist that hard work of the kind I have described does not injure any recovered coronary case, if such a recovered patient will follow the regime they lay down. Certainly, to this moment, the work has not hurt me. Readiness to obey the doctors, out of respect to my present duties and responsibilities, is mandatory in my case. I am now doing so, and I intend to continue doing so for the remainder of my life, no matter in what capacity I may be living or serving. Incidentally, some of my medical advisers believe that adverse effects on my health will be less in the Presidency than in any other position I might hold. They believe that, because of the watchful care that doctors can and do exercise over a President, he normally runs less risk of physical difficulty than do other citizens. . . .

With this background of fact and medical opinion and belief. what do these circumstances imply in terms of restrictions upon the activities in which I have been accustomed to participate in the past? During the first 2½ years of my incumbency, I felt that a great effort was needed in America to clarify our own thinking with respect to problems of international peace and our nation's security, the proper relationships of the Federal Government with the States; the relationship of the Federal Government to our economy and to individual citizens, increased co-operation of the Executive branch with Congress; problems of the nation's farmers: the need for highways, the building of schools; the extension of social welfare, and a myriad other items of similar importance. To this public clarification of issues I devoted much time and effort.

In many cases these things can now be done equally well by my close associates, but in others I shall continue to perform these important tasks Some of the things in which I can properly have a reduced schedule include public speeches, office appointments with individuals and groups, ceremonial dinners, receptions, and portions of a very heavy correspondence

I have done a great deal of travelling, much of which was undertaken in the effort to keep in personal touch with the thinking of you, the people of America Both in war and peace it has been my conviction that no man can isolate himself from the men and women he is attempting to serve and really sense what is in their hearts and minds This kind of activity I shall continue, but not on such an intensive basis . . .

All this means that neither for re-nomination nor re-election would I engage in extensive travelling and in 'whistle-stop' speaking—normally referred to as 'barn-storming' I had long ago made up my mind, before I ever dreamed of a personal heart attack, that I could never, as President of all the people, conduct that kind of political campaign where I was personally a candidate The first duty of a President is to discharge to the limit of his ability the responsibilities of his office. On the record are the aims, efforts, accomplishments, and plans for the future of this Administration Those facts constitute my personal platform.

I put all these things clearly before you for two reasons The first is that every delegate attending the Republican Convention next August is entitled to know now that, for the reasons I have given I shall, in general, wage no political campaign in the customary pattern Instead my principal purpose, if re-nominated, will be to inform the American people accurately, through the means of mass communication, of the foreign and domestic programme this Administration has designed and has pressed for the benefit of all our people; to show them how much of that programme has been accomplished or enacted into law; to point out what remains to be done, and to show how we intend to do it.

If the Republican delegates believe that they should have as their presidential nominee one who would campaign more actively, they would have the perfect right—indeed, the duty—to name such a nominee I would accept their decision cheerfully, and would continue by all means within my power to help advance the interests of the American people . .

The second reason for placing these things before you is because I am determined that every American shall have all available facts concerning my personal condition and the way I am now conducting the affairs of this office. Thus, when they go to the polls next November to elect a President, they can—should I again be one of the nominees—do so with a full understanding both of the record of this Administration and of how I propose to conduct myself now and in the future. . . .

As I hope all of you know, I am dedicated to a programme that rigidly respects the concepts of political and economic freedom on which this nation was founded; that holds that there must be equal justice and equality of opportunity for individuals, that adapts governmental methods to changing industrial, economic, and social conditions, and that has as its never-changing purpose, the welfare, prosperity, and, above all, the security of 166,000,000 Americans.

The work that I set out four years ago to do has not yet reached the state of development and fruition that I then hoped would be accomplished within the period of a single term in this office. So, if the American people choose, under the circumstances I have described, to place this duty upon me, I shall persist in the way that has been charted by my associates and myself I shall continue, with earnestness, sincerity, and enthusiasm, to discharge the duties of this office."

In making his announcement at his press conference, President Eisenhower declined to state whether or not he wished Vice-President Nixon to run with him as vice-presidential candidate, saying that this was a matter for the Republican Convention to decide. He declared, however, that his "admiration and respect" for Mr. Nixon were "unbounded," and said that he had been "a loyal, dedicated and successful associate." (NewYork Times - New York Herald Tribune)

(Prev. rep. 14608 B; 14530 D.)

A. INDIA. — Press Commission's Report. - Implementing Legislation.

Resolutions approving the recommendations of the Indian Press Commission (see 13949 A), and requesting the Government to implement them as early as possible, were adopted by the House of the People on Aug. 23, 1955, and by the Council of States on Sept. 14.

Dr. Keskar (Minister of Information) told the Council of States that the Government accepted in principle the Commission's suggestions for the establishment of a Press Council, consisting mainly of journalists, which would maintain professional standards, examine matters relating to newspapers, and provide "a salubrious check on sections of the Press which carry on undesirable activities." The Government also accepted the recommendation that newspaper prices should be fixed according to the number of pages, in order to help the smaller and regional language newspapers. As regards the Commission's proposal that the Press Trust of India should become a public corporation and the United Press of India a public trust, Dr. Keskar said that he had no constitutional power to force the news agencies to reorganize, the Government would, however, see that they were run on the right lines

The Press and Registration of Books (Amendment) Bill, which provided for the appointment of a Press Registrar as recommended by the Commission, was passed by the House of the People on Nov. 22 and by the Council of States on Dec. 5, 1955.

The Bill, which amended the Press and Registration of Books Act of 1867, laid down that all newspapers must supply the Registrar with such information as the names of their proprietors, editors, printers, and publishers, the average number of pages printed each week, and any other particulars required by the Government. The Registrar's staff would have right of access to any relevant record or document relating to a newspaper in its publisher's possession, and would be empowered to enter any premises where they believed such documents to be, and to remove them if necessary.

The Working Journalists (Conditions of Service) and Miscellaneous Provisions Bill, which regulated the working conditions of journalists and other newspaper employees along the lines recommended by the Commission, was passed by the House of the People on Dec. 20, 1955, after previous approval by the Council of States.

This Bill dealt with working hours, periods of notice, payment of gratuities, the establishment of a provident fund, and the settlement of disputes, and provided that a board should be set up to determine minimum salaries and wages Introducing the Bill in the Council of States, Dr. Keskar stated that this was the first occasion when a statutory minimum wage had been fixed for any except "sweated" industries, and the Government had therefore decided to lay down a definite procedure which would serve as a model for other industries and professions.

Dr. Keskar told the Indian Parliament on Sept. 30 that the Government had accepted in principle the Commission's recommendation not to permit the publication in India of foreign newspapers and periodicals dealing mainly with news and current affairs. He added that permission had been refused for the publication of an Indian edition of the *New York Times*. (The Hindu, Madras - The Statesman, Calcutta - Indian High Commissioner's Office, London) **(Prev. rep. 13949 A.)**

B. ISRAEL - BULGARIA.—Israeli and South African Compensation Claims for Shooting-down of Airliner.

It was announced by the Israeli Foreign Ministry on Feb. 15 that Israel had submitted a compensation claim for $2,656,858 to Bulgaria in connexion with the shooting-down of an Israeli airliner over Bulgarian territory on July 27, 1955, with the loss of 58 lives.

The South African Government announced on Feb 17 that it had also lodged a compensation claim against Bulgaria for the loss of four South African lives in the incident.

It had been announced in Washington on Aug. 11, 1955, that Bulgaria had offered to pay compensation for the death of the 12 American citizens who were on board the airliner when it was shot down. In addition, Bulgaria had made an apology to the U.S. Government and had promised to punish those responsible for the incident.—(New York Times - New York Herald Tribune - Cape Times) **(Prev. rep. 14359 E.)**

C. AUSTRIA - SOVIET UNION. — Danube Navigation Agreement.

It was announced in Vienna on Feb. 15 that an agreement on Danube navigation had been concluded between the Austrian and Soviet Governments enabling Austrian shipping to use the whole stretch of the river down to the Black Sea. The agreement—which followed those concluded by Austria with the other riparian countries—also provided that the carriage of passengers and freight from one country to the other should be shared by the Soviet and Austrian Danube navigation companies in a fixed proportion.—(Wiener Zeitung) **(Prev. rep. 14222 B.)**

D. AUSTRALIA. — Uranium Contract with Britain.

Mr. Beale, the Federal Minister for Supply, announced on March 1 that the Australian Government had approved an agreement reached between the U.K. Atomic Energy Authority and Mary Kathleen Uranium Ltd. under which the Authority would buy uranium oxide from the Mary Kathleen leases near Mount Isa, in Western Queensland, where a treatment plant would be erected. The total value of the contract (which would extend over several years) was expected to be more than £A40,000,000 but uranium development in the south Alligator River area of the Northern Territory, where some deposits undoubtedly existed, could increase the value of the contract to about £A60,000,000; the Authority had therefore agreed, at the Government's request, to buy additional uranium oxide from the area if ore reserves there were proved by the end of 1957.

Mr. Beale added that the Australian Government had reserved the right to acquire for defence purposes any part of the uranium produced during the term of the contract, and had also satisfied itself that Australia's future uranium needs would not be prejudiced. The Government had also stipulated, and the parties had agreed, that Mary Kathleen Uranium Ltd. should treat a certain tonnage of outside ores—to be included in the contract—at the Mary Kathleen plant if that were practicable Production at the plant would begin early in 1959, or possibly before.

With regard to finance, Mr. Beale said that the capital required would amount to about £A10,000,000, most of which would come from abroad, thereby avoiding a strain on Australia's present capital resources. Rio Tinto (Australia) Pty. Ltd, a subsidiary of the U.K. firm of Rio Tinto, was the major shareholder in Mary Kathleen Uranium Ltd, in which there was also a large Australian shareholding.

Mr John Poole, managing director of Rio Tinto (Australia) Pty. Ltd and Mary Kathleen Uranium Ltd, stated on the same day that it was less than 12 months since Rio Tinto technicians had begun to prove the deposit, the proving operations alone having cost the company more than £A300,000 All the capital required would be provided by the U K, but Australasian Oil Exploration Ltd. and the original prospectors' syndicate would together receive 44 per cent of the profits.

The U K Atomic Energy Authority stated on March 1 that it had undertaken to lend up to £5,000,000 (sterling) to bring the mine into operation

The development of the mine, which is equidistant (40 miles) from Cloncurry and Mount Isa, will entail the construction of a township for 1,000 people, complete with a hospital, hotel, shopping centre, cinemas, and recreational facilities; the company's own orchards and market gardens to supply the township; a 3,500,000,000-gallon reservoir able to withstand a three-year drought; a power station able to meet the heavy industrial and domestic demands; and an ore-crushing mill and treatment plant for processing the uranium ore.

E. UNITED KINGDOM. — The Duke of Edinburgh's Youth Award Scheme.

It was announced on Feb. 21 that H.R.H. the Duke of Edinburgh had decided to offer an award to young people, initially confined to boys, which would be known as "The Duke of Edinburgh's Award"; that he had accepted an offer from Brigadier Sir John Hunt (leader of the British Everest Expedition of 1952) to advise and assist in promoting the scheme; and that Sir John was retiring from the Army to take up this appointment. The announcement said:

"In recent years many people have spoken to the Duke of Edinburgh about the increasing need, under modern conditions, to provide further opportunities for young people between the ages of 15 and 18 to achieve a balanced development of their character. Emphasis has been given to this problem by a report entitled *Citizens of Tomorrow*, published recently by King George's Jubilee Trust Since 1954 His Royal Highness has been considering this need and the possibility of establishing certain standards, for progressive achievement, for which awards might be given. After consulting certain national voluntary youth organizations and others, His Royal Highness has decided to offer an award for such achievements, which will be known as 'The Duke of Edinburgh's Award'

"As a first step His Royal Highness has accepted the offer of certain organizations to conduct limited experiments in the operation of a scheme designed to carry out this purpose during a trial period. Other bodies may be invited to participate. This experiment is being financed as part of the Memorial to King George VI ... Details of the achievements, the standards to be set, and the award itself, are being worked out in co-operation with the organizations taking part in the experiment ..."

Sir John Hunt said that the award was expected to be made for performances in various fields of endeavour—e.g. first aid in rescue work, study or craftsmanship, adventurous enterprise, and physical fitness.—(Times - Daily Telegraph) **(Prev. rep. King George VI Memorial Fund, 13596 B.)**

MARCH 10—17, 1956

A. SOVIET UNION.—20th Communist Party Congress. - M. Khrushchov's Report on International Situation, Internal Developments, and Party Organization. - Criticisms of Stalinist Policy. - Denunciation of "Cult of the Individual." - Emphasis on Collective Leadership. - New Central Committee and Presidium.

The 20th congress of the Soviet Communist Party was held in Moscow from Feb. 14-25, being attended by over 1,400 delegates. The congress approved the sixth Five-year Plan (see 14717 A), endorsed the Central Committee's report presented by M. Khrushchov (First Secretary of the party), and elected a new Central Committee.

M. Khrushchov's report, delivered in a six-hour speech on Feb. 14, dealt with both international and internal affairs, as well as with developments inside the party. In the section on international affairs he rejected the view that war was inevitable, reaffirmed Soviet support for the principle of peaceful co-existence, and repudiated the idea that revolution could be "exported." He also appealed for co-operation between Communist and Social Democratic parties, and declared that in certain countries the transition to Socialism could take place by parliamentary methods. A summary is given below (cross-headings inserted).

The International Situation.

Economic Development in the U.S.S.R. Comparing the economic progress of the Soviet Union with that of the capitalist countries, M. Khrushchov claimed that between 1929 and 1955 industrial output in the Soviet Union had risen by 1,949 per cent, whereas during the same period it had increased in the U.S.A. by 134 per cent, in Britain by 81 per cent, in France by 25 per cent. in Italy by 94 per cent, in Western Germany by 113 per cent, in Japan by 139 per cent, and in capitalist countries as a whole by 93 per cent. Thus in 26 years the Soviet Union had increased its industrial output more than twenty-fold, despite the damage caused by the war, whilst the U.S.A., which enjoyed exceptionally favourable conditions, had little more than doubled its production. The Soviet Union, he claimed, held second place in the world in total volume of industrial output, whilst in the production of pig-iron, steel, aluminium, copper, machinery, electricity, cement, and coal it had outstripped France, Western Germany, and Britain, and was steadily catching up with the United States.

M. Khrushchov continued: "Today it is no longer necessary for each Socialist country to develop all branches of heavy industry, as had to be done by the Soviet Union, which for a long time was the only Socialist country and existed in a capitalist encirclement. Now, when there is a powerful community of Socialist countries whose defence potential and security is based on the industrial might of the entire Socialist camp, each European people's democracy can specialize in developing those industries and producing those goods for which it has the most favourable natural and economic conditions. This creates the necessary pre-requisites for releasing considerable resources to develop agriculture and the light industries . . Under treaties which it has concluded, the Soviet Union is now helping the people's democracies to build 391 enterprises . . We have granted the people's democracies long-term credits totalling 21,000,000,000 roubles on the most favourable terms. The Soviet Union is also helping friendly countries to organize the production and peaceful use of atomic energy. . . . Our country is helping the People's Republic of China to build, within one five-year period alone, 156 enterprises and 21 separate workshops, supplying industrial plant to a total value of about 5,600,000,000 roubles. In exchange for these deliveries the Soviet Union is receiving products from China and other people's democracies in which it is interested. . "

The Economic Situation in Capitalist Countries. M. Khrushchov asserted that "the capitalist world economy is developing extremely unevenly and has become still more unstable," and attributed the increase in production in the post-war period to the following factors: (1) increased expenditure on armaments; (2) the favourable situation created for the U.S.A., Britain, and France by the temporary removal of German, Japanese, and Italian competition and the acute demand for food and other staple commodities in Western Europe after the war, (3) the renewal of capital equipment after the war, (4) a fall in real wages in certain countries, accompanied by increased output per industrial worker. He affirmed, however, that the "stimulating action of many of these temporary factors" was becoming exhausted.

In support of his contention that "underlying crisis symptoms are evident," M. Khrushchov stated that in the U.S.A. commodity stocks and consumer credit had reached "dangerous proportions," and that in a number of countries huge quantities of farm produce had accumulated which could not find a market. Western Germany and Japan had practically regained their pre-war positions in the world market, and a further increase in each country's exports was possible only as a result of fierce struggle against competitors. The U.S.A. had "disorganized the world market by carrying on unilateral trade, fencing off its market from foreign imports, prohibiting trade with the East, dumping agricultural produce, and resorting to other measures which seriously affect other countries." The problem of markets was becoming all the more acute because of the formation of the new and growing Socialist world market and the development of industry in the former colonial countries, with the result that "the struggle for markets and spheres of influence will become still sharper within the imperialist camp." After asserting that strikes and industrial unrest had assumed much wider proportions in the capitalist countries than in pre-war years, M. Khrushchov suggested that "capitalism is steadily moving towards new economic and social upheavals."

International Relations. After the war, M. Khrushchov declared, the policy pursued by "reactionary and militarist groups" in the U.S.A., Britain, and France had led to "war hysteria, an ever-increasing arms drive, the establishment of U.S. military bases in countries thousands of miles from the U.S.A., the artificial kindling of international distrust, the wars in Korea and Indo-China, and the organization of such military blocs as NATO, the Western European Union, SEATO, and the Baghdad Pact." He added: "The 'anti-Communist' slogan is again being used as a smoke-screen to cover up the claims of one Power to world domination. The new thing here is that the U.S.A. wants, by means of blocs and pacts, to secure the dominating position in the capitalist world for itself, and to reduce all its partners in the blocs to the status of obedient executors of its will."

On the other hand, M. Khrushchov continued, "the forces of peace" had been "considerably augmented by the emergence in the world of a group of peace-loving European and Asian States which have proclaimed non-participation in blocs as a principle of their foreign policies" As a result, "a vast zone of peace has emerged in the world, including peace-loving States, both Socialist and non-Socialist, of Europe and Asia. This zone embraces vast areas inhabited by nearly 1,500,000,000 people—that is, the majority of the population of our planet"

"Under the impact of these incontestable facts," M. Khrushchov continued, "symptoms of a certain sobering-up are appearing among influential Western circles. More and more people in these circles are realizing what a dangerous gamble war against the Socialist countries may prove for the development of capitalism. . . Nor is it a coincidence that prominent leaders of bourgeois countries with increasing frequency frankly admit that 'there will be no victor' in a war in which atomic weapons are used. . . ."

The Colonial System. M. Khrushchov then referred to post-war developments in former colonial and semi-colonial countries, including the Chinese revolution and the attainment of independence by India, Burma, Indonesia, Egypt, Syria, Lebanon, and other countries, as a result of which "more than 1,200,000,000 people, or nearly half the world's population, have been freed from colonial or semi-colonial dependence during the last ten years" After declaring that "the disintegration of the imperialist colonial system now taking place is a post-war development of world historic significance," he continued "Peoples whom for centuries the colonialists have kept off the high road of progress . are now undergoing a great process of regeneration People's China and the independent Indian Republic have joined the ranks of the great Powers. We are the witnesses of a political and economic upsurge of the peoples of South-East Asia and the Arab East. The awakening of the peoples of Africa has begun The national liberation movement has gained in strength in Brazil, Chile, and other Latin American countries. The outcome of the wars in Korea, Indo-China, and Indonesia has demonstrated that the imperialists are unable, even with the help of armed intervention, to crush peoples who fight for freedom and independence. . "

After declaring that "the contradictions and rivalries between the colonial Powers for spheres of influence, sources of raw materials, and markets for the sale of goods are growing," M. Khrushchov said: "The U.S.A. is out to grab the colonial possessions of the European Powers South Vietnam is passing from France to the United States The American monopolists are waging an offensive against the French, Belgian, and Portuguese possessions in Africa. Once Persia's oil riches were fully controlled by the British, but now they have been compelled to share them with the Americans; moreover, the American monopolists are fighting to oust the British entirely. American influence in Pakistan and Iraq is increasing . "

Military aid to the under-developed countries, M. Khrushchov alleged, was also being used as a "new form of colonial enslavement" which on the one hand enabled "the American monopolies to load up their industry with arms orders" at the expense of U.S. taxpayers, and on the other made the receiving States economically and politically dependent on the U.S.A. He added that the Baghdad Pact and SEATO were being used to divide the Arab countries and the countries of South-East Asia respectively, in accordance with "the colonialists' long-standing policy of 'divide and rule'."

Soviet Foreign Policy. M. Khrushchov observed that for the first time since the war a certain relaxation of international tension had taken place, which had made the Geneva Conference possible. "Some people are now trying to bury the Geneva spirit," he added. "The facts show that certain circles in the West have still not given up hope of putting pressure on the Soviet Union and wresting unilateral concessions from it. But it is high time to understand that such calculations are not realistic. The Soviet Union has done much to bring the positions of the great Powers closer together Now it is up to the U.S.A., Britain, and France. This, of course, does not mean that the Soviet Union will refuse to make further efforts to ease international tension and strengthen peace On the contrary . . . the Soviet Union will strive with still greater persistence to establish confidence and co-operation among all countries, and above all the great Powers Equal effort and reciprocal concessions are indispensable in the relations between Powers. The method of negotiation must become the sole method of solving international problems."

M. Khrushchov went on to call for the establishment of a collective security system in Europe, the renunciation of the Paris Agreements, and *rapprochement* and co-operation between Eastern and Western Germany as a basis for settlement of the German question On the question of disarmament, he recalled the Soviet proposals of May 10, 1955, and the reduction in the Soviet armed forces, and complained that "no sooner did the Soviet Union accept the proposals of Britain, France, and the U S.A. on two stages of disarmament and maximum levels for armed forces than the Western Powers began to retract, and not only refused to accept the concrete proposals of the Soviet Union but even disowned their own proposals." The Soviet Union would nevertheless "continue to work to end the arms drive and ban atomic and hydrogen weapons."

"The establishment of firm friendly relations between the two biggest Powers of the world, the Soviet Union and the U.S A," M. Khrushchov went on, "would be of great significance for the strengthening of world peace If the well-known 'five principles of peaceful co-existence' were to underlie the relations between the Soviet Union and the U.S.A , it would be of truly great importance for all mankind. . . . These principles—mutual respect for territorial integrity and sovereignty, non-aggression, non-interference in one another's domestic affairs, equality and mutual advantage, peaceful co-existence and economic co-operation—are now subscribed to by a score of States. We have recently taken new important steps with a view to achieving a fundamental improvement in Soviet-American relations I have in mind the proposal for the conclusion of a treaty of friendship and co-operation between the Soviet Union and the U.S.A contained in Bulganin's letter to President Eisenhower (see 14665 A). We want to be friends with the U.S A. and to co-operate with it for peace and international security, and also in the economic and cultural spheres. We propose this with good intentions, without holding a knife behind our back . .

"As hitherto, we intend to work for the further improvement of our relations with Britain and France. Our countries, as European countries, have many common interests, and above all a common interest in preventing another war. Both World Wars started in Europe Militarist Germany was their breeding-ground . . It is important to recall this, particularly today when a revenge-seeking West German *Wehrmacht* is being created again with all speed, directly endangering the security of all the European peoples. . . .

"The Soviet Union will continue to strive unswervingly for the extension and strengthening of friendship and co-operation with the countries of the East. We note with satisfaction that good, friendly relations have developed between our country and the Indian Republic, and we are confident that these relations have a great future. We acclaim the desire of the peoples of the Arab countries to uphold their national independence We also believe that Persia, Turkey, and Pakistan will realize that normal relations with the Soviet Union are in keeping with their vital interests. It is our immutable principle to develop and strengthen friendly relations with all countries which, like us, desire to preserve peace."

M. Khrushchov went on to refer to the recent development of trade and cultural contacts between the Soviet Union and Britain, France, Sweden, Finland, Norway, and certain other countries, and expressed regret that such contacts between the Soviet Union and the U.S.A. were still "insignificant." "Trade," he added, "should play a big part in extending the basis for businesslike co-operation between countries. In contrast to the 'Let us arm' slogan of the North Atlantic bloc, we put forward the slogan 'Let us trade.' Our new Five-year Plan provides for a substantial extension of trade relations, both with the people's democracies and with all other States."

Peaceful Co-existence. M. Khrushchov then discussed a number of general questions affecting international relations, beginning with that of "peaceful co-existence" and the "export of revolution." "It has been alleged," he said, "that the Soviet Union puts forward the principle of peaceful co-existence merely out of tactical considerations—considerations of expediency But it is common knowledge that we have always, from the very first years of Soviet power, stood with equal firmness for peaceful co-existence. Hence it is not a tactical move, but a fundamental principle of Soviet foreign policy. . . It goes without saying that among Communists there are no supporters of capitalism. But this does not mean that we have interfered, or plan to interfere, in the internal affairs of countries where capitalism exists. .

"When we say that the Socialist system will win in the competition between the two systems, the capitalist and the Socialist, this by no means signifies that its victory will be achieved through armed interference by the Socialist countries in the internal affairs of the capitalist countries. Our certainty of the victory of Communism is based on the fact that the Socialist mode of production possesses decisive advantages over the capitalist mode of production. . . . We have always held, and continue to hold, that the establishment of a new social system in this or that country is the internal affair of the people of the country concerned. . The principle of peaceful co-existence is gaining ever wider international recognition. . . . And this is natural, for in present-day conditions there is no other way out. Indeed, there are only two ways: either peaceful co-existence or the most destructive war in history. There is no third way."

The "Inevitability of War." Discussing whether a third world war was inevitable, M. Khrushchov said "There is, of course, a Marxist-Leninist precept that wars are inevitable as long as imperialism exists. This precept was evolved at a time when imperialism was an all-embracing world system, and the social and political forces which did not want war were weak, poorly organized, and thus unable to compel the imperialists to renounce war. . . At the present time, however, the situation has radically changed. Now there is a world camp of Socialism which has become a mighty force. In this camp the peace forces find not only the moral but also the material means to prevent aggression. Moreover, there is a large group of other countries, with a population running into hundreds of millions, which are actively working to avert war The labour movement in the capitalist countries has today become a tremendous force. The movement of peace supporters has sprung up and developed into a powerful factor.

'In these circumstances the Leninist precept certainly remains in force that, so long as imperialism exists, the economic basis giving rise to wars will continue to exist. That is why we must display the greatest vigilance. As long as capitalism survives in the world, the reactionary forces representing the interests of the capitalist monopolies will continue their drive towards military gambles and aggression, and may try to unleash war. But war is not fatalistically inevitable. Today there are mighty social and political forces possessing formidable means to prevent the imperialists from unleashing war, and, if they actually do try to start it, to deliver a smashing rebuff to the aggressors and frustrate their adventurist plans"

Forms of Transition to Socialism. After declaring that the transition to Socialism might take a number of forms, M Khrushchov quoted a saying of Lenin that "All nations will arrive at Socialism, but not all will do so in exactly the same way." This saying, he observed, had been confirmed by the experience of history. "Alongside the Soviet form of reconstructing society on Socialist lines, we now have the form of people's democracy. . . Much that is unique in Socialist construction is being contributed by the People's Republic of China.

In the Federal People's Republic of Yugoslavia, where State power belongs to the working people and society is founded on public ownership of the means of production, specific concrete forms of economic management and organization of the State apparatus are arising in the process of Socialist construction. It is probable that more forms of transition to Socialism will appear. Moreover, the implementation of these forms need not be associated with civil war The greater or lesser degree of intensity which the struggle may assume, the use or the non-use of violence in the transition to Socialism, depends on the resistance of the exploiters—on whether the exploiting class itself resorts to violence, rather than on the proletariat."

"In this connexion," M. Khrushchov went on, "the question arises whether it is possible to make the transition to Socialism by parliamentary means No such course was open to the Russian Bolsheviks, who were the first to effect this transition . . Since then, however, the historical situation has undergone radical changes which make possible a new approach to the question. . . The present situation offers the working class in a number of capitalist countries a real opportunity to unite the overwhelming majority of the people under its leadership and to secure the transfer of the basic means of production into the hands of the people. . . . The winning of a stable parliamentary majority backed by a mass revolutionary movement of the proletariat and all the working people could create for the working class of a number of capitalist and former colonial countries the conditions needed to secure fundamental social changes. In the countries where capitalism is still strong and has a huge military and police apparatus at its disposal, the reactionary forces will, of course, inevitably offer serious resistance There the transition to Socialism will be attended by a sharp revolutionary struggle."

Principles of Foreign Policy. M Khrushchov concluded the first section of his report by laying down the following principles of Soviet foreign policy

(1) To pursue the policy of peaceful co-existence between States, irrespective of their social systems, and to work for the establishment of confidence between States, with a view to transforming the relaxation of tension already achieved into a lasting peace

(2) To strengthen the fraternal relations between the Soviet Union and China, Poland, Czechoslovakia, Bulgaria, Hungary, Rumania, Albania, Eastern Germany, North Korea, North Vietnam, and Mongolia, and "to strengthen in every way friendship and co-operation with the fraternal peoples of Yugoslavia."

(3) To consolidate Soviet friendship and co-operation with India, Burma, Indonesia, Afghanistan, Egypt, Syria, and "other countries which stand for peace", to support "countries which refuse to be involved in military blocs"; and to develop and strengthen friendly relations with Finland, Austria and other neutral countries

(4) To work for an improvement in relations with the U.S.A., Great Britain, France, Western Germany, Japan, Italy, Turkey, Persia, Pakistan, and other countries with a view to strengthening mutual confidence, extending trade, and expanding contacts and co-operation in the spheres of culture and science

(5) To "expose the activities of the enemies of peace and strengthen the country's defence."

The Internal Situation.

Industry and Transport. After summarizing the achievements of the fifth Five-year Plan (see 14717 A), M. Khrushchov dealt with a number of technical problems relating to industry. He sharply criticized the Ministry of Railways, which had carried out only 58 per cent of its electrification programme under the Five-year Plan, and announced that a long-term plan had been approved for the electrification of 25,000 miles of railways over the next 15 years.

M. Khrushchov pointed out that 75 per cent of the U.S.S R.'s coal reserves, 80 per cent of its water power, 80 per cent of its timber, its principal reserves of non-ferrous and rare metals, and great resources of chemical raw materials, iron ore, and building materials, were found in the eastern regions, and that the production of coal and electricity was cheaper there than in the European parts of the

Soviet Union "Within the next ten years," he stated, "we must make Siberia a leading producer of coal and electricity, the principal centre of industries consuming a great deal of fuel and power, especially industries producing aluminium, magnesium, and titanium as well as of the electro-metallurgical, coke by-products, and electro-chemical industries. . . . In 1955 the Urals and Western Siberia produced over 14,000,000 tons of pig-iron. . Nevertheless, every year we have to send several million tons of ferrous metals to the east from the European part of the U S.S R Hence we must take resolute steps to speed up the development of the iron and steel industry in Siberia, Kazakhstan, and the Far East The task now is to create in Siberia, within the next two or three Five-year Plans, the country's third great metallurgical centre, with an annual output of 15-20 million tons of pig iron . . . The engineering industry, too, has been insufficiently developed in the eastern regions. In the next ten years we must establish there new large engineering centres capable of producing all kinds of machines"

Agriculture. M Khrushchov said that the central committee of the Soviet Communist Party had brought to light serious shortcomings in agriculture, and had therefore drawn up an extensive programme for expanding the output of grain and livestock products To provide greater incentives for the collective farmers, procurement prices had been raised considerably, thousands of engineers, technicians, and party and Government officials had gone from industrial centres to work on machine and tractor stations and collective and State farms, and a new planning system had been introduced which had given scope to the initiative of the collective farmers. As a result of these measures grain production had been 22 per cent higher in 1955 than in 1954, and certain industrial crops had shown increases of 54 to 95 per cent, whereas during the period 1950 to 1954 the production of grain and industrial crops had hardly risen at all

M. Khrushchov strongly criticized the agricultural Ministries for their failure to increase the area under grain, which, he said, was almost the same in 1953 as in 1913. In view of this situation, the central committee had in January 1955 adopted plans for greatly increasing grain production and more than doubling the output of the main livestock products 350,000 people had volunteered to take part in the scheme for developing uncultivated land (see 13604 A), and in consequence 75,000,000 acres, which were expected to yield an annual average of 32,000,000 tons of grain, had been ploughed up within two years With a large quantity of marketable wheat from these lands, the Government proposed to expand the area under maize in the Ukraine and the North Caucasus, where it was planned to increase the production of meat, milk, and industrial crops

To increase livestock production, greater material incentives had been offered to collective farmers, and an extensive plan for the mechanization of livestock raising and the construction of buildings for livestock had been put into effect. As a result, the number of cattle had risen by 20 per cent during 1950-55, the number of pigs by 114 per cent, the number of sheep by 51 per cent, meat production by 30 per cent, milk production by 19 per cent, wool production by 42 per cent, and egg production by 54 per cent

Living Standards. During the fifth Five-year Plan (M Khrushchov stated) the national income had increased by 68 per cent, real wages by 39 per cent, and the real income of collective farmers by 50 per cent. Despite these achievements, however, the supply of consumer goods was still inadequate and there was a housing shortage. Production of meat, milk, butter, fruit, and vegetables, and also of certain high-grade manufactured goods still lagged behind the growing demand

M. Khrushchov called for the manufacture of more and cheaper labour-saving appliances, such as washing and sewing machines, an expansion and improvement of public restaurant services, and the introduction of a school meals service, which would be provided free or at reduced prices for the children of lower-paid parents All these changes, he observed, would "free millions of women from many household chores and enable them to take part in socially useful work and pay more attention to bringing up their children."

Wages. It was proposed to grant a general increase in the wages of lower-paid workers, and to take steps to establish "a correct ratio between the wage level of different categories of workers, depending on their qualifications and responsibilities" "There is a great deal of disorder and confusion in the system of wages and rate-fixing," M Khrushchov declared "Payment for the same type of work sometimes differs between various bodies, and even within a single body Alongside the low-paid workers there exists a category—a small one, it is true—in whose wages unjustified excesses are tolerated. . . We must work persistently to improve and perfect the wage system in all branches of the economy, to make wages directly dependent on the quality and quantity of the work done by each worker, and to utilize fully the powerful lever of material incentive in order to raise labour productivity. Part of the salaries of engineers, technicians, and managerial personnel should depend strictly on the basic work indices of the particular shop, establishment, industry, collective farm, machine and tractor station, or State farm. This will be in line with the Socialist principle of payment according to the work performed."

Working Hours. During 1957-60 a seven-hour day would be introduced for all factory, office, and other workers, and a six-hour day for underground miners and young people between 16 and 18 Where conditions made it preferable, a five-day working week, with an eight-hour day and two free days, would be introduced. The reduction of working hours would not be accompanied by any reduction in wages

Housing. The volume of urban housing construction under the sixth Five-year Plan would be nearly double that under the fifth, and the rate of construction would rise from year to year. In the big cities the housing problem was intensified by the influx of workers from other parts of the country—e g. 300,000 people had come to work in Moscow during the fifth Five-year Plan To meet this problem, the Government proposed to meet the labour needs of Moscow, Leningrad, Kiev, Kharkov, and other cities by employing only members of their present populations, and also to transfer some industrial establishments to small "satellite" towns a short distance away from the major cities. Greater assistance would be given to people building their own homes, and the manufacture and sale to the public of building materials and sets of parts for standard houses would be expanded.

Education. Universal seven-year education, M. Khrushchov recalled, had been introduced in the towns and the countryside, and 10-year education in the major cities Universal secondary education would be introduced under the new Five-year Plan, and the existing tuition fees charged in the upper forms of secondary schools, technical schools, and universities would be abolished. "A big shortcoming of our school system," he went on, "is that instruction is divorced from life to some extent, those who finish school are insufficiently prepared for practical work. . . . The schools must not only introduce new subjects which teach the pupils the fundamentals of technology and production, but also accustom them to working in factories, collective and State farms, experimental plots, and school workshops"

During the fifth Five-year Plan more than 1,120,000 specialists, or 72 per cent more than during the fourth Five-year Plan, had graduated from colleges and universities In addition, over 260,000 specialists had graduated from evening and correspondence colleges, an increase of 170 per cent over the previous five-year period The training in higher educational establishments, however, was too much divorced from practical experience in production, and it was necessary that students should acquire this experience in factories and in collective and State farms while pursuing their studies

The Union Republics. Turning to the question of relations between the various nationalities of the U S.S R, M Khrushchov cited statistics to illustrate the economic and cultural progress made by the formerly backward nationalities of the Soviet Union Compared with 1913, gross output in Kazakhstan had increased by 33 times, in Georgia by 27 times, in Kirghizia by 37 times, in Armenia by 41 times, and in Tajikistan by 24 times. The number of specialists with a higher education, as compared with the pre-war period, had increased by 380 per cent in Kazakhstan, 480 per cent in Kirghizia, and 340 per cent in Tajikistan and Moldavia. The rapid progress of these Republics, however, had given rise to certain problems

In the past, practically all enterprises in certain Republics had been managed through Union Ministries, but this system required revision in view of the development of industry and the rise in educational standards in these Republics Already the steel and coal-mining industries of the Ukraine, the oil industry in Azerbaijan, and the non-ferrous metals industry in Kazakhstan had been transferred to Republican Ministries, and the result had been "a noticeable increase in the initiative shown by the republican organizations" Further steps must be taken in the same direction

The fact that the incomes of collective farms in certain Republics were far higher than in others had given rise to criticism. Although it was necessary to encourage production of certain crops, such encouragement must be applied with the knowledge and approval of all the Republics, and M. Khrushchov therefore proposed the establishment of an Economic Commission of the Soviet of Nationalities of the Supreme Soviet. This body, composed of representatives of all the Republics and of prominent economists, would study the expenditure of labour in the production of particular crops, and on that basis make recommendations for procurement prices of agricultural produce. Its recommendations would then be discussed in the various Republics, and, if approved, would be submitted to the appropriate legislative and executive bodies

Whilst stressing the necessity for centralized planning, M. Khrushchov said that the Republics should "decide for themselves, within the limits laid down by the Union's national economic plans, the concrete problems of developing particular branches of their economy" Careful consideration must be given to the distinctive features of the various Republics, and to the differences between them in the guidance of their economic and cultural development.

Bureaucracy. M Khrushchov reported that during the last two years the number of persons employed in public administration had been reduced by 750,000. Too many people employed in the Ministries and other bodies, however, continued to "sit in their offices, killing time in paper work and bureaucratic correspondence," and it was necessary to conduct "a most ruthless struggle" against the "intolerable evil of red tape"

The Security Police. Referring to the activities of Beria and his associates, M Khrushchov said that they had attempted to "remove the State security agencies from the control of the party and the Soviet Government and put them above the party and the Government," and had "fabricated false charges against honest Soviet citizens" The central committee had investigated the "Leningrad case" (see 13978 D) and "a number of other questionable cases," with the result that the innocent people who were convicted had been rehabilitated.

"The central committee has drawn important conclusions from all this," M Khrushchov continued. "Proper control by the party and the Government has been established over the work of the State security agencies. A considerable amount of work has been done to

strengthen the State security agencies, the courts, and procurator's offices by putting in tried and tested people. The supervisory powers of the Procurator's Office have been completely re-established and strengthened. Our party, State, and trade union organizations must vigilantly ensure that Soviet laws are observed, expose everyone who violates Socialist law and order and the rights of Soviet citizens, and sternly call a halt to the slightest manifestation of lawlessness and arbitrariness. . ."

The Communist Party. - Denunciation of "Cult of the Individual." - Emphasis on Collective Leadership.

In that section of his report dealing with the Soviet Communist Party, M. Khrushchov laid emphasis on collective leadership and denounced "the cult of the individual." "The core of the party," he declared, "is not a group of men bound by personal relations or mutual advantage. It is a working collective of leaders whose relations are based on ideas and principles permitting neither of mutual forgiveness nor of personal antagonism Whenever it has been found that a party leader has made mistakes in his work, the central committee has unanimously taken the necessary steps to correct these mistakes. The work of party organizations and individuals . . . is subjected to criticism, without fear or favour, at plenary meetings of the central committee. . . "

"It is of paramount importance," M. Khrushchov declared, "to re-establish and strengthen in every way the Leninist principle of collective leadership . . . The central committee . . vigorously condemns the cult of the individual as alien to the spirit of Marxism-Leninism. To make a hero and miracle-worker of a particular leader belittles the role of the party and tends to reduce its creative effort. . ."

M. Khrushchov said that the central committee had "found it necessary to correct some people who introduced confusion in certain clear issues," referring in this connexion to the "erroneous formulation" that the Soviet Union had so far laid only the foundations of Socialism (see 14522 D). Some "hotheads," on the other hand, had begun to "compile a detailed time-table for the transition to Communism," with the result that "a negligent attitude to the Socialist principle of material incentives began to take root." Others had erroneously argued that priority for heavy industry had been essential only at the early stage of Soviet economic development, and that "the only job now was to force the pace of the development of light industry. . . ."

M. Khrushchov stated that the party's membership numbered 7,215,505, of whom 6,795,896 were full members and 419,609 candidate members. This was nearly three times the membership at the time of the 18th congress in 1939, and 333,000 more than at the time of the 19th congress in 1952. The Young Communist League had over 18,000,000 members.

Discussion on M. Khrushchov's report, in which 51 delegates took part, continued until Feb. 20. An outstanding feature of the speeches was the emphasis laid on collective leadership, as opposed to "the cult of the individual," by a number of members of the Central Committee, and notably by M. Mikoyan (First Deputy Premier), who outspokenly criticized certain features of Stalin's policies. A practical example of the application of this principle was given on Feb. 16, when M. Khrushchov requested delegates not to applaud party leaders whenever they entered the conference hall.

M. Mikoyan described the congress as the most important since the death of Lenin, and added: "The principle of collective leadership is fundamental for a party of the Leninist type, yet for nearly 20 years we had in fact no collective leadership. The cult of the individual, which had already been condemned by Marx and by Lenin, had flourished, and this could not fail to exert an extremely negative influence on the situation inside the party and its activities" The restoration of "Leninist methods of leadership" during the past three years [i e. since the death of Stalin] had enabled the central committee to reveal "the mistakes and shortcomings which had accumulated during past years," notably in foreign policy. As a result of these mistakes, M. Mikoyan said, "we too were to blame for increasing tension," the Yugoslav question being a case in point

M. Mikoyan went on to criticize as incorrect Stalin's statement in his *Economic Problems of Socialism* that the volume of production in the Western countries would contract, adding that some other statements in this work also needed "critical re-examination." After calling for a new history of the party to replace Stalin's *Short History*, M Mikoyan declared: "Scientific work in the sphere of the history of our party and Soviet society is perhaps the most backward sector of our ideological work. Books on the history of party organizations, such as those in the Caucasus and Baku, in which the facts were juggled, in which some people were arbitrarily glorified and others not mentioned at all, in which secondary events were raised to undeserved heights and more important events were minimized, in which the directing role of the central committee of the Party was belittled, until recently enjoyed currency with us, and even served as indisputable standard works [This passage apparently referred to Beria's history of the Bolshevik organization in the Caucasus, written in 1939.] Some complex and contradictory events of the civil war of 1918-20 are explained by certain historians not by changes in the relations of class forces at different periods, but by the alleged treacherous activities of individual party leaders of that time, who were unjustly declared enemies of the people many years after the events described." As an example of Communists who had thus been slandered, M. Mikoyan mentioned Stanislav Kassier (formerly Communist Party secretary in the Ukraine) and Vladimir Antonov-Ovseyenko (the leader of the military committee which carried out the Bolshevik revolution in Leningrad), both of whom were believed to have been executed in 1938.

Marshal Zhukov (Defence Minister) said that it was absurd to believe that in any future war nuclear weapons could be confined to front-line tactical use. He gave a warning that in the event of an atomic attack by the U S A, hydrogen and atomic bombs would be dropped on American territory. The Soviet armed forces, he stated had at their disposal "atomic and thermo-nuclear weapons and powerful rocket and jet equipment of various types, including long-distance rockets" Referring to the reduction of the Soviet armed forces by 640,000 men, he said that no further reductions were planned, as the Western Powers had not followed suit.

M. Molotov (Foreign Minister) declared that "we are not infrequently still prisoners of the habits and conventions formed in the past, before the second World War," and "not infrequently suffer from lack of appreciation of the new possibilities which have opened before us in the post-war period" This, he declared, was true of the work of the Foreign Ministry, which had failed to appreciate the importance of the "colonial liberation movements" and the "world peace movement." He expressed his desire for an improvement in U S.-Soviet relations, and observed that "the forthcoming visit of the leaders of our country to Britain offers a new opportunity to bring about a better mutual understanding and to make joint efforts in the direction of further easing international tension."

Commenting that the French Government had expressed a wish to improve Franco-Soviet relations, and had shown a particular interest in the problem of disarmament, he stated that "we shall make efforts jointly with France to bring about a definite advance in the solution of this problem," and remarked that "the strengthening in the position of the democratic forces in the last [French] elections will further this" After condemning "the cult of the individual," he observed that "never before has the central committee of the party and its Presidium been so actively concerned in foreign policy as in the recent past," referring in this connexion to Marshal Bulganin's and M Khrushchov's visits to Yugoslavia and India.

President Voroshilov announced that a revised Penal Code would soon be submitted to the Supreme Soviet; stated that the powers of the Procurator's Office to ensure the rights of citizens and strict observance of the law by Government departments had been reinforced; and called for a wide campaign of education and enlightenment to make citizens aware of their legal rights Bills dealing with the proposed increases in wages and pensions, the seven-hour day, the revision of the labour code, and procedure for the recall of deputies, would also be submitted to the Supreme Soviet.

Marshal Bulganin presented a report on the sixth Five-year Plan in which he recapitulated its major objectives in the spheres of industrial and agricultural development, etc. (see 14717 A).

The congress unanimously approved the draft of the new Five-year Plan on Feb. 24, and adopted a resolution approving M. Khrushchov's report. In particular it endorsed his appeal for stable and friendly relations with the Western Powers; reaffirmed his theses that war was not inevitable, and that each country would arrive at Socialism in its own way, which would not necessarily involve civil war; expressed support for collective leadership; and condemned "the cult of the individual."

The congress was addressed by a number of foreign Communist leaders, including Marshal Chu Teh (the Chinese Vice-President), M. Rakosi (First Secretary of the Hungarian Workers' Party), M. Chervenkov (the Bulgarian Prime Minister), M. Gheorgiu-Dej (First Secretary of the Rumanian Workers' Party), M. Maurice Thorez (general secretary of the French Communist Party), Signor Togliatti (general secretary of the Italian Communist Party), Mr. Harry Pollitt (general secretary of the British Communist Party), and Señora Ibaruri ("La Pasionaria," the Spanish Communist leader). The Yugoslav League of Communists was represented by an observer, whilst President Tito sent a message in which he referred to the "gradual and continual improvement" in relations between the two countries.

On Feb. 26 the congress adopted a resolution instructing the Central Committee to draft a new party programme, and elected a new Central Committee of 133 full and 122 "candidate" (i.e. non-voting) members. The Central Committee elected its Presidium and Secretariat on the following day. Details of the membership of these bodies are given below.

The Presidium. The 11 full members of the former Presidium were all re-elected, viz., M. Khrushchov, Marshal Bulganin, President Voroshilov, M Kaganovich, M Molotov, M. Mikoyan, M. Malenkov, M. Pervukhin, M. Saburov, M. Suslov, and M. Kirichenko. MM Kaganovich, Pervukhin, and Saburov all hold the rank of First Deputy Premiers in the Council of Ministers, whilst M. Kirichenko is First Secretary of the Ukrainian Communist Party.

The following were elected candidate members of the Presidium: M. Shvernik (chairman of the Council of Trade Unions), M Shepilov (editor of *Pravda*), Marshal Zhukov (Minister of Defence), Mme Ekaterina Furtseva (First Secretary of the Moscow Communist Party), M. Brezhnev (First Secretary of the Kazakhstan Communist Party), and M. Mukhlitdinov (First Secretary of the Uzbekistan

Communist Party). Of these, only M Shvernik (who was also elected chairman of the Control Committee, the body responsible for party discipline) had previously been a candidate member of the Presidium Mme. Furtseva (46), the wife of the Soviet Ambassador to Yugoslavia, is the mother of two children, a chemical engineer by profession, and a deputy to the Supreme Soviet, the youngest member of the Presidium, and its first woman member, she was elected to the Central Committee for the first time.

Former candidate members not re-elected were M. Ponomarenko (Soviet Ambassador to Poland), M. Melnikov (Minister for Construction in the Coalmining Industry), and M. Bagirov (the former Chief Minister of Azerbaijan, and First Secretary of the Azerbaijan Communist Party).

The Central Committee. Of the 255 members of the Central Committee, 102 were elected for the first time, whilst 83 of those elected at the 1952 congress were not re-elected New members included M. Duderov (Minister of Internal Affairs), M Kucherenko (a Deputy Premier), M. Matskevich (Minister of Agriculture), M. Zademidko (Minister for the Coal Industry) Marshal Moskalenko (Commander of the Moscow military district), and M. Bobrovnikov (mayor of Moscow). M Gromyko (First Deputy Foreign Minister), formerly a candidate member, became a full member, but M Melnikov and M Fadeyev (the novelist, and secretary of the Soviet Writers' Union), who were formerly full members, reverted to the status of candidate members.

Former members not re-elected included M Kruglov (the former Minister of Internal Affairs, who had been a member of the central committee since 1934), M. Gorshenin (Minister of Justice), M Chesnokov (formerly editor of the party organ *Communist*), Professor Zhdanov (son of the late M. Andrei Zhdanov), M Zasyadko (formerly Minister for the Coal Industry), M. Simonov (the well-known writer), and M. Ilyichev (head of the Press department of the Foreign Ministry).

A notable feature of the new committee was the reduced representation of the armed forces and the police and security forces. Full members included Marshals Koniev, Vassilevsky, and Sokolovsky, whilst the candidate members included Marshals Timoshenko, Chuikov, and Bagramyan, Admiral Gorshkov, and Air Chief Marshal Zhigarev, C -in-C. of the Soviet Air Force Marshals Vershinin and Meretskov, Generals Malinin and Bogdanov, and Admirals Kuznetsov, Basisty, and Yumashev were not re-elected The police and security forces had only three representatives on the new committee, compared with ten on the former committee.

The Secretariat. M. Khrushchov, M Suslov, M. Shepilov, M. Belyaev, M. Pospelov, and M Aristov were re-elected to the Secretariat, whilst M Brezhnev and Mme. Furtseva were elected to this body for the first time.

As M. Khrushchov had suggested in his report, the Central Committee appointed on Feb. 28 a special bureau to co-ordinate the activities of the party organizations in the Russian Soviet Republic, and to ensure "the more efficient handling of economic and cultural questions" in the R.S.F.S.R. The bureau included M. Khrushchov, who was elected chairman, M. Yasnov (Chief Minister of the Russian Soviet Republic), and MM. Kapitonov, Kozlov, Ignatov, and Kirilenko (First Secretaries of the Moscow, Leningrad, Gorky, and Sverdlovsk party organizations respectively).

Unlike the 15 non-Russian republics, the Communist Party of the Russian Soviet Republic (which comprises three-quarters of the territory and over half the population of the Soviet Union) had hitherto never had a separate organization, but had been administered directly by the Central Committee.

A. AUSTRALIA. — Trade Policy. - Increased Free Market Beef Exports.

The Australian Minister for Primary Industry (Mr. McMahon) announced on March 11 that Britain had agreed that Australia might freely export an additional 5,000 tons of beef to any destination in the current financial year, thus raising the maximum quantity available for free shipment to other countries under the 15-year meat agreement from 10,000 tons to 15,000 tons. Mr. McMahon said that beef prices in the U.K. were at an unsatisfactory level and that Australian exporters would now have more opportunity to explore possibilities of selling to better advantage elsewhere.

(Prev. rep. 13256 C; 11779 A.)

B. HUNGARY. — Release of Professor Baranyai.

It was announced in Budapest on Feb. 26 that Professor Jusztin Baranyai, one of the six defendants tried with Cardinal Mindszenty in 1949, had been pardoned by a decree of the Hungarian Presidential Council. It was also announced that eight other Church dignitaries (unnamed) had been released from prison. Professor Baranyai had been sentenced to 15 years' imprisonment on charges of conspiring against the State.
(Times - Le Monde, Paris) **(Prev. rep. 14315 D; 9880 A.)**

C. UNITED KINGDOM. — Labour Party. - New Allocation of Responsibilities among "Shadow Cabinet." - Elections to National Executive Committee.

A new allocation of "specialist" responsibilities among the members of the Opposition front bench (the Labour "shadow Cabinet") was announced on Feb. 14, involving the following changes from those announced in July 1955 (see 14323 A):

Agriculture, Fisheries, and Food: Mr. T Williams, Mr. F. T Willey, Mr. A J. Champion. *Colonial Office*: Mr A. Bevan, Mr A. Creech Jones *Commonwealth Relations*: Mr A. Creech Jones *Air Ministry* Mr G de Freitas. *War Office*: Mr. J. Strachey *Ministry of Supply*. Mr. G Brown. *Education* Mr. M Stewart, Miss Margaret Herbison. *Fuel and Power and Atomic Energy* Mr. L. J. Callaghan, Mr. H Neal *Home Office* Mr K Younger, Mr. A Greenwood. *Labour and National Service* Mr. G. Brown, Mr. F Lee *Scottish Office*. Mr T. Fraser, Mr A Woodburn. *Transport and Civil Aviation*: Mr. G R. Strauss, Mr E Davies. *Treasury* and *Board of Trade*. Mr H Wilson, Mr D Jay, Mr A. Bottomley, Mr P. Gordon-Walker. *Works*: Mr A. Greenwood.

Specialist responsibilities not mentioned above remained unchanged—e g. Mr Robens and Mr Younger remained the Labour Party's "specialists" on foreign affairs

The reallocation of responsibility for special subjects among the Opposition front bench was made necessary by the election of Mr. Gaitskell as leader of the Labour Party and of Mr. Griffiths as deputy leader. The most important changes were the selection of Mr. Harold Wilson (assisted by Mr. Douglas Jay, Mr. Bottomley, and Mr. Gordon-Walker) as the Labour Party's principal spokesman on Treasury matters, *vice* Mr. Gaitskell, and of Mr. Aneurin Bevan (assisted by Mr. Creech Jones) as the party's principal spokesman on Colonial affairs, *vice* Mr. James Griffiths.

Two vacancies on the National Executive Committee of the Labour Party were filled on Feb. 22 by the election of Mr. Sydney Silverman, M.P., and Mr. R. W. Casasola, president of the Amalgamated Union of Foundry Workers.

Mr. Silverman was elected to the constituency party section of the N.E C. in place of Mr. Griffiths, who became *ex-officio* member of the Executive as deputy leader of the Labour Party Mr Casasola was elected to the trade union section of the N E.C in place of Mr. Frank Cousins, who was elected to the General Council of the T U.C. on the same day. [The T.U.C.'s rules forbid any person from being a member of the N.E.C. and the General Council at the same time, and Mr. Cousins therefore had to resign from the former body.] Both Mr. Silverman and Mr. Casasola were runners-up in the constituency party and trade union sections when the N.E.C. was elected at the last party conference.

The vacancy on the General Council of the T.U.C. was caused by the death of Mr. A. E. Tiffin (59), who had succeeded the late Mr. Arthur Deakin in May last as general secretary of the Transport and General Workers' Union (see 14336 C). Mr. Cousins had succeeded Mr. Tiffin as acting general secretary of the T.G.W.U.—(Daily Herald) **(14680 A; 14323 A.)**

D. SCIENTIFIC RESEARCH. — Atomic Physics. - Discovery of Anti-Proton.

The University of California and the U.S. Atomic Energy Commission announced on Oct. 19, 1955, that a new atomic particle, the "negative proton" or "anti-proton," had been produced and detected in the nucleus or core of the atom with the aid of the new 1,000,000,000 electron-volt accelerator at the University of California. The A.E.C. announcement said that the discovery was a "major development" which "may inaugurate a new era of nuclear physics," whilst Dr. Ernest O. Lawrence (director of the radiation laboratory at the University of California, and Nobel Prizewinner for his invention of the cyclotron) described the creation of the "negative proton" as "a major fundamental achievement in physics" which might be "a milestone on the road to a whole new realm of discoveries in high-energy physics." Although the existence of the "anti-proton" had been predicted by theorists over 20 years ago, it had never hitherto been detected. (New York Times)

E. INDIA. — Press. - Harijan Weeklies to close down.

The three *Harijan* weeklies founded by the late Mahatma Gandhi—*Harijan* (English), *Harijan Bandhu* (Gujerati) and *Harijan Sevak* (Hindi)—closed down as from March 1. It had been decided to discontinue their publication because of the heavy losses incurred—stated to total over Rs. 150,000 (over £10,000) since 1950, and Rs. 30,000 in 1955 alone—and the decline in the papers' circulation. (The Statesman, Calcutta)

F. WESTERN GERMANY. — Bank Rate increased.

The *Bank Deutscher Länder* announced on March 7 an increase in the West German bank rate from 3½ to 4½ per cent. The increase—the second in eight months—was designed to counteract the increasing volume of bank credits in connexion with the prevailing trade boom and wage increases.
(Frankfurter Allgemeine Zeitung) **(Prev. rep. 14368 A.)**

A. UNITED KINGDOM. — Security in the Public Services. - Findings of Conference of Privy Councillors. - Acceptance by Government.

A Government statement on the findings of the Conference of Privy Councillors on Security in the Public Services was published as a White Paper (Cmd. 9715) on March 8. The conference had been appointed by the Prime Minister in November last as a result of the public disquiet arising from the Burgess - Maclean case (see 14571 A). The White Paper emphasized that it would not be in the public interest to publish the full text of the Conference's report, or to make known all its recommendations; it therefore confined itself to giving "the substance of the report is so far as it can properly be made public, including a number of specific recommendations." The text is given below.

"... The report starts by an analysis of the general nature of the security risks with which this country is faced today The Conference point out that, whereas once the main risk to be guarded against was espionage by foreign Powers carried out by professional agents, today the chief risks are presented by Communists and by other persons who for one reason or another are subject to Communist influence. The Communist faith overrides a man's normal loyalties to his country and induces the belief that it is justifiable to hand over secret information to the Communist Party or to the Communist foreign Power. This risk from Communists is not, however, confined to party members, either open or underground, but extends to sympathizers with Communism.

"At one time the Fascist ideology also presented considerable security risks. Although today the chief risk is that presented by Communism, the security arrangements instituted in 1948 were directed, and will continue to be directed, against Communism and Fascism alike. In this paper, for convenience of brevity, the term "Communism" is used to cover Communism and Fascism alike.

"One of the chief problems of security today is thus to identify the members of the British Communist Party, to be informed of its activities, and to identify that wider body of those who are both sympathetic to Communism, or susceptible to Communist pressure and present a danger to security. Thereafter steps must be taken to see that secret information is not handled by anyone who, for ideological or other motives, may betray it H.M. Government agree with this broad analysis and will continue to base their policy on preventing persons of this nature from having access to secret information.

"Against the background of this general analysis ... the Conference address themselves to an examination of the Government's security arrangements. Their main conclusion is that there is nothing organically wrong or unsound about those arrangements. They make, however, certain recommendations, the purpose of which is to strengthen the system in some respects. H.M. Government propose to give effect to all the recommendations which the Conference have made. The report of the Conference deals with the public services generally But it is implicit in the report that the Conference recognize that in certain areas of the public service—notably in the Foreign Service, the Defence field, and the Atomic Energy Organization—the need for stringent security precautions is greater than elsewhere. H.M. Government accept this view.

"Some of the recommendations of the Conference deal with what may be called the relation between security risks and defects of character and conduct. The conference recognize that today great importance must be paid to character defects as factors tending to make a man unreliable or expose him to blackmail or influence by foreign agents There is a duty on Departments to inform themselves of serious failings such as drunkenness, addiction to drugs, homosexuality, or any loose living that may seriously affect a man's reliability. There is a natural reluctance to make adverse reports on colleagues, and nothing could be worse than to encourage tale-bearing or malicious gossip. Nevertheless, it is important to impress not only on Heads of Departments but on supervisory officers generally that it is their duty to know their staff and that they must not fail to report anything which affects security. This covers both evidence which suggests Communist associations or sympathies, and also serious defects or failings which might jeopardize the security of the section of the public service in their charge. The Government accept this recommendation, although they recognize that the measures necessary to give effect to it will require very careful consideration.

"While confining themselves to the security aspect of these defects of character and conduct, the Conference also record the view that in individual cases, or in certain sections of the public service, a serious character defect may appropriately be the determining factor in a decision to dismiss a particular individual or to transfer him to other work The Conference also recommend that it should be recognized that the fact that a public servant is a Communist not only bars his employment on secret duties, but may also in some Departments have an unfavourable effect on his prospects of promotion.

"The Conference also make a series of recommendations which turn on the risk presented by those in regard to whom there is no evidence that they are themselves members of the Communist Party, but evidence exists of Communist sympathies or of close association with members of the Communist Party. The Conference is of the opinion that, in deciding these difficult and often borderline cases, it is right to continue the practice of tilting the balance in favour of offering greater protection to the security of the State rather than in the direction of safeguarding the rights of the individual. They recommend that an individual who is living with a wife or husband who is a Communist or a Communist sympathizer may, for that reason alone, have to be moved from secret work, and that the same principle should be applied in other cases of a like nature.

"The Conference recognize that some of the measures which the State is driven to take to protect its security are in some respects alien to our traditional practices Thus, in order not to imperil sources of information, decisions have sometimes to be taken without revealing full details of the supporting evidence Again, it is sometimes necessary to refuse to employ a man on secret duties, or in those cases where no alternative work can be found for him in the public service, to refuse to employ him at all, because after the fullest investigation doubts about his reliability remain, even although nothing may have been proved against him on standards which would be accepted in a Court of Law. The Conference agree regretfully that these counter-measures, although they are distasteful in some respects, are essential if the security of the State is to be ensured. But they recognize that it is also important to convince public opinion that the measures taken and the procedures in force will not be exercised unreasonably For this reason the Conference approve the Tribunal (commonly known as the Three Advisers) set up in 1948 to hear appeals from civil servants threatened on security grounds with transfer from secret duties or, when that is not practicable, with dismissal from the Service. This machinery should continue, and the person whose continued employment in Government service is called in question on account of Communist association or sympathies will be able to have his case considered by it. The Conference also recommended that the terms of reference of the Three Advisers should be widened so as to enable them to present a fuller report to the responsible Minister. ..

"Two other matters should be mentioned. The first is that the Conference considered whether additional statutory powers should be sought to enable the Government to detain suspects or prevent them from leaving the country. The Conference point out that, while an individual can be arrested on suspicion that he is about to attempt to convey secret information to a foreign Power, he must be brought before the courts on a charge without delay. The time required to collect evidence upon which a charge can be based is often long, and the Conference dismiss any suggestion that power should be sought to detain persons for an unlimited period without preferring charges against them, on the grounds that this would run counter to this country's traditional principles of individual freedom, and would be most unlikely to be approved by Parliament in time of peace They also come to the conclusion that legislation which would permit arrest and detention, without a charge being preferred, for a short specified period, say 14 days, would not be much help The Conference also consider that the withdrawal of a passport could not be relied upon to prevent a U.K. citizen in connivance with a foreign Power from leaving the country For these reasons the Conference recommend that no additional powers should be sought to detain suspects or prevent them leaving the country

"The second matter is that the Conference reviewed the existing procedures for the security of secret Government contracts involving persons outside Government employment The Conference have considered whether persons subject to these procedures should be given the same right as is enjoyed by persons in the public service of having their case considered by the Three Advisers. The Conference recognize that this is a difficult matter, but are in favour, if suitable arrangements can be made, of access being given to the same tribunal in certain types of cases They recommend, however, that in the first instance this matter should be discussed with the National Joint Advisory Council. Arrangements for such discussion to take place are being made."

Sir Anthony Eden informed the House of Commons on March 8 that the Government had decided to give effect to all the proposals made by the Conference of Privy Councillors. (Cmd. 9715 - Times) **(Prev. rep. 14699 A; 14571 A.)**

B. AUSTRALIA. — State Elections in New South Wales and South Australia.

Elections for new State legislatures were held in New South Wales and South Australia on March 3. In New South Wales Mr. Cahill's Labour Government was returned to office with a reduced majority, the state of the parties in the new Assembly being as follows (position at the dissolution in parentheses): Labour, 50 (56); Independent Labour, 1 (2); Liberals, 27 (22); Country Party, 15 (14); Independent, 1 (0).

In South Australia the Liberal and Country Party coalition government led by Mr. Playford was returned to office with 21 seats, Labour winning 15 and three being won by Independents. There was only one change in party representation, Labour winning a seat from an Independent. Mr. Playford had completed 17 years as Premier of South Australia on Nov. 5, 1955—a record for any Australian State Premier. (Australian News and Information Bureau) **(13160 A.)**

C. COLOMBIA. — Outlawing of Communism.

A decree outlawing all forms of Communism was issued on March 4 by the Colombian Government. It provided that any individual found guilty of Communist activities would be liable to five years imprisonment, together with deprivation of civil rights for ten years.—(New York Times) **(14524 C.)**

A. RHODESIA AND NYASALAND FEDERATION.— The Kariba Scheme. - £30,000,000 Contribution by Copper-mining Companies. - Increased Cost of Scheme. - Economic Developments in the Federation. - Mineral Production in 1955. - Loans for African Development.

The Federal Minister of Finance (Mr. Macintyre) announced in the Federal Assembly on Feb. 22 that £38,000,000 of the amount needed for the Kariba scheme had been promised within the Federation. Of this amount, the copper-mining companies would contribute £30,000,000, the British South Africa Company £4,000,000, and Barclays Bank (Dominion, Colonial, and Overseas) and the Standard Bank of South Africa £2,000,000 each. Mr. Macintyre added that if overseas finance was available to the extent anticipated, the mining companies' contributions would mean that a "substantial margin" would be available for other projects, including railway development.

The Minister explained that the mining companies had offered to contribute £20,000,000 to a special Government loan at 4½ per cent, and in addition were prepared to accept a surcharge on Kariba power consumed by them over the period 1961-67, which would yield a further £10,000,000 He stressed that this offer—which he described as "probably without parallel in the history of any country's development"—was particularly significant at a time when the British Bank Rate had been raised to 5½ per cent" Mr. Macintyre added: "It not only ensures that a reasonable part of the cost of Kariba will be met from local resources, but it goes far beyond this if overseas resources for this scheme are mobilized in the way that I expect. The mines' contributions will not only help to finance Kariba but will also leave a substantial margin available for other projects, among which the requirements of the Rhodesian railways have an important place. . . In addition to this assistance from the copper mining industry, I am glad to say that for Kariba the British South Africa Company has agreed to lend £4,000,000, Barclay's Bank £2,000,000, and the Standard Bank of South Africa £2,000,000"

It was explained in a White Paper published on the same day that four copper-mining companies were concerned in the offer, two of them being associated with the Anglo-American Corporation group and two with the Rhodesian Selection Trust. The former two (Nchanga Consolidated Copper Mines Ltd. and the Rhokana Corporation) had agreed to take up loan stock to the value of £6,750,000 and £4,250,000 respectively, whilst the latter two (the Mufulira Copper Mines Ltd. and Roan Antelope Copper Mines Ltd.) had offered to subscribe for £5,000,000 and £4,000,000 worth respectively. The total amount to be subscribed by each company will be spread over five years, beginning in July 1956.

Statements on the copper-mining companies' offer were also made on Feb. 22 by Sir Ernest Oppenheimer, chairman of the Anglo-American Corporation, and by Mr. R. L. Prain, chairman of the Rhodesian Selection Trust.

Sir Ernest Oppenheimer said that the copper-mining industry "had for some years been handicapped by power scarcities," and recognized that it was in its interests to help the Government in securing the capital for a scheme which would "provide all the industry's requirements and additional supplies for other developments in the Federation." Mr. Prain stressed that the decision to invest in the Kariba scheme was "a natural consequence of the acceptance by the copper-mining companies of the fact that the future of copper-mining in Rhodesia is inextricably bound up with the future prosperity of the Central African Federal State, and that, as the largest industrial enterprise in this area, we are called upon to accept a special responsibility"

Sir Malcolm Barrow (Federal Minister of Power) announced in the Federal Assembly on Feb. 27 that the estimated cost of the first stage of the Kariba scheme had risen from about £54,500,000 to £79,414,000, and that of the full scheme from about £85,000,000 to £113,234,000. He explained that the Government proposed to make various amendments to the scheme as conceived in 1954 by the French consultants, which would have the effect of increasing the power output by 1,150,000,000 kw. hours to 7,650,000,000 kwh. Accordingly, the estimated cost per unit of power, delivered at the main sub-stations, would show a progressive decline from 0.869d. per unit in 1961 to 0.283d. per unit in 1972

The Federal Hydro-Electric Board announced at the end of February that it had awarded a £3,500,000 contract to the British firm of Richard Costain Ltd. for the provision of housing accommodation at Kariba for about 1,100 Europeans and 5,000 Africans, together with schools, roads, a temporary power station, and a hospital. In August last the Board had awarded a contract for a 690-ft. footbridge over the Zambesi at Kariba to the British firm of Dorman, Long and Co.

Plans to move about 30,000 Africans from the northern side of the Kariba basin and about 20,000 from the southern side were announced by the Governments of Northern and Southern Rhodesia respectively in November and December, 1955. The Southern Rhodesian Native Affairs Department stated on Dec. 3 that the Africans would be re-settled in the Sebungwe and Wankie districts (involving the building of about 400 miles of road to open up these areas), and that a Native Commissioner had been appointed to co-ordinate the work. On Feb 20, 1956, it was stated that about 5,000 Africans were expected to have been removed from the northern side of the Zambesi by the end of 1956, and that the work of moving Africans from the southern side was expected to begin in August.

The setting up of a committee to consider possible uses for the 150-mile lake which would be formed by the construction of the Kariba dam was announced by Sir Malcolm Barrow on Feb. 27.

Construction began in July last of a power transmission line from Le Marinel power station, now being built on the Lualaba River (Belgian Congo), to the copperbelt area. The transmission line—the longest and highest-voltage line in Africa—will supply the copperbelt during the critical period before the Kariba scheme comes into operation, its construction being the result of an agreement between the Rhodesia Congo Border Power Corporation (a wholly-owned subsidiary of the Rhodesian Selection Trust and the Anglo-American Corporation groups) on the one hand, and the Belgian Government and the *Union Minière du Haut Katanga* on the other. The Rhodesia Congo Border Corporation will build the section from the copperbelt to the border, whilst the section from Le Marinel to the border will be constructed by the *Union Minière du Haut Katanga*. The transmission line is expected to be completed by March, 1956, and the copper mines are expected to receive their first supplies from Le Marinel by the end of the year.

Other recent industrial developments in the Federation are summarized below:

Iron and Steel Industry. Discussions took place in London in August 1955 between the Southern Rhodesian Ministers of Roads and Irrigation (Mr. G. Ellman-Brown) and of the Treasury (Mr. C. J. Hatty), on the one hand, and British financial and industrial interests on the other, on the development of the Rhodesian Iron and Steel Commission's Que Que works (see 9100 A) so as to increase their production from the present 50,000 tons of pig-iron annually to about 200,000 tons. Mr Ellman-Brown and Mr. Hatty subsequently announced that the proposed expansion would require a capital investment of about £6,000,000, and that the transfer of the Commission's undertaking to private enterprise was under consideration. If the expansion plans went ahead, it was hoped that eventually it would be possible to export about 100,000 tons of pig-iron annually to the United Kingdom.

On July 27, 1954, Mr. Ellman-Brown had announced the appointment of Mr. S. M Pechey, chairman of the local board of Barclays Bank, as chairman of the Rhodesian Iron and Steel Commission. The Minister's announcement was made in the course of a statement in the Southern Rhodesian Parliament on the report of a Committee of Inquiry into the working of the Iron and Steel Commission. The Committee of Inquiry had found that the Commission's "present unsatisfactory position" was due to the failure of the board of directors to initiate managerial controls, especially over capital expenditure, and to the management's inability "to give direction and effectiveness to decisions." It recommended (1) the replacement of the Board by a new one, with a chairman of "outstanding personality and business capacity", (2) a complete overhaul of the Commission's administration, and of operational and commercial arrangements, with a view to securing maximum efficiency and economy at all levels; (3) the writing-off of £1,148 000 from the Commission's capital account and the waiving by the Government of loan interest for three years; (4) the completion of current development as soon as possible, and an increase in production up to the maximum economically possible with existing plant.

Mr. Ellman-Brown stated that the Government had accepted all the Inquiry Commission's recommendations and would ask Parliament to authorize the financial recommendations in due course He also stated the Mr Garfield Todd (the Prime Minister) had undertaken negotiations with the Commonwealth Development Corporation during a recent visit to Britain, and that it was probable that this body would be prepared to provide the Iron and Steel Commission with £1,000,000 of additional capital for current development.

Coalmining Industry. The Wankie Colliery Company announced on Nov. 19, 1955, plans to increase its output from the existing level of about 4,500,000 tons annually to 5,000,000 tons annually by the end of 1956. It was stated that the capital invested in the Wankie mines had increased from under £2,000,000 in 1948 to over £9,000,000.

Fertilizer Industry. It was announced on Nov. 29, 1955, that African Explosives and Chemical Industries (Rhodesia) Ltd. would shortly extend their Rodia factory, near Salisbury, at a cost of over £3,000,000, in order to bring its output of fertilizers up to 150,000 tons annually, and thus make the Federation independent of imported fertilizers.

Mineral Production. The total value of all minerals produced in the Federation in 1955 was about £141,000,000 (£120,500,000 in Northern Rhodesia and £20,500,000 in Southern Rhodesia) Of the total for Northern Rhodesia, copper accounted for £113,000,000 and zinc for £2,500,000. Of the Southern Rhodesian total, base minerals made up £13,906,816, gold £6,582,146, and silver £24,693, the largest individual item being asbestos (£7,051,831).

Although the value of minerals produced in Northern Rhodesia in 1955 was £23,000,000 greater than in 1954, less copper was produced, mainly owing to a strike of African workers in the copperbelt,

and to shortages of fuel In Southern Rhodesia the value of mineral production as a whole constituted an all-time record, but the value of gold produced declined by £104,860, as compared with 1954.

Atomic Energy. It was announced in December last that the U.K. Atomic Energy Authority had opened an office in Salisbury to advise the Federal Government on materials for the production of atomic energy, and to give assistance to prospectors and mining companies.

It was announced on March 15 that the Governments of Northern Rhodesia and of Nyasaland had accepted offers by the Rhodesian Selection Trust group of loans totalling £3,000,000 (£2,000,000 for Northern Rhodesia and £1,000,000 for Nyasaland) for rural African development.

Explaining the companies' reasons for making this offer, Mr Prain said that they considered that they had a duty to help redress the state of unbalance which their activities had helped to create in the Federation. On the one hand the copperbelt was attracting Africans from all over the Federation with its present prosperity and modern amenities; on the other, the rural areas were being weakened by the drain on manpower. Redressing the situation must involve large expenditure on capital works, which were unlikely to produce any return except on a long-term basis.

The loans, of which the Roan Antelope and Mufulira companies will provide £1,500,000 each, will be interest-free until June 30, 1960, when the Government will have the option of repayment in cash or the issue of 4½ per cent negotiable bonds redeemable at their option at any time up to 20 years of issue.—(Federal Information Department, Salisbury - Times - Financial Times) **(Prev. rep. Kariba Scheme, 14151 C; Rhodesia-Congo Power Line, 13149 A; Wankie Colliery, 10434 A; Que Que Steel Works, 9100 A; Mineral Production, 13463 B.)**

A. FRANCE - UNITED KINGDOM. — M. Pineau's Criticisms of Western Policy. - Eden-Mollet Discussions at Chequers. - Anglo-French Disarmament Plan.

In a speech on March 2 to the Anglo-American Press Association in Paris, the French Foreign Minister (M. Pineau) said that he was in "profound disagreement" with the policy pursued by the Western Powers during the past few years, particularly in the Middle East and Far East. His speech, which attracted wide attention in Britain and America as well as in France, is summarized below.

"I must state first of all," said M. Pineau, "that there is really no common Anglo-French-American policy in the world today. That has been shown in what, for us, is the most important area—North Africa We are undergoing there an ordeal in which the Anglo-Saxon world cannot be disinterested. I do not hide the fact that we have made mistakes. But the present problem is no longer that of colonialism. In Algeria . . . we have the feeling that behind certain forms of insurrection and propaganda there is a desire on the part of certain Powers to inherit what France may have to abandon" With regard to the situation in the Middle East, M Pineau said that if France had been consulted about the Baghdad Pact, Britain might have avoided some of the consequences which had now arisen. Similarly, if the U.S.A. had co-operated fully with France in Vietnam, the situation in Indo-China would have been different.

After expressing his "profound disagreement with the policy followed by the Western Powers during the past few years," M. Pineau continued: "We have made a tremendous mistake in thinking that problems of international security were the only problems with which we had to deal. Of course we need security, of course we need armies, but must we harp all the time about military strength? Between two forms of propaganda—one which thinks only in military terms and of security at any price, and one which offers a chance of peace, however remote—public opinion will side with those who offer peaceful solutions, even if they are not sincere, and not with those who talk only of military solutions. . . ." Criticizing recent SEATO naval exercises in the Gulf of Siam, M. Pineau added: "Do you think, in this atomic age, that people will be impressed by the manoeuvres of a few ships? The tour of India by Bulganin and Khrushchov was more important, since it promised economic aid which corresponds more with the needs of the [Asian] people."

"Two attitudes are possible towards the 'Iron Curtain' countries," M. Pineau continued. "Either we make total war against them—a policy which, I am happy to say, has been abandoned—or we strive for co-existence. If the Western countries indefinitely accept the position in which Communist propaganda can spread unchecked, without any chance of Western propaganda penetrating to the Communist countries, then the Western world will sooner or later be submerged by that propaganda On the other hand, if the Iron Curtain were raised, the Communist countries would not be insensible to the propaganda of freedom. In that case an immense prospect would be opened up to us. I shall systematically direct French policy towards cultural exchanges between East and West. I want to convince our Anglo-American friends of the need to revise our foreign policy. The policy of war has been ruled out. It is now a question of pursuing a policy of peace so as to ensure the triumph of our common ideal of justice, equality, and freedom."

It was announced on March 5 that the French Prime Minister, M. Guy Mollet, had accepted an invitation from Sir Anthony Eden to visit Britain for "an exchange of views on the international situation." Both in Britain and in France the invitation was linked with M. Pineau's criticisms of Western policy, the Diplomatic Correspondent of *The Times* commenting that "the immediate cause of the invitation, which was issued at short notice, was the speech of M. Pineau to the Anglo-American Press Association."

M. Mollet accordingly visited Chequers (the country residence of the British Prime Minister) on March 11-12 as the guest of Sir Anthony Eden, with whom he had private discussions on the international situation. No other Ministers took part in the conversations. The following communiqué was issued by the British Foreign Office at the end of M. Mollet's visit:

"In the course of cordial and intimate talks the two heads of Government exchanged views on the main international problems which at present preoccupy the British and French Governments. In particular, they reviewed questions concerning relations between the free world and the Soviet bloc, disarmament, Africa, and the Middle East.

"This survey enabled the two heads of Government to affirm their wide agreement and to strengthen their joint policy. They reaffirmed their attachment to the Atlantic alliance and their intention to maintain and reinforce the common front of the free nations They emphasized their common desire to make progress with general and controlled disarmament and the importance they attach to the forthcoming meeting of the U N. Sub-committee on disarmament.

"They recognized that both their countries have world-wide responsibilities which they are seeking to carry out in the interests of the peoples concerned. In that spirit they welcomed the course of the negotiations regarding Morocco and Tunisia. M Mollet conveyed to Sir Anthony Eden his gratitude for the recent statement in which H.M. Ambassador in Paris expressed H.M. Government's support and encouragement in regard to developments in Algeria [see footnote].

"As regards the Middle East, M. Mollet and Sir Anthony Eden took into account the talks now being held in Washington regarding action under the Tripartite Declaration. They reaffirmed their desire to see an end of the Arab-Israel conflict, the establishment of a stable peace, and the welfare and progress of all countries in the area. They emphasized the necessity of giving increased importance to economic action in the Far East, the Middle East, and Africa, notably within the framework of the regional organizations to which either of their countries belongs. They agreed on the need for close and continuing consultation with a view to furthering their joint policies."

On returning to Paris on March 12, M. Mollet said that he and Sir Anthony were in fullest agreement on all matters discussed, and had put the question of disarmament "at the head of their preoccupations."

M. Mollet disclosed that he and Sir Anthony had studied a disarmament plan which M. Moch (the French representative) would present at the next meeting of the U N Sub-committee on disarmament, and which took into account both the Western and the Soviet proposals so far presented Certain British suggestions for improving the French plan had been examined, and had been referred jointly to M. Moch and Mr. Nutting (British Minister of State for Foreign Affairs). "In a few days' time," M. Mollet added, "there will be a Franco-British disarmament plan, and everything leads us to hope that it will have the complete support of the United States. . . ."

The French Prime Minister emphasized that the reference in the official communiqué to "close and continuing consultation" was not meant to be limited to France and Britain alone, but also meant consultation with the U S.A. and other interested nations whenever necessary. He added that he had expressed to Sir Anthony the French Government's "reserves" about the Baghdad Pact, which remained unchanged.

It had been announced on March 2—a few hours before M. Pineau's speech—that M. Mollet and M. Pineau would pay an official visit to Moscow in May, at the invitation of the Soviet Government. The invitation had originally been extended to M. Faure and M. Pinay (the former French Premier and Foreign Minister), but the visit had not been paid at the time because of the Soviet Government's action in supporting the Arab-Asian resolution for a debate on Algeria in the U.N. General Assembly (see page 14464).

(Le Monde, Paris - Times - Daily Telegraph)

Note. The remarks by Sir Gladwyn Jebb (H.M. Ambassador in Paris) referred to in the joint statement were made at a press luncheon in Paris on March 6 Speaking of Communist tactics "to exploit internal conflicts in the capitalist world," Sir Gladwyn declared: "The best means of checking these insidious manoeuvres is to adjust oneself to the current of history (*de s'adapter au courant de l'histoire*) It is for this reason that we in Britain welcome the solutions applied by France to the problems of Tunisia and Morocco—solutions which are admirable and worthy of a great modern nation. We likewise welcome the determined efforts which France is making to bring about a liberal and generous settlement in Algeria, which will take account of her interests as a great Power. France is entitled to expect from her ally across the Channel support and encouragement in these efforts, and she will receive them. ."—(Le Monde, Paris)

A. UNITED KINGDOM. — House of Commons Debate on Middle Eastern Situation after Dismissal of Glubb Pasha. - Opposition Criticism of Government's Middle East Policy. - Defeat of Opposition Motion.

A full-scale debate on the Middle Eastern situation, with particular reference to the situation created by the dismissal of Glubb Pasha from the command of the Arab Legion in Jordan, took place in the House of Commons on March 7. The debate, which was characterized by heated exchanges between the Government and Opposition, was opened by Mr. Nutting (Minister of State, Foreign Office) in the absence of the Foreign Secretary, Mr. Selwyn Lloyd, who was visiting the Middle Eastern countries at the time.

Mr. Nutting said that British officers had " a long, proud and happy association " with the Arab Legion since it was founded in 1920, and General Glubb had given 26 years of devoted service to the Arab cause Under his command the Legion had expanded from a small body of about 1,500 men into a well-equipped and well-trained force of about 21,000—one of the most efficient and effective fighting forces in the Middle East. After recalling that substantial sums of British money were voted annually to support the Legion, Mr. Nutting continued ·

" The British Government have provided more than £50,000,000 [to Jordan] during the last nine years In addition, we are pledged under the Anglo-Jordanian Treaty to go to Jordan's aid if she is attacked, and we have maintained air and ground forces in Jordan to provide for her defence. We have, therefore, fulfilled the spirit and the letter of our obligations The summary dismissal by the Jordan Government of General Glubb and the other British officers, without consultation with the British Government, can hardly be said to fulfil the spirit of Jordan's obligations to us. The provisions of the treaty cannot be fulfilled unless there is full and continuous consultation between Jordan and the United Kingdom upon all matters essential to the defence of Jordan.

" A state of uncertainty exists for the remaining British officers as a result of the treatment received by those dismissed I am sure the House will feel that the Government acted correctly in asking that all those still in executive commands should be relieved. Meanwhile, it is no secret that one of the essential elements in our co-operation with Jordan has been the maintenance of the Arab Legion as an effective defence force. The effect on the Legion's efficiency of these sudden changes in its command may well be serious. That is one of the most important factors the Government must weigh in considering their future policy and relationship with Jordan It has always been our purpose to train as many Arab officers as possible to take positions of responsibility, but there are still few who have the necessary experience to take over the higher commands.

" The Government do not underestimate the gravity of the situation which has arisen We are consulting with our allies, and the House will not expect me to announce drastic new decisions before the consultations have been completed. There are many grave issues thrown up by these changes in Jordan—issues which reflect a wider situation than that of Jordan, and which must be judged against the wider background of the whole Middle East. No-one can deny that we are passing through a difficult and troublesome phase in our relations with Arab national feeling. The cause of this lies partly in history and has been aggravated by the bitterness of Arab hostility towards Israel. We shall not find a quick remedy for these ills, more especially as there are third parties pouring poison into the wound and doing their best to increase hostility against all we stand for.

" Our policy is based on the Baghdad Pact and the Tripartite Declaration We stand firm and four-square by the Baghdad Pact and have no intention of abandoning our friends who have joined in it with us. Our interests and theirs—political, strategic, and economic—make it imperative that we should stand together as we do, and as we shall continue to do, in defence of the Middle East against aggression from without. At the same time we intend to use the economic institutions of the pact to promote trade, technical assistance, and development. . . ."

After refuting as " complete and arrant nonsense " a recent statement by Mr. Robens (the Labour Party's specialist in foreign affairs) that the Baghdad Pact had provoked Soviet intervention in the Middle East, Mr Nutting declared : " The Soviet move [i.e. the supply of arms to Egypt] was a calculated and carefully planned action to stir up trouble in the Middle East and undermine Western influence. To those who say that the Baghdad Pact constitutes a major threat to peace in the Middle East, I say that the opposite is the truth. It is proving an effective instrument for the peace of the Middle East. . . ."

Turning to the dispute between the Arab States and Israel, Mr. Nutting continued : " I must frankly admit that while our efforts continue to try to bring about an Arab-Israel settlement, there is no progress to record. We have fulfilled, and will continue to fulfil, our obligations under the Tripartite Declaration. We are consulting with the U.N. Secretary-General on whether the machinery for truce supervision can be improved and, if necessary, expanded. We have repeatedly said we will support General Burns in any extension of the Truce Supervisory Organization he considers necessary. The Foreign Secretary, speaking on Feb. 24, threw out the idea of some additional measures to increase the preventive effect of the existing U.N. machinery. These ideas are being examined by the Secretary-General in consultation with General Burns.

" We are sometimes told that the Tripartite Declaration is not enough, and that we must give a treaty guarantee to Israel within her present borders That proposition has come many times from the Opposition, but I wonder whether Labour members have fully thought out the implications of such a step. It would be committing this country to the permanent recognition of a frontier which is not agreed, which results from an armistice and not from a peace treaty, and which is bitterly opposed by all the Arab States. The Government cannot be expected to give a guarantee which would amount to recognition in perpetuity of the existing armistice line It would, in effect, be the biggest step we could take away from a peace settlement.

" It is one thing to say that we would oppose the alteration of a truce line by force—because that would mean a fresh outbreak of war—but quite another to say that we would recognize in perpetuity, and undertake to maintain, a frontier about which the parties are in violent disagreement. We have said, and I repeat, that we stand ready to guarantee an agreed settlement. The United States have taken exactly the same line. If the Opposition say they are not asking for recognition in perpetuity of the existing armistice lines, but that they want a guarantee of those armistice lines, that is precisely what the Tripartite Declaration lays down—and that is precisely the obligation to which we are committed and which we shall fulfil."

Mr. Herbert Morrison (Lab) intervened to ask : " If the Tripartite Declaration protects these frontiers, including the frontiers of Jordan. why did we need a special treaty with Jordan to supplement that guarantee ? If it be the case that it is right to have a separate treaty and a specific guarantee in the case of Jordan, how can it be wrong to have a separate treaty and a specific guarantee in the case of Israel ?"

Mr. Nutting replied . " You ask me why we concluded the Anglo-Jordan treaty of 1948 and why we did not conclude a treaty with Israel You [the Labour Party] were in power in those days and not us. Mr Morrison has got his history a little wrong : the Anglo-Jordan treaty was made in 1948, the Tripartite Declaration in 1950. Why is it suggested that the Tripartite Declaration is such an ineffective affair? I do not pretend it pleases everyone, but this Declaration and the declared intentions of its signatories to carry it out have prevented a further outbreak of war between Jews and Arabs. That is what the Declaration was intended to do, and in that it has succeeded for the last six years."

Referring, in conclusion, to the question of arms deliveries to the Middle East, Mr Nutting said : " I can assure the House that, despite all the difficulties which have confronted the Tripartite Powers in keeping a check on deliveries, a balance of strength has been maintained up to date. We have never sought to deny that the Communist arms deal with Egypt may, in due course, upset this balance, but we do not believe that situation has yet arrived. We and our allies are convinced that the safety and security of Israel does not lie in entering upon an arms race in the Middle East. This might well end up with Israel being surrounded by hostile neighbours armed to the teeth. The safety and security of Israel must be found in establishing normal relations with her neighbours. That is one of several reasons why we consider a settlement so imperative, and we shall continue to concentrate on that. We and our American allies are taking every step open to us to strengthen the uneasy peace which exists between Israel and her Arab neighbours. . . . We stand by our obligations We offer genuine help, friendship, and co-operation to all nations in that area. Wherever and whenever necessary, we shall strengthen our interests and build up those who are our true friends Whatever the setbacks, whatever the disruptive forces which are ranged against us, we shall continue that policy of building on strength, confident that this will bring eventual stability and peace to the whole of the Middle East "

Mr. Hugh Gaitskell (Leader of the Opposition) said that whatever the Opposition's criticisms of the Government for its handling of the Middle East situation, it in no way wished to belittle the achievements of General Glubb He (Mr. Gaitskell) had met General Glubb three years ago and had been impressed by his moderation, wisdom, and calmness. " One of the features of this situation," Mr. Gaitskell continued, " is the degree of unanimity in the British press about the significance and probable consequences of Glubb Pasha's dismissal It is agreed that this increases the danger of war between the Arab States and Israel. Glubb Pasha and his fellow-officers have exercised a restraining influence upon the Arab Legion and the policy of Jordan. The Foreign Minister of Israel told me that three years ago. For the past 18 months the Arab Legion has been actively engaged in trying to prevent infiltration [into Israel] from the Jordan side of the frontier, and has attempted to exercise control over the Jordan National Guard. . . . There is real danger that we shall find ourselves, if the subsidy continues, subsidizing and maintaining a force which may go into action against Israel, and in a situation in which we may have to go to the defence and assistance of Israel. That is a highly contradictory situation. . . ."

Mr. Gaitskell declared that the dismissal of General Glubb and the other British officers had " struck a severe blow at our prestige in the whole Middle East, and to the prestige of the whole Western alliance " Moreover, " the consequence of General Glubb's dismissal will make it extremely probable that Jordan will now go into the anti-Baghdad camp." Since the Government had repeatedly declared that they based their policy on the hope of an Arab-Israel settlement and on the Baghdad Pact, it was undeniable that these events must be regarded as constituting a major setback to the Government's policy. Accordingly, it was clear that there must be a reassessment of British policy in the Middle East.

In the Opposition's view (Mr Gaitskell continued) the Baghdad Pact itself had contributed materially to the present situation Whilst no objection could be taken to the pact itself, since it was a voluntary defensive arrangement between Turkey, Iraq, Persia, Pakistan, and the U K., the Government's mistake had been to attempt to convert it into an instrument of Middle Eastern policy. By doing so they had provoked violent opposition from the Arab States; and, secondly, violent opposition in Jordan itself when an attempt had been made to force her into the pact. Declaring that the House had never heard the full story of General Templer's mission to Jordan, Mr Gaitskell asked whether it was true that the Chief of the Imperial General Staff had gone to Amman with instructions to offer a substantial increase in the Arab Legion without any guarantee that it would remain under British control, in return for Jordan's adherence to the Baghdad Pact? Furthermore, the Opposition took the view that the Prime Minister's Guildhall speech, with its implication of substantial concessions by Israel and "appeasement" of the Arabs, had been "a grave error" and had given "an impression of utter confusion."

After declaring that the Opposition could not accept the Government's reliance on the "arms race" argument, Mr. Gaitskell continued: "To say 'we will deprive one side of the opportunity of purchasing arms' when the other side is free to get as much as it likes, and defending it by saying 'we do not want to participate in an arms race,' reminds me of nothing else than the non-intervention agreement in Spain. The real reason why they [the Government] have refused to allow Israel to purchase so far even quantities of arms necessary for her defence is fear of Arab resentment. That kind of weakness makes no impression upon the Arab peoples. Either we stand by the tripartite agreement, and in that case we are bound to allow Israel enough arms for self-defence, or we do not If we intend to stand by it, we must make our position abundantly plain to the Arab States and give up this policy of trying to appease them by our policy towards Israel. The tripartite agreement must be upheld If you intend to carry out the tripartite agreement, you must allow Israel arms to balance those received from Czechoslovakia by Egypt. The Foreign Secretary has said that this would upset the balance, but to say it has not yet upset the balance makes one wonder how many more MIG fighters have to be delivered to Egypt Have we to wait another year or two while Egypt builds up an overwhelming force before we try to maintain the balance? . "

After emphasizing that the solution of the Middle Eastern problem was essentially a U.N affair, which involved the Soviet Union as a member of the Security Council, Mr. Gaitskell continued: "In deciding policy in the Middle East, we should first of all settle what are our real interests there, and what are our commitments Three things must be accepted as commitments or interests of an over-riding character Firstly, our commitments under the Tripartite Declaration to guarantee the temporary armistice frontiers. That carries with it the essential condition that we maintain the balance of arms between the two sides An alliance with Israel? We do not see that there is anything inconsistent with that and the Tripartite Declaration. That is something the Government should at least give serious consideration to in the light of recent developments

"Secondly, the supply of oil We get nearly 50 per cent of our oil from Kuwait, some from Persia, and some from Iraq. We make a mistake if we jump to the conclusion that the Arab States with oil reserves are going to be desperately anxious to sell them to anyone else. I do not believe, short of a big political change in that part of the world, that the danger that we should be cut off from oil is nearly so great The third objective is that we cannot accept that these territories, with oil reserves which are very important to us, should come under Russian control This is a vital interest of ours I do not believe that the Arab Governments are in the least anxious to allow the Communists to come in and control their territories For these reasons we certainly cannot just clear out and wash our hands of the whole area. We could not trust the Russians to keep out if we disappeared. . .

"What should our immediate policy be? Should we, for instance, reinforce our troops in Jordan? I take the view that we should only do that if it is necessary to protect British lives I would strongly urge the Government not to attempt by military force to impose a policy on Jordan If the Jordan Government wish to break their alliance with us, if they wish to link up with Egypt and the neutralist bloc, they should be allowed to do so. We must have . . . immediate talks with Jordan about the position under the treaty. It would be unwise to repudiate the treaty. It has not, of course, been broken technically by the dismissal of General Glubb, but it would be impossible to continue with the subsidy under the new situation. It may be that the money—and it is quite a substantial sum—could be made available for economic development and the settlement of Arab refugees as part of a general settlement. The third essential is surely to settle the ridiculous and absurd dispute between the British and American oil companies It is ridiculous because we all know they are interlocked, so the way they are playing against each other in that part of the world is absurd. I would like to see a wider plan emerge from any discussions between the companies under which both the Arab Governments concerned and the oil companies would subscribe to a large fund for the economic development of the whole area.

"The ban on arms for Israel must be lifted This does not mean any spectacular sale of arms. Israel should be allowed to buy the necessary weapons on terms with which they can match, if need be, the new arms Egypt is now obtaining. It means *Centurion* tanks —which they have never been given, although Egypt has had them from us—and modern fighters. There is a lot to be said for Britain and America making a declaration of Middle Eastern policy on the lines I have tried to indicate—saying what we care about and that, apart from that, we have no wish to stifle or restrain Arab nationalist sentiments, and, indeed, are only too anxious to help in the economic development of the area We must do a great deal more about our propaganda in that part of the world. When Mr. Bulganin and Mr Khrushchov come here in April I hope the Government will take the opportunity of talking about the Middle Eastern situation with them.

"Before the Prime Minister went to Washington I warned him that we were genuinely critical of the Middle Eastern policy of the Government, and that we could not support him if that policy continued. We hoped that Washington would produce a change It has not done so There has been nothing—just inaction What has happened in Jordan confirms our view that the policies of the Government were wrong and dangerous and, for this reason, I have not hesitated to criticize the Government today But I recognize that the duty of the Opposition is to be constructive I beg the Prime Minister to take these proposals seriously. Looking at the state of the world and, in particular, the condition of the Western alliance, one cannot feel anything but anxious and gloomy There are signs of division and separation, and a loss of that unity which existed when NATO was first created.

"There is desperate need for a lead which will both rally the democratic forces and restore their unity and, at the same time, give the reassurance we must give to the uncommitted countries that our policies are progressive and peaceful I hope the Government will give that lead or else make way for one that can and will"

Captain Charles Waterhouse (C)—the leader of the "Suez group" of Conservative M P.s who opposed Britain's evacuation of the Suez Canal—said that no-one knew the real position in Jordan. it might well be that King Hussein was no longer a free man and that a military junta had taken over He added: "Egypt has been the trouble-maker in the Middle East for a long time . . She has stirred up hatred where no hatred existed. She should be told—and if the United Nations will not do it, the British Government might well do it—that the Suez Canal is going to be free, and that in future there is to be no more interference with British or any other shipping The time for turning the other cheek to our enemies has passed. In some parts of the world we have to have the courage to disagree with a nation in an action she has taken, to stand by our friends, and to denounce our enemies Britain is still powerful and on occasion our strength must be used I urge the Government to make a statement as clearly as they can condemning the action of Egypt, both in the blocking of the Suez Canal and in her general conduct in the Middle East"

Mr. Shinwell (Lab.) said that the £70,000,000 provided to Jordan in the last ten years had "gone down the drain," and that it might have been far better if a substantial portion of the sum expended in the Arab countries had been devoted to Britain's Colonial territories Despite the vast sums made available to the Arab countries, Britain had got little or nothing in return, whilst no financial assistance of any sort had been provided to Israel "It seems to me," he added, "that we are at the mercy of the pro-Arab elements in the Foreign Office" Mr Shinwell said that both the Arab States and Israel must be told "in the most definite language" that force would be used against them if they resorted to military action. He believed that the Baghdad Pact was not responsible for the present tension in the Middle East, since "there would still have been trouble" even if the pact had not existed Finally, Mr Shinwell urged that the Prime Minister should consider a treaty with Israel, and that Israel should receive adequate arms to counterbalance those being supplied to the Arab countries.

Major Legge-Bourke (C.) believed that it was quite possible that King Hussein was no longer master in his own house After declaring that the position of Jordan and of King Hussein personally "ought to have our compassion rather than our wrath," he said that attention should be turned to those who were really undermining Britain's position in the Middle East—Egypt, Saudi Arabia, Russia, and "certain private individual interests emanating from America." He believed that the quickest solution of the Middle East problem would be for America to join the Baghdad Pact.

Mr. Clement Davies (the Liberal leader) said that Britain had received "a serious slap in the face which has resounded through the world" Now that the restraining influence hitherto exercised by General Glubb and his colleagues had been removed, the position in the Middle East had become far more acute than it was even at the time of the Communist arms supplies Something much more definite than the Tripartite Declaration was needed, and the Prime Minister should make it clear that Israel would be guaranteed against any attack.

Mr. Alfred Robens (Lab.), winding up for the Opposition, described as "nonsense" Mr Nutting's statement that British Middle Eastern policy was based on the Baghdad Pact, since there was only one Arab State in the pact [i e Iraq]. He declared that the Opposition would continue to press the Government for a treaty with Israel, similar to that with Jordan, and that Israel must have arms to balance the quantities received by the Arab nations However many times the Prime Minister said that the Government stood by the Tripartite Declaration, neither the Jews nor the Arabs believed him, and an international police force on the strategic parts of Israel's frontier was essential if peace was to be preserved. Mr Robens alleged that most, if not all, of the money used for "bribery and corruption" in the Middle East came from royalties paid by American oil companies, he added in this connexion that it was

strange that the most anti-Communist country in the world should allow its money to be used to create a vacuum into which Communism could penetrate. and expressed surprise that Sir Anthony Eden had not brought up this point during his Washington discussions with President Eisenhower.

Sir Anthony Eden, replying to the debate, said that the Government had made it plain that it was ready to contribute to an increased, number of U.N. observers on the Israel-Arab frontiers ; the decision, however, rested not with one member but with the United Nations collectively. After quoting a recent speech by Mr Robens in which the latter had " violently denounced " the Baghdad Pact, the Prime Minister commented that his [Mr Robens's] arguments had been refuted by Mr. Gaitskell and by Mr. Shinwell, both of whom had expressed support for the pact

Amidst repeated Opposition cries of "What is your policy ? ", the Prime Minister continued . " My policy is clear enough I am one of the authors of the Baghdad Pact. I am proud to be so, and I stand by every line. Our complaint is that the Opposition have been alternating in their criticism. one day saying it is a bad thing and another day saying it is a good thing "

In reply to a question by Mr Gaitskell, the Prime Minister said that the negotiations with Jordan had not been carried through " under any mystery nor through any form of blackmail," nor had Britain said to Jordan " If you do not join the Baghdad Pact you will not continue to enjoy the privileges you do now " The choice of General Templer had been criticized, but he (the Prime Minister) did not known of a more distinguished officer who could have been sent to Amman to negotiate with the Jordanian leaders, and he made no apology for that choice.

After recalling his statement to the House on March 5 (see 14737 A), and saying that the decision to withdraw the remaining British executive officers from the Arab Legion had been received " with distress " in Jordan, Sir Anthony continued .

" I must tell the House bluntly that I am not in a position to announce tonight, in respect of immediate policy for Jordan, definite lines of policy which are inevitably to be followed, because I am sure that to attempt to do so now. with such information as we have, would be not only premature but probably dangerous to our own interests—more perhaps than those of Jordan. During the debate a number of members have counselled a certain caution. I think it is right that that caution should be pursued But there is a factor which has been several times mentioned, which we simply cannot ignore in weighing up our present difficulties Mr Gaitskell and others referred, in passing, to Arab-Israel antagonism and to its possible effect on the course of events in Jordan. It is certainly true that where there are very large refugee populations the difficulties are infinitely greater, in trying to get any kind of relaxation of tension or toleration of another point of view, than anywhere else in the Middle East I have not the least doubt that although the House may try to weigh up the factors that have brought about this result, one is the number of people in Jordan today—half a million or more—who look back across that frontier, and whose whole thoughts and minds are bent on getting back across that frontier."

After pointing out that the Egyptian radio had kept up ' a stream of abuse " against General Glubb for some time before his dismissal, the Prime Minister said that if Egypt desired friendly relations with the Western Powers she could get them—but not at any price. One way of ensuring that she did not get them was " to pursue a policy of protesting friendship on the one hand and inciting hostility on the other."

As regards the Israel-Jordan question, Sir Anthony reiterated that the Tripartite Declaration provided for action both inside and outside the United Nations in the event of force or if there were a threat to violate existing frontiers. After quoting the joint declaration which he had signed with President Eisenhower (see 14685 A), the Prime Minister added . " If I was in the position of Israel, I would regard that undertaking . . as infinitely more valuable than an agreement to be allowed to buy a certain number of tanks or planes "

In conclusion, Sir Anthony claimed that the Baghdad Pact had created over a wide area of the Middle East a unity, both political and economic, which had never existed there before, and which had brought far-reaching advantages to all the peoples of the area. He reiterated that the British Government intended to uphold both the Baghdad Pact and the Tripartite Declaration of 1950.

Mr. Gaitskell said that the Opposition would divide the House in view of the Prime Minister's " totally unsatisfactory " statement. The Opposition thereupon formally moved the adjournment of the House, the motion to this effect being defeated by 312 votes to 252—a Government majority of 60. (Times - Daily Telegraph - Manchester Guardian)

A. AVIATION. — Central African Airways to participate in London-Johannesburg Service.

It was announced in Salisbury on Feb. 11 that Central African Airways would begin to operate an international tourist-class service with Vickers *Viscounts* between Johannesburg and London in July, when it would join the " Springbok " service in partnership with BOAC and South African Airways. The general manager of C.A.A. (Mr. P. J. B. Wimbush) explained that the company would take over one of the six weekly flights between London and Johannesburg.

(Federal Information Department, Salisbury)

B. FRANCE. — Inauguration of Atomic Power Plant. - Creation of Institute of Nuclear Science.

France's first atomic power plant, at Marcoule (on the Rhône some 20 miles north of Avignon), went into operation on Jan. 7. The plant, known as G-1, is a primary reactor whose basic purpose is the production of plutonium, though some of its heat will be recovered to produce electric current. When the associated work at Marcoule is completed in July and the plant is fully operating, some 5,000 kw. of electricity will be produced ; but as 7,000 - 8,000 kw. are needed to run the air blowers, there will be a net deficit of 2,000 - 3,000 kw. The blowers send air heated by the atomic pile to a nearby electric power plant (now being completed), where the air vaporizes water and produces steam to drive the turbines.

A second and much larger plant at Marcoule is planned to begin operating by the middle of 1957. It will produce 100,000 - 150,000 kw. of heat energy and, through a more efficient system of transformation, a net surplus of 20,000 kw. of electricity ; this will not only make up the deficit of G-1 but will also supply the Marcoule community with its power needs and feed about 15,000 kw. into the general power lines for distribution elsewhere.

It was announced on Jan. 18 that an agreement had been concluded between the French Atomic Energy Commission and the Ministry of Education for the establishment of a National Institute of Nuclear Science and Techniques at the Saclay Centre for Atomic Studies. This new institute will have the tasks of organizing high-quality instruction in nuclear science and techniques, in close liaison with the universities ; of training engineers and technicians ; of bringing about permanent collaboration between the faculties of science, medicine, pharmacy, and the various higher educational establishments ; and of ensuring the necessary collaboration between the universities and industry in view of the development of industrial uses of atomic energy.—(Le Monde, Paris)

(Prev. rep. 14360 A.)

C. WESTERN GERMANY. — Kraft-Oberländer Group joins Christian Democratic Union.

The *Frankfurter Allgemeine Zeitung* reported on Feb. 16 that Herr Waldemar Kraft and Professor Theodor Oberländer, together with the five other former members of the Refugee Party who had been accepted by the Christian Democratic parliamentary party as " guests " after their secession from the Refugee Party's parliamentary group in July last, had now officially joined the Christian Democrats, increasing the latter's representation to 251. The strength of the other parties in the *Bundestag* is : Social Democrats 151, Free Democrats 48, All-German Bloc (Refugee Party) 18, German Party 16, Centre Party one, non-party one. One seat is vacant through the flight of Herr Schmidt-Wittmack (see 13851 A) to the Soviet zone.—(Frankfurter Allgemeine Zeitung)

(Prev. rep. 14664 E ; 14400 A.)

D. UNITED STATES. — Employment and Unemployment Figures. - Statistics for 1955.

The number of employed persons in the United States in December 1955 (over 14 years of age, but excluding the armed forces) was 64,165,000, of whom 5,884,000 were engaged in agriculture. The total compared with 60,688,000 in December 1954, 64,016,000 in June 1955, and a record figure of 65,489,000 in August 1955. There were 2,946,000 in the armed forces in December, compared with 2,996,000 in June, 1955. The number of unemployed was 2,427,000, compared with 2,679,000 in June and 2,838,000 in December 1954, amounting to 3.6 per cent of the total U.S civilian labour force.

(Department of Commerce, Washington) **(Prev. rep. 14376 E.)**

E. KOREA. — Scandinavian Hospital for Seoul. - Joint Financing by Norway, Sweden, and Denmark.

It was announced in Oslo on March 3 that Hr. K. Okkenhaug (a Norwegian Foreign Ministry official) had been appointed secretary-general of a Scandinavian hospital to be established in Seoul. The hospital, to be financed jointly by Denmark, Norway, and Sweden, will train Korean doctors and is expected to be open by 1958.—(Royal Norwegian Embassy, London)

F. BELGIUM. — Cabinet Appointment.

M. Leo Mundeleer was appointed Minister for the Middle Classes on Feb. 13 in succession to M. Oscar Bossaert, who had died on Feb. 1. M. Mundeleer is a Liberal, his appointment leaving the distribution of portfolios in the Van Acker Cabinet unchanged—i.e. nine Socialists and seven Liberals.

(La Nation Belge, Brussels) **(Prev. rep. 14003 C.)**

A. CEYLON. — Controversy over Proposed Recognition of Sinhalese as Sole Official Language. - Resignation of Tamil-speaking Members from Cabinet and United National Party. - Dissolution of Parliament.

The annual conference of the United National Party (the ruling party in Ceylon), meeting at Kelaniya on Feb.16-18, unanimously approved a resolution recommending that Sinhalese should be recognized as the country's only official language. This involved a fundamental change in the policy hitherto pursued by successive Ceylonese Governments, under which Sinhalese and Tamil had equal status as official languages in place of English. In view of this policy change, the Governor-General (Sir Oliver Goonetilleke) dissolved Parliament on Feb. 18 and ordered general elections to be held between April 4 and 11 in order that the Government might obtain a mandate for its new linguistic policy.

For some time the linguistic problem had been a major political issue in Ceylon. An agitation in favour of declaring Sinhalese the only official language had been launched by a number of Sinhalese and Buddhist organizations, and on Oct. 16 a crowd of over 5,000 people attacked a meeting in Colombo Town Hall, arranged by the *Lanka Sama Samaja* (Trotskyist) party, which advocated the retention of equal status for Sinhalese and Tamil. A motion for the formal amendment of the Ceylon (Constitution) Order-in-Council to grant parity of status to Sinhalese and Tamil was introduced in the House of Representatives on Oct. 19 by Dr. N. M. Perera, the leader of the *Lanka Sama Samaja*, but was opposed by the Prime Minister, Sir John Kotelawala.

Sir John Kotelawala recalled that the Government, in pursuance of its policy of equal status for both languages, had announced on Jan. 13, 1955, that from 1957 onwards the medium of instruction in schools up to the senior secondary stage should be Sinhalese for the children of Sinhalese-speaking parents and Tamil for the children of Tamil-speaking parents; a commission had also been appointed to report on the language to be used in higher education As regards the administration, both Sinhalese and Tamil were used in Parliament, local government bodies, and the law courts without any restriction whatever, although the translation of laws from English into the national language presented some difficulty. In the Civil Service a gradual transition from English to the national language was taking place, and classes were being organized and bonuses and increments offered to ensure that civil servants should have a competent knowledge of one national language and a working knowledge of the other. Both languages were therefore enjoying equal official recognition in practice, and any change in the Government's linguistic policy could be decided on only by the United National Party's annual conference. Sir John nevertheless refused to support Dr. Perera's motion, which he described as a mere "election stunt."

The Prime Minister's attitude in rejecting Dr. Perera's motion on the one hand, and in hinting at a possible reversal of the Government's policy on the other, led to an intensification of the campaign for the adoption of Sinhalese as the only official language, which, in turn, led to serious differences of opinion both in the Cabinet and in the United National Party. Mr. Kumaraswamy (Deputy Minister of Justice) resigned on Jan. 12 on the ground that the Sinhalese agitation had undermined the confidence of Tamil-speaking people in the Government, whilst Mr. Natesan (Minister of Posts), Mr. Kumaraswamy, and five other Tamil-speaking M.P.s resigned from the United National Party on Jan. 19, after the committee appointed to draft the agenda for the next party conference had decided to exclude resolutions on minority rights and parity of status for Tamil which had been presented by Mr. Natesan and Mr. Kumaraswamy. On Jan. 20 Mr. Natesan also resigned from the Ceylonese Cabinet and was succeeded by Mr. N. H. Keerthiratne, who had previously been Parliamentary Secretary to the Ministry of Posts.

The seven members who had resigned from the United National Party, together with Tamil-speaking members of the Opposition, announced on Jan. 20 that they had formed a "united front" to defend the Tamil language and culture and to "carry on the struggle for the creation of a Tamil State which will offer to federate with the Sinhalese State on terms of complete equality, if acceptable to both nations, or elect to remain independent."

Mr. C. Suntheralingham, a Tamil M.P., announced on Aug. 17, 1955, that he would voluntarily vacate his seat (Vavuniya) in order to force a by-election, because of the "discriminatory treatment" which, he alleged, had been given by the Government to the Tamils. In the by-election, which was held on Feb. 14, 1956, and fought largely on the language question, Mr. Suntheralingham was returned as an Independent, polling 8,995 votes against 2,003 for the United National Party's candidate.—(Ceylon Government Information Dept., Colombo)

B. UNITED KINGDOM. — Labour and Manpower. - Employment and Unemployment Statistics for 1955. - Distribution of Manpower.

The following table shows the manpower position in Britain at the end of 1955, comparison being given with 1954:

	Dec. 31, 1955	Dec. 31, 1954†
Total Working Population* .		
Men .	16,124,000	16,047,000
Women	7,896,000	7,776,000
	24,020,000	23,823,000
H.M. Forces and Women's Services .	779,000	830,000
Ex-Servicemen and Women on Release Leave	6,000	6,000
Registered Unemployed‡	235,000	266,000
Persons in Civil Employment	23,000,000	22,721,000
of whom . *Men* .	*15 201,000*	*15 058,000*
Women ..	*7,799,000*	*7,663,000*

* The "total working population" represents the total number of persons aged 15 or over working for pay or gain, or registering themselves as available for such work. It includes H.M. Forces and the Women's Services, those on release leave and not yet in employment, registered unemployed, private indoor domestic servants, and gainfully employed persons over pensionable age Part-time workers are counted as full units.

† Revised figures

‡ Excluding persons registered as "temporarily stopped," most of whom were on employers' pay-rolls and were therefore included in the numbers shown as in civil employment.

An analysis by industrial groups of the total number of persons in civil employment is given below:

Industries or Services	Dec 31, 1955	Dec. 31, 1954
Basic Industries		
Mining and Quarrying (including coal-mining .	858,000	864,000
Gas, Electricity, and Water	378,000	376,000
Transport and Communication	1,699,000	1,691,000
Agriculture and Fishing ..	1,012,000	1,031,000
Number in Basic Industries .	3,947,000	3,962,000
Manufacturing Industries		
Chemicals and Allied Trades .	526,000	512 000
Metal Manufacture .	583,000	565,000
Vehicles	1,254,000	1,208,000
Engineering, Metal Goods and Precision Instruments	2,818,000	2,709,000
Textiles	952,000	991,000
Clothing (including footwear)	674,000	684,000
Food, Drink, and Tobacco .	915,000	899 000
Other Manufactures ..	1,615,000	1 591,000
Number in Manufacturing Industries	9,337,000	9,159,000
Building and Contracting.. .. .	1,465,000	1,438 000
Distributive Trades . .	2,869.000	2,811,000
Professional, Financial and Miscellaneous Services	4,098,000	4,053,000
Public Administration .		
National Government Service .	560,000	574,000
Local Government Service	724,000	724,000
Total in Civil Employment ..	23,000,000	22,721,000

The largest percentage increases, as compared with 1954, were in engineering, etc. (4.0 per cent); vehicle manufacture (3.8 per cent); metal manufacture (3.6 per cent); chemicals (2.7 per cent); and distributive trades (2.6 per cent). The biggest decreases were in textiles (4.1 per cent), national government service (2.5 per cent); and clothing (1.4 per cent).

Figures of registered unemployment in Great Britain in the last five months of 1955 (for first seven months see 14393 E) were as follows:

	Wholly unemployed (including Casuals)		Temporarily stopped		
	Males	Females	Males	Females	Total
August 15	118,261	63,665	6,604	11,193	199,693
September 12 .	117,157	66,005	7,122	11,897	202,221
October 10 .	127,784	74,278	5,264	7,829	215,155
November 14	137,538	77,670	4,417	6,288	225,913
December 12	134,812	71,095	4,194	5,549	215,650

The December figure of 215,650 unemployed (which included 38,474 married women) represented one per cent of the total number of employees, and was the lowest end-year figure since the war. There were 31,642 unemployed in Northern Ireland at the end of 1955, making an overall total for the United Kingdom of 247,292—over 40,000 fewer than the end-1954 figure.—(Ministry of Labour Gazette) **(Prev. rep. Employment and Manpower, 14109 B; Unemployment, 14393 E.)**

MARCH 17—24, 1956

A. CYPRUS. — Breakdown of Constitutional Discussions. - Publication of Harding-Makarios Correspondence. - Deportation of Archbishop Makarios. - Evidence of Archbishop's Complicity in Eoka Terrorism. - Statement by Sir John Harding. - Continued Terrorist Outrages. - Clashes between Greek and Turkish Cypriots.

Archbishop Makarios, together with three other leaders of the *enosis* movement in Cyprus, was deported on March 9 to the Seychelles, in the Indian Ocean, by order of the Governor of Cyprus, Field-Marshal Sir John Harding. It was officially announced that the Governor had decided upon this action because, in addition to the Archbishop's overt seditious activities, there was also " a large volume of evidence indicating that the Archbishop has been deeply implicated in the campaign of terrorism launched by the organization known as Eoka."

Prior to the Archbishop's deportation, the British Colonial Secretary (Mr. Lennox-Boyd) had visited Cyprus from Feb. 26 to 29 for discussions on the constitutional future of the island with Sir John Harding, Dr. Kutchuk and other leaders of the Turkish Cypriot community, and Archbishop Makarios, whom he met at the residence of the Anglican Archdeacon in Nicosia. These discussions, however, proved abortive, no compromise being reached between the viewpoints of the British Government on the one hand and the Ethnarchy Council on the other.

Mr. Francis Noel-Baker, Labour M.P. for Swindon, had arrived in Cyprus on Feb. 22 on a personal fact-finding mission at the invitation of Archbishop Makarios, who had requested him to act as an " unofficial mediator." Mr Noel-Baker—who speaks fluent Greek, and who had met the Archbishop during previous visits to the island—had several interviews with Sir John Harding and with leaders of the Turkish community, as well as with the Archbishop himself He returned to London on March 1

Mr. Lennox-Boyd's Statement on Breakdown of Discussions with Archbishop Makarios.

In a statement to the House of Commons on March 5, Mr. Lennox-Boyd gave details of the discussions and exchanges of correspondence which had taken place between H.M. Government and Archbishop Makarios during the past five months. He disclosed that the British Government's plans for a constitutional settlement of the Cyprus question had broken down because Archbishop Makarios had insisted (1) that terrorists found in possession of arms and explosives should be included in the amnesty which had been offered by H.M. Government; (2) that Sir John Harding should not retain powers for the preservation of public security for as long as he (the Governor) thought necessary; and (3) that the composition of the elected majority in the Cyprus Legislative Assembly should be defined to his (the Archbishop's) satisfaction, in advance of the recommendations of the Constitutional Commissioner [Lord Radcliffe, a Lord of Appeal] whom the Government had proposed to appoint. Mr. Lennox-Boyd spoke as follows.

" The Governor had explanatory talks with the Archbishop last October to enable the issues to be established. Discussions continued from November to January, both with the Archbishop and with other Cypriot leaders In the light of these discussions, and after giving most careful consideration to the views expressed by the Governments of Greece and Turkey, both at the tripartite conference in London and in subsequent discussions, H M. Government prepared a statement which represents their policy on both the short- and the long-term aspects of the problem of the future of the island. This statement is as follows

' H.M. Government adhere to the principles embodied in the U.N. Charter, the Potomac Charter, and the Pacific Charter, to which they have subscribed. It is not, therefore, their position that the principle of self-determination can never be applicable to Cyprus It is their position that it is not now a practical proposition on account of the present situation in the Eastern Mediterranean

' H.M. Government have offered a wide measure of self-government now If the people of Cyprus will participate in the constitutional development, it is the intention of H M. Government to work for a final solution which will satisfy the wishes of the people of Cyprus, be consistent with the strategic interests of H M. Government and their allies, and have regard to the existing treaties to which H.M. Government are a party.

' H M. Government will be prepared to discuss the future of the island with representatives of the people of Cyprus when self-government has proved itself capable of safeguarding the interests of all sections of the community '

This statement was shown to Archbishop Makarios and to leaders of the Turkish Cypriot community, and was fully explained and discussed with them. On Feb. 2 the Archbishop indicated that, although he was not prepared to associate himself with the statement, he was prepared to co-operate in the framing of a Constitution on certain conditions. These conditions concerned the questions of the form of the Constitution and an amnesty. It was thus clear that general agreement had been reached on the need to establish self-government, and that the principle of self-determination was no longer a stumbling-block.

Discussions on these outstanding issues continued with the Archbishop during the early part of February, involving a further exchange of correspondence. During this stage it became clear that the outstanding points were the amnesty, the reservation of public security to the Governor for as long as he thought necessary, and the question of a Greek elected majority. At the time when those three points emerged, the hon. member for Swindon [Mr F. Noel-Baker], who was in the island at the time, and who later returned at the Archbishop's request, made ceaseless and selfless efforts to assist in bringing about a settlement.

It was at this point, when the outstanding issues had been narrowed to three, that I decided, with the full approval of the Prime Minister, to fly to Cyprus in order to ensure that everything within our power was done to reach an honourable settlement.

During my visit I had a discussion with the leaders of the Turkish Cypriot community who had throughout been kept informed by the Governor of developments. The Archbishop's letter of Feb. 25, which was received by the Governor on the day of my arrival in Cyprus, confirmed that he still sought clarification on certain points. After preliminary discussions I therefore spoke to the Archbishop on Feb. 29 in the following terms.

I said that I was prepared to give him certain undertakings on the understanding that he, on his part, would assure me that he would co-operate in the framing of a Constitution that he would encourage his fellow-countrymen to do the same, and that he would make an appeal for the cessation of violence and would, thereafter, use all his influence for the restoration of peace and order

The undertakings I offered were as follows :—

(1) I told him that when law and order had been re-established there would be an amnesty for all those convicted of offences under the emergency regulations except those involving violence against the person or the illegal possession of arms, ammunition or explosives, which would come up for review in accordance with the normal rules This would have applied to offences committed before a certain date. Had the Archbishop accepted my statement, this date would have been today. I said that the release of detainees would begin at the same time as the amnesty. I confirmed what the Governor had already made clear—namely, that he was prepared to repeal all emergency regulations at a pace commensurate with that of the re-establishment of law and order.

(2) I said that his letter of Feb. 25 raised certain questions concerning our intentions in the constitutional field, and that I felt that the best way of replying was to restate to him in person our position on these points I explained that H.M. Government's objectives had been set out in the Governor's letter of Feb. 14. They proposed to send a Constitutional Commissioner to Cyprus who would draw up a liberal and democratic Constitution in consultation with representatives of all sections of opinion in the island. It would reserve to the Governor all powers in the field of foreign affairs and defence Public security would also be reserved to the Governor for as long as he thought necessary. Control of all other departments would be handed over to Cypriot Ministers, responsible to a Legislative Assembly representing the people of Cyprus, as quickly as was consistent with an orderly transfer.

The Constitution would provide for an elected majority in the Legislative Assembly and would safeguard the interests of all sections of the community. It would be for the Constitutional Commissioner to recommend what arrangements should be made for this purpose, including the precise composition of the elected majority which he would define in accordance with normal liberal constitutional doctrine.

I told the Archbishop that the talks had now been going on for five months and that, in the view of H.M Government, the time had now come when it was essential to let the world know of the offers that they had made and to make their position clear

After a lengthy discussion, I regret to say that the Archbishop told me that he was not prepared to accept my statement as a basis for co-operation and indicated that, in particular, he could not accept the exclusion of those carrying arms, ammunition, and explosives from the amnesty, or the reservation of public security to the Governor ' for as long as he thought necessary.' He also made it clear that he required the composition of the elected majority to be defined to his satisfaction in advance of the recommendations of the Constitutional Commissioner The full correspondence will be published in a White Paper [see below]

As to the future, the first and most important duty is to restore law and order. We have the resolution and the forces, and it will be done. In the constitutional field our objective remains the same —that is, to reach agreement with the communities in Cyprus in accordance with the principles I have indicated.

It is difficult to find words in which adequately to express the admiration of H.M. Government for the skill shown by Sir John Harding in these discussions. The greatest possible praise is due to him and those under him, in both the civilian and fighting Services, for the calm and efficient manner in which they have discharged their duties in circumstances of immense difficulty."

Statement by Archbishop Makarios.

Archbishop Makarios issued a statement on the same day (March 5) calling upon the Greek Cypriots to " continue the struggle for self-determination until the British Government show respect for our national aspirations," and alleging that Britain had shown " no goodwill " in the attempt to find a basis for a " reasonable agreement."

After asserting that he had made "many concessions" to the British viewpoint, the Archbishop said. "We asked, on the one hand, that measures should be taken to end the anomalous situation in Cyprus, for which we too were prepared to make every effort. On the other hand, we asked that there should be basic assurances regarding the democratic nature of the self-governing Constitution offered by Britain for the transitional stage. As regards the first, we believe that no true pacification in the island's situation can be achieved unless an opportunity is granted for the return of all to normal life through an amnesty, combined with an early repeal of dictatorial measures at present in force."

The Archbishop said that "in view of the other party's sensitivity" he had offered to agree that an amnesty for more serious cases should not be immediate, as in the case of other categories The British Government, however, had shown "inadmissible intransigence on this vital question by wishing to restrict the amnesty to only a very few categories" He had also offered that the Government should retain control over public security for a fixed period, on the assumption that peace and order would in the meantime be secured, "but Britain had insisted in obscure language on keeping this control indefinitely"

"In short," the Archbishop declared, "the Cypriots were called upon to accept a regime under which it would be doubtful whether they would control their own Assembly, and on a basis in which a colonial ruling Power would be able to interfere indefinitely in everything under the pretext of public security"

Publication of Harding-Makarios Correspondence.

The correspondence exchanged between Sir John Harding and Archbishop Makarios was published in London on March 5 as a White Paper (Cmd. 9708).

The White Paper showed that on Jan. 28 **Sir John Harding** wrote to the Archbishop stating that H.M. Government was prepared to make a statement in the terms of that made in the Commons on March 5 by Mr. Lennox-Boyd. The letter went on: "This readiness on their part is on the understanding that you, on your part, would be prepared to indicate that you accept this statement as providing a basis for the co-operation of yourself and your fellow-countrymen in the development of constitutional government, and that you will use all your influence to put an end to violence and disorder. I must emphasize that in the view of H.M. Government the statement is so very reasonable as to be certain to command wide support not only in the United Kingdom but elsewhere also. I would therefore ask your Beatitude to let me know as soon as possible whether you are now able to accept H.M Government's statement as a basis for co-operation. . . ."

Archbishop Makarios, in his reply (Feb. 2), said that the text of the statement was "not satisfactory to the Greek people of Cyprus, whose only claim is self-determination." The letter added: "Since we earnestly desire the pacification of the island, we are prepared to exhaust every effort to find a way of reducing the present tension, while maintaining at the same time our reservations on the text of the statement, and our demand for an early application to Cyprus of the right of self-determination. We accept therefore the invitation of your Excellency to co-operate with you and representatives of the minority in the framing of a Constitution for the transitory regime after the statement has been made"

The letter set out the following general principles which, Archbishop Makarios stated, should be made clear simultaneously, if possible, with the statement:

(1) All legislative, executive, and judicial powers, with the exception of those expressly exempted, should originate from the people of Cyprus, and be exercised by them through their elected representatives and other organs.

(2) Responsibility for the defence and external political relations of the island should be excepted from the above principle, and vested in the Governor.

(3) The Governor should exercise the normal duties of a constitutional head of State.

(4) Representation in the Assembly should be proportional to the composition of the population There should be absolute equality of all citizens, and everyone should be eligible to any public office.

(5) A procedure should be defined for the impartial settlement of any difference arising out of the interpretation of constitutional provisions.

The Archbishop's letter continued: "Agreement on the above points will create the pre-requisites for allaying the present tension, and will permit the quickest possible elaboration and operation of the Constitution of self-government in an atmosphere of calm. To this pacification we shall contribute to the full measure of our powers by making an appropriate statement However, such pacification will be brought about more quickly than by anything else by the policy to be followed simultaneously by your Excellency This should be a policy of appeasement capable of inspiring the citizens with a feeling of freedom and safety. Thus emergency military measures and emergency legislation should be revoked, and an amnesty granted for all political offences."

Sir John Harding replied to this letter as follows on Feb. 14:

". . With regard to your Beatitude's request for the clarification of certain points regarding H M Government's views about a Constitution for Cyprus, I must make it clear that the form of any Constitution must arise out of full discussions with representatives of all communities. . . . Nevertheless, I am authorized to say that H.M. Government consider that the following points should be taken as a basis for discussion:

(1) H M. Government offer a wide measure of democratic self-government now. To this end a new and liberal Constitution would be drawn up in consultation with all sections of the community.

(2) The Constitution would enable the people of Cyprus, through responsible Cypriot Ministers, to assume control by a suitably phased process over the departments of government, except those relating to foreign affairs and defence, which would be reserved to the Governor, and to public security, which would also be reserved to the Governor for as long as he deemed necessary.

(3) The Constitution would provide for an Assembly with an elected majority.

(4) A Cypriot Premier to head the new administration would be chosen by the Assembly with the approval of the Governor Ministerial portfolios would be allocated by the Premier, subject to (5) below

(5) The Constitution would provide for Turkish membership in the Council of Ministers.

(6) There would be proper safeguards for the rights of individual citizens, the interests of all sections of the community, and the integrity and independence of the public service.

The points set out . . constitute the broad objectives that H.M. Government have in view Elaboration of precise constitutional arrangements are matters of crucial importance to everyone, and must be pursued by means of consultation and discussion on a widely representative basis . .

It must be recognized that persistent violence and disorder have increased the difficulties of introducing constitutional government. Fear of intimidation has stifled free expression of opinion The minorities are more concerned than before about the possible consequences for them of the advent of self-government. Nevertheless, as stated above, the proposals now put forward by H.M Government will constitute their objective The speed at which they can be realized will depend on the response of the general public and their leaders to their new responsibilities

I welcome the statement in your letter that your Beatitude will contribute to the full measure of your powers in bringing peace to the island. I trust, therefore, that as soon as H M. Government make their statement of policy you will, on your part, make the appropriate statement as indicated in your letter, and take active steps to use all your influence to bring an end to violence and disorder. I shall be glad to receive an early assurance from your Beatitude on that point. I will then the more easily be able to relax the emergency provisions without endangering public security

As an earnest of my desire to see peace and normality restored, I intend to take steps to repeal certain of the emergency regulations as soon as there is positive evidence of a genuine response to your Beatitude's appeal against violence I shall be prepared to repeal other parts of these regulations progressively as conditions in the island revert to normal. . . ."

Archbishop Makarios replied to the Governor's letter as follows on Feb 25. "In our letter of Feb. 2 we informed your Excellency that although we do not agree with the pre-conditions on which, in the statement they intend to make, H M. Government make the application of the principle of self-determination in Cyprus depend, we would nevertheless, in the interests of the pacification of the country, agree to co-operate in the framing and operation of a Constitution of self-government as a transitional stage towards self-determination, which ever remains our sole and final aim. However, we made it clear that such co-operation would be possible for us only in so far as the fundamental democratic principles, which we described in our previous letter, were clearly established now as a basis of the Constitution which is offered . .

As regards the substance of the general principles of the Constitution, a number of basic points remain unclear. Thus:

(1) It is not made clear that all powers—executive (except those expressly reserved to the Governor in the spheres of defence and foreign affairs), legislative, and judicial—originate from the people, and are exercised exclusively by them through their elected representatives and their other constitutional organs.

(2) It is not made clear that the representation in the Assembly will be proportionate to the composition of the population.

(3) No assurance is afforded that the Governor's approval as to the person of the Prime Minister will be entirely formal

We have noted what is stated in your letter regarding the incorporation in the Constitution of the general principles set forth; nevertheless no adequate assurance is given on this point.

In my letter of Feb. 2 we made it clear that for the purpose of restoring peace and order—to which we, too, wish to contribute with all our powers—the repeal by your Excellency of the emergency laws now in force, and the granting of an amnesty for all political offences, are indispensable Your reply contains no adequate assurance concerning the early repeal of all the above laws; furthermore, there is no mention whatsoever regarding the granting of an amnesty for all political offences. Both these points, however, constitute an indispensable precondition for the normalization of the island's political life.

In conclusion, we feel obliged to emphasize that in our desire that the island should spend in peace the period up to the application of the principle of self-determination we have made every possible concession beyond which our national conscience and natural dignity do not permit us to go"

Finally, the White Paper gave the text of the proposals conveyed by Mr Lennox-Boyd to the Archbishop on Feb. 29.

Deportation of Archbishop Makarios.

On the orders of Sir John Harding, Archbishop Makarios and three other leaders of the *enosis* movement were arrested on March 9 in Nicosia and Kyrenia and deported on the same day to the Seychelles, in the Indian Ocean. The three persons arrested with the Archbishop were Bishop Kyprianos of Kyrenia; Papastavros Papa-Aganthelou, a priest; and Polycarpos Ioannides, formerly editor of the extreme nationalist and violently anti-British newspaper *Ephemeris*.

The Bishop of Kyrenia (Kyprianos Themistocles Kyriakides) was described in an official statement as the head of the "Kyrenia group," the "most fanatical and extreme wing of the *enosis* movement in Cyprus." It was pointed out that he had consistently opposed acceptance of a Constitution, had delivered a large number of militant and ultra-nationalistic sermons, and had taken a leading part in organizing the Orthodox Church Youth Association (known as "Ohen"), which had become a fertile ground for the recruitment of young people by Eoka for terrorist activities Extracts were given from many inflammatory sermons in which the Bishop had called for a "liberty or death" struggle, had denounced Greek Cypriots co-operating with the Government as "traitors," and had advocated violence and bloodshed. In addition, he had repeatedly extolled the terrorists as "patriots" and had publicly praised the Eoka leader, "Dhigenis" Three of the Bishop's brothers were active supporters of Eoka, one having been sentenced to a 12-year sentence (see 14693 A) and the other two being under detention.

Polycarpos Ioannides, secretary of the Kyrenia Bishopric and a leading member of the "Kyrenia group," had been active in *enosis* agitation since 1931 and had begun publication of *Ephemeris* in 1946. In 1950, when he took an active part in organizing the "*enosis* plebiscite," he had been sentenced to 18 months' imprisonment and his newspaper had been suspended for two years for inciting hatred against the Government He was released from prison in August 1951, resumed his *enosis* activities and the publication of his paper, but suspended the latter in August 1954 after the Government had announced its intention of enforcing the anti-sedition laws

Papastavros Papa-Agathangelou was described as one of those mainly responsible for inciting Cypriot youths to lawlessness, and as having exercised "a most pernicious influence" over the members of the "Ohen" organization, of which he was president. He had been one of the main instigators of schoolboy riots in Nicosia, and had delivered many seditious sermons

The following official statement on the deportation of Archbishop Makarios was issued in Nicosia on March 9:

"Today the Governor, Field-Marshal Sir John Harding, ordered the deportation of Archbishop Makarios under Regulation VII of the Emergency Powers (Public Safety and Order) Regulations The Archbishop has already left the island under escort for a destination which will be announced later.

"The Governor entered into discussions on the political and constitutional future of the island with Archbishop Makarios as being the traditional leader of the Greek Cypriot community. In embarking on these discussions the Governor was aware that there were grounds for believing that the Archbishop was personally implicated in the terrorism. Nevertheless, the Governor decided to negotiate with him in the hope that he might be induced to denounce violence and to advise his fellow-countrymen to follow his lead. . . .

"Over the past five months, while the discussions have proceeded, further evidence, both direct and circumstantial, has accumulated to show the extent to which the Archbishop has been personally implicated in Eoka's activities. Nevertheless, the Governor has pursued these discussions to the furthest possible limit of conciliation and concession in the hope that the Archbishop might be induced to denounce violence, and so to open the door to co-operation and orderly constitutional progress.

"This hope has now been disappointed by the Archbishop's refusal to abandon the weapons of violence and intimidation in the pursuit of his political aims. The matters over which he has broken off the discussions cannot possibly be held to justify or excuse the continued resort to violent and extreme methods which are still rife in the island, and which have recently culminated in a dastardly attempt to wreck an aircraft carrying British Servicemen and their families [see section "Terrorist Activities" below]. It is impossible to escape the conclusion that the Archbishop is now so far committed to the use of violence for political ends that he either cannot or will not abandon it.

"The Governor has therefore reluctantly concluded that the Archbishop now personally constitutes a major obstacle to a return to peaceful conditions, and that his influence must therefore be removed from the island in the interest of promoting peace, order, and good government."

At the same time the following explanatory statement was issued giving the reasons which had led Sir John Harding to order the deportation of Archbishop Makarios:

(1) "The Governor reached his decision to order the Archbishop's deportation in the light not only of his overt seditious activities but also of a large volume of evidence indicating that the Archbishop has himself been deeply implicated in the campaign of terrorism launched by the organization known as Eoka

In recent months, as the security forces have penetrated further into the terrorist organization, evidence of the Archbishop's complicity has accumulated from many different sources. The Governor has scrutinized the information thus collected with the greatest possible care, and has reluctantly reached the conclusion that it establishes beyond all reasonable doubt that the Archbishop has not merely countenanced but has actively fostered terrorism in order to promote his political aims While overtly and in apparent good faith conducting negotiations for a political settlement of the island's future, the Archbishop has surreptitiously encouraged and abetted the terrorists in order to improve his own bargaining position in the negotiations.

(2) The Archbishop's association with the elements out of which Eoka has emerged dates back to 1951, when, soon after his election as Archbishop he personally undertook the formation of the extreme Nationalist youth organization known as "Peon."

(3) When establishing branches of that organization, the Archbishop said that it would be modelled on the lines of the National Youth Organization established under the Metaxas regime in Greece. He spoke of the need for secrecy and sacrifices, for the boycott of British goods and the British way of life, for the destruction of shops displaying English signs, for the production of a clandestine newspaper, and for establishment of contributory funds for the national struggle In July, 1951, Colonel Grivas (now reported to be the leader of Eoka) arrived in Cyprus at the Archbishop's invitation to advise on the organization of "Peon," which was to follow that of Grivas's extremist organization in Greece

(4) During the period 1951-53 evidence accumulated that this organization, to which the Archbishop continued to give his personal patronage, was being used for subversive purposes and was preparing for a resort to violence It developed contacts with irredendist agencies in Greece. Its members were involved in the dissemination of subversive propaganda and in illegal demonstrations resulting in damage to property In June, 1953, the organization was rendered illegal by the withdrawal of its registration under the Clubs Law.

(5) It continued to function underground and provided the organizational basis and staff on which Eoka was later built Its ex-general secretary (Stavros Poskotis) and several persons who had been leading members were among a group of terrorists who perpetrated the first Eoka outrages at Larnaca on April 1, 1955. They were sentenced to terms of imprisonment ranging from three to nine years.

Another person (Evghenios Cotsapas) who, as district secretary, had taken a leading part in establishing the branch at Limassol, was caught red-handed on Nov. 18, 1955, carrying bombs in his car, and was sentenced to three years' imprisonment. He is the son of an Ethnarchy councillor who is himself now in detention

No fewer than three out of the five members of the former Nicosia district committee of the organization (Christor Eleftherion, Evengelos Evangelakis, and Markos Dvakos) are now members of the terrorist gangs at large in the island, and one of these was a personal protégé of the Archbishop Such were the men to whom Archbishop Makarios entrusted the formation of a Youth Organization under his personal patronage

(6) In August, 1954, a certain Zephirios Valvis visited Cyprus at the Archbishop's request. This man is a Greek national, and by profession a lawyer practising at Athens He is now known to have been one of the principal lieutenants of Colonel Grivas, and a member of an organization in Greece which has been responsible for arranging shipments of arms and explosives to the terrorists in Cyprus. He had a number of meetings with the Archbishop and attended a meeting of the Holy Synod and of other leading Enosists held at Mesapotamos monastery and presided over by the Archbishop. There is reason to believe that at that meeting the plans were laid which later bore fruit in the organized violence and terrorism of Eoka.

(7) Over the past two years information has been received from a number of different sources indicating that the Archbishop has personally supplied funds to agents in Greece for the purchase and supply of arms and explosives for terrorist operations in Cyprus. In particular, it is reported that a large sum from the monies which the Archbishop collected from Greek communities in the United States during his visit there in 1954 was handed over by him in Athens to Valvis for the purchase and delivery of explosives, which were later seized while being smuggled into Cyprus in the Greek schooner *Aghios Gheorghios*

The Governor has carefully examined these various reports and is satisfied that they establish beyond doubt that the Archbishop has provided large sums of money to irredentist agencies in Greece and, in so doing, was aware that they would be used for the shipment of arms and explosives to Cyprus

(8) Funds under the Archbishop's control are known to have been used to pay fines imposed by the Courts on persons who had taken part in illegal political activities in Cyprus Members of the Greek Orthodox community requiring the services of the Archbishopric have been required to contribute to a fund for the 'national struggle,' and the various fees and dues charged for such services have been increased with the same object

(9) The Archbishopric has been used for the production of Eoka leaflets on a scale which would have been impossible without the Archbishop's connivance.

(10) The Archbishopric has also been used for the temporary storage of arms and grenades.

(11) There is strong circumstantial evidence to show that the timing and intensity of terrorist activities have been adjusted to strengthen the bargaining position of the Archbishop during the course of his negotiations with the Governor. It is also noticeable that during his absences from the island in April-May and October-November of last year, a marked lull occurred in terrorist activity.

(12) Besides his contacts with Grivas and his lieutenant, Valvis, the Archbishop's personal relations with known members of the Eoka organization are such as to provide strong corroboration of his complicity in the activities of the terrorists. The organizer of the *Aghios Georghios* gun-running venture was Socrates Loizides, brother of the Ethnarchy Councillor, Savvas Loizides, who has frequently acted as the Archbishop's spokesman in Athens

Certain of the detailed arrangements for this shipment were made by Andreas Azinas, a personal protégé of the Archbishop who had previously been elected Secretary-General of the Pan-Cyprian Farmers' Union with support from the Archbishop This man is now wanted by the police for his part in the *Aghios Gheorghios* case.

The convicted terrorist Stavros Poskotis, whom the Archbishop selected as secretary-general of the Youth Organization, "Peon," was employed in the printing works belonging to the Archbishopric. It was there, too, that the Archbishop's close kinsman. Charalambos Mouskos, was employed before he embarked on the career of murder and violence which terminated in his being shot dead in a gun battle with a member of the security forces (see 14693 A). It was on the Archbishop's orders that this man was given shelter and medical treatment in the Kykko monastery.

When Karaolis, the convicted murderer of a police constable (see 14513 A) was arrested, it was another employee of the Archbishopric printing works who was taking him in his car to join the terrorist gang then operating in the Kyrenia hills. The driver of the car absconded and is still wanted by the police.

(13) Finally, one of the most significant and surely one of the most culpable aspects of the Archbishop's conduct is his persistent failure, despite his position as the religious leader of the Greek Cypriot Orthodox Christian community, to condemn the wickedness and brutality of Eoka's methods. At once, on the outbreak of terrorism last April, he was urged by the then Governor to denounce violence He failed to do so. He failed even to comment on the patently irreligious oath which the terrorists were urging schoolchildren to take Further attempts to induce him to give his community a lead against terrorism were also fruitless.

He has remained silent while policemen and soldiers have been murdered in cold blood, while women and children have been killed and maimed by bombs, while a Cypriot woman was shot and wounded for the second time as she lay in hospital recovering from a previous terrorist attack, and even while he stood by the coffin of an abbot of his own Church who was brutally murdered by terrorists in his own monastery.

His silence has understandably been accepted among his community as not merely condoning, but even approving, assassination and bomb-throwing. He has confirmed that interpretation by referring in sermons to convicted terrorists as patriots, and by urging his fellow-countrymen to take the law into their own hands.

And now, in the last few weeks, he has sought positively to exploit his power to influence the members of his Church against violence by seeking to bargain this against concessions from H.M. Government on the form of a Constitution and on the grant of an amnesty to terrorists convicted of crimes of violence.

(14) On this evidence the Governor has decided that the example and influence of Archbishop Makarios is so detrimental to public safety and public order that his continued presence in the island can no longer be tolerated. He has taken this step only after the most careful and deliberate consideration. He is well aware of the pain and dismay that this measure will cause not only among the Greek Orthodox community in Cyprus but in the world at large.

(15) So long as there were grounds to hope that the Archbishop might be induced to use the influence which he possesses among his community to lead them away from violence, disorder, and fear, and back to the path of peace and democratic rule, the Governor was of the opinion that the good of the people of Cyprus as a whole compelled him to overlook the shameful record of the Archbishop's complicity in bloodshed, intimidation, and the tyrannous suppression of free opinion.

The Archbishop has chosen to reject the offer of a new and constructive approach to the Island's political problems, and to continue to seek to gain his ends by force. With that he has finally removed any compunction that the Governor may have felt against dealing with him, not as a responsible political leader, and still less as the head of a Christian Church, but in that character which he has himself chosen to prefer—the leader of a political campaign which relies on the use of ruthless violence and terrorism."

The statement concluded by recapitulating the seditious activities of the Bishop of Kyrenia, Polycarpos Ioannides, and Papastavros Papa-Aganthelou, as described above.

Archbishop Makarios was arrested at Nicosia airport while about to board a plane for Athens (where he was to have had discussions with the Greek Government), whilst the Bishop of Kyrenia, Ioannides, and Papa-Aganthelou were arrested in Kyrenia and Nicosia. They were flown on the same day (March 9) in an R.A.F. plane from Nicosia to Mombasa, where they were transferred to the frigate H.M.S. *Loch Fada*. On March 14 they arrived at Mahé, in the Seychelles, and were driven to Sans-Souci, the country residence of the Governor of the Seychelles (Sir William Addis) which had been chosen as the place of their internment.

Greek Reactions to Deportation of Archbishop Makarios.

The deportation of Archbishop Makarios aroused strong feeling in Greece and led to violent anti-British riots—notably by students—in Athens, Salonika, and other centres. In Athens, the rioters smashed the windows of the British European Airways office, burned the Union Jack in public, and tore down all signs over shops, hotels, cinemas, etc., bearing British names. Many demonstrators were injured in clashes with strong forces of troops and police who were guarding the British, Turkish, and U.S. Embassies. Serious rioting also occurred in Salonika, where some 2,000 students clashed with the security forces. The British Consulate at Heraklion (Crete) was sacked by a mob which broke through a police cordon, ransacked the premises, and destroyed furniture and documents; the Consul and his staff succeeded in escaping from the building and were given police protection. An apology for the attack on the Consulate was subsequently made by the Greek Foreign Minister (M. Theotokis) to the British Ambassador in Athens (Sir Charles Peake).

The Greek Cabinet decided on March 10 to recall the Greek Ambassador in London (M. Vassilios Mostras) immediately. On the same date the Greek Minister of the Interior ordered the temporary closing down of the British Institute in Athens, whilst the Minister of Education ordered the suspension of all English-language teaching in schools. The Holy Synod of the Greek Orthodox Church, meeting under Archbishop Spyridon (the Primate of Greece), decided to appeal to the heads of all Churches—including the Archbishop of Canterbury and the Patriarch Alexis, head of the Russian Orthodox Church—to secure the release of Archbishop Makarios, whose deportation was described as an "unholy act." It was also decided to send a similar appeal to the World Council of Churches.

A four-hour nation-wide strike in protest against the deportation of Archbishop Makarios, organized by the General Confederation of Labour, was observed throughout Greece on March 16. Between dawn and 10 a.m. all public transport came to a standstill, all factories, shops, and schools were closed, and train, ship, and aircraft schedules were cancelled. The strike culminated in half an hour's "silent protest" during which the streets remained deserted and church bells were tolled. It was estimated that 500,000 workers took part in the strike.

The Greek delegate at the United Nations (M. Palmas) handed a Note to the U.N. Secretary-General on March 10 protesting against the deportation of Archbishop Makarios, and asking that copies be circulated to all member-States. On March 13 the Greek Government formally asked for the Cyprus question to be placed on the agenda of the 11th session of the General Assembly.

The Greek Note to the U N described the deportation of Archbishop Makarios and the other persons concerned as "a flagrant violation of all international rules and morality which has no precedent in the political annals of the civilized world." After declaring that Britain's "policy of violence and provocative action" was "opposed both to the letter and the spirit of the Charter," the Note alleged that responsibility for the breakdown of the Harding-Makarios discussions rested "entirely on the British Government, which did not for one moment . . . have the sincere intention of restoring freedom to the island." It went on to accuse Britain of desiring "the prolongation by every means at its command of the arbitrary colonial rule imposed upon Cyprus," and, in addition, drew attention to the British jamming of Athens broadcasts to Cyprus (see below), which it described as "a measure not even taken against the Nazi and Fascist broadcasts during the Second World War."

The Greek Government issued an official statement on March 15 expressing the hope that negotiations on Cyprus might be resumed if Archbishop Makarios were allowed to return to the island. It insisted, however, that the British Government should accept three basic principles: "(1) recognition of the right of self-determination of the Cypriot people; (2) the establishment of a regime of self-government based on full constitutional guarantees until the Cypriot people has decided on its future; (3) the granting of a general amnesty to Cypriot patriots."

Jamming of Athens Broadcasts to Cyprus.

The jamming of Athens broadcasts to Cyprus was begun by the British authorities on March 5, the operation being officially described as "experimental." It was stated by the Radio Correspondent of *The Times* that the equipment used for jamming Athens broadcasts to the island was being operated by the Royal Corps of Signals in Cyprus. As a retaliatory measure, the Greek authorities decided on March 6 to discontinue relaying the daily B.B.C. programmes in Greek. [These programmes had been relayed in Greece for the past eleven years.]

U.S. Statements on Cyprus. - U.S. Ambassador in Athens expresses "Sympathy" with Greek Government.

The State Department spokesman (Mr. Lincoln White) read a prepared statement on March 12 in which he said that the U.S. Government had "earnestly hoped that basic agrement might be reached which would enable the people of Cyprus to achieve their legitimate desire of co-operation in the establishment of a government truly representative of the people of the island." He added: "We are confident that a solution may be reached which will take into account and safeguard the legitimate interests of the parties concerned. We earnestly hope that, despite the present reverses, no-one will lose sight of the overriding objective, which is the establishment of an atmosphere in which negotiations can be resumed and carried to a successful conclusion."

The U.S. Ambassador in Athens (Mr. Cavendish Cannon) called on M. Theotokis on March 13 and expressed to him the U.S. Government's "sympathetic concern" at the latest developments in Cyprus. Mr. Cannon also told the Greek Foreign Minister that the U.S. Government had taken "particular note of the dignity and statesmanship with which the Greek Government had dealt with the current situation" with regard to Cyprus.

The British Foreign Office announced on the same day that H.M. Ambassador in Washington (Sir Roger Makins) had been instructed to ask the State Department for an explanation of Mr. Cannon's remarks. After a meeting between the Ambassador and Mr. Livingston Merchant (U.S. Assistant Secretary of State for European Affairs), the State Department issued the following statement:

"The Cyprus issue involves the direct interest of close friends and allies of the United States. It is therefore a matter which the U.S A views with attentive interest. The U S A. has not itself been a party to the Cyprus issue Our sole effort has been to encourage those directly concerned to find a fair and just solution We were greatly disappointed that the substantial progress made towards such a solution through private discussions did not result in final agreement We are convinced, however, that further progress can be made once an atmosphere conducive to negotiations can be re-established. The U S.A is ready to assist its friends in the achievement of a just solution to the Cyprus problem."

The statement added that the U S. Government viewed present problems with "sympathetic concern," but was confident that a solution could be found that would strengthen Western interests as a whole.

President Eisenhower said at a press conference on March 14 that the U.S.A. was ready to do "anything reasonable and practical" to help in a solution of the Cyprus problem. Both the countries involved [i.e. Greece and Britain] were among America's "very best friends," and their co-operation in NATO was essential to the success of that organization. The solution of this "tough and complicated" problem would have to be reached by the parties concerned, but the U.S.A. wanted to maintain with both sides the very friendly historic relations it had always had with them.

Terrorist Activities in Cyprus.

Terrorist activities in Cyprus during the past four weeks, together with counter-operations by the security forces, are described below chronologically, in continuation of 14693 A:

Feb. 28. Two Cypriots—Andreas Zakos (25) and Charialos Michael (20)—were sentenced to death for shooting at Major Combe in the ambush on Dec. 15. Their conviction brought the number of Cypriots sentenced to death since the terrorist campaign began to four

[The other two Cypriots on whom the death sentence had been passed were Savva Karaoulis, who killed a Greek Cypriot policeman in Famagusta on Oct. 5, and Andreas Demetriou, who shot at and wounded a British resident of Famagusta, Mr Sidney Taylor, on Nov. 28 Karaoulis had been given leave to appeal to the Privy Council, but Demetriou's appeal against the death sentence was rejected by the Supreme Court of Cyprus on Feb 20 Demetriou was the first person to be sentenced to death under the emergency regulations, having committed the crime two days after they came into force]

March 2. Four bombs exploded in the English school in Nicosia (where most of the pupils are Greek Cypriots), causing extensive structural damage but no casualties. Over 20 bomb explosions took place in Nicosia during the night of March 1-2, damage being negligible.

March 4. A *Hermes* airliner of Skyways Ltd. was completely destroyed by an explosion at Nicosia Airport only 20 minutes before it was due to leave for England with 67 Servicemen and their families, including 16 women and children. No-one was on board at the time and there were no casualties It was subsequently announced on March 6 that an official investigation had shown that a time-bomb had been placed in one of the forward luggage compartments. The statement added that had the bomb exploded while the plane was in the air, as had obviously been intended, the machine would have disintegrated and all on board would have been killed.

March 7. Six Greek Cypriots, two of whom were under 17 and the others under 24, were sentenced to life imprisonment for carrying arms When arrested on Dec. 17 near Yialoussa (where terrorists had killed a British officer the previous night) they had been found in possession of revolvers, a Sten gun, and ammunition.

March 8. A bomb thrown at a police car near Paphos killed a Greek Cypriot policeman and injured four other persons

March 10-11. Strikes broke out in different parts of the island in protest against the deportation of Archbishop Makarios, whilst demonstrations—mostly on a small scale—occurred at Famagusta, Limassol, Kyrenia, and other centres. The authorities intensified active patrolling by troops and police, imposed a night curfew in several areas, and banned the riding of bicycles and motor-cycles after dusk in places where bombs had been thrown by terrorists Several bomb-throwing incidents occurred in different parts of the island, the only casualty being a terrorist who was killed when a bomb exploded in his hand as he was about to throw it at a British military ambulance.

The Government announced on March 11 that a search of Archbishop Makarios's residence had resulted in the discovery of a petrol bomb, ten similar bombs in course of construction, containers of petrol, and revolver ammunition. It was also announced that the security forces had made an important haul of Eoka documents, including letters and orders signed by "Dighenis," the leader of the organization. These documents, it was stated, contained material incriminating the Archbishop and confirming that he had actively supported the campaign of terrorism waged by Eoka *Inter alia*, they showed that "Dighenis" was directly responsible for having ordered the murder of Greek Cypriot "traitors" [i e. citizens opposed to Eoka terrorism]; that terrorists failing to obey orders were liable to "execution", that isolated British Servicemen were being deliberately singled out as targets of terrorist attack; that Eoka was deliberately fomenting sedition and unrest among schoolchildren; and that "Dighenis" was concerned at the growing indiscipline and insubordination among his followers.

March 12. Further unofficial strikes occurred at Nicosia and other centres in protest against the Archbishop's deportation most of the shops being closed in the principal towns. The strikes were organized by the Nationalist trade union organization, whose general secretary (Michael Pisas) was taken into custody.

A 17-year-old Greek Cypriot student was shot dead by British security forces near Paphos when he failed to obey a challenge to halt The shooting followed an incident in which a bomb had been thrown at two Army lorries without causing any casualties.

March 13. A general strike was again observed throughout the island, all shops and places of amusement being closed except in the Turkish quarters Rioting youths were dispersed by baton charges in Nicosia, whilst several bomb-throwing incidents—none serious—occurred at Larnaca and other places.

March 14. A British police sergeant (Sgt Gerald Rooney) was shot dead in the centre of Nicosia by a terrorist who succeeded in escaping, a Turkish policeman and a Greek Cypriot civilian standing nearby were wounded by the same gunman. The area (Hippocrates Street, near Metaxas Square) was immediately cordoned off and searches begun by troops and police, aided by police dogs.

A seven-year-old Cypriot boy was killed in Larnaca when a shot was fired to disperse a mob which was heavily stoning two British military vehicles and their occupants.

March 15 A systematic house-to-house search was carried out by the 1st Bn, Parachute Brigade, in the area of Nicosia in which Sgt. Rooney had been killed the previous day. Several arrests were made and a number of cartridges, percussion caps, etc., were discovered in a nearby carpenter's shop.

An R A F man on a motor-cycle was shot in the back by a terrorist near the Wolseley Barracks (Nicosia), but was not seriously wounded; the assailant escaped At the village of Dhora (25 miles N.W of Limassol) three masked terrorists entered a café, ordered those present to stand against the wall, and shot dead two Greek Cypriots who were regarded as "traitors."

March 16. The District Commissioner of Nicosia (Mr Clemens), with the sanction of the Governor, issued an order for the ejection of ten families (comprising about 120 persons) from the area of Nicosia in which Sgt Rooney had been shot. The area—a compact locality of some 20 shops and 10 houses—had been cordoned off and placed under curfew for three days while house-to-house searches were being made, but the inhabitants had given no help whatever in enabling the security forces to trace the murderer of Sgt. Rooney, although sealed envelopes had been distributed in which confidential information could be disclosed. The area had been the scene of nine murders of British and Cypriot troops and policemen, and of 20 attempted murders, since October last, but in no single case had the inhabitants—even eye-witnesses of the murders—come forward to give any information. It was officially stated that the inhabitants of the area had abetted these crimes, and that searches of the houses had led to the discovery of five bombs, cartridges and cartridge-making equipment, much Communist literature, and newly printed Eoka pamphlets.

March 17 Five villages in the Troodos mountains (S.W. Cyprus) were placed under an indefinite curfew after terrorists had made a night attack on security forces in the area, five British soldiers were wounded (two seriously) in the ambush, and a terrorist killed.

March 18. Four masked terrorists entered an Orthodox church at Kythrea (seven miles N.E of Nicosia) during the Sunday service, ordered the congregation of about 40 to face the wall, and shot dead

the choir soloist, who was slain by the altar. The murdered man, Peirides Manoli (45), was a Greek Cypriot employee of an insurance company, and the father of four children. An intensive search was set on foot for his murderers, who succeeded in escaping

Elsewhere in the island a member of the security forces was killed and another seriously injured by a bomb explosion at Yialoussa; a British soldier was killed in a bomb outrage at the village of Lapithos, near Kyrenia, and the British foreman of the Limni copper mines, near Paphos, was seriously wounded by two gunmen.

March 19. A collective fine of £7,000—the heaviest levied to date—was imposed on the village of Lapithos (population 3,000) as a punishment for the incident in which a British soldier was killed The village, a notorious trouble-centre, had been under curfew since March 14, when the elementary school had been destroyed by fire and men of the Wiltshire Regt. stoned when they arrived to restore order. A collective fine of £2,000 was also imposed on the village of Yialoussa.

About 20 people were injured, several seriously, when fighting broke out between Greeks and Turks at the village of Vassilia, 12 miles from Nicosia The clash began after a party of Greeks visiting the village had started to sing national songs to which the Turks took exception Six Turkish women were taken to hospital with knife-wounds. British troops were sent to the village to restore order, and a curfew was imposed.

March 20. As a reprisal for the incidents at Vassilia, some 500 Turks smashed the windows of Greek-owned shops and offices in the Turkish quarter of Nicosia. The demonstrators were dispersed by tear-gas.

March 21 A time-bomb of the "pencil" type was found in the mattresses of Sir John Harding's bed at Government House, Nicosia The discovery was made by the Governor's personal servant whilst making the bed, on which Sir John Harding had slept throughout the night. The bomb, which had apparently failed to explode because of a defect in the mechanism, was removed and detonated harmlessly in the open. Intensive police searches were made for a Greek Cypriot servant who had joined the staff at Government House six months earlier, and who was reported to be missing.

A British lance-corporal was fatally injured when two bombs were thrown at a military vehicle in Famagusta He was the 20th Serviceman killed in Cyprus since the launching of the Eoka terrorist campaign.

The deportation of Archbishop Makarios was regarded by the Turkish press, and by Turkish public opinion generally, as fully justified in view of the Archbishop's proved complicity in terrorist activities. No official statement was issued in Turkey, but articles welcoming the British Government's action, and expressing full support for it, were published in nearly all Turkish newspapers.—(Times - Daily Telegraph - Manchester Guardian - Observer - New York Times)

(Prev. rep. Cyprus, 14693 A.)

Note. The situation in Cyprus, with special reference to the deportation of Archbishop Makarios, was debated by the House of Commons on March 14 and by the House of Lords on March 15 The debates will be summarized in a subsequent issue.—(*Ed K.C A.*)

A. RHODESIA AND NYASALAND FEDERATION. — Creation of Central Bank.

A Bill providing for the setting-up of the Bank of Rhodesia and Nyasaland as the Federation's central bank was published on Feb. 10 and received its third reading in the Federal Assembly on Feb. 28.

The Bank will be responsible for regulating the monetary system of the Federation, and will take over the assets and liabilities of the Central Africa Currency Fund and the Currency Board, which will both cease to exist. It will also act as banker to the Federal Government and to any of the territorial Governments of the Federation wishing it to do so It may make arrangements or enter into agreements (subject to the consent of the Federal Minister of Finance) with any bank or financial institution outside the Federation to borrow foreign currency, may underwrite loans to be raised by the Federal Government, territorial Governments, and local authorities, and may act as agent or correspondent for the International Monetary Fund

The Bank's capital will be £1,000,000, to be held by the Federal Government. Its affairs will be managed by a governor, a deputy governor, and seven other directors.

(Federal Information Department, Salisbury)

B. CEYLON. — Legation opened in Paris. - New High Commissioner in Australia.

It was announced in Colombo on Nov. 28, 1955, that the Government of Ceylon had decided to establish a Legation in Paris and to appoint Sir Claude Corea, the High Commissioner in London, concurrently as Minister to France. It was also announced that Sir Claude would serve concurrently as Ceylonese Minister to the Netherlands.

Mr. P. R. Gunasekera, a judge, had been appointed High Commissioner to Australia on Oct. 11, 1954, *vice* Mr. J. A. Martensz, retiring.—(Ceylon Government Information Dept.)

(Prev. rep. 14016 B.)

C. AUSTRIA. — Forthcoming General Elections. - Coalition Parties' Disagreement on Future of Oil Industry. - Memoranda on Compensation for British, U.S., and French Oil Companies.

Representatives of the two Government parties (the People's Party and the Socialists) agreed on Feb. 28 to sponsor a joint motion in Parliament calling for general elections on May 13. The decision was taken because no agreement could be reached between the two parties on important economic questions.

The principal disputes were: (1) The future of the oilfields and oil installations returned to Austria by the Soviet Union. The Socialists demanded that they should remain the sole property of the State (and thus continue to be administered by Herr Waldbrunner, the Socialist Minister of Nationalized Industries), whilst the People's Party favoured a mixed administration in which the Federal Government would hold 51 per cent of the shares and exercise general control, with the Provincial Government of Lower Austria and private shareholders also participating, in the latter connexion the People's Party had proposed to issue special "people's shares" at a low nominal value of facilitate a wide distribution of private ownership (2) The future of the former German industrial properties returned by the U S S.R., including the question of whether they should be nationalized or developed partly by private enterprise. (3) The organization of the future Austrian civil aviation company

On Dec. 1, 1955, the Austrian Government had made public the text of two memoranda agreed upon with Britain, the U.S.A., and France on May 10, 1955—i.e., shortly before the signing of the Austrian State Treaty. They dealt with the claims of American, British, and French companies (notably oil companies) in respect of their former assets in Austria which had been seized, first by the Nazis after the *Anschluss* in 1937, and later by the Soviet authorities in 1945, and which formed part of the oilfields and industrial installations returned by the U.S.S.R. to Austria during 1955.

The memorandum with Britain and the U.S A. provided that Austria would either return the properties concerned or pay compensation to the former owners, notably the Socony-Vacuum Petroleum Company (U S.A) and the Anglo-Saxon Petroleum Company (British) The memorandum with France laid down that Austria would pay compensation to the *Société Française Industrielle et Commerciale du Petrole*, which the company might reinvest in the Austrian oil industry. In return, Britain, the U S.A. and France agreed to transfer to Austria unconditionally all former German property in their former occupation zones which they could have claimed as reparations, as a compensation for Austria's renunciation of her claims against Germany arising from the *Anschluss*.

The two memoranda corresponded to that signed by Austria and the Soviet Union on April 15, 1955 after the Moscow negotiations

The Government's proposal that Austria should join the Council of Europe was approved on March 1 by the *Nationalrat*, the only opposing votes being cast by the "People's Opposition" (Communists). The Upper House of the Austrian Parliament approved the proposal on March 8 without a dissenting vote.—(Wiener Zeitung - Neue Zurcher Zeitung)

(Prev. rep. Council of Europe, Entry, 14713 A; Austrian Oil Industry, 14532 A.)

D. PERSIA. — The Shah's Visit to India and Pakistan.

The Shah of Persia and the Empress Soraya toured India from Feb. 16 to March 8 as the guests of the Indian Government, being officially received by President Prasad in New Delhi and subsequently visiting Agra, Aligarh, Lucknow, Benares, Bangalore, Mysore, and Poona. The last three days of their visit were spent in Bombay, which has a large Parsee community of Persian descent.

During his return journey the Shah stopped on March 8 at Karachi, where he met the Governor-General of Pakistan (General Iskander Mirza) and the Prime Minister (Chaudhri Mohammad Ali). Before returning to Teheran on the following day he also met Mr. Dulles, the U.S. Secretary of State, who was visiting Karachi for a SEATO council meeting.

(Indian and Pakistani High Commissioners' Offices, London)

(Prev. rep. Indo-Persian Relations, 13989 C.)

E. EL SALVADOR. — Presidential Election.

Lieutenant-Colonel José María Lemus was elected President of El Salvador on March 4 in succession to President Oscar Osorio, both the new President and the outgoing President being members of the Revolutionary Party of Democratic Union Voting was very light, as all leading Opposition candidates had formally withdrawn on Feb. 29, alleging Government oppression and fraud. President Lemus will take office in September.—(New York Times) **(10800 D.)**

F. URUGUAY. — New President of National Council.

Señor Alberto F. Zubiría succeeded Señor Batlle Berres on March 1 as President of the National Council of Government for the year 1956-57.—(New York Times) **(Prev. rep. 14052 C.)**

A. ITALY - UNITED STATES - CANADA.—President Gronchi's Visit to Washington and Ottawa. - Speech to Joint Session of U.S. Congress.

President Gronchi of Italy, accompanied by the Italian Foreign Minister (Dr. Martino), arrived in Washington on Feb. 27 on a State visit to the United States. During his stay President Gronchi had discussions with President Eisenhower, a White House statement on Feb. 28 saying that they had explored "means of strengthening the solidarity" of NATO "in the political, economic, and psychological fields, as well as in the military field." Dr. Martino also had talks with Mr. Dulles, the U.S. Secretary of State

President Gronchi addressed a joint session of the U.S. Congress on Feb. 29.

After expressing the gratitude of the Italian people for American aid after the war, when "Italy had to rebuild her political, economic, and social life from the ashes of a painful past," President Gronchi continued: "Friendship between two nations, as between two persons, cannot be nurtured with sentiments and remembrances only. To keep it alive and vital it must draw nourishment from an intimate mutual knowledge and a steady co-operation of purpose and action. Consequently, I shall attempt to focus your attention on the present position of Italy, her major problems, and on the evaluation that we in Italy make of current international developments. . .

"It should be recognized that, despite patient and generous endeavours, the world is not more secure today than it was one or two years ago. We are going through a disquieting phase of confusion in ideas and political orientations, and consequently of greater potential danger. It is sufficient in this context to look at North Africa and the Middle East, and to listen to the rumblings which come from other parts of Asia. . .

"Two basic conceptions face each other throughout the greater part of the world Is there to be government for the people, or are the people to be subject to the government? Is there to be the Western brand of democracy—democracy through freedom—or the so-called people's democracy, that is, Marxism-Leninism?

"The latter ideology, while repugnant to our own as a moral and social conception, has in itself a great power of expansion, since it has the appearance of a political and social system capable of bringing to the under-privileged freedom from poverty and from their sense of inferiority. But this power of expansion must be viewed with alarm by people, such as us, of different traditions and background It makes co-existence difficult, since that ideology is embodied in a water-tight political and economic system, and consequently sustained by all the powers of a government—including not only the weapons of propaganda and the media of mass communications, but also more powerful and frightful weapons, conventional and nuclear. . .

"Against this ferment, which is spreading among the people of all continents, we can safeguard our ancient civilization through an effort that will enfold and display its fuller meaning. We have to make our democratic system more and more capable of accomplishing an effective reconciliation between the authority of the State and individual freedom. We have to reinforce the solidarity of the people who share those ideals and are striving to fulfil their ends. This solidarity exists among many Western nations, including the United States and Canada.

"The Atlantic Pact, as conceived and operated thus far, was appropriate and sufficient so long as there was the fear of imminent armed aggression, intensified by an unbalance of strength between the two sides It is an historical truth that the pact removed that danger and created the possibility of experimenting with solutions very different from those of the past However, it should be brought into line with contemporary realities now that the military unbalance has been reduced and there have been so many changes of situation in many parts of the world.

"Military co-operation remains very important, but it should be supplemented by new and imaginative forms of co-operation. This is necessary not only to move away from a climate of emergency measures and to enter into a phase characterized by more complex and permanent arrangements, but chiefly because we all realize that no person, nation, or group of nations can consider without anxiety and anguish the prospects of a world in which peace is based solely on military strength or on limited political alignments. Today, especially, when nuclear weapons have reached such a fearful stage of development . . it is essential that, while efficient military strength is maintained, every effort should be made to reduce the danger of war, so that gradually the employment of force may be no longer required. . .

"One might consider a better co-ordination of existing organizations—such as the O.E.E.C., the European Coal and Steel Community, the Western European Union, and the Council of Europe—so that new methods of a more organic co-operation can be extended from the political to the social and economic areas One might pay more attention to a better integrated functioning of NATO, involving a wider and more frequent use of the Atlantic Council. In this way we would accomplish the purpose of making more fruitful and timely the exchanges of views between the various members, giving to them a fuller sense of responsibility and at the same time a recognition of the value of their contribution to the common cause

"Within the framework of the NATO Pact one might consider the possibility of bringing life at last into the spirit of Article 2, which was meant to give to the military pact the wider and deeper connotation of a community of peoples. . .

"It is clear that the solution of these problems is not only an American responsibility. The European nations of Strasbourg [i.e. the members of the Council of Europe] must contribute their part by setting in motion the process of integration. Our old and restless Europe must find the way to spiritual and political unity, and must pool her resources, if she wishes to resume her mission of civilization in conformity with her traditions and history.

"I am convinced that, in the new competition of ideologies and economic assistance, we cannot hope for the success of our democratic conception unless this gives concrete and factual evidence of its superiority by bringing to bear the will-power and the means which, through appropriate action, can remove injustice and positions of inferiority within each national structure, and also internationally. Italy wishes to participate—within the limitations set by her resources and to the full extent of her commitments—in this work of redemption. . ."

After declaring that Italy would continue "to discharge faithfully" her commitments under the North Atlantic Treaty, President Gronchi continued: "I know that our financial effort has appeared to some observers as insufficient or lukewarm, or imperfectly planned at the technical level . . . Actually there is little justification for some of the comments which are made occasionally, and which would seem to throw an adverse light upon our determination to maintain our armed forces at the highest level of strength and efficiency consistent with our resources

"For instance, there is little meaning in a mere comparison of the percentages of gross national income allocated to defence in the various countries: 11 per cent in the U.S.A., 10 per cent in the U.K., and 8 per cent in France, against 5 per cent in Italy Such comparison does not take into account the differences in total and *per capita* national income in each country, and actually distorts the facts—as can be seen when one considers that the income of an American family, in real terms, represents the income of perhaps five or six Italian families Because of their low level of income, our people have to cut deeply into their resources, foregoing essential needs in order to bear the financial burden of defence

"But Italy's most significant and substantive contribution to the common cause is that of having strengthened her internal structure, of having restored democratic institutions and, with them, the authority of the State, of having overcome the disruptive economic and social effects that are typical of all post-war periods; and of having increased all-round production and improved the living conditions of the working classes, especially in Southern Italy. Owing to the depressed conditions of many segments of the Italian economy, this effort has been much more considerable than the one accomplished in order to strengthen our defensive military position within NATO. . .

"In the overall picture of a national economy, the important thing is not whether an individual item of accounting closes in the black or in the red, but whether the whole operation closes with a surplus or a deficit The ten-year period which has just ended for the Italian economy closed with a large 'plus' balance Consequently the [U.S.] Congress can tell the American people with satisfaction that the aid given to Italy was not an unproductive expenditure.

"It is not my intention to bother you with figures; yet a few of them may be quoted to substantiate my statements.

(1) Industrial production has increased five times since 1945, while agricultural production has doubled.

(2) *Percapita* income and consumption have increased by more than 50 per cent over 1947.

(3) The productive capacity of Italian industry has doubled since 1947, and defence production is now very close to the levels required by NATO

"All of us in Italy—the Government, the major parties, and all responsible persons—know that we have still a large pool of chronic unemployment We know that much has been done for Southern Italy, but that there is still an unfair and excessive gap in income per head between North and South. We know that we must complete the land reform undertaken with notable success. We are aware of the fact that our housing problem is still serious.

"I am not telling you this to ask your help or to suggest that you continue a policy of aid which we consider rightly closed by you. Italy can be compared to a working concern, well under way, which, however, has inadequate capital resources, falling short of what would be required to expand its physical plant and to improve its organization and its equipment Consequently, she does not hope for and does not ask sacrifices from others and free advantages for herself On the contrary, she is anxious to be considered in the same light as a customer of good moral and financial standing who gets in touch with a bank for loans at favourable terms, or who approaches a financial institution in order to enlist its interest in profitable and secure joint ventures or other enterprises

"In many countries, and probably also in yours, there are people who have a conventionalized picture of the Italian economy, based on stereotypes such as the hopeless lack of natural resources, the inability of the Government to collect taxes from its citizens and to manage its financial affairs competently, or the alleged deficiencies of its vocational education. This picture is either inaccurate or obsolete. . .

"Our natural resources are growing The discovery of large amounts of natural gas has permitted extensive practical applications to industry and science Very soon oil will become one of our most important productive resources. Taxes absorb a very high percentage of our national income, especially if one considers that the average income is very low. Vocational schools, which are being expanded and better organized, are increasing and improving the productivity of

our labour. . . . Finally, we have in Italy the essential pre-requisites for a steady and balanced development of our economy. The programme outlined by our lamented Minister, Ezio Vanoni, aimed at that purpose, and it remains valid today, with some amendments suggested by experience . . .

" Economic co-operation, in an age like ours, is not a burden or a mere act of generosity from one country to another. It is a policy consonant with the interest of each and all concerned. A poor country, or a country beset with difficulties and uncertainties, is a danger to all others on two counts—domestic weakness, and inability to protect itself against external dangers. No people, even the richest in resources and creative power, can be durably prosperous if there are many nations which are unhappy and restless because of the hardships of poverty and under-nourishment, the burden of injustice, and the uncertainty about their immediate future.

" The wonderful development of the United States, at which the world looks with admiration and astonishment, has become even greater since this country discarded its isolationist state of mind From that point on you have placed yourselves in the very heart of world events and have become the determining factor in world history. It is therefore in the name of a mutual interest that I appeal to you for closer and uninterrupted co-operation, carried out in a spirit of mutual trust and faith.

" Faith is the basic element which I would like to mention in closing Without faith there can be no meetings of the mind and no true co-operation. Italy can be trusted because of the capacity and willingness to work of her managers, technicians, and workers, and also because of her faithfulness to democratic ideals and her firm determination to defend and expand their accomplishments . . In spite of uncertainties which are natural—given the temperament of a Latin people—democratic stability in Italy is not in danger, and the democratic political parties, together with the great majority of public opinion, are fully conscious of their responsibility for maintaining and strengthening the institutions which the Italian people have freely accepted through their Constitution. . ."

A joint statement issued in Washington on March 1 said that it had been agreed that Italy no longer needed U.S. economic aid, and that her problem was rather the attraction of long-term foreign investments.

" The two Presidents," the statement declared, " reaffirmed their intention to direct their action toward the preservation of peace, freedom, and democracy. They reaffirmed that, while all possible efforts will continue to be made to achieve a reduction of armaments, the present situation does not allow any relaxation of the Western defence efforts. Concurrently, the President of the United States and the President of the Italian Republic agreed on the necessity of deepening and extending the solidarity among the members of the North Atlantic community through increased co-operation among them in all fields.

" They recognized that to the extent that it is possible to improve the Western-world economy, and to facilitate the development of the less advanced economies within it, the Atlantic community and indeed the entire free world will benefit. In particular, as far as Italy is concerned, they agreed that Italy no longer needs grants or economic aid The area that President Eisenhower and President Gronchi agreed should be increasingly explored within the framework of established Western economic co-operation is the possibility that, in addition to her own efforts, Italy could meet some of her problems by the extension of public and private long-term foreign investments. The problem facing Italy, it was agreed, is the improvement of the conditions which are necessary to her industrial development, particularly in the South, and further to attract private national and foreign investments."

On March 2 President Gronchi and Dr. Martino left Washington for an official visit to Ottawa, where Signor Gronchi addressed a joint session of the Canadian Parliament on March 5. During their stay in Ottawa, President Gronchi met the Canadian Governor-General, Mr. Massey, the Prime Minister, Mr. St. Laurent, and other members of the Canadian Government, whilst Dr. Martino had talks with Mr. Lester Pearson, the Secretary of External Affairs.

After returning to the U S.A. and visiting Detroit, San Francisco, and New York, President Gronchi and Dr. Martino left for Rome on March 14.—(New York Times - New York Herald Tribune - The Star, Montreal) **(Prev. rep. 14287 B.)**

A. BURMA - YUGOSLAVIA. — Economic Agreement.

Agreements were signed in Rangoon on March 7 covering (*a*) Yugoslav purchases of 50,000 tons of rice annually for five years from Burma, in exchange for consumer goods and equipment; (*b*) technical co-operation between the two countries; and (*c*) long-term co-operation in the development of power supplies. The technical co-operation will be effected by exchanging experts in general industry, mining, housing, communications, and agriculture, whilst there will also be co-operation in industrial development, utilization of power and natural resources, etc. The agreements implemented the protocol on Burmese-Yugoslav economic co-operation which had been signed by President Tito and U Nu during the latter's visit to Yugoslavia in June 1955.—(Tanjug Agency, Belgrade) **(Prev. rep. 14585 A.)**

B. SUDAN.—The Kosti Incident. - Death of 192 Arrested Farmers in Army Barracks. - Official Investigation.

Strong feeling was aroused in the Sudan by an incident at Kosti (in the Blue Nile Province, about 200 miles south of Khartoum), where 192 out of 281 tenant farmers who had been locked up in a single room of the local army barracks died of heat-stroke during the night of Feb. 21-22. The room in which they were confined measured only 40 ft. by 33 ft., and had its doors and windows locked.

During the previous week 700 of the 1,000 tenants of the privately-owned Guda Agricultural Scheme had put forward demands for an increase in their share of the profits from 40 to 60 per cent, for proper auditing of accounts, and for tenant participation in management committees and in drawing up sales policy, and had refused to pick or deliver their cotton until these demands were granted. In a clash on Feb. 18 the farmers had attacked the police, who dispersed them with tear-gas and then opened fire; three policemen and 18 farmers were killed and one policeman and 22 farmers wounded in the incident. The 281 men had been arrested on Feb. 21 on suspicion of active participation in the attack.

Dr. Ahmin el-Sayed (the Sudanese Minister of Health), the Police Commandant, and other senior officials immediately flew from Khartoum to Kosti to investigate the incident. As a result of an official inquiry, two police officers and a number of policemen were arrested on Feb. 25 by order of the Chief Justice on charges of causing the prisoners' deaths through negligence. Another 212 farmers who had been arrested had been released on Feb. 24.

The Government's resignation was demanded on Feb. 23 by the three leading Sudanese newspapers because of its failure to enforce the proper management of certain cotton schemes under the legislation controlling owner-tenant partnerships. A series of protest demonstrations took place in Khartoum from Feb. 23-26, including one by members of the Bar Association and another by members of the Communist-led Sudan Workers' Federation. The Prime Minister (Mr. Azhari) declared on Feb. 24, however, that he would not resign.
(Sudanese Ministry of Public Guidance, Khartoum - Times)

C. INDIA.—Death of Mr. Mavalankar. - New Speaker of House of the People.

Mr. G. V. Mavalankar, Speaker of the *Lok Sabha* (House of the People) died at Ahmedabad on Feb. 27.

Gamesh Vasudeo Mavalankar (67) was born at Baroda in 1888 and set up in practice as a lawyer at Ahmedabad in 1913 A follower of the late Mahatma Gandhi, he played an important part in the *Satyagraha* campaign for Indian independence, and was imprisoned on a number of occasions in the 'thirties and early 'forties.

After having been President of the Bombay Legislative Assembly from 1937-40, he was elected President of the Central Legislative Assembly in 1946, and Speaker of the Constituent Assembly on the achievement of Indian independence in 1947 In 1950, after India was declared a Republic, he became Speaker of the *Lok Sabha*.

Mr Mavalankar led the Indian parliamentary delegations to the Commonwealth parliamentary conferences in London in 1948 and Ottawa in 1952 He took an active part in the creation of a number of educational institutions in Ahmedabad, including the Gujerat University.

On March 8 the House of the People unanimously elected Mr. M. Ananthasayanam Ayyangar as its new Speaker. Mr. Ayyangar was hitherto Deputy Speaker of the *Lok Sabha*.

D. ITALY - ETHIOPIA. — Reparations Agreement.

After three years of negotiations in Rome and Addis Ababa, an agreement was signed in the Ethiopian capital on March 5 whereby Italy undertook to pay Ethiopia a sum equivalent to $16,300,000 (about £5,800,000) as reparations. The Ethiopian Foreign Ministry stated that the agreement would include the construction by Italy of a hydro-electric power station on the Awash River, south-east of Addis Ababa; that Italy would also supply ships, marine equipment, cotton textile factories, public works installations, etc.; and that all historical objects taken from Ethiopia during the Italian occupation would be returned. (Times - Corriere della Sera, Milan)

E. RHODESIA AND NYASALAND FEDERATION. — University College of Rhodesia and Nyasaland accepted into Special Relationship with London University.

The Principal of the University College of Rhodesia and Nyasaland (Dr. Walter Adams) announced on Feb. 10 that the Senate of the University of London had accepted the College into special relationship with the University, enabling degrees gained by students to be regarded as full London degrees.
(Federal Information Department, Salisbury)

A. UNITED STATES. — Release of Uranium for Peaceful Development of Atomic Energy. - Report of Citizens' Panel on Peaceful Applications of Atomic Energy. - Export of Radioactive Isotopes and Heavy Water.

President Eisenhower announced on Feb. 22 that he was authorizing the release of 40,000 kg. of uranium-235 " for research and development purposes and for fuelling nuclear power reactors," half of which would be made available in the United States and the other half to foreign countries. He pointed out that the 20,000 kg. for distribution abroad would be additional to the 200 kg. already made available for research reactors abroad, but emphasized that countries already producing U-235, as well as the Soviet Union and its satellites, would not be eligible to share in the distribution. The uranium to be released would help to start nuclear power programmes with a generating capacity of " several millions of electrical kilowatts," and the U.S. Atomic Energy Commission had stated that as additional projects were undertaken they would recommend that further uranium supplies should be made available. The President stressed that the distribution of uranium would be subject to " prudent safeguards against diversion of the material to non-peaceful purposes."

The chairman of the Atomic Energy Commission (Mr Lewis L. Strauss) said that the uranium would not all be distributed in the coming year or in any other single year, but would be " distributed over a period of years as needed, with smaller amounts in the early years." Mr Strauss said that the procedures which would govern the distribution of the 20,000 kg of uranium to foreign countries, as well as the charges for sale-or-lease, would be announced later However, based on the value of $25 per gram for enriched uranium announced at the Geneva Conference on the Peaceful Uses of Atomic Energy, the 40,000 kilograms now made available would have a value of $1,000,000,000.

The report was published on Jan. 31 of a special citizens' panel appointed by the Joint Congressional Committee on Atomic Energy in March 1955 to inquire into " the impact of the peaceful uses of atomic energy," and presided over by Mr. Robert McKinney, editor and publisher of the *Santa Fé New Mexican*. Some of its main recommendations are summarized below.

Electric Power. The Government should undertake the construction of one full-scale " demonstration " plant of each major reactor size and type, if private capital did not undertake this work Atomic power should be exploited as a source of electric power " at a rate consistent with sound technological, economic, and public policy considerations."

Medicine and Public Health. To ensure the maximum benefit from atomic energy developments for medical and health purposes : (i) all medical schools should have adequate facilities for training in atomic medicine techniques , (ii) additional research centres should be created with all appropriate equipment, including reactors ; (iii) low-cost atomic medical equipment should be designed, suitable to the needs of hospitals and medical clinics without atomic facilities , (iv) the radio-active compounds essential for research and therapy should be made available at reasonable prices.

Agriculture. The application of atomic energy in this field, whilst accentuating the problem of U S. farm surpluses, would help the undernourished peoples of the world to get more food. This problem should therefore be " fully explored " with " high priority," and the agencies concerned with helping foreign countries should draw up a programme to focus atomic research on the "undernourished" countries where it could most quickly be used.

Transport. Atomic propulsion of commercial ships was technically feasible, but economically competitive atomic ships were not yet in prospect Prospects for economically competitive atomic aircraft seemed unlikely until some experience with military prototypes had been acquired. Atomic locomotives could in all probability be built and operated successfully, but appeared to offer no economic advantages until substantial improvements had been made in reactor technology Atomic-powered cars, lorries, and buses were not technically feasible at present, and apparently would not be in the foreseeable future The report recommended that the A.E.C., the Maritime Administration, and the shipping and shipbuilding industries should work out a programme for exploring the economic feasibility of atomic-powered ships, and that the A.E.C should co-operate with any industrial efforts to develop locomotives.

Atomic Aid to Friendly Countries. The United States must take the lead in developing the peaceful uses of atomic energy, and to this end should provide adequate research facilities to friendly countries. The U.S.A should also convene a series of regional conferences of those countries having bilateral atomic agreements with her to consider the establishment of atomic electricity plants. In issuing invitations to such conferences, the U S. Government should announce that it was prepared to furnish nuclear fuels, provide the necessary technological assistance, and permit contracts for the installation of at least 1,000,000 kw. of atomic generating capacity outside the United States as soon as possible—preferably by 1960.

Security Restrictions. All reactor technology should be removed from the " restricted data " category, and specific military applications of such technology should be protected by the defence classification system so far as national security was involved The Joint Congressional Committee should re-examine the concept that atomic information was " born classified " [i e. that all new knowledge should be automatically labelled secret], as this concept was not compatible with the expeditious action required to permit the rapid development of peaceful uses of atomic energy , it should therefore be limited to the design, manufacture, or utilization of atomic weapons.

Basic Research. Basic research in universities should be given generous support, both in funds and facilities, and the A.E.C should be encouraged to place research and development contracts with universities and other private research establishments.

Training Facilities. Efforts to increase the output and improve the quality of scientists and engineers capable of contributing to the development of atomic energy for peace-time purposes should be encouraged. Both the A E C and private enterprise should support university research and graduate study, and the facilities of the national nuclear laboratories should be more widely available to support college training programmes Future research facilities should be designed, located, and operated in such a way that they could be of the greatest use to the greatest number of college and graduate students.

Ownership of Nuclear Materials. The Joint Congressional Committee should create statutory devices to ensure a continuing review of the present policy of Federal ownership of all special nuclear materials, in anticipation of the establishment of private ownership.

Priorities of Atomic Development. The Joint Congressional Committee should review the 1954 Atomic Energy Act with a view to providing clear guidance to the Atomic Energy Commission on the relative priorities of military and peaceful uses of atomic energy, and between various peaceful uses

Charges for Atomic Fuel Supplies. The Atomic Energy Commission should waive all charges for fuel used in experimental, medical, research and " demonstration " facilities, where such facilities were owned by non-profit-making institutions and used substantially for educational or medical purposes.

Mr. Strauss welcomed the report as " a sound, comprehensive and objective study," and said that the A.E.C. would " study and give thoughtful consideration " to its findings and recommendations.

Other recent atomic energy developments in the United States are summarized below :

Relaxation of Export Restrictions on Radio-isotopes. As from Feb. 10 the U S. Government relaxed the restrictions on the export of radio-isotopes for medical, agricultural, industrial, and scientific purposes, by permitting foreign users to apply direct to the commercial manufacturers instead of having to secure export licences through their Embassies in Washington. The new regulation listed 65 atomic by-product materials which could be licensed to U.S. users provided that no person possessed more than 10 " scheduled quantities " at any one time. A spokesman of the A.E C said that the export of isotopes to the Soviet-bloc countries would be permitted, except where the A.E.C thought that they " would be inimical to the defence and security of the United States "

Sale of Heavy Water. On March 13 the Atomic Energy Commission announced that it had approved the sale of 129 tons of heavy water to foreign countries at $28 a pound on condition, that all the supplies were used for peaceful application Britain would receive 50 tons, France 30 tons, India 21 tons, Australia 11 tons, Italy 10 tons, and Switzerland up to seven tons. It was stated that some of the heavy water had already been shipped to the recipient countries.

Semi-annual Report of A.E.C. The 19th semi-annual report of the A.E C., published on Jan. 30, spoke of " significant progress " in the development of atomic power plants of all kinds during the latter half of 1955. It confirmed that the aircraft nuclear propulsion programme had been accelerated, and said that the prospects for nuclear-powered flight continued to " show promise " ; some test work had already been started on a nuclear aircraft engine at the National Reactor Testing Station at Arco, Idaho The construction of a prototype engine for a large ship would start in the spring, as part of the programme for a series of atomic engines " which can be used singly or in multiple to power new naval ships from small submarines to the largest aircraft-carriers "

The report also stated that since 1951 the Agency had " greatly expanded " its research on harnessing the energy of the hydrogen bomb, but emphasized that " many years of intensive and theoretical effort " would be required before the first prototype of an operating thermo-nuclear machine was developed.

Further Bilateral Atomic Agreements. - Gifts of Atomic Libraries. The Austrian Cabinet authorized the Austrian Foreign Minister on Oct. 11 to sign a co-operation agreement with the United States on the peaceful uses of atomic energy, whilst the Iraqi Government accepted a similar U.S. offer on Oct 25. [For the U.S agreement with Western Germany see 14728 A.] During the latter half of 1955 and in January 1956 the U.S A. made gifts of libraries of non-secret atomic literature to Nationalist China, the Lebanon, Switzerland, Israel, the Netherlands, Burma, New Zealand, and India

Mr. Harold S. Vance, chairman of the executive committee of the Studebaker-Packard Corporation, was nominated by President Eisenhower on Oct. 10 as a member of the A.E.C. in succession to Mr. Joseph Campbell, who had been appointed to the office of Comptroller-General. Mr. Allen Whitfield had previously been nominated for the position (see 14214 A) but had subsequently asked that his nomination be withdrawn.

A. UNITED KINGDOM.—Monopolies and Restrictive Practices Commission. - Reports on Supply and Export of Tyres and Semi-Manufactures of Copper.

The reports of the Monopolies and Restrictive Practices Commission on the supply and export of pneumatic tyres and of certain semi-manufactures of copper and copper-based alloys were published on Dec. 9 and Sept. 5, 1955 respectively.

Report on Pneumatic Tyres.

The Commission's inquiry into this subject was carried out by a panel consisting of the chairman (Sir David Cairns, Q.C.) and eight other members appointed by him. The panel was unanimous in finding that the existing system, under which identical prices to the consumer were collectively maintained, was against the public interest, and a majority of the members considered that tyre manufacturers should cease to prescribe retail prices, and that the tyre trade register should be discontinued. The report is summarized below.

The Present Position.

The report estimated the annual turnover of the U.K. tyre industry at about £100,000,000, of which remoulds were responsible for about £8,000,000 Nearly half of this turnover was accounted for by the Dunlop group, whilst this group and the four next largest manufacturers (three of which were offshoots of U K or Continental groups) engrossed between them about 90 per cent of the U.K. tyre trade. All tyre manufacturers who were members of the Tyre Manufacturers' Conference (T.M C.) maintained, and collectively enforced, identical consumer prices in the replacement market and made price changes simultaneously, after discussion in the Conference. These identical prices were further protected by (*a*) an agreed scale of discounts to large users; (*b*) inspection panels to examine complaints about "giant" and "agricultural" tyres, (*c*) agreements not to make "private brand" or unbranded tyres, (*d*) the branding of sub-standard tyres to ensure that they were priced as remoulds. All T.M.C. members used a common formula in calculating the initial rate to be charged to transport operators for new mileage contracts, and all tendered at the same rate.

As regards the supply of tyres to vehicle manufacturers, T.M C. members confined "original equipment" terms for all tyres, except cycle tyres, to manufacturers on registers kept by the T.M.C For the "no restriction" register—containing the names of the largest vehicle manufacturers—no terms were laid down, but the net prices charged to consumers in this group, who bought in large quantities, were generally identical except for the secret allowances and discounts granted in certain cases The nature of the terms applicable to manufacturers on the other registers (apart from aircraft manufacturers) was laid down by the T.M.C., but actual prices were not prescribed.

In respect of exports, the report stated that before prices were charged, "Dunlop consult confidentially the principal foreign manufacturers and inform U K. exporters of any proposed price changes, expecting them to follow them. This they almost always do."

Turning to tyre distribution, the report stated that the Dunlop group had "secretly acquired" and owned the share capital of groups of distributing companies whose turnover represented about one-fifth of replacement sales, and also, by their control of certain retreading companies, controlled about one-third of the U.K. output of remoulds Identical prices were maintained in the replacement market by the manufacturers' conditions of sale or licence, and were enforced, where necessary, by collective boycott, the prices covering the whole replacement market for new tyres and about 80 per cent of the market for new tyres and remoulds taken together. The T.M.C. contended that the identical prices shown in different manufacturers' price lists did not result from any agreement between them, but from "the operation of competition in a market where a price leader (usually, but not always, Dunlop) sets the market level to which the rest must conform if they wish to sell their goods"; each manufacturer, it stressed, was free to decide for himself what prices he would fix for his tyres, and as he was bound by no agreement to conform to the rest, competition was not restricted Although the Commission accepted "the manufacturers' evidence that in this industry there exists no agreement binding manufacturers to charge common prices," the report pointed out that this did not mean that it could "treat the activities which result in identical prices as being free from restrictiveness," and said the question was "whether this restriction of competition is such as to be against the public interest."

The Commission rejected the industry's contention that the alternative to the present arrangement was "full blooded competition and price war, which in the long run would be almost as dangerous to consumers as to manufacturers." It said that this suggestion was "inconsistent with the argument that identical prices are due to price leadership rather than to the T.M C 's discussions," nor did it explain why identical prices were charged in the export trade, to which the T.M C. arrangements did not apply The report added in this connexion. "Dunlops themselves have indeed said that it would be 'an ill-founded suggestion wholly unsupported by the evidence if it were sought to infer that because, after consultation, prices are found to be identical, they would be different if there were no consultations.'" The Commission thought that this was "a much more realistic view of the situation likely to exist if the T M.C.'s discussions were abolished than the suggestion that it would lead to 'full blooded competition,' although the general level of prices might well be different."

The report stated that the following 14 U.K. companies were members of the T M.C. · *Manufacturing Companies*: Avon India Rubber Co, Ltd, British Tyre and Rubber Co, Ltd, Dunlop Rubber Co., Ltd, Firestone Tyre and Rubber Co., Ltd., Goodyear Tyre and Rubber Co (Great Britain) Ltd., Henley's Tyre and Rubber Co., Ltd., India Tyre and Rubber Co., Ltd, John Bull Rubber Co., Ltd., Michelin Tyre Co, Ltd., North British Rubber Co., Ltd., Pirelli Ltd. *Non-manufacturing Companies*. Bergougnan Tyre Co, Ltd., Davies Tyre Co., Ltd, Dominion Rubber Co Ltd

Conclusions and Recommendations.

The Commission's conclusions and proposals were as follows.

Price Discussions within the T.M.C. These strengthened the tendency inherent in the industry's structure to reduce price competition, and were against the public interest. The Commission proposed that the T M C. should cease to concern itself with price levels and changes, and that no other committee or organization should be set up or employed by tyre manufacturers for this purpose.

Identical Prices. The Commission as a whole considered that the system under which identical prices were maintained to the consumer was against the public interest.

A majority of the Commission considered that in the industry's special circumstances the only way to secure genuine price competition at the retail stage was to abolish retail price maintenance altogether, and recommended that no manufacturer should prescribe the resale price of his tyres. A minority dissented, however, from this recommendation, which they did not think justified by the industry's circumstances, proposing instead that the British Motor Trade Association should refrain from enforcing resale prices until the T M C arrangements described in (1) above had been abandoned.

Discounts. The system by which the T M C fixed the discounts to be allowed to users whose aggregated expenditure on car tyres and giant tyres in the replacement and mileage contract market exceeded £500 annually was, in present conditions, against the public interest

Tyre Inspection Panels. The T M.C tyre inspection panels, which considered claims for giant and agricultural tyres that had failed prematurely, were not against the public interest as operated at present

Unbranded Tyres. The industry's ban on the production of unbranded tyres promoted safety and was not against the public interest. The Commission considered, however, that the ban on the manufacture of "private brand" tyres for concerns outside the T.M.C was restrictive of competition, against the public interest. and should be discontinued

Trade Registers. The maintenance by the Tyre Trade Joint Committee of the Tyre Trade Register, and by the T M C. of the Agricultural and Earthmover Tyre Trade Register, the Aircraft Tyre Register and the Aircraft Constructors' Register, tended to create a privileged class of trader and was against the public interest. The majority of the Commission recommended that these registers should be discontinued, but stated that they would not object to the T M C maintaining a list of traders which could be circulated to manufacturers to observe or not as they pleased.

A minority of the Commission, however, dissented from the recommendation that the Tyre Trade Register should be abolished, regarding it as "conducive to safety and efficiency in distribution."

Cycle Tyres. For similar reasons the limitation of "best factor" terms for cycle tyres to traders on the lists maintained by the British Cycle and Motor Cycle Manufacturers and Traders' Union (the so-called "Coventry Union") was against the public interest and should be discontinued.

Advertising and Exhibition. The advertising restrictions accepted by all T.M C. members left "a wide enough field open to allow a reasonable degree of competition," and were not against the public interest

The supplemental agreement of the Society of Motor Manufacturers and Traders, requiring tyre makers to prohibit traders from exhibiting loose tyres at shows not approved under the society's bond, interfered with traders' legitimate interests and should be terminated.

Mileage Contracts. The arrangements under which tyre manufacturers operated mileage contracts involved some restriction of competition, but were not against the public interest.

Net Prices to Vehicle Manufacturers. Consultations between tyre manufacturers on the net prices to be charged to vehicle manufacturers on the "no restriction" register, although in a sense restrictive of competition, were not against the public interest.

The secret end-of-year allowance paid by the Dunlop Rubber Company to certain customers, and the secret monthly credits allowed by one smaller manufacturer, provided "a sort of clandestine competition which is better than none at all," and were therefore not against the public interest

Common Scale of Rebates. This scale, based on aggregate purchases, are allowed by conference members to nine of the largest commercial vehicle manufacturers in the "original equipment" market, did not attract business to one group of manufacturers at the expense of another, and was not rigid in form. It therefore did not operate against the public interest.

Special Terms. All the T.M.C.'s registers of vehicle and aircraft manufacturers who were entitled to special terms for tyres supplied as "original equipment" were against the public interest The Commission recommended that they should be abolished and that the prescribing of various classes of "original equipment" terms should cease It did not, however, object to lists of reputable vehicle and aircraft manufacturers being circulated to tyre manufacturers as long as they were under no obligation to observe the lists.

"Dunlop Group" Practices. The Commission found that the arrangement by which the Dunlop group fixed export prices for all T.M.C. members after confidential discussions with their foreign competitors was not against the public interest.

The interests of the Dunlop group in the distribution field and the methods by which they had been conducted had not tended to restrict competition and were not against the public interest.

The dominant interest of the Dunlop group in the retreading industry had not in itself restricted competition, but their secret ownership of two retreading concerns—the Regent Tyre and Rubber Company Ltd. and Tyres (Scotland) Production Ltd.—hampered the efficient organization of their retreading businesses as a whole. For this reason the secrecy of these arrangements was against the public interest.

The confidential allowances paid by the Dunlop group to certain distributors and motor dealers were not against the public interest.

The Commission found that, apart from the specific matters dealt with above, the Dunlop group had not used their dominant position in the tyre industry to the detriment of the public interest.

Retread Manufacturers' Association. The Commission found that the arrangements made by this association promoted safety and were not against the public interest.

Remoulds. The Commission also found that the discussions within the T.M.C. resulting in identical prices for retreading materials and members' remoulds were not against the public interest.

Enforcement of Recommendations. In every case the practices condemned "could and should be brought to an end by the parties concerned." Failing this, the report recommended that, with the exception of the conclusions concerning individual control of tyre prices (which would also involve patent licences), Orders ending the practices objected to should be made under the Monopolies and Restrictive Practices Act.

The report was signed by Sir David Cairns, Professor G. C. Allen, Mr. J. Archdale, Sir Thomas Barnes, Mr. W. G. Cullen, Mr. C. M. Gallie, Mr. C. H. P. Gifford, Professor A. L. Goodhart, and Mr. G. Stott.

Mr. Archdale, Sir Thomas Barnes, Mr. Cullen, and Mr. Stott, however, signed a "note of dissent" explaining why they did not agree with the recommendations (*a*) that tyre manufacturers should cease to prescribe resale prices; (*b*) that the tyre trade register should be discontinued. They felt that the service to users was likely to be more efficient if the manufacturers were at liberty to supply tyres only through registered traders, and that "the fact that every supplier is equipped to render adequate service for fitting and testing tyres must make some contribution to road safety, particularly with the growing use of tubeless tyres." They stressed, however, that they would welcome "closer supervision by the T.M.C. of those on the register."

Report on Semi-Manufactures of Copper.

The Monopolies and Restrictive Practices Commission's report on the supply and export of certain semi-manufactures of copper and copper-based alloys covered six main wrought forms of copper and copper alloys—plate, sheet, strip, rods, wires, and tubes—supplied to various industries for further fabrication or incorporation in other products. The Commission found that the fixing of common minimum prices by trade associations was against the public interest, and recommended the abrogation of price-fixing arrangements.

The Present Position.

The report stated that about 140 manufacturers were engaged in the industry under review, and that about 70 (accounting for more than 75 per cent of the total production) belonged to one or more of 12 trade associations. Most of these associations were, in turn, members of the British Non-Ferrous Metals Federation. The principal arrangements found by the Commission to restrict competition in the home market were minimum price agreements and supporting arrangements, including the observance of uniform terms and conditions of trading and the granting of aggregated quantity rebates or "loyalty discounts." In the export market, the British Non-Ferrous Metals Federation and two Export Groups were parties to the "Lausanne Agreement," an international agreement (concluded in 1946) requiring signatory manufacturers to observe each other's home trade prices in each other's domestic markets and also to observe (with exceptions for certain products) an agreed price list in most other markets. There were also agreements requiring members of the federated associations and the export groups to charge minimum prices for exports.

Conclusions and Recommendations.

The Commission's principal conclusions and recommendations are summarized below.

Minimum Price Arrangements. The effect of these was to keep the level of costs and prices higher than it would be under price competition. The arrangements were therefore against the common interest and should be abandoned.

Other Common Trading Arrangements. Many of these were ancillary to the common price system and should be discontinued.

"Loyalty" and "Aggregated Quantity" Rebates. Both of these impeded access to the market by independent producers and should be brought to an end.

Export Price Arrangements. Since the industry's contribution to the balance-of-payments situation arose mainly from its position as supplier to a variety of export industries, the international arrangements amongst producers should be considered from the point of view of their effect on these export industries. The intention and effect of the international arrangements had been to keep up prices, and the effect on the British export industries supplied outweighed any advantage gained for direct U.K. exports of semi-manufactures. British manufacturers should therefore withdraw from the arrangements.

As regards agreements between British manufacturers themselves, there was no clear evidence of their effect on minimum export prices, but, unless these arrangements were abandoned as a result of the abolition of common minimum prices in the home market, their effect should be further examined after two to three years.

Common Prices and Collusive Tendering.

Mr. Thorneycroft, President of the Board of Trade, announced on Nov. 2, 1955, that the terms of reference of the Commission's inquiry into common prices and collusive tendering would be as follows:

"To report on the general effect on the public interest of agreements restricting or limiting the freedom of the parties in respect of (*a*) the prices at which they are to supply, offer to supply, or tender for the supply of goods in the United Kingdom; (*b*) the prices at which they are to supply, offer to supply, or tender for the application of any process to goods."

The Monopolies Commission announced on Nov. 15 that the group nominated by Sir David Cairns to investigate this practice would consist of Sir David Cairns (chairman), Professor G. C. Allen, Sir Thomas Barnes, Mr. W. G. Cullen, Mr. Brian Davidson, Mr. C. N. Gallie, Mr. C. H. P. Gifford, Mr. W. L. Heywood, Mr. I. C. Hill, and Mr. C. E. Wrangham.

A. POLAND. — Death of M. Bierut. - M. Ochab appointed First Secretary of Polish Workers' Party.

M. Boleslaw Bierut (63), formerly President of the Polish People's Republic, and since 1954 First Secretary of the Polish Workers' (Communist) Party, died on March 12 in Moscow, where he was attending the 20th congress of the Soviet Communist Party.

Boleslaw Bierut, the son of a farm labourer, was born at Leczno, near Lublin, and started life as a printing worker. A founder-member of the Polish Communist Party, he was active in party activities from an early age, worked in the Comintern offices in Moscow during the late 'twenties, and returned to Poland in 1932 as head of the local party organization in the Lodz area. He was arrested in 1933 and sentenced to seven years' imprisonment for illegal activities, but was released after having served five years and subsequently took refuge in Moscow.

During the war he returned to Poland to organize the underground Communist movement, and in 1943 formed the Polish National Council (of which he ultimately became chairman) together with Wladyslaw Gomulka, General Spychalski, and General Rola-Zymierski, all of whom later fell into disgrace. He co-operated closely with Marshal Stalin in establishing the Polish Committee of National Liberation (subsequently known as the "Lublin Government") in Moscow, and played an important part in the negotiations which led to the recognition of that Government by the Western Powers.

M. Bierut was elected President of the Polish People's Republic in 1947, after having served for several years as chairman of the Polish National Council. He remained President of Poland until November 1952, when the Presidential office was replaced by a State Council. M. Bierut then became Prime Minister, but relinquished that post in 1954 to become First Secretary of the Polish Workers' Party.

The appointment of M. Edward Ochab as First Secretary of the Polish Workers' Party in succession to M. Bierut was announced in Warsaw on March 21. M. Ochab, one of the leading Polish Communists, had been a member of the central committee and secretariat of the Polish Workers' Party since 1954, and had formerly been chairman of the Polish trade union organization (1948-49) and Minister for Home Affairs (1945-46). He was appointed director of political education in the Polish Army in 1950, with the rank of general.

B. NORWAY. — Education. - Compulsory English in Elementary Schools.

The Norwegian Minister of Education decided in January that English should be taught as a compulsory subject in all elementary schools in Norway, instead of as a voluntary subject as hitherto. The decision was taken because of the increasing importance of the English language.

A. DENMARK - SOVIET UNION. — Danish Prime Minister's Visit to Moscow. - Agreement on Resumption of Trade Negotiations, Safety of Shipping in the Baltic, and Cultural Exchanges. - The Tanker Question.

The Danish Prime Minister and Foreign Minister, Hr. H. C. Hansen, accompanied by the Minister of Education, Hr. Julius Bomholt, visited Moscow from March 2-6 as guests of the Soviet Government. During their visit they had a number of discussions with Marshal Bulganin, M. Khrushchov, M. Mikoyan, and other Soviet leaders.

A joint communiqué issued on March 6 stated that the talks which had been conducted in "an atmosphere of mutual friendly understanding," had dealt with "questions of importance to Danish-Soviet relations." Both sides had agreed that there was no problem outstanding between the two countries which prevented friendly relations, and both had expressed the wish that the good relations existing between Denmark and the U.S.S.R. should be further developed.

(1) As regards economic relations, both countries were agreed that trade constituted one of the most important means of bringing about mutual understanding between peoples They had accordingly agreed that trade negotiations should start in Copenhagen as soon as possible with the aim of concluding a two-year trade agreement. The Danish Ministers had expressed their willingness to supply a tanker to the Soviet Union under this agreement, or, if this should be impossible, two fast freighters of 10,000 tons The final decision would be taken after the Prime Minister of Denmark had returned to Copenhagen.

(2) A Danish-Soviet agreement on the safety of shipping in the Baltic had been concluded. It provided for speedy help in the case of shipping in distress, as well as mutual assistance in passing on messages about ships and aircraft which were either missing or believed to be in distress

(3) Both sides were agreed that Danish-Soviet cultural relations had developed favourably in recent years, and there was agreement on the desirability of intensified co-operation in the fields of science, the arts, and education. In this connexion M Mikhailov (the Soviet Minister of Culture) and Hr. Bomholt had agreed on exchanges of Danish and Soviet professors and students, and on efforts to bring about a more comprehensive co-operation in scientific matters. The two sides had also agreed to expand tourist traffic between Denmark and the Soviet Union.

(4) It had also been agreed to begin negotiations in Copenhagen in the near future for the settlement of mutual compensation claims in connexion with the incorporation of the former Baltic Republics in the Soviet Union.

(5) The Danish Prime Minister had raised the question of Soviet exit permits for Danish nationals living in the Soviet Union who wished to return to Denmark. The Soviet Government had expressed their willingness to grant such permits, provided the persons concerned expressed the wish to leave the Soviet Union.

(6) The general question as to how closer contacts between the two countries could be brought about had also been discussed, and there had been agreement on the importance of developing personal contacts of leaders of the two countries through mutual visits. There had also been agreement on the importance of reciprocal visits by parliamentary delegations, so as to increase mutual understanding between Denmark and the Soviet Union. Both sides were agreed on the importance of closer contacts between all countries as a means of fostering international understanding.

(7) There had been full agreement between both sides that relations between countries should rest on the basis of non-interference in each other's internal affairs, respect for each other's sovereignty, non-aggression, and peaceful co-operation in conformity with the principles of the United Nations. Both sides had expressed their determination to find ways of settling such urgent international problems as the creation of effective security for all peoples the ending of the armaments race, and the achievement of the necessary confidence in international relations.

(8) The communiqué concluded by saying that, irrespective of existing differences of opinion, the discussions on general political questions had led to greater understanding of each other's views and would help to foster good relations between Denmark and the Soviet Union. In this connexion both sides had expressed their wish to contribute, to the best of their ability, to a relaxation of international tension and towards peaceful international co-operation.

In a press interview in Moscow on the same date, Hr. Hansen stressed the importance of a solution of the "tanker question" [see footnote below], which had hitherto prevented the conclusion of any new trade agreement between the Soviet Union and Denmark.

Hr. Hansen said that he had made it clear that Denmark would hardly be in a position to meet the Soviet Union's wishes for the supply of further tankers, and for this reason had suggested the delivery of two fast freighters as an alternative. In reply to questions he said that neither the question of American bases in Greenland nor the question of the stationing of foreign troops in Denmark had been raised during the talks by the Soviet Ministers In drafting the joint statement, the Russian side had suggested the inclusion of a clause pledging Denmark not to permit foreign troops to use bases on her soil, but the Danish side had been unable to agree to the insertion of such a clause.

Hr. Hansen stressed in this connexion that it had been affirmed in the Danish Parliament that there was no intention on the part of the Government to permit foreign troops to establish bases in Denmark, but that he considered this unilateral declaration to be quite different from a formal pledge given to the Soviet Union (see 13268 B, 12777 A).

After visiting Kiev, Stalingrad, and Leningrad, Hr. Hansen and Hr. Bomholt returned to Copenhagen on March 14.
(Berlingske Tidende, Copenhagen - Politiken, Copenhagen)
(Prev. rep. Norwegian Ministerial Visit, 14586 C.)

Note. The difficulties over Danish deliveries of tankers to the Soviet Union arose from the fact that Denmark would thereby have violated the controls over "strategic" exports imposed by NATO. The earlier supply of tankers to the Soviet Union had given rise to U.S protests (see 12354 A), but under U.S. Presidential orders Denmark had nevertheless been exempted from the provisions of the "Battle Act," thus retaining her eligibility for U S. aid (see 13542 A). Soviet insistence on the supply of two further tankers by Denmark led to the breakdown of trade negotiations between the two countries in July 1954, the U S.S R. maintaining that Denmark's refusal to build more tankers for Soviet account constituted an infringement of the most-favoured-nation clause in the Danish-Soviet commercial treaty of 1946 Although the Danish negotiators argued that this treaty contained an exemption clause, the Russians refused to recognize the validity of its application in this instance It was pointed out in the Danish Press, however, that since then the Soviet Union had concluded trade agreements with other NATO countries without insisting on the supply of tankers, and had thereby strengthened the Danish unwillingness to infringe NATO's strategic export controls —(Berlingske Tidende, Copenhagen - Politiken, Copenhagen)

B. FRANCE. — Changes in High Command.

The following changes in the French High Command were approved by the French Cabinet on Feb. 29. (*a*) General Paul-Henri Ely as Chief of General Staff of the Armed Forces (*chef d'état-major général des forces armées*); (*b*) General Clément Blanc as Inspector-General of the Army; (*c*) General Piatte as Chief of Staff of the Army.

General Ely succeeded General Augustin Guillaume, who had resigned on Feb. 28, whilst Generals Blanc and Piatte took over the functions of General André Zeller, who had combined the posts of Chief of Staff and Inspector-General of the Army.

General Ely (58) had been French representative on the Standing Group of NATO in Washington from 1949 to 1953 before taking over the newly-created post of Chief of General Staff of the Armed Forces. After going to Washington early in 1954 to obtain further U.S. arms supplies for the French forces in Indo-China, especially for the defenders of Dien Bien Phu, he was appointed in June 1954 as French C.-in-C and Commissioner-General in Indo-China. Lately he had been charged with an investigation into the Dien Bien Phu disaster.

General Blanc (58), who played an important part in organizing the Free French forces in North Africa during the war, was appointed director of the Institute of Higher Defence Studies in June 1955. General Piatte (56) had held high commands in the French Army in recent years.

It was reported in the French Press that the resignation of General Guillaume (a former Resident-General in Morocco) had been due to his dissatisfaction with the Government's willingness to negotiate with the Algerian nationalists and its reluctance to launch an immediate full-scale offensive against the Algerian rebels. General Zeller had resigned on the ground that the changes in the defence policy of the various French Governments did not allow him to carry out his functions efficiently.—(Le Monde, Paris) **(Prev. rep. Generals Ely, Guillaume, 13607 A; Generals Zeller, Blanc, 14359 B.)**

C. BULGARIA. — Soviet Economic Aid.

An economic agreement between Bulgaria and the Soviet Union was signed in Moscow on Feb. 3 by Marshal Bulganin and M. Chervenkov, the Soviet and Bulgarian Prime Ministers. It provided (*a*) that the Soviet Union would supply to Bulgaria on credit during the years 1956-59 tractors, combines, excavators, and other agricultural machinery, as well as pedigree livestock, to the value of 300,000,000 roubles; (*b*) that the Soviet Union would also give technical aid for the construction in Bulgaria of a nitrate fertilizer plant with an annual capacity of 200,000 - 220,000 tons of ammonia and saltpetre, and of a sulphate plant with an initial capacity of 100,000 tons per annum; (*c*) that the U.S.S.R. would grant Bulgaria a credit of 70,000,000 roubles to cover payment for the installations, the work of planning, and other forms of technical assistance in connexion with the construction of these plants; (*d*) that all the credits would be granted for a 10-year period, would bear two per cent interest, and would be repaid by Bulgaria in the form of goods, including agricultural products.
(Bulgarian Legation, London)

MARCH 24—31, 1956

A. PAKISTAN.—Adoption of Republican Constitution. - Continued Pakistani Membership of British Commonwealth. - Major-General Mirza elected Provisional President. - Inauguration of Islamic Republic of Pakistan.

The Pakistan Constituent Assembly adopted on Feb. 29 the Constitution Bill, under which Pakistan became an Islamic Republic, and on March 2 decided that Pakistan should remain within the British Commonwealth. Major-General Iskander Mirza, the Governor-General, was elected provisional President of the Islamic Republic of Pakistan on March 5.

The Constitution, which consisted of 234 Articles, was divided into 13 parts, of which Part I dealt with the Republic and its territories, Part II with fundamental rights, Part III with directive principles of State policy, Part IV with the Federation. Part V with the Provinces, Part VI with the relations between the Federation and the Provinces, Part VII with property, contracts, and suits, Part VIII with elections, Part IX with the judiciary, and Part X with the Services of Pakistan. Part XI dealt with emergency provisions, Part XII with general provisions, and Part XIII with temporary and transitional provisions. There were also six Schedules, the first of which dealt with the election of the President, the second with oaths and affirmations, the third with the powers of the Supreme Court and the remuneration of judges, the fourth with the remuneration and privileges of the President, the Speaker and Deputy Speaker of the National Assembly and the Provincial Assemblies, members of the National Assembly and the Provincial Assemblies, and Provincial Governors; the fifth with the lists of subjects for which either the Federation or the Provinces, or both concurrently, would be competent to legislate; and the sixth with the election of the first President of the Republic.

The main provisions of the Constitution, which was published in draft form on Jan. 8 and underwent considerable revision in the Assembly, are summarized below.

The Republic and its Territories. Article 1 stated that "Pakistan shall be a Federal Republic, to be known as the Islamic Republic of Pakistan," its territories comprising (*a*) the Provinces of East Pakistan and West Pakistan, (*b*) the States which had already acceded or might accede to Pakistan, (*c*) federally-administered territories not included in either East or West Pakistan, and (*d*) such other territories as might be included in Pakistan.

It was also laid down that the President might, by Order, make provision for the government and administration of the territories specified under (*b*), (*c*), and (*d*) until otherwise provided for by legislation

Fundamental Rights. All citizens would be equal before the law, and no person might be deprived of life or liberty save in accordance with the law. No person might be punished for an act which was not punishable by law when the act was done, or subjected to a punishment greater than that prescribed by law for an offence when the offence was committed Any person arrested (except enemy aliens or persons arrested under a law providing for preventive detention) must be informed of the grounds for his arrest; allowed to consult and be defended by a lawyer of his own choice; and brought within 24 hours before the nearest magistrate, whose authority would be required for his further detention No law providing for preventive detention might authorize the detention of a person for longer than three months, except on the recommendation of the appropriate Advisory Board Any person detained under such a law must be informed of the reasons for his detention, and permitted to appeal against it

Every citizen would have the right to freedom of speech and expression, subject to any reasonable restrictions imposed by law in the interests of national security, friendly relations with foreign States, public order, decency, or morality, or in relation to contempt of court, defamation, or incitement to an offence. Every citizen would have the right to assemble peacefully without arms, and to form associations or unions, subject to any reasonable restrictions imposed by law in the interests of morality or public order

Every citizen would have the right to move freely throughout Pakistan and to settle in any area, to acquire, hold, and dispose of property; to enter any lawful profession or occupation for which he possessed the necessary qualifications, and to conduct any lawful trade or business No person might be deprived of his property save in accordance with the law, and no property might be compulsorily acquired by the State or other authorities save by the authority of a law providing for compensation Slavery and all forms of forced labour were prohibited, although the State might require compulsory service for public purposes.

Subject to law, public order, and morality, every citizen would have the right to profess, practise, and propagate any religion, and every religious denomination and sect would possess the right to establish, maintain, and manage its religious and educational institutions. No student in educational institutions would be required to receive instruction in, or to take part in the ceremonies of, any religion other than his own, and no person might be compelled to pay any special tax the proceeds of which were to be spent for the propagation or maintenance of any religion other than his own.

In the making of public appointments, and in respect of access to places of public resort, there would be no discrimination against any citizen on the grounds of race, religion, caste, sex, or place of birth. The practice of untouchability in any form was forbidden, and would be declared a legal offence.

Any community having a distinct language, script, or culture would have the right to preserve it.

No law inconsistent with these rights might be passed, and any existing law inconsistent with them was declared void. The Supreme Court and the High Courts of West and East Pakistan were empowered to issue writs for the enforcement of these rights

Directive Principles of State Policy. Pakistan would endeavour to strengthen the bonds of unity among Moslem countries, promote international peace and security, foster goodwill and friendly relations among all nations, and encourage the settlement of international disputes by peaceful means.

No law repugnant to the injunctions of Islam as laid down in the Koran and Sunnah (traditional teachings of the Prophet) might be enacted; this clause, however, would remain inoperative until Parliament had received the recommendations of a commission to be set up to report on the codification of Islamic injunctions Gambling, prostitution, and the consumption of alcoholic drinks and other intoxicants, except for medicinal purposes, would be prohibited The State would take steps to enable the Moslems of Pakistan, individually and collectively, to order their lives in accordance with the Koran and Sunnah, and would make efforts to promote unity among Moslems and ensure observance of Islamic moral standards. These provisions, however, would not affect the personal laws of non-Moslems and their status as citizens.

The State would endeavour to promote "with special care" the educational and economic interests of the Special Areas, the backward classes, and the Scheduled Castes; to remove illiteracy, and provide free and compulsory primary education within the minimum possible period; to make provision for securing "just and humane" conditions of work, for the protection of children and women against employment of a kind unsuitable to their age or sex, and for maternity benefits for women in employment; and to enable the people of different areas, through education, training, and industrial development, to participate fully in all forms of national activities, including employment in the public services

The State would also endeavour to raise the standard of living, irrespective of caste, creed, or race, to prevent the concentration of wealth and the means of production and distribution in the hands of a few; to provide facilities for work and an adequate livelihood for all, to ensure social security by means of compulsory social insurance, and to furnish the basic necessities of life for citizens prevented from earning their livelihood by sickness or unemployment. A National Economic Commission—consisting of five members from West Pakistan and five from East Pakistan, with the Prime Minister as *ex officio* chairman—would formulate commercial, financial, and economic policies to ensure a uniform development of industry and agriculture in all areas

Steps would be taken to achieve parity in the representation of East and West Pakistan in all spheres of Federal administration, and to enable people from all parts of the country to participate in the Defence Services.

The independence of the judiciary was guaranteed.

The President. The President of the Republic, who must be over 40 years of age and a Moslem, would be elected for a five-year term by an electoral college consisting of members of the Central and Provincial Legislatures He would have supreme command of the armed forces, would be empowered to dissolve the National Assembly upon the Prime Minister's advice, and would appoint the Election Commission and the Public Service Commission No person might serve as President for more than two terms The President might be impeached by the Assembly on a charge of violation of the Constitution or of gross misconduct; while a motion of impeachment was under consideration he might not dissolve the Assembly or dismiss the Prime Minister.

If the office of President fell vacant, or if the President was absent from Pakistan or unable to discharge his duties owing to illness or any other cause, the Speaker of the National Assembly would act as Head of State pending the election of a new President or the resumption of duties by the existing President.

Pending the holding of the first general elections a provisional President would be elected by the Constituent Assembly.

The Cabinet. The President would, "in his discretion," appoint from amongst the members of the National Assembly a Prime Minister who, in his opinion, was "most likely to command" the confidence of a majority of the Assembly members Other Ministers, Ministers of State, and Deputy Ministers would be appointed and removed from office by the President, but only members of the National Assembly could become Ministers of State or Deputy Ministers. The appointment of Cabinet Ministers from outside the Assembly would thus be possible, but they would have to seek a seat in the Assembly within six months, since any Minister who was not a member of the National Assembly for a period of six consecutive months would cease to hold office The Cabinet, together with the Ministers of State, would be collectively responsible to the National Assembly. If the President was satisfied that the Prime Minister did not command the confidence of a majority, he could dismiss him

The National Assembly. The National Assembly would consist of 300 members equally divided between West and East Pakistan, and would be elected for five years on a basis of adult suffrage. For the first 10 years 10 additional seats in the National Assembly would

be reserved for women—five elected by women's territorial constituencies in West Pakistan and five by similar constituencies in East Pakistan. The Constituent Assembly would decide later whether elections should be by communal or joint electorates. An independent commission, members of which might not be reappointed for more than one term, would be appointed by the President to ensure fair and impartial elections. The total number of members of the National Assembly might be altered by Act of Parliament, provided that equality of representation between East and West Pakistan was preserved.

The Assembly would choose its Speaker and Deputy Speaker; frame its own rules of procedure; and take its decisions by a majority of the members present and voting (unless otherwise laid down in the Constitution), the Speaker or Deputy Speaker having a casting vote in the event of a tie The validity of any proceedings in the National Assembly could not be questioned in any court Members of the Assembly would have immunity from court proceedings in respect of any statements made or votes cast in the Assembly or its committees. The privileges of the Assembly and of its members would be determined by Act of Parliament

Legislative and Special Powers of the President. When a Bill had been passed by the National Assembly, the President could within 90 days either (*a*) assent to the Bill; (*b*) withhold his assent; or (*c*)—in the case of a Bill other than a money Bill—return it to the Assembly with the request that the Bill, or any provision thereof, should be reconsidered, and any amendment specified by him be taken into consideration. If in cases (*b*) and (*c*) the Assembly again passed the Bill, with or without amendment, by a two-thirds majority of the members present and voting, the President must assent to the legislation (Article 57).

Article 69 provided: "If at any time, except when the National Assembly is in session, the President is satisfied that circumstances exist which render immediate action necessary, he may make and promulgate such Ordinances as the circumstances appear to him to require, and any Ordinance so made shall have the like force of law as an Act of Parliament." The President's powers in this respect would, however, be subject to the same restrictions as the power of Parliament to make laws, and any Ordinance made by him under this clause might be controlled or superseded by an Act of Parliament. Such an Ordinance must be laid before the National Assembly, and it would cease to operate after six weeks from the Assembly's next meeting, or if the Assembly passed a resolution expressly disapproving it.

The President could also, at any time when the National Assembly was dissolved, make and promulgate an Ordinance authorizing Federal expenditure if he was satisfied that circumstances existed which rendered such action necessary Any such Ordinance would have to be laid before the new National Assembly as soon as possible, subject to the usual procedure laid down for Finance Bills.

Finance Legislation. No tax would be levied for the purposes of the Federation except by or under the authority of an Act of Parliament All revenues received by the Federal Government, as well as the proceeds of loans or loan repayments, would be credited to the Federal Consolidated Fund, whilst all other public monies received by or on behalf of the Federal Government would be credited to the Public Account of the Federation

In respect of every financial year the President would "cause to be laid" before the National Assembly a statement of estimated Federal receipts and expenditure. The Assembly would have power to assent, reduce, or refuse to assent to any demands for grants, with the proviso, however, that expenditure charged upon the Federal Consolidated Fund might be discussed but would not be subject to the Assembly's vote. Expenditure of this kind was defined as including, *inter alia*, remuneration and expenses of the President, the judges of the Supreme Court, the members of the Federal Public Services Commission, the Comptroller and Auditor-General, the Election Commissioners and regional Election Commissioners, the Speaker and Deputy Speaker of the National Assembly, and the members of the Delimitation Commission, as well as the administrative expenses connected with these offices. It would also include all charges on the Federal debt.

The Provinces. Each Province would have a Governor who would be appointed or dismissed by the President. Any citizen of Pakistan aged 40 years or over would be eligible, with the proviso that no-one could hold a Governorship and be a member of the National or a Provincial Assembly at the same time. Each Province would have a Cabinet of Ministers, headed by a Chief Minister, whose functions and responsibility to the Provincial Assembly would correspond to those of the Federal Government to the National Assembly.

Each Provincial Assembly would have 300 members, plus another 10 seats reserved for women members for a 10-year period. The National Assembly might, by legislation, alter the total membership of the Provincial Assemblies, provided that the number of members of the Assemblies for East and West Pakistan would always remain equal. Until Oct. 14, 1965, the distribution of members in the Provincial Assembly of West Pakistan would be subject to the proviso that the former Province of Punjab would not have more than two-fifths of the total membership.

The Governor would have the same special legislative powers with regard to provincial legislation as those conferred on the President with regard to Federal Legislation.

Division of Powers. The Central Government would protect the Provinces against external aggression. The allocation of responsibilities between the Central and Provincial Governments would conform to the policy of provincial autonomy, whilst vesting in the Central Government responsibility for matters of national interest. Railways would become a provincial responsibility. The fifth Schedule accordingly divided the principal subjects as follows:

Federal List.

(1) Defence and defence forces, defence industries; nuclear energy and mineral resources necessary for its production; armaments manufacture.

(2) Foreign affairs, including diplomatic, consular and trade representation, international organizations, decisions on war and peace, and the making and implementation of treaties, conventions, declarations, and other agreements with foreign countries; foreign and extra-territorial jurisdiction; offences against the laws of nations, Admiralty jurisdiction; piracy and offences committed on the high seas and in the air; admission into and emigration and expulsion from Pakistan, extradition, passports, visas, pilgrimages abroad and by foreigners to places in Pakistan, quarantine.

(3) Citizenship, naturalization, and aliens

(4) Inter-provincial and foreign trade and Customs matters.

(5) Currency, foreign exchange, the State Bank of Pakistan, and banking (excluding co-operative banking) not confined to one Province

(6) Federal public debt and foreign loans

(7) Stock Exchanges and futures markets not confined to one Province

(8) Insurance and Company Law for companies whose activities were not confined to one Province

(9) Copyright, patents, designs, inventions, trade and merchandise marks, and export standards

(10) Standards of weight and measure.

(11) Navigation and shipping, including coastal shipping unless confined to one Province, airways, aerodromes, aircraft and air navigation, lighthouses, etc

(12) Major ports, fishing, and fisheries outside territorial waters.

(13) Posts and telecommunications, including broadcasting and television

(14) Industries owned wholly or in part by the Federation or a federally-owned corporation.

(15) Mineral oil and natural gas

(16) Constitution, organization, jurisdiction and powers of the Supreme Court

(17) Elections to the National Assembly, the Provincial Assemblies, and to the office of President, and the Election Commission.

(18) Central intelligence and investigating organization, preventive detention for reasons connected with defence, foreign affairs, or the security of Pakistan.

(19) Census affairs, the Survey of Pakistan, geological surveys, and meteorological organizations

(20) Federal property and its revenues

(21) Federal agencies and institutions for the promotion of special studies and research, federally-financed libraries and museums

(22) Federal Services, the Federal Public Service Commission, and Federal pensions.

(23) Remuneration of the President, of members of the Federal Government, of members of the National Assembly, including the Speaker and Deputy Speaker, and of the Comptroller and Auditor-General, the Attorney-General, and the Provincial Governors.

(24) Privileges and immunities of the President and Governors.

(25) Powers, privileges and immunities of the National Assembly and its members.

(26) Customs and Excise duties, corporation taxes, taxes on income other than agricultural income, estate and succession duties (excluding agricultural land), taxes on capital (excluding agricultural land), sales and purchases, mineral oil and natural gas, sea and air fares and freights.

(27) Jurisdiction and powers of all courts (except the Supreme Court), and offences against laws, with respect to any of the matters in the Federal list.

(28) All matters within the legislative competence of Parliament under the present Constitution, and matters incidental thereto.

Concurrent List

(1) Civil and criminal law, including the law of procedure, marriage and divorce, minors and infants, adoption and family, succession by inheritance and transfer of property (excluding agricultural land); registration of deeds and documents; arbitration; contract; partnership; agency; bankruptcy and insolvency; actionable wrongs; legal and medical professions; contempt of court; trusts and official trustees

(2) Scientific and industrial research

(3) Poisons and dangerous drugs.

(4) Newspapers, books, printed publications, and printing presses.

(5) Relations between employers and employees, trade unions, industrial and labour disputes, labour welfare, provident funds, employers' liability, workmen's compensation, invalidity and old-age pensions, maternity benefits, vocational and technical training, social security and social insurance

(6) Measures to combat corruption

(7) Price control

(8) Relief and rehabilitation of refugees and the custody, management, and disposal of evacuee property.

(9) Economic and social planning.

(10) Commercial and industrial monopolies, combines, and trusts.

(11) Inter-provincial migration and quarantine.

(12) Iron, steel, coal, and mineral products (excluding mineral oil and natural gas).

(13) Banking, insurance, and corporations not falling under the Federal list

(14) Stock Exchanges and futures markets not falling under the Federal list.

(15) Ancient and historial monuments of national importance.

(16) Arms, ammunition, and explosives not falling under the Federal list.

(17) Jurisdiction and powers of all courts (except the Supreme Court), and offences against laws, with respect to any of the matters in the Concurrent List.

Provincial List.

This included, *inter alia*, public order; administration of justice and the constitution and organization of all courts except the Supreme Court; police, preventive detention for reasons connected with the maintenance of public order, prisons, land, including land tenures, transfer, alienation, and devolution of agricultural land, land improvement, agricultural loans, and colonization; Company Law as far as it was not within the competence of the Federation; literary, scientific, religious, and other societies and associations; co-operative societies, land revenue; compulsory acquisition or requisitioning of property; agriculture, including agricultural education and research; protection against pests and plant diseases; local government; livestock and prevention of animal diseases; water supplies, irrigation, storage, and flood control; education, including universities, technical education, and professional training; libraries; theatres, cinemas, sport, entertainments; film censorship; public health and sanitation, hospitals and dispensaries; registration of births and deaths; railways; communications (roads, bridges, ferries, inland waterways, etc.) not specified in the Federal List; shipping and navigation on tidal waters, and coastal shipping along Provincial seacoasts · smaller ports; vehicles; relief of the disabled and unemployed; intoxicating liquors; opium; industries; internal provincial trade and commerce; production, manufacture, supply and distribution of goods; weights and measures (except establishment of standards); salt manufacture, supply and distribution; money-lending; forests; protection of wild animals and birds and prevention of cruelty to animals; foodstuffs control, lotteries, betting, and gambling; fisheries; electricity and gas, professions; charities and charitable and religious endowments; *waqfs* and mosques, orphanages and almshouses; various taxes, duties, and estate duties in respect of agricultural land and income, taxes on mineral rights (as far as not regulated by the Federation) and certain other Excise duties and taxes.

Emergency Provisions. "If the President is satisfied that a grave emergency exists in which the security or economic life of Pakistan, or any part thereof, is threatened by war or external aggression, or by internal disturbance beyond the power of a Provincial Government to control, he may issue a Proclamation of emergency . . ." (Article 191, Section 1).

While such a Proclamation was in operation, (*a*) Parliament would have power to make laws for a Province or any part of it, with respect to any matter outside the Federal or the Concurrent Lists, (*b*) the executive authority of the Federation would extend to giving directions to a Province as to the manner in which the executive authority of that Province was to be exercised; and (*c*) the President might, by Order, assume to himself, or direct the Governor of a Province to assume on his behalf, all or any of the functions of the Provincial Government, and all or any of the powers vested in, or exercisable by, any body or authority in the Province other than the Provincial Legislature. He might also make such incidental and consequential provisions as appeared to him to be necessary or desirable for giving effect to the objects of the Proclamation, including provisions for suspending, in whole or in part, the operation of any provisions of the Constitution relating to any body or authority in the Province, except those relating to the High Court (Article 191, Section 2).

The powers of a Provincial Legislature to make laws which under the Constitution it had power to make would be unimpaired, but any provisions of a Provincial law repugnant to any provision of a Federal law made under this Article would be void so long as the Federal law continued to have effect (Article 191, Section 3).

Any law made by Parliament under (*a*) above would cease to have effect six months after the President's Proclamation had ceased to operate (Article 191 Section 5).

A Presidential Proclamation must be laid before the National Assembly "as soon as conditions make it practicable for the President to summon that Assembly"; if approved by the Assembly it would remain in force until it was revoked, but if disapproved it would cease to operate immediately (Article 191, Section 6).

A Proclamation declaring that the security of Pakistan or any part thereof was threatened by war or external aggression might be made before the actual occurrence of war or any such aggression if the President was satisfied "that there is imminent danger thereof" (Article 191, Section 7).

While a Proclamation of emergency was in operation, the President might, by Order, declare that the right to apply to any court for the enforcement of such fundamental rights as might be specified in the Order, as well as any proceedings already pending for the enforcement of such rights, should remain suspended for the period during which the Proclamation was in force but every Order so made "shall, as soon as may be, be laid before the National Assembly" (Article 192).

"If the President, on receipt of a report from the Governor of a Province, is satisfied that a situation has arisen in which the Government of the Province cannot be carried on in accordance with the provisions of the Constitution, the President may by Proclamation—(*a*) assume to himself, or direct the Governor of the Province to assume on behalf of the President, all or any of the functions of the Government of the Province, and all or any of the powers vested in, or exercisable by, any body or authority in the Province, other than the Provincial Legislature; (*b*) declare that the powers of the Provincial Legislature shall be exercisable by, or under the authority of, Parliament; (*c*) make such incidental and consequential provisions as appear to the President to be necessary or desirable for giving effect to the objects of the Proclamation, including provisions for suspending, in whole or in part, the operation of any provisions of the Constitution relating to any body or authority in the Province" The powers of the High Court of the Province and the operation of any Constitutional provisions relating to the High Courts would, however, remain unaffected (Article 193, Section 1).

A Proclamation under this Article must be laid before the National Assembly and would cease to operate after two months unless approved by the Assembly within that period; by an Assembly resolution it might be extended for up to another four months, but no Proclamation would in any case remain in force for more than six months. Nevertheless, if such a Proclamation was issued "at a time when the National Assembly stands dissolved, or if the dissolution of the National Assembly takes place during the period of two months referred to in this clause," the Proclamation would cease to operate after 30 days from the first meeting of the new National Assembly, unless approved by it within that period (Article 193, Section 2).

If a Proclamation had declared that the powers of the Provincial Legislature should be exercisable by or under the authority of Parliament, the latter might confer on the President the power of the Provincial Legislature to make laws, but any such laws would cease to have effect six months after the Proclamation had ceased to operate. Under such a Proclamation the President would also have emergency power to confer powers or impose duties on the Federation, and to authorize expenditure in the Province, and the National Assembly would be competent to sanction such expenditure (Article 193, Sections 3 and 4).

"If the President is satisfied that a situation has arisen whereby the financial stability or credit of Pakistan, or any part thereof, is threatened, he may, after consultation with the Governors of the Provinces or with the Governor of the Province concerned . . . . by Proclamation make a declaration to that effect, and while such a Proclamation is in operation the executive authority of the Federation shall extend to the giving of directions to any Province to observe such principles of financial propriety as may be specified . . . and to the giving of such other directions as the President may deem necessary for the financial stability or credit of Pakistan, or any part thereof" Any such directions might include provisions requiring salary reductions for Provincial Civil Servants and employees, and the President might also issue directions for salary reductions of Federal Civil Servants and employees, including judges. Any such Proclamation would be subject to the provisions of Clause 2 of Article 193 as to the period of its operation (Article 194).

The validity of any Proclamation issued, or Order made, under any of the aforementioned provisions might not be questioned in any court (Article 195).

Parliament would be free to make any law indemnifying any person, including Federal or Provincial Government employees, in respect of any act done in connexion with the maintenance or restoration of order in any area where martial law was in force, or validating any sentence, punishment, forfeiture, etc., under martial law (Article 196).

Inter-Provincial Council. With the consent of the Governors of the Provinces, the President might establish an Inter-Provincial Council if at any time it appeared to him that this would serve the public interest. The Council would be charged with the duty of (*a*) investigating and discussing subjects in which the Provinces, or the Federation, and one or both of the Provinces, had a common interest; or (*b*) making recommendations on any such subject, and in particular for the better co-ordination of policy and action in that respect (Article 130).

Federal Capital. Its administration would be vested in the President, who would, by Order, make provision for its government and administration, the laws to be enforced in it, expenditure from Federal revenues for it, etc. Parliament would have power to make laws for the Federal capital with respect to matters enumerated in the Provincial List, as well as matters (other than those relating to the High Courts) not listed in the Fifth Schedule.

Scheduled Castes and Backward Classes. The Federal and Provincial Governments would promote, with special care, the educational and economic interests of the Scheduled Castes and backward classes in Pakistan, and would protect them from social injustice and exploitation (Article 205). The President might appoint a commission to investigate their conditions and make recommendations for their improvement; he would also appoint a Special Officer for the Scheduled Castes and backward classes to investigate matters relating to the safeguards provided for them, to investigate the implementation of any recommendations by the aforementioned commission, and to report to the President.

Judiciary. There would be a Supreme Court consisting of a Chief Justice and not more than six other judges, and a High Court for each Province The Supreme Court would sit in Karachi and at such other place as the Chief Justice of Pakistan might, with the President's approval, from time to time appoint, but it would sit in Dacca (East Pakistan) at least twice a year.

Kashmir. The people of Kashmir, if they decided to accede to Pakistan, would be free to determine the relationship between Kashmir and the Republic of Pakistan (Article 203).

Language. The official languages of Pakistan would be Urdu (the language predominantly spoken in West Pakistan) and Bengali (the language of East Pakistan). English would also continue to be used for all official purposes for 20 years, but Provincial Governments

might replace English by one of the State languages before the end of this period. Measures would be taken for the development of one national language for Pakistan, and after 10 years the President would appoint a commission to make recommendations for the replacement of English.

Public Service Commission. An independent commission would be appointed by the President to ensure impartiality in recruitment to the Public Service

Amendment of the Constitution. The Constitution might be amended by an Act of Parliament passed by a majority of the Assembly's membership and a two-thirds majority of members present and voting The amendment of Articles dealing with the territories of the Federation, the composition of the National Assembly and Provincial Assemblies, the division of legislative competence between the Federation and the Provinces, and the composition and functions of the National Economic Council and the National Finance Commission, would also require the consent of the Provincial Assemblies before the President could give his assent (Article 216)

The draft Constitution, as published, represented a compromise between the two Government parties—the Moslem League and the United Front. The recognition of Bengali as an official language, and the establishment of a National Economic Council, had been demanded by the United Front, which, in return for these concessions, had abandoned its demand for full provincial autonomy and the limitation of the Centre's powers to the spheres of defence, foreign affairs, and currency. No agreement was reached, however, on the question of joint electorates, which was demanded by the majority of the United Front, the East Pakistan Awami League, and the Hindu community, but was opposed by the Moslem League and also by the *Nizam-e-Islam*, one of the constituent parties of the United Front. The clauses declaring Pakistan an Islamic Republic and excluding non-Moslems from the office of President encountered strong opposition from the Pakistan Congress and the United Progressive Party (two Hindu organizations supporting the United Front). The East Pakistan Awami League criticized the powers granted to the President, and demanded full regional autonomy for the Provinces.

The draft Constitution was submitted to the Constituent Assembly on Jan. 9 by Mr. Chundrigar, the Law Minister.

Mr. Chundrigar gave an assurance that the Islamic provisions would in no way deprive non-Moslems of their fundamental rights under the Constitution, which made extensive provisions for safeguarding and promoting their religions and cultures

During the general debate on the Bill, which continued from Jan 16 to Feb. 1, Mr. Chundrigar again defended the Islamic provisions, which had been strongly criticized by Hindu spokesmen. Denying that the clause requiring the President to be a Moslem deprived the minorities of any substantial right, he pointed out that in England the Sovereign must belong to the Church of England, and that the Head of the State was required to hold certain religious beliefs in Norway, Sweden, Spain, Greece, and some Latin American countries. All other offices, including that of Prime Minister, were open to the minorities. The description of Pakistan as an "Islamic Republic" was justified as 87 per cent of the population were Moslems.

Mr. Zahiruddin (Awami League) maintained that the clause dealing with the President was neither democratic nor truly Islamic, as it sought to distinguish and discriminate between citizens of Pakistan. He also pointed to the practical difficulties of interpretation, recalling that in a well-known case eight learned theologians had each given a different definition of a Moslem, and that some Islamic sects did not regard the others as Moslems. If this clause were adopted, it might lead to sharp differences which would ultimately result in Pakistan's disintegration.

Pir Ali Mohammed Rashdi (Moslem League), the Minister of Information, opposed Opposition motions for circulating the Bill to elicit public opinion and for referring it to a Select Committee. He said that the consensus of opinion was that Pakistan must have a Constitution as quickly as possible; all schools of thought had amply expressed themselves during the past eight years, and no document or decision had evoked so much enthusiasm or so little opposition as the draft Constitution.

Mr. Biswas (United Front), the Minister of Food and Agriculture, pointed out that as the membership of the Assembly was to be equally divided between East and West Pakistan, there could be no apprehension that one wing would do injustice to the other. East Pakistan had been given the maximum degree of autonomy consistent with the country's safety, and if, after deliberation, the country thought there was reason for doing more, the Government would not hesitate to do justice.

Mr. Dutta, the Hindu leader of the United Progressive Party, also expressed approval of the Constitution, which, he said, gave ultimate power to the people and effective authority to the Legislature, whilst limiting the power of the Executive.

Chaudhri Mohammad Ali, the Prime Minister, recalled that the object of the Pakistan movement had been, in the words of the late Mr. Jinnah, "that we should have a State in which we could live and breathe as free men and in which we could develop according to our own way of life and culture, and wherein the principles of Islamic social justice could find free play." It was an essential part of the faith of the Moslems of Pakistan that non-Moslems should be equally free to develop their culture and to practise and propagate their religion, and should be equal and honoured citizens. To realize these aims, West and East Pakistan must be welded into an indivisible whole, since any attempt to create misunderstanding between them endangered the integrity of the State The dictates of geography made a federal Constitution and the maximum of provincial autonomy inevitable, but provincial autonomy had to be consistent with the country's integrity, security, and stability. No Constitution was perfect, and they had tried to make the procedure for its amendment simple, easy, and flexible.

The Assembly unanimously adopted the motion for consideration of the Bill on Feb. 1, and began the second reading [corresponding to the committee stage in the British House of Commons] on Feb. 3. During this stage the following amendments were adopted:

(1) The President and the Provincial Governors, who under the draft Constitution had been empowered to dissolve the National Assembly and the Provincial Assemblies respectively at their discretion, could only exercise these powers on the advice of the appropriate Ministers

(2) The clause in the draft Constitution providing for a Vice-President was suppressed, and the Speaker was empowered to act as Head of State in the absence of a President.

(3) The Provincial High Courts, in addition to the Supreme Court, were empowered to issue writs for the enforcement of fundamental rights

The Bill passed its second reading on Feb. 28. During the third reading debate on the following day, 20 Awami League and Pakistan Congress members from East Pakistan walked out as a protest against the Islamic provisions of the Constitution and its failure to accord full provincial autonomy to East Pakistan. The Bill was consequently adopted without a division, and received the Governor-General's assent on March 2.

The Assembly adopted on March 2, by 42 votes to two, a resolution ratifying the declaration on Pakistan's continued membership of the British Commonwealth as a republic which had been issued on Feb. 5, 1955, by the Commonwealth Prime Ministers' Conference (see 14038 A).

In moving this resolution, **Chaudhri Mohammad Ali** pointed out that the declaration was almost identical in substance with that made by India. Pakistan accepted the Queen, "not as our Sovereign but as the symbol of the free association of the Commonwealth," and this did not involve any derogation of Pakistan's sovereignty. Membership of the Commonwealth was in the enlightened self-interest of Pakistan, and by retaining it Pakistan would contribute to world peace. The resolution was supported by **Dr. Khan Sahib** (Chief Minister of West Pakistan), who recalled that he himself had "fought against British imperialism all his life," as well as by **Mr. Suhrawardy** (Leader of the Opposition) and **Mr. Firoz Khan Noon** (Independent). The two dissentient votes were cast by **Mr. Mahmud Ali** (East Pakistan Democratic Party) and **Mr. Iftikharuddin** (Azad Pakistan Party) The members of the Awami League, except Mr. Suhrawardy, did not take part in the vote.

Major-General Mirza was elected Provisional President by the Constituent Assembly on March 5, without opposition. His nomination was put forward by 50 members, including Chaudhri Mohammad Ali (the Prime Minister), the Minister of the Interior (Mr. Fazlul Huq), the Governor of West Pakistan (Mr. Gurmani), the Chief Minister of West Pakistan (Dr. Khan Sahib), and three Hindu members. The election was boycotted by the 20 members who had walked out on Feb. 29.

The Islamic Republic of Pakistan formally came into existence on March 23, when President Mirza took the oath of office in Karachi from the Chief Justice, Mr. Mohammad Munir. The day was observed as a public holiday under the name of Constitution Day, and the anniversary will be similarly observed every year under the name of Republic Day.

In a message to President Mirza, H.M. Queen Elizabeth II expressed her warmest wishes for the peace and prosperity of the Islamic Republic of Pakistan, and her satisfaction that Pakistan intended to remain within the Commonwealth

Prior to these developments, the Constituent Assembly had taken several important decisions in recent months—notably the repeal of Section 92A of the Government of India Act and its replacement by a new Section 93, limiting the Governor-General's emergency powers (Oct. 5, 1955); provisions for the government and administration of the Federal Capital (Oct. 8); the appointment of a nine-man Committee of Privileges (Oct. 12); the reduction of the Assembly's quorum from one-third to one-quarter of its membership (Nov. 7); and the decision that the Speaker and Deputy Speaker should continue to preside over the House when it met as a Federal Legislature (Nov. 29). In response to the demand of East Pakistan members, the Speaker announced on Oct. 12, 1955, that Bengali would henceforth be one of the official languages permissible for use in the Assembly, in addition to Urdu and English.—(Constitution of the Islamic Republic of Pakistan - Pakistan High Commissioner's Office, London - Dawn, Karachi)

(Prev. rep. 14371 A; 14341 A.)

A. UNITED KINGDOM. — Defence Estimates, 1956-57. - House of Commons Debate on Defence Policy. - Appointment of Independent Chairman of Chiefs of Staff Committee and C.-in-C., U.K. Land Forces. - New Powers for Minister of Defence. - Child Education Allowances for Regular Members of the Forces.

The Government's Defence Estimates for 1956-57, providing for a gross expenditure of £1,548,700,000, or £11,500,000 more than the gross Estimates for 1955-56, were published as a White Paper (Cmd. 9691) on Feb. 21. The 1956-57 total included £50,000,000 to be covered by U.S. Defence Aid; allowing for this, the net expenditure was £1,498,700,000.

The U.S Aid was allotted as follows: Defence Support Aid, £3,500,000 (Navy £1,500,000, Army £2,000,000); Agricultural Commodity Aid, £8,500,000 (Navy £3,500,000, Army £5,000,000), Special Aircraft Purchase (R A F), £12,500,000; Additional R.A F. Programme, £25,500,000

Detailed estimates of expenditure were as follows (1955-56 estimates shown for comparison):

	Excluding receipts from U S. Aid £ million		Including receipts from U S. Aid £ million	
	1956-57	1955-56	1956-57	1955-56
Admiralty	351 0	347.0	346.0	340.5
War Office	479 0	484.0	472.0	474.0
Air Ministry	517 5	540 4	497.5	513.9
Ministry of Supply	185.0	147 5	185.0	147.5
Ministry of Defence	16 2	18.3	16.2	18.3
	1,548.7	1,537 2	1,498 7	1,494.2

A summary of the White Paper on Defence is given below under cross-headings:

Political and Strategic Factors. The hopes entertained last summer of a relaxation in international tension had not been realized, and the Foreign Ministers' Conference in October had made it clear that, for the present at least, there was no change in Soviet long-term aims at world domination. Meanwhile the Soviet Government's interventions had threatened the stability of the Middle East, sown mistrust between peoples, and lent support to revolutionary movements throughout the world. In these circumstances, it remained necessary for the Western Powers to hold their own by their defensive strength until a true understanding of Western policies had made its impact upon the Soviet people

The increased power of the deterrent to war—i.e. the nuclear weapon and the means of delivering it, to both of which Britain had already begun to make a "substantial contribution"—had made global war "more frightening and less likely," and the Government believed that it could be prevented, given the continued growth of NATO defensive power. But apart from global war Britain had to be prepared for the continuance of the cold war—the constant and world-wide threat of Communist penetration short of direct military aggression—and for the outbreak of localized conflicts on a scale short of global war, but in which the possible use of nuclear weapons could not be excluded.

If, nevertheless, global war should break out, its course would be unpredictable after the initial intense phase Forces must accordingly be flexible, mobile, well-trained and equipped, versatile, and ready for immediate action, as it would no longer be possible to rely on meeting needs for men or munitions by mechanizing reserves of untrained manpower or of industrial capacity. In home defence, the emphasis must be on planning and research and on measures to secure full co-operation between the military and civil authorities, new techniques must be developed and an organization created which could be readily expanded or adapted as changes in the international situation or the development of new weapons might require.

The forces required to support Britain's present strategy had therefore four roles to fulfil:

(1) To make a contribution to the "Allied deterrent" commensurate with Britain's standing as a world Power; this meant not only building up and maintaining a nuclear stockpile and the means of delivery, but also contributing to the maintenance of NATO's defensive effort by land, sea, and air

(2) To play their part in the cold war, and by their mere presence to contribute to the stability of the free world and the security of overseas territories whose peaceful development might be threatened by subversion.

(3) To be capable of dealing with outbreaks of limited war should these occur.

(4) To be able to play their part in global war should it break out, including support to the civil authorities

Economic Factors. The burden of defence, however, could not be allowed to increase so as to endanger the country's economic future Apart from the effect of high defence expenditure upon the general level of taxation, heavy defence production placed a serious drain on the metal and metal-using industries, which supplied about half the country's exports and played a vital role in strengthening the balance-of-payments position. The maintenance of large British forces overseas also involved a heavy direct charge on the balance of payments, whilst the size of the forces as a whole inevitably affected the manpower available for civil industry. Moreover, the continually increasing cost of new weapons meant that if the forces were maintained at their present level there would be a steeply rising curve of expenditure.

One consequence of equipping the forces with the new weapons made necessary by strategic developments was a decline in their numbers, as forecast by the Prime Minister in October (see 14493 A). This concept of smaller and better-equipped forces placed a premium upon the highly-skilled long-service Regular, since—quite apart from the advantages of a predominantly long-service force in terms of stability and morale—the newer weapons would demand increasingly high standards of training and maintenance The Government had therefore decided to introduce substantial improvements in Service pay and inducements, and hoped that these increases would produce a marked improvement in Regular recruiting, especially for long-service engagements

Reserve Forces. The new concept also involved a shift of emphasis in reserve planning, the two main requirements being (1) a number of trained reservists capable of reinforcing special areas, units, or ships, at very short notice; (2) a larger number to act initially in defence of the country in the event of global war, and to come to the help of the civilian population.

Review of the Future Role of the Services. Against this background the Government had been engaged in a review of the probable development of the Services over the next seven years in order (1) to ensure that they conformed to the needs of the new strategic situation and that the reduction in manpower was achieved with the least military risk, (2) to provide for the Services reasonably long-term plans on which their production, training, and building programmes could be based, and to make certain that the cost of defence, in terms of manpower, materials, and money, did not overload the economy. The Research and Development programme was also being examined to ensure a proper balance between the resources available and the projects to which the highest priority should be attached.

The general implications of the new strategic situation for each Service were as follows.

The *Navy* would maintain an effective fleet capable of supporting Britain's influence and interests as a world-wide Power and as a member of the Commonwealth and NATO The further development of new weapons and techniques should enable it to strike whatever might threaten the country by sea, either in limited or global war.

The *Army* would primarily be organized to enable it to bring force to bear quickly in "cold" or limited war. Balanced forces must be retained overseas to meet "cold war" requirements and hold the line until reinforced if limited war should break out Strategic reserves must be maintained and must be capable of rapid transportation to the scene of trouble for limited war tasks British formations in Germany must be reorganized to make them capable of giving the best account of themselves should global war break out, whilst units in the United Kingdom must be available for all forms of home defence.

The *R.A.F.* would provide Britain's contribution to the nuclear deterrent in the shape of strategic weapons and a nuclear bomber force capable of delivering them. New and improved aircraft and equipment would be introduced into the country's air defences as they became available, but planning was complicated by the need to balance the importance of continued development in manned fighter defences against the necessity of making resources available for the development of a guided-weapons system. Tactical air forces in Germany would continue to contribute to NATO defence, but the primary consideration in planning the air forces, both for combat and transport, would be their contribution to "cold" and limited war.

The chief task in home defence would be to continue preparations for minimizing losses and casualties by developing an evacuation plan, an effective fall-out warning and monitoring system, and methods of reducing disorganization after thermo-nuclear attack.

Disarmament. Whilst the Government's ultimate goal remained the conclusion of a comprehensive and world-wide disarmament agreement, covering both conventional and nuclear armaments, this could not be put into effect until adequate methods of control and supervision had been agreed upon In 1955 it had become widely apparent that no method yet existed of guaranteeing the elimination of stockpiles of nuclear weapons or completely controlling the production of potentially dangerous fissile material. The Government had therefore been considering the possibility of concluding an agreement which would allow of a first instalment of disarmament without delay. At the tenth session of the U N General Assembly, therefore, Britain had joined in sponsoring a motion calling for early agreement on "such measures of adequately safeguarded disarmament as are now feasible" (see 14667 A) In this connexion the White Paper stressed that since increased confidence was a pre-requisite of any large-scale disarmament, it followed that the adoption of "even a modest degree of disarmament related to conventional weapons," coupled with appropriate measures for control, including aerial inspection, should "create an atmosphere in which bolder advances could follow."

The Programmes of the Services. (*a*) *Royal Navy.* The new construction and modernization programmes included provision for the adaptation of existing aircraft-carriers to the operation of modern types of aircraft, and guided missiles would be installed in all new cruisers and destroyers. As the submarine threat was far greater than ever before, great attention was being paid to building anti-submarine ships and aircraft and to developing anti-submarine helicopters. It was also planned to replace the Navy's own submarine forces by vessels of considerably higher performance; meanwhile research continued into new means of propulsion, including the use of nuclear power.

As regards the Reserve Fleet, a survey had been completed and it was planned to keep in it only ships capable of fighting effectively in a modern sea war, and to dispose of all obsolete vessels. The structure of the Navy's shore support was also being examined to ensure that it met the changed requirements of the active and reserve fleets.

(*b*) *Army.* A large part of the manpower reduction would of necessity fall on the Army, and would include reductions in establishments, training staffs, and administration and supporting units. In conformity with the new concept of flexibility, the Army must also be able to adapt itself to either global or limited war conditions, and extensive trials had taken place in Germany to determine the best organization for a nuclear war. These had shown that the infantry division could be given more weight over a wider front by integrating armour with the infantry brigade and adding medium artillery. The present form of the armoured division would be changed to make it more mobile and flexible by reducing the number of supporting units to the minimum. The same principle of maximum flexibility was being applied to the re-equipment programme, and the range of arms held by units would be simplified and reduced and effectiveness progressively increased. Meanwhile, the Army would receive supplies of the U.S. *Corporal* guided weapon in 1956 (see 13786 A). Together with the R.A.F. it was carrying out experiments to determine how far helicopters or other aircraft able to land and take off in confined spaces would help to solve the Army's problems of greater flexibility and mobility.

The redeployment of forces from the Canal Zone had made it possible to progress with the build-up of the Strategic Reserve in Britain, but its strength would depend from time to time on variations in British commitments overseas. The major organization of the Reserve and Territorial Armies announced on Dec. 20, 1955 (see 14676 A) was now under way.

(*c*) *R.A.F.* The primary task continued to be the build-up of the V-Bomber force, and the first V-Bomber, the *Valiant*, was now in service and would be followed during 1956-57 by the *Vulcan*. For some time to come manned fighters would remain the backbone of the Air Defence system, and the fire power and lethality of fighter aircraft would be markedly increased by equipping them with air-to-air guided missiles, the first of these fighters—a special mark of the *Swift*—would become available during 1956-57. Surface-to-air guided weapons, however, might in time well play a predominant part in air defence, and a production order for them had been placed for trials with the air defence system. Owing to the wide area of destruction with nuclear weapons, close defence of vulnerable areas was an outmoded concept, and the aim was a guided weapons system which could break up enemy attacks before they penetrated across the coastline, and which could be integrated with the fighter defences. Considerable advances had been made during the past year in introducing new equipment and in linking the radar defence system with similar Continental systems.

Manpower. The estimated total strength of the Forces at April 1, 1956, and April 1, 1957, compared with the actual strength at April 1, 1955, was shown as follows:

	April 1, 1955 (Actual)	April 1, 1956 (Estimated)	April 1, 1957 (Estimated)
Regulars	518,119	465,500	464,600
National Servicemen .	284,954	289,100	253,400
Women's Services ..	20,557	17,400	17,000
Total . ..	823,630	772,000	735,000

The apportionment of the male Regular strength (officers and men) between the three Services was as follows:

	April 1, 1955 (Actual)	April 1, 1956 (Estimated)	April 1, 1957 (Estimated)
Royal Navy	114,200	106,500	104,800
Army	223,800	196,400	192,000
R.A.F. . ..	180,100	162,600	167,800
Total . ..	518,100	465,500	464,600

Regular Recruitment. Actual recruitment to the three Services in 1954-55, and estimated figures for 1955-56 and 1956-57 (excluding the Women's Services) are shown in the following table:

	1954-55 (Actual)	1955-56 (Estimated)	1956-57 (Estimated)
Navy	7,700	7,500	9,000
Army	38,900	34,000	42,000
R.A.F.	26,100	21,000	30,000
Total	72,700	62,500	81,000

The White Paper pointed out that Regular recruiting—largely of men on short-term engagements—had fallen from the post-war peak of 100,000 in 1952-53 to an estimated 62,500 in 1955-56, and stressed the necessity of increasing the number of long-service recruits and of persuading those already serving to prolong their service. The new proposals on pay and inducements, coupled with changes in the present system of engagements, had been designed specifically to attract additional Regular recruits and strengthen the long-service element in all three Services, thus getting nearer the manpower structures of the forces which obtained between the wars. If the structural changes which were the main objects of the pay changes could be effected, many manpower problems would become easier, and the day would be brought nearer when increased reliance upon strong and efficient Regular forces would permit an easing of the burden of National Service.

National Service. Requirements in 1956-57 would be about 162,000 men (Royal Navy 4,000, Army 106,000, R.A.F. 52,000).

Reserve and Auxiliary Forces. The strength of the reserve and auxiliary forces, including part-time National Servicemen, had decreased slightly during 1955 from about 647,000 on Jan. 1 to 624,000 on Dec. 31. The number of volunteers had also decreased from 117,000 to 110,000. The total number of National Service reservists remained throughout the year at about 530,000. The White Paper called attention to the "disturbing drop" in the number of National Servicemen volunteering for the reserve and auxiliary forces.

Colonial Forces. Seven battalions of the Malay Regiment, one battalion of the Federation Regiment, a battalion each from Central Africa and from Fiji, as well as the Royal Malayan Navy and the R.A.F. Regiment (Malaya), were still actively engaged against the Malayan terrorists. Seven battalions of the King's African Rifles were in East Africa—five in Kenya, one in Uganda, and one providing the garrisons of Tanganyika and Mauritius. The Kenya Regiment and the East African Independent Reconnaissance Squadron continued to serve in Kenya.

The present strength of the armed forces raised by the Colonial territories was about 42,000, in addition to about 16,000 Colonial personnel enlisted in the U.K. forces. The number of U.K. officers and n.c.o.s attached to Colonial units was about 4,000.

Research and Development. Increased financial provision would be made in 1956-57 for research work on the complex new weapons required by modern warfare, whilst some research and development must continue on conventional weapons which would still be used in many circumstances. At the same time, a number of new and technically very complex projects—especially those associated with the "deterrent"—would make increasingly heavy demands on resources. The programme was being kept under review in order to maintain the right balance between newer and older projects and to ensure the deployment of the research and development effort to the best advantage.

A further series of tests of nuclear weapons would be held in 1956, the first in the spring in the Monte Bello Islands, and the second later in the year at Maralinga, South Australia (see 14141 B). Particular emphasis was being placed on the development of the ballistic rocket as a deterrent to aggression, whilst progress continued to be made in the development of guided missiles for each of the Services. The number of trial firings in Britain and at the Weapon Research Establishment at Woomera (Australia) was increasing steadily, and encouraging successes had been obtained with both air-to-air and surface-to-air weapons (see 14735 B).

As regards aircraft development, the *Victor* bomber had reached an advanced stage and the development was in hand of later versions of the *Vulcan* and *Victor*, incorporating more powerful engines giving increased height and range. In the fighter category, the first mark of the *Javelin* had been given clearance for delivery to the R.A.F., and development work on later marks continued; development of the English Electric *P.1* was also proceeding satisfactorily. Increased effort was also being devoted to the solution of the problems of flight at high supersonic speeds, including problems of take-off from, and landing on, existing airfields and carriers. Different methods of achieving vertical or near-vertical take-off and landing were also being explored. In the field of naval aircraft, the first prototype of the new day fighter-strike aircraft, the *N.113*, had flown successfully, and would be followed into service by an all-weather fighter, the *D.H 110*, and by a strike aircraft of advanced design.

In regard to naval developments, two experimental high-speed submarines should be completed during 1956-57, and considerable advances had been made in increasing the range of under-water detection equipment. The guided weapons trial ship would begin work in the summer of 1956, and plans for the first operational ship to use guided weapons as its main armament were going ahead.

As to Army weapons and equipment, continued attention was being paid to developing weapons of greater mobility and fire-power; to transport problems and the improvement of methods for the rapid construction and repair of airfields; and to the design of vehicles with improved cross-country performance.

Close co-operation had continued with the U.S.A. (particularly on guided weapons) and with Commonwealth countries, this latter being maintained by organizational links with individual countries as well as by the Commonwealth Advisory Aeronautical Research Council and the Commonwealth Advisory Committee on Defence Science, which was currently meeting in Canada.

Production. The White Paper explained that Admiralty production expenditure for 1955-56 would be nearly as estimated, whilst underspending by the War Office had been small. Production for the Air Ministry, however, had been considerably lower than shown in the Estimates, partly through shortfalls in delivery, and partly owing to alterations in the production programme after the Estimates had been published (e.g. orders for some marks of the *Swift* had been cancelled, and the production programme for the *Javelin* re-phased to provide a better balance between the earlier and later marks). As a result, expenditure on the Air programme was expected to be greater in 1956-57 than in 1955-56. The main emphasis would continue to be placed on V-bombers and all-weather fighters.

Offshore Procurement. The value of new contracts placed in the U.K. in 1955 under the U.S. Offshore Procurement Programme was $33,000,000, bringing the total value of these contracts up to $683,000,000. The new contracts were for *Centurion* tanks, guns, vehicles, and miscellaneous articles of equipment.

U.S. and Canadian Military Aid. Further equipment, as well as aid for the expansion of ammunition production capacity, had been received from the U.S.A., whilst supplies of ammunition, propellants, and explosives had also been received under the Canadian Mutual Aid Programme

Home Defence. The White Paper stressed that "to give full protection to everyone from sickness or death from the hazard of radioactivity alone would involve physical preparation on a vast scale," and that, "whatever the preparations made, an attack on this country would involve loss of life and destruction on an unparallelled scale." Unduly heavy expenditure on purely defensive measures, therefore, by weakening Britain's economic strength and reducing the resources available for building up the strength of the deterrent, might very well work against the primary object of ensuring that global war was prevented.

Nevertheless, the Government's aim would be to take those precautions without which, should the worst happen, ordered society could not survive. The emphasis would be on (1) establishing a system of warning and monitoring of radio-active fall-out and an adequate system of control, through central and local government organs; (2) ensuring the availability of the necessary communications; (3) building up of local and national services trained and equipped to deal with casualties and to mitigate the other effects of thermo-nuclear attack; (4) revising evacuation plans; (5) securing the continued functioning of essential public services; (6) keeping the public fully informed of the dangers involved and of the steps which would be taken to meet them

Meanwhile the training of the members of the Civil Defence Corps and the Industrial Civil Defence Service had continued with increased emphasis on practical methods, and the formation had begun of the first 25 battalions of the Mobile Defence Corps (see 14089 A). The response to the call for volunteers to provide officers and n.c.o.s for the corps had been encouraging, the flow of National Servicemen to the battalions had started, and the strength of units would build up to a maximum in 3½ years' time. One month's training in rescue and ambulance duties was being given to selected National Servicemen towards the end of their whole-time service, with one 15-day camp during part-time service, and special training centres were being opened in various parts of the country.

It had been decided not to proceed with the raising of Mobile Defence Corps battalions for fire-fighting, and the planned strength of the Corps would be reduced in consequence from 48 battalions to 36, sustained by an annual intake of 7,500 men from the Army This would not, however, result in a reduction of the total number of Service reservists being trained for civil defence work, since the reduction in the strength of the Mobile Defence Corps would be offset by increasing from 10,000 to 15,000 a year the number of reservists made available by the Services for training in fire-fighting. Of these, the Army would provide 2,500 a year and the number of R.A.F Class "H" reservists would be increased to 12,500.

The first Home Office depot for training in fire-fighting, the White Paper continued, had been opened in July at Chorley (Lancs.), and by December 4,000 reservists had received their first period of two weeks' instruction. A second training depot would be opened in the summer of 1956 at Moreton-in-the-Marsh (Glos.), at which 15 days' more advanced instruction would be given to men who had completed their preliminary training. It was hoped to provide a third training depot early in 1957. In war, the bulk of the country's fire-fighting resources would be organized in mobile columns stationed outside the main built-up areas. Special types of equipment had been developed for these mobile formations and a Fire Service Tactical Training Centre had been established at Reigate (Surrey) at which selected firemen from brigades throughout Britain would be trained in operational techniques.

As regards evacuation, the Government had decided that first attention must be given to the evacuation of the "priority classes," including mothers, young children, and adolescents, and the aged and infirm. They therefore proposed to discuss with local authorities plans for the evacuation of these classes, including provisional conclusions reached on re-classifying the country into evacuation, neutral and reception areas. Considerable progress had been made in regard to the warning and monitoring of fall-out, and in the planning of a cable and ultra-high frequency radio network outside the main towns designed to ensure the maintenance of vital communications in the event of nuclear attack.

As to shelter in the event of nuclear war, full protection within a few miles of the ground burst of a megaton weapon was impracticable, but outside this range protection against blast and heat could be obtained from shelters similar to those used in the last war, provided that they could be occupied for periods of 48 hours or more. An ordinary brick dwelling house with 9-inch walls used to the best advantage would reduce gamma-ray radiation by about 20 times, and further protection could be obtained by thickening the existing walls and ceilings or roofs. The ideal, of course, would be a below-surface shelter, preferably inside the house, but to provide this degree of protection on a nation-wide scale would not be feasible. It was proposed to institute a survey, however, to determine how much shelter could be provided by adapting suitable accommodation for use as shelters, and what the cost would be.

Close attention was also being devoted by the Departments concerned to problems of dealing with casualties, the restoration of public utility services after attack, the reorganization of essential industry, and the provision of emergency facilities to replace those in existing major ports, which were likely targets for attack. Meanwhile, an appreciable strategic reserve of food already existed, and it was proposed to make substantial additions to it. Further progress had been made in arrangements for importing and distributing oil supplies and for acquiring a strategic reserve of oil. The strategic holdings of industrial raw materials, however, were already large, and could be run down to some extent without risk, and the Government had decided to make a start on this in 1956-57.

Finally, as regards finance, the White Paper explained that in 1956-57 about £45,000,000 would be provided for defence expenditure by Civil Departments (including loan expenditure by the Post Office), compared with £69,660,000 in 1955-56, of which it was estimated that only £50,000,000 would have been spent. The reduction in the amount for this purpose, as compared with the previous year, was accounted for chiefly by a curtailment of stockpiling, the amounts for expenditure on civil defence measures being kept at about the same level.

The Defence White Paper was debated by the House of Commons on Feb. 28-29.

House of Commons Debate.

Sir Walter Monckton (Minister of Defence), moving the adoption of the Estimates, stressed that Britain could not afford all the defence provision that might be thought to be militarily desirable, and that the problem was one of priorities. The Government had accordingly tried to foresee developments within the next seven years and had put forward plans which were flexible enough to permit of adjustments without drastic reorganization at every stage. After explaining the role of the Services as set out in the White Paper, and stating that the pay increases just introduced would cost an additional £67,000,000, Sir Walter said that it would be wrong to infer from the lower Air Estimates that there was to be any lowering of the priority accorded to the R.A.F. Of the £200,000,000 to be spent on research and development, most would go on development of aircraft, together with their equipment and armament, guided missiles and atomic weapons. It had been suggested that expenditure on research and development could be saved by closer co-operation with the U.S.A., but there was already a constant exchange of information between the two countries, especially with regard to guided missiles. It would be a mistake, however, to "roll British and American research and development programmes into one" and to divide the various tasks between the two countries, with complete exchange of information. Although in the case of ground-to-ground guided missiles Britain had deliberately stopped research and development at an early stage, and had decided to rely on the U.S. *Corporal* on the ground that the dollar expenditure involved would be justified by the saving in other ways, this would not be so in all cases

Some of the troubles encountered in the development of new weapons, Sir Walter continued, must be attributed to the overloading of resources. This was making itself particularly felt in aircraft development, and the remedy was to reduce the load, even if this meant taking risks Britain would have to be more selective in the re-equipment of her forces, and in some fields the Services might have to continue for longer than was desirable to use equipment which was not of the latest type. Although this was "a situation which it is not agreeable to have to accept," it was "better to take a deliberate decision to go forward with 10 projects and do them properly than make an unsuccessful attempt to cover 50."

Speaking of the "number of disappointments" which had been encountered in re-equipping the R.A.F. with new aircraft and equipment, and which had made it impossible for the R.A.F. to spend all its allocations under the 1955-56 Estimates, the Minister said that it had been suggested that it would have been more economical and efficient to produce one type of medium bomber only. To have relied solely on the successful development of one type, however, would have been an "unacceptable risk." The *Valiant*, already in service, was only an interim type, and although highly effective within its limits had never been intended as the final answer to operational requirements. Under the revised plan the R.A.F. would have fewer *Valiants* and a higher proportion of *Vulcans* and *Victors*, thus prolonging the operational effectiveness of the bomber force as a whole. Meanwhile the *Vulcan*—the first large delta-winged aircraft built by Britain—had fulfilled all hopes, whilst the new *Victor* had certain features which should make it even more effective than the *Vulcan* for certain operational roles. As regards fighters, the *Hunter* was "a robust aircraft with excellent flying qualities," well adapted for the job for which it was designed, the *Javelin* was now in service; and the fighter reconnaissance version of the *Swift* was being delivered to the 2nd Tactical Air Force.

In conclusion, Sir Walter Monckton dealt with home defence and the proposal for so-called "graduated deterrence," i.e., the limited use of atomic weapons in local conflicts. With regard to the former, he said that in another war scheduled evacuation areas would be more extensive than those of the last war, and that the Government estimated that plans would have to be made for the evacuation of nearly 12,000,000 people. [During World War II about 3,000,000 children, mothers, and blind and disabled persons were officially evacuated, together with about 2,000,000 others who made their own arrangements.] A re-deployment of manpower to action stations would coincide with the evacuation, and the Government were at present working on evacuation plans, the first task being to overcome probems of transport and accommodation.

Regarding "graduated deterrence" the Minister said: "I am far from saying that any aggressive move against the West would inevitably be countered by the use of the H-bomb. In some circumstances local aggression might be dealt with effectively by local

retaliation. This might involve the tactical use of atomic weapons, but it does not seem inevitable that this would necessarily lead to full-scale global war" It would not, however, be a practicable policy for any Government to define precisely in advance the circumstances in which it would use some weapons and not others as this might indicate to those contemplating aggression whether they could take risks and see how far they might go without bringing upon themselves the ultimate deterrent. "Moreover, even if the adoption of a policy of graduated deterrence was right in itself," the Minister went on, "would there be any reasonable ground for believing that its adoption would ensure the adoption of a similar policy by the other party to the argument? There are solid grounds for taking the other view. Judging from the speech made by the Soviet Minister of Defence to the recent Congress of the Soviet Communist Party, the Russians have evolved their own doctrine on this subject, and Britain should certainly not rely upon the response to graduated deterrence being similarly graduated retaliation." He did not feel, therefore, that the policy of "graduated deterrence" represented a practical solution, which must be sought in a comprehensive scheme of disarmament, and for which the Government would continue to strive in the U.N. Disarmament Sub-Committee.

Mr. Richard Stokes (Lab.) moved an Opposition amendment which criticized the White Paper for disclosing "grave weaknesses" in the country's defences; making no provision for an immediate cut in the National Service period and no specific plans for its eventual abolition, and containing no proposals for an enquiry into defence manpower or for "a more economical and effective allocation of resources between the Services"

Mr. Stokes described the British aircraft industry as 'living on failures," and asserted that out of 166 aircraft projects put forward in the past 10 years, 142 were in the waste-paper basket as useless, 16 were partially successful, and only eight were successful, on these £1,000,000,000 had been spent, mainly by the present Government. He urged the compulsory rationalization of the aircraft industry, the pooling of development and engineering, and adequate rewards for success, coupled with penalties for failure. He also suggested that the Royal Navy should be amalgamated with the R.A.F, and that the Services should be combed in order to see how many of the various duties in their "tails" could be performed by civilians, thus reducing Service manpower and making it more possible to end National Service

Mr. Maudling (Minister of Supply), replying to Mr. Stokes, pointed out that with both aircraft and guided missiles the worst difficulties always arose in the development stage, and that the main trouble on the production side had been the shortage of certain materials, particularly alloy steels The Government had decided to make substantial changes in the system for giving super-priority for aircraft production (see 12099 A), which had become more general than was required for effectiveness, and to concentrate on certain bottlenecks. In future, manufacturers having difficulties in obtaining supplies would get in touch with the Ministry of Supply, which, if satisfied that special help was needed, would arrange for priority to be given, whilst the Chancellor of the Exchequer would consider on its merits the early ordering of scarce materials in all instances where there were long waits for delivery. Arrangements for deferring the call-up of apprentices involved in schemes of particular defence urgency would be continued Mr. Maudling also announced that he had invited Mr. Nutcombe Hume (chairman of the Charterhouse Group) and Mr. John Pears (senior partner of Cooper Bros. and Co., chartered accountants) to advise him on the Ministry's methods of fixing prices paid for supplies and stores acquired for non-competitive contracts.

As regards the development of aircraft and guided missiles, the Minister said that the difficulties of engine surge, which had occurred in certain marks of the *Hunter* when the 430 mm. cannon were fired, had now been solved and that the necessary modifications were being installed It was not true that the *Hunter* could not carry guided missiles, and a version fitted to carry *Fireflash* missiles (see 14735 B) was being produced. In guided missiles, an inter-continental ballistic missile with a very long range was being constructed; eventually it would be difficult for any manned aircraft to penetrate enemy defences, and the real weapon was likely to be the ballistic missile. After referring to the Government's plan to use a site at Spede Adam Waste in Cumberland as a testing ground for rockets and rocket motors (see 14735 B), Mr. Maudling concluded by saying that the Government felt that at present there were too many helicopter projects under development. In future the War Office would concentrate on the Saunders-Roe *Skeeter*, the Navy would use the *Westland S.52*, and the R.A.F would have the *Bristol* twin-rotor helicopter; this would involve cancellation of the Navy version of the *Bristol* and of the *Hunting-Percival* helicopter, whilst Government support and expenditure on the *Fairey* ultra-light helicopter would also be cancelled.

Strong criticism of the Government's defence policy was expressed by **Mr. Shinwell,** a former Labour Minister of Defence He maintained that Britain could not afford the "three-legged stool" system on which it was based—the provision of a deterrent in the event of a major war, provision for a limited war or wars, and provision for dealing with colonial disturbances—and thought that because of her weakness in conventional weapons she would be forced to have recourse to nuclear weapons. If this were true, he argued, a halt should clearly be called in the production of conventional weapons It was also a mistake to produce too many aircraft, and to spend so much on aircraft-carriers, whose role in a nuclear war was quite uncertain

On a division the Opposition amendment was defeated on Feb. 29 by 816 to 250 votes, and the Defence Estimates approved.

Educational Allowances for Regulars. - Statement on Period of National Service.

During a debate on Nov. 2, 1955, on the Government's White Paper on National Service (see 14676 A) Mr. Selwyn Lloyd, then Minister of Defence, announced that the Government had decided to introduce (with retrospective effect from Sept. 1, 1955) a system of educational allowances for officers and other ranks serving overseas, as well as for those serving at home but subject to frequent posting. There would be a grant of £75 a year for each child between 11 and 18 at a boarding school, and £25 for each child between the same ages lodged with parents or guardians, in order to ensure continuity of day-school education. These allowances would not be subject to taxation in the case of men who were serving overseas.

Mr. Selwyn Lloyd pointed out that there were 66,000 Regular officers and 270,000 n c o.s and other ranks serving on engagements of four years or more The Army also now had 200,000 National Servicemen, including 88,000 tradesmen, representing half the tradesmen in the Army Training of National Servicemen took from six months to twelve months according to a man's job, and it would be a serious waste of manpower if little use could be made of these men after training A cut to 12 months' service, as had been suggested, would destroy the military value of Britain's forces altogether, and a cut to 18 months would diminish their efficiency by half A reduction in the period would also affect the balance between home and overseas service for Regulars, which, in turn, would be a further discouragement to Regular engagements.

As regards the overall size of the armed forces, the proposed reduction to 700,000 by March 31, 1958, represented a 20 per cent reduction over five years. Mr Selwyn Lloyd added: "As other countries are lauded for their reductions, for declarations of intentions the fulfilment of which cannot be verified, from totals which have never been ascertained, I hope that our action will not pass unnoticed and uncommended" [This statement was a reference to the cuts which had been announced in the strength of the Soviet armed forces.]

Referring to frequent talk about the size of the "tail" of the Army, the Minister pointed out that in 1950 manpower per division had been 51,000 and in 1955 about 38,200, the actual strength of the division itself remaining at about 12,500 This business of "combing the tail" proceeded all the time, and whilst there might be occasional cases of misuse of manpower it was not on such a scale as to vitiate the conclusion that it was necessary for the present to stick to 24 months of National Service The Government had rejected as unsuitable a method of collective call-up on the American pattern, as Britain was "too closely knit a country" to make it satisfactory; in this connexion Mr. Selwyn Lloyd said that a ballot system whereby a man would serve 24 months or not at all, according to the luck of the draw, seemed to be "intolerable."

Reduction of part-time service of National Servicemen from 60 to 20 days, Mr. Lloyd added, would be a substantial relief to industry. In 1954 half-a-million man-weeks had been lost through part-time service, whereas in 1956 the loss was likely to be about 180,000 man-weeks.

An Opposition amendment regretting that no provision had been made for an "immediate reduction" in the length of National Service was defeated by 326 votes to 263, and the Government's policy for raising the age of call-up and for scaling-down the strength of the armed forces by 100,000 during the next 2½ years was approved. Mr. Selwyn Lloyd made it clear during the debate, however, that the Government's plan did not preclude consideration of a reduction in the period of National Service at a later stage.

Independent Chairman of Chiefs of Staff Committee. - Increased Powers for Minister of Defence.

Sir Anthony Eden announced on Oct. 25, 1955, that the Government had decided to create the new post of Chairman of the Chiefs of Staff Committee; that Marshal of the R.A.F. Sir William Dickson had been appointed to that post; and that Air Marshal Sir Dermot Boyle would succeed Sir William Dickson as Chief of Air Staff. [The chairmanship of the Chiefs of Staff Committee had hitherto been held by the senior member of the Committee, Sir William Dickson having been the actual chairman.] The Prime Minister explained that the new Chairman and the three Chiefs of Staff would jointly be the professional military advisers of the Government, and that the Chairman would normally be U.K. representative on the Military Committee of NATO and on other international defence organizations. The new appointment would not affect the right of an individual Chief of Staff to tender his personal advice should he differ from his colleagues, nor would it alter the collective responsibility of the Chiefs of Staff Committee for the tendering of military advice.

Sir Anthony Eden also announced that while the Prime Minister must retain ultimate responsibility in defence matters, it was the Government's intention to strengthen the authority and influence of the Minister of Defence. Accordingly he had made certain arrangements within the Government to co-ordinate, under the Minister of Defence, planning and training for the joint action of civil and military forces in home defence.

As a result of " certain functions connected with the iron, steel, and engineering industries " (see 14406 A) the Ministry of Supply had become, in effect, a " fourth defence department " within the co-ordinating powers of the Minister of Defence. Moreover, the Minister of Defence's responsibility for the apportionment of available resources between the three Services would extend to a responsibility for seeing that the composition and balance of forces within individual Services met the strategic policy laid down by the Defence Committee.

Replying to Mr. Attlee, the Prime Minister pointed out that one of the reasons for creating the new post of Chairman of the Chiefs of Staff Committee was that the burdens which now fell on the Chiefs of Staff, especially in relation to many of the international organizations, were so heavy that they must be relieved of them. The new Chairman would have the use of the existing Chiefs of Staff organization, and the Government did not anticipate or provide for any great staff increases.

In reply to Mr. Shinwell (Lab.) and Mr. Wigg (Lab.). both of whom suggested that the Minister of Defence should have power to interfere with the autonomy of the three Service departments, Sir Anthony Eden said he was only asking the House to embark on a " comparatively modest step " which would greatly help the organization and which his technical advisers believed would assist them.

Sir William Dickson (55) served in the First World War in the Royal Naval Air Service and afterwards with the R.A.F. During the Second World War he commanded the R.A.F. in Italy. He became Vice-Chief of the Air Staff in 1946, C -in-C., Middle East Air Force in 1942, and Air Council Member for Supply and Organization in 1950

Air Marshal Sir Dermot Boyle (51) had been A O.C.-in-C., Fighter Command, since April 1953, after having been A.O C. No. 1 Group, Bomber Command, in 1951-52.

In addition to Marshal of the R.A.F. Sir William Dickson and Air Marshal Sir Dermot Boyle, the members of the Chiefs of Staff Committee are Admiral Earl Mountbatten (First Sea Lord), General Sir Gerald Templer (Chief of the Imperial General Staff), and General Sir Nevil Brownjohn (Chief Staff Officer to the Minister of Defence).

Appointment of C.-in-C., U.K. Land Forces.

The War Office announced on Nov. 3, 1955, that General Sir Robert Mansergh, Commander-in-Chief, Allied Forces, Northern Europe, had been appointed Commander-in-Chief, United Kingdom Land Forces, and would take up his new duties in January 1956.

The War Office recalled that the Defence White Paper of 1955 had made clear that all members of the armed forces in the U.K. must be prepared in time of war to play a large part in assisting the civil authorities in mitigating the effects of nuclear attack. Since January, 1951, the appointment of C.-in-C., U.K. Land Forces-designate had been held by General Sir Miles Dempsey (a retired officer) on a part-time basis. In view, however, of the paramount importance of control under conditions of thermo-nuclear warfare it was now considered necessary to appoint a serving officer on a full-time basis. In his new post General Mansergh would be chairman of the Commanders-in-Chief (U.K.) Committee, which was responsible to the Chiefs of Staff for co-ordinating service plans for home defence. In all other respects he would be responsible to the War Office. He would also be responsible for maintaining close contact with the Director-General of Civil Defence to ensure liaison at all levels of planning between the civil and military authorities in civil defence matters.

General Mansergh (55), who was born in South Africa, served for most of the Second World War with the Fifth Indian Division in the Western Desert, India, and Burma, and commanded the division during the final stages of the war against Japan After the war he held the successive appointments of Director of the Territorial Army, Military Secretary to the Secretary of State for War, Commander of British Forces in Hong Kong, and Deputy C.-in-C., Allied Forces, Northern Europe, before his appointment as C -in-C., Northern Europe in 1953 (see page 12736)

The changes in the defence organization described above, and the appointment of a C.-in-C., U.K. Land Forces, had been foreshadowed by the Prime Minister in his speech to the Conservative Party conference in October last (see pp. 14495-14496).—(Times - Daily Telegraph - Manchester Guardian)
(Prev. rep. Defence Estimates, 1955-56, 14089 A ; 14093 A ; Commanders-in-Chief (U.K.) Committee, 11443 A ; National Service, 14676 A.)

A. FRANCE. — Press. - " l'Express " returns to Weekly Publication.

It was announced on March 1 that the newspaper *l'Express*, which had been published as a daily since Oct. 13, 1955, would revert to weekly publication as from March 9. M. Servan-Schreiber remained editor of the paper.—(Le Monde, Paris)
(Prev. rep. 14549 D.)

B. ITALY - YUGOSLAVIA. — Trade and Credit, Fishing, and Technical Co-operation Agreements.

Three agreements between Italy and Yugoslavia were signed in Belgrade on March 3 after lengthy negotiations extending over several years. They dealt respectively with trade and credits, Italian fishing rights in Yugoslav waters, and technical co-operation, details being as follows :

Trade and Credit Agreement. Italy agreed to supply capital goods and machinery to a total value of $60,000,000, of which $45,000,000 will be covered by an Italian loan to Yugoslavia, repayable eight years after the delivery of the equipment, and the remaining $15,000,000 will be settled by the use of Yugoslav reparations claims against Italy. It was pointed out in the Yugoslav Press that the agreement constituted an innovation inasmuch as it did not fix in advance the kind of capital goods to be supplied.

Fishing Agreement. Yugoslavia granted Italy the right to fish in certain zones of the Adriatic near the islands of Palagruza (Pelagosa) and Kajola (Cajola), in the waters west of the island of Vis; near the islands of Jabuka (Pomo) and Kamik (Camic); and along the western coast of Istria. Contrary to the Italo-Yugoslav fishing convention of 1949, under which Yugoslavia had demanded a payment of 750,000,000 lire annually in return for the fishing rights (later reduced to 600,000,000 lire), no charge will be made under the new agreement, which is valid until Oct 31, 1957, and may be extended by a further year.

Technical Co-operation Agreement. This provided for co-operation in the planning and construction of new industrial works and the enlargement of existing ones ; exchanges of technicians and specialists ; the award of scholarships for technicians ; the granting of licences ; the loan of building machinery for public works ; and other measures for increasing technical co-operation between the two countries in industry and agriculture.

The agreements were welcomed by political leaders in both countries. Signor Segni (the Italian Prime Minister) declared that Italy desired " to open new broad prospects of co-operation between the two countries in a fruitful atmosphere of mutual trust," whilst M. Vukmanovich (a vice-president of the Yugoslav Federal Executive Council) stated that the previous trade agreement between the two countries had already shown " that we did not make a mistake when we embarked upon the path of Italo-Yugoslav co-operation."—(Corriere della Sera, Milan - Tanjug Agency, Belgrade - Neue Zurcher Zeitung) **(14165 A.)**

C CANADA. — Diplomatic Appointments.

It was announced in Ottawa on Dec. 20 that Mr. Leon Mayrand would succeed Lieut.-General Maurice Pope (retiring) as Canadian Ambassador to Spain in April 1956. Mr. Mayrand, formerly Ambassador in Chile, had been appointed Canadian member of the International Control Commission for Laos in 1954, following the conclusion of the armistice agreements in Indo-China.

Earlier Canadian diplomatic appointments included those of Mr. W. S. Alphonse Turgeon as the first Canadian Ambassador to Portugal, following the raising of the Lisbon Legation to Embassy status (April 1955) ; of Mr. L. Philippe Picard as Ambassador to Argentina ; and of Mr. Alfred Rive as Ambassador to the Irish Republic (both Aug. 2, 1955). Dr. R. A. MacKay (Associate Under Secretary of State for External Affairs) became Canada's permanent representative to the United Nations on Aug. 1, 1955, with ambassadorial status. The appointment of Mr. S. Morley Scott as Canadian High Commissioner in Karachi had been announced in October 1954.

It was announced in December that the Canadian and Danish Governments had agreed to raise their respective Legations in Copenhagen and Ottawa to the status of Embassies, in view of the close relations existing between the two countries as members of the North Atlantic Treaty Organization.
(Canadian Ministry of External Affairs, Ottawa)

D. JAPAN - NETHERLANDS. — Reparations Agreement. - Compensation for Dutch Civilian Internees.

An agreement was signed in Tokio on March 12 by the Japanese Foreign Minister (Mr. Shigemitsu) and the Netherlands Ambassador (Jonkheer Reuchlin) under which Japan undertook to pay $10,000,000 to the Netherlands in compensation for the internment of 110,000 Dutch civilians in Indonesia during the Second World War. Payment will be spread over five years and will be made in sterling. During the negotiations, which began last autumn, the Netherlands had originally claimed $27,500,000 —i.e. about $250 for every ex-internee. The agreement will come into force upon parliamentary approval in both countries.
(Netherlands News Agency - New York Times)

E. UNITED KINGDOM. — February Trade Figures.

Imports into the United Kingdom in February totalled £309,100,000, exports £246,100,000, and re-exports £13,500,000, the adverse visible balance thus amounting to £49,500,000.
(Board of Trade Journal) **(Prev. rep. 14724 E.)**

A. UNITED STATES. — Agricultural Policy. - President Eisenhower's Message to Congress. - Proposals for "Soil Bank" and Extension of Agricultural Surplus Disposal Programme. - Acreage Allotments for Cotton, Maize and Rice. - Government Stocks of Surplus Agricultural Products. - Foreign Protests at Disposal of U.S. Surplus Stocks below Market Prices.

Legislative proposals to deal with the mounting surpluses of agricultural products held by the U.S. Government, and at the same time to maintain the standard of living of American farmers, were sent to Congress by President Eisenhower on Jan. 9. The President's principal proposals were the creation of a "soil bank," under which farmers would be paid for taking land out of production, and an extension of the agricultural surplus disposal programme.

The President said that there were three main causes for the present position of U.S agriculture: (1) the prolonged retention of wartime production incentives, (2) current record livestock production and near-record crop harvests on top of accumulated surpluses carried over from previous years; (3) rising costs and high capital requirements. The problem of the "mountainous surpluses" overshadowed everything else, and although outlets had been found in the past three years for more than $4,000,000,000 worth of surplus commodities, these disposal efforts had not been able to keep pace with the problem. The 1954 Agricultural Act (see 13991 A) had not yet been able to make its potential contribution to solving the problem because it had only begun to take effect with the 1955 harvests, and because it was "smothered under surpluses amassed by the old programme." Whilst it was unthinkable to destroy surplus food, attempts to dispose of stocks domestically almost always competed with the new crops which farmers were trying to sell, whilst those disposed of abroad in quantities large enough to remedy present difficulties would "shatter world prices and trade, injure our friends, and undermine domestic prices as well."

The President's main proposals are summarized below.

The "Soil Bank." This should consist of an acreage reserve programme and a conservation reserve, its purpose being to "work off our surpluses so that our basic programme of 1954 can succeed in gearing production to prospective markets at fair prices." The problem had three aspects: (1) future production of crops of which there was the greatest surplus must be adjusted both to the accumulated stocks and to the potential markets, (2) producers of other crops and of livestock must be relieved of excessive production from acreage diverted from surplus crops; (3) lands poorly suited to tillage which were now producing unneeded crops, and were subject to excessive wind and water erosion, must be withdrawn from cultivation.

The acreage reserve programme, which would apply to wheat, cotton, maize and rice—the crops where the surplus position was most serious—would operate through farmers voluntarily agreeing to reduce their acreage sown to these crops, and receiving compensation from the Government equal to a percentage of the value of the crop they would normally have harvested. The scheme would be financed with commodities already owned and paid for by the Government, and as time, storage, and other costs were already depreciating the value of these stocks, the real net cost of the programme to the Government would be substantially less than the apparent cost in payments to farmers.

The conservation reserve programme sought to deal with the problem of the large areas of marginal land brought into production during the war, and by the post-war continuation of wartime incentives. Today the country did not need this land for harvested crops, and it was therefore proposed that farmers should be asked to contract voluntarily with the Government to change the lands most needing conservation measures to forage, afforestation, and water storage The Government would pay a fair share of the costs of establishing the conservation use, and the farmer would agree to carry out sound soil and water conservation policies, and to refrain for a specified period from returning the land to crop production and from grazing the land. It was estimated that some $350,000,000 would be invested in the conservation reserve during the 1956 calendar year, and about $1,000,000,000 over the next three years.

Disposal of Surpluses. Despite an expansion of the disposal programme, the investment of the Commodity Credit Corporation in price-supported commodities had increased by about $1,000,000,000 during the 1954-55 fiscal year Opportunities would therefore be sought to expand the programme of bartering for non-perishable strategic materials those agricultural products which deteriorated and were costly to store. In order to expand sales of surpluses abroad, the legislative provision limiting such sales to "friendly nations" only should be repealed To expand domestic sales, the Government should be permitted to sell at not less than the support price (plus carrying charges), instead of at 105 per cent as at present.

Commodity Programmes. For maize, the acreage allotments should be abandoned and price supports put on a discretionary basis comparable with other food-grains. For wheat, consideration should be given to authorizing the sale of limited quantities annually as animal feeding-stuffs; at the same time, several smaller wheat-growing States, which contributed little to commercial supplies or surplus stocks, should be removed from acreage and marketing controls. As regards cotton, rapidly advancing technology was "far outrunning" expectations based on acreage alone, and it was therefore proposed that the present acreage allotments should be replaced by quantity allotments, beginning with the 1957 crop. For rice, the existing production and marketing controls should be eliminated and prices supported on a discretionary basis. As regards peanuts, the present national minimum acreage allotment would normally produce more than the market would absorb at the support price, and it should therefore be abolished

The special school milk programme provided for under the 1954 Agricultural Act had met with "gratifying success." Some 9,000,000 children had benefited from the programme, and milk consumption had increased by over 450,000,000 half-pints It was recommended that the programme be extended for a further two years after June 30, 1956, and that expenditure thereon by the Commodity Credit Corporation should be raised from $50,000,000 a year to $75,000,000.

Limitation of Price Support Loans. The average size of American farms, measured either by capital or by acreage, had increased rapidly in recent years. This increase in size, in so far as it resulted from the removal of risk as a consequence of the price-support programme, constituted a threat to the traditional family farm. It was therefore proposed that a dollar limit be placed on the size of price-support loans to any one individual or farming unit, although this limit should be sufficiently high to give full protection to efficiently operated family farms.

A number of other recent developments concerning U.S. agricultural surpluses are described below.

Expenditure on Price Support Operations.

In a report published on Sept. 21, 1955, the Department of Agriculture stated that investment by the Federal Government in surplus agricultural products totalled $7,069,277,000 at the end of the last fiscal year (June 30, 1955), compared with $6,005,511,000 at the end of the previous fiscal year. Of the total, $4,971,463,000 represented farm products owned outright by the Government, and $2,097,814,000 loans to farmers for products withheld from the market. The report stated that the Government had lost $799,061,464 on its farm price operations during the year.

The products owned outright by the Government included 975,948,155 bushels of wheat valued at $2,546,979,497, maize, $985,969,678; cotton, $289.569,204; butter, $169,346,589; grain sorghum, $141,717,366; cheese, $139,874,426, rice, $124,868,960; and wool. $102,060.158. In addition, the Commodity Credit Corporation held $49,301,400 worth of strategic and critical materials acquired from abroad in barter deals. Crops stored under support loans included cotton ($1,094,361,157), maize ($469,550,944), tobacco ($402,556,449), wheat ($32.246,062), and other products ($99,099,658).

On Feb. 3, 1956, the Department of Agriculture announced that the Federal Government's investment in surplus agricultural products had risen to $8,700,000,000 as at Dec. 31, 1955.

Acreage Allotments and Price Supports.

The following acreage allotments and support prices were announced in recent months:

Cotton. In a referendum on Dec. 13, cotton growers voted overwhelmingly in favour of continued production controls and Government support for the cotton crop, on the basis of the acreage allotments announced on Oct. 14 (see 14492 C).

Maize. The Secretary of Agriculture, Mr. Benson, announced on Feb. 1 that the national acreage for the 1956 commercial maize crop would be cut by 15 per cent as compared with 1955—i.e. from 49,842,697 acres to 43,280,543 acres. On Feb. 8 it was announced that the support price would average $1.40 a bushel, or 81 per cent of parity, compared with $1.58 (87 per cent of parity) for the 1955 crop.

Rice. The Department of Agriculture announced on Dec. 30 that the national acreage allotment for the 1956 rice crop would be reduced by 15 per cent (the maximum permissible)—i.e. from 1,928,334 acres to 1,639,084 acres, and the support price from $4.66 per 100 lb. (85 per cent of parity) to $4.04 (75 per cent). The new quota was approved by a referendum of rice growers on Jan. 27.

Other Crops. Other parity prices for 1956 crops were announced on Feb. 8, as follows (1955 prices and parity percentages in parentheses): soya beans, $2.15 a bushel or 75 per cent of parity ($2.04, or 70 per cent); flaxseed, $3.09, or 70 per cent of parity ($2.91, or 65 per cent); cotton-seed, $48 a ton, or 70 per cent of parity ($46.34, or 65 per cent); oats, 59 cents a bushel, or 70 per cent of parity (61 cents, or 70 per cent); barley, 93 cents, or 70 per cent of parity (94 cents, or 70 per cent); rye, $1.16, or 70 per cent of parity ($1.18, or 70 per cent).

Disposal of Surplus Products.

Further plans for the disposal of surplus agricultural products, announced by the U.S. Government in recent months, included the following measures:

Dairy Produce. Diplomatic representatives of countries trading in agricultural products were informed by the State Department on Dec. 27 that a further large quantity of surplus dairy produce would shortly be offered by the U.S. Government on the world market on a competitive bid basis. It was expected that 10,000,000 lb. of butter would be offered (the same amount as in January 1955—see 13991 A), and also cheese and dried milk.

The Department of Agriculture reported on March 16 that it had disposed of all its stocks of surplus butter.

Wheat and Maize. Mr. Benson announced on Dec. 14 an extension of the surplus disposal programme to make wheat and maize available to needy people in foreign countries through religious and private welfare agencies. The programme would continue "until such time as any or all of the commodities can be disposed of in normal domestic channels or until they can be sold abroad," and the Commodity Credit Corporation would bear the costs of packaging, transportation to shipside, handling and other charges

Cotton. Mr. Benson announced on Feb. 28 that all stocks of surplus cotton held by the U.S. Government would be offered for sale on the world market at competitive prices after Aug 1, 1956. He said that the new programme would seek to recapture "our share" of the world market, and estimated this share at "somewhere in the neighbourhood of 5,000,000 bales a year," compared with 3,500,000 bales exported in 1954-55. Mr. Benson denied that the U S.A. was dumping cotton or other products to force down world prices, but emphasized that the new cotton programme was "notice to the world that we are not going to continue to hold an umbrella over world markets"

Agreements with Foreign Countries.

Some of the principal agreements concluded by the United States with foreign countries in recent months for the disposal of surplus agricultural products are summarized below.

Austria. Under an agreement signed in Vienna on Feb. 7, the U.S A. promised to supply Austria with $23,000,000 worth of surplus maize, wheat, cotton, tobacco, lard, and preserved fruit Austria would repay one-third of the value of the commodities in exports and would receive the remainder as a loan repayable in 20-40 years; the proceeds of the loan would be used to rehabilitate the economy of the former Soviet Zone of Austria, which had not benefited from E R P. assistance.

Indonesia. An agreement was signed in Jakarta on March 2 under which the U S A. agreed to sell Indonesia $91,800,000 worth of surplus agricultural products against payment in rupiahs, and to lend the proceeds to Indonesia for long-term economic development, for developing marketing facilities, and for educational exchanges between the two countries The agreement provided for the supply of 550,000,000 lb of rice ($35,800,000), about 206,000 bales of cotton ($36,000,000), 23,000,000 lb of leaf tobacco ($15,000,000), and about 1 270,000 bags of wheat flour ($5,000,000). Freight charges accounted for a further $4,900,000, bringing the total value of the agreement up to $96,700,000.

Japan. An agreement, signed in Tokio on Feb. 10, provided for the purchase by Japan of U S. surplus agricultural products worth $65,800,000, of which the principal items were wheat ($27,300,000), cotton ($18,700,000), and barley, maize and other grains ($11,200,000). At the same time the U S A made a grant of $15,000,000 worth of wheat and milk for use in the Japanese school-lunch programme. Of the proceeds from the sale of the agricultural commodities, 75 per cent would be available to Japan as a loan for economic development, whilst the remainder would be used by the U S A. to finance some of its activities in Japan

An earlier U.S.-Japanese agreement, concluded in May 1955, had provided for the sale of $85,000,000 worth of U.S. surplus agricultural products to Japan, the principal items being cotton ($35,000,000), wheat ($25,600,000), and rice ($15,600,000).

A number of protests against the U.S. disposals of agricultural products below market prices were made by the countries whose exports were most likely to be affected. The New Zealand Government protested on Dec. 20 about U.S. sales of surplus butter and cheese; Australia complained on Feb. 22 about disposals of wheat and other products; the Danish Government expressed anxiety on Feb. 15 about the growing sales in Europe of U.S. butter at subsidized prices; whilst a spokesman of the Egyptian Embassy in Washington described the U.S. decision to offer its surplus cotton on the world market "a very unfortunate step" about which his Government was "most unhappy."—(New York Times - New York Herald Tribune)

A. SOUTH AFRICA. — Proposed Contact with non-White African States. - Mr. Louw's Statement.

The Minister of External Affairs, Mr. Louw, stated at a Nationalist Party meeting in Cape Town on Dec. 30 that he planned to "make contact" with the non-White self-governing States of Africa. He said that South Africa would have to remain in touch with other territories in Africa, particularly those south of the Sahara, and announced that the Africa Division of the Department of External Affairs was being reorganized.

Speaking of the "seriousness" of the Native question, Mr. Louw declared that the steadily-growing spirit of national consciousness among the Natives of the African continent, the increase of Communist propaganda among the Natives, the influence on Natives of European and American liberalism, the attacks on South Africa and on the colonial Powers in the United Nations, and the new world cry of "fundamental human rights," were all factors which would have to be taken into consideration. (Cape Times)

B. PORTUGAL. — The Corporative State.

A Bill providing for the creation of corporations in many branches of Portuguese life, in accordance with the principles of the "Corporative State" proclaimed in the 1933 Constitution, was sent to the National Assembly on March 17 by Dr. Salazar, the Prime Minister.

Although Portugal had theoretically been a Corporative State since 1933, no actual corporations had in fact been set up, the creation of such bodies having been held up by the Second World War. Some 250 guilds, however, had come into existence, comprising associations of various kinds of workers, of employers and employees, and of persons engaged in the same trade or profession. Under the legislation introduced by Dr. Salazar, these guilds or associations will be organized into corporations, the first of which will be formed in the fields of agriculture, industry, commerce, transport and tourism, credit and insurance, and the fishing and canning industry. Similar corporations are envisaged in the field of cultural activities.

The Minister of Corporations and Social Security (Dr. Veiga da Macedo) stated at a press conference that the corporations would play an increasingly important role in the national life, that they would have the juridical status of "collective personality," and that they would have complete autonomy in representing the interests of their members. Emphasizing that the Portuguese corporative system bore no resemblance to the pre-war Italian Fascist corporative State, the Minister pointed out that whereas the Italian corporations had been controlled by the State, the Portuguese corporations would be independent bodies possessing powers which would limit those of the State. (Times - New York Times - Le Monde, Paris)

C. ATOMIC RESEARCH. — Joint Institute for Nuclear Research established by Communist Countries.

It was announced in Moscow on March 26, at the end of a six-day conference attended by representatives of 11 Communist countries, that an Eastern Institute for Nuclear Research would be jointly established in the Soviet Union. The communiqué added that the Soviet Government had provided a 680-million-volt cyclotron for the project; that an electrophysical laboratory would be provided by the Soviet Academy of Sciences; and that other countries could take part in the project if they wished, with equal rights.

The countries participating in the Eastern Institute for Nuclear Research are the Soviet Union, the People's Republic of China, Poland, Czechoslovakia, Bulgaria, Hungary, Rumania, Eastern Germany, Albania, Mongolia, and North Korea.
(Times - Manchester Guardian - Polish Embassy, London)

(Prev. rep. 14704 A.)

D. UNITED STATES - SOVIET UNION. — Soviet Payment for Loss of U.S. Plane in Bering Straits Incident.

The U.S. State Department announced on March 19 that the Soviet Union had paid damages of $724,947.68 for the loss of the U.S. naval plane shot down by Soviet fighters in the Bering Straits area on June 23, 1955. The State Department spokesman (Mr. Lincoln White) explained that although the amount represented only half the value of the plane, the U.S. Government had accepted it as the Soviet Government had expressed its regret at the incident and had instructed its military authorities "to refrain from any future action of this character." Mr. White added that the occasion was the first on which any Communist country, other than Yugoslavia, had paid compensation for such incidents.—(New York Times)

(Prev. rep. Bering Straits Incident, 14311 A.)

E. YEMEN - SOVIET UNION. — Trade Agreement.

The Yemeni Legation in Cairo announced on March 8 that a trade agreement had been signed between Yemen and the U.S.S.R. under which Yemen would export coffee, dried fruit, hides, and other commodities in return for Soviet industrial and agricultural machinery, building equipment, oil products, wheat, and rice. The announcement also said that the Soviet Union had offered to build complete factories in Yemen, as well as to give technical assistance.—(New York Times)

(Prev. rep. 14522 C.)

F. SUDAN. — Diplomatic Relations with U.S.S.R.

It was announced in Khartoum on March 15 that Sudan and the U.S.S.R. had agreed to establish diplomatic relations and to establish Embassies in each other's capitals. The Moscow announcement stated that Mr. Leonid Teplov, a senior official of the Soviet Foreign Ministry, and a former member of the London Embassy, would become the first Soviet Ambassador in Khartoum.—(Times) **(Prev. rep. 14703 B; 14624 B.)**

A. AUSTRALIA. — Economic Situation. - Increased Taxation and other Anti-inflationary Measures.

Mr. Menzies, the Prime Minister, announced in the House of Representatives on March 14 that the Government had decided, as an anti-inflationary measure, to impose a number of taxation increases estimated to yield £A110,000,000 additional revenue in a full year. The new taxes, which were designed to check excessive demand for consumer goods and for capital investment, would be imposed on motor vehicles and petrol, beer, spirits, tobacco, and cigarettes, on other less essential consumer goods, and on companies. Mr. Menzies gave the following details:

Motor Vehicles and Less Essential Goods. The present sales tax on non-commercial motor vehicles would be raised from 16⅔ to 30 per cent, and on commercial motor vehicles and motor-cycles from 12½ to 16⅔ per cent. The tax on less-essential goods, ranging from jewellery to gramophone records, would go up from 16⅔ to 25 per cent. These increases were estimated to produce about £A30,000,000

Beer and Spirits. The excise duty on beer would be increased by 2s. 8d. a gallon and the duties on spirits by 15s. 6d. a gallon. Estimated yields were £A29,300,000 and £A2,200,000 a year respectively.

Tobacco. Duties on manufactured tobacco would be increased by 4s a lb, on cigarettes by 6s. a lb, and on cigars by 5s 6d a lb, to produce an additional £A12,000,000.

Petrol. The petrol tax would be raised by 3d. a gallon, to yield £A12,000,000 At the same time, however, the payment by the Federal Government to the States for roads would be increased from 7d. a gallon to 8d, representing approximately an additional £4,000,000 on the roads grant.

Company Tax. This would be increased all round by 1s in the £ to yield an additional £A30,000,000

Bank Charges and Interest Rates. The Government had agreed (*a*) that the bank overdraft rate should be permitted to rise from 5 per cent to an average of 5½ per cent, with a maximum of 6 per cent, and (*b*) that there should be an increase of 1 per cent in interest rates paid by banks on fixed deposits.

Mr. Menzies said that Australia's overseas balance had been dropping steadily in spite of the import cuts imposed in October 1955. A vast demand for imported goods had put an immense strain on the country's balance of payments, and the wage level was threatening export capacity. Nevertheless, the new measures proposed by the Government gave every reason to suppose that the Government's objective of balancing its external accounts by the middle of 1956 would be achieved

Explaining the new taxation of motor vehicles. Mr Menzies said that vehicles not only constituted a substantial import item but also represented the bulk in value of hire-purchase transactions, generating a vast capital demand inside Australia. While fully aware of the benefits that would ultimately flow from this great industry, the Government was convinced that proper counter-inflationary action demanded a temporary restraint upon it Registrations of new motor vehicles had risen from 157,000 in 1952-53 to 245,000 in 1954-55, the main increase having been in cars. Imports of vehicles and parts, rubber and other tyre materials, motor spirit and oil were estimated at £A152,000,000 in 1954-55, out of total imports of £A844,000,000

The increased beer duty was not expected to reduce consumption, but would make a powerful contribution to the avoidance of deficit finance In spite of the increased duty of 2s. 7d in the 1951-52 Budget, consumption had risen from 173,000,000 gallons in that year to 183,000,000 gallons in 1953-54, and in the current estimate it was calculated to rise to the "staggering" total of 223,300,000 gallons. Mr Menzies added that beer consumption per head had doubled since 1938-39.

Referring to the proposed rise in interest rates, Mr Menzies said that the trading banks had found that funds were being diverted from fixed deposits to finance expenditure at much higher short-term rates of interest on hire-purchase and similar ventures The financing of enterprises at the present relatively cheap level had been increasingly resorted to because, if a company raised capital by a new share issue, it must succeed sufficiently to pay an adequate dividend on that capital, but if it raised the money on a bank overdraft, the whole interest charge on the overdraft was business expenditure deductable for taxation purposes, and the amount of the overdraft required no dividend. Overseas enterprises had been able to borrow from the banking system at a relatively low overdraft rate and then remit surplus funds abroad so as to take advantage of higher rates overseas. This had involved a greater reliance on borrowing in Australia, rather than overseas, for the development of local business and for financing exports, including wool

Mr. Menzies added that the Government's legal advisers did not believe that Federal control of capital issues could be reconstituted for anti-inflationary purposes, and the same applied to "the vexed problem of hire-purchase finance." The whole problem might be one for discussion with the States, which had the necessary powers.

Dr. Evatt (Leader of the Opposition) declared on March 20 that the Labour Party was "flatly opposed" to the Government's taxation proposals. He alleged that the Australian Government was following the example of the Conservative Government in Britain by reserving its taxation until after the election.—(Australian News and Information Bureau)

(Prev. rep. 14470 A.)

B. UNITED KINGDOM. — Ending of State Trading in Bacon and Pork. - Ten per cent Duty on Bacon and Pork Imports. - Negotiations on Danish Bacon Imports.

The Minister of State at the Board of Trade (Mr. Austin Low) informed the House of Commons on Feb. 28 that when the present long-term bacon agreement with Denmark ended on Sept. 30, 1956, the trade would be restored to private hands. Thereafter a general 10 per cent duty would be applied to imports of foreign bacon and pork, but imports from Commonwealth countries and the Irish Republic would continue to be admitted duty-free.

The decision to end State trading in bacon and pork marked the virtual completion of the process of ending State trading in food. Mr. Low's announcement came at the end of lengthy negotiations with Denmark (the principal supplier of imported bacon), whose representatives had objected to the proposed 10 per cent import duty and had sought compensatory guarantees.

Mr. Low said that an agreed minute on the negotiations with Denmark (i) took note of the fact that the U K had decided to apply a 10 per cent *ad valorem* tariff; (ii) provided for the necessary modification of the 1933 and subsequent agreements with Denmark, which guaranteed duty-free treatment for imports of Danish bacon, and (iii) authorized the British Government to inform the contracting parties to GATT that negotiations with Denmark for the establishment of the proposed tariff preference had been concluded In view of the great importance for the Danish economy of the bacon trade with the U K, the British Government had given Denmark the following undertakings.

(1) If at any time events should occur which were likely to affect the U.K market so as to cause substantial injury to Danish producers the U K Government would consult with the Danish Government at the latter's request

(2) Britain would not raise the rate of duty on Danish bacon above 10 per cent *ad valorem*

(3) Britain would suspend the tariff if at any time it was found necessary to apply quantitative restrictions to Danish bacon imports If quotas were allocated to individual countries, Denmark (subject to Britain's obligations under GATT) would be allocated the share of total imports of foreign bacon provided for in the 1933 and subsequent agreements.

(4) These arrangements would remain in force for four years from Oct. 1, 1956. During that time there would be regular joint reviews of the market prospects for Danish bacon in the United Kingdom

The Danish Prime Minister, Hr. Hansen, stated on Feb. 28 that whilst Denmark had no means of preventing Britain from applying the new arrangements, his Government had made it clear that Denmark could not sign a formal agreement accepting the principle of the tariff. They had learned with regret of the British Government's decision to introduce the bacon duty, especially in view of obstacles to agricultural exports which had arisen in other markets In all the circumstances, however, he considered the results of the negotiations to have been valuable—a view which was shared by the Danish agricultural organizations. Hr. Hansen added that it was of paramount importance that good trade relations with Britain should be maintained.—(Times - Manchester Guardian - Berlingske Tidende, Copenhagen - Politiken, Copenhagen) **(Prev. rep. Ending of Government Meat Trading, 13562 C; Anglo-Danish Bacon Agreements, 14456 B; 13101 D; 12534 C; 9540 A.)**

C. PERSIA. — Expulsion of Soviet Military Attaché.

It was announced in Teheran on March 1 that the Persian Government would demand the recall of the Soviet Deputy Military Attaché, Major A. T. Kuznetsov, who had been arrested in the street the previous evening after (it was alleged) he had just received secret maps and photographs of air defence plans for the Teheran region from a warrant-officer of the Persian Air Force A Note containing a formal protest, and demanding the recall of Major Kuznetsov within a week, was handed to the Soviet Embassy on March 4. A Soviet counter-protest alleging that Major Kuznetsov's diplomatic immunity had been violated was rejected by the Persian Government on March 15.—(Times - Manchester Guardian)

(Prev. rep. Persian-Soviet Relations, 14654 A.)

D. NEW ZEALAND. — Exchange of Cabinet Posts.

The N.Z. Prime Minister (Mr. Holland) announced on March 20 that Mr. Dean Eyre, Minister of Industries, Commerce and Customs, had exchanged portfolios with Mr. E. H. Halstead, Minister of Social Security, Tourism, and Health Resorts. The exchange of portfolios followed a political dispute in which Mr. Eyre, an importer and manufacturer, had been criticized for holding portfolios which, it was alleged, conflicted with his private interests. Mr. Halstead remained Minister Assistant to the Prime Minister.—(Directorate of Information Services, Wellington) **(Prev. rep. 13953 A.)**

MARCH 31—APRIL 7, 1956

A. MOROCCO. — French Recognition of Moroccan Independence. - Joint Declaration on Independence and Integrity of Morocco. - Agreement on Moroccan Diplomatic Representation and Formation of Moroccan Army - The Sultan's Broadcast. - Nationalist Demands for Integration of Spanish Morocco. - Ending of Riff Revolt. - U.S. Proposal to abandon Extra-territorial Rights in Morocco.

Negotiations between the French and Moroccan Governments on the future relationship between the two countries opened in Paris on Feb. 15 in the presence of the Sultan. The first phase of the talks concluded on March 2, when M. Pineau (the French Foreign Minister) and Si Bekkai (the Moroccan Prime Minister) signed a joint declaration recognizing the independence, sovereignty, and integrity of Morocco, and the right of Morocco to appoint her own diplomatic representatives and to control her own armed forces. The text of the declaration and of the attached protocol are given below.

Joint Declaration.

" The Government of the French Republic and H.M. Mohammed V, Sultan of Morocco, affirm their desire to give full effect to the declaration of La Celle-Saint-Cloud of Nov 6, 1955 (see 14528 A) They note that as a result of the evolution realized by Morocco on the path of progress, the Treaty of Fez of March 30, 1912, no longer corresponds to the needs of modern life and can no longer govern Franco-Moroccan relations.

"In consequence, the French Government solemnly confirms its recognition of the independence of Morocco, which implies in particular the possession of her own diplomatic representation and her own army, as well as its desire to respect and ensure respect for the integrity of Morocco's territory, as guaranteed by international treaties.

"The French Government and the Sultan of Morocco declare that the negotiations which have opened in Paris betwen Morocco and France, as sovereign and equal States, have as their object the conclusion of new agreements which, whilst respecting the sovereignty of the two States, will define their interdependence in those spheres in which they have common interests; that they will organize their co-operation on the basis of liberty and equality, notably in matters of defence, external relations, economy and culture; and that they will guarantee the rights and liberties of Frenchmen living in Morocco and Moroccans living in France.

The French Government and the Sultan of Morocco agree that, pending the entry into force of these agreements, the new relationship between France and Morocco will be based on the provisions of the protocol appended to this declaration "

Protocol.

" (1) Legislative power will be exercised by H M the Sultan as sovereign ruler. The representative of France will be informed of draft *dahirs* and decrees, and will submit his observations when these measures affect the interests of France, Frenchmen, or foreigners, during the transitional period.

(2) The Sultan will have a national army at his disposal. France will lend her assistance to Morocco for the formation of this army. The present status of the French Army in Morocco will remain unchanged during the transitional period.

(3) Those administrative powers which have hitherto been reserved [to France] will be transferred to Morocco under conditions to be decided by joint agreement

The Moroccan Government will be represented, with the right to vote, in the Committee of the Franc Area, which is the central directing organ of monetary policy for the whole of the franc area.

The guarantees enjoyed by French officials and agents serving in Morocco will remain in force.

(4) The representative of the French Republic in Morocco will bear the title of High Commissioner of France."

Exchange of Letters.

In an exchange of correspondence published simultaneously, Si Bekkai and M. Pineau agreed .—

(1) that the French Government should continue to be responsible for Morocco's foreign relations and to represent and protect Moroccan interests and Moroccan nationals abroad until new arrangements had been agreed upon ,

(2) that a joint commission should meet in Rabat or Paris on March 12 to consider the application of Article 2 of the protocol ;

(3) that the existing monetary and financial regime should continue unchanged until the new forms of co-operation between the two countries had been defined , and

(4) that a joint commission should meet in Rabat to examine the question of the transfer of powers, with the exception of monetary, financial, defence, and diplomatic problems.

A communiqué issued by the French Foreign Ministry on March 2 stated that, in accordance with constitutional practice, both the agreements resulting from the declaration, and those defining the future relationship between France and Morocco which would result from the discussions in progress, would be submitted to Parliament for ratification at the appropriate time.

The Sultan returned to Rabat on March 5, accompanied by M. Dubois (the former Resident-General, now known as French High Commissioner), and was enthusiastically welcomed by large crowds on his arrival. In a broadcast on March 7 he paid tribute to the co-operative attitude of the French Government; emphasized the necessity of upholding public order and respecting the rights of the French settlers ; and announced his determination to ensure the reunification of Morocco.

The Sultan said . " It will be the duty of our Government to ensure the security and protect the property of all the inhabitants of this country, whatever their origin or religion The Moroccan State cannot tolerate infringements of its authority and prestige, particularly as a legal regime exists and is the source of all power Any breach of the peace constitutes disobedience to the authority of the regime, is prejudicial to the country's interests, and endangers its existence. . . .

" During our stay in France we were again enabled to appreciate the dignity and generosity of the French people. This gives us reason to believe that future negotiations will be guided by the same feelings. We wish to see the same spirit dominate relations between our subjects and the Frenchmen resident in Morocco, whose contribution to our country's prosperity and progress we have never forgotten. We must guarantee their interests, their freedom, and their future in Morocco, and we hope that they will continue their work in the atmosphere of friendship and understanding which must prevail between all sections of the population.

" We are well aware that our efforts . . . will be ineffective so long as our country's soil remains divided, governed by different agreements and different regimes, despite the maturity of its people and their consciousness that it is necessary to reunite our country. Are not our people already united around the same throne, under the same flag, with the unity of feeling inspired by membership of a single nation ? Our first task, therefore, will be to do everything in our power to ensure that our country shall recover its unity. For this we count upon Divine assistance, the effective aid of the Moroccan people, and the goodwill of friendly nations. . ."

The second phase of the Franco-Moroccan negotiations opened on March 12, when discussions on the formation of a Moroccan army and on the transfer of the " reserved " powers began in Rabat. It was announced on March 14 that an agreement had been reached on the transfer to the Moroccan authorities of prison administration, and that the other reserved powers under discussion were the control of the public service, the police, and civil aviation.

The French Prime Minister, M. Mollet, had previously issued a statement on March 9 in which he gave an assurance that the transfer of the reserved powers would in no way affect the position of French nationals in Morocco, whose rights would be recognized in the final agreement between France and Morocco. Certain of these officials, however, would gradually be replaced by Moroccans, and the Government would therefore introduce legislation to protect their interests. The Socialist and Catholic civil servants' unions informed M. Mollet on March 14 of their uneasiness at the transfer of the public services to the Moroccan Government " without clearly defined guarantees," and requested the French Government to introduce a Bill providing for their integration into the French Civil Service.

It was officially announced in Rabat on March 22 that a Moroccan army of 20,000 men would be raised initially ; that it would be under the supreme command of the Sultan, with Prince Moulay Hassan as Chief of Staff ; and that M. Guedira (Minister of State) had been appointed Minister of National Defence. M. Mohammed Laghzaoui, a leading member of the Istiqlal, was appointed Director-General of Police (*sûreté nationale*) on the same day, although M. Petitjean, the director of police, retained his post for the time being at the Moroccan Government's request.

Developments in Spanish Morocco.

M. Massigli, the secretary-general of the French Foreign Ministry, officially informed the Spanish Ambassador (the Count of Casa-Rojas) of the Franco-Moroccan agreement on March 2. In its reply, handed by the Ambassador to M. Massigli on March 8, the Spanish Government was said to have expressed certain reservations in its attitude towards the agreement.

Nationalist demonstrations in the Spanish zone in celebration of the agreement led to serious clashes with the police in Tetuan, Larache, and El Ksar-el-Kebir on March 4-5, in which about 20 people were killed and 100 wounded. These incidents led to anti-Spanish demonstrations on March 6-8 in Rabat, Fez, and in the international zone of Tangier, whilst bombs thrown at the Spanish Consulates in Casablanca and Meknès caused some damage.

In his broadcast of March 7 (see above) the Sultan said that he had been " painfully surprised " by the incidents in the Spanish zone, which had originated in the " measures taken by the local police to prevent peaceful demonstrations organized by the people on the occasion of the proclamation of Morocco's independence." Si Bekkai informed the Spanish Vice-Consul in Rabat on the same day of the Moroccan Government's

"strong reprobation" of the incidents; the fact that this protest was transmitted through the Vice-Consul, and not through the Khalifa (the Sultan's representative in the Spanish zone), was regarded as an indication that the Sultan expected future negotiations to be conducted as between two sovereign States and on the basis of Moroccan unity. Most of those arrested during the demonstrations were released by the Spanish authorities on March 10, and a general amnesty was granted on March 15 to political prisoners in the Spanish zone.

The Spanish High Commissioner in Morocco, General Valino, visited Madrid on March 9 for consultations with General Franco. The Khalifa, who had appealed to General Franco to take steps to bring about a relaxation of tension in Spanish Morocco, also arrived in Madrid on March 17 and was received by General Franco and Señor Artajo, the Spanish Foreign Minister. Meanwhile, Si Allal El Fassi (the leader of the Istiqlal, who has lived for the last five years in Cairo) had visited Spain from March 13-17 and had been received by Señor Artajo and General Valino. He proceeded on March 17 to Tangier, where he announced that the National Reformist party (the principal nationalist party in the Spanish zone) had decided to amalgamate with the Istiqlal.

The Spanish Vice-Consul in Rabat informed Si Bekkai on March 13 that the Spanish Government had invited the Sultan to visit Madrid.

Ending of Riff Revolt.

Although minor incidents continued in the Riff area until March 18, no large-scale operations were undertaken either by the French forces or the rebels after the first week of March. M. Bouabid (the Moroccan Minister of State) announced on March 17 that an agreement had been reached with the insurgents after negotiations lasting some weeks. It was subsequently reported that the population of the Boured area, which had crossed into the Spanish zone in October, were returning to their homes, and that the Governor of the province of Tafilalet had persuaded a rebel band about 150 strong to lay down their arms.

Internal Disorders.

Terrorist activities continued during February and March, though on a decreasing scale; among the victims was Thouria Chaoui, Morocco's first woman aviator and a supporter of the Istiqlal, who was shot in Casablanca by unknown assailants on March 1. The total number of terrorist acts committed between June 1, 1955, and Feb. 15, 1956, was officially given on March 6 as 999 attempts on individuals and 3,116 against property, and the number of victims as 470 killed and 1,024 wounded.

A police post at Ain-Leuh (about 60 miles south of Meknès) was attacked on March 6 by two armed men, a French clerk being killed. As a result of inquiries, two former caïds were arrested on March 10 on suspicion of complicity in the incident, whilst on March 16 another ex-caïd was arrested and the former Pasha of Fez and two other ex-caïds were placed under surveillance. The ex-pasha and the five caïds had all been dismissed after the Sultan's return as supporters of the ex-Sultan Ben Arafa.

Relations with the United States.

The State Department announced on Jan. 26 that the U.S. Government would ask Congress for authority to abandon the extra-territorial rights exercised by the U.S.A. in Morocco. The communiqué added: "The United States is following closely the progress which France and Morocco are making in working out their future relationships. We consider that to modernize our own treaty relationship with Morocco, with respect to our extra-territorial rights, would be the only course in keeping with this evolution."

U.S. extra-territorial rights in Morocco originated in a treaty of 1787, which authorized U.S. consular authorities in Morocco to try civil or criminal actions brought by one U.S. citizen against another. They were renewed in a treaty of 1836, which also permitted the establishment of consular courts for the settlement of cases in which U.S. citizens were defendants, and were further extended by the Act of Algeçiras (1906), which forbade the application of Moroccan laws to U.S. citizens without the prior consent of the U.S. Government. The exercise of these rights, however, had been limited since 1952 by a decision of the International Court of Justice, which since 1950 has been considering a dispute between France and the U.S.A. over the liability of U.S. residents in Morocco to import controls (see 11110 C). The U.S.A. is the only country still retaining extra-territorial rights in Morocco, the similar rights formerly exercised by the United Kingdom having been abandoned in 1937.

M. Cherkaoui (a Minister of State) said in Paris on Jan. 17 that the agreement concluded between France and the U.S.A. in 1950, under which U.S. air bases were established in Morocco, had no legal basis as the Sultan's consent had not been obtained, and that it would be necessary to negotiate a new agreement on the subject. State Department spokesmen maintained that the agreement was valid, as France was Morocco's legal representative in foreign affairs, adding, however, that it might become expedient to re-negotiate the agreement when Morocco achieved independence.—(Le Monde, Paris - Le Figaro, Paris - New York Times) **(Prev. rep. Morocco, 14677 A.)**

A. MUSCAT AND OMAN. — Reassertion of Sultan's Sovereignty. - Flight of Imam of Oman.

Forces of the Sultan of Muscat and Oman occupied the town of Nazwa on Dec. 15, 1955, without resistance, after the Imam of Oman (Sheikh Ghalib bin Ali) had fled from the town. The mountainous province of Oman had not been under the effective control of the Sultanate for 40 years, as the local tribes had rebelled in 1913, since when *de facto* control had been exercised by a theoretically "elected" Imam. The present Imam had attempted to make Oman a completely independent State with Saudi Arabian and Egyptian support. An official statement issued in Muscat said that "certain disaffected sheikhs" had been plotting for some time to disrupt the Sultanate "with the aid of foreign gold, arms, and propaganda."

The Sultan's forces occupied Rostak, the last stronghold of the Imam, on Dec. 22, on which date the Sultan arrived in the area to re-establish his sovereignty over the province and accept the allegiance of tribal leaders. The only casualties reported in the operations—which took place entirely under the Sultan's responsibility, though with the British Government's approval—were six tribesmen killed.

The reoccupation of Oman and the reassertion of the Sultan's authority will make possible the establishment of road communication between Tahud (in the Omani Desert, where the Iraq Petroleum Company is drilling for oil) and the port of Muscat. The Muscat and Oman Field Force, which carried out the operations, consists of 350 men under the command of British and Pakistani officers headed by Lieut.-Colonel W. A. Cheeseman, and is financed partly by the Sultan and partly by a subsidiary of the Iraq Petroleum Company.

In October last other troops of the Sultan of Oman and Muscat, with those of the Sheikh of Abu Dhabi, had occupied the Buraimi Oasis, which is the subject of a dispute between the Sultan and Saudi Arabia.—(Times) **(Prev. rep. 14534 A.)**

B. PERSIA. — Rejection of Dr. Mossadeq's Appeal. - Arrest of M. Hussein Makki and Tudeh Party Members.

The Persian Supreme Court rejected on March 8 a further appeal by Dr. Mossadeq, the former Prime Minister, against the three-year sentence of imprisonment which had been passed on him in 1953.

On Jan. 8 M. Hussein Makki, the former head of Persia's nationalized oil industry under the Mossadeq regime, had been arrested in connexion with the assassination of General Razmara in 1951; other persons arrested at the same time included M. Narriman, Finance Minister under Dr. Mossadeq.

The Military Governor of Teheran, General Bakhtiar, announced on Jan. 1 that over 100 persons belonging to the "intelligence service" of the Tudeh (Communist) party had been arrested.

General Bakhtiar said that this organization had not only provided the Tudeh party with information about the Persian Army but had engaged in murder, arson, and bank robbery to provide party funds. It had been headed by Captain Ruzbeh, a former Army officer who had been implicated in the "officers' conspiracy" discovered in the autumn of 1954, and whose liaison with the Tudeh Party's central committee had been effected through Dr. Morteza Yazdi (see below). General Bakhtiar added that the main aim of the Tudeh Party was to force Persia into the Communist orbit through subversion and acts of terrorism.

Dr. Yazdi, one of the founders of the Tudeh Party and a former Minister of Health, was sentenced to death for treason by a Teheran military court on Sept. 25, 1955. The Shah commuted the death sentence to life imprisonment on Jan. 1, 1956.—(Times - Le Monde, Paris) **(Prev. rep. 13571 B.)**

C. UNITED STATES. — Senate Appointment.

Mr. William R. Laird (Democrat) was appointed to the U.S. Senate by Governor Marland of West Virginia on March 13 in succession to Senator Harley M. Kilgore, who had died on Feb. 28. The appointment of Mr. Laird, formerly a State Tax Commissioner, left the state of the parties in the Senate unchanged at 49 Democrats and 47 Republicans. An election will, however, be held in November for a Senator to serve the unexpired two years of the late Senator Kilgore's term.

Senator James O. Eastland (Democrat, Mississippi) was elected chairman of the Senate Judiciary Committee on March 2 in succession to the late Senator Kilgore.—(New York Times) **(Prev. rep. 13979 A.)**

A **CYPRUS. — British Parliamentary Debates on Cyprus Situation. - Opposition Protests against Deportation of Archbishop Makarios. - Defeat of Opposition Motion. - Archbishop of Canterbury's Correspondence with Archbishop Makarios. - Sir John Harding's Statement on Cyprus Situation.**

The decision to deport Archbishop Makarios was strongly criticized by the Leader of the Opposition, Mr. Hugh Gaitskell, and the leader of the Liberal Party, Mr. Clement Davies. In statements issued on March 9, Mr. Gaitskell said that the Archbishop's deportation seemed to him "an act of folly which will only make the insurgents more determined in their fight for self-determination and therefore encourage terrorist outrages against our troops," whilst Mr. Davies described the deportation as "an act of madness," adding that "nothing is more likely to stir up animosity and feelings of intense anger among the people of the island."

The following Opposition motion was tabled in the House of Commons on March 8 in the names of Mr. Gaitskell, Mr. Griffiths, Mr. Bevan, Mr. Robens, Mr. Creech Jones, and Mr. Younger.

"That this House regrets the failure of H M Government, after protracted negotiations, to reach a settlement in Cyprus, and in particular their action in discontinuing negotiations about the points now outstanding after the major issue of self-determination had been resolved."

An amendment was tabled on March 13 in the names of the Prime Minister, Mr. Butler, Mr. Selwyn Lloyd, and Mr. Lennox-Boyd, worded as follows:

"That this House welcomes the patient efforts of H M Government to secure agreements in Cyprus which would safeguard the interests of all communities and the strategic requirements of H.M. Government and their allies; approves the action already taken towards the restoration of law and order as an essential preliminary to constitutional progress, and pledges its full support to H.M. Government in the furtherance of these aims"

House of Commons Debate.

The situation in Cyprus was debated by the House of Commons on March 14, when the Opposition's motion was defeated by 317 votes to 252—a Government majority of 65—and the Government's amendment adopted by 317 votes to 251, a majority of 66.

Mr. Aneurin Bevan, who opened the debate by moving the Opposition's motion, declared that the Opposition had been "ill requited" for the restraint they had shown over the Cyprus question in the last four or five months "We had been told," he said, "that negotiations had reached a delicate stage and that intervention by debates in the House might adversely affect them Then, before we had an opportunity of considering what the Colonial Secretary had done and the statement he had made [i.e. Mr Lennox-Boyd's statement of March 5—see 14757 A], he proceeds to take further steps which makes this debate today almost retrospective reflection We consider that to be shabby treatment. . ."

It was hard to discover (Mr Bevan continued) whether the Government wanted Cyprus as a base, or whether they wanted a base in Cyprus If the former were the case, the discussions with Archbishop Makarios had been "dishonest from the beginning" After maintaining that there was no real conflict between Britain's strategic interests and the Cypriot desire for self-government, Mr Bevan said that the Opposition could not understand why the negotiations with the Archbishop had failed. The reasons given for his deportation were "reasons which were there before the negotiations started," and there was no evidence that he had recently committed any more culpable offences than those which were already known beforehand There was no justification for the Archbishop's deportation before the House had had an opportunity of discussing the situation, and "that almost irrevocable step" should not have been taken until the matter had been debated by Parliament.

"It is obvious to anybody who studies these events," Mr Bevan continued, "that it was only by close identification with those demanding full nationhood for Cyprus that he [the Archbishop] could have had any influence at all with the people of Cyprus. It is no use saying you must not negotiate with people who have been associated with violence It is absurd when we consider the history of the national movements in Ireland, the Gold Coast, and India. Why does the Tory party keep deceiving itself . . . by the assumption that you cannot negotiate with people who have been seditionists or terrorists?" After saying that "the same sort of language" had been used by the Conservatives about the Congress leaders in India in the early 'forties, and pointing out that Britain had eventually negotiated with the Indian leaders when in gaol, Mr. Bevan observed that it was "essential to remember that persons whom we look on here as terrorists are looked on by their fellow-nationals as patriots."

Mr. Bevan asserted that the Archbishop had emerged "an easy victor" from the publication of the Harding-Makarios correspondence, which had shown that the Government had never changed its position on fundamental matters. The Archbishop's request for a guarantee that the Greek majority in the island should have a majority of seats in the Legislative Assembly was in accordance with "the best liberal tradition," whilst his agreement that the Turkish minority should be represented in proportion to their numbers was also "a tolerant position." On the question of internal security—a matter in which the Government "had not moved one inch"—Mr. Bevan said that the Archbishop would certainly have been satisfied with a declaration that this subject should pass to the Cyprus Government "when reasonable order had been established." In view, however, of the fact that not only external affairs and defence, but also internal security, were to remain in British hands for an indefinite period, the Cypriots had been offered "not the reality of self-government but a sham"

Commenting on the fact that the Archbishop could not agree about the amnesty, Mr. Bevan said: "I cannot understand why Government supporters are so obstinate about this. Whenever settlements of difficulties like this have been accomplished, they have always been lubricated, and a new atmosphere of co-operation set going, by a wide and generous amnesty for those who have committed offences." Mr Bevan contended in this connexion that the amnesties offered in Malaya and Korea had been more generous than that which had been offered in Cyprus.

After asking whether there had been any justification at all for ending the negotiations, and whether it would not have been better to have suspended them and in the meantime reported to the House of Commons, Mr. Bevan declared: "We are doing the name of Great Britain great damage in almost every part of the world. We stood alone in 1940, but it was a noble isolation. We are almost standing alone today, but it is an ignoble loneliness that we are achieving. We have resorted to methods in Cyprus which in the worst days of the war we never adopted. Now we have no answer to those nations like the Soviet Union who jam our broadcasts We are deprived of our case The Government have thrown away our best armoury, over a small island like this, when the quarrel could have been settled long ago.

"Why is it that in the course of the last few days the British Government have received a further humiliation by the conduct of Washington? I almost sympathize with the Government here. I have been accused in the last four or five years of poisoning Anglo-American relations. If that had been my intention—which it never was—I could never have succeeded better than members opposite. . ."

In conclusion, Mr. Bevan said that the Opposition had been "disturbed" during the last few weeks by the behaviour of the Government, which "seemed to have got into a pendulum, swinging from one extreme to another." He added: "At one moment they are despondent, at another they are raucous. It appears that they have not adjusted themselves to what is happening in the world. They suffer from a kind of truculent nostalgia Every time a dependent territory or colony wins through to self-government and nationhood, the party opposite do not look on it as the progress of mankind but as the liquidation of their imperial inheritance. . . . Unless it can do better than it has done in the interests of Britain, it would be far better for it to resign and give another Government the opportunity."

Sir Anthony Eden (who moved the Government's amendment to the Opposition motion) said that the debates on Cyprus had so far paid little attention to the international aspects of the situation; in particular, the strategic importance of the island to Turkey had hardly been mentioned in the criticisms made "on both sides of the Atlantic." The island had been ceded to Britain after the First World War by the Treaty of Lausanne, to which Greece was a signatory, and Greece had thereby endorsed the island's cession to Britain In these circumstances it was not surprising that Turkey should take the view that she had a right to ask for modifications in the Lausanne treaty if any changes were made in the status of Cyprus. "For that reason," the Prime Minister declared, "I have never felt, and I do not feel now, that Cyprus is an Anglo-Greek question, or can ever be treated as such To attempt to deny it is to deny the map. It is equally unrealistic to lecture Turkey as to the view she ought to take about an island that is no farther from her coast than the Isle of Man is from ours"

Sir Anthony went on to refer to statements by the Greek Prime Minister (M. Karamanlis) in which the latter had said that failure to settle the Cyprus question would expose Greece to the danger of Communism, and that the Americans had saved Greece from being overrun by the Communists. "By saying that," said Sir Anthony, "he is really offering the most powerful argument against the transfer of sovereignty to Greece—and that is in Turkish minds as well as our own The claim to Cyprus was never made at any time during the war. Greek aspirations were then limited to the Dodecanese, and were supported by Britain. . . . When the Greek Prime Minister says that when Greece was in danger of being overrun by Communists, America came to her rescue, I am bound to take exception It is not in accordance with the facts. It was the British Government and British forces, in 1944 and 1945, which delivered Greece, at the cost of many British dead and wounded, from the certainty of Communist rule It is fair to say that the action of Sir Winston Churchill and the British Government—and I am not likely to forget, because I was in Athens at the time—saved Greece from being sucked behind the Iron Curtain"

Reviewing the Government's attempts to solve the Cyprus problem, the Prime Minister said that when the Archbishop had refused to co-operate with the Government towards the end of 1955, the difficulty then related solely to the question of self-determination. No other questions were raised at the time. An amended set of proposals were then put before the Archbishop and the Turkish Cypriot leaders, which went beyond anything proposed before and which could reasonably be held to meet any claim to self-determination "The Archbishop was not asked to sign the document," Sir

Anthony continued "All we asked was that he should undertake that he was prepared to accept it as a basis for co-operation in developing the Constitution. In return, we asked only one thing of the Archbishop, which is what we have asked throughout—that he should make some declaration showing that he was going to use his influence to end violence The Archbishop accepted the invitation to co-operate with the Governor in framing a Constitution . . but he made no offer to end violence, despite the fact that we told him repeatedly that he was entirely free at every stage of the discussions to reserve his whole position in respect of the Constitution if he wished"

The second phase of the negotiations, Sir Anthony went on, was concerned with the Archbishop's requirements about self-government. The Governor had been authorized on Feb 14 to put forward six important principles as representing the broad constitutional position of H.M. Government "They were as reasonable a set of proposals to work out a Constitution as could be devised. All we asked for at that stage, and at every stage, was a declaration against the use of violence We did not get it. . " Although the Archbishop's original demand was for self-determination (the Prime Minister continued), it had subsequently changed into a demand for details about the Constitution, and this, in turn, had been followed by other demands. "Step by step, as we made some arrangement and some concession. we were always asked for something more. '

After a tribute to the "valuable part" which had been played by Mr Francis Noel-Baker, M P., in his attempts as an unofficial mediator, the Prime Minister said that the final phases of the negotiations had been devoted to three issues raised by the Archbishop, "none of them having anything to do with self-determination as such" The first was the question of an amnesty The Colonial Secretary (Mr Lennox-Boyd) at first proposed that when law and order were re-established there should be an amnesty for all those convicted of offences under the emergency regulations, except crimes involving violence or the illegal possession of arms, ammunition, or explosives. Later, with the full approval of the Government, Mr Lennox-Boyd had agreed to include crimes involving incitement to violence, and also crimes of violence other than those against the person. "This meant that if a man threw a bomb into an empty room and there was nobody there, the amnesty would be applied to him."

The second issue raised had been that of public security, in which connexion the Archbishop had demanded a time-limit for the reservation of public security powers to the Governor—a year had been mentioned—or until law and order had been re-established "We could not agree to that," Sir Anthony declared. "It would have been utterly reckless to have handed over public security in Cyprus within a clearly defined period" The third issue raised was the position of the Legislative Assembly, which was of vital concern to the Turkish Cypriot community.

Despite tireless efforts by the Colonial Secretary and the Governor to achieve a settlement, extending over five months, the Archbishop had rejected all offers on these proposals. "We went as far as we could on all these points, and yet there was no sign at any time that he would condemn violence." They could not escape the conclusion that, had H.M. Government yielded still more on these three items, the Archbishop would have made still further demands, and the conclusion left in his (the Prime Minister's) own mind was that Archbishop Makarios would only have agreed to terms which gave him full control of Cyprus.

Sir Anthony said that it had been recognized for some time that it might be necessary to remove the Archbishop and the Bishop of Kyrenia from the island in the interests of restoring law and order. While the negotiations were in progress, more and more evidence had come to hand about the extent of the Archbishop's complicity in terrorist organizations "It became all too clear that, so long as the Archbishop could not condemn violence, order could not be restored in the island while he was at large there." When it became apparent, just before the Colonial Secretary's departure from Cyprus, that the negotiations were likely to break down, Mr Lennox-Boyd had reached the conclusion, in consultation with the Governor, that in the event of a breakdown it would be necessary to remove the Archbishop and the Bishop of Kyrenia from the island at an early date. Sir Anthony added "The Colonial Secretary arrived in London on March 2 and at once reported the position to me. The situation was fully discussed with other Ministers, and on March 6 the Government authorized the Governor to proceed with arrangements for deporting the Archbishop and his associate"

After recapitulating the large volume of evidence uncovered about the Archbishop's support for Eoka terrorism, the Prime Minister declared: "Whatever one may feel about all this, the most palpable aspect of the Archbishop's conduct was his failure to condemn publicly the wickedness and cruelty of these outrages How can anyone believe other than that, by his silence, he was approving assassination and murder?"

Emphasizing, in conclusion, that H.M. Government had no choice but to fulfil its responsibilities or to abdicate, Sir Anthony declared "We do not withdraw. Our immediate purpose must be to defeat terrorism so that the individual citizen in Cyprus—and there are plenty who want a quiet life—can enjoy personal security, and to go on trying to resolve the conflicting interests in this intractable problem. We must safeguard the strategic needs of our country and of our allies. Neither NATO obligations, nor the Tripartite Declaration, nor the Baghdad Pact, can be effectively carried out unless we have the sure and unfettered use of Cyprus. But there is more in it even than this. The Government must be concerned to protect the vital interests of its citizens. The welfare and, indeed, the lives of our people depend on Cyprus as a protective guard and staging base to take care of those interests, above all oil That is not imperialism It should be the plain duty of any Government, and we intend to discharge it."

Mr. Kenneth Robinson (Lab) said that the Prime Minister had given a "one-sided" account of the negotiations with the Archbishop. After alleging that H.M. Government had not conducted the negotiations in good faith, and expressing the opinion that the Government had never intended to reach a point at which the Greek Cypriots could ask for self-determination, he described the deportation of Archbishop Makarios as "an incredible act of insanity" which had "converted the Archbishop into a martyr," destroyed any hope of friendship between Cypriots and Britain "for a generation or longer," and provided the Communists with "most valuable propaganda which they will not be slow to use"

Mr. Julian Amery (C.) said that it was a profound error to believe that deportation had never been effective; he recalled in this connexion that the Congress leaders in India had been imprisoned on two occasions with the successful result that law and order had been restored Refuting Mr. Bevan's charges that the Government had handled the Cyprus situation clumsily, Mr. Amery declared that the clumsiness "resided not here but on the other side of the Atlantic." After expressing the hope that Mr Lennox-Boyd would not accept the idea of U.S mediation in Cyprus, and declaring that the Government's action had "given courage to all our friends throughout the world," he said that the Opposition should not underrate the claims of Turkey, which was Britain's most solid ally in the defence of the Middle East.

Mr. Clement Davies (Liberal) declared that force would never be a remedy for the Cyprus problem, but only understanding, generosity, and a desire to help the Cypriot people He appealed to the Government to adopt such a policy and expressed the belief that the Cypriots would be allies and friends of Britain if they were allowed responsibility for their own affairs

Mr. Francis Noel-Baker (Lab) said that during his recent visit to Cyprus (see 14757 A) he had developed a sincere respect and admiration for Archbishop Makarios "It is my considered view," he added, "that he is a sincere, patriotic, honest, and moderate leader of his people, and that he negotiated in perfect good faith throughout" After declaring that responsibility for recent events rested not on Sir John Harding but on the Government, and saying that he had been "saddened" by the "totally misleading charges" made against the Archbishop during the debate, Mr Noel-Baker continued. "When I went to him to say good-bye he said to me 'Did you hear those bombs go off an hour before we met? I don't know who let them off, whether it was the Communists or Eoka. Whoever did it, did it deliberately to wreck the talks If the Governor really believes that I can turn terrorism on and off like a tap, he must think I am a pretty curious kind of customer I deplore these outbreaks.'"

There were only two possible courses, Mr Noel-Baker declared—either the path of constitutional development, in which the Archbishop was "an indispensable factor and a great potential British asset," or the abandonment of all hope of constitutional development and the imposition of direct rule, with all the consequences it entailed It seemed that the Government had chosen the latter course, which could only end in disaster "I implore the Colonial Secretary," Mr. Noel-Baker concluded, "for the sake of the good name of this country, for the hope of peace in the Middle East, and for the sake of the lives of British Servicemen and Cypriots, to take up the negotiations where we left them . in Nicosia a few weeks ago."

Mr. Lennox-Boyd (Colonial Secretary) replied to the debate for the Government After paying a tribute to Mr Noel-Baker's mediation efforts in Cyprus, he emphasized that the complicity of the Archbishop and the other deported persons in the terrorist campaign had been fully proved by the documents published by the Governor, which were based on information derived from absolutely reliable intelligence sources. "My reluctant conclusion," he said, "is that the Archbishop was not prepared to surrender a powerful weapon in his armoury lest he might fail to get everything he wanted in the political field and find it difficult to start a campaign of terrorism again."

Continuing, Mr. Lennox-Boyd said that there had been reports from security sources that the Archbishopric was issuing grenades to the terrorists. and was also being used for the temporary storage of arms and grenades. A search of the Archbishopric had resulted in "a number of curious finds" and had shown these reports to be perfectly true and reliable. After pointing out that rounds of ammunition and a petrol bomb had been found in the Archbishopric garden, together with ten similar bombs in process of manufacture, Mr. Lennox-Boyd asked · "Can anyone seriously say that the Archbishop was not implicated in this up to the neck?" The Bishop of Kyrenia, moreover, had been shown to be one of the principal instigators in turning Cypriot schoolchildren into "thugs and murderers", he had started the Church youth organization which had become one of the chief recruiting grounds for Eoka terrorists, and he had publicly praised the murderer of a police constable

The Colonial Secretary said the following time-table of his two-hour meeting with Archbishop Makarios might be of interest to the House: "From 9.15 (p.m.) to 10.10 we talked about the amnesty, from 10.10 to 10 50 we talked about public security; and we had only five minutes' talk on the elected majority. To those members who are so naïve as to believe that the talks broke down because of the Government's refusal to anticipate the decisions of the Constitutional Commissioner, this time-table may do something to make them change their minds."

Mr. Lennox-Boyd then recapitulated "the problems on which the talks came to shipwreck"—i e, the proposed amnesty, the retention of security powers by the Governor, and the composition of the elected majority in the Legislative Assembly, as described by Sir Anthony Eden. He emphasized that he (the Colonial Secretary) had made concession after concession to the Archbishop on the subject of the amnesty, even to the extent of agreeing that it should apply where an attempted crime had been unsuccessful—"if, in fact, the blow had not struck its target, a sort of premium on bad marksmanship." When they came to the case of terrorists caught in possession of arms and bombs, however, he could go no further. He could not recommend that the amnesty should apply to those who had been "frustrated in their wicked purpose not by any change of heart but merely by the mercy of God," and he defied any member of the House to come to a different conclusion.

House of Lords Debate.

During the debate in the House of Lords, the Archbishop of Canterbury (Dr. Fisher) disclosed that he had personally appealed to Archbishop Makarios for a declaration that the Orthodox Church did not countenance terrorism. In the course of his speech Dr. Fisher suggested a three-point "peace plan" for Cyprus.

Earl Attlee (the former leader of the Labour Party), making his maiden speech in the Lords, believed that the British Government had not made its policy sufficiently clear, and that full understanding had yet to be obtained with the United States He added: "I sometimes feel, with all friendliness to our American friends, that they are apt to stand on the side-lines and leave us to carry on the fight They are not participators in the Baghdad Pact, a shield intended to protect the whole of that area: yet they draw more oil from what might be called the soft under-belly of that region than we do ourselves In my time they were not always helpful when the Government had to deal with difficulties in Persia and Egypt It is partly due to a rather out-dated anti-colonialism, and I am sure there has not always been the proper link between the State Department and the commercial interests of the oil firms."

Lord Attlee believed that there was a tendency to place undue importance on the strategic value of such places as Cyprus in the present age of atomic and hydrogen weapons. Everyone, however, must be disturbed at "the present tragic situation in Cyprus," and no-one could condone a murder campaign for one moment. After commenting that "in any nationalist revolt you always get the people who are reasonable and the extremists," Lord Attlee said that it seemed clear that the Greeks were willing, whatever happened in Cyprus, that Britain should have bases in the island. There seemed no reason, therefore, why there should be any quarrel on this matter. He believed that if the Cypriots obtained self-government, they might feel less inclined to put themselves under a Government "which no doubt has many virtues but, as far as I can make out, more parties." "If I were a Cypriot," he added, "I should hesitate before wishing to come under the Greek Government."

If one was going to give self-government to a people, Lord Attlee continued, one had to give them responsibility to look after law and order in their own interests. The deportation of Archbishop Makarios might have been justifiable if it were a case of an absolute ruler ruling against the will of the people, but he did not believe it was ever wise to deport the leader of a nationalist movement. "More often than not, you have eventually to bring back the deportee." Whilst he realized the difficulties involved, and held no brief for the Archbishop, he did remember that "the rebels of the past tended sooner or later to be Prime Ministers of the British Commonwealth."

The Archbishop of Canterbury began his speech by recalling that Archbishop Makarios was head of a Church—the Ethnarchy Church of Cyprus—with which the Church of England had for long been on terms of close fellowship and friendship, as was also the case with the Greek Orthodox Church He continued.

"Great perplexity and distress has been caused to Christian opinion, both here and elsewhere, by the arrest and removal of the head of one of the historic Churches of the world. I think it is only proper to stress the shock and uneasiness which Christians in many parts are feeling. The Orthodox churches regard this event with indignation, as an act of sacrilege, persecution, and barbarism From the Patriarchs of Alexandria and Antioch, from the Archbishop of Athens, from the Bishops in Cyprus and others, I have had urgent telegrams of protest using those very terms. It would be resented throughout the Orthodox world if I said nothing in this debate, and the fact that my words would be scrutinized there as certainly as those of the Government compels me to speak with a great sense of Christian responsibility.

"Archbishop Makarios is the leading ecclesiastical and political figure of Cyprus. Whatever he does, he does simultaneously and equally as churchman and politician. The Eastern churches find it hard to believe that the Archbishop of Canterbury is not also a political leader They have not passed through that historical experience which has taught us that while the concerns of Church and State are intimately related and equally involved in the issues of national well-being, yet, under God, the responsibilities and spheres of action of churchman and politician are different, and that when either tries to usurp the functions of the other, disaster follows, whether it be the politician trying to stifle the free speech and free judgment of the Church, or the Church trying to operate by the methods of political power

"Our friends in Greece and Cyprus must recognize that to us here it seems shocking that an Archbishop should take the lead in a political matter and involve himself in the passionate partialities which political incitement always involve. I must ask our good friends there to believe that, even though I am speaking in the House of Lords, I, as Archbishop, have had no share in these political matters and no previous knowledge of the actions taken.

"As a churchman I have one interest only—that is, in reconciliation, that hatred and division may be replaced by understanding, trust and co-operation. I trust that our Orthodox brethren will try, as I must try, to lay aside all political argument and, as far as possible, all national partialities and everything else which makes the way to reconciliation more difficult. . . .

"We must, however, recognize that in the Near East the kind of distinction I have made between the functions of churchman and politician hardly exists In this country the Government naturally judge Archbishop Makarios on his political record, since he has chosen to play the part of a politician; but in Cyprus he will be judged as a churchman, doing what it is proper—whatever the canon law may say—for a churchman to do. The British Government must therefore do a hard thing and recognize that, whatever his political activities, he remains the head of an independent Church, a religious and a Christian leader whose presence is indispensable to the proper functioning of that Church. There is bound to be uneasiness in any British mind when a political leader is arrested and removed without trial. It is even more alarming when such action has the effect of interfering with the functioning and loyalties of a Christian community It is important for the Government to realize that it is in such terms of sacrilege that much foreign opinion is viewing their action.

"In one matter of intense political and Christian concern the Archbishop has put himself very much in the wrong To his own people and others he has allowed himself to appear to condone violence; the Government goes further in saying that he connived at it in a way which the Christian conscience must condemn

"He has twice been a visitor in my house In June last I wrote a letter in which, after referring to increasing evidences of violence, I went on

> 'I am somewhat worried lest the absence of any clear statement from the Church authorities, and particularly from you as their undisputed leader, must cause people to suppose that the Church is in fact supporting such outrages as have occurred'

"I asked him to give a lead in this matter In his reply he said:

> 'I am profoundly grieved by the course events have taken in Cyprus . . . Unfortunately the serious situation which has been created here cannot be remedied by suggestions or advisory circulars I am sincerely afraid that an official condemnation of events by myself would not find at the present stage the necessary response, but would involve the risk of exposing me rather unprofitably'

"I feel he spoke then not as a churchman upholding a religious principle but as a politician calculating the risks and chances, ready to allow an evil which he regretted in private but would not publicly condemn So he exposes himself inevitably to contradictory judgments.

"I can fully sympathize with Mr. Noel-Baker's estimate of the Archbishop's character; indeed, there is good reason to suppose that he was a moderating influence with those extremists who were associated with him in the Ethnarchy Council His moderating influence might have been utilized far more profitably by the Government in the earlier stages of this quarrel to reach a solution if they had had a clearer imagination and foresight of where they would have to go in the end.

"At the same time, even if the Government have not established their case for the Archbishop's direct complicity in the earlier violence and outrages, the Archbishop has made it hard to doubt that, and his refusal to condemn it has had the same public effect as complicity would have had.

"Our Greek Orthodox friends must be ready to recognize that the Government has an absolute duty to restore civil order, and could not stand idly by when confronted with disorder and incitement to kill and destroy If they wish to criticize the Government's action—and there is plenty of room for criticism and plenty of critics—they must do so not on the grounds of insincerity, barbarism, or sacrilege, but simply on political unwisdom and misjudgment, especially in timing. . . ."

Dr Fisher then proposed that the following three measures should be taken to restore the situation in Cyprus:

(1) A Draft Constitution should be drawn up along the lines of the correspondence between the Governor and Archbishop Makarios, together with a suggested timetable for application, to become a basis of discussion

(2) The Greek, Turkish and British Governments should immediately issue a joint appeal to Cypriots to end terrorism

(3) Archbishop Makarios should be informed that his exile would end when public order in Cyprus had been restored, and that direct negotiations with him would be resumed immediately the Draft Constitution was in being

After expressing his conviction that these three steps, if taken quickly, would have the support of the Greek and Turkish Governments and also of all the Churches, including the Orthodox Church, Dr Fisher concluded: "Along these lines it would seem to me best for all parties to leave the past behind, and to go forward to a peaceful, orderly, and generous acceptance of the mutual responsibilities of Cyprus and Great Britain to one another and to the peace of the world It is in that direction, and to that end, I trust that the Christian churches in this country may work closely together with the Orthodox Church, with undiminished trust and ever-increasing fellowship."

The Earl of Listowel said that the decision to deport Archbishop Makarios had antagonized and shocked a large section of world opinion. The U S A had been moved to express sympathy with the Cypriots and Greece, and he hoped Cyprus would not become in American eyes a symbol of British imperialism He asked the Government to study the suggestions of the Archbishop of Canterbury, which were "an improvement on the sterile, negative policy of repression which is all that the Government has so far offered"

Viscount De l'Isle (the former Secretary of State for Air) said that the remarks attributed to the U S. Ambassador in Athens (see page 14761) had given "great and justifiable offence" in Britain, and had aroused the impression that "we have been let down by a friend" —an impression which the U.S Ambassador in London should not fail to report to his Government. Britain was entitled to expect a far higher degree of comprehension and sympathy than she had so far received, particularly at a time when she was supporting, at the expense of blood, treasure, and perhaps loss of reputation, the power of the free world in the Middle East. He regretted that the Archbishop of Canterbury had not deplored the murders which had taken place, at least with the connivance, if not under the instigation, of Archbishop Makarios.

The Archbishop of Canterbury intervened to say: "I dissociated myself utterly and entirely with the terrorism and murder in progress there, and certainly condemn Archbishop Makarios for not himself disowning it. I wish to make it perfectly clear that I was not lacking at all in condemnation of the terrorism and murder in Cyprus"

The Bishop of Chichester (Dr. Bell), a prominent member of the World Council of Churches referred to the many protests which had been made to that body against the deportation of Archbishop Makarios. He had received a statement from the general secretary of the World Council saying that it "must be made unmistakably clear to all concerned that this act of deportation against the head of a Church is very deeply resented throughout the ancient Orthodox churches." Whilst he (Dr Bell) abhorred and condemned the outrages in Cyprus, he believed that the Archbishop's deportation was a blunder which had struck a blow at British prestige and reduced Britain's capacity for moral leadership

Before they condemned Archbishop Makarios too vehemently (Dr. Bell continued), they should consider the strength of the nationalist movement in Cyprus. Even if the Archbishop had issued a public condemnation of terrorism, it was far from certain that the terrorist movement would have ceased In times of war and revolution it was not easy for archbishops and bishops of any country to take a line which large bodies of their fellow-countrymen resented and repudiated.

After regretting that he did not wholly agree with the Archbishop of Canterbury, and saying that he found himself in greater agreement with Lord Attlee, Dr. Bell asserted that the Government had offered Cyprus neither self-determination nor self-government, but a limited form of self-government with large areas reserved to British rule That was artificial, and no solution at all. The Government's refusal to concede that membership in the Legislative Assembly should correspond to the proportion of Greek to Turkish Cypriots was to be deplored. That was neither a liberal nor a democratic Constitution, and under its terms Cyprus would remain a dependent territory of lower grade for an indefinite period The Government's policy lacked an adequate moral basis and so could not succeed.

The Earl of Munster (Minister without portfolio) said that Archbishop Makarios, in the negotiations about an amnesty, had apparently believed that the carrying of arms, ammunition and explosives was a 'harmless occupation" and ought therefore to be removed from the exceptions to the amnesty. No normal-minded person in Britain, however, could have agreed to the Government giving way on this point. Referring to the correspondence between the Archbishop of Canterbury and Archbishop Makarios, Lord Munster commented that the latter's reply had shown that he did, in fact, condone terrorism and violence. "For this political and spiritual leader of the Greek Cypriots to say that his appeal [for the ending of terrorism] would meet with no response really put him in his true light," Lord Munster added.

Turning to the Primate's three proposals, Lord Munster stressed that one essential was needed if a Constitution was to be introduced —co-operation It was clear, however, that no co-operation was possible at the moment Even in the event of the cessation of violence, he could give the Primate no assurance that Archbishop Makarios would be allowed to return, and whilst he would bring the Primate's views to the attention of the Secretary of State, he saw no possibility whatever of meeting Dr Fisher's requests Lord Munster nevertheless emphasized that the Government had not "slammed the door" in Cyprus, and expressed the hope that other Cypriot leaders would come forward to assist in creating a new and more liberal situation once law and order had been restored in the island. He added that the Bishop of Chichester could have been speaking "for no-one but himself."

Lord Winster (Governor of Cyprus from 1946-49, and a former Labour M P.) expressed the view that the Government had got into a *cul-de-sac* from which they would be unable to extricate themselves He found it difficult to believe that they would be able to make a new start on the Cyprus problem and effect a settlement, and he felt that a change of government might be necessary before such a settlement could be achieved

Viscount Hailsham thought that the words of Archbishop Makarios, as quoted by the Archbishop of Canterbury, constituted "the most damning indictment of a political leader" that he had ever heard. In the last resort a Christian bishop could only serve one Master, but "by speaking with two voices on the subject of murder" and refusing to denounce extremism, the Archbishop had "been serving at least two." Lord Hailsham added:

'What is it that it is claimed we are doing wrong? Our duty to world peace is to remain in Cyprus at the present moment Are we for that to be assailed as oppressors and tyrants, and to have our soldiers and policemen murdered? And cannot our bishops speak out at least as boldly on these lines as they do when they are so anxious to explain that our Government is wrong? To attack us, and to allow us to be vilified and attacked because we have done no more than do our duty as civilized men and as Christians, is to miss the whole morality of the politics of a complex situation. I say this to our American friends—Mr Facing-Both-Ways does not get very far in this world The Americans must clearly understand that what we think of them is just as important as what they think of us, and that the *demarche* of their Ambassador in Athens has left with many good friends of the United States a nasty taste which will take many words to wipe out entirely"

The Marquess of Salisbury (Lord President of the Council) replied to the debate for the Government. After pointing out that Archbishop Makarios was a British subject, he stressed that no-one could excuse a man, whether churchman or layman, who used British nationality, and the social position attaching to a religious rank, not only for a subversive purpose but for fomenting violence and terrorism which resulted in the death of innocent people It was suggested that the Government had not established his complicity, but there was no doubt about the facts, if the sources were not given, it was because of security reasons

"I must confess," Lord Salisbury continued, "that I listened very sadly to what the Bishop of Chichester said He has the respect of us all, and we know that he has complete intellectual integrity. But he talked of the British Government by-passing law and order in deporting Archbishop Makarios I should like to have asked him Does he regard Makarios himself as having by-passed law and order? Does he think he should have been allowed to continue to foment terrorism and the murder of British soldiers, which was the alternative? I was driven to the conclusion that he cared so desperately about the World Council of Churches and the continuation of that great movement that he subordinated everything else to it. That is really playing ecclesiastical politics and merely thinking in terms of expediency"

The Archbishop of Canterbury intervened to say "I entirely agree on this matter I am sorry that the Bishop quoted the secretary of the World Council of Churches, who exceeded all his rights in issuing that statement"

Lord Salisbury continued "Frankly, I do not think I was ever more shocked than by the speech of the Bishop Makarios has not been treated harshly. On the contrary, I should have thought there were few examples in history of such tolerance being extended to a man who was known to the authorities to be plotting in secrecy to overthrow by violence the established Government of the country in the interests of another State. If a man of American nationality, in a territory under American sovereignty, had fomented in the interests of another nation a campaign of violence and terrorism resulting in the death of American soldiers, I do not believe the attitude of the American nation would be as detached as it has been in this case"

It was necessary to remember, Lord Salisbury went on, that there were limitations to negotiations with the Archbishop If the Government were under a moral obligation to find a solution of the problem that was acceptable to the Greek Cypriot community, they were under an equal moral obligation to find a solution acceptable to the Turkish Cypriot community. The purpose of the talks with the Archbishop, which were in a sense preliminary, was to try and resolve this difficulty, and they had never been intended to take the place of later negotiations. It could not be seriously contended that the Governor had broken off the talks on flimsy grounds, indeed, it had been said by some that it was not the Governor but the Archbishop who had broken off the negotiations

With the final and lamentable failure of the talks, the Governor had been faced by a new situation. He knew from information already in his hands that the Archbishop was actively fomenting terrorism Was it, then, any longer possible for the Governor to leave the Archbishop at large in Cyprus, "sitting in his palace planning sabotage and terrorism," once the talks had broken down? He (Lord Salisbury) did not believe that any Governor worthy of the name could have done so The Archbishop could, of course, have been allowed to go to Athens and then have been refused readmission to Cyprus, but that would have left him free to organize rebellion and terrorism on just as large a scale from Greece. The only course was to place him where he could do no harm

As regards the future, Lord Salisbury concluded, the first consideration must be the restoration of law and order Then, with the advent of more normal conditions, the Government firmly believed that more moderate leaders would emerge Such persons existed, but they had been driven out of politics by the extremists in recent months, and in the existing conditions it was as much as their lives were worth to attempt to show themselves. There was no desire on the part of the Government to sit still and do nothing, which would be a futile policy, but there must be some delay while things became normal.

Statement by Governor of Cyprus.

The Governor of Cyprus (Field-Marshal Sir John Harding) gave a press conference on March 18 in which he expressed the opinion that "in the long run the Western world will benefit from the fact that at this critical stage H.M. Government did not take the easy, weak, and superficially popular course in Cyprus."

Sir John Harding stressed that his policy for the future was (1) to end terrorism and intimidation so that people could live freely and without fear, and at the same time to ensure the military needs of Britain and the free world, (2) to press on with measures to promote prosperity and well-being in the island, (3) to re-examine with an open mind all methods of reconciling the conflicting interests which lay at the root of the political problem. He believed that another form of political leadership would emerge in Cyprus, but not until conditions had improved to such an extent that men could speak without fear. Questioned about the Eoka organization, he said "I would not say we have broken Eoka, but we have broken into it Eoka is not only a threat to the authority of the Government, it is a major obstacle to the development of democratic self-government"

He added: "Britain needs Cyprus for strategic purposes, not solely for herself but in the interests of the security of the free world as a whole. One day perhaps this need may not be overriding Self-determination is not now a practicable proposition I had hoped that our military requirements could be combined with a wide measure of self-government for the Cypriot people. After five months of patient negotiations with Archbishop Makarios, I was reluctantly forced to the conclusion that the Archbishop was unwilling to reach an agreement except on terms which implied the handing over to him of virtual control of the island. As evidence accumulated we decided that it was essential to remove him from the island so that we could more effectively tackle Eoka"

Asked to comment on the Archbishop of Canterbury's proposals, Sir John Harding said: 'Far be it from me to challenge the Primate, especially from this distance No doubt there are things in what he said which make good, sound sense But I cannot agree that when law and order is restored Archbishop Makarios should be brought back and we should start negotiating with him His sole ambition is to be the only arbiter of Cyprus, and this is incompatible with strategic requirements of the present day."

Asked also to comment on the view, expressed by Mr. Aneurin Bevan, that persons who were looked on in Britain as terrorists were regarded by their fellow-nationals as patriots, the Governor declared. "I am not very much taken with the patriotism of men who go sneaking round corners shooting people in the back. That is not the sort of patriotism to which I would like to belong. Was it patriotism for masked men to enter a church and shoot a defenceless member of the congregation dead?"

Sir John Harding said in conclusion: "It has been a very sad thing that the Cyprus situation has been the cause of a serious worsening of Anglo-Greek relations. The Greeks are old friends. In my opinion the failure of the Greek Government to control the violent and inflammatory broadcasts to Cyprus, and its refusal to use its influence to end violence, have been major factors in the blowing up of this problem to its present dimensions. This brings no advantage to the people of Cyprus, Greece, Turkey, Britain, or the free world."

A IRAQ. — Nationalization of Baghdad Light and Power Company's Installations.

The installations of the Baghdad Light and Power Company, an Anglo-Belgian undertaking founded in 1929, were taken over by the Iraqi Government as a State enterprise on Oct. 1, 1955, under an agreement (signed in September last) providing for the nationalization of the company's assets in Iraq against a compensation payment of £2,400,000. At the same time the Baghdad Electricity Service was created by ordinance to administer the undertaking under the control of the Iraqi Ministry of Works and Communications.—(Financial Times)

B. PAKISTAN. — Atomic Energy Council.

It was announced in Karachi on Feb. 29 that the Government of Pakistan had set up an Atomic Energy Council to develop atomic energy for peaceful purposes. The Council will regulate the procurement, supply, manufacture, and disposal of all radio-active substances and will be under the chairmanship of the Minister for Industries, its other members being the Foreign Minister, the Secretaries to the Ministries of Industries and Finance, and the chairman of the Atomic Energy Commission.—(Pakistan High Commissioner's Office, London)

C. MALAYA. — Acceptance of London Agreement on Independence.

The Federal Legislative Council on March 14 accepted by acclamation the agreement reached in London giving the Federation of Malaya independence by Aug. 31, 1957, "if possible." The High Commissioner, Sir Donald MacGillivray, announced that the Federation's copy of what had been termed the "*Merdeka* [freedom] Charter" had been specially treated to ensure durability and would be preserved in the national museum in Kuala Lumpur.—(Times)

(Prev. rep. London Conference, 14710 A.)

D. INDONESIA. — Resignation of Harahap Cabinet. - New Government formed by Dr. Sastroamidjojo.

Following the announcement of the final results of the Indonesian general elections, Mr. Harahap, the Prime Minister, resigned on March 3, whereupon President Sukarno called on Dr. Sastroamidjojo (Prime Minister in 1953-55 and leader of the Nationalist Party, which received the largest vote in the elections) to form a Government with the widest possible support in Parliament. After consultations with the leaders of other parties and with the heads of the armed forces, Dr. Sastroamidjojo succeeded in forming a coalition government which included representatives of the Nationalists, the *Masjumi*, the *Nahdlatul-'Ulama*, the United Moslem Party (PSII), the Christian (i.e. Protestant) Party, the Catholic Party, the Islamic Party, and the Movement for the Defence of Indonesian Independence (IPKI—an ex-servicemen's organization). The new Cabinet was approved by President Sukarno on March 20, its membership being as follows:

Dr. Ali Sastroamidjojo (Nationalist)	Prime Minister and acting Defence Minister.
Dr. Mohammed Rum (*Masjumi*)	First Deputy Premier.
Mr. Idham Chalid (*Nahdlatul-'Ulama*)	Second Deputy Premier.
Mr. Ruslan Abdulgani (Nationalist)	Foreign Affairs.
Dr. Sunarjo (*Nahdlatul-'Ulama*)	Home Affairs.
Dr. Muljatno (*Masjumi*)	Justice.
Mr. Sudibjo (PSII)	Information.
Mr. Mangunpranoto (Nationalist)	Education.
Dr. Sinaga (Christian)	Health.
Mr. Iljas (*Nahdlatul-'Ulama*)	Religious Affairs.
Dr. Jusuf Wibisono (*Masjumi*)	Finance.
Dr. Burhanudin (*Nahdlatul-'Ulama*)	Economic Affairs.
Mr. Eni Karim (Nationalist)	Agriculture
Mr. Sabilal Rasjad (Nationalist)	Labour.
Mr. Tedjasukmana (*Masjumi*)	Communications.
Dr. Pangeran Noor (*Masjumi*)	Public Works & Power.
Mr. Fatah Jasin (*Nahdlatul-'Ulama*)	Social Affairs
Dr. Suhardi (Catholic)	Agrarian Affairs.

The following Deputy Ministers were appointed: Mr Umbas (Christian)—Economic Affairs, Mr. Marbahan (PSII)—Agriculture; Mr de Rosari (Catholic)—Communications The following were appointed Ministers of State Dr. Djuana (non-party)—Planning; Mr Dahlan Ibrahim (IPKI)—Veterans' Affairs, Mr Roeslı Abdulwahid (Islamic Party)—General Affairs

Dr. Sastroamidjojo stated on March 20 that his Government's programme differed from that of his previous Cabinet of 1953-55, although it was directed towards the solution of the same problems.

The Government, he said, would take the steps required to meet the situation arising from the unilateral abrogation of the Netherlands - Indonesian Union and the Round-table Conference agreements, and would also continue the struggle for the incorporation of West Irian (Dutch New Guinea) in Indonesia. Its economic policy would include a long-term plan for the promotion of industry, increased agricultural production, the improvement of the country's financial position, the development of co-operatives, the acceptance of foreign technical and economic aid free from political and military commitments, and the regulation of foreign investments The Government would also take measures for the restoration of internal security, the progressive establishment of autonomous areas; the formation of an efficient administrative machinery, the elimination of corruption, the improvement of living standards; the settlement of labour disputes, the development of trade union organization, and the introduction of compulsory education within a specific period. Its foreign policy would be based on the resolutions of the Bandung Conference

The Government parties hold 189 of the 260 seats in the new House of Representatives.—(Indonesian Embassy Press Department, London) **(Prev. rep. Cabinet, 14448 A; 14715 A; Political Parties, 14736 A.)**

E. UNITED STATES. — Seizure of Rumanian, Hungarian and Bulgarian Assets.

The Department of Justice in Washington announced on March 12 that Rumanian gold bullion worth $13,000,000, "frozen" in the United States since 1940, had been seized by the U.S. Government in part settlement of U.S. war claims against Rumania. The announcement added that an additional $11,750,000 in blocked Rumanian, Hungarian, and Bulgarian assets would also be seized towards the settlement of claims against the three countries, estimated at more than $125,000,000.
(New York Times) **(Prev. rep. 10623 B; 9514 A.)**

F. SOVIET UNION. — Five-year Plan. - Corrigendum.

In article 14717 A, under the cross-heading "Agricultural Targets for 1956-60," the figures of vegetable oil production in 1955 and planned production in 1960 were inadvertently transposed. Planned production in 1960 should read 1,840,000 tons, compared with actual production in 1955 of 1,115,100 tons.—(Ed. K C.A.)

A. ORGANIZATION FOR EUROPEAN ECONOMIC CO-OPERATION. — Creation of Nuclear Energy Committee. - Proposals for European Nuclear Co-operation. - Further Trade Liberalization Measures. - Report on Progress of Italian Economic Development. - Seventh Annual Report of O.E.E.C. - Tourist Statistics.

The O.E.E.C. Council met in Paris on Feb. 28-29 under the chairmanship of Mr. Harold Macmillan, the British Chancellor of the Exchequer, who had been elected chairman on Jan. 6 in succession to Mr. R. A. Butler, the former British Chancellor. The principal decision taken by the Council was the setting-up of a special committee to deal with matters relating to nuclear energy, the committee being asked to submit proposals to the Council within three months with a view to implementing the report of the working party on the co-operation of member-countries in the field of nuclear energy. This working party had been set up by the Council in June 1955 (see 14383 A) as a result of the Armand Report on fuel and power problems (see 14346 A), and had published its report and recommendations on Dec. 28. Some of the more important points from the report are summarized below.

Need for Co-operation in Development of Nuclear Energy. The report said that nuclear energy would be essential to many countries in the "not too far distant future" Even those countries which had large untapped sources of hydro-electric power would, without exception, have to consider seriously how electric power production could continue to expand after all economically justified hydro-electric installations had been put into service. This point would be reached within 10 years in France, Italy, Switzerland and Portugal, within 20 years in Sweden, and a little later in Norway and Austria. The question of power was even more urgent in countries producing electricity mainly from coal

The development of a European nuclear energy industry would, however, require "a considerable effort" as regards equipment, technicians and expenditure. Most of the effort so far had been made by Britain and France, and although various other countries could already point to "useful achievements," Europe as a whole was "very under-equipped" as regards nuclear energy. There were, for instance, only five or six prototype power reactors under construction or in operation in Europe, compared with some 20 in the U S A.; the American reactors, moreover, were much more varied in type than the European models, six to eight entirely different prototypes already being in operation. It was also pointed out that there were only eight European-built research reactors at present in service, compared with 30 in the U.S.A., that Europe had no material-testing reactors in working order, whilst the U S A. had two; that the isotope separation plants for the enrichment of uranium were at least ten times larger in the U.S A. than the only European plant in Britain; and that Europe's only large heavy water plant, in Norway, produced less than one-twentieth of the U.S output. European expenditure on nuclear energy in 1955 was estimated at about $300,000,000, compared with U.S. expenditure in 1954 of $2,000,000,000.

Nevertheless (the report continued), no "entirely pessimistic" conclusions should be drawn from these comparisons, as Europe's present nuclear effort, taken as a whole, fell very far short of its industrial potential This was so despite the fact that the U.K. probably devoted a much larger proportion of its national income to nuclear energy for military and peaceful purposes than the 0.5 per cent allocated by the U S A, whilst France allocated hardly less than half this percentage for peaceful purposes alone. If Europe as a whole was willing to make the necessary effort, and provided that it secured adequate access to fissile materials, the leeway could be made up and a large European nuclear energy industry developed. The working party believed, however, that "the only chance of success" was to act "as quickly and effectively as possible," and this called for "some degree of co-ordination between the efforts of member-countries."

As the manpower, industrial power, and capital resources of the European countries were relatively restricted, their efforts should, as far as possible, be co-ordinated and complementary. Sometimes the scale of operations would be such that they should be carried out jointly by as many participants as possible, whilst in other cases the financial risk of carrying out a project in a field which was not yet fully explored would be more easily borne if shared between several countries "in a kind of mutual insurance" However, it would probably be impossible for all the countries to participate in all the projects suggested, as some of these projects would be of interest to a few countries only. The results of any co-operative efforts undertaken would in principle accrue to the participating member-countries, but any other member-country should be able to benefit from those results "on conditions to be agreed."

Forms of Co-operation. It was recommended that the following bodies should be set up to ensure the necessary co-operation between the member-countries and associated countries [i e. the U.S.A. and Canada] in developing nuclear energy: (1) a Steering Committee for Nuclear Energy, composed of all the countries who declared themselves interested and who were prepared to take part in a European Organization on Nuclear Energy; (2) a Control Bureau, responsible for security control of fissile materials. In addition, companies should be formed as required, independent of the Nuclear Energy Organization, to carry out joint production and research projects These companies would have independent managements and would not be subordinated in any way to the Steering Committee for Nuclear Energy, but would establish relations with it for the reciprocal exchange of information

The report emphasized that there was "no question" of the European Organization replacing national initiative, but said that by applying and strengthening the methods which had already been successfully applied in other fields, the Organization could make national efforts fully effective and prevent them working one against the other It was suggested that co-operation could take any of the following six forms.

(1) *Co-ordination of Programmes and Projects* The aim of this would be to avoid unproductive duplication, on the one hand, and to prevent any serious gaps being left in the overall system of development within the O.E E.C. area, on the other. Information on new nuclear energy projects should be communicated to other participating Governments, together with estimates of production, investment, and running costs.

(2) *Promotion of Joint Undertakings* This was desirable because (*a*) the demands of some undertakings, even on the smallest possible scale, exceeded what individual countries could or would be prepared to contribute in resources of all kinds, (*b*) some undertakings were of a particularly hazardous nature, so that a country would not be prepared to bear the whole financial risk unaided; (*c*) for some undertakings, production costs decreased rapidly as size increased, (*d*) member-countries were anxious to gain knowledge in this new branch of technology by direct experience, (*e*) security control would be facilitated.

(3) *Co-ordination of Legislation.* Legislation in the field of atomic energy, though still undeveloped, was rapidly gaining in substance, and it was therefore urgent to co-ordinate the legislative provisions already adopted, or under consideration, in order to prevent them from becoming divergent. This was mainly necessary with regard to public health (i.e industrial safety, disposal of waste, and transport of nuclear products); insurance problems in the field of production and transport, conditions for the granting of licences for prospecting and exploiting nuclear products, and conditions under which a licence to work a private patent might be granted.

(4) *Promotion of Training.* As the lack of qualified labour seemed at present to constitute one of the main bottlenecks in the development of nuclear energy for peaceful purposes, the following measures should be taken to promote training: co-ordination of lectures and training courses, exchanges of teachers and students, the creation of scholarships, and the establishment of a European Centre for the teaching of nuclear science to complete the training given in national centres.

(5) *Promotion of Standardization.* This offered undoubted advantages, though care must be taken not to introduce standardization where it was too late to standardize the products of existing plants without entailing considerable expenditure, or where it was too soon to standardize equipment in a branch where techniques were not yet sufficiently advanced. Experts should draft a list of equipment that could be standardized, and methods should be studied whereby Governments could enforce or encourage the observance of approved standards.

(6) *System of International Trade.* It was the unanimous opinion of the member-countries that their national programmes of nuclear energy could only progress "under a system of healthy international competition." The working party felt that, in the fields covered by nuclear energy, "it would be desirable at the outset to make provision for a more liberal system of trade than in other sectors" It was recognized, however, that trade in primary and secondary fuels would be subject to a very large measure of State control, as well as to security control

Joint Undertakings. Keen interest had been expressed by many member-countries about the joint establishment of a plant for separating isotopes, as it was thought that such a plant would help to speed up development of the use of nuclear energy without the countries concerned having necessarily to be dependent on installations outside Europe The working party thought, however, that if such a plant were to be built it should be done as soon as possible, as in 15 or 20 years' time large-scale production of concentrated nuclear fuels would certainly be carried out in other ways, with the risk that the isotope separation process might no longer be competitive. The U.K., which now had an isotope separation plant working at full capacity, had not been able to express a view on its participation in a new international undertaking, but had informed the working party that such participation might be envisaged if certain conditions were fulfilled

The joint establishment of one or more chemical separation plants for irradiated fuels also offered certain advantages, whilst several countries were considering setting up joint undertakings to produce heavy water. With regard to fabricating "fuel elements" from irradiated metal or oxide, many European countries would be unable to carry out this work themselves in view of the technical difficulties involved, and consideration should therefore be given to the setting-up of a joint undertaking to serve several countries. The U.K had surplus capacity for this work, which it was prepared to make available to other countries under jobbing contracts. Some countries had also expressed their interest in electric power stations which would supply them, as well as neighbouring countries, with current. Certain inter-connected countries might be interested, at least during the initial period, in the joint construction of nuclear power stations, so as to gain experience in operating such stations with the minimum of investment and, in some regions, to improve the balance between hydro-electric and thermal production.

An important factor in the negotiations on the setting-up of joint undertakings would be their site, the choice of which would depend on economic, political, and sometimes strategic considerations; it was also very likely that a certain balance would have to be achieved in the geographical distribution of joint undertakings. The working party thought that there would be "considerable advantage" if some factories were built on sites which were extra-territorial

Security Control. The sole aim of such control would be to prevent fissile materials used in joint undertakings, or produced by them, from being diverted to military purposes. Purely national installations would therefore be controlled only in so far as they used fissile materials originating directly or indirectly from the joint undertakings Although a general system of control might subsequently replace partial controls, intra-European co-operation must in the meantime provide member- and associated countries with a guarantee of effective control over all their joint activities "We believe," the working party declared, "that it is only on this condition that we can hope to obtain full co-operation from the United States and Canada in the supply of fissile materials, specialized equipment, and manufacturing secrets"

In setting up the Nuclear Energy Committee, the O.E.E.C. Council laid down that its proposals should deal with "(1) the establishment of security control, the institution of joint undertakings, and interim measures to be taken in the field of intra-European trade in nuclear materials and equipment; (2) the setting-up of a Steering Committee for Nuclear Energy and the tasks to be assigned to it; and (3) the means to be used to co-ordinate the action of existing organizations." In carrying out its work the Committee should enter into any necessary discussions with the U.S. Government in connexion with President Eisenhower's "important and generous declaration" of Feb. 22, in which the U.S.A. had offered to make 20,000 kg. of uranium available to foreign countries (see 14765 A).

One of the main points of discussion at the Council meeting was the relationship between the form of atomic co-operation envisaged in the working party's report and the proposed "Euratom" plan for pooling atomic resources and industries under a supra-national authority, which had been put forward by the six member-countries of the European Coal and Steel Community—France, Western Germany, Italy, Belgium, the Netherlands and Luxemburg.

M. Spaak (the Belgian Foreign Minister), speaking on behalf of the supporters of the "Euratom" project, said that the six countries of the Coal and Steel Community thought the conclusions in the O E E.C. report did not sufficiently answer the aims which they had set themselves in "Euratom," as they believed that they could "go faster and further among themselves." The six Governments had therefore decided to pursue their work actively on this basis. When they had drafted the treaty to set up the "Euratom" organization, one of their main preoccupations would be to seek means of associating other countries with the project within the general framework of the O.E.E C

Mr. Macmillan, who spoke in favour of the working party's report, said that the peaceful development of atomic power was "above all an opportunity where Europe could act together." "I venture to single out this atomic problem," he added, "because I think it gives us an opportunity as striking and as drastic as that which those who came before us seized at a vital moment in the world's history seven years ago" [i e. the formation of the O E E.C. itself]

Mr. Peter Thorneycroft (U K., President of the Board of Trade) also believed that it was essential that Western Europe should seize the opportunity of co-operating in the peaceful use of nuclear power, and declared that he saw no reason why "Euratom" should not subsist within the general European pattern. He stated that Britain was prepared to play her part in the preparatory committee to be set up, and that, although she was "stretched to the limit" as regards technicians, she would—so far as possible, and within the limits imposed by security—share her "know-how" for any imaginative European plan.

Mr. Wilgress (Canada) announced that his country would soon be ready to supply large quantities of raw materials for European nuclear projects

Other recent developments relating to the O.E.E.C. are summarized below under cross-headings:

Progress towards Trade Liberalization.

At its meeting on Feb. 28-29 the O.E.E.C. Council adopted a resolution declaring that "the achievement and consolidation after Sept. 30, 1956, of the target of 90 per cent liberalization in Europe, set by the Council in January 1955, is essential." The resolution pointed out that the O.E.E.C. must concentrate its immediate attention on other barriers to trade, such as high tariffs, restrictive State trading, and other artificial aids to exports, as well as on quantitative restrictions. The next step must be a "frontal attack" on the trade restrictions remaining after the 90 per cent stage had been realized, in so far as these restrictions were not designed to meet temporary balance-of-payments difficulties. The resolution also stated that the O.E.E.C. should study the effect on patterns of trade, both in and outside Europe, of the disposal of agricultural surpluses.

On Dec. 13, 1955, the O E E.C. had announced that the overall percentage of private trade freed from all quantitiative import restrictions between member-countries was now 85.6 per cent, compared with 83 3 per cent in December 1954, 76 6 per cent in December 1953, 64.7 per cent in December 1952, and 61.5 per cent in December 1951. In the three categories comprising the total, 93.1 per cent of the trade in raw materials had been liberalized, 81.9 per cent in food and feeding-stuffs, and 81 0 per cent in manufactured goods

The percentage of liberalization achieved by the various member-countries was as follows at Dec 1, 1955 Italy, 99.7; Portugal, 93.7, Sweden, 92.6, Switzerland, 92.5, Western Germany, 91.3, Benelux (Belgium, Netherlands, and Luxemburg), 91 1, Irish Republic, 90.2; United Kingdom, 84 8, Austria, 83 5; Denmark, 78 4, France, 77 5; Norway, 75 Greece, because of her economic situation, was not obliged to liberalize her imports, but did in fact apply an almost total *de facto* liberalization of imports, which was not taken into account in the combined percentages Turkey and Iceland had been compelled to suspend all or part of their liberalization measures for balance-of-payments reasons, and had been authorized temporarily not to comply with their obligations.

Austria subsequently increased her liberalization quota from 83.5 to 90 per cent on Jan. 1, 1956, whilst France raised her quota from 77.5 to 79 per cent on Jan 3

It had been announced on Nov. 19, 1955, that the O E.E.C. Council had appointed a committee of seven European experts, under the chairmanship of Mr. E R Copleston (U K), to study ways which would lead to the progressive removal of the remaining obstacles to "invisible" transactions. It was stated that the committee would study payments for freight, warehousing, the use of patents, insurance, advertising, etc., and also transfers of dividends, interest, rents, inheritances, dowries, etc.

The O E E C announced on Jan 25 that the three Benelux countries would in future be regarded as a single country in intra-European trade, and that the obligations regarding trade liberalization by the three countries would be met by their combined liberalization measures The Benelux countries had already unified their liberalization measures and submitted a single list to the O E E C, as shown by the December announcement on the extent of trade liberalization achieved.

A report on the liberalization of Europe's dollar trade, published on March 29, showed that member-countries as a whole had freed 54 per cent of their private imports from the dollar area from import restrictions as at Jan. 1, 1956 (on the basis of 1953 figures). The percentages of liberalization achieved in each of the three categories were: agricultural products, 71 per cent; raw materials, 55 per cent; manufactured goods, 36 per cent. The extent of liberalization of dollar trade achieved by each of the member-countries was as follows. Greece, 99 per cent, Switzerland, 98 per cent; Benelux, 87 per cent; Western Germany, 68 per cent; Sweden 64 per cent; United Kingdom, 56 per cent; Denmark, 55 per cent; Portugal, 53 per cent; Iceland, 33 per cent; Italy, 24 per cent; Irish Republic, 15 per cent; France, 11 per cent; Austria, 8 per cent.

The report said that member-countries' progress towards the liberalization of imports from the U S A. and Canada would be facilitated by the measures taken by these dollar countries to apply a more liberal commercial policy It listed in detail the various measures adopted by the U.S A. to make its markets more accessible to European goods, and expressed the hope that their favourable effect would not be weakened by the invocation of "escape clauses." It also recorded the concern of some member-countries about the extension by the U.S.A. of the application of the preferential clause under which 50 per cent of certain types of cargo had to be carried in American ships, and also about the disposal of U S. agricultural surpluses.

On the other hand, the report pointed out that member-countries' gold and dollar reserves, taken as a whole, had only continued to increase because of U.S. aid, and that there had been an appreciable increase in Europe's trade deficit with North America since the second half of 1953. Member-countries should therefore make further efforts to develop their exports to North America and to attract American investment capital The U.S.A., with its economic strength and its position as the biggest creditor country in the world, should take further measures to help set up, on a firm and lasting basis, a world multilateral trade and payments system free from the restrictions which had been hampering world trade.

Italian Economic Development.

At its meeting on Feb. 28-29 the O.E.E.C. Council also considered the Italian Government's first report on its Economic Development Programme (the "Vanoni Plan").

The report stated that during the first year of the Plan the Italian Government had made notable progress in raising the overall level of output A series of long-term development measures had been initiated, including a programme for the construction of "super-highways" (see 14442 A), plans for facilitating investment from abroad, and a special investment programme for Calabria, whilst a beginning had been made in integrating economic policies into the framework of the Plan, and in relating the formulation and administration of departmental policies to the overall conceptions of the Plan. Support to the Italian effort had been given by a special credit of $50,000,000 from the E.P.U. and by an International Bank loan

of $70,000,000 to the *Cassa per il Mezzogiorno* (see 14252 B), whilst the co-operative spirit of other countries and the favourable long-term prospects opened up by the Plan had facilitated the securing of important private credits from abroad by Italian concerns

The gross national product in Italy in 1955 had increased by almost 7 per cent over the previous year, though, after allowing for the fact that 1954 had been a poor year as regards cereal and other crops, the actual increase was probably only 5½-6 per cent. Even this, however, was higher than the annual average increase of 5 per cent contemplated by the Plan, and represented "a very satisfactory first year" It was also satisfactory that investment in fixed capital during 1955 had increased by 11 per cent over 1954, compared with the assumption in the Plan of an average annual rate of increase of 7 ¼ per cent. Consumption was estimated to have increased by 4 5 per cent, but there had been no appreciable rise in prices despite the considerable economic expansion, wholesale prices had remained virtually unchanged, whilst the cost-of-living index had risen by less than 3 per cent. The value of exports had increased by 13 per cent, and, despite a 12 per cent increase in imports and a slight increase in the trade deficit, there had been a 9 per cent reduction in the estimated overall adverse balance of payments on current account. Monetary reserves had increased by $109,000,000 after taking account of receipts of economic aid and military aid, and of foreign private investment and loans

Some progress had been made during the year in the utilization of the labour force It was estimated that although the Italian labour force had increased by 140,000, the number of those in employment had risen by 250,000, whilst under-employment had been substantially reduced except in some sectors such as textiles. Nevertheless, the number of registered unemployed in Italy, amounting to some 2,000,000, was larger than in any other Western European country and showed only a small reduction in 1955

As regards the attempts to improve the economic balance between Northern and Southern Italy, the report stated that although the expansion of total output in the South (after allowing for irregularities in agricultural output due to abnormal weather) was at best equal to that in the North, there was no evidence in 1955 of any perceptible closing of the gap between the two regions by the more rapid progress in the South contemplated in the Plan With the North developing satisfactorily, the problem for Italy was increasingly becoming the "problem of the South" As had been foreseen in the Plan higher employment in the North was stimulating migration from the South; but as this would affect only a small portion of the labour force in the South, it would remain necessary to attract industry to Southern Italy, and to diversify production there.

Tourist Statistics.

A report published by the O E.E.C. in January 1956 showed that 26,500,000 tourists visited O.E.E.C. member-countries during 1954—an increase of 16 per cent on 1953. Particularly large increases were recorded for Greece (67 per cent), Yugoslavia (38.5 per cent), the Netherlands (30 per cent), Western Germany (20 per cent), Austria (18.6 per cent), Sweden (17 per cent), and Italy (16 per cent). The number of American visitors to Europe rose from 376,000 in 1953 to 420,000 in 1954, and their total expenditure from $306,000,000 to $352,000,000; in addition, they spent $181,000,000 and $186,000,000 respectively in the two years with foreign transport companies in fares.

The following table gives statistics for foreign tourism in O.E.E C. countries in 1954.

	Tourist Arrivals	Tourist Nights	Receipts	Payments	Surplus or Deficit
			($ million)		
Austria	1,959,595	9,560,937	79.5	15.6	+ 63 9
Belgium	980,900	2,522,411	42 1[1]	50.8[1]	− 8 7[1]

Seventh Annual Report of O.E.E.C.

The Seventh Annual Report of the O.E.E.C., published on Feb. 22, said that since the beginning of 1953 Western Europe had enjoyed "a wave of uninterrupted and vigorous economic expansion," but gave a warning that a danger to this prosperity had arisen during the past year. Signs of inflationary pressure had appeared, even if there had been no element of crisis in the situation. Production was pressing on capacity in most industries, and a "tight" market situation had developed in certain basic industries such as coal and, to a certain extent, steel. These tendencies had not originated from outside causes, as was the case in 1951 (during the Korean War), but from "a somewhat too rapid rise of internal demand." Nevertheless, the report affirmed that the European economy was "not in serious difficulties, but rather in a position of strength."

Expansion of Production and Demand. The rate of expansion over the past three years had been very rapid, the combined gross national product of member-countries having increased by 5 per cent in both 1953 and 1954 and by an estimated 6 per cent in 1955 A significant part of this expansion was accounted for by the "exceptional upsurge" in German output, which had averaged 9 per cent a year during the period 1952-55 Fixed investment by member-countries as a whole had risen by about 9 per cent in 1953 and 1954, and probably by the same amount in 1955. While the rate of expansion of investment had varied considerably among the individual countries, the great majority had experienced a rise of 20 per cent or more in the three-year period, with Austria, Western Germany and Greece registering increases of over 40 per cent. The increase in house-building had been the outstanding feature in the growth of investment in 1953-54, but during the first part of 1955 a number of countries had modified their rate of expansion in this sector

Total *per capita* consumption had risen in 1952-53 by some 14 per cent Whilst consumer credit had played an increasingly important role in this rise, the underlying basis had been provided by the steady rise in wage rates, salaries, etc., and by the prospect of high and sustained levels of employment "Consumer durables" such as motor cars, electrical appliances, and television sets had played a large part in this rise in *per capita* consumption

Output of manufacturing industries in member-countries over the past three years had increased by 25 per cent, the biggest increases having taken place in engineering and metals, where demand had been increasing faster than output. Steel production capacity was now being used to the full, and shortages of the necessary raw materials had involved the need to import more than 10 per cent of the scrap iron and coking-coal used

As the expansion of production had absorbed virtually all the labour reserves in most member-countries, there was now a fairly general shortage of labour, which was often acute in skilled occupations in the engineering and building trades The serious unemployment and under-employment in Southern Europe had, however, been ameliorated only to a moderate extent by this expansion Under-employment in Greece and Turkey continued to be a major problem, whilst in Italy, although employment had increased, there had not yet been a significant fall in unemployment. Labour productivity in manufacturing had risen considerably in most member-countries in 1953 and 1954, and there had been further increases in 1955.

Financial Stability. The present problem facing most member-countries was to avoid excessive increases in demand whilst allowing output to expand to the extent feasible under conditions of full employment. The report emphasized, however, that the tensions in the present situation should not be exaggerated, as they were in no way comparable to the overt inflation which had developed as a result of the Korean War.

The report brought a table showing that in all member-countries (except Switzerland) the rise in wages since 1953 had outstripped the increase in consumer prices, and it gave a warning that "the speed at which wage-rates have been rising lately cannot be maintained without endangering the financial stability of member-countries." With regard to the problem of inflation, the report gave an account of the methods used to combat it—chiefly restriction of bank credit and a rise in official discount rates—and suggested that "too much of the total impact of the measures taken so far falls on investment rather than consumption." As the European economy still needed a higher level of industrial investment, it was preferable that "any further action should be directed towards restraining the rate of growth of consumption rather than of investment"

Trade and Payments. For almost all member-countries the current deficit on transactions with the dollar area (excluding U S. military aid) had widened rapidly as a result of greatly increased dollar imports. Receipts from U S defence aid had, however, continued to grow and had thus contributed to the continued rise, though at a somewhat slower pace, in the gold and dollar reserves of member-countries as a whole The development of exports to the dollar area had been disappointing, though there had been a substantial improvement in the third quarter of 1955.

The report expressed the view that short-term prospects for Western Europe's balance of payments were favourable, although the rise in member-countries' gold and dollar reserves was probably tailing off, and some additional measures might be required to safeguard the balance-of-payments position of individual member-countries, no general threat to European economic expansion was apparent In the long term, however, there could not be the same assurance. "In particular," the report stated, "the heavy reliance on U.S extraordinary expenditures, the failure of exports, particularly dollar exports, to expand with the same rapidity as imports, and the difficulties of increasing gold and dollar earnings from third areas, leave little room for complacency."

Main Lines of Future Action. After reviewing the activities of the O.E.E.C. in recent years in the fields of trade liberalization, agriculture, transport, productivity, etc., the report said that whilst the "impressive expansion" in European production over the past three years had allowed a substantial rise in the standards of living, important weaknesses had at the same time been revealed. Productive capacity in some basic sectors appeared too rigid, and internal financial stability in some countries too vulnerable, and both these factors had tended to create balance-of-payments difficulties, thereby revealing the underlying international disequilibrium which was an obstacle to the creation of a wider system of trade and payments. It thus appeared that there was need for further action towards the two longer-term objectives, which were in fact inseparable: development of productive resources on the one hand, and freer trade and payments on the other. "In order to deal successfully and in the light of future developments with long-term problems," the report concluded, "the Organization is ready to assume new responsibilities."

The O.E.E.C. Council elected M. Gerard Bauer (Switzerland) on Feb. 4 as chairman of the Executive Committee until June 30, 1956.—(O.E.E.C. Information Division, Paris - Times - Financial Times - Le Monde, Paris) **(Prev. rep. 14383 A.)**

Corrigendum. In 14383 A a line was inadvertently dropped from the opening paragraph in the printing. This paragraph should read as follows: "Although the meetings of the O.E.E.C. Council on June 9-10 and July 28-29 were concerned principally with the renewal of the E.P.U. and the provisions of a European Monetary Agreement (see 14374 A), a number of other matters were also discussed. These and other O.E.E.C. developments are summarized below."
(Ed. K.C.A.)

A. AVIATION. — World Speed Record regained by Britain. - Mr. Twiss achieves 1,132 m.p.h.

A new world air speed record—the first of over 1,000 miles an hour—was set up on March 10 by a British pilot, Mr. Lionel Peter Twiss (34), who averaged 1,132 m.p.h. (1,822 kilometres p.h.) in two runs over a nine-mile course between Chichester and the Ford naval air station, in Sussex. Mr. Twiss, a test pilot of the Fairey Aviation Company, and a former R.A.F. night-fighter pilot, flew a Fairey *Delta 2* research aircraft, powered by a Rolls-Royce *Avon* turbo-jet fitted with reheat. He achieved a speed of 1,117 m.p.h. on the first run and 1,147 m.p.h. on the second, the two runs being made at a height of 38,000 feet. The new record was officially announced by the Royal Aero Club, and is subject to confirmation by the International Aeronautical Federation.

The machine's flight path was plotted by radar stations of R.A.F. Fighter Command, and its speed was calculated by new photographic equipment, of the most advanced type, operated, constructed and designed by technicians of the Royal Aircraft Establishment, Farnborough. [It was stated in the press that the latest photographic equipment could calculate speeds with an accuracy of one-thousandth of one m.p.h.] The *Delta 2*, a swept-wing aircraft, was ordered by the Ministry of Supply for research into problems of supersonic flight, and is one of the most advanced research aircraft yet produced in any country.

Under new rules adopted by the International Aeronautical Federation, an aircraft attempting a speed record may fly at any height and is timed over a course which may be between 15 and 25 kilometres in length. Two runs must be made in opposite directions, the average for the two being the speed officially achieved. Until the last few years—when the higher speeds attainable had made the old rules obsolete—aircraft attempting new speed records had been required to fly at low altitude over a three-kilometre course.

The new record was over 300 m.p.h. faster than the previous official world record of 824.05 m.p.h. set up on Aug. 20, 1955, by Colonel H. A. Hanes, a U.S. officer, in a *Super Sabre* (F100) over a course in California. The last British holder of the world speed record was Lt.-Cmdr. Michael Lithgow, who averaged 785.7 m.p.h. in a Vickers Supermarine *Swift* (F4) over a course in Libya in 1953 (see 13227 B.). (Times - Daily Telegraph)
(Prev. rep. Aviation Records, 14406 B.)

B. COLOMBO PLAN. — Asian Nuclear Centre to be established in the Philippines.

The U.S. International Co-operation Administration announced on March 15 that the Philippines had been chosen as the site for the Asian nuclear centre which the U.S.A. had promised to provide at the Singapore meeting of the Colombo Plan Powers in October last. The announcement said that the Philippine site best met the requirements of accessible local facilities, ease of access, and convenience of communications.—(U.S. Information Service) **(14651 A.)**

C. AUSTRIA. — Diplomatic Relations with Israel.

The Austrian Cabinet decided on Feb. 21 to establish diplomatic relations with Israel and to open an Embassy in Jerusalem. **(Manchester Guardian)**

D. UNITED KINGDOM. — Gold and Dollar Reserves in March. - Increase of $67,000,000.

The sterling area had a gold and dollar surplus in March of $67,000,000 after taking account of (*a*) $5,000,000 received in U.S. defence aid; (*b*) the payment of $16,000,000 to the European Payments Union, representing that part of the February deficit which had to be settled in gold or dollars; and (*c*) the payment of $2,000,000 under bilateral agreements with creditors of the E.P.U. As a result of the March surplus, the sterling area's gold and dollar reserves rose to $2,277,000,000 on March 31.

Provisional figures for the E.P.U. March settlement showed that the U.K. had a deficit of less than $1,400,000 (£500,000), which would be settled in April three-quarters in gold or dollars and one-quarter by an increase in the U.K. debt to the Union. (Treasury Press Office) **(Prev. rep. 14742 C.)**

E. PARAGUAY. — Currency Devaluation.

The International Monetary Fund announced on March 1 that the Paraguayan guarani had been devalued from 21 guaranies to 60 guaranies to the U.S. dollar, the other new parities being: 1 guarani=0.0148112 grams of fine gold or 1.66667 U.S. cents; 2,100 guaranies=1 troy oz. of fine gold. The new par value would apply to all exports, essential imports, receipts and transfers of certain services included in the foreign exchange budget, and all Government transactions. For non-essential imports there would be a temporary exchange surcharge of 25 guaranies per U.S. dollar, whilst a free market would be retained for capital transactions and services not included in the official market. The new exchange system eliminated a large number of exchange rates for both exports and imports, as well as exchange rate discrimination among different foreign currencies.—(International Monetary Fund)
(Prev. rep. 13806 E.)

F. WORLD FEDERATION OF TRADE UNIONS. — Headquarters transferred to Prague. - Yugoslav Trade Union Federation readmitted to Membership.

Prague Radio announced on March 13 that the executive of the World Federation of Trade Unions had accepted an invitation from the Czechoslovak trade unions to set up its new headquarters in Prague, following its expulsion from Vienna. This decision superseded the earlier announcement that the Federation's new headquarters would be located in Rome.

The Secretary-General of the W.F.T.U., M. Louis Saillant, announced on March 2 that the Yugoslav Trade Union Federation had been readmitted to membership of the W.F.T.U., from which it had withdrawn in 1950 after the break between Marshal Tito and the Cominform.—(Le Monde, Paris)
(Prev. rep. W.F.T.U. Headquarters, 14725 D; 14703 C; Yugoslav Unions, 10760 B.)

G. AFGHANISTAN. — Soviet Economic Assistance.

An agreement was signed in Kabul on March 1 whereby the Soviet Union agreed to supply materials and equipment for the construction in Afghanistan of two hydro-electric stations, three vehicle repair factories, irrigation works, a physics and chemistry laboratory, airfields at Kabul and Bagram, and a motor-road across the Hindu Kush. It also provided that Soviet specialists and technicians would take part in the construction work and help to train local labour. The assistance will be provided under the Soviet long-term credit to Afghanistan agreed upon during the visit of Marshal Bulganin and M. Krushchov in December last.—(Manchester Guardian)
(Prev. rep. 14603 A, page 14606.)

H. ITALIAN SOMALILAND.—General Elections.

The first elections ever held in Italian Somaliland took place on Feb. 29. Of the 60 seats in the new Assembly, the League of Somali Youth, which advocates the unification of British, French and Italian Somaliland, obtained 42 seats, whilst 13 seats went to the *Hizbia Dighil Mirifle* (a party which favours the retention of tribal organization) and three to the Democratic Party. (Corriere d'Informazione, Milan - Le Monde, Paris)
(Prev. rep. 10689 A.)

I. INDIA. — Community Projects.

Official statistics published in New Delhi in March showed that over 81,000,000 people spread over 125,000 villages throughout India were covered by Community Projects and National Extension Service blocks as at Feb. 20. The total of such projects and N.E.S. blocks allotted was 1,140.
(The Statesman, Calcutta) **(Prev. rep. 13526 B; 12987 B.)**

A. INDIA. — Steel Industry. - Final Agreement on Construction of British and Soviet Steel Plants. - Expansion of Tata Steelworks. - Opening of First Steel Tube Plant. - Proposed Fourth Government Steel Plant at Bokharo (Bihar).

A number of important developments in connexion with the development of the Indian steel industry are summarized below:

The Durgapur Steel Plant.

It was announced in London and Delhi on April 4 that an agreement for the construction of the integrated iron and steel works to be built with British assistance (see 14447 A) had been concluded between the Indian Government and the Indian Steel Works Construction Company, a consortium of British firms. It had earlier been announced that the works would be situated at Durgapur, in the Damodar Valley of West Bengal. The plant will have an initial capacity of 1,000,000 tons a year, with facilities for increasing this to 2,000,000 tons, and will cost about £80,000,000. Payments in sterling under the contract will amount to about £52,000,000, whilst the remaining £28,000,000 (principally expenditure on labour costs) will be in rupees.

The project was officially described as a "package deal" by which the complete steelworks would be constructed and made over to the Indian Government, as distinct from a form of contract under which the Indian Government would buy the equipment from Britain and assemble the plant itself. A spokesman of the Indian Steel Works Construction Company stated that work on the site had already begun, but was at present confined to clearing and the construction of ancillary services, all of which were in the hands of the Indian Government. Final tenders for the construction of the plant itself were to be submitted by May 15, and were expected to receive agreement by the end of June. Shipment of materials should begin soon afterwards, and work on the plant would start as soon as possible after that

Of the £52,000,000 non-Indian currency needed for the plant, £25,500,000 would be met from sterling balances held by the Indian Government, £15,000,000 would be a Government-to-Government credit under the Export Guarantee Act, 1949, and £11,500,000 would be raised by the consortium through credit facilities arranged by Lazard Brothers & Co. with Lloyds Bank, Barclays Bank, Martins Bank, the District Bank, and Glyn Mills and Co Ltd

The members of the consortium, which was formed specifically to tender for the project and which had sent a delegation to India to discuss costs and other details, were: Simon-Carves, Ltd. (coke ovens); Head, Wrightson and Co. Ltd. (blast furnaces), the Wellman Smith Owen Engineering Corporation (melting shop equipment), Davy and United Engineering Co Ltd. (rolling mills), Joseph Parks and Son Ltd, Dorman Long and Co Ltd., Sir William Arrol and Co. Ltd., and the Cleveland Bridge and Engineering Co Ltd (structural steelwork); British Thomson-Houston Co. Ltd., the English Electric Co. Ltd., the General Electric Co. Ltd., Metropolitan-Vickers Electrical Co. Ltd (electrical installations); and the Cementation Co. Ltd., which will carry out all the civil engineering work.

The contract with the consortium was believed to be the largest single contract ever placed with a British company.

The Bhilai Steelworks.

It was announced in Delhi on March 8 that the Government of India had accepted the detailed project report for the Bhilai steelworks in Madhya Pradesh, furnished by the Soviet authorities in December 1955. On the same day letters were exchanged between the two Governments regarding certain modifications which had been agreed upon and which would be incorporated in the design of the works.

It was stated that the steelworks would have three blast furnaces for the production of iron instead of two, as originally proposed. In addition to producing 300,000 tons of saleable pig-iron, the plant would also turn out 1,000,000 tons of ingots yielding about 770,000 tons of rails, heavy, medium, and light structural steels, sleeper bars and billets With slight additions to the plant, such as an additional open hearth and a group of soaking pits, its capacity could be raised at any time to 1,300,000 tons of ingots. Apart from this, the plant layout had been so designed that it could be expanded in future to produce up to 2,500,000 tons of ingots.

The Bhilai steelworks will use the hitherto unexploited iron ore resources of the Dalli-Rajhara Pahar area, about 60 miles south of Bhilai; coal will be drawn from Jharia, Bokharo and the nearby Korba fields, now being developed; whilst power will be supplied from a thermal station at the Korba coalfields.

A contract for the supply of Soviet equipment to the Bhilai steelworks, costing about 550,000,000 rupees (£42,000,000), was signed in Delhi on April 2.

Expansion of Tata Steelworks.

It was announced on Nov. 22, 1955, that an agreement had been concluded between the Tata Iron and Steel Company Ltd. and the Henry J. Kaiser Company (U.S.A.) under which the latter would undertake the expansion of the Tata works, 150 miles west of Calcutta. This extension, which would increase Tata's production from 1,800,000 to 2,000,000 ingot long tons per year, was estimated to cost $130,000,000, of which $50,000,000 would represent the purchase of machinery and equipment. The contract was believed to be one of the largest steel-plant construction contracts ever awarded to an American firm.

Opening of First Indian Steel Tube Plant.

India's first steel tube plant, at Jamshedpur (Bihar), was formally opened on March 7 by Dr. Sinha, the Chief Minister of Bihar. The plant, jointly built by Tata's and Stewarts and Lloyds Ltd. (see page 14103, first column), cost Rs.30,000,000 (£2,250,000) and was expected to meet fully India's present and estimated domestic requirements. Another project by the two companies—a £1,500,000 welding mill for bicycle tubes and locomotive boilers—is under construction at Jamshedpur, whilst a third joint scheme—for the manufacture of seamless tubes essential for defence requirements—is awaiting sanction by the Indian Government.

Fourth Government Steel Plant.

The Indian Minister for Industry and Commerce, Mr. Krishnamachari, stated on Oct. 31 that the fourth steel plant to be erected by the Indian Government would be located at Bokharo, in Bihar. The site only would be developed in the period of the Second Five-year Plan, however, and operations on the plant itself would start during the period of the third plan.—(The Statesman, Calcutta - The Hindu, Madras - Indian High Commissioner's Office, London - Times - Financial Times - New York Herald Tribune) **(Prev. rep. 14447 A; 14105 A.)**

B. FINE ARTS. — World Prizes for Paintings.

It was announced in New York on March 15 that the Solomon R. Guggenheim Foundation had established a number of prizes for paintings, viz., (1) an international award of $10,000 (£3,570) for the best painting selected by an international jury; (2) at least 16 national awards, each of $1,000; and (3) three regional awards (for North and South America, Europe and Africa, and Asia and Australasia), also of $1,000 each. The awards would be made every two years, beginning in 1956, and there would be no stipulations with regard to the subject-matter of paintings submitted.

Preliminary selections will be made by national committees in the various countries, these committees being nominated by the International Council of Museums, the International Association of Art Critics, and the International Association of Plastic Arts (representing painters and sculptors). Each national committee will choose five paintings (which may be the work of one artist), and these paintings will be submitted to an International Committee—drawn from the above-mentioned international bodies—which will award the prizes.

The national awards will be given for paintings by artists born or living in countries where there are national sections having representation in all three international bodies Sixteen countries have such representation at present—Austria, Belgium, Brazil, Denmark, Egypt, France, Italy, Japan, the Netherlands, Poland, Portugal, Sweden, Switzerland, the United Kingdom, the United States, and Yugoslavia. Nations not at present represented in the three international organizations can become eligible for national section awards by acquiring such representation before June 1, 1956.

The three regional awards will be open to artists who are nationals of countries not represented in the international organizations, or to artists who the juries may decide are reasonably justified in not wishing to compete as nationals of the countries of their birth.

The Foundation was formed in 1937 by the late Solomon R. Guggenheim "for the promotion and encouragement of art and education in art, and the enlightenment of the public in the field of art." It runs the Guggenheim Museum of Art in New York City. The present chairman of the Foundation (Mr. Harry F. Guggenheim) said that President Eisenhower had shown much interest in the world prizes for painting, and had agreed to present the first international award.

(New York Times - Times - Manchester Guardian)

C. UNITED KINGDOM. — Bank of England.

It was announced on Feb. 10 that the Queen had approved the appointment of Sir Alfred Roberts, a member of the General Council of the T.U.C., as a Director of the Bank of England in place of Lord Piercy, who was resigning on Feb. 29 upon reaching the age of 70, and that Sir Alfred would serve for the remainder of Lord Piercy's term (until Feb. 28, 1958). It was also announced that her Majesty had approved the reappointment of Sir George Abell, Sir George Bolton, Sir John Hanbury-Williams, and Sir Harry Pilkington as Directors of the Bank for a four-year term from March 1, 1956.

(Financial Times) **(Prev. rep. 14044 B.)**

D. CANADA. — Increase in Bank Rate.

The Bank of Canada raised its Bank Rate on April 4 from 2¾ to 3 per cent, the increase being the fourth in eight months.

(Financial Times) **(Prev. rep. 14557 C.)**

APRIL 7—14, 1956

A. MIDDLE EAST. — Political and Military Developments in Arab-Israeli Dispute. - Dr. Hammarskjold's Mission to reduce Arab-Israeli Tension.

Recent important developments in the Middle Eastern situation are summarized below under cross-headings, in continuation of 14643 A.

Tripartite Discussions in Washington. - Meeting of Security Council. - Dr. Hammarskjold entrusted with Mission for relieving Arab-Israeli Tension.

Following the joint statement on the Middle East issued by President Eisenhower and Sir Anthony Eden during their Washington discussions (see 14685 A), exchanges of views on the Middle Eastern situation began at the State Department on Feb. 8 between Mr. Robert Murphy, U.S. Deputy Under-Secretary of State, and the British and French Ambassadors, Sir Roger Makins and M. Couve de Murville. Further discussions were held later in February and in March, but no official statement was issued. It was understood, however, that various suggestions for easing tension in the Middle East were under consideration.

The Lebanese Ambassador in Washington, on behalf of all the member-countries of the Arab League, had informed the State Department on Feb 2 that the Arab countries would not feel bound by any decisions taken as a result of the Anglo-American talks in which they had not been consulted. He added that "any policy pursued in our area [i e the Middle East] not agreed to by the Arabs cannot be a factor for stability."

President Eisenhower, at a press conference on March 22, declared that any major outbreak of hostilities in the Middle East would be a "catastrophe" for the whole world, and stressed the need to persuade both sides that the only hope of a peaceful solution lay in mediation. He emphasized that the U.S. Government was giving full support to the United Nations in these efforts, and that it took the Tripartite Declaration of 1950 "very seriously."

At the request of the U.S. representative, the Security Council met on March 26 to consider a U.S. resolution which proposed, "as a matter of urgent concern," (*a*) that the U.N. Secretary-General (Dr. Hammarskjold) should visit the Middle East to confer with Arab and Israeli leaders, and also with General Burns, the head of the U.N. Truce Supervisory Organization; (*b*) that he should conduct an on-the-spot survey of methods of relieving tension and strengthening the truce supervision machinery; and (*c*) that he should report to the Security Council within a month of the adoption of the resolution. The resolution described the situation in the Middle East as "such that its continuance is likely to endanger the maintenance of international peace and security."

Mr. Cabot Lodge (U.S.A.), who presented the resolution, pointed out that the Security Council had had the Palestine question on its agenda on 90 occasions during the past seven years Although there had been no further outbreak of war since 1947, and the U.N had been an indispensable factor in preventing renewed hostilities, the present situation was so alarming that the U.N. should exercise its full authority to deal with "the present ominous drift." "The United States," he declared, "believes that in the first instance U.N efforts should be concentrated upon full compliance with armistice agreements by Israel and the Arab States, and on the carrying out in detail of the Security Council's resolutions of March 30, 1955, Sept. 8, 1955, and Jan. 19, 1956."

The U.S. resolution was supported by **Sir Pierson Dixon** (U.K.), **M. Hervé Alphand** (France), and the Australian and Peruvian members. The Persian representative, however, asked that the debate should be formally adjourned so that the countries most concerned could have time to consider the implications of the resolution and to give their views to the Security Council [Requests had been received from Israel, Egypt, Jordan, Syria, and the Lebanon to take part in the Council's discussions] The adjournment was supported by the representatives of the U S S R (**M. Sobolev**), Yugoslavia, and Cuba, and the debate was accordingly adjourned by Sir Pierson Dixon (chairman during March) to enable Israel and the four Arab countries to be present during the discussions.

When the Security Council reassembled on April 3, **M. Sobolev** accused the Western Powers of planning armed intervention in the Middle East in violation of the sovereign rights of the Arab States, and declared that no decisions on Palestine could be taken outside the U.N., or without the consent of the parties concerned. He asserted that the Ambassadorial talks in Washington had led to a worsening of the situation, condemned M. Pineau's proposal for a tripartite conference of the Western Powers on the Middle East (see below), and denounced the despatch of U S. Marine reinforcements to the Mediterranean (see 14801 B) as a factor which would aggravate the situation. M. Sobolev moved several amendments to the U.S. resolution (notably in connexion with the wording), one of which sought to describe the position in the Middle East as "unsatisfactory" and not as constituting a threat to the peace and security of the area. He also asked the Security Council to rule that any proposals made by Dr. Hammarskjold to reduce tension should be agreed upon beforehand by the Arab States and Israel.

The British, U.S. and French representatives repudiated the allegations made by M. Sobolev, **Sir Pierson Dixon** commenting that it was unfortunate that the Soviet representative, alone among the members of the Security Council, had seen fit to criticize the "immediate and practical scope" of the U.S. resolution **Mr. Cabot Lodge** denied that the U.S.A. had taken any measures which could possibly exacerbate the situation in the Middle East, declared that the Soviet amendments were "not necessary or particularly desirable"; and emphasized that the U.S. resolution was designed to enable Dr. Hammarskjold to carry out his discussions with the parties concerned "entirely within the framework of the armistice agreements." The Arab and Israeli representatives welcomed the U.S. initiative and assured Dr. Hammarskjold of their co-operation in his proposed mission.

After rejecting the Soviet amendments on April 4, the Security Council unanimously adopted the original U.S resolution, which was supported by M. Sobolev despite his earlier criticisms, he stated that he would now vote for the resolution because it had been "accepted by the interested parties."

Immediately after the vote, Dr. Hammarskjold accepted the mission entrusted to him by the Security Council, asked for co-operation by all the parties concerned, and appealed to them to exercise restraint. He left New York for the Middle East on April 8, had consultations in Rome the following day with Mr. Henry Vigier (political adviser to General Burns) and Mr. Labouisse (head of the U.N. Relief and Works Agency in Palestine), and flew to Beirut on April 10. Later the same day he flew to Lydda (Israel), where he met General Burns and senior officials of the Israeli Foreign Ministry, and in the evening went on to Cairo with General Burns. On April 11 Dr. Hammarskjold had discussions with Colonel Nasser, at which Dr. Fawzi (the Egyptian Foreign Minister) and General Burns were also present.

Dr. Hammarskjöld's Earlier Visit to Middle East.

During his world tour, undertaken after the end of the 10th session of the U.N. General Assembly, Dr. Hammarskjold had visited the Middle Eastern capitals during the last week of January for discussions with the Prime Ministers of Egypt, Israel, Jordan, the Lebanon, and Syria, and also with General Burns. After his talks in Cairo with Colonel Nasser (Jan. 23) he informed Mr. Ben-Gurion in Jerusalem on the following day that Egypt had accepted three proposals put forward by him (Dr. Hammarskjold) for reducing tension in the demilitarized zone at El Auja, on the Egyptian-Israeli border (see page 14526). The Government of Israel had already accepted these proposals on Jan. 4, on which date a formal notification had been sent to General Burns.

The U.N. Truce Supervisory Organization gave the following details on Jan. 24 of the Secretary-General's proposals as accepted by Egypt and Israel:

(1) Egypt had agreed that U N. observers should mark the limits of the demilitarized zone at El Auja, wherever such marking was required

(2) Egypt had already withdrawn Egyptian personnel and obstacles from the demilitarized zone. Should a U.N. survey disclose any minor encroachments, these would be removed at once.

(3) The third proposal related to the removal by Israel of military forces, obstacles, and mines from the zone.

Soviet Warning against Despatch of U.S. and British Troops to Middle East. - U.S. and British Reaffirmation of Tripartite Declaration.

The Soviet Foreign Ministry issued a statement on Feb. 13 declaring that the despatch of U.S. and British troops to the Middle East would be "a gross violation of the U.N. Charter" and would "create a threat to peace in that area." The statement was worded as follows.

"Certain joint measures are envisaged in the statement of President Eisenhower and the British Prime Minister published on Feb. 1, 1956. The participants in the Washington conference affirm that the measures they have proposed with regard to the countries of the Near and Middle East are caused by the state of tension in the relations between Israel and her Arab neighbours. At the same time they try to present the case in such a way as if the Tripartite Declaration of the U S.A., Britain, and France of May 25, 1950, enabled them to undertake independent action outside the framework of the United Nations. . . .

"It is not the first time that efforts have been made to impose on countries of the Near and Middle East the will of certain foreign circles whose interests are alien to the national aspirations of the peoples of that area. Not without reason, the peoples of these countries connect these actions of the Western Powers with the aspirations of the oil monopolies to use the oil wealth of this area in the interests of their own enrichment, disregarding the interests of the peoples of those States. . . ."

After denouncing "the notorious Baghdad Pact," and alleging that the Western Powers were aiming at the creation of a "new military bloc" in the Middle East, the Soviet declaration continued: "The Washington statement alleges that its participants desire the settlement of the dispute between Israel and her Arab neighbours. This would be a good thing, were it true But in that case why have these decisions been adopted without the participation of the countries concerned, and behind their backs? The known facts show that there is a clear discrepancy between such statements and certain actions of the Western Powers in relation to the countries of the Near and Middle East. Moreover, there have been frequent reports of late that certain States intend to move their armed forces into the above-mentioned areas. These reports have not been denied. . . . The movement of troops into the countries of the Near and Middle East would represent an act contrary to the interest of strengthening peace, would create dangerous friction and tension in the area, and would make even more difficult the possibility of settling disputed issues between the countries of this area . . .

"Any action leading to complications in the Near and Middle East, and to increased tension in that area, is bound to be the subject of legitimate concern on the part of the Soviet Government. Such an act as the despatch of foreign troops to the countries of the Near and Middle East, without the consent of the interested States and without the sanction of the U N Security Council, would be a gross violation of the U N Charter and of the sovereignty of a number of countries. The United Nations cannot disregard actions involving the countries of the Near and the Middle East which would be prejudicial to their national independence and create a threat to peace in that area."

The U.S. State Department spokesman (Mr. Lincoln White) described the Soviet statement as "propaganda." He denied that the Western Powers were planning to send troops to the Middle East; emphasized that they were concentrating on diplomatic efforts to relax the tension between Israel and the Arab countries; and pointed out that under the Tripartite Declaration of 1950, intervention could only take place when an act of aggression had been committed. Whilst the U.S.A., Britain, and France were anxious to work as far as possible through the United Nations, they would not permit a Soviet veto to paralyse the U.N., as had happened in the past, if action was required to restore peace in the area.

The following statement was issued by the spokesman of the British Foreign Office, Sir George Young, on Feb 15:

"The Washington communiqué dealt with action which might have to be taken under the Tripartite Declaration of 1950. This declaration was designed to assist in the maintenance of peace and security in the area by making it clear that we should oppose the use of force to alter the frontiers or armistice lines resulting from the cease-fire of 1949 We said that we should take action both inside and outside the U N. in the light of the increased tension caused primarily by Soviet action. The three Powers decided in Washington that they had a duty to make it plain that the Tripartite Declaration means what it says. There has been no question of sending forces to Middle East countries without their consent. On the contrary, the purpose of the Washington statement . . has been to show the countries concerned that, if they become the victims of an attack, there will be friends within reach and ready to act in their support."

Statements by President Eisenhower and Mr. Dulles. - U.S. Offer to guarantee Arab-Israeli Borders.

In a statement to the Senate Foreign Relations Committee on Feb. 24, Mr. Dulles said: "Given a solution to other related problems, President Eisenhower has indicated his willingness to recommend that the United States join in formal treaty engagements to prevent or thwart any effort by either side to alter by force the boundaries between Israel and its Arab neighbours."

Mr Dulles said that the U.S. Government recognized that prior agreement on the borders was essential before they could be guaranteed. "The present border arrangements," he added, "were not designed to be permanent frontiers in every respect A more permanent and agreed line is necessary In spite of conflicting claims and sentiments, I believe the achievement of such a line is possible, and the U S.A remains willing to assist in the search for a solution"

Emphasizing that the U.S.A did not intend to get into an arms race in the Middle East, Mr. Dulles pointed out that the problem had been complicated in the past six months by shipments of Soviet-bloc arms to that area, with the result that "conditions for an arms race now exist as certain countries of the Middle East vie with one another in the purchase of military items" After saying that it was natural that Israel should want to increase her military capabilities in the circumstances, Mr Dulles added. "However, Israel, because of its much smaller size and population, could not win an arms race against Arabs having access to Soviet stock It would seem that Israel's security could be better assured, in the long run, through measures other than the acquisition of additional arms in circumstances which might exacerbate the situation" These measures included reliance on the United Nations, the Tripartite Declaration of 1950, and the arrangements made by President Eisenhower and Sir Anthony Eden for consultations with France on the Middle East, which together added up to "a more effective deterrent than additional quantities of arms."

As regards the sale of 18 light tanks to Saudi Arabia (see 14726 A), Mr. Dulles said that the U.S Government had agreed to this deal because it was physically impossible for Saudi Arabian tanks to attack Israel across the intervening desert. The tank sale was therefore not contrary to the Tripartite Declaration, since it did not upset the existing arms balance between Israel and its Arab neighbours. He added that Saudi Arabia was the only Middle Eastern country which had made substantial arms purchases in the United States.

In a further statement on April 3, Mr. Dulles said that he saw no immediate emergency in the Middle East requiring any Congressional action to strengthen the President's authority, and added that American policy remained "substantially what it was when I explained it to the Senate Foreign Relations Committee."

On April 9, however, following the renewed Egyptian-Israeli clashes in the Gaza area (see below), President Eisenhower issued a statement emphasizing (1) that the U S.A. would give fullest support to Dr. Hammarskjold's efforts to reduce tension in the Middle East, and (2) that the U.S.A., "in accordance with its responsibilities under the U.N. Charter, will observe its commitments within constitutional means to oppose any aggression in the area." The President added that both he and Mr. Dulles regarded the situation in the area "with the utmost seriousness."

At an earlier press conference on April 4, President Eisenhower had strongly denied British and U S. press reports—unsubstantiated either in London or Washington—that the British Government was exerting pressure on the U.S Administration to take a firmer line in the Middle East. The President confirmed that he had exchanged a number of messages with Sir Anthony Eden on the Middle East situation, but emphasized that there had been no question of any "pressure" from the British side. Whilst the two countries had "slightly differing viewpoints" about America's role in the Middle East, particularly as regards the Baghdad Pact, his exchanges with Sir Anthony Eden were in no way intended to take the place of normal diplomatic exchanges. In reply to a question about the despatch of U.S Marine reinforcements to the Mediterranean, the President declared. "I have announced time and time again that I will never be guilty of any kind of action that can be interpreted as war until Congress, which has the constitutional authority, says so . . . I am not going to order any troops into anything that can be interpreted as war until Congress directs it."

The British Foreign Office issued a statement on the same day denying press reports that Sir Anthony Eden had written a personal letter to President Eisenhower urging him to adopt a strong anti-Egyptian line in concert with the U.K. Government.

Mr. Selwyn Lloyd's Visit to Middle East. - M. Pineau's Proposal for Tripartite Meeting.

The British Foreign Secretary, Mr. Selwyn Lloyd, visited a number of Middle Eastern capitals and Delhi while on his way to, and returning from, a meeting of the SEATO Council held in Karachi on March 6-9. Before arriving in Karachi he visited Cairo (March 1-2) and Delhi (March 3-4), with a short four-hour stay in Bahrein, and after the Karachi meeting paid visits to Baghdad (March 9-10), Teheran (March 10-11), Ankara (March 11-13), Jerusalem, Israeli sector (March 13-14) and Tripoli (March 14). Mr. Lloyd had discussions with the Prime Ministers and Foreign Ministers of all the countries visited, returning to London on March 15.

The Foreign Secretary was questioned in the House of Commons on March 26 by Mr. Arthur Henderson (Lab.), who asked for details of "the new plan which, according to the Foreign Office spokesman [see above], has been prepared by the British Government with a view to taking immediate action in the event of aggression by any country in the Middle East."

Mr. Selwyn Lloyd replied: "So far as action by H.M Government is concerned, at the moment we are concerned with endeavouring to keep the peace In that function the United Nations has an important part to play As far as plans for various hypothetical circumstances are concerned, I do not think that these can be publicly announced. . We intend to honour in the spirit and the letter the application of the Tripartite Declaration. That, obviously, involves the preparation of various plans for various contingencies"

The French Foreign Minister (M. Pineau), after attending the meeting of the SEATO Council in Karachi, informed the National Assembly in Paris on March 22 that during his stay in the Pakistani capital he had had discussions with Mr. Dulles and Mr. Selwyn Lloyd and had proposed a three-Power meeting to discuss the Middle Eastern situation.

Cairo Meeting of Egyptian, Syrian, and Saudi Arabian Heads of State. - King of Jordan refuses Invitation to Arab "Summit" Conference.

Colonel Nasser, President Kuwatly of Syria, and King Saud of Saudi Arabia met in Cairo from March 6-11, together with the Prime Minister of Syria and the Foreign and Defence Ministers of the three countries. A communiqué published at the end of the conference stated that the situation in the Middle

East had been examined " in all its aspects " ; that the three countries were agreed on the need to " safeguard the Arab world against the dangers of the cold war " , that they were opposed to all " foreign pacts " which " sacrifice Arab interests and aspirations to the personal interests of the great Powers " ; and that " comprehensive plans " had been drawn up, " which will be our shield against all eventualities or unpleasant surprises."

After declaring that the talks had resulted in full identity of views between the three countries, and that Egypt, Syria, and Saudi Arabia based their policies on the principles of the U N. Charter, respect for national sovereignty and human rights, and the resolutions of the Bandung Conference, the communiqué announced that the following decisions and measures had been agreed upon ·

(1) A " comprehensive plan " had been drawn up " to safeguard Arab security and defend it against the dangers of Zionist aggression and foreign domination."

(2) A plan had been drawn up " to co-ordinate Arab defence plans in order to face any act of violence to which Israel might resort." Israel was accused of " pursuing an aggressive policy in defiance of the principles of law and justice," and of " ignoring U.N. resolutions."

(3) Agreement had been reached on measures " necessitated by the security of the Arab nations with regard to the supply of arms to Israel, which permits her to persist in her policy of aggression."

(4) Plans had been drawn up " to counteract attempts exerted through the Baghdad Pact to bring pressure to bear upon Arab countries, thus endangering Arab unity and disuniting the common Arab front at a time when the Arab countries need to be united in effort and policy "

(5) " All possible support " would be extended to Jordan " in the event of any foreign pressure or Zionist aggression." It was added that the three Heads of State had " contacted His Majesty King Hussein to convey to him their utter and complete readiness to assist Jordan and stand by her side " [see below].

(6) The three Heads of State had agreed " to strengthen the ties binding the Arab world " and to " foster co-operation between the Arab countries on the largest scale possible so as to realize purely Arab aims." They had also studied " ways and means of achieving Arab unity "

(7) It had been agreed to co-ordinate Egyptian, Syrian, and Saudi Arabian policies in the political, military, economic, and cultural fields.

(8) The three Heads of State had discussed " the problem arising from the British occupation of the Buraimi Oasis and the Oman Emirate," and had " defined means for the ending of this dispute in a manner which preserves to these areas their Arab character and prevents any breach of their sovereignty."

(9) There had been an " extensive examination of the situation in North Africa " After accusing France of " violating the rights of the North African peoples," the communiqué declared that " France must recognize the rights of those peoples to independence, in accordance with the U N Charter and the principle that all peoples have the right to national self-determination."

Prior to the Cairo " summit " conference, King Hussein of Jordan had attempted to convene a meeting of the Heads of State of the Arab countries, for which purpose the Prime Minister of Jordan (Samir el-Rifai) and the Chief of the Royal Cabinet (Bahjat Talhouni) had visited Damascus, Beirut, Baghdad, and Cairo towards the end of January and during the first fortnight of February for preliminary discussions. It was announced in Cairo on Feb. 11, however, that Egypt had refused to take part in the conference suggested by King Hussein unless certain conditions were agreed beforehand—notably that Egypt should have the right to consult her allies, Syria and Saudi Arabia, before taking part, and that the Baghdad Pact [of which Iraq is a member] should be unconditionally repudiated by all the Arab countries.

As stated in the Cairo communiqué, the Heads of State of Egypt, Syria, and Saudi Arabia contacted King Hussein during their conference. It was announced in Amman on March 9, however, that King Hussein had declined an invitation to take part in the conference which had been personally conveyed to him by the Syrian Prime Minister (Said el-Ghazzi). The Cairo communiqué made no mention of the fact that King Hussein had refused to take part in the " summit " meeting.

The Egyptian Ambassador in Amman delivered to King Hussein on March 17 a personal message from Colonel Nasser and President Kuwatly, the contents of which were not disclosed. The King's reply was conveyed to Colonel Nasser on March 19 by M Talhouni, who flew to Suez to see the Egyptian Prime Minister and King Saud, and to Alexandria to see President Kuwatly. On the same day King Hussein gave an interview to the Jordanian newspaper *Ad-Difaa* in which he emphasized that Jordan would maintain her policy of neutrality, and would adhere neither to the Iraqi-Turkish pact (i e. the Baghdad Pact) nor to the Egyptian-Syrian-Saudi Arabian pacts, but would " always endeavour to strengthen co-operation and union between the Arab countries." The King said that the recent changes in the Arab Legion (see 14737 A) would have " no effect whatsoever " on Anglo-Jordanian relations, and that Jordan would continue to fulfil her obligations to Britain as long as the Anglo-Jordanian treaty remained in existence.

King Hussein's Meetings with King of Iraq and President of Syria.

King Hussein of Jordan and King Faisal of Iraq, accompanied by their Prime Ministers, met on March 14 at an oil-pipeline station on the Iraqi-Jordanian frontier. A communiqué said that the discussions, conducted " in an atmosphere of complete fraternal understanding," had dealt with " matters of interest to both countries in particular and Arab affairs in general."

On April 9 King Hussein arrived in Damascus for a three-day visit during which he had discussions with President Kuwatly. It was announced in Amman and Damascus on April 12 (1) that Jordan and Syria had agreed to co-ordinate their defensive plans and ensure military co-operation to repulse any attack that might be made by Israel ; (2) that they would attempt to bring about the complete co-ordination of Arab military plans and defensive forces ; (3) that both countries were opposed to joining any " foreign pacts " ; and (4) that they had agreed to work for closer economic and cultural co-operation.

Iraqi Protest to Egypt. - General Nuri's Criticisms of Colonel Nasser.

An Iraqi Government spokesman stated on March 15 that a protest would be made to Egypt at the fact that the communiqué issued by the three Heads of State [i.e. Colonel Nasser, President Kuwatly, and King Saud] had purported to speak for all the Arab countries. The spokesman added that the Iraqi view was shared by the Lebanon.

The Prime Minister of Iraq (General Nuri es-Said) gave an interview on March 30 to the Special Correspondent of the *Daily Telegraph* in Baghdad, Mr. Anthony Mann, in which he strongly criticized Colonel Nasser's pretensions to leadership of the Arab world, refuted the Egyptian attacks on the Baghdad Pact, and accused Saudi Arabia, as well as Egypt, of striving to subvert the Iraqi Government.

General Nuri stressed that the Baghdad Pact, far from injuring Arab interests, was in fact a valuable shield for them, since it constituted a " defence against the Communist danger from within and without." After refuting Colonel Nasser's " baseless attacks " against the Baghdad Pact, and reaffirming Iraq's support for the pact, he declared . " The trouble about Nasser is that he wants to shine as the leader of all the Arabs. His opposition to the Baghdad Pact dates only from the moment when he thought it might interfere with his personal ambition. Earlier he actually discussed with me the possibility of Egyptian adherence on a perfectly friendly basis "

The Iraqi Prime Minister continued . " Cairo radio bombards us continuously with its ' Voice of the Arabs ' programme, which is full of threats against me and abuse of Iraq. Fortunately it doesn't have much effect, because people can look out of the window and see that the streets are not running with blood, in spite of what Cairo tells them. At the same time Saudi Arabia does its best to undermine us by pouring in large sums of money to buy the support of individuals. This is ridiculous ; we have no quarrel with the Saudis. The fact is that the Saudis still think that they are conducting a Sherifian tribal feud of a past generation. [The Saudi royal family nourishes a traditional vendetta against the Hashemite dynasty, to which both King Faisal and King Hussein belong] . . In fact, Egyptian and Saudi Arabian policy encourages Communist elements in the Arab world, together with so-called nationalists who in effect follow the Communist line. In Iraq we now have oil revenues which enable us to combat domestic Communism by an enlightened policy of development, construction, education, and improvement of health and living standards "

General Nuri said that the earlier plan for a " Fertile Crescent " union of Iraq, Syria, and Jordan was no longer under serious discussion " Before we can consider that plan," he added, " we must first deal with the question of Israel, and secondly with that of Communism in the Arab world. . . .If the West wants to solve the problem of Colonel Nasser, let it first solve the problem of Israel. The one will follow automatically from the other."

Colonel Nasser on Anglo-Egyptian Relations. - Denunciation of Baghdad Pact.

Colonel Nasser gave an interview on March 24 to the Cairo correspondents of *The Observer* and the *Sunday Times* in which he declared that Egypt was not opposed to British interests in the Middle East, but in which he reiterated Egypt's opposition to the Baghdad Pact and accused Britain of continuing to regard the Middle East as a " sphere of influence."

Colonel Nasser spoke as follows, as quoted by the *Observer* correspondent (Mr. Tom Little) : " I am not opposed to British interests. There are many interests which the British and the Arabs have in common, and we should attempt to further them. For example, both Arabs and British benefit from the oilfields. We should work for our mutual interests. There is no room for hate between us, and without hate Britain will not attempt to destroy my interests and I will not attempt to destroy hers. But I believe that by attempting

to keep this area as a sphere of influence, Britain will lose her real interests—do damage to herself. For that matter we are not opposed to the Northern Tier defence system [i e the Baghdad Pact] as long as it is outside the Arab bloc.

"After the Baghdad Pact was signed we asked Britain not to spring any more surprises, and when informed that Pakistan was going to join we raised no objections. Nor did we oppose Britain's adherence—we did not regard this as our affair. Britain did not keep her promise when it came to Jordan. She did not tell us of the mission of General Templer, and we were forced to fight against all efforts to bring Jordan into the pact If Jordan had joined, Syria would have been cut off, pressure would have been put upon her to join, and eventually Egypt would have been left alone to face Israel. . . . I was to be isolated in this area by British policy and was refused arms while Israel armed herself. I was told to look to the United Nations and the Tripartite Declaration, but frankly I have no faith in them. The whole situation could be turned upside down before either of them took any action. . . ."

Colonel Nasser said that he had asked every British Foreign Secretary he had met, including Mr. Selwyn Lloyd, for a statement of Britain's policy in the Middle East, but had never received a "comprehensive reply" As a result, Egypt herself could only "react to the activities of Britain." He continued :

"This means that the great opportunity for Anglo-Arab relations created by the Anglo-Egyptian agreement in October, 1954, has been thrown away There was a brief honeymoon, and then Britain plunged into the Baghdad Pact plan which she knew in advance was in our opinion a threat to our vital interests It was also against the genuine desires of the Arabs. Any policy in this area must recognize nationalism, its historical background and psychological condition. Arabs are no longer able to accept themselves as a tail to British policy, and that is how they would regard it if we all sat round the table with Mr. Selwyn Lloyd or Sir Anthony Eden Arabs would be convinced the policy came from London, and this is no longer acceptable to them. It must be recalled that the Northern Tier . . . will not have any value if the internal front collapses. It is the internal front which will defend the genuine interests not only of the Arabs but of Britain herself. That is why the Arabs must have their own regional organization and base their policy on the strengthening of the Arab collective security pact.

"This view of the internal situation is at the core of my policy, for it seems to me more important than the danger of world war whereon Britain bases her defence requirements. I may be wrong, but I do not expect world war. Nuclear weapons have changed the entire picture. . . . As I see it, war will from now on be different It will be fought on the internal fronts of all countries In this area it will use nationalism as a weapon, and we—the leaders of the area —must lead the nationalists and build a stable future on them That is what we are doing in Egypt, and as a result we have taken the weapon out of the hands of Communism. Communism is only dangerous when it can exploit the mass opinion of nationalism. There are about 5,000 Communists in Egypt, but we have taken the leadership of nationalism away from them Compare this situation with 1952, when small Communist groups brought about riots and the burning of Cairo People say there is dictatorship in Egypt, but this is not so I want to lead the people, not suppress them. British policy—if successful—would make it impossible to lead the people. They would rise up against us all."

British Reply to Colonel Nasser. - Egyptian Press Attacks on Britain.

The British Foreign Office issued a statement on March 25 in reply to the interview given by Colonel Nasser to the *Observer* and *Sunday Times* correspondents.

After commenting that Colonel Nasser's proclaimed desire for friendly Anglo-Egyptian relations had been jeopardized by recent Egyptian acts and policies, the statement continued : "Unfortunately, in spite of the Sudan agreement, the treaty over the Suez base, the offer of British help for the Aswan Dam, and consistent British efforts to establish better relations, Egypt has not ceased from propaganda directed against Britain and Governments in treaty relations with Britain. Such conduct has extended to areas where Egypt has no direct interests, for example, East Africa. So long as it continues it is difficult to see how there can be hope for improvement in Anglo-Egyptian relations, or for the friendship which Colonel Nasser says that he desires, and which the British Government desires.

"Colonel Nasser referred to the Baghdad Pact. Britain stands firmly by the pact. It began as a treaty between Turkey and Iraq. It is now an alliance between five independent sovereign States on a basis of complete equality. It is concerned not only with military security but also with the development of the economic resources of its members and the raising of their standards of living.

"With regard to further membership of the pact, H.M. Government has no intention of bringing pressure to bear on other States to join. The decision must remain a matter for the free choice of each country. But to prevent States from joining the pact is a denial of the right of independent governments to be the judges of the interests of their peoples. No one has the right to exercise a veto of that nature."

The reference in the Foreign Office's statement to East Africa related to the anti-British propaganda which had been broadcast by Cairo radio during the past 18 months to Kenya and Zanzibar, both in Swahili and Arabic, and which had been the subject of a number of British protests (see 18695 A).

Allegations by the Cairo newspaper *Al Akhbar* that the British authorities had "mistranslated" or "forged" the transcripts of these broadcasts were refuted on March 30 by the British Embassy in Cairo, which recalled that six official protests had been made to the Egyptian Government on the matter. The Embassy pointed out that five of the protests had been based on B B.C. monitoring reports ; that investigations had shown that the translations were accurate ; and that the sixth protest was based on "official reports" which were being further examined.

Al Goumhouria, the official organ of the Egyptian Government, published on April 2 a violently anti-British article by Colonel Anwar Sadat, Minister of State and a leading member of the Egyptian Revolutionary Council Writing of so-called British "atrocities" in the Arab countries, Colonel Sadat said *inter alia* that British forces had "killed and looted" in the Buraimi Oasis, and that General Glubb had "killed the martyrs of Jordan."

Arab-Israeli Border Tension. - New Clashes in Gaza Area. - Egyptian Commando Raids into Israel.

Further incidents on the borders between Israel and her Arab neighbours, particularly on the Egyptian-Israeli border, occurred on various occasions in March and during the first week of April, culminating in a heavy exchange of artillery fire in the Gaza area. Tension was also caused by an increase in ambushes and sabotage carried out by Egyptian *fedayeen* (irregulars) deep inside Israeli territory.

Egypt-Israel Border. The Israeli Government asked the U.N. Truce Supervisory Organization on March 11 to investigate Egyptian military concentrations in the "Gaza strip" and northern Sinai, alleging that the number of Egyptian troops concentrated in these areas was far in excess of Egypt's defence needs At the same time Israel lodged a protest with the Egyptian-Israeli mixed armistice commission, alleging heavy Egyptian troop concentrations just south of the Gaza demilitarized zone An earlier Israeli protest had been lodged with the commission in connexion with an incident on March 6 in which an Israeli and an Egyptian soldier had been killed, and two Egyptians captured, one mile inside Israeli territory The Israeli was killed when his jeep struck a land-mine placed by an Egyptian saboteur, who was himself shot dead while trying to escape across the border

Heavy exchanges of artillery fire, lasting several hours, occurred in the Gaza area on April 5, during which Israeli artillery shelled Gaza, Khan Yunis, and Beir el-Ballah whilst Egyptian artillery shelled Kissufim, Nahal Oz, and other Israeli settlements. Each side gave conflicting accounts of the incidents, the Egyptians alleging that Israeli batteries had begun to shell Gaza and the other townships, and the Israelis alleging that the Egyptians had first bombarded the frontier settlements with heavy mortars, after which retaliatory fire had been opened from the Israeli side The casualties in Gaza—the heaviest since the Palestine War—were officially reported by General Burns to the U.N. as four Egyptian soldiers killed and four wounded and 55 civilians killed (including 15 women and 10 children) and 102 wounded. On the Israeli side the casualties were given as four civilians killed and two soldiers wounded. The Egyptian authorities stated that all the civilians killed in Gaza were Palestine Arabs, and alleged that Israeli shells had fallen in the crowded market-place of the town. Both Egypt and Israel made strong representations to the U.N. Truce Supervisory Organization, each accusing the other of having first opened fire. A cease-fire came into effect at 7 p m. on April 5 at the intervention of General Burns, who had called upon both sides to cease hostilities by midnight. Further artillery exchanges occurred in the Kissufim area for about an hour the next morning, but ended after intervention by the Egyptian-Israeli mixed armistice commission.

Egyptian *fadayeen* units, operating in small groups of a few men each, penetrated deeply into Israeli territory during the night of April 7-8 to carry out sabotage activities in the Askalon, Faluja, and Beersheba areas. Two Israeli women were killed when grenades were thrown into isolated houses, two men were killed and seven injured when vehicles were ambushed, several cars were set on fire and destroyed, and considerable damage was done to water installations. Israeli security forces were deployed over a wide area to round up the *fedayeen* groups "dead or alive," nine Egyptian irregulars being killed in three clashes with Israeli troops on April 9. One of the clashes occurred near the "Gaza strip," the second among orange groves between Askalon and Rehovoth, and the third near Lachish. A captured raider said that the *fedayeen* groups had been trained in Egypt, that they were under the command of the Egyptian military authorities at Gaza, and that they had instructions to kill Israelis, blow up bridges and installations, mine roads, and shoot up passing traffic. He added that they had been instructed to return to Gaza on the completion of their mission, or, if that were too difficult, to make their way to Jordanian territory.

Two more Egyptian *fedayeen* were killed and one captured on the following night, when sabotage attacks were made on the railway running from Beersheba to Tel-Aviv. On April 11, in the deepest penetration yet made into Israeli territory, *fedayeen* ambushed a bus 10 miles from Tel-Aviv, wounding six passengers, and broke into the synagogue of an agricultural college in the vicinity, where they opened fire on 30 youths at prayer. Three of the youths were killed (including a 13-year-old boy) and five wounded, and a teacher was also seriously wounded and died later.

Cairo radio announced on the following day that *fedayeen* groups operating in Israel had returned to their bases after having carried

out 50 attacks "in revenge for the Israeli attacks on civilians at Gaza." It was claimed that a heavy toll of life had been taken of the "enemy," and much material damage done, for the loss of 10 *fedayeen* killed, out of a total of 300.

An air combat between four Egyptian and two Israeli planes occurred on April 12. The Israeli authorities stated that the Egyptian planes had been intercepted over Israeli territory south of Beersheba, that one of them (a *Vampire* jet) had been shot down in flames, the pilot being wounded, and that the others had flown back across the frontier, the two Israeli machines returning safely to base. The Egyptian version of the incident said that the clash had taken place over the border, that an Israeli machine of the French *Ouragan* type had been shot down, and that an Egyptian plane had made a "forced landing."

The Israeli Government made two strong protests to the U.N. Security Council on April 10-11 drawing attention to the numerous Egyptian violations of Israeli territory during the preceding week.

Israel-Syria Border. Two Israeli policemen were killed on March 4, and two others reported missing, when Syrian troops fired on police patrol vessels near the north-eastern shore of Lake Tiberias (the Sea of Galilee). The Syrian authorities claimed that they had repulsed an attempted Israeli landing "for espionage and subversive action," whilst the Israeli authorities said that the Syrians had deliberately opened fire after one of the vessels had gone aground and the other had gone to its assistance. After intervention by U.N. observers, the Syrians returned the captured vessel to the Israeli authorities, together with the bodies of the two men killed, but without the two wounded men.

A further incident occurred on March 5 when an aircraft of the Israeli Air Force was forced down on the Israeli side of the border by Syrian machine-gun fire, the pilot being wounded. A strong Israeli protest was made to the U.N. at these incidents, which were described as "wanton acts of aggression" by the Syrian armed forces.

Israel-Jordan Border. Armed Jordanians penetrated into Israeli territory on March 10-12, killing an Israeli policeman and wounding two others at the village of Karkur (which lies half in Israel and half in Jordan), and killing a settler four miles inside Israeli territory; one Jordanian was killed, the others fleeing across the frontier.

Israeli-Syrian Exchange of Prisoners. An exchange of prisoners was carried out on March 30, under U.N. supervision, at the Bnot Yaakov (Daughters of Jacob) Bridge across the Jordan River, on the Israeli-Syrian border. The Syrian group comprised 35 soldiers and six civilians, most of whom had been captured on Dec. 12, 1955, when Israeli Army units crossed into Syrian territory to destroy gun positions threatening Israeli fishermen on the Sea of Galilee, whilst the Israeli group comprised four soldiers who had been captured by the Syrians on Dec. 8, 1954, and one civilian. (A fifth Israeli soldier captured at the time had committed suicide in his prison cell.) Negotiations for the exchange of prisoners had been in progress for over a year.

Egyptian and Israeli Pledges to comply with Armistice Agreement.

It was announced on April 12 by Mr. Cabot Lodge (president of the Security Council during April) that both Colonel Nasser and Mr. Ben-Gurion had assured Dr. Hammarskjold that their Governments would unconditionally comply with the provisions of the Palestine armistice agreement prohibiting either side from resorting to warlike actions, whilst at the same time reserving the right of their Governments to act in self-defence.

Mr. Lodge circulated to the Security Council the texts of six communications which had been exchanged during the previous four days between Dr. Hammarskjold, on the one hand, and Colonel Nasser and Mr. Ben-Gurion, on the other, regarding the observance by Egypt and Israel of that section of the armistice agreement prohibiting "any warlike or hostile act against the military or para-military forces of the other party, or against civilians in territory under the control of that party." In his letters to the Egyptian and Israeli Prime Ministers (dated April 4) Dr. Hammarskjold expressed his deep concern at the recent deterioration of the situation in the Gaza area, drew attention to "the vital need of breaking the present chain of action and reaction," and asked both sides to comply strictly with the relevant provisions of the armistice agreement. The above-mentioned assurances were given by Colonel Nasser and Mr. Ben-Gurion in reply to these letters.

Following the Egyptian *fedayeen* raids into Israel, Mr. Ben-Gurion sent another letter to Dr. Hammarskjold on April 12 pointing out that "a series of murderous attacks perpetrated by Egyptian gangs deep inside our territory" had taken place since Colonel Nasser's earlier assurances to observe the armistice agreement. He asked what assurance Colonel Nasser had given "to put an end to the activities of sabotage and murder gangs and to refrain from all other acts of aggression and violence."

Soviet Training of Egyptian Troops in Poland.

Reports that a number of Egyptian officers and n.c.o.s (variously reported at between 200 and 300) were being trained at Soviet bases in Poland were confirmed on March 23 by the British Foreign Office, which also stated that Czechoslovak military personnel were training military forces in Egypt. The U.S. State Department spokesman also said that reports had been received that Soviet instructors were training Egyptian troops in Poland. It was stated in *The Times* (March 24) that the training was taking place in the Hel peninsula (near Gdynia) and that Polish ports had been used for some considerable time for the shipment of Czechoslovak arms to Egypt.

Israeli Defence Measures. - Mr. Ben-Gurion's Statement.

Mr. David Ben-Gurion, the Israeli Prime Minister, emphasized in the *Knesset* on March 6 that Israel would in no circumstances launch a "preventive" war, but added that she would continue to build up her defences and would give a good account of herself if attacked. He believed that war could be prevented, but said that if it broke out the "moral responsibility" would rest upon the Soviet Union, which had supplied arms to Egypt with full knowledge of the purpose for which Egypt wanted them, whilst "judicial responsibility" would rest upon the United States, which had so far refused arms to Israel.

Mr. Ben-Gurion's statement was made at the end of a debate in which the Nationalist party (*Heruth*) had moved a motion of no-confidence in the Government and had attacked it for remaining quiescent while Egypt was rearming—a policy which, it was alleged, had brought Israel "to the brink of the abyss" and confronted her with destruction. The no-confidence motion was defeated by 66 votes to 13, with the General Zionist (Conservative), Agudath Israel (Orthodox) and Communist deputies abstaining.

In a speech on Feb. 21 to the *Histadruth* (the General Confederation of Labour) Mr. Ben-Gurion had called for 150,000 volunteers to dig air-raid shelters, erect fortifications, and reinforce the defences of the frontier settlements in the border areas. The volunteers were asked to give six days' work for these purposes.

U.S. Refusal of Arms to Israel. - Resumption of Canadian Arms Shipments to Israel.

Although Israel had made a number of requests to the U.S.A. for the supply of arms to balance those received by Egypt from Communist sources, the Press Secretary at the White House (Mr. Hagerty) indicated on April 2 that President Eisenhower had decided to take no action on these requests for the time being. Mr. Hagerty pointed out that this decision represented no change in the policy which the U.S. Government had maintained since Israel made her original request for American arms in November last. The *New York Times* and other U.S. newspapers commented that the Administration was apparently reluctant to send appreciable quantities of arms to Israel for fear of precipitating an arms race in the Middle East.

The Prime Minister of Canada (Mr. St. Laurent) informed the Federal House of Commons on March 16 that the Canadian Government had approved the shipment to Israel of 1,754 rounds of 25-pdr. ammunition, valued at approximately $30,600; spare parts for *Sherman* tanks, valued at $136,300; and certain electronic equipment.

Mr. St. Laurent explained that the Canadian Cabinet had approved the resumption of arms shipments to Israel because, although basic tensions remained, it was felt that there had been some easing of the situation since the dismissal of General Glubb and the recent Israeli-Syrian clashes on Lake Tiberias. Moreover, talks were in progress as to how the U.N. could intervene effectively to bring about a solution to the Middle East problem.

The French Foreign Ministry announced on March 6 that Israel had ordered "certain anti-tank weapons" from private French arms manufacturers. No details were given, but reports in the French press said that the weapons were guided missiles claimed to be capable of knocking out the heaviest tanks.

A. SOUTHERN RHODESIA. — Territorial Capital to remain in Salisbury.

The Southern Rhodesian Parliament decided on Dec. 2, 1955, that the territorial capital should remain in Salisbury. The voting on the resolution (which was moved by the Prime Minister, Mr. Garfield Todd) was 17 to 10, an amendment by Mr. J. M. Macdonald (United Rhodesia Party) that the question of siting the capital be decided by a referendum being defeated by an identical majority. The decision constituted a reversal of an earlier one (Sept. 30, 1953) laying down that if the capital of the Federation of Rhodesia and Nyasaland were to be set up at Salisbury, the territorial capital should not be sited within 100 miles of that city.—(Federal Information Dept., Salisbury) **(Prev. rep. Federal Capital, 14333 B; Territorial Capital, 13333 A.)**

A. UNITED KINGDOM. — Revenue and Expenditure Returns, 1955-56. - The Floating Debt.

Exchequer returns for the financial year 1955-56, published on April 1, showed an Ordinary Budget surplus (after charging Sinking Funds of £36,489,125) of £397,102,092; this compared with a surplus of £148,275,000 estimated by Mr. Butler (the former Chancellor of the Exchequer) in his Budget speech. Net capital expenditure "below the line" (i.e., excluded from the Ordinary Budget) amounted to £537,979,000, as against Mr. Butler's estimate of £584,000,000, so that there was an "overall" deficit of £140,876,908 instead of the estimated £435,725,000, or £515,000,000 after taking into account Supplementary Estimates.

The following table gives the actual returns for the year, the 1955-56 Budget estimates, and the returns for the year 1954-55.

	Revenue £	Expenditure £
1955-56 Actual*	4,893,142,564	4,496,040,472†
Budget Estimate ..	4,710,150,000	4,561,875,000‡
1954-55 Actual§	4,737,892,404	4,304,725,810‖

* Excluding self-balancing revenue and expenditure amounting to £267,265,000, i.e., £264,900,000 for the Post Office and £2,365,000 for income-tax deducted from post-war refunds of excess profits tax. † Including Sinking Funds of £36,489,125. ‡ This was subsequently increased to £4,656,433,000 by Supplementary Estimates totalling £94,558,000, excluding £5,750,000 for additional Post Office expenditure which was transferred to self-balancing expenditure § Excluding self-balancing revenue and expenditure amounting to £248,786,000, i.e, £243,600,000 for the Post Office and £5,186,000 for income-tax deducted from post-war refunds of excess profits tax ‖ Including Sinking Funds of £36,067,202.

Details of the various revenue items were as follows:

	Year ending March 31, 1956 £	Year ending March 31, 1955 £	Increase (+) or Decrease (−) £
Income-tax . ..	1,942,902,000	1,892,965,000	+ 49,937,000
Surtax	138,600,000	134,700,000	+ 3,900,000
Death Duties ..	175,700,000	187,900,000	− 12,200,000
Stamps ..	70,600,000	75,100,000	− 4,500,000
Profits Tax and Excess Profits Tax ..	192,500,000	172,800,000	+ 19,700,000
Excess Profits Levy	18,450,000	76,500,000	− 58,050,000
Other Inland Revenue Duties	770,000	1,280,000	− 510,000
Customs ..	1,148,598,000	1,100,049,000	+ 48,549,000
Excise .	864,511,000	771,637,000	+ 92,874,000
Motor Vehicle Duties	86,987,000	78,980,000	+ 8,007,000
Post Office (net) ..	—	5,100,000	− 5,100,000
Broadcast Receiving Licences .	25,800,000	22,300,000	+ 3,500,000
Receipts from Sundry Loans	29,857,743	23,023,559	+ 6,834,184
Miscellaneous	197,866,821	195,557,845	+ 2,308,976
Total Ord Revenue.	4,893,142,564	4,737,892,404	+155,250,160

Of the Inland Revenue items exceeding the Budget estimates, Income-tax yielded £65,500,000 more, Surtax £2,600,000 more, and Profits Tax and Excess Profits Tax £12,500,000 more. Death Duties brought £9,300,000 less than estimated, Stamps £3,400,000 less, Excess Profits Levy £6,550,000 less, and other Revenue Duties £230,000 less Customs receipts were £16,900,000 higher than estimated, and Excise over £53,000,000, the two items together thus yielding about £70,000,000 more than budgeted last year. Of the other items, Motor Vehicle Duties contributed nearly £7,000,000 more than estimated, Sundry Loan receipts nearly £5,900,000, and Miscellaneous Revenue £22,900,000, whilst Broadcasting Licences were £800,000 above the estimate.

The following table shows Ordinary Expenditure:

	Year ending March 31, 1956 £	Year ending March 31, 1955 £
Interest and Management of National Debt . . .	637,884,353	569,722,542
Sinking Funds . .	36,489,125	36,067,202
Payments to Northern Ireland Exchequer	59,152,386	50,190,807
Other Consolidated Fund Services ..	10,172,608	8,812,259
Total	743,698,472	664,792,810
Total Supply Services (excluding Self-Balancing)	3,752,342,000	3,639,933,000
Total Ordinary Expenditure .	4,496,040,472	4,304,725,810

Total Ordinary Expenditure (excluding self-balancing items) was £65,834,528 less than the original Budget estimate of £4,561,875,000, and £160,392,528 less than the revised estimate (including Supplementary Estimates and Excess Votes) of £4,656,433,000 The shortfall in expenditure was due to less spending on the Supply Services. Defence expenditure, excluding American Aid receipts, was only £1,427,300,000, against an estimated £1,546,600,000, or over £119,000,000 less; the net Defence expenditure after appropriation of U.S. Aid (£22,400,000) was £1,404,900,000, against an estimated £1,503,600,000, or nearly £99,000,000 less. On Civil Votes actual expenditure also kept below the estimate, viz, £2,285,958,000, against an estimated £2,389,379,000, or nearly £103,421,000 less

Net expenditure "below the line" (i.e. capital expenditure) of £537,979,000 fell below the estimate of £584,000,000 by about £46,000,000. This was due to both higher receipts and lower payments. Of over £27,000,000 more received, £25,000,000 came from the proceeds of the denationalization of the iron and steel industry. The shortfall in payments was about £18,500,000 net. New Loans to the National Coal Board (at £86,050,000) were about £9,000,000 less; compensation payments under the Town and Country Planning Acts (at £49,379,000) nearly £8,000,000 less; Armed Forces housing (at £1,350,000) over £6,600,000 less; loans for New Towns development (at £31,820,000) over £4,000,000 less; and new export guaranteees (at £2,030,000) nearly £4,000,000 less. Larger outgoings than estimated were loans to Local Authorities at £330,700,000 (£10,700,000 more); War Damage payments £27,126,000 (over £3,000,000 more); and loans to the Colonial Development Corporation £8,500,000 (£1,500,000 more). Repayments of Post-war Credits amounted to £17,195,000; refunds of Excess Profits tax to £2,892,000; loans to the Northern Ireland Exchequer (excluding a small repayment) to £4,800,000; loans to the Independent Television Authority to £500,000; payments for the Development of Inventions to only £75,000; and loans to the Potato Marketing Board to £350,000. Scottish Special Housing took £5,280,000; Post Office capital expenditure was £70,200,000; and interest outside the Budget £119,214,000. The principal receipts in addition to the above-mentioned ones from iron and steel denationalization were loan repayments of £33,710,000 by Local Authorities; £14,872,000 by the Raw Cotton Commission; £8,089,000 by the National Coal Board; £6,400,000 under the Town and Country Planning Acts; £1,688,000 under Export Guarantees, £1,188,000 out of Post Office votes; and £1,078,000 under the Anglo-Turkish armaments credit. Interest receipts outside the Budget amounted to £119,214,000 —the same as payments. Amongst the smaller receipts were £200,000 from repayments by the National Film Corporation; £250,000 from the Colonial Development Corporation; and £96,000 from the Overseas Food Corporation.

Details of the Floating Debt are shown below.

	March 31, 1956 £	March 31, 1955 £
Ways and Means Advances Outstanding:		
Advances by Bank of England	—	—
Advances by Public Departments	294,600,000	315,210,000
Treasury Bills Outstanding	4,788,020,000*	4,931,390,000
Total Floating Debt Outstanding	5,082,620,000	5,246,600,000

* Includes £83,000, the proceeds of which were not carried to the Exchequer within the period of the Account.

The Floating Debt thus showed a net decrease over the year of £163,980,000.—(Treasury Press Office, London - Times - Financial Times) **(Prev. rep. Revenue and Expenditure 1954-55, 14134 A; 1955-56 Budget, 14145 A; Supplementary Budget, 14500 A; National Debt, 14609 C.)**

B. YUGOSLAVIA. — U.S. Aid Agreements.

Two agreements for the supply of $95,000,000 worth of U.S. agricultural products to Yugoslavia were signed in Belgrade on Jan. 19. The first (concluded under the U.S. Agricultural Surplus Act) provided that Yugoslavia would receive 375,000 tons of wheat, 40,000 tons of lard, and 10,600 tons of cotton, whilst the second (concluded under the U.S. foreign aid programme) made available to Yugoslavia a further 175,000 tons of wheat, 11,400 tons of cotton, and $1,500,000 worth of tallow. The greater part of these deliveries will be made as a gift, whilst the counterpart funds received from the sale of the remainder will be used to meet U.S. commitments in Yugoslavia or be lent to Yugoslavia for economic development programmes.

The Belgrade newspaper *Politika* stated that the counterpart funds from the sale of previous food shipments to Yugoslavia were being used for the construction of a motor-road between Ljubljana and Zagreb, and for the building of a number of blocks of flats in Belgrade.—(Tanjug Agency, Belgrade - Le Monde, Paris) **(Prev. rep. 14742 A; 14207 B; 14162 A.)**

C. BURMA - RUMANIA. — Diplomatic Relations.

It was announced in March that the Governments of Burma and Rumania had decided to establish diplomatic relations. (Agerpres, Bucharest) **(Prev. rep. 14585 A; 14411 B.)**

A. NIGERIA. — The Royal Visit.

Her Majesty the Queen and the Duke of Edinburgh paid a three-weeks' visit to Nigeria from Jan. 28 to Feb. 15. They were enthusiastically welcomed in all parts of the Colony, many people travelling hundreds of miles to greet them.

Her Majesty and the Duke left London Airport on Jan. 27 on the B.O.A.C. Argonaut *Atalanta* and arrived on the following morning at Lagos Airport, where they were welcomed by the Governor-General of Nigeria (Sir James Robertson), Nigerian Ministers, and the British naval, military and air commanders in West Africa. The 13-mile drive to Lagos, lined by hundreds of thousands of cheering Nigerians, was broken at Igbobi, where the Queen received a loyal address from the president of the Lagos Town Council, Oba Adeniji Adele II. A State dinner was given to her Majesty and the Duke at Government House the same evening.

On the following day (a Sunday) the Queen and the Duke attended the Mohaung Day service in Lagos Cathedral, which is held annually to commemorate the Battle of Mohaung (Burma), in which two West African divisions, drawn entirely from the Royal West African Frontier Force, defeated the Japanese on Jan. 24, 1945. The Queen was greeted at the Cathedral by the Archbishop of West Africa, the Most Rev J. L. C. Horstead, the address being given by the African Bishop of Lagos, the Rt Rev. A. W. Howells. On Jan 30 her Majesty presented new colours to the 2nd Battalion, Nigeria Regiment, visited an orthopaedic hospital near Lagos, and attended a garden party given by Sir James and Lady Robertson at Government House.

The Queen, accompanied by the Duke of Edinburgh, visited the Federal House of Representatives in Lagos on Jan. 31 to receive a loyal address from the Speaker (Sir Frederic Metcalfe). Speeches in support were made by the Minister of Transport (Mr Balewa), the Minister of Communications (Mr. Mbadiwe), and the Leader of the Opposition (Chief Akintola), all of whom spoke with gratitude of the part played by Britain in promoting self-government in Nigeria, and stressed the value of the British connexion and the importance of Nigerian membership of the Commonwealth. Later in the day her Majesty inaugurated the new Federal law courts in Lagos, where she was received by the Chief Justice of the Federation (Sir Stafford Foster-Sutton) and the Chief Justices of the four High Courts (for Lagos and the Southern Cameroons and for the Northern, Eastern, and Western Regions). The Federal Chief Justice pointed out in his address that the occasion inaugurated a new judicial system under which Nigeria had its own Court of Appeal. [Formerly appeals from the Nigerian courts were heard by the West African Court of Appeal, which served all British West African territories.]

On Feb. 1 the Queen and the Duke flew 350 miles from Lagos to Kaduna, the capital of the Northern Region, where they were greeted by the Governor (Sir Bryan Sharwood-Smith) and by many local notabilities, including the Sultan of Sokoto (the Regional Premier) and the Emir of Kano. On the following day they attended a Royal Durbar at Kaduna—the first ever held in Nigeria—at which 6,000 warriors from all parts of the Region, led by their chiefs and emirs, paid homage in a colourful ceremony attended by 50,000 spectators. The contingents taking part in the Durbar came from all 12 provinces of the Northern Region (which is greater in area than France), some of them having begun their journey in December by canoe and road. Before leaving Kaduna on Feb. 3, the Queen visited the Northern Legislature to receive a loyal address from the Sultan of Sokoto, and also visited the West African Institute for Trypanosomiasis Research.

After a week-end rest at Jos (100 miles east of Kaduna), where the Duke of Edinburgh visited the tin mines in the area, her Majesty and the Duke flew on Feb. 6 to Enugu, the capital of the Eastern Region, where they were welcomed by the Governor (Sir Clement Pleass) and the Regional Premier, Dr. Azikiwe. On the following day the Queen visited the Eastern Region Legislature, where she received a loyal address from Dr. Azikiwe, and later visited a welfare clinic run by the Nigerian Coal Corporation and a housing estate for African miners and their families. Before leaving Enugu, the Queen and the Duke drove 30 miles to visit a leper settlement on the Oji River.

Her Majesty and the Duke of Edinburgh flew on Feb. 8 to the historic port of Calabar, where they were welcomed by local notabilities headed by the 85-year-old Obang of Calabar, Ededem Arhibong V. While at Calabar the Queen laid a wreath on the grave of Mary Slessor, who died in 1915 after having worked for 35 years as a missionary of the Presbyterian Church. [Miss Slessor, a mill-girl from Dundee, spread the gospel to many parts of the hinterland and did outstanding work in combating poverty, ignorance, and disease.] The Queen and the Duke also paid brief visits on Feb. 8 to Port Harcourt, where work is to begin in June on a £750,000 harbour extension scheme, and Benin City, one of the oldest towns in Nigeria.

On Feb. 10 the Queen and the Duke returned to Lagos, where her Majesty opened the new Apapa wharf extension (costing £5,000,000 and providing deep-water berths for up to nine ships) and a new power-station. Later in the day her Majesty received a loyal address at Government House from members of the Executive Council of the Southern Cameroons.

On Feb. 12 the Queen and the Duke travelled by train from Lagos to Ibadan, the largest city in Nigeria and the capital of the Western Region, where they were welcomed by the Governor (Sir John Rankine) and the Regional Premier, Chief Awolowo. During their stay in the city (Feb. 12-14) her Majesty and the Duke paid visits to the University College of Ibadan, a teaching hospital, and the Ibadan branch of the Nigerian College of Arts, Science, and Technology, to the Regional Parliament, where her Majesty opened the new Parliament buildings and received a loyal address from Chief Awolowo, and to Moor Plantation, a model farm established 57 years ago, and today the principal agricultural research and experimental station in Nigeria.

Among other functions in Ibadan, the Queen held an investiture at which she conferred the accolade on the Oni of Ife and the Alake of Abeokuta; received the Governor of the neighbouring French colony of Dahomey, M. Marc Biros, who had visited Ibadan to convey the respects of the French Government; and addressed an open-air rally of 17,000 children and teachers, 600 ex-servicemen, and 3,000 representatives of voluntary organizations in the Western Region. Before leaving for Lagos, her Majesty visited Ijebu-Ode and Shagamu to receive greetings from a number of leading Yoruba chiefs, including the Awujale of Ijebuland (Oba Daniel Adesanya Gbelegbuwa II) and the Akaarigbo of Ijebu-Remo (Oba Moses Sowemimo Awolesi).

After returning to Lagos, her Majesty and the Duke ended their Nigerian tour with a visit on Feb. 15 to the ancient city of Kano, in the Northern Region, famous for its walls (11 miles in circumference) and for many centuries the capital of an important Moslem emirate. They were welcomed at the Palace by the Emir of Kano (Alhaki Muhammadu Sanusi) and many Hausa notables, including senior members of the Emir's Council.

A Nigerian orderly—Sergeant-Major Momo Zinder, of the Governor-General's staff—was in attendance on her Majesty throughout the tour as bearer of the Royal Standard. It was explained in Lagos before the Queen's arrival that although the carrying of the Royal Standard by a bearer in close attendance on her Majesty had not been a feature of other overseas visits, it was being introduced in Nigeria with the Queen's approval "to add an appropriate touch of pageantry to the Nigerian ceremonies and to ensure that her Majesty is quickly identified by those whose opportunities for seeing their Queen may unhappily be brief."

Before leaving Lagos for Kano and London, her Majesty broadcast the following farewell message to the people of Nigeria:

"For nearly three weeks my husband and I have travelled in your country and seen something of the immense variety of scenery, people, and customs which is Nigeria. Everywhere we have received a most warm-hearted welcome which has given us very great pleasure. We shall always remember with thanks your kindness and your hospitality.

"The peoples of Nigeria have welcomed me with one voice, and I hope that this may help you to feel a greater unity among yourselves. . . No-one visiting Nigeria in these stirring times can fail to notice the enthusiastic activity of all sections of the community. This universal demand for development is most impressive. Every period of great change anywhere in the world has always been attended by difficulties, sometimes by turbulence, but I hope that the partnership of Nigerians and British will ensure many years of smooth progress. Material progress by itself is not enough. It is just as important that the conduct of our everyday life—in business, industry, the public service, and in government—should come even closer to the ideals of honesty, integrity, and justice. Unless we maintain such standards, the benefits of science and technology cannot be enjoyed.

"I want to say a special word to the members of my Oversea Civil Service who are serving in Nigeria. I know that in these changing times some of you are facing special problems and anxieties. But you still have a vital part to play in the development of this great country. I have greatly admired the work you are doing and the courage and unselfish devotion you bring to it. In serving my peoples in Nigeria you are truly serving me, and I shall take a close interest in your future welfare.

"On the eve of our departure I would like to leave to all Nigerians a reminder of this visit, which has been a great experience to us and I believe also to you. I have therefore decided that from now on the Nigeria Regiment is to be called the Queen's Own Nigeria Regiment. In this way I can also pay my tribute to the gallantry and loyalty of the people of the whole Federation who have served the Crown and their country so faithfully in peace and war.

"I pray that for you and your children the future may hold peace, progress, and prosperity."

Her Majesty and the Duke of Edinburgh returned to London on Feb. 17. Addresses of welcome on the Queen's return were adopted by both Houses of Parliament on Feb. 20-21, *nemine contradicente*, whilst on Feb. 22 the Queen spoke of her Nigerian tour during a visit to Guildhall, at which she was welcomed by the Lord Mayor of London, Alderman Cuthbert Ackroyd.

A British parliamentary delegation headed by Mr. Walter Elliot (Conservative) visited Lagos on Feb. 26 to present a mace to the Nigerian Legislature as a gift from the British Parliament.—(Times - Daily Telegraph - Manchester Guardian)

B. UNITED STATES. — Rise in Bank Rate.

The Federal Reserve Banks in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, St. Louis, Kansas City, and Dallas raised their rediscount rate on April 13 from 2½ to 2¾ per cent, and those in Minneapolis and San Francisco from 2½ to 3 per cent. Chicago made no change in its 2½ per cent rate.—(New York Times) **(Prev. rep. 14588 F.)**

A. SOVIET UNION - UNITED STATES. — Further Letter from Marshal Bulganin to President Eisenhower.

Following the exchange of correspondence between Marshal Bulganin and President Eisenhower in January (see 14665 A), the Soviet Prime Minister sent a second letter to the U.S. President on Feb. 1. The text was officially released in Moscow and Washington and is reproduced below.

" Your message of Jan. 27, written in such a friendly tone, could not fail to awaken in me memories of those sincere and frank talks which you and I and our colleagues had in Geneva six months ago. We may hold different positions, we may defend different opinions, but if there is good will and a striving to understand one another, these discussions help to strengthen confidence and establish friendly relations.

I am glad that you agree that the present international situation demands of all States, and first and foremost of the great Powers, the adoption of measures capable of lessening international tension and strengthening confidence and co-operation among States. I am glad that you also agree that the historic friendship between our peoples gives us a basis on which better political relations could be established between our countries.

It was precisely because such a basis exists that my colleagues and I decided to approach you, soon after our peoples had welcomed the New Year in, with the proposal to consider jointly a concrete step that would substantially improve the relations between our countries. At the same time we took into consideration the fact that the fate of world peace depends to a great extent on our relations. We believed, and still believe, that the time has come to conclude a treaty of friendship and co-operation between our countries. . . . We can only regret that our proposal did not meet with a more favourable reception on your part.

As far as I am able to judge, you are disturbed by the fact that the draft treaty we proposed reproduces to a certain extent some provisions of the U.N. Charter which both our countries have signed. But it seems to us that this fact, far from hindering, on the contrary favours the conclusion of the treaty. The existence of the Charter by no means precludes the possibility of bilateral agreements, based on its principles, being concluded between members of the Organization. The Charter explicitly states that the members of the United Nations should ' establish conditions under which justice and respect for the obligations arising from treaties and other sources of international law can be maintained.'

After the United Nations was formed, the U.S A., like many other States, became a party to a large number of both bilateral and multilateral treaties and agreements Moreover, there has never been, nor can there be, any doubt as to the indisputable right of sovereign States, in the interest of peace, to conclude any treaties and agreements that regulate their relations with other countries

The fact must also be borne in mind that the Charter itself cannot be sufficiently effective if the two greatest Powers in the world—the U.S S.R and the U S A —do not harmonize their relations. It can become more effective if our two countries co-operate in achieving the aims of the United Nations. I think you will agree with this

You appear to have certain doubts because we propose the conclusion of a treaty ' on a bilateral basis', whereas the U.N. Charter is 'a treaty between many States.' But you will agree that the conclusion of a treaty of friendship and co-operation between the two strongest Powers in the world would contribute enormously to a healthier international situation. We are willing to conclude similar treaties with other States as well, including the United Kingdom and France. Finally, the proposal for a treaty between the two groups of States—the parties to NATO and the parties to the Warsaw Treaty—still holds good.

In your message you rightly observe that it is deeds, and not words, that count in the establishment of world peace. A treaty of friendship and co-operation between the U.S S.R. and the U.S.A would be a major concrete step in this respect, since our two countries, in assuming the highly important commitments stipulated by the draft treaty, would strengthen confidence and bring tranquillity to the entire international situation. This would mean that our countries would not be confining themselves to verbal assurances of a wish to be friends, but would be beginning the practical implementation of the commitments assumed.

Incidentally, it may be noted that since the Geneva Conference several important steps conducive to the lessening of international tension have already been taken in this direction. In view of this, it is difficult to agree with the allegation that the post-Geneva period has not justified the hopes of the peoples The Soviet Government, for its part, has already carried out a number of measures with the aim of easing tension and strengthening confidence among States. I recall in this connexion the cut of 640,000 men in the armed forces of the Soviet Union in 1955; the reduction in allocations for the U.S.S.R.'s military needs for 1956 by 9,600 million roubles, as compared with 1955; the Soviet Union's renunciation of its last military base on the territory of other States, namely, the Porkkala base in Finland; and the Soviet Union's initiative in the conclusion of the Austrian State Treaty, which led to the withdrawal of all foreign troops from Austrian territory and to Austria's acceptance of a policy of permanent neutrality. . . .

It is presumed in the Soviet Union that other States should also reaffirm their declarations by definite deeds. But if we are to be frank, Mr. President, we must say that certain great Powers, far from having taken similar action, are, on the contrary, making no small efforts to worsen international tension. In spite of the positive results of our Geneva meeting, the military allocations of certain Western Powers, including the U.S.A , are not decreasing but, on the contrary, increasing. There is also an increase in the number of American military bases on foreign territories; moreover, these bases are situated primarily in areas adjacent to the frontiers of the Soviet Union. You must agree that this cannot but give rise to quite understandable fears among the Soviet people with regard to the intentions of the United States.

Nor can one fail to call attention to the fact that certain leading personages in the U S A. are continuing—in spite of the mutual assurances of peace given by you, Mr. President, and by myself at the Geneva Conference—to make statements which can in no way be said to conform with the ' spirit of Geneva.' It is common knowledge, for instance, that quite recently a statement was made in the U.S A. favouring a policy that would keep the country ' on the brink of war ' [A reference to Mr Dulles's interview with *Life* magazine—see 14662 A.] Nor can one fail to call attention to the bellicose utterances of certain military leaders of NATO who openly advocate a continuation of the arms race and the stockpiling of atomic weapons in the NATO armies, and who have no scruples about threatening to use those weapons

In offering to conclude a treaty of friendship and co-operation between our countries, we proceed from the premise that such a treaty, and the improvement of relations between our countries, would make it easier to accomplish substantial reductions of armaments and armed forces. We could, for instance, seek to reduce the armed forces of the five Powers [i e. the U.S.A , U.S.S.R., Britain, France, and China] to the levels at which both the United States and the Soviet Union at one time agreed. This would also contribute towards reaching agreement on the question of atomic weapons, the outlawing of which is being demanded by the peoples The solution of the question of establishing appropriate international control would also be facilitated.

In your message you again called attention to your ' open skies ' proposal which visualizes reciprocal flights over the territories of the U.S.S.R. and the U S.A., by American and Soviet aircraft respectively, for the purpose of aerial photography, and also for the exchange of military information. My colleagues and I have already had the opportunity of expressing our attitude towards this proposal. We think that in the present international situation, and particularly under conditions of an unrestricted armaments race, such flights would not only fail to rid the peoples of the fear of another war but, on the contrary, would increase this fear as well as mutual suspicion.

Judge for yourself, Mr. President: What would the military leaders of your country do if they were told that aerial photography had shown a neighbour to have more airfields? They would certainly order an immediate increase in the number of their own. . . . Naturally our military leaders would also do the same in a similar case. It is not difficult to see that the result would be a further intensification of the arms race.

It would be quite a different matter if we reached agreement on reducing armaments and armed forces. Then, the exercise of the appropriate control, the methods of which could be agreed upon, would be justified and necessary. Nor can one fail to note that a commitment undertaken by the U S.S R and the U.S A to settle all controversial issues between them exclusively by peaceful means . . . would have a really tranquillizing effect on the international situation and would create more favourable conditions for reaching agreement on other outstanding international problems. Thus, the conclusion of a treaty of friendship and co-operation between the U.S A. and the Soviet Union would mean that we could really do something, as you say in your message, ' to convince the world that we have no aggressive designs against each other.'

As far as the concrete international problems you deal with in your message are concerned, I am still convinced that, along with the disarmament problem, the problem of maintaining European security is the most important. At the Geneva Foreign Ministers' Conference the Government of the U.S.S.R put forward a number of concrete proposals for the solution of this problem. The Soviet Government maintains, as hitherto, that the task of effectively maintaining security in Europe can best be accomplished by establishing a single, all-European system of collective security.

At the same time we tried to meet the wishes of the three Western Powers half-way on many major issues, and also took into account the concrete ideas the representatives of the Western Powers had put forward at our meeting in Geneva. The Soviet proposals for the maintenance of European security also take fully into consideration the important role which the U.S.A plays in European affairs.

However, the Governments of the three Powers did not consent to our proposals, and offered instead a plan leading to the re-establishment of militarism throughout the whole of Germany and, moreover, envisaging the integration of a united Germany in a military bloc established by the Western Powers. Such a plan cannot present a basis for solving the problem of guaranteeing genuine security in Europe and for settling the German question.

Insofar as two German States with differing social and economic systems have appeared and become consolidated in post-war Europe, the question of establishing a united Germany as a peace-loving and democratic State cannot, it stands to reason, be solved without appropriate agreement between the German Democratic Republic and the German Federal Republic. At the same time, I am sure that the normalization of Soviet-American relations, and particularly a step such as the conclusion of a treaty of friendship and co-operation between the U.S.S.R. and the U.S.A., would be of great positive significance in creating the necessary pre-requisites for the solution of the German question.

With regard to your remark concerning the right of peoples to choose the form of government under which they wish to live, it must be said that the Soviet Union has always abided, and continues to abide, by the principle that the internal system in any State is the domestic concern of its own people We expect that other Powers will also be guided by the same principle in their international relations.

In your letter you also touch upon the important problem of developing East-West contacts. We fully agree with you on the importance of such contacts It was for this very reason that the Soviet Union submitted to the Foreign Ministers' Conference proposals aimed at eliminating the barriers obstructing the development of normal trade and economic relations, and of extending contacts in the fields of culture, science, the arts, sport, tourist travel, etc. We all noted with satisfaction that definite agreement was taking shape on this matter at the conference. However, at the last moment the delegations of the U S.A. and other Western Powers put forward demands contrary to the directives which we, together with Sir Anthony Eden and M Faure, had issued to our Foreign Ministers. The Soviet Government could not accept these new demands. as they envisaged direct interference in the domestic affairs of sovereign States.

Unfortunately, the practical measures which the Soviet Government is taking to develop contacts between our two countries, particularly by exchanging delegations, are encountering serious obstacles from the American side.

I believe that by a common effort we shall succeed in abolishing the so-called Iron Curtain and in creating conditions for the broad development of personal contacts between the citizens of our countries. May I express the hope that you also share this view? In this matter, too, the conclusion of a treaty of friendship and co-operation between our countries would unquestionably be of great benefit

These are some of the considerations I would like to put before you, my dear Mr. President, in connexion with the remarks you made in your letter. I should be very glad if they would help in clarifying the importance which my colleagues and I attach to the conclusion of a treaty of friendship and co-operation between the U.S.S.R. and the United States. For our part, we are ready to give the greatest attention to any remarks on any points of the draft treaty which you may deem fit to make. I await your further ideas on this subject."

A. UNITED KINGDOM. — Foundation-stone of New Coventry Cathedral laid by H.M. the Queen.

The foundation-stone of the new Coventry Cathedral designed by Mr. Basil Spence, replacing the former Cathedral destroyed by German bombs on Nov. 14, 1940, was laid on March 23 by H.M. the Queen in the presence of the Archbishop of Canterbury, the Duke of Edinburgh, and the Prime Minister. Several leading German churchmen were present at the ceremony, including a representative of Bishop Dibelius, the Evangelical Bishop of Berlin.

It had been announced on Dec. 21, 1955, that a native of Coventry who wished to remain anonymous had made a gift of £20,000 to defray the cost of the tapestry to be hung in the new Cathedral. The tapestry—77 ft. high, 40 ft. wide, and weighing 15 cwt.—is believed to be the largest ever made and will take several years to complete. Its designer is Mr. Graham Sutherland, the subject being " Christ the Redeemer seated in the Glory of God the Father." The lower part of the tapestry will form the reredos of the Lady Chapel altar.

(Times - Daily Telegraph - Manchester Guardian) **(Prev. rep. Coventry Cathedral, 11708 A.)**

B. UNITED STATES. — New Naval C.-in-C. in Eastern Atlantic and Mediterranean. - Marine Reinforcements for Mediterranean.

It was announced on March 7 that President Eisenhower had nominated Rear-Admiral Walter F. Boone, Superintendent of the Naval Academy at Annapolis, as C.-in-C. of U.S. naval forces in the Eastern Atlantic and Mediterranean areas, with the rank of full admiral. At the same time the President appointed Rear-Admiral Robert L. Dennison as Chief of Staff to Admiral Jerauld Wright, the NATO Supreme Commander in the Atlantic, and promoted him to vice-admiral rank.

The Defence Department announced on the same day that a battalion of 1,500 U.S. Marines would be sent to the Mediterranean area on the recommendation of the Joint Chiefs of Staff. It was explained that the reinforcements would replace a similar unit withdrawn from the Mediterranean in the spring of 1955, and that they would live afloat with the U.S. Sixth Fleet or be stationed at a Mediterranean port.—(New York Times - New York Herald Tribune) **(Prev. rep. 14524 A.)**

C. UNITED KINGDOM. — K.G. for Earl Attlee.

It was announced from Buckingham Palace on April 6 that H.M. the Queen had conferred the Order of the Garter on Earl Attlee, the former leader of the Labour Party.—(Times) **(Prev. rep. 14583 A.)**

D. GREECE. — Death of Archbishop Spyridon. - Enthronement of New Primate of Greece.

Archbishop Spyridon, Primate of Greece since 1949, died in Athens on March 21, aged 82.

Of Epirote origin, Archbishop Spyridon was born in 1874 in the village of Hili, on the Bosphorus. After his ordination he was sent by the Patriarchate to Kavalla, then part of the Ottoman Empire, where he campaigned actively for the liberation of Macedonia from Turkish rule. In 1906 he was consecrated Metropolitan of Vella and Konitsa (in Epirus), where he similarly devoted himself to the liberation of Southern Epirus from Ottoman control, and where he founded a clandestine pro-Greek organization—the Epirote Society —which helped the Greek Army to liberate the province during the Balkan War On account of these activities he was arrested by the Ottoman authorities at the time of the siege of Yanina, court-martialled, and sentenced to death, his life being saved by the personal intervention of King Constantine of the Hellenes.

In 1916 he was elected Metropolitan of Yanina, in Southern Epirus, remaining in that diocese for 33 years During his tenure of that office he engaged in active propaganda for the incorporation of Northern Epirus in Greece, both when the territory was under Albania and when it was conquered by the Italians during the occupation of Albania in 1939 During the Italo-German occupation of Greece he was sentenced to death by the Italian authorities for these activities, for the second time in his career. His life was saved, however, by the military collapse of Italy and the fall of the Fascist regime.

Archbishop Spyridon became Primate of Greece in 1949, after the death of Archbishop Damaskinos In recent years he had played a leading part in the campaign for *enosis* (the union of Cyprus and Greece), being chairman of the Pan-Hellenic Committee set up in Greece to foster this aim. After the deportation of Archbishop Makarios on March 9 last, he called for a nation-wide " half-hour of silence " as a protest against the British Government's action (see page 14760), but appealed to the Greek people not to take part in *enosis* demonstrations which might be used by the Communists to foment disorders.

The Holy Synod of the Greek Orthodox Church, meeting on March 29, elected Bishop Dorotheos (67), the Metropolitan of Larissa, as Primate of Greece and Archbishop of Athens in succession to the late Archbishop Spyridon. The new Primate, who had been Metropolitan of Larissa for 20 years, is regarded as an authority on canon law and has studied theology, law, and philosophy at the Universities of Athens and Leipzig. He was enthroned on April 1.—(Times - Daily Telegraph - Le Monde, Paris) **(Prev. rep. 10029 C.)**

E. NORWAY - SWEDEN. — Transit Traffic Agreement. - Swedish Oil Port in Trondheim Fjord.

An agreement providing greater facilities for Swedish transit traffic through Norwegian harbours in Trondheim Fjord was signed in Oslo on March 9. Specifically, the agreement provided (*a*) for the construction of a road linking the two countries between Enafors (Sweden) and Turifoss (Norway), and for improving the existing road from Turifoss to Stjordal, in the Trondheim area, at a total cost of 27,600,000 Norwegian kroner, of which Sweden will pay 18,900,000 kroner ; (*b*) for an adjustment of freight rates to encourage traffic on the existing railway line from Östersund (Sweden) to Trondheim ; and (*c*) for the construction of a Swedish " oil harbour " at Muruvik, and possibly later at Langstein, both in the inner part of Trondheim Fjord. The Norwegian Government also stated that it had no objection in principle to the construction of a pipeline for carrying oil to Sweden if the Swedish Government desired, although such a project would require further negotiations.

It was pointed out in the Norwegian and Swedish Press that the increased use by Sweden of the ice-free harbour facilities at Trondheim would overcome some of the difficulties caused by ice blockages in the Baltic in the winter. Attention was also drawn to the importance which the agreement might assume for Sweden in the event of war or blockade. Negotiations for a Swedish outlet through Trondheim had been in progress since 1953, and in 1954 the Soviet Ambassador in Stockholm lodged a formal protest against what he described as Swedish participation in the building of a " naval harbour " at Trondheim. This protest was rejected by Sweden on the ground that the arrangement of her communications with Norway was a purely Swedish affair.

The agreement will be valid for 25 years and will come into force on ratification by both Parliaments.—(Royal Norwegian Embassy, London - Aftenposten, Oslo - Svenska Dagbladet, Stockholm)

F. TURKEY. — Opening of Aegean University.

A new Turkish university—under the name of the Aegean University—was officially opened in Izmir (Smyrna) on March 8 in the presence of President Bayar and M. Menderes, the Prime Minister.—(Turkish Embassy, London)

A. UNITED KINGDOM. — Economic Implications of Full Employment. - Government White Paper.

A Government White Paper (Cmd. 9725) on the Economic Implications of Full Employment was published on March 22. It pointed out that the policies outlined by the Coalition Government in 1944 to maintain a high and stable post-war level of employment, and to combine this with a rising standard of living, had been applied over the past ten years with considerable success. Full employment had, in fact, been maintained in most parts of the country over practically the whole of that period, and the country as a whole was consuming more than ever before. Nevertheless, full employment had brought with it the problem of continually rising prices, to which no satisfactory solution had yet been found. It was the purpose of the White Paper to focus attention on this problem and to suggest what action would have to be taken if reasonable price stability was to be maintained in future.

Full Employment since 1945. The White Paper pointed out that in the immediate pre-war years the average rate of unemployment in the U.K. had been over 10 per cent. Since the war it had never (except for a few weeks in 1947) exceeded 3 per cent and for most of the period had been under 2 per cent, whilst at present it was about 1 per cent. It was pointed out, however, that these figures related to the country as a whole, and that unemployment in Northern Ireland and some other areas, though much lower than before the war, had remained appreciably above the national average.

The maintenance of full employment had been accompanied by a rapid increase in production, the national output of goods and services since 1946 having risen by 30 per cent and industrial production alone by 56 per cent However, because of the need to meet other claims on resources (such as making good war damage, overtaking arrears in capital investment, etc.), only part of this increase had been available for improving living standards At the same time the U.K. needed much larger exports than before the war, partly because import prices had risen more than export prices, and partly because a large proportion of the pre-war income from overseas investments had been lost. These difficulties had been only partially overcome when, in 1950, the outbreak of the Korean War and the growing international tension had compelled the country to undertake a substantial rearmament programme Nevertheless, the White Paper said that in the past two or three years the individual consumer had become the main direct beneficiary of the increase in production, and that "if we take full advantage of the opportunities open to us, there is every prospect that we shall be able to secure a further improvement in our living standards in the years ahead."

It must, however, be one of the country's major objectives to maintain in future a much greater degree of price stability than had been achieved in the past ten years. "In the increasingly competitive conditions which have developed in world markets in the past few years," the White Paper declared, "continually rising costs and prices in this country must inevitably weaken the whole basis of our export trade, and if we do not export enough, we shall be unable either to support a steady expansion of production at home or to maintain full employment."

Prices since 1945. Between 1946 and 1955 the prices of the final output of all goods and services had risen by about 50 per cent, about one-seventh of this increase being due to the net effect of changes in subsidies and indirect subsidies, and the remainder to increased import prices and higher costs of production. Although import prices had risen by 70 per cent, as compared with a 45 per cent increase in production costs (as measured by money incomes per unit of output), the latter were four to five times more important for the economy as a whole in terms of its effect on final prices, and had therefore been responsible for by far the greater part of the price increases

Whilst much of the rise in prices in the U.K since the war was attributable to the quite abnormal world conditions, there had been in Britain—to a greater extent than in many other countries—a continuing tendency for prices to rise as incomes increased faster than output. If these tendencies persisted, and incomes went on rising faster than output over the economy as a whole, full employment would continue to be associated with rising prices and all the consequent economic and social strains.

Changes in the Distribution of Income. Between 1938 and 1948 (taking no account of direct taxation) prices of consumer goods and services had roughly doubled, wages and salaries had rather more than doubled, and dividends of non-nationalized companies had risen by about one-tenth Over the period 1948 to 1955, while consumer prices had risen by nearly one-third, both wages and salaries and dividends had increased by nearly two-thirds, dividends having caught up in the past few years with wages and salaries. Taking the period 1938-55 as a whole, wages and salaries had increased by very much more (i e by 255 per cent) than dividends (80 per cent), and taking their real value, wages and salaries had increased by 40 per cent whilst dividends had decreased by 30 per cent. The distribution of companies' gross trading profits showed that between 1938 and 1955 the proportion allotted to dividends on Ordinary and Preference shares had fallen from 47 to 21 per cent, whilst the amount paid in taxation had increased from 9 to 24 per cent and the amount put to reserve or set aside for depreciation and stock appreciation charges had risen from 29 to 43 per cent.

Price Stability and Economic Progress. "Unless the upward pressure of rising money incomes on prices is moderated," the White Paper stated, "the economy is likely to be exposed to serious and increasing strains. These strains, if not relieved, will prevent us from realizing the full potentialities of economic growth and may lead to unemployment by making it more difficult to secure our imports. Our overseas earnings must be increased if we are to pay for the imports needed to sustain an expanding economy, to provide for overseas investment, and to build up our reserves"

The necessary expansion of exports would depend for its realization on a continuing growth of production and trade throughout the world, and on Britain's ability to secure a sufficient share of this trade. Yet, whilst the total volume of world trade in manufactures had risen by over 40 per cent between 1950 and 1955, Britain's share had fallen from over 25 per cent to about 20 per cent The White Paper emphasized that no efforts of the Government alone could ensure that Britain reaped the fullest advantage from the expansion of world trade An adequate volume of exports would depend above all upon the competitive strength of British goods in overseas markets, where the basic factor was price. Unless British prices were fully competitive exports would be inadequate for the country's vital national needs, the pound sterling would not retain its value in world markets, and unemployment would result from a shortage of imported raw materials.

Dealing with the effects of a disproportionate rise in costs and prices, the White Paper went on:

"Such a rise, if it persists, has . . . serious effects at home. The future growth of the economy will depend upon a sustained expansion of investment, and the rate of investment which we can afford will depend on our willingness to save. The full effect of continually rising prices on savings is unpredictable; but it is clear that they can progressively undermine the whole relationship between borrower and lender and thus the accepted structure of savings. That structure rests, to a considerable extent, on the willingness of the lender to hold, for long periods, titles to fixed sums—in the form of Savings Certificates, Government securities, insurance policies, debenture stock, and so forth. This willingness itself derives from a basic confidence that money will broadly retain its value. In so far as rising prices impair this confidence, and thereby reduce people's willingness to save, the financing of investment becomes more difficult and more expensive, industrial development is retarded, and the pressure on prices is accentuated This is particularly serious because the necessary expansion of production, with a labour force that is not likely to expand much further, will depend on a sustained expansion of investment. A high rate of investment cannot be achieved if too much of our wealth is devoted to consumption, and attempts to maintain both simultaneously at levels we cannot afford only result in further inflation.

"But the effects of a rising price level have a much more direct and more immediately personal impact. Continually rising prices are an obvious social evil. For many people this evil is obscured by the fact that they either are, or believe themselves to be, able to secure increases in their incomes to offset the rise in prices; and although their pressure for higher incomes adds to the pressure in prices, and they do not in fact gain very much from the rise in incomes, at least they do not lose very much from the rise in prices. Even so, the spiral of rising incomes and prices is a cause of considerable personal anxiety and of an acute sense of social unfairness. The difficulties and hardships inherent in such a situation bear most heavily on those dependent on fixed incomes, who are in continual danger of having their standard of living progressively reduced The longer this process continues, the more arbitrary its effects appear, and the more sharply the sense of injustice is felt

Conditions of Price Stability. After referring to the adjustments in fiscal, monetary, and social policies which would have to be made by the Government from time to time in order to maintain full employment without inflation, the White Paper continued: "As a nation whose lasting prosperity depends on a high level of overseas trade, we simply cannot afford to allow excessive demand at home to undermine our competitiveness in world markets or to take too much of the output that we need to sell abroad to secure our essential imports We must guard against the false sense of internal prosperity that can be given by continually rising money incomes unaccompanied by the necessary levels of output and exports, which cannot last and must ultimately endanger our long-term prosperity, and with it the whole ideal of full employment as a feature of our national economy

"In order to maintain full employment, the Government must ensure that the level of demand for goods and services is high and rises steadily as productive capacity grows. This means a strong demand for labour, and good opportunities to sell goods and services profitably. In these conditions it is open to employees to insist on large wage increases, and it is often possible for employers to grant them and pass on the cost to the consumer, so maintaining their profit margin. This is the dilemma which confronts the country. If the prosperous economic conditions necessary to maintain full employment are exploited by trade unions and businessmen, price stability and full employment become incompatible. The solution lies in self-restraint in making wage claims and fixing profit margins and prices, so that total money income rises no faster than total output. In the absence of such self-restraint, it may seem that the country can make a choice—albeit a painful one—between full employment and continually rising prices, or price stability secured with some danger to the level of employment that might otherwise have been achieved. But soon looms up the grim danger that the first of these apparent alternatives will turn out to have been no alternative at all because we may fail to secure sufficient imports to maintain full employment and our present standard of living.

"How fast output rises depends on our success in raising productivity. The achievement of a sustained increase in productivity calls for contributions from both management and labour Management must strive to ensure the maximum expansion of output by progressive investment in the most efficient capital assets, by the introduction of the most modern industrial techniques, and by the elimination of all restrictive practices which inhibit the economic growth of production The contribution of labour lies in co-operating to the full in the adoption of new methods of working, and in setting aside all practices which, however much they may have been justified in the past as means of safeguarding status, conditions of work, or the security of employment itself, are not appropriate in conditions of full employment. The healthy functioning of the economy and the progressive growth of its output depend also on co-operation within industry in maintaining an efficient and enlightened system of industrial relations The relationship between management and workers which this implies is a vital but intangible factor which only they can create by common effort. It demands a full and frank exchange of opinion and information at all levels between representatives who have confidence in each other's competence and integrity. .

"How well off we are as a nation depends not on the sum total of the money incomes we earn, but on the sum total of the goods and services we produce, and as individuals it is what we can buy with our pay, rather than the pay itself, which determines our standard of living. Price reductions can therefore contribute to raising our standard of living just as much as increases in money incomes, and so far as practicable it is through price reductions that we should aim to enjoy the benefits of higher productivity. If we all press constantly for more money, regardless of how much we produce to spend it on, prices are bound to go on rising But if we concentrate on increasing productivity, and on keeping costs down, price stability can be achieved along with full employment and a rising standard of living. From the point of view of industry and trade, this means that firms should try, wherever possible, to pass on gains from higher productivity in lower prices, and to expand their profits not by the maintenance of high profit margins but by the expansion of turnover . . . If general price stability is to be maintained, it is essential that there should be a positive reduction of prices in those sectors in which productivity tends to rise more rapidly than the average Enterprises which can achieve an increase of output and sales by a reduction of costs, including profit margins, will be making a real contribution to the maintenance of price stability and to the whole process of balanced economic growth."

The White Paper emphasized that the counterpart of realism in relation to prices was realism in relation to personal incomes If individuals always placed sectional interests before the nation's welfare, economic stability would be endangered and the possibilities of future expansion impaired, possibly to the extent of jeopardizing these very sectional interests which they sought to protect

The White Paper concluded "We all want full employment and we all want stable prices, but we have not yet succeeded in combining the two The experience of the past ten years has shown that the fuller employment is, the more liable prices are to rise. but the Government does not believe that there is any inevitable conflict between the two objectives We can achieve them both if certain conditions are fulfilled, and it has been the aim of this White Paper to state what these conditions are, in the belief that a greater awareness of the nature of the problem will contribute to finding a solution for it"

The Chancellor of the Exchequer (Mr Macmillan) disclosed on the same day that the sterling area's balance-of-payments deficit in 1955 amounted to £103,000,000. He also stated that for the fifth year in succession Britain's share of world trade in manufactures had continued to fall, and was now lower than before the war. He emphasized that the balance-of-payments deficit was more serious than might be supposed from its size, since it was "absolutely essential" that Britain should not merely be able to pay her way on external current account but should have a large surplus.

It was announced on April 10 that the Chancellor of the Exchequer had sent a letter to 10,000 British industrialists, and also to the nationalized industries, asking them to give the widest possible publicity to the "essential facts" contained in the White Paper. Mr. Macmillan said that he had arranged for the publication of a "popular version of the White Paper to assist in achieving an enlightened and well-informed opinion on our economic problems," and requested the firms and industries concerned to order "a suitable number of copies." (Cmd. 9725 - Treasury Press Office) **(Prev. rep. 14705 A.)**

A. JORDAN. — Cabinet Changes. - New Ambassadors in London and Paris.

An Amman announcement of April 2 stated that the Prime Minister of Jordan, Samir el-Rifai, would relinquish the portfolio of the Interior, which he had held concurrently with the Premiership, and that Falah Madadha had been appointed Minister of the Interior and Defence. It had been announced on March 30 that M. Bahadin Toukan, an under-secretary in the Foreign Ministry, would succeed Dr. Yousef Haikal as Ambassador in London, whilst Dr. Haikal would become Ambassador in Paris.—(Times) **(Prev. rep. Cabinet, 14646 A.)**

B. YUGOSLAVIA. — Debts to Britain. -Extension o Repayment Period. - Reduction in Interest Rate.

Under an exchange of Notes between the Yugoslav and British Governments on March 26, Britain agreed (*a*) to extend from 1962 to 1967 the period of repayment of the outstanding balance of £16,560,000 on the loans granted to Yugoslavia in 1949-51; (*b*) to reduce the rate of interest from an average of 4¼ per cent to 3 per cent per annum.

The following loans were affected by the new arrangements: (i) the credit of £8,000,000 extended under the Anglo-Yugoslav trade agreement of Dec. 26, 1949 (see 10464 B), (ii) the £3,000,000 credit extended on Dec. 28, 1950 (see 11092 A); (iii) the £2,000,000 credit for the purchase of raw materials granted on Jan. 11, 1951 (see 11282 C, 11371 D); and (iv) the £4,000,000 credit for the purchase of raw materials, given under the agreement of May 10, 1951 (see 11640 A).

These loans were made in the special circumstances arising out of Yugoslavia's break with the Cominform in 1948. and were designed, together with the credits extended at that time by other countries (particularly the U S.A. and Western Germany), to help her overcome the grave economic difficulties in which she found herself. In December 1954 the date of final repayment of the British loans had been extended from 1958 to 1962 and the interest rate reduced (see 14162 A), but in July 1955 Yugoslavia again indicated that the repayment of these post-war loans was imposing a severe strain on her economy. She therefore initiated fresh negotiations with her Western creditors (except the U.S A., which had already agreed to a revision of the terms of repayment on the lines envisaged by Yugoslavia) with a view to obtaining some further alleviation of this burden.

It was emphasized in London that the new agreement did not affect the Anglo-Yugoslav Agreement on Nationalization Compensation, under which Yugoslavia had agreed to pay £4,500,000 to British nationals (see 9726 A). About £1,010,000 still remained to be paid under this agreement.

The loans made by the United States to Yugoslavia (through the Export-Import Bank) total about $55,000,000; they bear interest at 3½ per cent and are repayable over the period 1954-68. The loans made by Western Germany amounted to about $64,000,000, the date of repayment being extended and the interest rate reduced under an agreement concluded on March 10, 1956.—(Treasury Press Office, London - Tanjug Agency, Belgrade) **(Prev. rep. 14584 C; 14162 A.)**

C. LITERATURE. — Book Selections for March.

Selected books published in Great Britain, the United States, and France are given below:

Great Britain. Collis, Maurice—"Last and First in Burma, 1941-1948" (Faber & Faber, 30s)

Crankshaw, Edward—"Gestapo. Instrument of Tyranny." (Putnam, 21s.)

Godden, Rumer—"An Episode of Sparrows" (Macmillan, 13s 6d.)

Howard, Elizabeth Jane—"The Long View" (Cape, 15s.)

Howarth, Patrick—"Questions in the House" (Bodley Head, 18s.)

Maurois, André—"Victor Hugo." Translated from the French. (Cape, 30s.)

Plumb, J. H —"Sir Robert Walpole · The Making of a Statesman." (Cresset Press, 30s)

Robertson, R. B.—"Of Whales and Men." (Macmillan, 21s.)

Sinclair, Lucy—"The Bridgeburn Days" (Victor Gollancz, 16s.)

Slim, Field-Marshal Sir William—"Defeat into Victory." The Story of the Burma War. (Cassell, 25s.)

United States. Bemis, Samuel Flagg—"John Quincy Adams and the Union" (Alfred A. Knopf, New York, $8.75.)

Brooks, Van Wyck—"Helen Keller. Sketch for a Portrait." (E. P. Dutton & Co., New York, $3.00.)

Chotzinoff, Samuel—"Toscanini: An Intimate Portrait" (Alfred A. Knopf, New York, $3.50.)

"Memoirs of Harry S. Truman: Volume II—Years of Trial and Hope, 1946-1952." (Doubleday, New York, $5.00)

O'Neill, Eugene—"Long Day's Journey into Night." Published posthumously. (Yale University Press, $3.75)

France. Bosco, Henri—"Les Balesta" (Gallimard, Paris, 750 francs.)

(Ed. K.C.A.) **(Prev. rep. Book Selections, 14730 A.)**

D. LEBANON. — New Government.

The Government headed by M. Rashid Karame tendered its resignation to President Shamoun on March 15 following the resignation of the Ministers of Foreign Affairs, Education, and Agriculture in connexion with a domestic dispute about subsidies for private schools. M. Abdullah Yafi, a former Prime Minister, formed a new Cabinet on March 20 with the following membership:

M. Abdullah Yafi, Prime Minister and Interior; M Selim Lahoud, Foreign Affairs and Justice, Emir Majid Arslan, Defence; M. Georges Karame, Finance, M Emile Boustani, Public Works and Planning; M Georges Hakim, Economy and Education; M. Joseph Skaf, Agriculture; M. Nazik el-Bizry, Public Health and Social Affairs; M. Mohammed Sabra, Information, Posts and Communications; M Saeb Salam, Minister of State M. Lahoud and Emir Arslan retained the portfolios they held in M Karame's Cabinet.

The new Government was given a vote of confidence on March 30 by 24 votes to 14.—(Le Monde, Paris) **(14459 C.)**

A. ICELAND. — Call for Withdrawal of U.S. Forces. - Resignation of Thors Government. - Forthcoming General Elections.

The Icelandic Prime Minister, Hr. Olafur Thors, resigned on March 27 after a split in the Cabinet over the question of the stationing of NATO forces in Iceland and a revision of the 1951 defence agreement with the United States. On the following day President Asgeirsson prorogued the *Althing* (the Icelandic Parliament), announced that general elections would be held on June 24, and requested Hr. Thors and his Cabinet to carry on as a caretaker Government until the elections.

The split in the Government (a coalition of the Progressive and Independence parties) originated on March 13, when the Progressive Party decided at its annual conference that it was not possible to continue its coalition with the Independence Party because it considered that U.S. troops manning the Keflavik air base, 35 miles from Reykjavik, should be replaced by Icelandic personnel. A resolution was adopted calling for a revision of the 1951 U.S.-Icelandic agreement, and inviting the Social Democrats to form an electoral alliance with the Progressive Party with the aim of obtaining a majority in the *Althing*. On March 26 the Progressive Party formally announced its withdrawal from the coalition Government.

Before its prorogation on March 28 the *Althing* adopted by 31 votes to 18, with three abstentions, a resolution moved by the Progressive and Social Democratic parties calling for a revision of the 1951 agreement.

The resolution, after referring to the changed international situation since the conclusion of the agreement, called for the withdrawal of all foreign troops from Iceland and for the taking-over of the care and maintenance of the defence installations by Icelandic personnel—though it was emphasized that these personnel would not undertake any military activities. If, however, no agreement on the revision of the treaty could be reached, the treaty should be terminated by Iceland. The Foreign Minister, Hr. Kristian Gudmundsson (Progressive Party), speaking in support of the resolution, declared that missile warfare had reduced the importance of Iceland as a base, and argued that foreign troops would be unable to protect Iceland if war broke out. Nevertheless, although supporting the withdrawal of foreign troops, Hr. Gudmundsson emphasized that Iceland would continue her present relations with neighbouring countries and with NATO in matters of security and defence.

Article 7 of the 1951 agreement provided that either signatory might ask the NATO Council to "review the continued necessity for the facilities and their utilization." If at the end of six months the parties had not reached an understanding, either party could serve notice of its intention to terminate the agreement within one year.—(New York Times - Times) **(Prev. rep. Cabinet, 13149 C; 1951 Agreement, 11454 A.)**

B. INDIA - YUGOSLAVIA. — Trade, Shipping, and Technical Co-operation Agreement.

A four-year trade agreement between India and Yugoslavia expiring on Dec. 31, 1959, was signed in New Delhi on March 31.

Under the agreement Yugoslavia will export to India steel, aluminium, copper and copper products, building and other machinery, locomotives, railway wagons, tractors, etc., whilst discussions will take place on the possibility of Yugoslav deliveries of ships to India. Indian exports to Yugoslavia will consist of manganese and iron ore, mica, oil seeds, shellac, tobacco, cotton textiles, jute goods, and other products.

The agreement also provided that both countries would grant each other tariff and other facilities for the exchange of goods; that they would encourage scientific and technical co-operation by exchanges of information and documentation and visits of missions and expert groups; and that, as regards port facilities and services, ships of either country would enjoy in the other the same advantages as the other's own ships.

The desirability of an expansion of Indo-Yugoslav commercial exchanges had been recognized in the joint communiqué issued by President Tito and Mr. Nehru during the latter's visit to Belgrade in July 1955.—(Indian High Commissioner's Office, London - Tanjug Agency, Belgrade) **(Prev. rep. 14372 A.)**

C. SCANDINAVIA - SOVIET UNION. — Civil Aviation Agreement. - Direct Air Services between Scandinavian Capitals and Moscow.

A civil aviation agreement providing for direct air services between Copenhagen, Oslo, and Stockholm on the one hand and Moscow on the other was signed in Moscow on March 5 between Denmark, Norway and Sweden and the Soviet Union. An agreement between the Scandinavian Airlines System (SAS) and Aeroflot (Soviet Airlines) was signed at the same time, envisaging the beginning of the new services during April. (Berlingske Tidende, Copenhagen - Aftenposten, Oslo) **(Prev. rep. Finnish-Soviet Agreement, 14512 E.)**

D. UNITED KINGDOM. — Sir Winston Churchill on the Middle East Situation. - Statement on Bulganin-Khrushchov Visit to Britain.

Sir Winston Churchill, speaking in London on April 13 at a meeting of the Primrose League (of which he is Grand Master), expressed his conviction that "the United States, as well as the United Kingdom, will intervene to prevent aggression by one side or the other" in the situation between Israel and Egypt.

In a reference to the Middle East situation, Sir Winston said: "I do not share the view of those who think they [the Americans] have failed in their duty, or will fail in their duty if the moment comes. They are a wise and experienced people. They learn from history. They know well that both the great wars which have darkened our lives and dishevelled the world could have been prevented if the United States had acted, before they began, to prevent them.

"Now a somewhat similar case has arisen, though on a much smaller scale. Egypt and Israel are face to face and we and our American brothers have, with France, made a declaration in 1950 to the effect that we will not allow them to fight. The U.N. Secretary-General and General Burns are also doing their utmost to avert bloodshed, and they have our full support in their delicate, thankless, and humane task.

"I think we can be perfectly sure that the United States, as well as the United Kingdom, will intervene to prevent aggression by one side or the other. The need for this will probably never come. But it may come, and come at any moment, and if Israel is to be dissuaded from using the life force of her race to ward off the Egyptians until the Egyptians have learnt to use the Russian weapons with which they have been supplied, and the Egyptians then attack, it will become not only a matter of prudence but a measure of honour to make sure that they are not the losers by waiting. For my part I put my trust in President Eisenhower, that he will make the will-power of America felt clearly and strongly—and felt in time. . . ."

In a reference to the forthcoming visit of Marshal Bulganin and M. Khrushchov to Britain, Sir Winston said: "They have a right to be treated with courtesy and goodwill. . . . I hope they will enjoy their time in this country, and that easier and more fruitful relations will emerge as a result of their visit. Peaceful co-existence is, after all, the first thing we are seeking, and to this easier personal relations between their national leaders and ours, and a clearer comprehension of the way we live, can make a valuable contribution."—(Times - Daily Telegraph) **(Prev. rep. Middle East, 14793 A; Bulganin-Khrushchov Invitation, 14369 A.)**

E. SOUTH AFRICA. — Decimalization of Coinage. - Government Support in Principle.

The Minister of Finance (Mr. Louw), speaking in the House of Assembly on March 9 on the second reading of a private member's Bill advocating the decimalization of South Africa's coinage, said that the Union Government was "more than sympathetically disposed" to the project and was prepared to support decimalization of the coinage in principle. However, before the Government could make a final decision on the matter they must be satisfied about the problems involved and the methods of solving them, and he would therefore appoint a commission of inquiry to take evidence from those organizations most deeply affected by the proposed change. If the change went through, Mr. Louw added, the Government would probably have to accept responsibility for compensation. The question of naming any new coinage would be one for the Government to decide, and would not be considered by the commission; he himself would like to have purely South African names for the different units, unconnected with either the British or Dutch colonial periods.—(Cape Times) **(Prev. rep. 14152 E.)**

F. ANTARCTICA. — International Court declines British Application for Ruling on Antarctic Sovereignty.

The International Court of Justice decided on March 17 not to give a hearing to Britain's application in respect of Argentine and Chilean claims to British Antarctic territory, on the ground that both Argentina and Chile had declared beforehand that they would not accept the Court's jurisdiction. The British Government, when instituting proceedings, had claimed that Argentina and Chile had encroached upon British Antarctic territory, and had asked the Court to recognize British sovereignty over those territories and to declare that the Argentine and Chilean "pretensions and encroachments" were contrary to international law.—(Times) **(Prev. rep. 14276 A.)**

G. JAPAN. — Mr. Hatoyama elected Leader of Liberal Democratic Party.

The Japanese Prime Minister, Mr. Hatoyama, was elected on April 5 to the leadership of the Liberal Democratic Party formed in November last by the merger of the Democratic and Liberal parties.—(Times) **(Prev. rep. 14620 B; 14531 A.)**

APRIL 14—21, 1956

A. SOUTH AFRICA. — The South Africa Act Amendment Act. - Coloured Voters to be placed on Separate Electoral Roll.

A joint session of both Houses of the South African Parliament passed on Feb. 27, by more than the two-thirds majority required by the Constitution, the South Africa Act Amendment Bill, which re-enacted the Separate Representation of Voters Act (see 12211 A). This Act, passed in 1951, had transferred the Cape Coloured voters to a separate electoral roll, but was subsequently declared invalid by the Supreme Court (see 12409 A) on the ground that it had not been passed by a two-thirds majority of both Houses of Parliament in joint session, in accordance with the procedure laid down in the "entrenched clauses" of the South Africa Act.

Other sections of the Amendment Bill (1) removed those clauses of the South Africa Act entrenching franchise rights against amendment on grounds of race or colour; (2) provided for the retention of the clauses entrenching the equal rights of the English and Afrikaans languages; (3) laid down that "no court of law shall be competent to inquire into or pronounce on the validity of any law passed by Parliament other than a law which alters or repeals, or purports to alter or repeal, the provisions of Sections 137 or 152 of the South Africa Act" (i.e. the sections safeguarding equal language rights).

The joint session of Parliament opened on Feb. 13, when the Prime Minister, Mr. Strydom, gave notice of his intention to introduce the Bill. The Bill received its first reading on the following day.

After Mr. Strydom had asked for leave to introduce the Bill, **Mr. Strauss** (Leader of the Opposition) moved an amendment opposing its introduction on the grounds that "the history preceding and the circumstances attending its introduction, following upon previous attempts by the Government to circumvent the entrenched clauses of the South Africa Act, indicate that it is another piece of legislation designed to achieve the same object." Mr Strauss said that although it was unusual to oppose the first reading of a Bill, the steps that had been taken by the Government were also "extraordinary"; in support of this he quoted earlier statements by members of the Government and the Nationalist Party which, he suggested, implied that the Government would "pack" the Senate and the Supreme Court if it were unable to obtain the necessary majority for the Separate Representation of Voters Bill. The United Party, he announced, would launch a court action to challenge the validity of the Senate Act (see 14353 A), and would ask the courts to hold (*a*) that the present Senate was not one of the Houses of Parliament, (*b*) that the joint session was not properly constituted, and (*c*) that the legislation passed by the joint session or with the help of the enlarged Senate was invalid.

Mr. Hepple (leader of the Labour Party) said that his party did not intend to take part in the joint session, which he described as "a packed Parliament and a fraud." He refused to withdraw this statement when ordered to do so by the Speaker, and left the House with the other Labour members, none of whom took any further part in the debate on the Bill. **Mrs. Ballinger** (Liberal, Natives' Representative) said that the Natives' Representatives would take part in the joint session in order to oppose the Bill, which involved the rights of the Natives as well as of the Coloured population **Mr. Waring** (Conservative) stated that his party would allow its members to vote according to their consciences

In his reply to the debate, **Mr. Strydom** accused Mr Strauss of evading the rules of the House by casting reflections on the Senate Act in such a way that he could not be called to order by the Speaker.

Mr. Strauss's amendment was rejected by 170 votes to 65, three of the Conservative members (Mr. Barlow, Mr. Waring, and Mr. Coetzee) voting with the Nationalists, the others being absent. The second reading debate opened on Feb. 15 and continued until Feb. 23.

Mr. Strydom, in opening the debate, pointed out that the Bill dealt with two matters—the separate representation of the Cape Coloured voters in Parliament and the Cape Provincial Council, and the sovereignty of Parliament. With regard to the first question, a Bill would be introduced to amend the Separate Representation of Voters Act, one of the provisions of which would be that the representatives of Coloured voters in the Cape Provincial Council would be Europeans, instead of either Europeans or Coloureds as at present. When the Constitution of Cape Colony was drafted in 1853, he recalled, no difference had been made between a Native and a Coloured voter, and those who in 1936 had supported the transfer of Native voters to a separate roll could give no logical reason why Coloured voters should not also be placed on a separate roll. Mr Strydom asserted that in present circumstances the Coloured voter was nothing but a "political football" for political parties, and that the fight being put up by the Opposition had nothing to do with the Coloured voters' interests but was concerned only with the value of the Coloured vote to them. In the past the non-Europeans had often decided what European party should be successful in a constituency, which he (the Prime Minister) considered a "thoroughly unhealthy" position. It was estimated that 150,000 Coloured voters were entitled to be registered, which meant that in more and more constituencies the Coloured vote would become the deciding factor. To illustrate the rapid rise in the Coloured population, Mr. Strydom mentioned that in the Cape there were 186,430 European and 212,798 Coloured children at school in 1955, as compared with 170,200 Europeans and 183,252 Coloureds in 1951; even this did not fully show the position, as large numbers of Coloured children did not go to school or left at an early age.

The Nationalist Party, he went on, had taken successive steps over a long period to strengthen the position of the White man through the franchise laws It had introduced legislation in 1930 to extend the franchise to European but not to Coloured women, and in 1931 had removed all qualifications for White voters while retaining the qualifications for non-White voters Although "a lot of fuss" was being made about the policy of *baasskap*, or the supremacy of the White man, it was simply the traditional policy of South Africa, and the supremacy which the White man enjoyed in the Union was due to one thing and one thing only—the restrictive franchise laws.

On the question of parliamentary sovereignty, the Prime Minister said that if Parliament, out of the power of its own sovereignty, gave a testing right to the courts, then it was itself entitled to that right. Parliament had the right to introduce any changes in legislation or to repeal any legislation, and anything it had done it could also undo. For 15 years after 1937 Parliament had accepted that it possessed this sovereignty, and even the United Party under General Smuts had acted in terms of this acceptance of the sovereignty of Parliament. The Appeal Court's decision of 1952, however, which had reversed the same Court's decision of 1937, had led to the present constitutional crisis, and a court decision, whether right or wrong, remained the interpretation of the law till such time as another court reversed that decision or until Parliament itself amended the law The Bill therefore provided that no court should have the power to give a decision on the validity of any Act of Parliament, except in connexion with Article 137 of the Constitution relating to language rights.

Mr. Strauss, moving that the Bill "be read this day six months," recalled that General Smuts had considered it unthinkable that any Government would act in defiance of the entrenched clauses The re-entrenchment of language rights in the present Bill was valueless, as any future Government with a majority of one in the House of Assembly could evade it by "packing" the Senate to secure a two-thirds majority Mr. Strauss gave a warning that the abolition of the franchise entrenchment threatened not only the rights of Coloured and Native voters and of the Natives' representatives in Parliament, but the rights of everyone, it would be possible, for example, for Jews to be deprived of the right to vote by a simple majority of the two Houses of Parliament sitting separately. This irrevocable step would also be detrimental to race relations, as it would increase the danger of a united anti-White bloc It was untrue that the Coloured people were a menace to European civilization; in the last election there had been only one seat which the United Party might have failed to hold but for the Coloured vote. A greater menace was presented by the possibility that, if the Coloureds were given separate representation, the three Natives' and four Coloureds' representatives might hold the balance of power between the two major White parties.

Mr. Naudé (Minister of Health), who described the South Africa Act as "an Act of the British Parliament," pointed out that the British Parliament could amend the sections dealing with voting rights by a majority of one, but that the Union Parliament, in terms of the 1952 judgment of the Supreme Court, was unable to do so. In Britain, he said, the supremacy of Parliament was absolute, and that was what was being claimed for the Union Parliament also.

Senator Conradie (Leader of the Opposition in the Senate), seconding Mr Strauss's amendment, pointed out that the Constitution had in fact been drawn up by the Boer generals at a National Convention, and had stood the test of time and two World Wars. The Government's legislation, he declared, would bring about a sense of humiliation among non-Europeans, which in turn would cause bitterness and enmity.

Senator Rubin (Liberal, Natives' Representative) said that although the Government claimed to represent the will of the people, it represented only "a part of a portion of a section of the people of South Africa." He criticized the Bill because it made colour the criterion which determined a man's capacity to participate in and contribute to the life of the country, and maintained that this proposition was repudiated by 10,000,000 non-Europeans in South Africa, as well as by the rest of Africa and the majority of people throughout the world.

Mr. Fouché (Nationalist) maintained that the South African nation, as distinct from the population of South Africa, consisted of the English- and Afrikaans-speaking people, and that the Government therefore represented the majority of the nation.

Dr. Donges (Minister of the Interior) ridiculed the suggestion that the Bill meant the end of individual freedom in South Africa, pointing out that fundamental rights such as freedom of speech and religion were not protected by any entrenched clause in the Constitution. It had always been possible to restrict the franchise by introducing economic, religious, or educational qualifications, but no-one was afraid that these possibilities might become realities. Dr. Dönges also maintained that no right was being taken away from the Coloured people, as they would continue to exercise the right to vote, although on a separate electoral roll.

Mr. Bekker (Conservative), moving an amendment opposing the passing of the Bill, said that it created a danger that in the event of a change of Government non-Europeans could be placed on the common roll with a bare majority in Parliament. **Mr. Coetzee** (Con.) seconded the amendment, but said that he himself would support the Bill.

Mr. Sauer (Minister of Lands) declared that far more had been spent on social services for the Natives since they were removed from the common roll in 1936, and that the reason for this " change of heart " was that the whole population felt that because of the 1936 legislation the Natives were no longer a menace to White supremacy. If a " solemn word " was given to the Coloured people in 1910 that they would not be removed from the common roll, that solemn word applied equally to the Native voters ; in 1936, however, the majority of the United Party had voted for their removal from the common roll The argument about morality and a two-thirds majority made " a mathematical conception " of morality, for if it was immoral to put the Coloured voters on a separate roll with a majority of one, it was also immoral to do so even if there was unanimity.

Mr. Moore (U.P.) pointed out that the proportion of Coloured voters in the Cape had fallen from 21 per cent in 1921 to 10 per cent in 1931 and 6 3 per cent in 1954, and contended that they did not represent any urgent danger.

Mr. le Roux (Minister of Agriculture) declared that the Government's legislation was necessary to save Western civilization, and that what Australia was doing for Western civilization by its " White Australia " policy could only be achieved in South Africa by the policy of *apartheid*.

Senator Ballinger (Natives' Representative) observed that the will of the people should not be regarded from the viewpoint of the White voter only, and that he himself represented 1,045,000 Native votes—almost as many votes as the Government and the official Opposition combined.

Mr. Swart (Minister of Justice) asserted that the re-entrenchment of language rights in the Bill had disappointed the Opposition, which had hoped to " raise a scare " among English-speaking people This entrenchment, which he personally believed unnecessary, had been retained simply because of the use to which its omission could have been put to incite English-speaking people against Afrikaners The entrenchment, he recalled, had originally been inserted to protect not the English but the Afrikaans language, which had had to struggle for recognition and equality. As a member of South Africa's first completely bilingual Cabinet, he could give an assurance that the rights of the English language would never be threatened.

Dr. Verwoerd (Minister of Native Affairs) said that the French Empire had pursued a policy of integration of Native peoples similar to the idea of the common roll, whereas the British Empire had applied in effect a policy of *apartheid*. South Africa's message to non-European races was that they should be given the opportunity to develop themselves in their own areas. If the Natives of the Protectorates [i.e the High Commission Territories of Basutoland, Bechuanaland and Swaziland] could appreciate that *apartheid* would give them this opportunity, they would, he thought, favour incorporation in the Union instead of the " colonialism " which existed under the present British control.

Mr. Strydom, replying to the debate, contended that the National Convention had accepted the entrenchment of the Coloured vote because otherwise the British Parliament would have refused to pass the South Africa Act, and that Generals Smuts and Botha had both said that ultimately the voting position would have to be changed If it were the United Party's policy not to discriminate between races, and to make civilization the only yardstick, the time must come when all non-Whites would be civilized and would therefore be entitled to full citizenship rights. Such a policy, however, would mean " the death of the White race."

The Opposition amendment was rejected on Feb. 23 by 171 votes to 65, and the Bill was read a second time. Of the Conservative group, Mr. Bekker voted with the Opposition and Dr. Jonker with the Government, whilst Mr. Waring and Mr. Coetzee abstained.

At the opening of the committee stage (Feb. 24) **Mr. Strauss** announced that the United Party would not discuss the clauses of the Bill or propose any amendments, as it was impossible to remedy its defects, but would vote against every clause **Mrs. Ballinger** stated that the Natives' representatives would adopt a similar attitude. The four Conservatives present were again divided, Dr. Jonker and Mr. Barlow voting with the Government throughout, whilst Mr. Waring voted against the clause deleting the entrenchment provisions of the South Africa Act on Coloured voting rights. Mr Coetzee abstained.

During the third reading debate (Feb. 27) Mr. Strauss again moved that the Bill " be read this day six months," but after debate his amendment was rejected by 173 votes to 65. The motion for the Bill's third reading was then adopted by 174 votes to 68, or eight votes more than the required two-thirds majority of all members of both Houses. Of the Conservatives, Mr. Barlow, Dr. Jonker, and Mr. Coetzee voted with the Government in both divisions, whilst Dr. Shearer (who had not previously attended the joint session), Mr. Bekker, and Mr. Waring voted against the Bill but did not vote on the amendment. The Speaker (Mr. Conradie) recorded his vote in favour of the Bill, which received the Governor-General's assent on March 2.

During the joint session several hundred members of the Women's Defence of the Constitution League held a series of silent protest demonstrations outside the Parliament buildings in Cape Town, wearing black sashes as a sign of mourning. When forbidden to wear their sashes in the public gallery of the House, they pinned black roses to their dresses, their example being followed by the women members of the Opposition.

An application against the South Africa Act Amendment Act was filed by the United Party with the registrar of the Cape Supreme Court on March 2.

A Bill regulating the new status of Coloured voters—the Separate Representation of Voters Amendment Bill—was published on March 21.

The Bill provided (*a*) for the setting-up of a Union Council for Coloured Affairs, composed of 15 members nominated by the Government and 12 elected members, to advise the Government " at its request " on all matters affecting the economic, social, educational, and political interests of the Coloured population , (*b*) for the election by Coloured voters in Cape Province of four White members of the House of Assembly and two White members to the Cape Provincial Council , (*c*) for the division of Coloured voters in the Cape for this purpose into four constituencies, each of which, as well as electing the M P.s and Provincial Councillors, would elect three representatives on the Union Council for Coloured Affairs. Of the Government-nominated members of the Council, eight Coloured representatives would be nominated from the Cape (at least one being a Malay and one a Griqua), four from the Transvaal, two from Natal, and one from the Orange Free State , the Government would also nominate three of the five members of the Council's executive committee, and would appoint the chairman, who would have a deliberative and a casting vote. The Council would hold office for five years.

The new Bill differed considerably from the 1951 Separate Representation of Voters Act (revalidated by the South Africa Act Amendment Act), which provided for a Board for Coloured Affairs consisting of eight elected members from the Cape and only three nominated members for the three other Provinces. The 1951 Act also gave Coloured voters the right to elect either European or Coloured representatives to the Cape Provincial Council —(Cape Times - Die Burger, Cape Town)

(Prev. rep. Separate Representation of Voters Act, 13672 A ; Senate, 14612 A.)

A. TANGANYIKA. — Formation of United Tanganyika Party. - Statement of Policy.

The formation of a non-racial political party under the name of the United Tanganyika Party was announced in Dar-es-Salaam on Feb. 16. The new party, which is pledged to work for the political and social integration of all races in the Territory, was sponsored by 26 out of the 30 unofficial members of the Legislative Council, representing Europeans, Africans, and Asians.

Among prominent leaders of the European settlers supporting the party were Sir Eldred Hitchcock (who has large sisal interests), Sir Charles Phillips, and Mr. Tom Tyrrell, a former leader of the racially-exclusive Tanganyika European Council. Supporters also included a number of prominent Moslems ; Mr. I C Chopra (Indian), who took part in developing Tanganyika's diamond mines ; and prominent Africans such as Chief Kidaha Makwaia (a member of the East African Royal Commission on Land and Population) and Chiefs Lugushu and Gwao.

The manifesto published by the party's sponsors said, *inter alia* . " Political consciousness is growing in Tanganyika, and the tempo of events both within the country and outside it makes it imperative that a non-racial political party should be formed now pledged to uphold and further the principles which have been generally accepted by people of good will in Tanganyika. We believe that responsible people throughout the country must adopt a positive attitude in supporting and acting upon these beliefs, an attitude which is vital to Tanganyika's moral, social, economic, and political progress, and without which the goal of nationhood and full self-government within the Commonwealth will not be achieved. The United Tanganyika Party does provide a common basic approach to problems which have to be faced."

Among the party's proposals were the rejection of all forms of racial discrimination and the demand for the setting-up of unsegregated schools.—(Times - Observer)

(Prev. rep. Constitutional Reform, 14212 B.)

B. HUNGARY. — Release of Mme. Marton.

It was officially announced in Budapest on April 8 that Mme. Ilona Marton, a correspondent of the American news agency United Press, who had been sentenced to three years' imprisonment in January last on charges of espionage, had been released from prison.—(Times) **(Prev. rep. 14700 D.)**

A. UNITED KINGDOM. — British Transport Commission. - Further Increases in Rail Freights and Dock and Canal Charges.

Mr. Harold Watkinson, the Minister of Transport and Civil Aviation, announced in the House of Commons on March 19 that the Government had decided to authorize the British Transport Commission to increase railway freight, dock, and canal charges by not more than five per cent, and that, after consulting the Transport Tribunal, he would make regulations accordingly.

Mr. Watkinson explained that in 1955 the railway strike and increased costs and wages had added about £30,000,000 to the Commission's deficit, whilst as a result of further increases in costs and wages the deficit for 1956 might be as much as £55,000,000, increasing the Commission's total deficit to over £100,000,000. In view of the Commission's statutory duty to pay its way, taking one year with another, it had proposed a substantial increase in charges —including general increases in freight rates and passenger fares— designed to bring in an additional £37,000,000 in a full year

The Government realized that, in view of the Commission's obligations and financial position, it was fully justified in taking this action, moreover the Government's present economic policies required the nationalized industries, when fixing their charges, to seek fully to reflect their costs. At the same time there were now signs that renewed and strenuous efforts would improve the railways' financial outlook through more efficient working arising from better relations in the industry. In this connexion, the Government had been encouraged by recent statements of the British Railways Productivity Council and the British Transport Joint Consultative Council, which showed that there was " a new readiness on the part of all concerned to work together to these ends."

In these circumstances the Government had come to the conclusion that it would be justified in the national interest in asking the Commission to take a course involving an exception to the general policy in regard to the nationalized industries, and the Commission had agreed, on the " clear understanding " that the position would be reviewed again in six months' time, to defer increases in certain fares on London Transport services and on British Railways for which it had already applied to the Transport Tribunal. The Government hoped, however, that during the next six months " this new initiative will enable the Commission to put in train measures leading to improved efficiency and to getting their operations on a more economical basis."

Mr Watkinson added that the Commission would in due course make its own announcement regarding increases in passenger fares for which it had an existing authority The changes now announced would increase the Commission's revenue by about £20,000,000 in a full year

In a further statement on April 11 Mr. Watkinson announced that the Transport Tribunal had submitted to him a memorandum surveying the Commission's financial position since 1947 and showing " serious deficiencies in revenue in relation to expenditure." The memorandum had therefore recommended that the Commission should be authorized to increase its railway freight, dock, and canal charges by the 10 per cent originally asked for. Nevertheless, the Government had decided to retain the general limit of 5 per cent, but to authorize increases of (*a*) 7½ per cent on charges for consignments of under one ton by goods train and on all merchandise carried by passenger train, (*b*) 12½ per cent in railway freight charges on returned " empties." All the increases would take effect from April 23, and the " clear understanding " would remain that the charges would have to be re-examined in the light of the circumstances in six months' time.

The Transport Tribunal, in its memorandum to the Minister, pointed out that the Commission had been able to meet " the charges properly attributable to revenue " in only three of the eight years since nationalization—in 1951, 1952 and 1953. It attributed the Commission's inability in the other years to meet its statutory obligations under the 1947 Transport Act to " the insufficient earnings of British Railways," which had paid their way only in 1952 and over the whole eight years had " fallen short of doing so by approximately £100,000,000." " Taking 1955 by itself," the memorandum continued, " the operations of the Commission as a whole resulted in a deficiency of £30,500,000, whilst British Railways, treated as a separate undertaking, failed to pay their way by approximately £38,000,000. These facts would be sufficiently grave even if it were possible to expect that the Commission's financial fortunes would at all events be no worse in the immediate future than they have been in the past. No such mitigated hope can be entertained unless substantial relief can be afforded."

After saying that the Minister's statement of March 19 implied reductions in the additional annual revenue sought by the Commission from £24,800,000 to £14,100,000 in the case of freight charges, and from £5,700,000 to £1,000,000 in the case of passenger fares, the memorandum went on · " We have been informed by the Commission that if the other increases sought by it are scaled down to this extent, it is unlikely that more than £600,000 could be obtained by way of increases in the charges for the carriage of mails and parcel post. In the result, therefore, the £37,000,000 at which the Commission aimed would be reduced to £20,200,000. To reduce the additional revenue sought by the Commission to this figure will mean that in the absence of some radical change for the better its accumulated deficit will increase at the rate of more than £650,000 a week." Even if, after the six months' experimental period the full 10 per cent rises were brought into operation, the Commission's accumulated deficit would have swollen by about £35,000,000 to over £104,000,000 by the end of 1956.

As regards the hope expressed by the Minister that the railways' financial outlook would improve as a result of more efficient working, the memorandum stressed (1) that the estimates put forward by the Commission already allowed for some improvements in efficiency; (2) that no conceivable improvement in efficiency could " do more than reduce the gap of £18,000,000 which would still separate the Commission from solvency if all the measures proposed by it were put into effect."

The memorandum concluded : " We regret that we are unable to agree with the provisional decisions which you have reached. It may be that there are considerations . . . which . . make it necessary to disregard, at all events for the time being, the obligations and interests of the Commission. It is no part of our duty to discuss this possibility. . . . We think that in the light of the Commission's past history and present prospects it is plainly necessary to take all such measures as are available to stay the progressive deterioration of its financial position, and that the increases for which it sought sanction are urgently necessary if this object is to be attained "

Commenting on the memorandum, Mr. Watkinson stressed that his statement of March 19 had been made " with a full consciousness of the statutory duties imposed on the Commission " and that it involved " no disregard of these duties," since it proposed only that the increases should be limited to 5 per cent for six months. He added that the decision in regard to passenger fares had been taken by the Commission itself " as an earnest of its desire to co-operate fully in the matter." (Times - Daily Telegraph - Financial Times - Manchester Guardian) **(Prev. rep. Freight Charges, etc., 14316 A.)**

Note. It was unofficially estimated that a five per cent rise in rail freights would mean that coal prices would have to be raised by about 1s to 2s. a ton, according to distance from pithead This, in turn, would add over £1,000,000 a year to the fuel bills of the Gas and Electricity industries, and would raise steel production costs by 4s. to 5s. a ton. The increase would put rail freights at about 192 per cent above pre-war —(Ed K.C.A.)

B. CZECHOSLOVAKIA. — Cuts in Retail Prices.

The Czechoslovak Government announced on March 31 cuts in the retail prices of 22,000 items of food, industrial goods, and household equipment, estimated to result in an annual saving to the population of 2,100,000,000 crowns. Reductions of 10 to 25 per cent were ordered for a wide range of textiles, shoes, leather and plastic goods and chemical products, whilst some of the most important reductions in food prices were for flour (10 per cent), rice (23 to 41.6 per cent), vegetable fats (16 per cent), margarine (14.3 to 16.7 per cent), pork fat (11.8 per cent), chocolate (20 per cent), and coffee (18.5 to 20.8 per cent). This was the fifth general price reduction in Czechoslovakia since the currency reform of June, 1953.—(New York Times - Neue Zurcher Zeitung) **(Prev. rep. 14296 B.)**

C. NORTHERN IRELAND. — Retention of Death Penalty. - Ministerial Statement.

The Minister of Home Affairs, Mr. George B. Hanna, stated in the N.I. House of Commons on March 20 that although the question of retaining or abolishing the death penalty was receiving constant and serious consideration, the Government did not intend at present to introduce legislation abolishing the death penalty " for all cases where it now applies in Northern Ireland."—(Belfast Telegraph)

D. IRAQ.— Anglo-Iraqi Defence Agreement. - R.A.F. Evacuation of Iraqi Bases.

The Iraqi Government announced on April 7 that the evacuation of all R.A.F. units stationed at the Habbaniyah and Shaiba bases had been completed, in accordance with the special agreement signed on April 4, 1955, between Britain and Iraq in conjunction with Britain's adherence to the Baghdad Pact. The agreement had provided for the evacuation of R.A.F. personnel from these bases within one year.—(Times)

E. UNITED KINGDOM. — Public Service Security.

Mr. Henry Brooke (Financial Secretary to the Treasury) stated in a written parliamentary reply on March 20 that between 1951 and 1955 no officers of the rank of higher executive officer and upwards, and comparable professional and technical grades, had been dismissed for Communist Party membership, Communist sympathies, association with Communists, or character defects involving a security risk. Seven officers, however, had been transferred, and one had resigned.—(Times)

(Prev. rep. 14750 A.)

A. UNITED STATES. — Foreign Aid, 1956-57. - President Eisenhower's Request to Congress.

President Eisenhower submitted to Congress on March 19 his foreign aid message for the financial year July 1956 - June 1957, in which he recommended the authorization of $4,672,475,000 and the appropriation of $4,859,975,000. The principal items were as follows:

Military Aid	$2,925,000,000
Defence Support	1,130,700,000*
Development Assistance	170,000,000
Technical Co-operation	157,500,000
Foreign Atomic Reactor Projects	5,950,000
Emergency Fund	100,000,000
Additional Aid for Middle East and Africa (non-military)	100,000,000

* Of which $882,000,000 for Asia; $170,000,000 for Near East and Africa, and $78,700,000 for Europe.

Extracts from the President's message are given below.

Soviet Policy. After referring to the success of the foreign aid programme so far, and to the need for its continuance, President Eisenhower said: "Significant testimony to the success of our Mutual Security programmes appears in the new turns and developments of Soviet policy. Aggression through force appears to have been put aside, at least temporarily, and the Communists are now making trade approaches to many nations of the free world. The Soviet manoeuvre, which is still developing, includes offers of bilateral trade arrangements which may involve provision of arms and capital goods as well as technical assistance.

"Had we any reason to believe that the Soviet leaders had abandoned their sinister objectives, and now shared our own high purpose of helping other nations to develop freedom and independence, we would welcome the new Soviet programme, for it appears to have aspects of normal trade expansion and business competition. Its danger for us and for other free nations, however, lies in the traditional Soviet objectives and in the entanglements to which acceptance of their offers may lead.

"Even while we welcome respite from the Soviet policy of threat and violence, we must take careful stock of what still remains of it. The vast Soviet military establishment has not been scrapped. On the contrary, the Soviets and their Communist allies are increasing the strength and effectiveness of their armed forces and providing them with equipment of the most modern design. The threat implicit in this huge aggregation of military power still casts an ominous shadow over the world. There is nothing here to warrant a slackening of our efforts to strengthen the common defence of the free world.

"In its new departures in foreign policy we see that the Soviet Union continues in its familiar pattern of ceaseless probing for opportunities to exploit political and economic weaknesses. We cannot view otherwise the arms traffic in areas where tensions are high and peace is in danger. We cannot view otherwise the extension of credits hand-in-hand with the exploitation of ancient animosities and new hatreds in a world already overburdened with them. We must therefore assume that Soviet expansionism has merely taken on a somewhat different guise and that its fundamental objective is still to disrupt and, in the end, to dominate the free nations. With Soviet leaders openly proclaiming their world aim, it would be folly for us and our friends to relax our collective efforts towards stability and security. . . ."

Need for Long-term Commitments. Requesting authority from Congress to make commitments for up to 10 years to assist underdeveloped countries in long-term projects, the President pointed out that such authority was necessary in order to enable these countries to plan ahead intelligently. The money to fulfil such commitments would come from appropriations for non-military Mutual Security, and would not exceed $100,000,000 in any one year.

Asian Development Funds. The President requested the appropriation of another $100,000,000 for his special fund for economic development in Asia. He also asked for a further $100,000,000 for Asian economic development, to match a similar amount appropriated in 1955-56.

Additional Aid for Middle East and Africa. In asking for the creation of a special fund of $100,000,000 for use in any part of the Middle East or Africa "for non-military Mutual Security programmes which will advance the cause of free world security and economic strength," the President said that the Middle East and Africa were areas in which it was especially important to build "new strength friendly to us." "The United States," he added, "must be in a position to act promptly to help the Governments of this area in their efforts to find solutions for economic and social problems."

Improved Warning and Defence System. It was recommended that about $530,000,000 should be made available to enable the Defence Department "to begin a programme of aiding our allies in developing an even more effective defence based on an improved and better co-ordinated early warning and communications system [see page 14617, second column] and utilizing advanced weapons systems, including missiles, now being procured for our troops." The President emphasized that these advanced weapons were "purely defensive" in character, and posed no threat to any nation which did not initiate aggression. A sum of $195,000,000 had been included initially for NATO countries in 1956-57, and the eventual distribution of the balance of the $530,000,000 would be made "on the basis of later judgment as to their most effective employment world-wide."

Aid to Europe. No economic assistance was proposed for any European NATO country (Greece and Turkey being grouped under Middle East and Asia), but military assistance, including advanced weapons, was still necessary in most of these countries to assist them in maintaining equipment and replacing *matériel* lost by attrition. Continued economic support was, however, required for Berlin, and both military and economic support for Spain and Yugoslavia.

Aid to Middle East, Africa, and Asia. In Asia and the Middle East serious risk of aggression still existed, and the programme recommended approximately $1,640,000,000 in military assistance for countries in these regions which had to maintain substantial forces in the field to resist possible attacks. Economic aid was also proposed for those of America's allies whose own resources could not support their essential defence effort, it was designed partly to assist non-military projects which furthered defence activities, partly to help build internal resources and economic stability, and partly to contribute to the recipients' programmes of economic development. Provision was also made for economic assistance to countries in the area which received no military assistance, where it would contribute to the countries' economic strength and thus to their ability to retain their independence.

The President explained that his request for military assistance authorization in 1956-57 was substantially larger than in the past two years, when unexpended balances had been utilized to the extent of $2,500,000,000 - $3,000,000,000. An increase in appropriations was now necessary in order to maintain the flow of military assistance in subsequent years.

B. UNITED KINGDOM. — Continuation of Newsprint Rationing. - Statement by President of Board of Trade.

The President of the Board of Trade (Mr. Thorneycroft) announced on Feb. 16 that the Government had reconsidered its earlier decision to remove statutory controls over the delivery of newsprint and the size of newspapers, and that newsprint rationing would accordingly continue. His statement (in the form of a written parliamentary answer) was as follows:

"On Aug. 15 last [see 14421 A] I announced the Government's intention to remove all statutory controls over the delivery of newsprint and the sizes of newspapers, provided that satisfactory arrangements could be made among the newspapers to meet the needs of the small users. All the newspapers, however, with one exception, have asked that rationing by statutory control should be continued for the time being, and have told me that they are unable to safeguard the position of the small user.

"In such circumstances I have decided that the necessary Order continuing the control should be laid before Parliament. I propose, however, to license an increased number of pages for *The Times*. I am doing this because this newspaper now intends to use exclusively a type of paper other than newsprint, which will be obtained entirely from new capacity and will release to other newspapers all the newsprint it would otherwise have used."

Mr. F. Bishop, M.P., general manager of the Newsprint Society Co. Ltd., stated on Feb. 22 that the schedule of permitted paging for newspapers would remain as hitherto except in the case of newspapers selling at 2½d. and at 4d. and over. He pointed out that such newspapers—including the popular dailies formerly sold at 1½d.—had increased their prices in recent months and would therefore become entitled to a "substantial increase" in their permitted paging.

Under the new arrangements, the average number of pages varied from nine for dailies costing 1½d. to 15 for those costing 4d.

C. SOVIET UNION. — New Chairman of T.U. Council.

It was announced in Moscow on March 16 that M. Nikolai Shvernik had resigned the chairmanship of the All-Union Council of Trade Unions at his own request and had been succeeded by M. Viktor Grishin, a member of the central committee of the Communist Party and secretary of the Moscow Regional Committee. M. Shvernik, formerly chairman of the Presidium of the Supreme Soviet (the equivalent of President), remained an alternate member of the presidium of the party's Central Committee and chairman of the party's Control Commission. It was reported that he had recently been in ill-health.—(Soviet Weekly - New York Times)

(Prev. rep. 12797 A, page 12800.)

D. FINLAND. — Ending of General Strike.

The general strike in Finland ended on March 20, after having lasted for 20 days, when the Government's mediation proposals were accepted by the trade unions and the employers' representatives. All workers received an average wage increase of 10 per cent to compensate for the higher cost of living, whilst the employers were compensated by reductions in income-tax and children's allowance contributions.

A. INDIA. — Calendar Reform. - Proposals for Adoption of "Saka Year." - Report and Recommendations of Calendar Reform Committee.

A report was submitted to the Government of India in November last by a Calendar Reform Committee which had been set up in 1952 by the Indian Council of Scientific and Industrial Research "to submit proposals for an accurate and uniform calendar for the whole of India after examining the existing calendars which are being followed in the country at present, and after a scientific study of the subject." The report recommended the nation-wide adoption of the "Saka year" (described below) for the purposes of a unified National Calendar.

A summary of the report and recommendations of the Calendar Reform Committee, together with an account of the considerations involved, was published on Nov. 19, 1954, by the Indian High Commissioner's Office in London, and is reproduced below under cross-headings.

Need for Calendar Reform. In a Note on the Committee's report, the Central Government pointed out that India had "been suffering from a calendar confusion which very often places the Central and State Governments in difficulty." Although, for practical purposes, India had been using the Gregorian Calendar since 1757 (i.e. since the beginning of British rule), and although that calendar was now in world-wide use, it was nevertheless "inconvenient and unscientific," and India had made proposals to the United Nations to replace the Gregorian Calendar by a new World Calendar—a project, however, which could only be decided upon by international agreement. The article continued .

"Though India is a secular State, the Central Government and the State Governments have to declare a number of holidays in advance. These holidays are of four different kinds . (1) Holidays given according to the Gregorian Calendar (e.g. Mahatma Gandhi's birthday), which present no problem. (2) Holidays which are given according to the position of the Sun (3) Others which are given according to the Luni-Solar calendar. (4) Holidays for Moslems and Christians.

"It is the class of holidays under categories (2) and (3) which are the most numerous, and the calculations of their dates are done by astrologers who act as consultants to each State In making these calculations for the positions of the sun and moon in advance—technically known as compiling the Ephemerides—the formulae given in ancient and medieval astronomical treatises are used with corrections But these formulae, even with corrections, are incorrect, and formulae used from different astronomical treatises sometimes give different dates for religious festivals and observances It therefore not infrequently happens that according to different schools of astrologers the same festival falls on different dates in different parts of India, and on different dates even in the same city This causes a problem for every [State] Government"

After commenting that "calendars are based partly on science, which nobody is permitted to violate, and partly on conventions, which are man-made and vary from place to place," the article went on to point out the many discrepancies between the various calendars at present used in India For example, whereas Indian almanac-makers still took the length of the year as 365 258756 days, as laid down in the *Surya Siddhanta* about 500 A D , modern astronomical research had shown the length of the tropical year to be 365 242196 days. Thus "in the course of nearly 1,400 years the beginning of the year has advanced by 23 2 days, with the result that the Indian solar year, instead of starting on the day following the vernal equinox (i.e. March 22) as prescribed by the *Surya Siddhanta*, starts on April 13 or 14."

It was pointed out that an analogous situation had arisen in Europe, when an error of 10 days resulting from the use of the Julian Calendar (i.e the calendar introduced by Julius Caesar in Roman times) had been rectified in 1582 by a proclamation of Pope Gregory XIII whereby Friday, October 5, was proclaimed as Friday, October 15, and new leap year rules were introduced. [This was the beginning of the Gregorian Calendar, now used in nearly all countries.]

The article continued "Unlike Europe, where the Pope in medieval times possessed an authority which everyone in Catholic Europe obeyed, India had a multiplicity of eras and year-beginnings due to her history during the years 500-1200 A.D But for calendaric calculations our astronomers all over India have been using only the Saka era since 500 A D , and in local almanacs other eras are simply imposed on it." For this reason the Calendar Reform Committee had recommended the adoption of the "Saka year" for the purposes of "a unitary calendar which can be used in all parts of the country for the observance of Hindu religious rites, as well as for civil purposes by the public."

Recommendations of Calendar Reform Committee. These were, in brief, as follows :

(1) For all official purposes, both the Central and the State Governments should use the Saka era It was suggested that the change-over should take place from the Saka year 1878, Chaitra 1 (1956, March 21). If this was accepted, the last month of the Saka year 1877 would have an extra six or seven days.

(2) In addition, the Calendar Reform Committee had devised a solar calendar for all-India use in which it was proposed to abandon the calculations of the *Surya Siddhanta* (in which the solar months vary from 29 to 32 days). The new solar calendar would fix the dates of Hindu, Buddhist, and Jainic festivals in accordance with the solar motion—i.e., it would lay down a uniform procedure for the calculation of such dates, which at present differ widely in different parts of India In certain cases, however, festivals customarily fixed by reference to the lunar calendar would be retained—e.g., the religious festival of *Janmastami*, the birthday of Sri Krishna.

(3) Every State would be asked to give its opinion on the proposals and to signify whether or not it accepted the new dates suggested for the various religious festivals.

The Saka Year. The Saka year—which begins on March 22 (March 21 in a leap year)—has 365 days normally, and 366 in a leap year The 12 months of the Saka year are as follows, the number of days in the month and the first day of the month (corresponding to the Gregorian Calendar) being shown in parentheses : Chaitra (30, except in a leap year , March 22, except in a leap year) , Vaisakha (31, April 21) ; Jyaishtha (31, May 22) ; Asadha (31, June 22) ; Sravana (31, July 23) ; Bhadra (31, Aug 23) , Asvina (30, Sept. 23) ; Kartika (30, Oct 23) ; Agrahayana (30, Nov. 22) , Pausa (30, Dec. 22) ; Magha (30, Jan. 21) . Pharguna (30, Feb. 20). The year 1956 A.D. corresponds to the Saka year 1877-78

On several occasions during the past few years the Government of India has made proposals to various U.N. organs—e.g. Unesco and the Economic and Social Council—for the adoption of a World Calendar to supersede the Gregorian and other calendars at present in use.—(Indian High Commissioner's Office, London - The Hindu, Madras - The Statesman, Calcutta)

B. CANADA. — Three-Year Wheat Agreement with Soviet Union. - Wheat Sales to Poland, Czechoslovakia and Hungary. - Butter Sales to Czechoslovakia and Eastern Germany.

A three-year Canadian-Soviet trade agreement, covering the purchase by the U.S.S.R. of between 1,200,000 and 1,500,000 metric tons (44,000,000 - 55,100,000 bushels) of Canadian wheat in annual quantities of 400,000 - 500,000 metric tons, was signed in Ottawa on Feb. 29. The agreement stipulated that the price to be paid by the Soviet Union would be the same as that charged by the Canadian Wheat Board for sales to its major customers at such times as the Soviet purchases took place ; at current prices this represented an amount of some $60,000,000 - $75,000,000. The agreement also provided for the reciprocal granting of most-favoured-nation treatment for mutual trade, though the right of either country to apply prohibitions or restrictions of any kind in order to protect its "essential security interests" was expressly recognized.

The agreement with the Soviet Union was one of a number made by Canada with Eastern European countries during the past nine months in an attempt to dispose of her large stocks of surplus wheat.

The first such agreement, with Poland, had been concluded in June 1955, details being announced in the Canadian Parliament on June 30 It was then stated that Poland would buy 10,000,000 bushels of wheat for $19,000,000, but would pay only $3,000,000 immediately, the balance being advanced by a loan from a Canadian commercial bank, which was guaranteed by the Canadian Government. Mr. St. Laurent, the Prime Minister, answering strong Opposition criticisms of the agreement, admitted that the Polish Government had made "no pledge of assets" which would ensure Canada against a possible loss, but said that there was an undertaking to make the payment and that the Government expected that this undertaking would be carried out.

An agreement with Czechoslovakia, covering the sale in the next 12 months of between 3,700,000 and 11,840,000 bushels of Canadian wheat for $5,000,000-$17,000,000, was concluded on March 7, 1956, whilst on March 13 it was announced in Ottawa that Hungary would purchase 5,500,000 bushels of Canadian wheat

It was also disclosed during the second half of 1955 that Canada was shipping large quantities of surplus butter to Eastern European countries at prices some 20 per cent below the domestic support price of 58 cents a lb. Although no precise details were officially published, it was reported that some 10,000,000 lb. had been disposed of, largely to Czechoslovakia and (*via* a Dutch importer) to Eastern Germany. In reply to a New Zealand protest about this "dumping" of Canadian butter, the Canadian Minister of Agriculture, Mr. Gardiner, gave an assurance on Dec. 17 that Canada would not undersell New Zealand butter in any market in which New Zealand was at present doing business.—(Montreal Star - Times - New York Times) **(Prev. rep. 13654 A ; Mr. Lester Pearson's Soviet Visit, 14630 C.)**

C. AUSTRALIA. — Western Australian Elections.

State elections held in Western Australia on April 7 resulted in a victory for Mr. R. A. G. Hawke's Labour Government, which was returned to office with an increased majority. Labour won 29 seats and the Liberal-Country party 21 ; at the dissolution the Government and Opposition each had 25 seats. (Australian News and Information Bureau) **(13160 A.)**

A. UNITED KINGDOM. — Balance of Payments in 1955. - Deficit of £103,000,000.

A White Paper (Cmd. 9731) published on April 4 showed that the U.K. had a deficit of £103,000,000 in its balance of payments during 1955, comprising a surplus of £15,000,000 in the first half of the year and a deficit of £118,000,000 in the second half. Excluding U.S. defence aid totalling £44,000,000, the deficit for the year was £147,000,000, compared with a surplus of £155,000,000 in 1954 (excluding £50,000,000 in U.S. defence aid). Details are shown in the following table:

* Provisional.

The sharp decline in the balance of current transactions between the first and second halves of 1955 was largely due to the increased payments made Total debits increased by £143,000,000 (imports up by £43,000,000, payment on interest, profits and dividends by £42,000,000, travel payments by £31,000,000, and shipping payments by £25,000,000) and defence aid grants fell by £22,000,000, this total worsening of £165,000,000 was only offset to the extent of £32,000,000 by higher receipts, making a net deterioration of £133,000,000 Although this was less than the deterioration of £143,000,000 between the first and second halves of 1954, it marked the third successive half-year in which the position had deteriorated.

Comparing 1955 as a whole with 1954, the position deteriorated by £308,000,000. Payments rose by £549,000,000 and defence aid receipts fell by £6,000,000, and this was only offset to the extent of £247,000,000 by increased receipts. The higher payments were mainly attributable to the increase of £404,000,000 in imports and £80,000,000 for shipping. Receipts from shipping also rose, but only by £50,000,000, whilst receipts from exports rose by £244,000,000.

Regional Balance of Payments. The U.K. deficit of £103,000,000 was made up of a surplus of £215,000,000 with the rest of the sterling area, which was more than counterbalanced by a deficit of £318,000,000 with non-sterling areas. The White Paper pointed out that the deterioration in the U.K. current balance (including defence aid) with the non-sterling world started in the middle of 1954, and that the most significant part of it was in the balance of visible trade, imports rising much more rapidly than export earnings. Because of the U.K. dock strike in October 1954, export earnings in the second half of 1954 were lower than they would otherwise have been, and those in the first half of 1955 somewhat higher, and if allowance was made for this the picture was one of "a rapid worsening in the visible balance between the first half of 1954 and the second half, and thereafter a more gradual but continuing deterioration down to the end of 1955."

The payments figures on a regional basis are analysed in greater detail in the following table.

	1952	1953	1954 Jan.-June	1954 July-Dec.	1955 Jan.-June	1955 July-Dec *
			(£ million)			
Dollar area†	—173	— 14	+ 25	—112	— 77	—130
Other Western Hemisphere	+ 93	— 24	+ 1	+ 7	+ 8	— 4
O.E.E.C. countries	— 31	+ 86	+ 44	— 5	— 21	— 62
Other non-sterling countries	+ 1	— 13	+ 5	— 23	— 9	— 17
Rest of sterling area	+363	+156	+106	+166	+119	+ 96
Non-territorial organizations	— 6	— 14	— 7	— 2	— 5	— 1
Total	+247	+177	+174	+ 31	+ 15	—118

* Provisional. † After allowing for U.S. defence aid of £121,000,000 in 1952, £102,000,000 in 1953, £24,000,000 in January-June 1954, £26,000,000 in July-December 1954, £33,000,000 in January-June 1955, and £11,000,000 in July-December 1955

The worsening of the payments position (by £308,000,000) between 1954 and 1955 was shared by all areas. Payments with O.E.E.C. countries deteriorated by £122,000,000, with the dollar area by £120,000,000, with the rest of the sterling area by £57,000,000, and with other areas by £12,000,000; the only slight improvement was one of £3,000,000 in payments to non-territorial organizations

The increase in the dollar deficit between 1954 and 1955 was almost entirely due to the higher value of dollar imports, which rose by £170,000,000 between the two years, whilst dollar exports rose by only £65,000,000. The increase in "invisible" dollar payments (£39,000,000), on the other hand, was largely counterbalanced by the £32,000,000 increase in "invisible" dollar receipts Imports from O.E.E.C. countries similarly increased by £118,000,000, whilst exports to those countries rose by only £40,000,000. "Invisible" payments likewise rose by £72,000,000 (of which £48,000,000 was accounted for by shipping), whilst "invisible" receipts rose by only £28,000,000.

Sterling Area Gold and Dollar Accounts. The sterling area had a net gold and dollar deficit during 1955 of £229,000,000 ($642,000,000), compared with a surplus in 1954 of £87,000,000 ($244,000,000). This deficit was wholly incurred by transactions with non-dollar areas, the U.K. deficit with the dollar area (£188,000,000, or $527,000,000) being exactly counterbalanced by the surplus of the rest of the sterling area with the dollar area.

A summary table of the sterling area's gold and dollar accounts in the 18 months July 1954 - December 1955 is brought below.

	1954 July - Dec		1955 Jan. - June		1955 July - Dec	
	£	$	£	$	£	$
Transactions with Dollar Area

* Corresponding to change in gold and dollar reserves

Britain's Position in the E.P.U. The U.K. had a net deficit of £121,000,000 in the E.P.U. in the second half of 1955, compared with a net surplus of £39,000,000 in the first half of the year and a net surplus of £59,000,000 in the whole of 1954. The overall deficit of £82,000,000 with the E.P.U. in the whole of 1955 was accounted for by a U.K. deficit of £108,000,000, partly offset by a surplus by the rest of the sterling area of £33,000,000, with other payments giving a net deficit of £7,000,000.

Overseas Investment. The White Paper gave, for the first time, round figures of U.K. annual net overseas investment since 1952. These showed that net long-term investment by the U.K. in the rest of the world (excluding inter-government lending, but including U.K. Government loans for commercial projects and borrowing by overseas Governments in the London market), less net long-term investment by the rest of the world in the U.K., was estimated in round figures at £150,000,000 in 1952, £175,000,000 in 1953, £200,000,000 in 1954, and £125,000,000 in 1955. Much the greater part of this investment represented net investment in the rest of the sterling area (a little over £125,000,000 in 1952, a little over £150,000,000 in 1953, rather under £175,000,000 in 1954, and about £100,000,000 in 1955).

The White Paper said that new investment in the U.K. from overseas was approximately balanced by sales and redemptions by overseas holders of their U.K. investments during this four-year period, so that the annual average of approximately £150,000,000-

£175,000,000 of net U.K. investment overseas represented new investment, less sales and redemptions. It was emphasized, however, that these estimates were subject to a considerable margin of error—largely because so much of the new investment overseas was private investment in the sterling area, for which it was particularly difficult to obtain accurate figures

U.K. Sterling Liabilities, etc. Total sterling liabilities (i.e. sterling balances held by other countries) on Dec 31, 1955, amounted to £3,742,000,000, compared with £3,865,000,000 on June 30, 1955, and £3,902,000,000 and £3,819,000,000 (revised figures) on Dec. 31 and June 30, 1954, respectively. During 1955 the sterling balances held by British Colonies increased by £58,000,000, but those held by other sterling area countries fell by £132,000,000. Sterling balances held by non-sterling area countries fell by £86,000,000, principally because of the £39,000,000 fall in balances held by the dollar area and a £34,000,000 fall in balances held by O.E.E.C. countries. Official U.K. holdings of non-dollar currencies rose from £13,000,000 on Dec. 31, 1954, to £18,000,000 on June 30, 1955, but declined again to £13,000,000 on Dec. 31, 1955. (Cmd. 9731) **(Prev. rep. Balance of Payments, 14235 A.)**

A. SWEDEN - SOVIET UNION. — Swedish Prime Minister's Visit to Moscow.

The Swedish Prime Minister, Hr. Tage Erlander, and the Minister of the Interior, Hr. Hedlund, visited Moscow from March 29 - April 5 as guests of the Soviet Government. During their visit they had a number of discussions with Marshal Bulganin, M. Khrushchov, M. Molotov, and other Soviet leaders.

A joint communiqué issued on April 3 stated that the talks, which had been conducted in the "friendly and good-neighbourly spirit which characterizes the relationship between Sweden and the Soviet Union," had dealt both with Swedish-Soviet relations and with general international questions of interest to both countries. The communiqué stated:

(1) Both countries were interested in a considerable increase of their mutual commercial exchanges The agreement on safety at sea concluded in 1954, and its subsequent extension, were considered a good example of successful co-operation between the two countries in a practical way. The new Swedish-Soviet air agreement (see 14804 C) would lead to the start of direct air traffic between Stockholm and Moscow in the near future.

(2) It had been agreed to start negotiations in Moscow in the near future for the implementation of the Swedish-Soviet agreement of 1941 concerning outstanding mutual claims in connexion with the incorporation of the Baltic Republics in the Soviet Union. [The net amount of Swedish claims in this connexion, after deduction of Soviet counter-claims, was given as 2,700,000 kronor.]

(3) As regards cultural relations, scientific and cultural contacts, to which the two countries attached great importance, had lately expanded in a gratifying way. It had been agreed that visits of artists, study delegations, and technical experts in various fields, as well as the expansion of sports meetings and tourism, would greatly strengthen relations and mutual understanding between the two peoples. The State organizations in both countries administering cultural contacts with foreign countries would be instructed to further the expansion of all such contacts in a suitable way.

The following concrete schemes would also be implemented in the near future . exchanges of qualified research workers in medicine, natural sciences, and technical sciences, the cost of which should be borne by the receiving countries ; the admission of research workers of one country to archives and libraries in the other ; and greater exchanges of literature and publications between scientific and cultural institutions in both countries.

The Swedish Ministers had expressed the wish to send an expert delegation to the Soviet Union to study the organization of Soviet higher education, whilst the Soviet Ministers had shown themselves interested in studying technical education in Sweden ; detailed arrangements would be worked out through diplomatic channels

(4) The Swedish Ministers had stressed the great importance attached by them to the fate of Hr Raoul Wallenberg [a Swedish diplomat who disappeared in Budapest after the Russian occupation of that city in 1945, shortly before the end of the war ; previous Swedish enquiries had always elicited Soviet denials of any knowledge of the case] The Swedish Ministers had handed to the Soviet side the material collected concerning Hr Wallenberg, with the request that the Soviet authorities should study and examine it, to which the Soviet Ministers had agreed. It had also been agreed that if Hr. Wallenberg was still alive in the Soviet Union he would be permitted to return, and that the results of the Soviet investigations would be notified to the Swedish Government through diplomatic channels.

(5) Any requests by Swedish or former Swedish nationals resident in the Soviet Union for permission to return to Sweden, or for members of their families to return to Sweden, would be given favourable consideration by the Soviet authorities provided that the persons concerned wished to leave.

Correspondingly, the Swedish authorities would place no obstacle in the way of Soviet or former Soviet nationals, or members of their families, wishing to leave Sweden for the Soviet Union

(6) During the conversations on the international situation the Swedish Ministers had pointed out (*a*) that Sweden was maintaining her traditional policy of keeping aloof from alliances with the aim of safeguarding her neutrality in the event of war, within the framework of her obligations as a member of the U.N , and (*b*) that in the Swedish view such a foreign policy not only corresponded to Sweden's own interests but was also furthering peaceful and friendly relations in her part of Europe The Soviet Ministers had declared that the Soviet Union would, as hitherto, respect Sweden's policy of peace and non-alignment

Furthermore, each side had stressed its country's interest in seeking to co-operate in the greatest possible relaxation of international tension and in the development of peaceful co-operation between the peoples, based on the principles of the U.N. Charter ; this included, in particular, respect for the independence and sovereignty of member-countries, non-aggression, and mutual abstention from interference in internal affairs.

(7) Both sides had expressed their willingness to support the "continued efforts at achieving practical results, both as regards general disarmament and the reduction of armed forces, together with the prohibition and control of atomic weapons, and in the matter of the development of international co-operation in the peaceful uses of atomic energy."

(8) The discussions over such a wide field had brought about a deeper understanding of the views of each side, and would help to strengthen the good neighbourly relationship between Sweden and the Soviet Union.

Hr. Erlander and Hr. Hedlund left Moscow on April 5, returning to Stockholm on April 11 after brief visits to the Ukraine, Georgia and Armenia. (Svenska Dagbladet, Stockholm) **(Prev. rep. Danish Ministerial Visit, 14768 A.)**

B. PERU - ECUADOR. — Exchange of Ambassadors. - Pan-American Inquiry into Amazon Frontier Dispute.

It was announced in Lima and Quito on March 1 that Peru and Ecuador had agreed to the reciprocal appointment of ambassadors. Although no formal break in diplomatic relations had taken place, both ambassadorial posts had been vacant for some time as a result of a fresh dispute over their frontier in the Upper Amazon area. On Sept. 8 a special emergency session of the Council of the Organization of American States had been called in Washington to hear a formal Ecuadorean charge that Peru was massing 20,000-30,000 troops on her frontiers, and that Peruvian naval forces were menacing the Ecuadorean coastline. On the same day a special meeting took place in Rio de Janeiro of the four guarantor countries (the U.S.A., Brazil, Argentina and Chile) of the 1942 treaty between Ecuador and Peru (see page 5090, second column), who decided to despatch immediately a commission of military observers to the frontier area. This commission reported to the Organization of American States on Sept. 14 that an aerial reconnaissance of the frontier area had disclosed no sign of the alleged Peruvian troop concentrations. (Bank of London and South America, Fortnightly Review - New York Herald Tribune) **(Prev. rep. 7221 B.)**

C. CANADA. — Creation of Free Gold Market.

The Canadian Finance Minister, Mr. Walter Harris, announced during the course of his Budget speech on March 21 that restrictions on the purchase and sale of gold by private individuals in Canada would be abolished with immediate effect, and that henceforth Canadians and foreigners would be able to buy and sell gold freely in Canada and to export it without Government permission.

In 1951 restrictions had been lifted to enable Canadian gold producers, under certain conditions, to sell gold in the world markets, and in 1953 the conditions regulating the release of gold for industrial purposes had been liberalized. A further relaxation had been granted in May 1955, when the Government agreed to grant export licences for gold imported into, or purchased in, Canada for safekeeping for account of foreign central banks and official international financial institutions.

It was pointed out in the Canadian press that the Government's latest decision did not imply a return to the gold standard.—(Montreal Star) **(Prev. rep. 12207 A.)**

D. UNITED STATES. — Postponement of Tax Reductions. - Congressional Legislation.

President Eisenhower signed a Bill on March 29 which postponed until April 1, 1957, tax reductions totalling some $3,000,000,000 due to take effect on April 1, 1956. Corporation taxes, due to have been reduced from 52 to 47 per cent, were continued at the higher rate, and existing rates of tax on alcoholic drink, cigarettes, petrol, and motor cars were also maintained. The Bill had been passed by the House of Representatives on March 13 and by the Senate on March 28. (New York Times) **(Prev. rep. 14631 A.)**

A. TUNISIA. — French Recognition of Tunisian Independence. - Tunisian Control of Foreign Affairs and Defence. - Economic Agreements. - Constituent Assembly Elections. - National Front's Electoral Victory. - Resignation of M. Tahar Ben Ammar. - Formation of Bourguiba Cabinet. - M. Salah Ben Youssef's Flight to Libya. - Revival of Terrorism and Fellagha Activities. - French Riots in Tunis. - Population Census.

As a result of negotiations which opened in Paris on Feb. 27, M. Pineau (the French Foreign Minister) and M. Tahar Ben Ammar (the Prime Minister of Tunisia) signed on March 20 a protocol whereby France recognized Tunisia's independence and her right to conduct her own foreign policy and to form her own army. Both countries recognized their interdependence, however, and agreed to define in further negotiations the details of their future co-operation, especially as regards defence and foreign affairs. The text of the protocol was as follows :

"On June 3, 1955, following the negotiations which had taken place between their delegations, the French and Tunisian Governments agreed to recognize Tunisia's full exercise of internal sovereignty They thus made clear their desire to enable the Tunisian people to attain their full development and to assume by stages the control of their destiny.

The two Governments recognize that the harmonious and peaceful development of Franco-Tunisian relations corresponds to the requirements of the modern world. They note with satisfaction that this evolution permits accession to complete sovereignty without suffering for the people or difficulties for the State. They affirm their conviction that, by basing their relations on mutual and complete respect for their respective sovereignties, and on the independence and equality of the two States, France and Tunisia will strengthen the solidarity which unites them, for the greater good of both countries

Following the investiture speech of the French Premier and the reply of His Highness the Bey, reaffirming their common will to promote their relations in the same spirit of peace and friendship, the two Governments opened negotiations in Paris on Feb. 27.

In consequence, France solemnly recognizes the independence of Tunisia.

It follows from this :

(*a*) That the treaty concluded between France and Tunisia on May 12, 1881, can no longer govern Franco-Tunisian relations.

(*b*) That those provisions of the conventions of June 3, 1955, which may be in contradiction with Tunisia's new status as an independent and sovereign State, will be modified or abrogated.

From this it also follows :

(*c*) That Tunisia will exercise her responsibility in the spheres of foreign affairs, security, and defence, and will form a Tunisian national army.

In recognition of each other's sovereignty, France and Tunisia agree to define or complete the ways and means (*modalités*) of an interdependence freely brought about between the two countries, by organizing their co-operation in those spheres in which they have common interests, particularly in matters of defence and foreign affairs.

The agreements between France and Tunisia will define the ways in which France will help Tunisia to build up a Tunisian national army.

The negotiations will be resumed on April 16, 1956, with a view to concluding, as quickly as possible and in accordance with the principles laid down in the present protocol, the agreements necessary for putting them into effect."

The negotiations were conducted on the French side by M. Alain Savary (State Secretary for Morocco and Tunisia), and on the Tunisian side by M. Behi Ladgham (general secretary of the Néo-Destour, who had recently been appointed Vice-Premier in the Tunisian Government) and M. Mohammed Masmoudi (Minister of National Economy). A virtual deadlock arose on March 17 over the wording of the reference in the protocol to Tunisian responsibility for defence and security ; during private discussions between M. Pineau and M. Bourguiba (president of the Néo-Destour), however, a compromise formula was agreed upon, which was incorporated in the final text.

In an interview with the Paris correspondent of the *Times* on March 21, M. Bourguiba stated that Tunisia might wish to join NATO or become associated with it, and denied that he was in favour of neutralism. Tunisian ambassadors would be sent to certain key capitals as soon as negotiations with France were completed, whilst in other capitals Tunisian interests would be looked after by friendly nations, but not necessarily in every case by France France had promised to support Tunisian membership of the U.N. and its subsidiary bodies. After a period of transition, which might last for a few years, all French forces would be expected to evacuate Tunisia, including the base at Bizerta ; if Bizerta became a NATO base, however, French troops would be allowed to man it, though only within the framework of NATO. The new Tunisian army would be under Tunisian command, but Tunisia would seek French aid for equipping and training it, she would, however, pay for such aid, since she did not wish to be morally obliged to a foreign Power, as Jordan was over the Arab Legion. Most of the Home Rule conventions would not need alteration, M. Bourguiba added, except certain economic clauses which still smacked of colonial privilege. The police, however, could not function properly while they were still under French control, as the Tunis riots of March 9 (see below) had made clear, and the process of transfer would have to be accelerated.

Other recent developments affecting Franco-Tunisian relations and the internal situation in Tunisia are described below.

General Elections for Constituent Assembly.

Tunisia's first general elections, which were held on March 25, resulted in a complete victory for the National Front, which won all the 98 seats in the Constituent Assembly ; it comprised the Néo-Destour, the General Union of Tunisian Workers (*Union générale des travailleurs tunisiens*, U.G.T.T.), the Union of Tunisian Craftsmen and Traders (*Union tunisienne des artisans et commerçants*), two smaller organizations, and a number of independent candidates. The "Youssefist" movement (see below) did not put forward any candidates, ordering its supporters to boycott the elections, and the only Opposition candidates were nominated by the Communists ; 84 per cent of the electorate (which consisted of all male Tunisian citizens over 21 and numbered about 750,000) voted in the constituencies contested, the results being as follows : National Front, 597,763, Communists, 7,352.

In six of the eighteen constituencies National Front candidates were returned unopposed, among them being M. Bourguiba. There were over 119,000 abstentions, however, notably in Tunis, where 27,480 out of 67,109 electors did not vote, and at Djerba (M. Salah Ben Youssef's birthplace), where less than 30 per cent of the electorate voted. Independent candidates returned on National Front lists included M. Tahar Ben Ammar, M. Mohammed Chenik (the former Premier), and M. Mohammed Badra (Minister of Agriculture).

Formation of Bourguiba Government.
